THE POPULAR CYCLOPÆDIA OF BIBLICAL LITERATURE,

CONDENSED FROM THE LARGER WORK.

BY JOHN KITTO, D.D.,

AUTHOR OF "THE PICTORIAL BIBLE," "HISTORY OF PALESTINE," "DAILY BIBLE READINGS," ETC

ASSISTED BY NUMEROUS DISTINGUISHED SCHOLARS AND DIVINES, BRITISH, CONTINENTAL, AND AMERICAN

WITH MORE THAN THREE HUNDRED ILLUSTRATIONS

One volume, octavo. 812 pp. Price, cloth, \$ 3.00.

THE POPULAR BIBLICAL CYCLOPÆDIA OF LITERATURE is designed to furnish a DICTIONARY OF THE BIBLE, embodying the products of the best and most recent researches in biblical literature, in which the scholars of Europe and America have been engaged. The work, the result of immense labor and research, and enriched by the contributions of writers of distinguished eminence in the various departments of sacred literature, has been, by universal consent, pronounced the best work of its class extant, and the one best suited to the advanced knowledge of the present day in all the studies connected with theological science.

This work, condensed by the author from his larger work in two volumes, is not only intended for ministers and theological students, but is also particularly adapted to parents, Sabbath-school teachers, and the great body of the religious public. It has been the author's aim to avoid imparting to the work any color of *sectarian* or *denominational* bias. On such points of difference among Christians, the *historical* mode of treatment has been adopted, and care has been taken to provide a fair account of the arguments which have seemed most conclusive to the ablest advocates of the various opinions. The pictorial illustrations — amounting to more than three hundred — are of the very highest order of the art.

EXTRACTS FROM LETTERS.

From Rev. J. J. Carruthers, D.D., Pastor of Second Parish Congregational Church, Portland, Me.

"Kitto's Popular Cyclopædia of Biblical Literature" is by far the most valuable boon presented to the Christian public for many years. The condensation of the work, published by Gould & Lincoln, at little more than a third of the price, is, what it professes to be, a condensation, a reduction, not of ideas, but of words, without in the slightest degree obscuring the meaning of the gifted authors whose joint communications make up this very beautiful and most useful volume. There is no hazard in predicting for such a volume (eight hundred double-columned pages, with three hundred and thirty-six pictorial illustrations, for three dollars!) a rapid sale and constantly extending circulation.

J. J. Carruthers.

From Rev. W. B. Sprague, D.D., Pastor of Second Presbyterian Church, Albany, N. Y.

I have no hesitation in saying that I regard it as the most important auxiliary to the study of the Scriptures, among the great mass of people, of which I have any knowledge. As many of the greatest biblical scholars of the age were put in requisition for the production of the original work, so the substance of what they have written — at least nearly every thing that could be advantageously appropriated by the common reader — has been admirably preserved in this condensed edition. Every Sabbath-school teacher, and indeed every Christian, who is able to do so, ought to possess himself of the work; and the fact that such a work is in existence, may well be regarded as one of the favorable signs of the times in regard to the progress of evangelical knowledge.

W. B. Sprague.

From Rev. Joel Hawes, D.D., Pastor of First Congregational Church, Hartford, Ct.

A capital work, containing a vast amount of information on a great variety of subjects, in a very condensed, yet clear and interesting form. Every family and every Sabbath-school teacher, wishing to understand the Bible, should possess this work.

J. Hawes.

From Rev. Daniel Sharp, D.D., Pastor of Third Baptist Church, Boston.

I have looked over Kitto's Popular Cyclopædia of Biblical Literature, and consider it a most valuable, as it was a much needed, publication. Every minister ought to have a copy of it on his study table. As a book of reference, shedding its collected light on almost all scriptural subjects, and furnishing a brief, but clear and compendious history of the most remarkable events and personages mentioned in the Bible, it cannot fail, when consulted, of being a great help. Every lover of God's word, not to say every Sabbath-school teacher, and every theological student, will find treasures of information in the above-named work.

Daniel Sharp.

From Rev. N. L. Frothingham, D.D., late Pastor of First Congregational (Unitarian) Church, Boston.

I consider that you have done the public a great favor by its republication in so convenient, handsome, and cheap a form. Any commendation from me, of such a work, might seem superfluous at least. But if I might be permitted to say what has most struck me in it, I should mention these two things — the abundant flow of the most recent learning which it contains, and the general candor and freedom from dogmatism with which different views of disputed subjects are presented.

N. L. Frothingham.

From Rev. J. B. Waterbury, D. D., Pastor of Bechoia Street (Congregational) Church, Boston.

It is a most valuable book, suited to the wants of clergymen, and well adapted to aid Sabbath-school teachers in their responsible work. Every family that can afford it, would do well to possess themselves of so important and interesting a volume; to which they might refer in elucidating the Scriptures, and rendering their study not only profitable but delightful. J. B. Waterbury.

From Rev. Cyrus A. Bartol, Pastor of West Congregational (Unitarian) Church, Boston.

It is a most useful and valuable work, containing very important information on subjects of the highest interest and well worthy of a wide circulation. C. A. Bartol.

From Rev. S. W. S. Dutton, Pastor of North Congregational Church, New Haven, Ct.

The Popular Cyclopædia of Biblical Literature is admirably adapted to the use of parents, teachers of the young, and of the community generally; being a judicious abridgment of a larger and very able work, written for critical students in theology. It is, in my judgment, altogether the best book for the purpose which has been published. S. W. S. Dutton.

From Rev. Z. S. Barstow, D. D., Pastor of Congregational Church, Keene, N. H.

I find it well adapted to accomplish its object. It brings into a convenient form, in a single volume, what must be sought for in many volumes without it. And it is hereby recommended to parents, Sabbath-school teachers, and others, as doing a good service in aiding them in the study of the Scriptures. Z. S. Barstow.

From Hon. Thomas S. Williams, Hartford, Ct.

It appears to me to contain a mass of information, in a condensed form, highly important to those who regard the sacred volume; and to Sabbath-school teachers it will prove a most valuable assistant. I hope it will receive an extensive circulation. Thomas S. Williams.

From Rev. Ephraim Peabody, D. D., Pastor of Stone Chapel Congregational (Unitarian) Church, Boston.

It appears to contain the best results of modern scholarship, presented in a clear and condensed form, and may, without hesitation, be recommended as a valuable work to families, to Sunday-school teachers, and indeed to all readers of the sacred records. E. Peabody.

From Rev. Baron Stone, D. D., Pastor of Rowe Street Baptist Church, Boston.

I have examined it with special and unalloyed satisfaction. It has the rare merit of being all that it professes to be, and very few, I am sure, who may consult it, will deny that, in richness and fulness of detail, it surpasses their expectation. Many ministers will find it a valuable auxiliary; but its chief excellence is, that it furnishes just the facilities which are needed by the thousands in families and Sabbath schools, who are engaged in the important business of biblical education. It is in itself a library of reliable information. Baron Stone.

From Rev. A. L. Stone, Pastor of Park Street Congregational Church, Boston.

I have found it a time-saving and labor-saving helper in investigating the significance of the sacred writings, which I could never consent again to be without. I had occasion to commend it, a few days since, to a young man of my people, lately interested in the study of the Scriptures, who desired access to sources of knowledge in respect to biblical matters beyond what he possessed; and this work seemed to him just what he had been looking for in vain. Permit me to express the hope, that not only clergymen and Sabbath-school teachers, but every person who would be at all a student of the Bible, may avail themselves of this judicious and timely contribution to popularized sacred literature. A. L. Stone.

From Rev. John Richards, D. D., Pastor of Congregational Church of Dartmouth College, Hanover, N. H.

In my opinion it is a very useful book; particularly to heads of families, Sabbath-school teachers, and all others interested in the study of the Scriptures. John Richards.

From Rev. Thomas Laurie, Pastor of Congregational Church, West Roxbury.

I would heartily recommend it to all who wish a trustworthy compendium of biblical science. Not to compare it inviolably with other excellent Bible Dictionaries, there is one excellence of this work that must render it superior to all others, and that is, that while others were "got up," this, if I may so express it, was "reduced down." Other Bible Dictionaries are compilations expressly got up for Sabbath-school teachers and Bible classes. But this is a work of much higher character, the result of far greater labor and research, prepared originally for the use of the most advanced biblical scholars, condensed into its present form that the fruits of that labor and research might be brought within reach of a greater number. Still we have the largest Popular Encyclopedia of strictly Biblical Literature that exists. Some of the abbreviations also are decided improvements on the larger edition. It is another excellence of this work, that it embodies the most recent discoveries on the field of biblical science. Previous works of the kind have, to too great an extent, merely retailed the conjectures of past ages, and perpetuated their blunders in sacred geography. No one who has not travelled in the East, and consulted them on the spot, has any idea of the mass of rubbish they contain. I know of nothing better than the work before us. It fills up a gap that has long existed in our helps for the study of the Sacred Scriptures. T. Laurie.

From Rev. J. H. Kennard, Pastor of Truth Baptist Church, Philadelphia.

No Bible student should be without this important assistant. Those who have but few books, will find in this volume the essence of many standard works; and those who have but little time for reading, will here find a rich store of knowledge for their immediate use. J. H. Kennard.

From Rev. Thomas H. Skinner, D. D., Pastor of Carmine Presbyterian Church, New York.

I think it a work of very great value; while it suits the close student, it is strictly "popular," and adapted to readers of every degree of capacity and intelligence. Most earnestly do I desire that so rich a treasure may be in the possession of all who are interested in the study of the Scriptures. The price at which you offer it is a trifle indeed, compared with what the purchaser obtains for it. Thomas H. Skinner.

From Rev. John Overton Choules, D. D., Newport, R. I.

No minister who has seen this admirable volume would willingly do without it, for if he has the various authorities which have been used in the compilation of the volume, yet in its pages he will have a condensed result of investigation on all points of interest, and will be saved from much labor, or guided into profitable methods and avenues of research. To heads of families and Sunday school teachers, this work has claims of high interest. John O. Choules.

From Rev. Thomas Starr King, Pastor of Hollis Street Congregational (Unitarian) Church, Boston.

A constant use of the whole work, for several years, has led me to believe that it is the best Biblical Dictionary in the English language. The abridgments made in your edition do not, so far as I can judge, lessen its value to the majority of those who need such a volume; and I cordially wish you success in your enterprise. T. S. King.

From Rev. Albert Barnes, D. D., Author of "Notes on the Scriptures," and Pastor of the First Presbyterian Church, Philadelphia.

I feel greatly obliged to you for the volume of Kitto abridged. I have not had time to examine it as an abridgment. I am free, however, to speak of the original, which I have had in use for several years, and which I regard as an exceedingly valuable work. In my own studies it has superseded all other works of a similar nature, as I think it will wherever it is known. Albert Barnes.

From Rev. Samuel M. Worcester, D. D., Pastor of the Tabernacle (Congregational) Church, Salem.

I have a copy of "the larger work," which I am disposed to think is really less valuable, and therefore less worthy to be recommended to almost any class of readers, than the edition which you now offer for the passage and the benefit of the Christian public. From the examination which I have been able to make of some important articles, I shall not be surprised if your edition shall have a decided preference with those who desire to have as much wheat, with as little as possible both of chaff and tares. Samuel M. Worcester.

From John Dowling, D. D., Author of "History of Romanism," etc., and Pastor of the Broadway Baptist Church, New York.

It is incomparably the most valuable work of its kind that has ever been published in this country, inasmuch as it embodies, besides all that was valuable in the older Cyclopedias, the most recent researches in biblical literature of the ablest scholars, both in the old world and the new. It is just such a work as every minister, Sabbath-school teacher, and Christian father of a family ought to have constantly at hand, side by side with his Bible, to answer a thousand questions which will constantly occur to all who desire to furnish their own minds for the work of instruction in the truths of God's word, and who study to show themselves workmen that need not to be ashamed. I do most cordially thank the enterprising publishers for presenting this valuable work to the American public in so attractive a form, and sincerely hope they will be rewarded by a sale commensurate with its merits. John Dowling.

From Rev. W. T. Dwight, D. D., Pastor of Third Parish Congregational Church, Portland, Me.

I regard it as far the most valuable work of the kind which has been published in this country. The price of the work, which is three dollars, is very reasonable for a book which contains so many engravings, and an amount of letter-press sufficient for four octavo volumes. W. T. Dwight.

From Rev. Gardner Spring, D. D., Pastor of the Brick Church Chapel Presbyterian Church, New York.

I am gratified to express the opinion, that for the variety, accuracy, and comprehensiveness of its articles, it is a most valuable volume. The biblical student, while he may not dispense with other sources of information, will find in Kitto that which will save him no little time and labor. Gardner Spring.

From Rev. J. M. Wainwright, D. D., Trinity (Episcopal) Church, New York.

As it is designed to be a book of reference, I have turned, on various occasions, to articles in all parts of the book, and have been uniformly satisfied with the fulness and accuracy of the information contained in them. I do not hesitate, therefore, to recommend the work as being well adapted to the purpose for which it was compiled, and I trust that your enterprise in publishing it will be rewarded. J. M. Wainwright.

From R. E. Pattison, D. D., Professor of Christian Theology in Newton Theological Institution.

It is more valuable, in my opinion, than any other work of the kind in reach of the American student of the Bible. While it is an aid to all, it seems to me indispensable to the minister. It meets the wants of the age in this department of knowledge. R. E. Pattison.

From Howard Malcom, D. D., Author of "Bible Dictionary," etc., and President of University at Lewisburg, Pa.

I regard Kitto's Cyclopædia as vastly superior to any similar work. The author has evidently availed himself of the latest publications, whether critical, historical, geographical, scientific, or antiquarian; and so selected, arranged, and expressed his topics, as to make his work perfectly available to the unlearned, while it is a most welcome aid to the scholar. No one who buys the book will regret his purchase. Howard Malcom.

From Rev. R. C. Waterston, Pastor of Church of the Savior, Congregational (Unitarian) Church, Boston.

I consider it a most desirable work for Sunday-school teachers, and for all students and readers of the Scriptures. It contains a vast amount of important information, thoroughly condensed and admirably stated, while its numerous engravings (which are unusually good) often convey at a glance a more vivid and true idea than could have been given by pages of description. Both for the family and the Sunday school, this volume is invaluable. I shall certainly recommend it to others, as a work of uncommon merit, and hope it will be widely read, and pass through many editions. R. C. Waterston.

From Rev. R. H. Neale, D. D., Pastor of the First Baptist Church, Boston.

Your "Epitome," if epitome it may be called, is a decided improvement on the larger work, inasmuch as, without materially lessening its value as a source of information, it is brought, by its diminished price, within the reach of the many who, in these days of Sabbath schools and Bible classes, are, or ought to be, diligent students of the word of God. Rodin H. Neale.

From Prof. George Bush, Author of "Notes on the Scriptures," New York.

It is made up of the contributions of eminent biblical scholars in Europe and America, each one of whom furnished such articles as his peculiar tastes or studies enabled him to execute with most ability. The result has been an immense accumulation of materials, drawn from the most recent sources on the antiquities, languages, geography, natural history, &c., of the sacred volume, the substance of which is very skillfully condensed in the present volume, and amply illustrated by pictorial designs. George Bush.

From Rev. Horace Bushnell, D. D., Pastor of Third Congregational Church, Hartford, Ct.

I am very glad to see issued from your press an abridgment, for popular use, of Kitto's Cyclopædia. It cannot be less than a very important contribution to the popular literature of the Bible. Horace Bushnell.

From Prof. N. Porter, Yale College, New Haven, Ct.

I do not hesitate to express my belief that the Popular Cyclopædia is the best work of the kind in the language, and is particularly well adapted to the wants of Sabbath-school teachers and all the readers of the Scriptures who wish to be acquainted with the results of the older and more recent investigation in respect to the history, antiquities, and criticism of the Sacred Scriptures.

N. Porter.

From Rev. E. N. Kirk, Pastor of Mount Vernon Congregational Church, Boston.

The work is invaluable to the student of the Bible who has not access to the standard works on biblical literature in several languages. We have no other in this department to be compared with it, for condensing the results of modern researches or Oriental antiquities and topography, which are so valuable in explaining the language of the Bible.

Edward N. Kirk.

From Hon. Edward Everett, L.L.D., Boston.

I have kept it on my table, and have frequently referred to it; and it has been a good deal read by different members of my family. I unite with them in the opinion that it is a valuable work, well adapted for the above-named purpose. It appears to embody, in a popular form, the results of much research, and will promote, I doubt not, the intelligent reading of the Scriptures.

Edward Everett

From Jared Sparks, L.L.D., President of Harvard College.

I am glad to possess the work; and I enclose three dollars, which I understand to be the price of it.

Jared Sparks.

From Hon. Theodore Frelinghuysen, L.L.D., New Brunswick, N. J.

I regard it as a very valuable help to the student of the Bible. It brings to the aid of the reading community, in an instructive and condensed form, a rich treasure of historical and biblical literature, prepared and arranged by some of the best minds, and which could otherwise be gained only by a laborious and patient research, that very few have the leisure to give to the subject. No family would, I think, ever regret the purchase of a book so deserving of a household place.

Theodore Frelinghuysen.

From Hon. John McLean, L.L.D., of Ohio.

It is only necessary to look through this volume to appreciate its value. Although it is an abridgment of the original work, it includes every thing valuable to the general reader, omitting such parts only of the original as could be of little interest, except to a theological student. There is no work I have seen which contains so much biblical knowledge, alphabetically arranged under appropriate heads, in so condensed a form, and which is sold so cheap. Under a leading word is to be found in this book, whether it relate to natural science or scriptural illustration, enough to satisfy every inquirer. It has been prepared with much labor and research, and shows in the authors a profound knowledge of the languages in which the Scriptures were composed and translated, and also of the history, local and general, of contemporaneous customs and events. Next to the Bible, this dictionary of it contains more interesting knowledge than any work of the same size, and it should be found in every family, in our public schools, as well as in all our academies and colleges.

John McLean.

From Hon. Simon Greenleaf, L.L.D.

A book that will prove highly useful to all persons engaged in the study of the Bible, or in teaching its sacred truths to the young. I hope, therefore, that it will be widely circulated.

Simon Greenleaf.

From Hon. Robert C. Winthrop, L.L.D., Boston.

I have examined with great pleasure your edition of Kitto's Popular Cyclopædia of Biblical Literature. It seems to me a most convenient and valuable aid to the study of the Scriptures, and I am glad that you have been able to publish it at so reasonable a price. It can hardly fail to commend itself to those who would teach, and to those who would learn, something more than the mere letter of the inspired volume.

Robert C. Winthrop.

From Rev. John S. Stone, D.D., Rector of Christ (Episcopal) Church, Brooklyn, N. Y.

I have examined the points of most special interest to the Episcopal church, as well as several others of more general interest, and now beg leave to say that I consider the work candid, learned, and well adapted to usefulness.

John S. Stone.

From Rev. A. Bond, D.D., Pastor of Second Congregational Church, Norwich, Ct.

I rejoice to see the abridgment out in such beautiful style. As now offered, it furnishes, in convenient form, a most valuable auxiliary to the facilities provided to aid Sabbath-school teachers and others in prosecuting the study of the Scriptures. The character of the writers whose contributions enrich this volume, is a satisfactory pledge of its literary merit and theological soundness. In this publication you have rendered important service to the cause of sacred literature, which will, I doubt not, be highly appreciated. The work, when known, will not fail to find its way into the libraries of private Christians, as a compact and beautifully executed manual for constant reference, as a *thesaurus* of most valuable information on the numerous articles of which it treats. It is to be hoped that many will think of it as a rich *new year's present*, that will be specially acceptable to all who love the literature of the Bible.

A. Bond.

From Henry J. Ripley, D.D., Author of "Notes on the Scriptures," and Professor in Newton Theological Institution.

I have no hesitation in recommending it as an excellent family book for the elucidation of the sacred volume, and consequently for fostering an interest in the Bible. It would be invaluable to Sabbath-school teachers, and of great utility to preachers. It every where shows evidence of research, and is particular and accurate in its details, sometimes exhibiting in a mere parenthetic remark unusual copiousness of information and discrimination of statement. It employs appropriate authorities, both less and more modern, as to questions of sacred criticism, of history and geography, and gives the reader the results of recent learned investigations. If the purpose of this book is gained, for which it presents so ample an apparatus, scriptural knowledge will be increased.

H. J. Ripley.

From the Puritan Recorder.

Here we have the larger work, referred to in the title, boiled down more than one half, and made more strong and rich by the evaporation. To that numerous and most useful class of laborers in the Lord's vineyard, the Sabbath-school teachers, we would respectfully offer our advice to appropriate three dollars each to make themselves possessors of this valuable help for the discharge of their duties. If any one of them should not have the money, we counsel him "to sell his garment and buy one."

PREFACE.

THE CYCLOPÆDIA OF BIBLICAL LITERATURE was designed to furnish a Dictionary of the Bible, not framed, as others had been, out of old materials, but embodying the products of the best and most recent researches in Biblical Literature, in which the scholars of this country and of the continent had been engaged. That work — the result of an immense labour and research, and enriched by the contributions of writers of distinguished eminence in the various departments of Sacred Literature — has been, by universal consent, pronounced to be the first work of its class, and the one best suited to the advanced knowledge of the present day, in all the studies connected with Theological Science. But although that Cyclopædia is regarded as indispensable to the libraries of all Ministers and Theological Students, it has been concluded that a Compendious Abridgment of its contents, embracing all the matter suited to popular and general use, might be acceptable to very many whose studies have not created a need for the larger work, or whose means do not enable them to secure the possession of it. In the present volume an attempt has, therefore, been made to supply this want, by providing such a popular Abridgment of the Cyclopædia of Biblical Literature as may be suited to the use of the great body of the religious public, and which may be expected to be of essential service to parents and teachers in the important business of Biblical Education, while to many young persons it may serve as an introduction to the more extensive work.

The original publication is above twice the size of the present. The Epitome now offered for popular use has been prepared with much care and solicitude, by the condensation of most of the matter in the original work, and by the entire omission of some articles which were supposed to be of less interest to the general reader than to the Clergyman and the Theological

Student. In the work, as it here stands, is offered such an exhibition of the results of large research, without the details and authorities, as could not, it is believed, have been produced, had not the larger Cyclopædia previously existed, and its valuable materials been made available for this service. Drawn from such a source, it is believed that this Abridgment will possess the same superiority over POPULAR Cyclopædias of this class, as the original work confessedly does over those which aspire to higher erudition.

In the Cyclopædia of Biblical Literature the initials of the writers are annexed to their respective contributions. This has not been deemed necessary in the present Abridgment; but a list is given of all the writers who cooperated with the editor in the production of the original work, from which the present Compendium has been formed.

Many articles in the larger Cyclopædia, more especially in the department of Natural History, are treated under the Hebrew or Greek form of word: but, in the present popular Compendium, it has been judged better that these articles should appear under the names by which they are represented in the authorized version of the Scriptures, and take their place in the alphabetical position they hold under these names.

It remains only to be added, that although the editor has taken some part of the labour, and has supervised the whole operation, the substantial work of the Abridgment has been executed by the careful hands of the Reverend JAMES TAYLOR, D. D., of Glasgow.

JOHN KITTO.

LIST OF CONTRIBUTORS.

CYCLOPÆDIA

OF

BIBLICAL LITERATURE

CONDENSED.

AARON, the eldest son of Amram and Jochabad, of the tribe of Levi, and brother of Moses. He was born B.C. 1574 (Hales, n.c. 1730), three years before Moses, and one year before Pharaoh's edict to destroy the male children of the Israelites (Exod. vi. 20; vii. 7). His name first occurs in the mysterious interview which Moses had with the Lord, who appeared to him in the burning bush, while he kept Jethro's flock in Horeb. Among other excuses by which Moses sought to evade the great commission of delivering Israel, one was that he lacked that persuasive readiness of speech (literally was 'not a man of words') which appeared to him essential to such an undertaking. But he was reminded that his brother Aaron possessed in a high degree the endowment which he deemed so needful, and could therefore speak in his name and on his behalf (Exod. iv. 14). During the forty years' absence of Moses in the land of Midian, Aaron had married a woman of the tribe of Judah, named Elisheba (or Elizabeth), who had born to him four sons, Nadab, Abihu, Eleazer, and Itamar; and Eleazer had, before the return of Moses, become the father of Phinehas (Exod. vi. 23-25).

In obedience to an intimation from God, Aaron went into the wilderness to meet his brother, and conduct him back to Egypt. After forty years of separation they met and embraced each other at the mount of Horeb. When they arrived in Goshen, Aaron introduced his brother to the chiefs of Israel, and assisted him in opening and enforcing the great commission which had been confided to him (Exod. iv. 27-31). In the subsequent transactions, from the first interview with Pharaoh till after the delivered nation had passed the Red Sea, Aaron appears to have been almost always present with Moses, assisting and supporting him; and no separate act of his own is recorded. This co-operation was ever afterwards maintained. Aaron and Hur were present on the hill from which Moses surveyed the battle which Joshua fought with the Amalekites; and these two long sustained the weary hands upon whose uplifting the fate of the battle was found to depend (Exod. xvii. 10-12).

While Moses was absent in the mountain to receive the tables of the law, the people seem to have looked upon Aaron as their head, and growing impatient at the protracted absence of their great leader, they gathered around Aaron, and clamorously demanded that he should provide them with a visible symbolic image of their God, that they might worship him as other gods were worshipped. Aaron ventured not to stem the torrent, but weakly complied with their demand; and with the ornaments of gold which they freely offered, cast the figure of a calf or young bull, being doubtless that of the bull-god Apis at Memphis, whose worship extended throughout Egypt. However, to fix the meaning of this image as a symbol of the true God, Aaron was careful to proclaim a feast to Jehovah for the ensuing day. On that day the people met to celebrate the feast, after the fashion of the Egyptian festivals of the calf-idol, with dancing, with shouting, and with sports.

Meanwhile Moses had been dismissed from the mountain, provided with the decalogue, written 'by the finger of God,' on two tablets of stone. These, as soon as he came sufficiently near to observe the proceedings in the camp, he cast from him with such force that they brake in pieces. His re-appearance confounded the multitude, who quailed under his stern rebuke, and quietly submitted to see their new-made idol destroyed. For this sin the population was decimated by sword and plague (Exod. xxxii.).

During his long absence in the mountain, Moses had received instructions regarding the ecclesiastical establishment, the tabernacle [TABERNACLE], and the priesthood [PRIESTS], which he soon afterwards proceeded to execute. Under the new institution Aaron was to be high-priest, and his sons and descendants priests; and the whole tribe to which he belonged, that of Levi, was set apart as the sacerdotal or learned caste [LEVITES]. Accordingly, after the tabernacle had been completed, and every preparation made for the commencement of actual service, Aaron and his sons were consecrated by Moses, who anointed them with the holy oil and invested them with the sacred garments. The high-priest applied himself assiduously to the duties of his exalted office, and during the

period of nearly forty years that it was filled by him, the incidents which bring him historically before us are very few. It is recorded to his honour that 'he held his peace' when his two eldest sons were, for their great offence, struck dead before the sanctuary (Lev. x. 1-11) [ANNU]. Aaron would seem to have been liable to some fits of jealousy at the superior influence and authority of his brother; for he at least sanctioned the invidious conduct of his sister Miriam [MIRIAM], who, after the wife of Moses had been brought to the camp by Jethro, became apprehensive for her own position, and cast reflections upon Moses, much calculated to damage his influence, on account of his marriage with a foreigner—always an odious thing among the Hebrews. For this, Miriam was struck with temporary leprosy, which brought the high-priest to a sense of his sinful conduct, and he sought and obtained forgiveness (Num. xii.).

Some twenty years after (B.C. 1471), when the camp was in the wilderness of Paran, a formidable conspiracy was organized against the sacerdotal authority exercised by Aaron and his sons, and the civil authority exercised by Moses. This conspiracy was headed by chiefs of influence and station—Korah, of the tribe of Levi, and Dathan and Abiram, of the tribe of Reuben [KORAH]. But the Divine appointment was confirmed by the signal destruction of the conspirators: and the next day, when the people assembled tumultuously and murmured loudly at the destruction which had overtaken their leaders and friends, a fierce pestilence broke out among them, and they fell by thousands on the spot. When this was seen, Aaron, at the command of Moses, filled a censer with fire from the altar, and, rushing forward, 'he stood between the dead and the living,' and the plague was stayed (Num. xvi.). This was in fact another attestation of the Divine appointment; and, for its further confirmation, the chiefs of the several tribes were required to lay up their staves overnight in the tabernacle, together with the rod of Aaron for the tribe of Levi; and in the morning it was found that, while the other rods remained as they were, that of Aaron had budded, blossomed, and yielded the fruit of almonds. The rod was preserved in the tabernacle in evidence of the Divine appointment of the Aaronic family to the priesthood (Num. xvii. 1).

Aaron was not allowed to enter the Promised Land, on account of the distrust which he, as well as his brother, manifested when the rock was stricken at Meribah (Num. xx. 8-13). His death indeed occurred very soon after that event. For when the host arrived at Mount Hor, the Divine mandate came, that Aaron, accompanied by his brother Moses and by his son Eleazer, should ascend to the top of that mountain in the view of all the people; and that he should there transfer his pontifical robes to Eleazer, and then die. He was 123 years old when his career thus terminated; and his son and his brother buried him in a cavern of the mountain [HOR, MOUNT]. The Israelites mourned for him thirty days; and on the first day of the month Ab the Jews still hold a fast in commemoration of his death.

AARONITES, the descendants of Aaron, who served as priests at the sanctuary (Num. iv. 5, *seq.*; 1 Chron. xii. 27; xxvii. 17).

AB (*father*) is found as the first member of several compound Hebrew proper names—such as Abner, *father of light*; Abiezer, *father of help*; &c. By a process which it is not difficult to conceive, the idea of a natural father became modified into that of *author, cause, source* (as when it is said, 'has the rain a father?'—Job xxxviii. 28). So that, in course of time, the original meaning was so far modified that the word was sometimes applied to a woman, as in Abigail, *father of joy*.

AB is the Chaldean name of that month which is the fifth of the ecclesiastical and eleventh of the civil year of the Jews. It commenced with the new moon of our August (the reasons for this statement will be given in the article MONTHS), and always had 30 days. This month is pre-eminent in the Jewish calendar as the period of the most signal national calamities. The 1st is memorable for the death of Aaron (Num. xxxiii. 38). The 9th is the date assigned to the following events:—the declaration that no one then adult, except Joshua and Caleb, should enter into the Promised Land (Num. xiv. 30); the destruction of the first Temple by Nebuchadnezzar (to these first two 'the fast of the fifth month,' in Zech. vii. 5, viii. 19, is supposed to refer); the destruction of the second Temple by Titus; the devastation of the city Bcttar, and the slaughter of Ben Cozibah (Bar Coëb), and of several thousand Jews there; and the ploughing up of the foundations of the Temple by Turnus Rufus—the two last of which happened in the time of Hadrian.

The 9th of the month is observed by the Jews as a fast, in commemoration of the destruction of the first Temple: the 15th is the day appointed for the festival of the wood-offering, in which the wood for the burnt-offering was stored up in the court of the Temple: to which Nehemiah alludes in x. 34, and xiii. 31. Lastly, the 18th is a fast in the memory of the western lamp going out in the Temple in the time of Ahaz (2 Chron. xxix. 7, where the extinction of the lamps is mentioned as a part of Ahaz's attempts to suppress the Temple service). For an inquiry into what is meant by the *western or evening lamp*, see the article CANDLESTICK.

ABADDON, or APOLLON (*destruction*). The former is the Hebrew name, and the latter the Greek, for the angel of death, described (Rev. ix. 11) as the king and chief of the Apocalyptic locusts under the fifth trumpet, and as the angel of the abyss or 'bottomless pit' [HADES].

ABANA, or, as it is given in the marginal reading, AMANA, the name of one of the rivers which are mentioned by Naaman (2 Kings v. 12), 'Abana and Pharpar,' as 'rivers of Damascus.' Amana signifies 'perennial,' and is probably the true name. At the present day it is scarcely possible to discover with certainty the stream to which this name was applied. The most recent conjecture seeks the Abana in the small river Fidji, which rises in a pleasant valley fifteen or twenty miles to the north-west of Damascus and falls into the Barrada, the main stream by which Damascus is irrigated.

ABARIM, a mountain, or rather chain of mountains, which form or belong to the mountainous district east of the Dead Sea and the lower Jordan. It presents many distinct masses

and elevations, commanding extensive views of the country west of the river. From one of the highest of these, called Mount Nebo, Moses surveyed the Promised Land before he died. From the manner in which the names Abarim, Nebo, and Pisgah are connected (Deut. xxxii. 49, 'Get thee up into this mountain Abarim, unto Mount Nebo; and xxxiv. 1, 'Unto the mountain of Nebo, to the top of Pisgah'), it would seem that Nebo was a mountain of the Abarim chain, and that Pisgah was the highest and most commanding peak of that mountain. The loftiest mountain of the neighbourhood is Mount Attarus, about ten miles north of the Arnon; and travellers have been disposed to identify it with Mount Nebo. It is represented as barren, its summit being marked by a wild pistachio-tree overshadowing a heap of stones.

ABBA is the Hebrew word *Ab*, *father*, under a form peculiar to the Chaldee idiom (Mark xiv. 36; Rom. viii. 15; Gal. iv. 6).

1. ABDON (*a servant*), the son of Hillel, of the tribe of Ephraim, and tenth judge of Israel. He succeeded Elon, and judged Israel eight years. Nothing is recorded of him but that he had forty sons and thirty nephews, who rode on young asses—a mark of their consequence (Judg. xii. 13-15). Abdon died *n.c.* 1112.

There were three other persons of this name, which appears to have been rather common. They are mentioned in 1 Chron. viii. 23; ix. 36; and 2 Chron. xxxiv. 20.

2. ABDON, a city of the tribe of Asher, which was given to the Levites of Gershon's family (Josh. xxi. 30; 1 Chron. vi. 74).

ABED-NEGO (*servant of Nego*, i. e. *Nebo*), the Chaldee name imposed by the king of Babylon's officer upon Azariah, one of the three companions of Daniel. With his two friends, Shadrach and Meshach, he was miraculously delivered from the burning furnace, into which they were cast for refusing to worship the golden statue which Nebuchadnezzar had caused to be set up (Dan. iii.).

ABEL, properly HEBEL, the second son of Adam, who was slain by Cain, his elder brother (Gen. iv. 1-16). The circumstances of that mysterious transaction are considered elsewhere [CAIN]. To the name *Abel* a twofold interpretation has been given. Its primary significance is *weakness* or *vanity*. By another rendering it signifies *grief* or *lamentation*, both meanings being justified by the Scripture narrative. CAIN (*a possession*) was so named to indicate both the joy of his mother and his right to the inheritance of the first-born: Abel received a name indicative of his weakness and poverty when compared with the supposed glory of his brother's destiny, and *prophetically* of the pain and sorrow which were to be inflicted on him and his parents.

ABEL, a name of several villages in Israel, with additions in the case of the more important, to distinguish them from one another. It appears to mean *fresh grass*; and the places so named may be conceived to have been in peculiarly verdant situations.

ABEL, ABEL-BETH-MAACAH, or ABEL-MAIM, a city in the north of Palestine, which seems to have been of considerable strength from its history, and of importance from its being called 'a

mother in Israel' (2 Sam. xx. 19). The identity of the city under these different names will be seen by a comparison of 2 Sam. xi. 14, 15, 18; 1 Kings xv. 20; 2 Chron. xvi. 4. The addition of 'Maacah' marks it as belonging to, or being near to, the region Maacah, which lay eastward of the Jordan under Mount Lebanon. This is the town in which Shela posted himself when he rebelled against David. Eighty years afterwards it was taken and sacked by Benhadad, king of Syria; and 200 years subsequently by Tiglath-pileser, who sent away the inhabitants captives into Assyria (2 Kings xv. 29).

ABEL-BETH-MAACAH, that is, Abel near the house or city of Maacah: the same as Abel.

ABEL-CARMATIM (*place of the vineyards*), a village of the Ammonites, about six miles from Philadelphia, or Rabbath Ammon, according to Eusebius, in whose time the place was still rich in vineyards (Judg. xi. 33).

ABEL-MA'IM. The same as ABEL.

ABEL-MEHOLAI, or ABEL-MEA (*place of the dance*), a town supposed to have stood near the Jordan, and some miles (Eusebius says ten) to the south of Bethshan or Scythopolis (1 Kings iv. 12). It is remarkable in connection with Gideon's victory over the Midianites (Judg. vii. 22), and as the birth-place of Elisha (1 Kings xix. 16).

ABEL-MIZRA'IM (*the mourning of the Egyptians*), the name of a threshing-floor, so called on account of the 'great mourning' made there for Jacob by the funeral party from Egypt (Gen. l. 11). Jerome places it between Jericho and the Jordan, where Bethagla afterwards stood.

ABEL-SHITTIM (*place of acacias*), a town in the plains of Moab, on the east of the Jordan, between which and Beth-Jesimoth was the last encampment of the Israelites on that side the river (Num. xxxiii. 49). It is more frequently called Shittim merely (Num. xxv. 1; Josh. ii. 1; Mic. vi. 5). The place is noted for the punishment which was there inflicted upon the Israelites for their worship of Baal-Peor.

ABELA. [ABILA.]

ABI, the mother of King Hezekiah (2 Kings xviii. 2), called also Abijah (2 Chron. xxxi. 1). Her father's name was Zachariah, perhaps the same who was taken by Isaiah (viii. 2) for a witness.

ABIA. [ABIJAH, 3.]

ABIAH, or ABIJAH, one of the sons of Samuel who were intrusted with the administration of justice, and whose misconduct afforded the ostensible ground on which the Israelites demanded that their government should be changed into a monarchy (1 Sam. viii. 1-5).

ABI-AL'BON. [ABIEL, 2.]

ABIPATHAR (*father of abundance*), the tenth high-priest of the Jews, and fourth in descent from Eli. When his father, the high-priest Abimelech, was slain with the priests at Nob, for suspected partiality to the fugitive David, Abiathar escaped the massacre; and bearing with him the most essential part of the priestly raiment, the ephod (PRIESTS), repaired to the son of Jesse, who was then in the cave of Adullam (1 Sam. xxii. 20-23; xxiii. 6). He was well received by David, and became the priest of the party during its wanderings. As such he

sought and received for David responses from God. When David became king of Judah, he made Abiathar high-priest. Meanwhile Zadok had been appointed high-priest by Saul, and continued to act in this capacity while Abiathar was high-priest in Judah. The appointment of Zadok was not only unexceptionable in itself, but was in accordance with the divine sentence of deposition which had been passed upon the house of Eli (1 Sam. ii. 30-36). When, therefore, David acquired the kingdom of Israel, he had no just ground on which Zadok could be removed, and Abiathar set in his place; and the attempt to do so would probably have been offensive to his new subjects. The king got over this difficulty by allowing both appointments to stand; and until the end of David's reign Zadok and Abiathar were joint high-priests. As high-priest Abiathar must have been perfectly aware of the divine intention that Solomon should be the successor of David: he was therefore the least excusable, in some respects, of all those who were parties in the attempt to raise Adonijah to the throne. So his conduct seems to have been viewed by Solomon, who, in deposing him from the high-priesthood, plainly told him that only his sacerdotal character, and his former services to David, preserved him from death. This deposition of Abiathar completed the doom long before denounced upon the house of Eli, who was of the line of Ithamar, the younger son of Aaron. Zadok, who remained the high-priest, was of the elder line of Eleazer (1 Kings i. 7, 19; ii. 26, 27).

ABIB. [NISAN.]

1. ABIEL (*father of strength*, i. e. *strong*), the father of Kish, whose son Saul was the first king of Israel, and of Ner, whose son Abner was captain of the host to his cousin Saul (1 Sam. ix. 1; xiv. 51).

2. ABIEL, one of the thirty most distinguished men of David's army (1 Chron. xi. 32). He is called Abi-albon in 2 Sam. xxiii. 31; a name which has precisely the same signification (*father of strength*) as the other.

ABIEZER (*father of help*, Josh. xvii. 2), a son of Gilead, the grandson of Manasseh (Num. xxvi. 30), and founder of the family to which Gideon belonged, and which bore his name as a patronymic—Abiezrites (Judg. vi. 34; viii. 2).

ABIGAIL (*father of joy*), the wife of a prosperous sheep-master, called Nabal, who dwelt in the district of Carmel, west of the Dead Sea. She is known chiefly for the promptitude and discretion of her conduct in taking measures to avert the wrath of David, which had been violently excited by the insulting treatment which his messengers had received from her husband [NABAL]. She hastily prepared a liberal supply of provisions, of which David's troop stood in much need, and went forth to meet him. Her beauty and prudence made such an impression upon David on this occasion, that when, not long after, he heard of Nabal's death, he sent for her, and she became his wife (1 Sam. xxv. 14-42). It is usually stated that he had by her two sons, Chileab and Daniel; but it is more likely that the Chileab of 2 Sam. iii. 3, is the same as the Daniel of 1 Chron. iii. 1; the son of Abigail being known by both these names.

1. ABIHAIL (*father of light or splendour*), the wife of Rehoboam, king of Judah. She is called the daughter of Eliab, David's elder brother (2 Chron. xi. 18); but was doubtless only his descendant.

2. ABIHAIL (*father of might*, i. e. *mighty*). This name should be written ABICHAIL. It was borne by several persons: 1. ABICHAIL, the son of Huri, one of the family-chiefs of the tribe of Gad, who settled in Bashan (1 Chron. v. 14). 2. ABICHAIL, the father of Zuriel, who was the father of the Levitical tribes of Merari (Num. iii. 35). 3. ABICHAIL, the father of Queen Esther, and brother of Mordecai (Esth. ii. 15).

ABIHU (*father of him*), the second of the sons of Aaron, who, with his brothers Nadab, Eleazer, and Ithamar, was set apart and consecrated for the priesthood (Exod. xxviii. 1). He and his brother Nadab having presumed to offer incense in censers filled with 'strange' or common fire, they were instantly struck dead by lightning, and were taken away and buried in their clothes without the camp. As immediately after the record of this transaction comes a prohibition of wine or strong drink to the priests on duty at the tabernacle, it is not unfairly surmised that they were intoxicated when they committed this serious error in their ministrations (Lev. x. 1-11).

1. ABIJAH (see signif. in ANAN, 2 Chron. xiii. 1). He is also called Abijam (1 Kings xv.). Abijah was the second king of the separate kingdom of Judah, being the son of Rehoboam, and grandson of Solomon. He began to reign B.C. 957, in the eighteenth year of Jeroboam, king of Israel; and he reigned three years. At the commencement of his reign Abijah made a vigorous attempt to bring back the ten tribes to their allegiance. In this he failed; although a signal victory over Jeroboam, who had double his force and much greater experience, enabled him to take several cities which had been held by Israel. The numbers reputed to have been present in this action are 800,000 on the side of Jeroboam, 400,000 on the side of Abijah, and 500,000 left dead on the field. The book of Chronicles mentions nothing concerning Abijah adverse to the favourable impressions which we receive from his conduct on this occasion; but in Kings we are told that 'he walked in all the sins of his father' (1 Kings xv. 3). He had fourteen wives, by whom he left twenty-two sons and sixteen daughters. Asa succeeded him.

2. ABIJAH, son of Jeroboam I., king of Israel. His severe and threatening illness induced Jeroboam to send his wife with a present, suited to the disguise in which she went, to consult the prophet Abijah respecting his recovery. This prophet was the same who had, in the days of Solomon, foretold to Jeroboam his elevation to the throne of Israel. Though blind with age, he knew the disguised wife of Jeroboam, and was authorized, by the prophetic impulse that came upon him, to reveal to her that, because there was found in Abijah only, of all the house of Jeroboam, 'some good thing towards the Lord,' he only, of all that house, should come to his grave in peace, and be mourned in Israel. Accordingly, when the mother returned home, the youth died as she crossed the threshold of

one door. 'And they buried him, and all Israel mourned for him' (1 Kings xiv. 1-18).

3. ABIJAH, one of the descendants of Eleazer, the son of Aaron, and chief of one of the twenty-four courses or orders into which the whole body of the priesthood was divided by David (1 Chron. xxiv. 10; Luke i. 5). Of these the course of Abijah was the eighth.

ABIJAM. [ABIJAH, 1.]

ABILA, capital of the Abilene of Lysanias (Luke iii. 1); and distinguished from other places of the same name as the Abila of Lysanias, and (by Josephus) as 'the Abila of Lebanon.' Abila has been supposed to be the same as Abel-beth-Maacah, but without foundation, for that was a city of Naphtali, which Abila was not. About eighteen miles north-west of Damascus is Souk Wady Barrada, where an inscription was found by Mr. Baukes, which, beyond doubt, identifies that place with the Abila of Lysanias. Burckhardt states that there are here two villages, built on the opposite sides of the Barrada.

ABILENE (Luke iii. 1), the small district or territory which took its name from the chief town, Abila. Its situation is in some degree determined by that of the town; but its precise limits and extent remain unknown. Northward it must have reached beyond the Upper Barrada, in order to include Abila; and it is probable that its southern border may have extended to Mount Hermon (Jebel es-Sheikh). It seems to have included the eastern declivities of Anti-Libanus, and the fine valleys between its base and the hills which form the eastern plains.

This territory had been governed as a tetrarchy by Lysanias, son of Ptolemy and grandson of Menæus, but he was put to death, *n.c.* 33, through the intrigues of Cleopatra, who then took possession of the province. After her death it fell to Augustus, who rented it out to one Zenodorus; but as he did not keep it clear of robbers, it was taken from him, and given to Herod the Great. At his death a part (the southern, doubtless) of the territory was added to Trachonitis and Iturea to form a tetrarchy for his son Philip; but by far the larger portion, including the city of Abila, was then, or shortly afterwards, bestowed on another Lysanias, mentioned by Luke (iii. 1), who is supposed to have been a descendant of the former Lysanias, but who is nowhere mentioned by Josephus. About ten years after the time referred to by Luke, the emperor Caligula gave Abilene to Agrippa I. as 'the tetrarchy of Lysanias,' to whom it was afterwards confirmed by Claudius. At his death, it was included in that part of his possessions which went to his son Agrippa II.

1. ABIMELECH (*Jabier of the king, or perhaps royal father*), the name of the Philistine king of Gerar in the time of Abraham (*Gen.* cx. 1, *sqq.*: *n.c.* 1898; Hales, *n.c.* 2054); but, from its recurrence, it was probably less a proper name than a titular distinction, like PHARAOH for the kings of Egypt, or AUGUSTUS for the emperors of Rome. Abraham removed into his territory after the destruction of Sodom; and fearing that the beauty of Sarah might bring him into difficulties, he declared her to be his sister. The conduct of Abimelech in taking Sarah into his harem shows that kings even then

claimed the right of taking to themselves the unmarried females not only of their natural subjects, but of those who sojourned in their dominions. But Abimelech, obedient to a divine warning, restored her to her husband. As a mark of his respect he added valuable gifts, and offered the patriarch a settlement in any part of the country; but he nevertheless did not forbear to visit with a gentle rebuke the deception which had been practised upon him (*Gen.* xx.). Nothing further is recorded of King Abimelech, except that a few years after he repaired to the camp of Abraham, who had removed southward beyond his borders, accompanied by Phichol, 'the chief captain of his host,' to invite the patriarch to contract with him a league of peace and friendship. Abraham consented; and this first league on record [ALLIANCE] was confirmed by a mutual oath, made at a well which had been digged by Abraham, but which the herdsmen of Abimelech had seized without their lord's knowledge. It was restored to the rightful owner, on which Abraham named it BEERSHEBA (*the Well of the Oath*), and consecrated the spot to the worship of Jehovah (*Gen.* xxi. 22-34).

2. ABIMELECH, another king of Gerar, in the time of Isaac (about *n.c.* 1804; Hales, 1960), who is supposed to have been the son of the preceding. Isaac sought refuge in his territory during a famine; and having the same fear respecting his fair Mesopotamian wife, Rebekah, as his father had entertained respecting Sarah, he reported her to be his sister. This brought upon him the rebuke of Abimelech, when he accidentally discovered the truth. In those times, as now, wells of water were of so much importance for agricultural as well as pastoral purposes, that they gave a proprietary right to the soil, not previously appropriated, in which they were dug. Abraham had digged wells during his sojourn in the country; and, to bar the claim which resulted from them, the Philistines had afterwards filled them up; but they were now cleared out by Isaac, who proceeded to cultivate the ground to which they gave him a right. The virgin soil yielded him a hundred-fold; and his other possessions, his flocks and herds, also received such prodigious increase that the jealousy of the Philistines could not be suppressed; and Abimelech desired him to seek more distant quarters, in language which gives a high notion of the wealth of the patriarchal chiefs, and the extent of their establishments:—'*Depart from us: for thou art more ad mightier than we.*' Isaac complied, and went out into the open country, and digged wells for his cattle. But the shepherds of the Philistines were not inclined to allow the claim to exclusive pasturage in these districts to be thus established; and their opposition induced the quiet patriarch to make successive removals, until he reached such a distance that his operations were no longer disputed. Afterwards, when he was at Beersheba, he received a visit from Abimelech, who was attended by Ahuzzath, his friend, and Phichol, the chief captain of his army. The king having explained that it was his wish to renew, with one so manifestly blessed of God, the covenant of peace which had been contracted between their fathers, Isaac willingly consented, and the desired covenant was, with due cere-

mony, contracted accordingly (Gen. xxvi.) [PHILISTINES].

3. ABIMELECH, a son of Gideon, by a concubine-wife, a native of Shechem, where her family had considerable influence. Through that influence Abimelech was proclaimed king after the death of his father, who had himself refused that honour, when tendered to him, both for himself and his children (Judg. viii. 22-24). In a short time, a considerable part of Israel seems to have recognised his rule. One of the first acts of his reign was to destroy his brothers, seventy in number, being the first example of a system of barbarous state policy of which there have been frequent instances in the East. Only one, the youngest, named Jotham, escaped; and he had the boldness to make his appearance on Mount Gerizim, where the Shechemites were assembled for some public purpose, and rebuke them in his famous parable of the trees choosing a king [JOTHAM; PARABLE]. In three years the Shechemites found ample cause to repent of what they had done. They eventually revolted during Abimelech's absence, and caused an ambushade to be laid in the mountains, with the design of destroying him on his return. But Zebul, his governor in Shechem, contrived to apprise him of these circumstances, so that he was enabled to avoid the snare laid for him; and, having hastily assembled some troops, appeared unexpectedly before Shechem. The people of that place had meanwhile secured the assistance of one Gaal and his followers [GAAL], who marched out to give Abimelech battle. He was defeated, and returned into the town; and his inefficiency and misconduct in the action had been so manifest, that the people were induced by Zebul to expel him and his followers. The people still ventured out to the labours of the field; which being told Abimelech, who was at Arinnah, he laid an ambushade in four bodies in the neighbourhood; and when the men came forth in the morning, two of the ambushade parties rose against them, while the other two seized the city gates to prevent their return. Afterwards the whole force united against the city, which, being now deprived of its most efficient inhabitants, was easily taken, and completely destroyed by the exasperated victor. The fortress, however, still remained; but the occupants, deeming it untenable, withdrew to the temple of Baal-Berith, which stood in a more commanding situation. This building Abimelech set on fire and destroyed, with the thousand men who were in it. Afterwards Abimelech went to reduce Thebez, which had also revolted. The town was taken with little difficulty, and the people withdrew into the citadel. Here Abimelech resorted to his favourite operation, and while heading a party to burn down the gate, he was struck on the head by a large stone cast down by a woman from the wall above. Perceiving that he had received a death-blow, he directed his armour-bearer to thrust him through with his sword, lest it should be said that he fell by a woman's hand (Judg. ix.). Vainly did Abimelech seek to avoid this disgrace; for the fact of his death by the hand of a woman was long after associated with his memory (2 Sam. xi. 21).

ABINADAB (*father of nobleness, or noble*

father). There are several persons of this name, all of whom are also called AMINADAB—the letters *b* and *m* being very frequently interchanged in Hebrew.

1. ABINADAB, one of the eight sons of Jesse, and one of the three who followed Saul to the war with the Philistines (1 Sam. xvi. 8).

2. ABINADAB, one of Saul's sons, who was slain at the battle of Gilboa (1 Sam. xxxi. 2).

3. ABINADAB, the Levite of Kirjath-jearim, in whose house, which was on a hill, the Ark of the Covenant was deposited, after being brought back from the land of the Philistines. It was committed to the special charge of his son Eleazer; and remained there seventy years, until it was removed by David (1 Sam. vii. 1, 2; 1 Chron. xiii. 7) [ARK].

4. ABIRAM (*father of altitude, i. e. high*), one of the family-chiefs of the tribe of Reuben, who, with Dathan and On of the same tribe, joined Korah, of the tribe of Levi, in a conspiracy against Aaron and Moses (Num. xvi. 1) [AARON].

5. ABIRAM, eldest son of Hiel the Bethelin (1 Kings xvi. 34) [HIEL; JAICHO].

6. ABISHAG (*father of error*), a beautiful young woman of Shunim, in the tribe of Issachar, who was chosen by the servants of David to be introduced into the royal harem, for the special purpose of ministering to him, and cherishing him in his old age. She became his wife; but the marriage was never consummated. Some time after the death of David, Adonijah, his eldest son, persuaded Bathsheba, the mother of Solomon, to entreat the king that Abishag might be given to him in marriage. But as rights and privileges peculiarly regal were associated with the control and possession of the harem of the deceased king, Solomon detected in this application a fresh aspiration to the throne, which he visited with death (1 Kings i. 1-4; ii. 13-25) [ADONIJAH].

7. ABISHAI (*father of gifts*), a nephew of David by his sister Zeruiah, and brother of Joab and Asahel. The three brothers devoted themselves zealously to the interests of their uncle during his wanderings. Though David had more reliance upon the talents of Joab, he appears to have given more of his private confidence to Abishai, whom we find near his person on several critical occasions. He also accompanied David to the camp of Saul (1 Sam. xxvi. 5-9). He fled with him beyond the Jordan from Absalom, and commanded one of three divisions of the army which crushed that rebellion (2 Sam. xviii. 2). He rescued David when in imminent peril of his life from a giant named Ishbi-benoh (2 Sam. xxi. 15-17), and was also the chief of the three 'mighty' who performed the chivalrous exploit of breaking through the host of the Philistines to procure David a draught of water from the well of his native Bethlehem (2 Sam. xxiii. 14-17). Among the exploits of this hero it is mentioned that he withstood 300 men and slew them with his spear; but the occasion of this adventure, and the time and manner of his death, are equally unknown.

8. ABISHUA (*father of safety*), the son of Phinehas, and fourth high-priest of the Jews (1 Chron. vi. 50). The commencement and

duration of his pontificate are uncertain, but the latter is inferred, from circumstances, to have included the period in which Ehud was judge, and probably the preceding period of servitude to Eglon of Moab. He is called Abiezer by Josephus (*Antiq.* v. 11. 5).

ABLUTION, the ceremonial washing, whereby, as a symbol of purification from uncleanness, a person was considered—1. to be cleansed from the taint of an inferior and less pure condition, and initiated into a higher and purer state (*Lev.* viii. 6); 2. to be cleansed from the soil of common life, and fitted for special acts of religious service (*Exod.* xxx. 17-21); 3. to be cleansed from defilements contracted by particular acts or circumstances, and restored to the privileges of ordinary life (*Lev.* xii. xv.); 4. as absolving or purifying himself, or declaring himself absolved and purified, from the guilt of a particular act (*Deut.* xxi. 1-9). We do not meet with any such ablutions in patriarchal times: but under the Mosaic dispensation they all occur.

After the rise of the sect of the Pharisees, the practice of ablution was carried to such excess, from the affectation of excessive purity, that it is repeatedly brought under our notice in the New Testament through the severe animal-versions of our Saviour on the consummate hypocrisy involved in this fastidious attention to the external types of moral purity, while the heart was left unclean. All the practices there exposed come under the head of purification from uncleanness;—the acts involving which were made so numerous that persons of the stricter sect could scarcely move without contracting some involuntary pollution. For this reason they never entered their houses without ablution, from the strong probability that they had unknowingly contracted some defilement in the streets; and they were especially careful never to eat without washing the hands (*Mark* vii. 1-5), because they were peculiarly liable to be defiled; and as unclean hands were held to communicate uncleanness to all food (excepting fruit) which they touched, it was deemed that there was no security against eating unclean food but by always washing the hands ceremonially before touching any meat. The Israelites, who, like other Orientals, fed with their fingers, washed their hands before meals, for the sake of cleanliness [*Washing*]. But these customary washings were distinct from the ceremonial ablutions. It was the latter which the Pharisees judged to be so necessary. When therefore some of that sect remarked that our Lord's disciples ate 'with unwashen hands' (*Mark* vii. 2), it is not to be understood literally that they did not at all wash their hands, but that they did not *plunge* them ceremonially according to their own practice. In at least an equal degree the Pharisees multiplied the ceremonial pollutions which required the ablution of inanimate objects—'cups and pots, brazen vessels and tables'; the rules given in the law (*Lev.* vi. 28; xi. 32-36; xv. 23) being extended to these multiplied contaminations. Articles of earthenware which were of little value were to be broken; and those of metal and wood were to be scoured and rinsed with water.

ABNER (*father of light*), the cousin of Saul

(being the son of his uncle Ner), and the commander-in-chief of his army. After the death of Saul (B.C. 1056), Abner's experience and character for ability and decision enabled him to uphold the interests of his family for seven years; and while David reigned in Hebron over Judah, Ishbosheth, a surviving son of Saul, was, by Abner's influence, made king over the ten tribes, and reigned in Mahanaim, beyond Jordan. A sort of desultory warfare arose between the rival monarchs, in which the advantage appears to have been always on the side of David. In an engagement fought at Gibeon, the forces of Ishbosheth were beaten. Abner, their general, fled for his life, but was closely pursued by Asahel, the brother of Joab and Abishai. Abner, dreading a blood-feud with Joab, entreated Asahel, but in vain, to desist from the pursuit; and finding that his life was in danger, he at length ran his pursuer through the body (2 Sam. ii. 8-32). This, according to the law of honour which still prevails in the East, put a strife of blood between Joab and Abner [*Blood-Revenge*].

As time went on, Abner, probably rendered arrogant and presumptuous by the conviction that he was the only remaining prop of the house of Saul, took to his own harem a woman who had been a concubine-wife of Saul. This act, from the ideas connected with the harem of a deceased king, was not only a great impropriety, but was open to the suspicion of a political design, which Abner may very possibly have entertained. A mild rebuke from Ishbosheth, however, enraged him so much, that he immediately declared his intention henceforth to abandon his cause and to devote himself to the interests of David. Accordingly after explaining his views to the elders of the tribes which still adhered to the house of Saul, he repaired to Hebron with authority to make certain overtures to David on their behalf. He was received with great attention and respect; and David even thought it prudent to promise that he should still have the chief command of the armies, when the desired union of the two kingdoms took place. Joab, David's general, happened to be absent at the time, but he returned to Hebron just as Abner had left it. He speedily understood what had passed; and his dread of the superior influence which such a man as Abner might establish with David, quickened his remembrance of the vengeance which his brother's blood required. Unknown to the king, but apparently in his name, he sent a message after Abner to call him back; and as he returned, Joab met him at the gate, and, leading him aside, as if to confer privately with him, suddenly thrust his sword into his body (A.C. 1048). The lamentations of David, the public mourning which he ordered, and the funeral honours which were paid to the remains of Abner, the king himself following the bier as chief mourner, exonerated him in public opinion from having been privy to this assassination. As for Joab, his privilege as a blood-avenger must to a great extent have justified his treacherous act in the opinion of the people; and that, together with his influence with the army, screened him from punishment (2 Sam. iii. 6-39).

ABOMINATION. This word describes gene-

rally any object of detestation or disgust (Lev. xviii. 22; Deut. vii. 25); and is applied to an impure or detestable action (Ezek. xxii. 11; xxxiii. 26; Mal. ii. 11, &c.); to any thing causing a ceremonial pollution (Gen. xliii. 32; xli. 34; Deut. xiv. 3); but more especially to idols (Lev. xviii. 22; xx. 13; Deut. vii. 26; 1 Kings xi. 5, 7; 2 Kings xxiii. 13); and also to food offered to idols (Zech. ix. 7); and to filth of every kind (Nahum iii. 6). Especial attention has been drawn to two or three of the texts in which the word occurs, on account of their peculiar interest or difficulty. The first is Gen. xliii. 32: 'The Egyptians might not eat bread with the Hebrews; for that is an abomination unto the Egyptians.' The primary reason of this seems to have been that the cow, which was a sacred animal in Egypt, was eaten by the Jews and most other nations, and therefore the Egyptians considered themselves ceremonially defiled if they ate with any strangers.

The second passage is Gen. xli. 34. Joseph is telling his brethren how to conduct themselves when introduced to the king of Egypt; and he instructs them that when asked concerning their occupation they should answer: 'Thy servants' trade hath been about cattle from our youth even until now, both we and also our fathers.' And the reason is added: 'That ye may dwell in the land of Goshen,—for every shepherd is an abomination unto the Egyptians.' In the former instance they were 'an abomination' as *strangers*, with whom the Egyptians could not eat; here they are a further abomination as *nomadic shepherds*, whom the Egyptians held in peculiar abhorrence. For this aversion two reasons are given: one is the grievous oppression which the inhabitants of Lower and Middle Egypt had suffered from a tribe of nomadic shepherds, to whom they had for many years been subject, who had only of late been expelled. The other reason, not necessarily superseding the former, but rather strengthening it, is, that the Egyptians, as a settled and civilized people, detested the lawless and predatory habits of the wandering shepherd tribes, which then, as now, bounded the valley of the Nile, and occupied the Arabias.

The third marked use of this word again occurs in Egypt. The king tells the Israelites to offer to their god the sacrifices which they desired, without going to the desert for that purpose. To which Moses objects, that they should have to sacrifice to the Lord 'the abomination of the Egyptians,' who would thereby be highly exasperated against them (Exod. viii. 25, 26). A reference back to the first explanation shows that this 'abomination' was the cow, the only animal which all the Egyptians agreed in holding sacred; whereas, in the great sacrifice which the Hebrews proposed to hold, not only would heifers be offered, but the people would feast upon their flesh.

THE ABOMINATION OF DESOLATION. In Dan. ix. 27, literally, 'the abomination of the desolator,' which, without doubt, means the idol or idolatrous apparatus which the desolator of Jerusalem should establish in the holy place. This appears to have been a prediction of the pollution of the temple by Antiochus Epiphanes, who caused an idolatrous altar to be built on the altar of burnt-offerings, whereon unclean things were offered

to Jupiter Olympius, to whom the temple itself was dedicated. The phrase is quoted by Jesus (Matt. xxiv. 15), and is applied by him to what was to take place at the advance of the Romans against Jerusalem. They who saw 'the abomination of desolation standing in the holy place' were enjoined to 'flee to the mountains.' And this may with probability be referred to the advance of the Roman army against the city with their image-crowned standards, to which idolatrous honours were paid, and which the Jews regarded as idols. The unexpected retreat and discomfiture of the Roman forces afforded such an opportunity of obeying the injunction which it contained. Those however who suppose that 'the holy place' of the text must be the temple itself, may find the accomplishment of the prediction in the fact that, when the city had been taken by the Romans, and the holy house destroyed, the soldiers brought their standards in due form to the temple, set them up over the eastern gate, and offered sacrifice to them, for almost the entire religion of the Roman camp consisted in worshipping the ensigns, swearing by the ensigns, and in preferring the ensigns before all the other gods.

1. Roman Standards.

Nor was this the last appearance of 'the abomination of desolation, in the holy place:' for, not only did Hadrian, with studied insult to the Jews, set up the figure of a boar over the Bethlehem gate of the city which rose upon the site and ruins of Jerusalem; but he erected a temple to Jupiter upon the very site of the Jewish temple, and caused an image of himself to be set up in the part which answered to the sanctuary. This was a consummation of all the abominations which the iniquities of the Jews brought upon their holy place.

ABRAHAM (*father of a multitude*), the

founder of the Hebrew nation. Up to Gen. xvii. 1, 5, he is uniformly called **ABRAM** (*father of elevation, or high father*); and this was his original name: but the extended form, which it always afterwards bears, was given to make it significant of the promise of a numerous posterity which was at the same time made to him.

Abraham was a native of Chaldean, and descended, through Heber, in the ninth generation, from Shem the son of Noah. His father was Terah, who had two other sons, Nahor and Haran. Haran died prematurely 'before his father,' leaving a son Lot, and two daughters, Milcah and Iscah. Lot attached himself to his uncle Abraham; Milcah became the wife of her uncle Nahor; and Iscah, who was also called Sarai, became the wife of Abraham (Gen. ix. 26-29) [**SARAI**].

Abraham was born A.M. 2008, B.C. 1996 (Hales, G.M. 3258, B.C. 2153), in 'Ur of the Chaldees' (Gen. xi. 28).

Although he is, by way of eminence, named first, it appears probable that he was the youngest of Terah's sons, and born by a second wife, when his father was 130 years old. Terah was seventy years old when the eldest son was born (Gen. xi. 32; xii. 4; xx. 12); and that eldest son appears to have been Haran, from the fact that his brothers married his daughters, and that his daughter Sarai was only ten years younger than his brother Abraham (Gen. xvii. 17). Abraham was 60 years old when the family quitted their native city of Ur, and went and dwelt in Charran. The reason for this movement does not appear in the Old Testament; but it is mentioned in Acts vii. 2-4: 'The God of glory appeared to our father Abraham while he was (at Ur of the Chaldees) in Mesopotamia, before he dwelt in Charran, and said unto him, Depart from thy land, and from thy kindred, and come hither to a land which I will shew thee. Then departing from the land of the Chaldees, he dwelt in Charran.' This first call is not recorded, but only implied in Gen. xii.: and it is distinguished by several pointed circumstances from the second, which alone is there mentioned. Accordingly Abraham departed, and his family, including his aged father, removed with him. They proceeded not at once to the land of Canaan, but they came to Charran, and tarried at that convenient station for fifteen years, until Terah died, at the age of 205 years. Being free from his filial duties, Abraham, now 75 years of age, received a second and more pointed call to pursue his destination: 'Depart from thy land, and from thy kindred, and from thy father's house, unto the land which I will shew thee' (Gen. xii. 1). This second call required the patriarch to isolate himself, not only from his country, but from his family. He however took with him his nephew Lot, whom, having no children of his own, he appears to have regarded as his heir, and then went forth 'not knowing whither he went' (Heb. xi. 8), but trusting implicitly to the Divine guidance.

When Abraham arrived in the land of Canaan, he found it occupied by the Canaanites in a large number of small independent communities, which cultivated the districts around their several towns. The country was however but thinly peopled; and, as in the more recent times

of its depopulation, it afforded ample pasture-ground for the wandering pastors. In their eyes Abraham must have appeared one of that class. In Mesopotamia, though the family had been pastoral, they had dwelt in towns and houses, and had sent out their flocks and herds under the care of shepherds. But the migratory life to which Abraham had now been called, compelled him to take to the tent-dwelling form of pastoral life. The rich pastures in that part of the country tempted Abraham to form his first encampment in the vale of Moreh, which lie between the mountains of Elal and Gerizim. Here the strong faith which had brought to the childless man thus far from his home was rewarded by the grand promise from God:—'I will make of thee a great nation, and I will bless thee and make thy name great, and thou shalt be a blessing; and I will bless them that bless thee, and curse them that curse thee: and in thee shall all the families of the earth be blessed' (Gen. xii. 2, 3). It was further promised that to his posterity should be given the rich heritage of that beautiful country into which he had come (v. 7). The implied condition on his part was, that he should publicly profess the worship of the true God, and accordingly 'he built there an altar unto the Lord, who appeared unto him. He soon after removed to the district between Bethel and Ai, where he also built an altar to that 'Jehovah' whom the world was then hastening to forget. His farther removals tended southward, until at length a famine in Palestine compelled him to withdraw into Egypt, where corn abounded. Here his apprehension that the beauty of his wife Sarai might bring him into danger with the dusky Egyptians, overcame his faith and rectitude, and he gave out that she was his sister. As he had feared, the beauty of the fair stranger excited the admiration of the Egyptians, and at length reached the ears of the king, who forthwith exercised his regal right of calling her to his harem, and to this Abraham, appearing as only her brother, could offer no resistance. As, however, the king had no intention to act harshly in the exercise of his privilege, he loaded Abraham with valuable gifts suited to his condition, consisting chiefly of slaves and cattle. These presents could not have been refused by him without an insult which, under all the circumstances, the king did not deserve. A grievous disease inflicted on Pharaoh and his household relieved Sarai from her danger, by revealing to the king that she was a married woman; on which he sent for Abraham, and, after rebuking him for his conduct, restored his wife to him, and recommended him to withdraw from the country. He accordingly returned to the land of Canaan, much richer than when he left it 'in cattle, in silver, and in gold' (Gen. xii. 8; xiii. 2).

Lot also had much increased his possessions; and soon after their return to their previous station near Bethel, the disputes between their respective shepherds about water and pasturage soon taught them that they had better separate. The recent promise of posterity to Abraham himself, although his wife had been accounted barren, probably tended also in some degree to weaken the tie by which the uncle and nephew had hitherto been united. The subject was

broached by Abraham, who generously conceded to Lot the choice of pasture-grounds. Lot chose the well-watered plain in which Sodom and other towns were situated, and removed thither [Lot]. Immediately afterwards the patriarch was cheered and encouraged by a more distinct and formal reiteration of the promises which had been previously made to him, of the occupation of the land in which he lived by a posterity numerous as the dust. Not long after, he removed to the pleasant valley of Mamre, in the neighbourhood of Hebron (then called Arba), and pitched his tent under a terebinth tree (Gen. xiii.).

It appears that fourteen years before this time the south and east of Palestine had been invaded by a king called Chedorlaomer, from beyond the Euphrates, who brought several of the small disunited states of those quarters under tribute. Among them were the five cities of the Plain of Sodom, to which Lot had withdrawn. This burden was borne impatiently by these states, and they at length withheld their tribute. This brought upon them a ravaging visitation from Chedorlaomer and four other (perhaps tributary) kings, who scoured the whole country east of the Jordan, and ended by defeating the kings of the plain, plundering their towns, and carrying the people away as slaves. Lot was among the sufferers. When this came to the ears of Abraham, he immediately armed such of his slaves as were fit for war, in number 318, and being joined by the friendly Amoritical chiefs, Aner, Eshcol, and Mamre, pursued the retreating invaders. They were overtaken near the springs of the Jordan; and their camp being attacked on opposite sides by night, they were thrown into disorder, and fled. Abraham and his men pursued them as far as the neighbourhood of Damascus, and then returned with all the men and goods which had been taken away. When the victors had reached 'the king's dale' on their return, they were met by several of the native princes, among whom was Melchizedek, king of Salem, which is generally supposed to have been Jerusalem. He was one of the few native princes, if not the only one, who retained the knowledge and worship of 'the Most High God,' whom Abraham served. This circumstance created a peculiar relation between the king and the patriarch, which the former recognised by bringing forth 'bread and wine,' and probably other refreshments to Abraham, and which the latter acknowledged by presenting to Melchizedek a tenth of the spoils. By strict right, founded on the war usages which still subsist in Arabia, the recovered goods became the property of Abraham, and not of those to whom they originally belonged. This was acknowledged by the king of Sodom, who met the victors in the valley near Salem. He said, 'Give me the persons, and keep the goods to thyself.' But with becoming pride and disinterestedness Abraham answered, 'I have lifted up mine hand [i. e. I have sworn] unto Jehovah, the most high God, that I will not take from a thread even to a sandal-thong, and that I will not take any thing that is thine, lest thou shouldst say, I have made Abram rich' (Gen. xiv.).

Soon after his return to Mamre the faith of Abraham was rewarded and encouraged, not only by a more distinct and detailed repetition of the promises formerly made to him, but by

the confirmation of a solemn covenant contracted, as nearly as might be, 'after the manner of men' [COVENANT] between him and God. It was now that he first understood that his promised posterity were to grow up into a nation under foreign bondage; and that, in 400 years after (or, strictly, 405 years, counting from the birth of Isaac to the Exode), they should come forth from that bondage as a nation, to take possession of the land in which he sojourned (Gen. xv.).

After ten years' residence in Canaan (B.C. 1913), Sarai, being then 75 years old, and having long been accounted barren, chose to put her own interpretation upon the promised blessing of a progeny to Abraham, and persuaded him to take her woman slave Hagar, an Egyptian, as a secondary or concubine wife, with the view that whatever child might proceed from this union should be accounted her own [HAGAR]. The son who was born to Abraham by Hagar, and who received the name of Ishmael [ISHMAEL], was accordingly brought up as the heir of his father and of the promises (Gen. xvi.). Thirteen years after (B.C. 1900), when Abraham was 99 years old, he was favoured with still more explicit declarations of the Divine purposes. He was reminded that the promise to him was that he should be the father of many nations; and to indicate this intention his name was now changed (as before described) from *Abnim* to *Abraham*. The Divine Being then solemnly renewed the covenant to be a God to him and to the race that should spring from him; and in token of that covenant directed that he and his should receive in their flesh the sign of circumcision [CIRCUMCISION]. Abundant blessings were promised to Ishmael; but it was then first announced, in distinct terms, that the heir of the special promises was not yet born, and that the barren Sarai, then 90 years old, should twelve months thence be his mother. Then also her name was changed from Sarai to Sarah (*the princess*); and to commemorate the laughter with which the prostrate patriarch received such strange tidings, it was directed that the name of Isaac (*laughing*) should be given to the future child. The very same day, in obedience to the Divine ordinance, Abraham himself, his son Ishmael, and his house-born and purchased slaves were all circumcised (Gen. xvii.).

Three months after this, as Abraham sat in his tent door during the heat of the day, he saw three travellers approaching, and hastened to meet them, and hospitably pressed upon them refreshment and rest. They assented, and under the shade of a terebinth tree partook of the abundant fare which the patriarch and his wife provided. From the manner in which one of the strangers spoke, Abraham soon gathered that his visitors were to other than the Lord himself and two attendant angels in human form. The promise of a son by Sarah was renewed; and when Sarah herself, who overheard this within the tent, laughed inwardly at the tidings, which, on account of her great age, she at first disbelieved, she incurred the striking rebuke, 'Is any thing too hard for Jehovah?' The strangers then addressed themselves to their journey, and Abraham walked some way with them. The two angels went forward in the di-

rection of Sodom, while the Lord made known to him that, for their enormous iniquities, Sodom and the other 'cities of the plain' were about to be made signal monuments of his wrath and of his moral government. Moved by compassion and by remembrance of Lot, the patriarch ventured, reverently but perseveringly, to intercede for the doomed Sodom; and at length obtained a promise that, if but ten righteous men were found therein, the whole city should be saved for their sake. Early the next morning Abraham arose to ascertain the result of this concession: and when he looked towards Sodom, the smoke of its destruction, rising 'like the smoke of a furnace,' made known to him its terrible overthrow [SODOM]. Almost immediately after, Abraham removed into the territories of Abimelech, king of Gerar, where, by a most extraordinary infatuation and lapse of faith, he allowed himself to stoop to the same prevarication in denying his wife, which, twenty-three years before, had occasioned him so much trouble in Egypt [ABIMELECH].

The same year Sarah gave birth to the long-promised son; and, according to previous direction, the name of Isaac was given to him [ISAAC]. This greatly altered the position of Ishmael, and appears to have created much ill-feeling both on his part and that of his mother towards the child; which was in some way manifested so pointedly, on occasion of the festivities which attended the weaning, that the wrath of Sarah was awakened, and she insisted that both Hagar and her son should be sent away. This was a very hard matter to a loving father; and Abraham was greatly distressed; but being apprised in a dream that this demand was in accordance with the Divine intentions respecting both Ishmael and Isaac, he, with his habitual uncompromising obedience, hastened them away early in the morning, with provision for the journey. Their adventures belong to the article HAGAR.

When Isaac was about 25 years old (B.C. 1872) it pleased God to subject the faith of Abraham to a severer trial than it had yet sustained, or than has ever fallen to the lot of any other mortal man. He was commanded to go into the mountainous country of Moriah (probably where the temple afterwards stood), and there offer up in sacrifice the son of his affection, and the heir of so many hopes and promises, which his death must nullify. But Abraham's 'faith shrunk not, assured that what God had promised he would certainly perform, and that he was able to restore Isaac to him even from the dead' (Heb. xi. 17-19), and he rendered a ready, however painful, obedience. Assisted by two of his servants, he prepared wood suitable for the purpose, and without delay set out upon his melancholy journey. On the third day he described the appointed place; and informing his attendants that he and his son would go some distance farther to worship, and then return, he proceeded to the spot. To the touching question of his son respecting the victim to be offered, the patriarch replied by expressing his faith that God himself would provide the sacrifice; and probably he availed himself of this opportunity of acquainting him with the Divine command. Isaac submitted patiently to be bound and laid out as a victim on the wood of the altar, and would most

certainly have been slain by his father's uplifted hand, had not the angel of Jehovah interposed at the critical moment to arrest the fatal stroke. A ram which had become entangled in a thicket was seized and offered; and a name was given to the place (*Jehocah-Jireh* — 'the Lord will provide') alluding to the believing answer which Abraham had given to his son's inquiry respecting the victim. The promises before made to Abraham were again confirmed in the most solemn manner (comp. Heb. vi. 13, 17). The father and son then rejoined their servants, and returned rejoicing to Beersheba (Gen. xxiii. 19).

Eight years after (B.C. 1860) Sarah died at the age of 120 years, being then at or near Hebron. This loss first taught Abraham the necessity of acquiring possession of a family sepulchre in the land of his sojourning. His choice fell on the cave of Machpelah (MACHPELAH), and after a striking negotiation with the owner in the gate of Hebron, he purchased it, and had it legally secured to him. This was the only possession he ever had in the Land of Promise (Gen. xxiii.). The next care of Abraham was to provide a suitable wife for his son Isaac. It has always been the practice among pastoral tribes to keep up the family ties by intermarriages of blood-relations: and now Abraham had a further inducement in the desire to maintain the purity of the separated race from foreign and idolatrous connections. He therefore set his aged and confidential steward Eliezer, under the bond of a solemn oath to discharge his mission faithfully, to renew the intercourse between his family and that of his brother Nahor, whom he had left behind in Charran. He prospered in his important mission [ISAAC], and in due time returned, bringing with him Rebekah, the daughter of Nahor's son Bethuel, who became the wife of Isaac, and was installed as chief lady of the camp, in the separate tent which Sarah had occupied (Gen. xxiv.). Some time after Abraham himself took a wife named Keturah, by whom he had several children. These, together with Ishmael, seem to have been portioned off by their father in his lifetime, and sent into the east and south-east, that there might be no danger of their interference with Isaac, the divinely appointed heir. There was time for this: for Abraham lived to the age of 175 years, 100 of which he had spent in the land of Canaan. He died in B.C. 1822 (Hales, 1978), and was buried by his two eldest sons in the family sepulchre which he had purchased of the Hittites (Gen. xxv. 1-10).

ABRAHAM'S BOSOM. There was no name which conveyed to the Jews the same associations as that of Abraham. As undoubtedly he was in the highest state of felicity of which departed spirits are capable, 'to be with Abraham' implied the enjoyment of the same felicity; and 'to be in Abraham's bosom' meant to be in repose and happiness with him. The latter phrase is obviously derived from the custom of sitting or reclining at table which prevailed among the Jews in and before the time of Christ [ACCUBATION]. It was quite usual to describe a just person as being with Abraham, or as lying on Abraham's bosom; and as such images were unobjectionable, Jesus accommodated his speech to them, to render himself the more intelligible

by familiar notions, when, in the beautiful parable of the rich man and Lazarus, he describes the state of the latter after death under these conditions (Luke xvi. 22, 23).

ABSALOM (*father of peace*), the third son of David, and his only son by Maachah, daughter of Talmai, king of Geshur (2 Sam. iii. 3). He was deemed the handsomest man in the kingdom; and was particularly noted for the profusion of his beautiful hair, which appears to have been regarded with great admiration. David's other child by Maachah was a daughter named Tamar, who was also very beautiful. She became the object of lustful regard to her half-brother Amnon, David's eldest son; and was violated by him. In all cases where polygamy is allowed, we find that the honour of a sister is in the guardianship of her full brother, more even than in that of her father, whose interest in her is considered less peculiar and intimate. We trace this notion even in the time of Jacob (Gen. xxxiv. 6, 13, 25, sqq.). So in this case the wrong of Tamar was taken up by Absalom, who kept her secluded in his own house, and said nothing for the present, but brooded silently over the wrong he had sustained and the vengeance which devolved upon him. It was not until two years had passed that Absalom found opportunity for the bloody revenge he had meditated. He then held a great sheep-shearing feast at Baal-hazor near Ephraim, to which he invited all the king's sons. Amnon attended among the other princes; and, when they were warm with wine, he was slain by the servants of Absalom, according to the previous directions of their master. Absalom then hastened to Geshur, and remained there three years with his father-in-law, king Talmai.

Now Absalom, with all his faults, was eminently dear to the heart of his father, who mourned every day after the banished fratricide. His secret wishes to have home his beloved though guilty son were however discerned by Joab, who employed a clever woman of Tekoah to lay a supposed case before him for judgment; and she applied the anticipated decision so adroitly to the case of Absalom, that the king discovered the object, and detected the interposition of Joab. Regarding this as in some degree expressing the sanction of public opinion, David gladly commissioned Joab to 'call home his banished.' Absalom returned; but David, still mindful of his duties as a king and father, controlled the impulse of his feelings, and declined to admit him to his presence. After two years, however, Absalom, impatient of his disgrace, found means to compel the attention of Joab to his case; and through his means a complete reconciliation with the king was effected (2 Sam. xiii. xiv.).

Absalom was now, by the death of his elder brothers, Amnon and Chileab, become the eldest surviving son of David, and heir apparent to the throne. But under the peculiar theocratic institutions of the Hebrews, the Divine king reserved the power of bestowing the crown on any person whom he might prefer. The house of David was now established as the reigning dynasty, and out of his family Solomon had been selected by God as the successor of his father. In this fact, which was probably well known to the

mass of the nation, we have a clear motive for the rebellion of Absalom, who wished to secure the throne, which he deemed to be his by the laws of primogeniture, during the lifetime of his father, while the destined successor was yet a child.

The fine person of Absalom, his superior birth, and his natural claim, pre-disposed the people to regard his pretensions with favour: and this pre-disposition was strengthened by the condescending sympathy with which he accosted the suitors who repaired for justice or favour to the royal audience, combined with the state and attendance with which, as the heir apparent, he appeared in public. By these influences 'he stole the hearts of the men of Israel;' and when at length, four years after his return from Geshur, he repaired to Hebron, and there proclaimed himself king, the great body of the people declared for him. So strong ran the tide of opinion in his favour, that David found it expedient to quit Jerusalem and retire to Mahanaim, beyond the Jordan.

When Absalom heard of this, he proceeded to Jerusalem and took possession of the throne without opposition. Among those who had joined him was Ahithophel, who had been David's counsellor, and whose profound sagacity caused his counsels to be regarded like oracles in Israel. This defection alarmed David more than any other circumstance, and he persuaded his friend Hushai to go and join Absalom, in the hope that he might be made instrumental in turning the sagacious counsels of Ahithophel to foolishness. The first piece of advice which Ahithophel gave Absalom was, that he should publicly take possession of that portion of his father's harem which had been left behind in Jerusalem. This was not only a mode by which the succession of the throne might be confirmed [ABISHAG], but in the present case this villainous measure would dispose the people to throw themselves the more unreservedly into his cause, from the assurance that no possibility of reconciliation between him and his father remained. Hushai had not then arrived. Soon after he came, when a council of war was held to consider the course of operations to be taken against David. Ahithophel counselled that the king should be pursued that very night, and smitten, while he was 'weary and weak handed, and before he had time to recover strength.' Hushai, however, whose object was to gain time for David, speciously urged, from the known valor of the king, the possibility and fatal consequences of a defeat, and advised that all Israel should be assembled against him in such force as it would be impossible for him to withstand. Fatally for Absalom, the counsel of Hushai was preferred to that of Ahithophel; and time was thus given to enable the king to collect his resources. A large force was soon raised, which he properly organized and separated into three divisions, commanded severally by Joab, Abishai, and Itai of Gath. The king himself intended to take the chief command; but the people refused to allow him to risk his valuable life, and the command then devolved upon Joab. The battle took place in the borders of the forest of Ephraim; and the tactics of Joab, in drawing the enemy into the wood, and there

hemming them in, so that they were destroyed with ease, eventually, under the providence of God, decided the action against Absalom. Twenty thousand of his troops were slain, and the rest fled to their homes. Absalom himself fled on a swift mule; but as he went, the boughs of a terebinth tree caught the long hair in which he gloried, and he was left suspended there. The charge which David had given to the troops to respect the life of Absalom prevented any one from slaying him: but when Joab heard of it, he hastened to the spot, and pierced him through with three darts. His body was then taken down and cast into a pit there in the forest, and a heap of stones was raised upon it.

David's fondness for Absalom was unextinguished by all that had passed; and no sooner did he hear that his son was dead, than he retired to his chamber and gave vent to his paternal anguish in the most bitter wailings—'O my son Absalom! my son, my son Absalom! would God I had died for thee, O Absalom, my son, my son!' The consequences might have been most dangerous, had not Joab gone up to him, and, after sharply rebuking him for thus discouraging those who had risked their lives in his cause, induced him to go down and cheer the retreating warriors by his presence (2 Sam. xiii. xix. 8).

ABSALOM'S TOMB. A remarkable monument bearing this name marks a conspicuous figure in the Valley of Jehoshaphat, outside Jerusalem; and it has been noticed and described by almost all travellers. It is close by the lower bridge over the Kidron, and is a square isolated block hewn out from the rocky ledge so as to leave an area or niche around it. The body of this monument is about 24 feet square.

2. Absalom's Tomb.

The elevation is about 18 or 20 feet to the top of the architrave, and thus far it is wholly cut from the rock. The upper part of the tomb, which is about 20 feet high (the whole has therefore an elevation of about 40 feet), has been

carried up with mason-work of large stones. There is a small excavated chamber in the body of the tomb, into which a hole had been broken through one of the sides several centuries ago.

The old travellers who refer to this tomb, as well as Calmet after them, are satisfied that they find the history of it in 2 Sam. xviii. 18, which states that Absalom, having no son, built a monument to keep his name in remembrance, and that this monument was called 'Absalom's Hand'—that is, *index*, *memorial*, or *monument*. With our later knowledge, a glance at this and the other monolithic tomb bearing the name of Zecharias, is quite enough to show that they had no connection with the times of the persons whose names have been given to them. Hat tradition seems never to have become fully settled as to the individuals whose names they should bear, and to the present day the accounts of travellers have been varying and inconsistent.

ABSTINENCE is a refraining from the use of certain articles of food usually eaten; or from all food during a certain time for some particular object. It is distinguished from **TEMPERANCE**, which is moderation in ordinary food; and from **FASTING**, which is abstinence from a religious motive. The first example of abstinence which occurs in Scripture is that in which the use of blood is forbidden to Noah (Gen. ix. 4) [**BLOOD**]. The next is that mentioned in Gen. xxxii. 32: 'The children of Israel eat not of the sinew which shrank, which is upon the hollow of the thigh, unto this day, because he (the angel) touched the hollow of Jacob's thigh in the sinew that shrank.' By the law, abstinence from blood was confirmed, and the use of the flesh of even lawful animals was forbidden, if the manner of their death rendered it impossible that they should be, or uncertain that they were, duly exsanguinated (Exod. xxii. 31; Deut. xiv. 21). A broad rule was also laid down by the law, defining whole classes of animals that might not be eaten (Lev. xi. [**FOOD**]). Certain parts of lawful animals, as being sacred to the altar, were also interdicted. These were the large lobe of the liver, the kidneys and the fat upon them, as well as the tail of the 'fat-tailed' sheep (Lev. iii. 9-11). Everything consecrated to idols was also forbidden (Exod. xxxiv. 15). Instances of abstinence from allowed food are not frequent, except in commemorative or afflictive fasts. The forty days' abstinence of Moses, Elijah, and Jesus are peculiar cases requiring to be separately considered [**FASTING**]. The priests were commanded to abstain from wine previous to their actual ministrations (Lev. x. 9), and the same abstinence was enjoined to the Nazarites during the whole period of their separation (Num. vi. 3). A constant abstinence of this kind was, at a later period, voluntarily undertaken by the Rechabites (Jer. xxxv. 14-18). Among the early Christian converts there were some who deemed themselves bound to adhere to the Mosiacal limitations regarding food, and they accordingly abstained from flesh sacrificed to idols, as well as from animals which the law accounted unclean; while others condemned this as a weakness, and exulted in the liberty wherewith Christ had made his followers free (Rom. xiv.

1-3; 1 Cor. viii.). Mention is made by the apostle Paul of certain sectaries who should arise, forbidding marriage and enjoining abstinence from meats which God had created to be received with thanksgiving (1 Tim. iv. 3, 4). The council of the apostles at Jerusalem decided that no other abstinence regarding food should be imposed upon the converts than 'from meats offered to idols, from blood, and from things strangled' (Acts xv. 29).

ABYSS. The Greek word means literally *without bottom*, but actually *deep, profound*. In the New Testament it is used as a noun to describe Hades, or the place of the dead generally (Rom. x. 7); but more especially that part of Hades in which the souls of the wicked were supposed to be confined (Luke viii. 31; Rev. ix. 1, 2, 11; xx. 1, 3; comp. 2 Pet. ii. 4). In the Revelation the authorized version invariably renders it 'bottomless pit,' elsewhere 'deep.'

Most of these uses of the word are explained by reference to some of the cosmological notions which the Hebrews entertained in common with other Eastern nations. It was believed that the thys, or sea of fathomless waters, encompassed the whole earth. The earth floated on the abyss, of which it covered only a small part. According to the same notion, the earth was founded upon the waters, or, at least, had its foundations in the abyss beneath (Ps. xxiv. 2; cxxxvi. 6). Under these waters, and at the bottom of the abyss, the wicked were represented as groaning, and undergoing the punishment of their sins. There were confined the Rephaim—those old giants who, while living, caused surrounding nations to tremble (Prov. ix. 18; xxx. 16). In those dark regions the sovereigns of Tyre, Babylon, and Egypt are described by the prophets as undergoing the punishment of their cruelty and pride (Jer. xxv. 14; Ezek. xxviii. 10, &c.). This was 'the deep' into which the evil spirits in Luke, viii. 31, besought that they might not be cast, and which was evidently dreaded by them [**COSMOGONY; HADES**].

ACCAD, one of the five cities in 'the land of Shinar,' or Babylonia, which are said to have been built by Nimrod, or rather, to have been 'the beginning of his kingdom' (Gen. x. 10). It seems that several of the ancient translators found in their Hebrew MSS. Achar instead of Achad, and it is probable that this was really the name of the city. Its situation has been much disputed, but in all probability it may be identified with a remarkable pile of ancient buildings called *Akker-kuf*, in the district of Siticene, where there was a river named *Argades*. These buildings are called by the Turks *Akker-i-Nimrud* and *Akker-i-Babil*.

Akker-kuf is about nine miles west of the Tigris, at the spot where that river makes its nearest approach to the Euphrates. The heap of ruins to which the name of Nimrod's Hill—*Tel-i-Nimrud*, is more especially appropriated, consists of a mound surmounted by a mass of brickwork, which looks like either a tower or an irregular pyramid, according to the point from which it is viewed. It is about 400 feet in circumference at the bottom, and rises to the height of 125 feet above the sloping elevation on which it stands. The mound, which seems to form the foundation of the pile, is a mass of

rubbish accumulated by the decay of the superstructure. In the ruin itself, the layers of sundried bricks, of which it is composed, can be traced very distinctly. They are cemented together by lime or bitumen, and are divided into courses varying from 12 to 20 feet in height, and are separated by layers of reeds, as is usual in the more ancient remains of this primitive

3. Akker-kuf.

region. Travellers have been perplexed to make out the use of this remarkable monument, and various strange conjectures have been hazarded. The embankments of canals and reservoirs, and the remnants of brickwork and pottery occupying the place all around, evince that the Tel stood in an important city; and, as its construction announces it to be a Babylonian relic, the greater probability is that it was one of those pyramidal structures erected upon high places, which were consecrated to the heavenly bodies, and served at once as the temples and the observatories of those remote times. Such buildings were common to all Babylonian towns; and those which remain appear to have been constructed more or less on the model of that in the metropolitan city of Babylon.

ACCHO, a town and haven within the nominal territory of the tribe of Asher, which however never acquired possession of it (Judg. i. 31). The Greek and Roman writers call it *ACE*, but it was eventually better known as **PROLEMAIS**, which name it received from the first Ptolemy, king of Egypt, by whom it was much improved. By this name it is mentioned in the New Testament (Acts xxi. 7). It was also called *Colonia Claudii Casaria*, in consequence of its receiving the privileges of a Roman city from the emperor Claudius. But the names thus imposed or altered by foreigners never took with the natives, and the place is still known in the country by the name of **AKKA**. During the Crusades the place was usually known to Europeans by the name of **ACON**: afterwards, from the occupation of the Knights of St. John of Jerusalem, as **St. JEAN D'ACRE**, or simply **ACRE**.

This famous city and haven is situated in N. lat. 32° 55', and E. long. 35° 5', and occupies the north-western point of a commodious bay, called the Bay of Acre, the opposite or south-western point of which is formed by the promontory of Mount Carmel. The city lies on

the plain to which it gives its name. Its western side is washed by the waves of the Mediterranean, and on the south lies the bay, beyond which may be seen the town of Caïpha, on the site of the ancient Calamos, and, rising high above both, the shrubby heights of Carmel. The mountains belonging to the chain of Anti-Libanus are seen at the distance of about four leagues to the north, while to the east the view is bounded by the fruitful hills of the Lower Galilee. The bay, from the town of Acre to the promontory of Mount Carmel, is three leagues wide and two in depth. The port, on account of its shallowness, can only be entered by vessels of small burden; but there is excellent anchorage on the other side of the bay, before Caïpha, which is, in fact, the roadstead of Acre. In the time of Strabo Accho was a great city, and it has continued to be a place of importance down to the present time. But after the Turks gained possession of it, Acre so rapidly declined, that the travellers of the sixteenth and seventeenth centuries concur in describing it as much fallen from its former glory. Traces of its ancient magnificence, however, still remained in the fragments of spacious buildings, sacred and secular, and in portions of old walls of extraordinary height and thickness. An impulse was given to the prosperity of the place by the measures of Sheikh Daher, and afterwards of Djeddar Pasha, and the town greatly increased in actual importance. The population in 1819 was computed at 10,000, of whom 3000 were Turks, the rest Christians of various denominations. Approached from Tyre the city presented a beautiful appearance, from the trees in the inside, which rise above the wall, and from the ground immediately around it on the outside being planted with orange, lemon, and palm trees. Inside, the streets had the usual narrowness and filth of Turkish towns; the houses solidly built with stone, with flat roofs; the bazars mean, but tolerably well supplied. The principal objects were the mosque built by Djeddar Pasha, the pasha's seraglio, the granary, and the arsenal. The trade was not considerable; the exports consisted chiefly of grain and cotton, the produce of the neighbouring plain; and the imports chiefly of rice, coffee, and sugar from Damietta. As thus described, the city was all but demolished in 1832 by the hands of Ibrahim Pasha; and although considerable pains were taken to restore it, yet, as lately as 1837, it still exhibited a most wretched appearance, with ruined houses and broken arches in every direction.

As the fame of Acre is rather modern than biblical, its history must in this place be briefly told. It belonged to the Phœnicians, until they, in common with the Jews, were subjugated by the Babylonians. By the latter it was doubtless maintained as a military station against Egypt, as it was afterwards by the Persians. In the distribution of Alexander's dominions Accho fell to the lot of Ptolemy Soter, who valued the acquisition, and gave it his own name. Afterwards it fell into the hands of the kings of Syria; and is repeatedly mentioned in the wars of the Maccabees. It was at one time the headquarters of their heathen enemies. In the endeavour of Demetrius Soter and Alexander

Balas to bid highest for the support of Jonathan, the latter gave Ptolemais and the lands around to the temple at Jerusalem. Jonathan was afterwards invited to meet Alexander and the king of Egypt at that place, and was treated with great distinction by them, but there he at length (B.C. 144) met his death through the treachery of Tryphon. Alexander Jannæus took advantage of the civil war between Antiochus Philometor and Antiochus Cyzicenus to besiege Ptolemais, as the only maritime city in those parts, except Gaza, which he had not subdued; but the siege was raised by Ptolemy Lathyrus (then king of Cyprus), who got possession of the city, of which he was soon deprived by his mother Cleopatra. She probably gave it, along with her daughter Selene, to Antiochus Grypus, king of Syria. At least, after his death, Selene held possession of that and some other Phœnician towns, after Tigranes, king of Armenia, had acquired the rest of the kingdom. But an injudicious attempt to extend her dominions drew upon her the vengeance of that conqueror, who, in B.C. 70, reduced Ptolemais, and, while thus employed, received with favour the Jewish embassy which was sent by Queen Alexandra, with valuable presents, to seek his friendship. A few years after, Ptolemais was absorbed, with all the country, into the Roman empire; and the rest of its ancient history is obscure and of little note. It is only mentioned in the New Testament from St. Paul having spent a day there on his voyage to Cæsarea (Acts xxi. 7). It continued a place of importance, and was the seat of a bishopric in the first ages of the Christian Church. The see was filled sometimes by orthodox and sometimes by Arian bishops; and it has the equivocal distinction of having been the birth-place of the Sabellian heresy. Accho, as we may now again call it, was an imperial garrison town when the Saracens invaded Syria, and was one of those that held out until Cæsarea was taken by Amrû in A.D. 638.

The Franks first became masters of it in A.D. 1110, when it was taken by Baldwin, king of Jerusalem. But in A.D. 1187 it was recovered by Salâhed-din, who retained it till A.D. 1191, when it was retaken by the Christians. This was the famous siege in which Richard Cœur-de-Lion made so distinguished a figure. The Christians kept it exactly one hundred years, or till A.D. 1291; and it was the very last place of which they were dispossessed. It had been assigned to the Knights Hospitaliers of Jerusalem, who fortified it strongly, and defended it valiantly, till it was at length wrested from them by Khalil ben Kelaoun, or Melek Seruf, Sultan of Egypt. Under this dominion it remained till A.D. 1517, when the Mamluke dynasty was overthrown by Selim I., and all its territories passed to the Turks. After this Acre remained in quiet obscurity till the middle of the last century, when the Arab Sheikh Daher took it by surprise. Under him the place recovered some of its trade and importance. He was succeeded by the barbarous but able tyrant Djeddar Pasha, who strengthened the fortifications and improved the town. Under him it rose once more into fame, through the gallant and successful resistance which, under the direc-

tion of Sir Sidney Smith, it offered to the arms of Buonaparte. After that famous siege the fortifications were farther strengthened, till it became the strongest place in all Syria. In 1832 the town was besieged for nearly six months by Ibrahim Pasha, during which 35,000 shells were thrown into it, and the buildings were literally beaten to pieces. It had by no means recovered from this calamity, when it was subjected to the operations of the English fleet under Admiral Stopford, in pursuance of the plan for restoring Syria to the Porte. On the 3rd of November, 1840, it was bombarded for several hours, when the explosion of the powder-magazine destroyed the garrison and laid the town in ruins.

ACCOMMODATION (exegetical or special) is principally employed in the application of certain passages of the Old Testament to events in the New, to which they had no actual historical or typical reference. Citations of this description are apparently very frequent throughout the whole New Testament, but especially in the Epistle to the Hebrews.

It cannot be denied that many such passages, although apparently introduced as referring to, or predictive of, certain events recorded in the New Testament, seem to have, in their original connection, an exclusive reference to quite other objects. The difficulty of reconciling such seeming misapplications, or deflections from their original design, has been felt in all ages, although it has been chiefly reserved to recent times to give a solution of the difficulty by the theory of *accommodation*. By this it is meant that the prophecy or citation from the Old Testament was not designed literally to apply to the event in question, but that the New Testament writer merely adopted it for the sake of ornament, or in order to produce a strong impression, by showing a remarkable parallelism between two analogous events, which had in themselves no mutual relation.

There is a catalogue of more than seventy of these accommodated passages adduced by the Rev. T. H. Horne, in support of this theory, in his *Introduction* (ii. 343, 7th ed. 1834), but it will suffice for our purpose to select the following specimens:—

Matt. xiii. 35,	cited from	Psaln lxxviii. 2.
" viii. 17	"	Isaiah liii. 4.
" ii. 15	"	Hosea xi. 1.
" ii. 17, 18	"	Jeremiah xxxi. 15.
" iii. 3	"	Isaiah xl. 3.

It will be necessary, for the complete elucidation of the subject, to bear in mind the distinction not only between accommodated passages and such as must be properly explained (as those which are absolutely adduced as proofs), but also between such passages and those which are merely borrowed, and applied by the sacred writers, sometimes in a higher sense than they were used by the original authors. Passages which do not strictly and literally predict future events, but which can be applied to an event recorded in the New Testament by an accidental parity of circumstances, can alone be thus designated. Such accommodated passages therefore, if they exist, can only be considered as descriptive, and not predictive.

It will here be necessary to consider the

various modes in which the prophecies of the Old Testament are supposed to be fulfilled in the New. For instance, the opinion has been maintained by several divines, that there is sometimes a literal, sometimes only a mediate, typical, or spiritual fulfilment. Sometimes a prophecy is cited merely by way of illustration (accommodation), while at other times nothing more exists than a mere allusion. Some prophecies are supposed to have an immediate literal fulfilment, and to have been afterwards accomplished in a larger and more extensive sense; but as the full development of this part of the subject appertains more properly to the much controverted question of the single and double sense of prophecy, we shall here dwell no further on it than to observe, that not only are commentators who support the theory of a double sense divided on the very important question, what are literal prophecies and what are only prophecies in a secondary sense, but they who are agreed on this question are at variance as to what appellation shall be given to those passages which are applied by the New Testament writers to the ministry of our Saviour, and yet historically belong to an antecedent period. In order to lessen the difficulty, a distinction has been attempted to be drawn from the formula with which the quotation is ushered in. Passages, for instance, introduced by the formula 'that it might be fulfilled,' are considered, on this account, as direct predictions by some, who are willing to consider citations introduced with the expression 'then was fulfilled' as nothing more than accommodations. The use of the former phrase, as applied to a mere accommodation, they maintain is not warranted by Jewish writers: such passages, therefore, they hold to be prophecies, at least in a secondary sense. Bishop Kidder appositely observes, in regard to this subject, that 'a scripture may be said to be fulfilled several ways, viz., properly and in the letter, as when that which was foretold comes to pass; or again, when what was fulfilled in the type is fulfilled again in the antitype; or else a scripture may be fulfilled more improperly, viz., by way of accommodation, as when an event happens to any place or people like to that which fell out some time before.' He instances the citation, Matt. ii. 17, 'In Ramah was a voice heard,' &c. 'These words,' he adds, 'are made use of by way of allusion to express this sorrow by. The evangelist doth not say "that it might be fulfilled," but "then was fulfilled," *q. d.*, such another scene took place.'

It must at the same time be admitted that the distinction in regard to the formula of quotation is not acknowledged by the majority of commentators, either of those who admit or of those who deny the theory of accommodation. Among the former it will suffice to name Calmet, Doddridge, Rosenmüller, and Jahn, who look upon passages introduced by the formula 'that it might be fulfilled,' as equally accommodations with those which are prefaced by the words 'then was fulfilled'; while those who deny the accommodative theory altogether, consider both as formulas of direct prophecies, at least in a secondary or typical sense. This, for instance, is the case especially in regard to

the two citations of this description which first present themselves in the New Testament, viz., Matt. ii. 15, and Matt. ii. 17, the former of which is introduced by the first, and the latter by the second of these formulas. But inasmuch as the commentators above referred to cannot perceive how the citation from Hosea xi. 1, 'Out of Egypt have I called my son,' although prefaced by the formula 'that it might be fulfilled,' and which literally relates to the calling of the children of Israel out of Egypt, can be prophetically diverted from its historical meaning, they took upon it as a simple accommodation, or applicable quotation. Mr. Horne observes, that 'it was a familiar idiom of the Jews, when quoting the writings of the Old Testament, to say, *that it might be fulfilled which was spoken by such and such a prophet*, not intending it to be understood that such a particular passage in one of the sacred books was ever designed to be a *real prediction* of what they were then relating, but signifying only that the words of the Old Testament might be properly adopted to express their meaning and illustrate their ideas.' 'The apostles,' he adds, 'who were Jews by birth, and wrote and spoke in the Jewish idiom, frequently thus cite the Old Testament, intending no more by this mode of speaking, than that the words of such an ancient writer might with equal propriety be adopted to characterize any similar occurrence which happened in their times. The formula "that it might be fulfilled," does not therefore differ in signification from the phrase "then was fulfilled," applied in the following citation in Matt. ii. 17, 18, from Jer. xxxi. 15-17, to the massacre of the infants at Bethlehem. They are a beautiful quotation, and not a prediction of what then happened, and are therefore applied to the massacre of the infants according not to their original and historical meaning, but according to Jewish phraseology.' Dr. Adam Clarke, also, in his Commentary on Jeremiah (xxx. 15-17), takes the same view:—'St. Matthew, who is ever fond of accommodation, applied these words to the massacre of the children of Bethlehem; that is, they were suitable to that occasion, and therefore he applied them, but they are not a prediction of that event.'

D. J. G. Rosenmüller gives examples, which he conceives clearly show the use of these formulas, the passages Matt. i. 22, 23; ii. 15, 17, 23; xv. 7; Luke iv. 21; James ii. 23; alleging that they were designed only to denote that something took place which resembled the literal and historical sense. The sentiments of a distinguished English divine are to the same effect: 'I doubt not that this phrase, "that it might be fulfilled," and the like were used first in quoting real prophecies, but that this, by long use, sunk in its value, and was more vulgarly applied, so that at last it was given to Scripture only accommodated.' And again, 'If prophecy could at last come to signify singing (Titus i. 12; 1 Sam. x. 10; 1 Cor. xiv. 1), why might not the phrase *fulfilling of Scripture and prophecy* signify only quotation' (Nicholl's *Conference with a Theist*, 1698, part iii. p. 13).

The accommodation theory in exegesis has been equally combated by two classes of opponents. Those of the more ancient school con-

sider such mode of application of the Old Testament passages not only as totally irreconcilable with the plain grammatical construction and obvious meaning of the controverted passages which are said to be so applied, but as an unjustifiable artifice, altogether unworthy of a divine teacher; while the other class of expositors, who are to be found chiefly among the most modern of the German Rationalists, maintain that the sacred writers, having been themselves trained in this erroneous mode of teaching, had mistakenly, but *bonâ fide*, interpreted the passages which they had cited from the Old Testament in a sense altogether different from their historical meaning, and thus applied them to the history of the Christian dispensation. Some of these have maintained that the accommodation theory was a mere shift resorted to by commentators who could not otherwise explain the application of Old Testament prophecies in the New consistently with the inspiration of the sacred writers: while the advocates of the system consider that the apostles, in adapting themselves to the mode of interpretation which was customary in their days, and in further adopting what may be considered an argument *e concessis*, were employing the most persuasive mode of oratory, and the one most likely to prove effectual; and that it was therefore lawful to adopt a method so calculated to attract attention to their divine mission, which they were at all times prepared to give evidence of by other and irrefragable proofs.

ACCUBATION, the posture of reclining on couches at table, which prevailed among the Jews in and before the time of Christ. We see no reason to think that, as commonly alleged, they borrowed this custom from the Romans after Judea had been subjugated by Pompey. But it is best known to us as a Roman custom, and as such must be described. The dinner-bed, or *triclinium*, stood in the middle of the dining-room, clear of the walls, and formed three sides of a square which enclosed the table. The open end of the square, with the central hollow, allowed the servants to attend and serve the table. In all the existing representations of the dinner-bed it is shown to have been higher than the enclosed table. Among the Romans the

usual number of guests on each couch was three, making nine for the three couches, but sometimes there were four to each couch. The Greeks went beyond this number; the Jews appear to have had no particular fancy in the matter, and we know that at our Lord's last supper thirteen persons were present. As each guest leaned, during the greater part of the entertainment, on his left elbow, so as to leave the right arm at

liberty, and as two or more lay on the same couch, the head of one man was near the breast of the man who lay behind him, and he was, therefore, said 'to lie in the bosom' of the other. This phrase was in use among the Jews (Luke xvi. 22, 23; John i. 18; xiii. 23), and occurs in such a manner as to show that to lie next below, or 'in the bosom' of the master of the feast, was considered the most favoured place, and was usually assigned to near and dear connections. Thus it was 'the disciple whom Jesus loved' who 'reclined upon his breast' at the last supper. The frame of the dinner-bed was laid with mattresses variously stuffed, and, latterly, was furnished with rich coverings and hangings. Each person was usually provided with a cushion or bolster on which to support the upper part of his person in a somewhat raised position; as the left arm alone could not long without weariness sustain the weight. The lower part of the body being extended diagonally on the bed, with the feet outward, it is at once perceived how easy it was for 'the woman that was a sinner' to come behind between the dinner-bed and the wall, and anoint the feet of Jesus (Luke vii. 37, 38; John xii. 3).

The dinner-beds were so various at different times, in different places, and under different circumstances, that no one description can apply to them all. Even among the Romans they were at first (after the Punic war) of rude form and materials, and covered with mattresses stuffed with rushes or straw; mattresses of hair and wool were introduced at a later period. At first the wooden frames were small, low, and round; and it was not until the time of Augustus that square and ornamented couches came into fashion. In the time of Tiberius the most splendid sort were veneered with costly woods or tortoiseshell, and were covered with valuable embroideries, the richest of which came from Babylon, and cost large sums. The Jews perhaps had all these varieties, though it is not likely that the usage was ever carried to such a pitch of luxury as among the Romans; and it is probable that the mass of the people fed in the ancient manner—seated on stools or on the ground. It appears that couches were often so low, that the feet rested on the ground; and that cushions or bolsters were in general use. It would also seem, from the mention of two and of three couches, that the arrangement was more usually square than semi-circular or round.

It is utterly improbable that the Jews derived this custom from the Romans, as is constantly alleged. They certainly knew it as existing among the Persians long before it had been adopted by the Romans themselves (Esth. i. 6; vii. 8); and the presumption is that they adopted it while subject to that people. The Greeks also had the usage (from the Persians) before the Romans; and with the Greeks of Syria the Jews had very much intercourse. Besides, the Romans adopted the custom from the Carthaginians, and, that they had it, implies that it previously existed in Phœnicia, in the neighbourhood of the Jews. Thus, that in the time of Christ the custom had been lately adopted from the Romans, is very improbable. It is also unlikely that in so short a time it should have become usual and even (as the Talmud asserts) obli-

gatory to eat the Passover in that posture of indulgent repose, and in no other.

ACCURSED. [ANATHEMA.]

ACCUSER. The original word, which bears this leading signification, means—1. One who has a cause or matter of contention; the accuser, opponent, or plaintiff in any suit (Judg. xii. 2; Matt. v. 25; Luke xii. 58). We have little information respecting the manner in which causes were conducted in the Hebrew courts of justice, except from the Rabbinical authorities, who, in matters of this description, may be supposed well informed as to the later customs of the nation. Even from these we learn little more than that great care was taken that, the accused being deemed innocent until convicted, he and the accuser should appear under equal circumstances before the court, that no prejudicial impression might be created to the disadvantage of the defendant, whose interests, we are told, were so anxiously guarded, that any one was allowed to speak whatever he knew or had to say in his favour, which privilege was withheld from the accuser. The word is also applied in Scripture, in the general sense, to any adversary or enemy (Luke xviii. 3; 1 Pet. v. 8). In the latter passage there is an allusion to the old Jewish opinion that Satan was the accuser or calumniator of men before God (Job i. 6, sq.; Rev. xii. 10, sq.; comp. Zech. iii. 1). In this application the forensic sense was still retained, Satan being represented as laying to man's charge a breach of the law, as in a court of justice, and demanding his punishment [SATAN].

ACELDAMA (*field of blood*), the field purchased with the money for which Judas betrayed Christ, and which was appropriated as a place of burial for strangers (Matt. xxvii. 8; Acts i. 19). It was previously 'a potter's field.' The field now shown as Aceldama lies on the slope of the hills beyond the valley of Hinnom, south of Mount Zion. Sandys thus writes of it: 'On the south side of this valley, near where it meeteth with the valley of Jehoshaphat, mounted a good height on the side of the mountain, is *Aceldama*, or the field of blood, purchased with the restored reward of treason, for a burial place for strangers. In the midst whereof a large square room was made by the mother of Constantine; the south side, walled with the natural rock; flat at the top, and equal with the upper level; out of which ariseth certain little cupoloes, open in the midst to let down the dead bodies. Thow these we might see the bottom, all covered with bones, and certain corpes but newly let down, it being now the sepulchre of the Armenians. A greedy graue, and great enough to devour the dead of a whole nation. For they say (and I believe it) that the earth thereof within the space of eight and forty houres will consume the flesh that is laid thereon.' He then relates the common story, that the empress referred to, caused 270 ship-loads of this flesh-consuming mould to be taken to Rome, to form the soil of the Campo Santo, to which the same virtue is ascribed. Castella affirms that great quantities of the wondrous mould were removed by divers Christian princes in the time of the Crusades, and to this source assigns the similar sarcophagic properties claimed not only by the Campo Santo at Rome, but by the ceme-

tery of St. Innocents at Paris, by the cemetery at Naples, and, we may add, that of the Campo Santo at Pisa.

The plot of ground originally bought 'to bury strangers in,' seems to have been early set apart by the Latins, as well as by the Crusaders, as a place of burial for pilgrims. In the fourteenth century it belonged to the Knights-Hospitallers. Early in the seventeenth century it was in the possession of the Armenians, who bought it for the burial of their own pilgrims. The erection of the charnel-house is ascribed to them. In the time of Maundrell they rented it at a sequin a day from the Turks. Corpses were still deposited there; and the traveller observes that they were in various stages of decay, from which he conjectures that the grave did not make that quick despatch with the bodies committed to it which had been reported. 'The earth, hereabouts,' he observes, 'is of a chalky substance; the plot of ground was not above thirty yards long by fifteen wide; and a moiety of it was occupied by the charnel-house, which was twelve yards high.' Richardson affirms that bodies were thrown in as late as 1818; but Dr. Robinson alleges that it has the appearance of having been for a much longer time abandoned: 'The field or plat is not now marked by any boundary to distinguish it from the rest of the hill-side; and the former charnel-house, now a ruin, is all that remains to point out the site.... An opening at each end enabled us to look in; but the bottom was empty and dry, excepting a few bones much decayed.'

ACHAÏA, a region of Greece, which in the restricted sense occupied the north-western portion of the Peloponnesus, including Corinth and its isthmus. By the poets it was often put for the whole of Greece, whence Achaïoi, the *Greeks*. Under the Romans, Greece was divided into two provinces, Macedonia and Achaia, the former of which included Macedonia proper, with Illyricum, Epirus, and Thessaly; and the latter, all that lay southward of the former. It is in this latter acceptance that the name of Achaia is always employed in the New Testament (Acts xviii. 12, 27; xix. 21; Rom. xv. 26; xvi. 5; 1 Cor. xvi. 15; 2 Cor. i. 1; ix. 2; xi. 10; 1 Thess. i. 7, 8). Achaia was at first a senatorial province, and, as such, was governed by proconsuls. Tiberius changed the two into one imperial province under procurators; but Claudius restored them to the senate and to the proconsular form of government. Hence the exact and minute propriety with which St. Luke expresses himself in giving the title of proconsul to Gallio, who was appointed to the province in the time of Claudius (Acts xviii. 12).

ACHAÏCUS, a native of Achaia, and a follower of the apostle Paul. He, with Stephanus and Fortunatus, was the bearer of the 1st Epistle to the Corinthians, and was recommended by the apostle to their special respect (1 Cor. xvi. 17).

ACHAN (*troubler*); in 1 Chron. ii. 7 written ACHAR. From the peculiarly appropriate significance of the name, it is supposed to have been imposed after the occurrence of the facts which rendered it notorious. The city of Jericho, before it was taken, was put under that awful ban, whereby all the inhabitants (except-

ing Rahab and her family) were devoted to destruction, all the combustible goods to be consumed by fire, and all the metals to be consecrated to God. This vow of devotion was rigidly observed by all the troops when Jericho was taken, save by one man, Achan, a Judahite, who could not resist the temptation of secreting an ingot of gold, a quantity of silver, and a costly Babylonish garment, which he buried in his tent. But God made known this infraction, which (the vow having been made by the nation as one body) had involved the whole nation in his guilt. The Israelites were defeated, with serious loss, in their first attack upon Ai; and as Joshua was well assured that this humiliation was designed as the punishment of a crime which had incultured the entire people, he took immediate measures to discover the criminal. As in other cases, the matter was referred to the Lord by the lot, and the lot ultimately indicated the actual criminal. The conscience-stricken offender then confessed his crime to Joshua; and his confession being verified by the production of his ill-gotten treasure, the people, actuated by the strong impulse with which men tear up, root and branch, a polluting thing, hurried away not only Achan, but his tent, his goods, his spoil, his cattle, his children, to the valley (afterwards called) of Achor, north of Jericho, where they stoned him, and all that belonged to him; after which the whole was consumed with fire, and a cairn of stones raised over the ashes. The severity of this act, as regards the family of Achan, has provoked some remark. Instead of vindicating it, as is generally done, by the allegation that the members of Achan's family were probably accessories to his crime after the fact, we prefer the supposition that they were included in the doom by one of those sudden impulses of indiscriminate popular vengeance to which the Jewish people were exceedingly prone, and which, in this case, it would not have been in the power of Joshua to control by any authority which he could under such circumstances exercise.

A'CHAR. [ACHAN.]

A'CHISH (called Abimelech in the title of Ps. xxxiv.), the Philistine king of Gath, with whom David twice sought refuge when he fled from Saul (1 Sam. xxi. 10-15; xxvii. 1-3). The first time David was in imminent danger; for he was recognised and spoken of by the officers of the court as one whose glory had been won at the cost of the Philistines. This talk filled David with such alarm that he feigned himself mad when introduced to the notice of Achish, who, seeing him 'scrabbling upon the doors of the gate, and letting his spittle fall down upon his beard,' rebuked his people sharply for bringing him to his presence, asking, 'Have I need of madmen, that ye have brought this fellow to play the madman in my presence? Shall this fellow come into my house?' After this David lost no time in quitting the territories of Gath. About four years after, when the character and position of David became better known, and when he was at the head of not less than 600 resolute adherents, he again repaired with his troop to King Achish, who received him in a truly royal spirit, and treated him with a generous confidence, of which David took perhaps

rather more advantage than was creditable to him [DAVID].

ACHMETHA (Ezra vi. 2; in the Apocrypha 2 Macc. ix. 3; Judith i. 1, 2; Tob. iii. 7; Joseph. *Antiq.* x. 11, 7; xi. 4, 6; also, in Greek authors, Ecbatana), a city in Media. The name seems to have been applied exclusively to cities having a fortress for the protection of the royal treasures. In Ezra we learn that in the reign of Darius Hystaspes the Jews petitioned that search might be made in the king's treasure-house at Babylon, for the decree which Cyrus had made in favour of the Jews (Ezra v. 17). Search was accordingly made in the record-office ('house of the rolls'), where the treasures were kept at Babylon (vi. 1); but it appears not to have been found there, as it was eventually discovered 'at Achmetha, in the palace of the province of the Medes' (vi. 2). In Judith i. 2-4, there is a brief account of Ecbatana, in which we are told that it was built by Arphaxad, king of the Medes, who made it his capital. It was built of hewn stones, and surrounded by a high and thick wall, furnished with wide gates and strong and lofty towers. Herodotus speaks of it in similar terms, and ascribes its foundation to Deioces, who was probably the same with the Arphaxad of Judith.

Ecbatana has been usually identified with the present Hamadan, which is still an important town, and the seat of one of the governments into which the Persian kingdom is divided. It is situated in north lat. 34° 35', east long. 46°, at the extremity of a rich and fertile plain, on a gradual ascent, at the base of the Elwund Mountains, whose higher summits are covered with perpetual snow. Some remnants of ruined walls of great thickness, and also of towers of sun-dried bricks, present the only positive evidence of a more ancient city than the present on the same spot. Heaps of comparatively recent ruins, and a wall fallen to decay, attest that Hamadan has declined from even its modern importance. The population is said by Southgate to be about 30,000, which, from what the present writer has seen of the place, he should judge to exceed the truth very considerably. It is little distinguished, inside, from other Persian towns of the same rank, save by its excellent and well-supplied bazaars, and the unusually large number of khans of rather a superior description. This is the result of the extensive transit trade of which it is the seat, it being the great centre where the routes of traffic between Persia, Mesopotamia, and Persia converge and meet. Its own manufactures are chiefly in leather. Many Jews reside here, claiming to be descended from those of the Captivity who remained in Media. Benjamin of Tudela says that in his time the number was 50,000. Modern travellers assign them 500 houses; but the Rabbi David de Beth Hillel, who was not likely to understate the fact, and who had the best means of information, gives them but 200 families. He says they are mostly in good circumstances, having fine houses and gardens, and are chiefly traders and goldsmiths. In the midst of the city is a tomb, which is said to be that of Mordecai and Esther. As Ecbatana was then the summer residence of the Persian court, it is probable enough that Mordecai and Esther died and were buried there; and traditional tes-

timony, taken in connection with this fact, and with such a monument in a place where Jews have been permanently resident, is better evidence than is usually obtained for the allocation of ancient sepulchres. The tomb is in charge of the Jews, and is one of their places in pilgrimage.

History notices another Ecbatana, in Palestine, at the foot of Mount Carmel, towards Ptolemais, where Cambyes died. It is not mentioned by this or any similar name in the Hebrew writings.

ACHOR, a valley between Jericho and Ai, which received this name (signifying *trouble*, from the trouble brought upon the Israelites by the sin of Achan (Josh. vii. 24) [ACHAN].

ACHSAH (*an anklet*), the daughter of Caleb, whose hand her father offered in marriage to him who should lead the attack on the city of Debir, and take it. The prize was won by his nephew Othniel; and as the bride was conducted with the usual ceremony to her future home, she alighted from her ass, and sued her father for an addition of springs of water to her dower in lands. It is probable that custom rendered it unusual, or at least ungracious, for a request tendered under such circumstances by a daughter to be refused; and Caleb, in accordance with her wish, bestowed upon her 'the upper and the nether springs' (Josh. xv. 16-19; Judg. i. 9-15).

ACHSHAPH, a royal city of the Canaanites (Josh. xi. 1), has been supposed by many to be the same as ACHIZ, both being in the tribe of Asher. But a careful consideration of Josh. xix. 25 and 29, will make it probable that the places were different. There is more reason in the conjecture that Achshaph was another name for Aecho or Acre, seeing that Aecho otherwise does not occur in the list of towns in the lot of Asher, although it is certain, from Judg. i. 31, that Aecho was in the portion of that tribe.

ACHZIB. There were two places of this name, not usually distinguished.

1. ACHIZ, in the tribe of Asher nominally, but almost always in the possession of the Phœnicians; being, indeed, one of the places from which the Israelites were unable to expel the former inhabitants (Judg. i. 31). In the Talmud it is called CHIZIN. The Greeks called it ECDIPPA; and it still survives under the name of ZIB. It is upon the Mediterranean coast, about ten miles north of Acre. It stands on an ascent close by the sea-side, and is described as a small place, with a few palm-trees rising above the dwellings.

2. ACHZIB, in the tribe of Judah (Josh. xv. 44; Mic. i. 14), of which there is no historical mention, but, from its place in the catalogue, it appears to have been in the middle part of the western border-land of the tribe, towards the Philistines. This is very possibly the Cheziv of Gen. xxxviii. 5.

ACRABATENE, a district in that portion of Judæa which lies towards the south end of the Dead Sea, occupied by the Edomites during the Captivity, and afterwards known as Idumæa. It is mentioned in 1 Macc. v. 3; Joseph. *Antiq.* xii. 8. 1. It is assumed to have taken its name from the Maaleh Akkrabbim, or *Steep of the Scorpions*, mentioned in Num. xxxiv. 4, and Josh.

xv. 3, as the southern extremity of the tribe of Judah [AKRABIM]. Another district of the same name is mentioned by Josephus as extending between Shechem and Jericho, but it is not mentioned in Scripture.

ACRE. [ACCHO.]

ACTS OF THE APOSTLES. This is the title of one of the canonical books of the New Testament, the fifth in order in the common arrangement, and the last of those properly of an historical character. Commencing with a reference to an account given in a former work of the sayings and doings of Jesus Christ before his ascension, its author proceeds to conduct us to an acquaintance with the circumstances attending that event, the conduct of the disciples on their return from witnessing it, the outpouring on them of the Holy Spirit according to Christ's promise to them before his crucifixion, and the amazing success which, as a consequence of this, attended the first announcement by them of the doctrine concerning Jesus as the promised Messiah and the Saviour of the World. After giving the history of the mother-church at Jerusalem up to the period when the violent persecution of its members by the rulers of the Jews had broken up their society and scattered them, with the exception of the apostles, throughout the whole of the surrounding region; and after introducing to the notice of the reader the case of a remarkable conversion of one of the most zealous persecutors of the church; who afterwards became one of its most devoted and successful advocates, the narrative takes a wider scope and opens to our view the gradual expansion of the church by the free admission within its pale of persons directly converted from heathenism and who had not passed through the preliminary stage of Judaism. The first step towards this more liberal and cosmopolitan order of things having been effected by Peter, to whom the honour of laying the foundation of the Christian church, both within and without the confines of Judaism, seems, in accordance with our Lord's declaration concerning him (Matt. xvi. 18), to have been reserved, Paul, the recent convert and the destined apostle of the Gentiles, is brought forward as the main actor on the scene. On his course of missionary activity, his successes and his sufferings, the chief interest of the narrative is thenceforward concentrated, until, having followed him to Rome, whither he had been sent as a prisoner to abide his trial, on his own appeal, at the bar of the emperor himself, the book abruptly closes, leaving us to gather further information concerning him and the fortunes of the church from other sources.

Respecting the *authorship* of this book there can be no ground for doubt or hesitation. It is, unquestionably, the production of the same writer by whom the third of the four Gospels was composed, as is evident from the introductory sentences of both (comp. Luke i. 1-4, with Acts i. 1). That this writer was Luke has not in either case been called in question, and is uniformly asserted by tradition. From the book itself, also, it appears that the author accompanied Paul to Rome when he went to that city as a prisoner (xxviii.). Now, we know from two epistles written by Paul at that time, that

iv. 11), which favours the supposition that he was the writer of the narrative of the apostle's journey to that city. It was rejected by certain heretics in the primitive times, such as the Marcionites, the Severians, and the Manicheans, or we should rather say, it was cast aside by them because it did not favour their peculiar views. A complaint made by Chrysostom would lead us to infer that in his day, though received as genuine, the Acts was generally omitted from the number of books publicly read in the churches, and had consequently become little known among the people attending those churches.

Many critics are inclined to regard the Gospel by Luke and the Acts of the Apostles as having formed originally only one work, consisting of two parts. But this opinion is at variance with Luke's own description of the relation of these two writings to each other (being called by him, the one the former and the other the latter treatise); and also with the fact that the two works have invariably, and from the earliest times, appeared with *distinct titles*.

Of the greater part of the events recorded in the Acts the writer himself appears to have been witness. He is for the first time introduced into the narrative in ch. xvi. 11, where he speaks of accompanying Paul to Philippi. He then disappears from the narrative until Paul's return to Philippi, more than two years afterwards, when it is stated that they left that place in company (xx. 6); from which it may be justly inferred that Luke spent the interval in that town. From this time to the close of the period embraced by his narrative he appears as the companion of the apostle. For the materials, therefore, of all he has recorded from ch. xvi. 11, to xxviii. 31, he may be regarded as having drawn upon his own recollection or on that of the apostle. To the latter source, also, may be confidently traced all he has recorded concerning the earlier events of the apostle's career; and as respects the circumstances recorded in the first twelve chapters of the Acts, and which relate chiefly to the church at Jerusalem and the labours of the apostle Peter, we may readily suppose that they were so much the matter of general notoriety among the Christians with whom Luke associated, that he needed no assistance from any other merely human source in recording them.

With regard to the *design* of the evangelist in writing this book, a prevalent popular opinion is, that Luke, having in his Gospel given a history of the life of Christ, intended to follow that up by giving in the Acts a narrative of the establishment and early progress of his religion in the world. That this, however, could not have been his design is obvious from the very partial and limited view which his narrative gives of the state of things in the church generally during the period through which it extends. As little can we regard this book as designed to record the official history of the apostles Peter and Paul, for we find many particulars concerning both these apostles mentioned incidentally elsewhere, of which Luke takes no notice (comp. 2 Cor. xi.; Gal. i. 17; ii. 11; 1 Pet. v. 13). Some are of opinion that no particular design should be ascribed to the evangelist in composing this book beyond that of furnishing his friend Theophilus with a pleasing and instructive

tive narrative of such events as had come under his own notice; but such a view savours too much of the lax opinions which these writers unhappily entertained regarding the sacred writers, to be adopted by those who regard all the sacred books as designed for the permanent instruction and benefit of the church universal. Much more deserving of attention is the opinion that 'the general design of the author of this book was, by means of his narratives, to set forth the co-operation of God in the diffusion of Christianity, and along with that, to prove, by remarkable facts, the dignity of the apostles and the perfectly equal right of the Gentiles with the Jews to a participation in the blessings of that religion.' Perhaps we should come still closer to the truth if we were to say that the design of Luke in writing the Acts was to supply, by select and suitable instances, an illustration of the power and working of that religion which Jesus had died to establish. In his Gospel he had presented to his readers an exhibition of Christianity as embodied in the person, character, and works of its great founder; and having followed him in his narration until he was taken up out of the sight of his disciples into heaven, this second work was written to show how his religion operated when committed to the hands of those by whom it was to be announced 'to all nations, beginning at Jerusalem' (Luke xxiv. 47).

Respecting the time when this book was composed it is impossible to speak with certainty. As the history is continued up to the close of the

second year of Paul's imprisonment at Rome, it could not have been written before A.D. 63; it was probably, however, composed very soon after, so that we shall not err far if we assign the interval between the year 63 and the year 65 as the period of its completion. Still greater uncertainty hangs over the place where Luke composed it, but as he accompanied Paul to Rome, perhaps it was at that city and under the auspices of the apostle that it was prepared.

The style of Luke in the Acts is, like his style in his Gospel, much purer than that of most other books in the New Testament. The Hebraisms which occasionally occur are almost exclusively to be found in the speeches of others which he has reported. His mode of narrating events is clear, dignified, and lively; and, as Michaelis observes, 'he has well supported the character of each person whom he has introduced as delivering a public harangue, and has very faithfully and happily preserved the manner of speaking which was peculiar to each of his orators.'

Whilst, as Lardner and others have very satisfactorily shown, the *credibility* of the events recorded by Luke is fully authenticated both by internal and external evidence, very great obscurity attaches to the *chronology* of these events. Our space will not permit us to enter at large into this point, we shall therefore content ourselves with merely presenting, in a tabular form, the dates affixed to the leading events by those writers whose authority is most deserving of consideration in such an inquiry.

ACTS, SPURIOUS [APOCRYPHA]. This term has been applied to several ancient writings pretended to have been composed by, or to supply historical facts respecting our Blessed Saviour and his disciples, or other individuals whose actions are recorded in the holy Scriptures. Some of these writings are still extant; others are only known to have existed, by the accounts of them which are to be met with in ancient authors.

Such, for example, is the beautiful sentiment cited by St. Paul (Acts xx. 35), *It is more blessed*

to give than to receive, which some have supposed to be taken from some lost apocryphal book. But the probability is that St. Paul received the passage by tradition from the other apostles. Various other sayings, ascribed to Christ by early writers, which are alleged to be derived from apocryphal gospels, are in all probability nothing more than loose quotations from the Scriptures, which were very common among the apostolical fathers.

The most remarkable of the apocrypha. Acts ascribed to our Lord is the letter which he is

said to have written to Agbarus, king of Edessa, in answer to a request from that monarch that he would come to heal a disease under which he laboured. Some few historians have maintained the genuineness of these letters, but most writers, including the great majority of Roman Catholic divines, reject them as spurious; and there is good reason to believe that the whole chapter of Eusebius which contains these documents is itself an interpolation.

ACTS OF THE APOSTLES, SPURIOUS.

Of these several are extant, others are lost, or only fragments of them are come down to us.

The following is a catalogue of the principal spurious Acts still extant:—*The Creed of the Apostles*.—*The Epistles of Barnabas, Clement, Ignatius, and Polycarp*.—*The Recognitions of Clement, or the Travels of Peter*.—*The Shepherd of Hermas*.—*The Acts of Pilate* (spurious), or the *Gospel of Nicodemus*.—*The Acts of Paul, or the Martyrdom of Thecla*.—*Abdias's History of the Twelve Apostles*.—*The Constitutions of the Apostles*.—*The Canons of the Apostles*.—*The Liturgies of the Apostles*.—*St. Paul's Epistle to the Laodiceans*.—*St. Paul's Letters to Seneca*.

ADAD is the name of the chief deity of the Syrians, the *suu*. The name of this Syrian deity is most probably an element in the names of the Syrian kings Benhadad and Hadadezer.

ADAD-RIMMON, properly HADAD-RIMMON (a garden of pomegranates), a city in the valley of Jezreel, where was fought the famous battle between King Josiah and Pharaoh-Necho (2 Kings xxiii. 29; Zech. xii. 11). Adad-rimmon was afterwards called Maximianopolis, in honour of the emperor Maximian. It was seventeen Roman miles from Caesarea, and ten miles from Jezreel.

A'DAH (*adorament, comeliness*): 1. one of the wives of Lamech (Gen. iv. 19); 2. one of the wives of Esau, daughter of Elon the Hittite (Gen. xxxvi. 4). She is called Judith in Gen. xxvi. 34.

ADAM, the word by which the Bible designates the first human being.

It is evident that, in the earliest use of language, the vocal sound employed to designate the first perceived object, of any kind, would be an appellative, and would be formed from something known or apprehended to be a characteristic property of that object. The word would, therefore, be at once the appellative and the proper name. But when other objects of the same kind were discovered, or subsequently came into existence, difficulty would be felt; it would become necessary to guard against confusion, and the inventive faculty would be called upon to obtain a discriminative term for each and singular individual, while some equally appropriate term would be fixed upon for the whole kind. Different methods of effecting these two purposes might be resorted to, but the most natural would be to retain the original term in its simple state, for the first individual: and to make some modification of it by prefixing another sound, or by subjoining one, or by altering the vowel or vowels in the body of the word, in order to have a term for the kind, and for the separate individuals of the kind.

This reasoning is exemplified in the first applications of the word before us: (Gen. i. 26),

'Let us make man [Adam] in our image;' (l. 27), 'And God created the man [the Adam] in his own image.' The next instance (ii. 7) expresses the source of derivation, a character or property; namely, the material of which the human body was formed: 'And the Lord God [Jehovah Elohim] formed the man [the Adam] dust from the ground [the adamah]'. The meaning of the primary word is, most probably, any kind of *reddish tint*, as a beautiful human complexion (Lam. iv. 7); but its various derivatives are applied to different objects of a red or brown hue, or approaching to such. The word *Adam*, therefore, is an appellative noun made into a proper one. It is further remarkable that, in all the other instances in the second and third chapters of Genesis, which are nineteen, it is put with the article, *the man, or the Adam*.

The question arises, Was the uttered sound, originally employed for this purpose, the very vocable *Adam*, or was it some other sound of correspondent signification? This is equivalent to asking, what was the primitive language of men?

That language originated in the instinctive cries of human beings herding together in a condition like that of common animals, is an hypothesis which, apart from all testimony of revelation, must appear unreasonable to a man of serious reflection. There are other animals, besides man, whose organs are capable of producing articulate sounds, through a considerable range of variety, and distinctly pronounced. Now, then, is it that parrots, jays, and starlings have not among themselves developed an articulate language, transmitted it to their successive generations, and improved it, both in the life-time of the individual and in the series of many generations? Those birds never attempt to speak till they are compelled by a difficult process on the part of their trainers, and they never train each other.

Upon the mere ground of reasoning from the necessity of the case, it seems an inevitable conclusion that not the capacity merely, but the actual use of speech, with the corresponding faculty of promptly understanding it, was given to the first human beings by a superior power: and it would be a gratuitous absurdity to suppose that power to be any other than the Almighty Creator. In what manner such communication or infusion of what would be equivalent to a habit took place, it is in vain to inquire; the subject lies beyond the range of human investigation: but, from the evident exigency, it must have been instantaneous, or nearly so. It is not necessary to suppose that a copious language was thus bestowed upon the human creatures in the first stage of their existence. We need to suppose only so much as would be requisite for the notation of the ideas of natural wants and the most important mental conceptions; and from these, as germs, the powers of the mind and the faculty of vocal designation would educe new words and combinations as occasion demanded.

That the language thus formed continued to be the universal speech of mankind till after the deluge, and till the great cause of diversity took place, is in itself the most probable supposition [TONGUES, CONFUSION OF]. If there were

any families of men which were not involved in the crime of the Babel-builders, they would almost certainly retain the primeval language. The longevity of the men of that period would be a powerful conservative of that language against the slow changes of time. That there were such exceptions seems to be almost an indubitable inference from the fact that Noah long survived the unholy attempt. His faithful piety would not have suffered him to fall into the snare; and it is difficult to suppose that none of his children and descendants would listen to his admonitions, and hold fast their integrity by adhering to him: on the contrary, it is reasonable to suppose that the habit and character of piety were established in many of them.

The confusion of tongues, therefore, whatever was the nature of that judicial visitation, would not fall upon that portion of men which was the most orderly, thoughtful, and pious, among whom the second father of mankind dwelt as their acknowledged and revered head.

If this supposition be admitted, we can have no difficulty in regarding as the mother of languages, not indeed the Hebrew, absolutely speaking, but that which was the stock whence branched the Hebrew, and its sister tongues, usually called the Shemitic, but more properly, by Dr. Pritchard, the Syro-Arabian. It may then be maintained that the actually spoken names of Adam and all the others mentioned in the ante-diluvian history were those which we have in the Hebrew Bible, very slightly and not at all essentially varied.

It is among the clearest deductions of reason, that men and all dependent beings have been *created*, that is, produced or brought into their first existence by an intelligent and adequately powerful being. A question, however, arises of great interest and importance. Did the Almighty Creator produce only one man and one woman, from whom all other human beings have descended?—or did he create several parental pairs, from whom distinct stocks of men have been derived? The affirmative of the latter position has been maintained by some, and, it must be confessed, not without apparent reason. The manifest and great differences in complexion and figure, which distinguish several races of mankind, are supposed to be such as entirely to forbid the conclusion that they have all descended from one father and one mother. The question is usually regarded as equivalent to this: whether there is only one species of men, or there are several. But we cannot, in strict fairness, admit that the questions are identical. It is hypothetically conceivable that the Adorable God might give existence to any number of creatures, which should all possess the properties that characterize identity of species, even without such differences as constitute varieties, or with any degree of those differences.

But the admission of the possibility is not a concession of the reality. So great is the evidence in favour of the derivation of the entire mass of human beings from one pair of ancestors, that it has obtained the suffrage of the men most competent to judge upon a question of comparative anatomy and physiology.

The animals which render eminent services to man, and peculiarly depend upon his protection,

are widely diffused—the horse, the dog, the hog, the domestic fowl. Now of these, the varieties in each species are numerous and different, to a degree so great, that an observer ignorant of physiological history would scarcely believe them to be of the same species. But man is the most widely diffused of any animal. In the progress of ages and generations, he has naturalized himself to every climate, and to modes of life which would prove fatal to an individual man suddenly transferred from a remote point of the field. The alterations produced affect every part of the body, internal and external, without extinguishing the marks of the specific identity. A further and striking evidence is, that when persons of different varieties are conjugally united, the offspring, especially in two or three generations, becomes more prolific, and acquires a higher perfection in physical and mental qualities than was found in either of the parental races. From the deepest African black to the finest Caucasian white, the change runs through imperceptible gradations; and, if a middle hue be assumed, suppose some tint of brown, all the varieties of complexion may be explained upon the principle of divergence influenced by outward circumstances. The conclusion may be fairly drawn, in the words of the able translators and illustrators of Baron Cuvier's great work:—'We are fully warranted in concluding, both from the comparison of man with inferior animals, so far as the inferiority will allow of such comparison, and, beyond that, by comparing him with himself, that the great family of mankind loudly proclaim a descent, at some period or other, from one common origin.'

Thus, by an investigation totally independent of historical authority, we are brought to the conclusion of the inspired writings, that the Creator 'hath made of one blood all nations of men, for to dwell on all the face of the earth' (Acts xvii. 26).

We shall now follow the course of those sacred documents in tracing the history of the first man, persuaded that their right interpretation is a sure basis of truth. At the same time we shall not reject illustrations from natural history and the reason of particular facts.

It is evident upon a little reflection, and the closest investigation confirms the conclusion, that the first human pair must have been created in a state equivalent to that which all subsequent human beings have had to reach by slow degrees, in growth, experience, observation, imitation, and the instruction of others: that is, a state of prime maturity, and with an infusion, concreation, or whatever we may call it, of knowledge and habits, both physical and intellectual, suitable to the place which man had to occupy in the system of creation, and adequate to his necessities in that place. Had it been otherwise, the new beings could not have preserved their animal existence, nor have held rational converse with each other, nor have paid to their Creator the homage of knowledge and love, adoration, and obedience; and reason clearly tells us that the last was the noblest end of existence. Those whom unhappy prejudices lead to reject revelation must either admit this, or must resort to suppositions of palpable ab-

surduity and impossibility. If they will not admit a direct action of Divine power in creation and adaptation to the designed mode of existence, they must admit something far beyond the miraculous, an infinite succession of finite beings, or a spontaneous production of order, organization, and systematic action, from some unintelligent origin. The Bible coincides with this dictate of honest reason, expressing these facts in simple and artless language, suited to the circumstances of the men to whom revelation was first granted. That this production in a mature state was the fact with regard to the vegetable part of the creation, is declared in Gen. ii. 4, 5: 'In the day of Jehovah God's making the earth and the heavens, and every shrub of the field before it should be in the earth, and every herb of the field before it should bud.' The two terms, shrubs and herb-ages, are put to designate the whole vegetable kingdom. The reason of the case comprehends the other division of organized nature; and this is applied to man and all other animals, in the words, 'Out of the ground—dust out of the ground—Jehovah God formed them.'

It is to be observed that there are two narratives at the beginning of the Mosaic records, different in style and manner, distinct and independent; at first sight somewhat discrepant, but when strictly examined, perfectly compatible, and each one illustrating and completing the other. The first is contained in Gen. i. 1, to i. 3; and the other, ii. 4, to iv. 26. As is the case with the Scripture history generally, they consist of a few principal facts, detached anecdotes, leaving much of necessary implication which the good sense of the reader is called upon to supply; and passing over large spaces of the history of life, upon which all conjecture would be fruitless.

In the second of these narratives we read, 'And Jehovah God formed the man [*Heb.* the Adam], dust from the ground [*ba-adamah*], and drew into his nostrils the breath of life; and the man became a living animal' (Gen. ii. 7). Here are two objects of attention, the organic mechanism of the human body, and the vitality with which it was endowed.

The mechanical material, formed (moulded, or arranged, as an artificer models clay or wax) into the human and all other animal bodies, is called 'dust from the ground.' This would be a natural and easy expression to men in the early ages, before chemistry was known or minute philosophical distinctions were thought of, to convey, in a general form, the idea of *earthly matter*, the constituent substance of the ground on which we tread. To say, that of this the human and every other animal body was formed, is a position which would be at once the most easily apprehensible to an uncultivated mind, and which yet is the most exactly true upon the highest philosophical grounds. We now know, from chemical analysis, that the animal body is composed, in the inscrutable manner called *organization*, of carbon, hydrogen, oxygen, nitrogen, lime, iron, sulphur, and phosphorus. Now all these are mineral substances, which in their various combinations form a very large part of the solid ground.

The expression which we have rendered

'living animal' sets before us the **ORGANIC LIFE** of the animal frame, that mysterious something which man cannot create nor restore, which baffles the most acute philosophers to search out its nature, and which reason combines with Scripture to refer to the immediate agency of the Almighty—'in him we live, and move, and have our being.'

The other narrative is contained in these words, 'God created man in his own image; in the image of God created he him; male and female created he them' (Gen. i. 27). *The image* (resemblance, such as a shadow bears to the object which casts it) of God is an expression which breathes at once archaic simplicity and the most recondite wisdom; for what term could the most cultivated and copious language bring forth more suitable to the purpose? It presents to us man as made in a resemblance to the author of his being, a true resemblance, but faint and shadowy; an outline, faithful according to its capacity, yet infinitely remote from the reality: a distant form of the *intelligence, wisdom, power, rectitude, goodness, and dominion* of the Adorable Supreme. To the inferior sentient beings with which he is connected man stands in the place of God. We have every reason to think that none of them are capable of conceiving a being higher than man. All, in their different ways, look up to him as their superior; the ferocious generally flee before him, afraid to encounter his power, and the gentle court his protection and show their highest joy to consist in serving and pleasing him. Even in our degenerate state it is manifest that if we treat the domesticated animals with wisdom and kindness, their attachment is most ardent and faithful.

Thus had man the shadow of the divine *dominion and authority* over the inferior creation. The attribute of *power* was also given to him, in his being made able to convert the inanimate objects and those possessing only the vegetable life, into the instruments and the materials for supplying his wants, and continually enlarging his sphere of command.

In such a state of things *knowledge and wisdom* are implied: the one quality, an acquaintance with these substances and their changeful actions which were necessary for a creature like man to understand, in order to his safety and comfort; the other, such sagacity as would direct him in selecting the best objects of desire and pursuit, and the right means for attaining them.

Above all, *moral excellence* must have been comprised in this 'image of God'; and not only forming a part of it, but being its crown of beauty and glory. The Christian inspiration, than which no more perfect disclosure of God is to take place on this side eternity, casts its light upon this subject: for this apostle Paul, in urging the obligations of Christians to perfect holiness, evidently alludes to the endowments of the first man in two parallel and mutually illustrative epistles;—the new man, renewed in knowledge after the image of HIM that created him; the new man which, after (according to) God, is created in righteousness and true holiness' (Col. iii. 10; Eph. iv. 24).

In this perfection of faculties, and with these

high prerogatives of moral existence, did human nature, in its first subject, rise up from the creating hand. The whole Scripture-narrative implies that this *STATE* of existence was one of correspondent *activity* and *enjoyment*. It plainly represents the DEITY himself as condescending to assume a human form and to employ human speech, in order to instruct and exercise the happy creatures whom (to borrow the just and beautiful language of the Apocryphal 'Wisdom') 'God created for incorruptibility, and made him an image of his own nature' (Wisd. Sol. ii. 23).

The noble and sublime idea that man thus had his Maker for his teacher and guide, precludes a thousand difficulties. It shows us the simple, direct, and effectual method by which the newly formed creature would have communicated to him all the intellectual knowledge, and all the practical arts and manipulations, which were useful and beneficial for him.

Religious knowledge and its appropriate habits also required an immediate infusion: and these are pre-eminently comprehended in the 'image of God.' On the one hand, it is not to be supposed that the newly created man and his female companion were inspired with a very ample share of the doctrinal knowledge which was communicated to their posterity by the successive and accumulating revolutions of more than four thousand years: and, on the other, we cannot imagine that they were left in gross ignorance upon the existence and excellencies of the Being who had made them, their obligations to him, and the way in which they might continue to receive the greatest blessings from him. It is self-evident that, to have attained such a kind and degree of knowledge, by spontaneous effort, under even the favourable circumstances of a state of negative innocence, would have been a long and arduous work. But the sacred narrative leaves no room for doubt upon this head. In the primitive style it tells of God as speaking to them, commanding, instructing, assigning their work, pointing out their danger, and showing how to avoid it. All this, reduced to the dry simplicity of detail, is equivalent to saying that the Creator, infinitely kind and condescending, by the use of forms and modes adapted to their capacity, fed their minds with truth, gave them a ready understanding of it and that delight in it which constituted holiness, taught them to hold intercourse with himself by direct addresses in both praise and prayer, and gave some disclosures of a future state of blessedness when they should have fulfilled the condition of their probation.

An especial instance of this instruction and infusion of practical habits is given to us in the narrative: 'Out of the ground Jehovah God formed every beast of the field and every fowl of the air; and brought them unto the man, to see what he would call them' (Gen. ii. 19). This, taken out of the style of condescending anthropomorphism, amounts to such a statement as the following: the Creator had not only formed man with organs of speech, but he taught him the use of them, by an immediate communication of the practical faculty and its accompanying intelligence; and he guided the man, as yet the solitary one of his species, to this among the first applications of speech, the

designating of the animals with which he was connected, by appellative words which would both be the help of his memory and assist his mental operations, and thus would be introductory and facilitating to more enlarged applications of thought and language. We are further warranted, by the recognised fact of the anecdotal and fragmentary structure of the Scripture history, to regard this as the selected instance for exhibiting a whole kind or class of operations or processes; implying that, in the same or similar manner, the first man was led to understand something of the qualities and relations of vegetables, earthy matters, the visible heavens, and the other external objects to which he had a relation.

The next important article in this primeval history is the creation of the human female. The narrative is given in the more summary manner in the former of the two documents:— 'Male and female created he them' (Gen. i. 27). It stands a little more at length in a third document, which begins the fifth chapter, and has the characteristic heading or title by which the Hebrews designated a separate work. 'This, the book of the generations of Adam. In the day God created Adam; he made him in the likeness of God, male and female he created them; and he blessed them, and he called their name Adam, in the day of their being created' (ver. 1, 2).

The second of the narratives is more circumstantial: 'And Jehovah God said, it is not good the man's being alone: I will make for him a help suitable for him.' Then follows the passage concerning the review and the naming of the inferior animals; and it continues—'but for Adam he found not a help suitable for him. And Jehovah God caused a deep sleep to fall upon the man [the Adam], and he slept: and he took one out of his ribs, and closed up the flesh in its place: and Jehovah God built up the rib which he had taken from the man into a woman, and he brought her to the man.'

The next particular into which the sacred history leads us, is one which we cannot approach without a painful sense of its difficulty and delicacy. It stands thus in the authorized version: 'And they were both naked, the man and his wife; and were not ashamed' (ii. 25). The common interpretation is, that, in this respect, the two human beings, the first and only existing ones, were precisely in the condition of the youngest infants, incapable of perceiving any incongruity in the total destitution of artificial clothing. But a little reflection will tell us, and the more carefully that reflection is pursued the more it will appear just, that this supposition is inconsistent with what we have established on solid grounds, the supernatural infusion into the minds of our first parents and into their nervous and muscular faculties, of the knowledge and practical habits which their descendants have had to acquire by the long process of instruction and example. We have seen the necessity that there must have been communicated to them, directly by the Creator, no inconsiderable measure of natural knowledge and the methods of applying it, or their lives could not have been secured; and of moral and spiritual knowledge, righteousness, and true holiness, such a

measure as would belong to the sinless state, and would enable them to render an intelligent and perfect worship to the Glorious Deity. It seems impossible for that state of mind and habits to exist without a correct sensibility to proprieties and decency which infant children cannot understand or feel; and the capacities and duties of their conjugal state are implied in the narrative. Further, it cannot be overlooked that, though we are entitled to ascribe to the locality of Eden the most bland atmosphere and delightful soil, yet the action of the sun's rays upon the naked skin, the range of temperature through the day and the night, the alternations of dryness and moisture, the various labour among trees and bushes, and exposure to insects, would render some protective clothing quite indispensable.

From these considerations we feel ourselves obliged to understand the word *arom* in that which is its most usual signification in the Hebrew language, as importing *not an absolute*, but a *partial or comparative* nudity, a stripping off of the upper garment, or of some other usual article of dress, when all the habiliments were not laid aside; and this is a more frequent signification than that of entire destitution. If it be asked, Whence did Adam and Eve derive this clothing? we reply, that, as a part of the divine instruction which we have established, they were taught to take off the inner bark of some trees, which would answer extremely well for this purpose. If an objection be drawn from Gen. iii. 7, 10, 11, we reply, that, in consequence of the transgression, the clothing was disgracefully injured.

Another inquiry presents itself. How long did the state of paradisaic innocence and happiness continue? Some have regarded the period as very brief, not more even than a single day; but this manifestly falls very short of the time which a reasonable probability requires. The first man was brought into existence in the region called Edeu; then he was introduced into a particular part of it, the garden, replenished with the richest productions of the Creator's bounty for the delight of the eye and the other senses; the most agreeable labour was required 'to dress and to keep it,' implying some arts of culture, preservation from injury, training flowers and fruits, and knowing the various uses and enjoyments of the produce; making observation upon the works of God, of which an investigation and designating of animals is expressly specified; nor can we suppose that there was no contemplation of the magnificent sky and the heavenly bodies: above all, the wondrous communion with the condescending Deity, and probably with created spirits of superior orders, by which the mind would be excited, its capacity enlarged, and its holy felicity continually increased. It is also to be remarked, that the narrative (Gen. ii. 19, 20) conveys the implication that some time was allowed to elapse, that Adam might discover and feel his want of a companion of his own species, 'a help correspondent to him.'

These considerations impress us with a sense of probability, amounting to a conviction, that a period not very short was requisite for the exercise of man's faculties, the disclosures of his happiness, and the service of adoration which he

could pay to his Creator. But all these considerations are strengthened by the recollection that they attach to man's solitary state; and that they all require new and enlarged application when the addition of conjugal life is brought into the account. The conclusion appears irresistible that a duration of many days, or rather weeks or months, would be requisite for so many and important purposes.

Thus divinely honoured and happy were the progenitors of mankind in the state of their creation.

The next scene which the sacred history brings before us is a dark reverse. Another agent comes into the field and successfully employs his arts for seducing Eve, and by her means Adam, from their original state of rectitude, dignity, and happiness.

Among the provisions of divine wisdom and goodness were two vegetable productions of wondrous qualities and mysterious significance: 'the tree of life in the midst of the garden, and the tree of knowledge of good and evil' (Gen. ii. 9). It would add to the precision of the terms, and perhaps aid our understanding of them, if we were to adhere strictly to the Hebrew by retaining the definite prefix: and then we have 'the tree of the life' and 'the tree of the knowledge.' Thus would be indicated *the* particular life of which the one was a symbol and instrument, and *the* fatal knowledge springing from the abuse of the other. At the same time, we do not maintain that these appellations were given to them at the beginning. We rather suppose that they were applied afterwards, suggested by the events and connection, and so became the historical names.

We see no sufficient reason to understand, as some do, 'the tree of life' collectively, as implying a species, and that there were many trees of that species. The figurative use of the expression in Rev. xxii. 2, where a plurality is plainly intended, involves no evidence of such a design in this literal narrative. The phraseology of the text best agrees with the idea of a single tree, designed for a special purpose, and not intended to perpetuate its kind. Though in the state of innocence, Adam and Eve might be liable to some corporal suffering from the changes of the season and the weather, or accidental circumstances; in any case of which occurring, this tree had been endowed by the bountiful Creator with a medicinal and restorative property, probably in the way of instantaneous miracle. We think also that it was designed for a sacramental or symbolical purpose, a representation and pledge of 'the life,' emphatically so called, heavenly immortality when the term of probation should be happily completed. Yet we by no means suppose that this 'tree of the life' possessed any intrinsic property of communicating immortality. In the latter view, it was a sign and seal of the divine promise. But, with regard to the former intention, we see nothing to forbid the idea that it had most efficacious medicinal properties in its fruit, leaves, and other parts. Such were called *trees of life* by the Hebrews (Prov. iii. 18; xi. 30; xiii. 12; xv. 4).

The 'tree of the knowledge of good and evil' might be any tree whatever; it might be of any

species even yet remaining, though, if it were so, we could not determine its species, for the plain reason, that no name, description, or information whatever is given that could possibly lead to the ascertainment. Yet we cannot but think the more reasonable probability to be, that it was a tree having poisonous properties, stimulating, and intoxicating, such as are found in some existing species, especially in hot climates. On this ground, the prohibition to eat or even touch the tree was a beneficent provision against the danger of pain and death. But the revealed object of this 'tree of the knowledge of good and evil' was that which would require no particular properties beyond some degree of external beauty and fruit of an immediately pleasant taste. That object was to be a *test of obedience*. For such a purpose, it is evident that to select an indifferent act, to be the object prohibited, was necessary; as the obligation to refrain should be only that which arises simply, so far as the subject of the law can know, from the sacred will of the law-giver. This does not, however, nullify what we have said upon the possibility, or even probability, that the tree in question had noxious qualities: for upon either the affirmative or the negative of the supposition, the subjects of this positive law, having upon all antecedent grounds the fullest conviction of the perfect rectitude and benevolence of their Creator, would see in it the simple character of a test, a means of proof, whether they would or would not implicitly confide in him. For so doing they had every possible reason; and against any thought or mental feeling tending to the violation of the precept, they were in possession of the most powerful motives. There was no difficulty in the observance. They were surrounded with a paradise of delights, and they had no reason to imagine that any good whatever would accrue to them from their seizing upon anything prohibited. If perplexity or doubt arose, they had ready access to their divine benefactor for obtaining information and direction. But they allowed the thought of disobedience to form itself into a disposition, and then a purpose.

Thus was the seal broken, the integrity of the heart was gone, the sin was generated, and the outward act was the consummation of the dire process. Eve, less informed, less cautious, less endowed with strength of mind, became the more ready victim. 'The woman, being deceived, was in the transgression;' but 'Adam was not deceived' (1 Tim. ii. 14). He rushed knowingly and deliberately to ruin. The offence had grievous aggravations. It was the preference of a trifling gratification to the approbation of the Supreme Lord of the universe; it implied a denial of the wisdom, holiness, goodness, veracity, and power of God; it was marked with extreme ingratitude; and it involved a contemptuous disregard of consequences, awfully impious as it referred to their immediate connection with the moral government of God, and cruelly selfish as it respected their posterity.

The instrument of the temptation was a serpent; whether any one of the existing kinds it is evidently impossible for us to know. Of that numerous order many species are of brilliant colours and playful in their attitudes and manners, so that one may well conceive of such an

object attracting and fascinating the first woman. Whether it spoke in an articulate voice, like the human, or expressed the sentiments attributed to it by a succession of remarkable and significant actions, may be a subject of reasonable question. The latter is possible, and it seems the preferable hypothesis, as, without a miraculous intervention, the mouth and throat of no serpent could form a vocal utterance of words; and we cannot attribute to any wicked spirit the power of working miracles.

This part of the narrative begins with the words, 'And the serpent was crafty above every animal of the field' (Gen. iii. 1). It is to be observed that this is not said of the order of serpents, as if it were a general property of them, but of that particular serpent. Indeed, this 'cunning craftiness, lying in wait to deceive' (Eph. iv. 14), is the very character of that malignant creature of whose wily stratagems the reptile was a mere instrument. The existence of spirits, superior to man, and of whom some have become depraved, and are labouring to spread wickedness and misery to the utmost of their power, has been found to be the belief of all nations, ancient and modern, of whom we possess information. It has also been the general doctrine of both Jews and Christians, that one of those fallen spirits was the real agent in this first and successful temptation; and this doctrine receives strong confirmation from the declarations of our Lord and his apostles. See 2 Cor. ii. 11; xi. 3, 14; Rev. xii. 9; xx. 2; John viii. 44. The summary of these passages presents almost a history of the Fall—the tempter, his manifold arts, his serpentine disguises, his falsehood, his restless activity, his bloodthirsty cruelty, and his early success in that career of deception and destruction.

The condescending Deity, who had held gracious and instructive communion with the parents of mankind, assuming a human form and adapting all his proceedings to their capacity, visibly stood before them; by a searching interrogatory drew from them the confession of their guilt, which yet they aggravated by evasions and insinuations against God himself; and pronounced on them and their seducer the sentence due. On the woman he inflicted the pains of child-bearing, and a deeper and more humiliating dependence upon her husband. He doomed the man to hard and often fruitless toil, instead of easy and pleasant labour. On both, or rather on human nature universally, he pronounced the awful sentence of death. The denunciation of the serpent partakes more of a symbolical character, and so seems to carry a strong implication of the nature and the wickedness of the concealed agent. The human sufferings threatened are all, excepting the last, which will require a separate consideration, of a remedial and corrective kind.

Of a quite different character are the penal denunciations upon the serpent. If they be understood literally, and of course applied to the whole order of Ophidia, they will be found to be so flagrantly at variance with the most demonstrated facts in their physiology and economy, as to lead to inferences unfavourable to belief in revelation. Let us examine the particulars:—

'Because thou hast done this cursed art thou

above all cattle; literally, 'above every behemoth.' But the *serpent tribe cannot be classed with that of the behemoth*. The word is of very frequent occurrence in the Old Testament; and though, in a few instances, it seems to be put for brevity so as to be inclusive of the flocks as well as the herds, and in poetical diction it sometimes stands metonymically for *animals* generally (as Job xviii. 3; Ps. lxxiii. 22; Eccles. iii. 18, 19, 21); yet its proper and universal application is to the large animals (pachyderms and ruminants), such as the elephant, camel, deer, horse, ox, rhinoceros, hippopotamus, &c. [BEHEMOTH].

As little will the declaration, 'cursed —,' agree with natural truth. It may, indeed, be supposed to be verified in the shuddering which persons generally feel at the aspect of any one of the order of serpents; but this takes place also in many other cases. It springs from fear of the formidable weapons with which some species are armed, as few persons know beforehand which are venomous and which are harmless; and, after all, this is rather an advantage than a curse to the animal. It is an effectual defence without effort. Indeed, we may say that no tribe of animals is so secure from danger, or is so able to obtain its sustenance and all the enjoyments which its capacity and habits require, as the whole order of serpents. If, then, we decline to urge the objection from the word *behemoth*, it is difficult to conceive that serpents have more causes of suffering than any other great division of animals, or even so much.

Further, 'going upon the belly' is to none of them a punishment. With some differences of mode, their progression is produced by the pushing of scales, shields, or rings against the ground, by muscular contractions and dilatations, by elastic springings, by vertical undulations, or by horizontal wriggles; but, in every variety, the *entire organization*—skeleton, muscles, nerves, integuments—is *adapted to the mode of progression* belonging to each species. That mode, in every variety of it, is sufficiently easy and rapid (often very rapid) for all the purposes of the animal's life and the amplitude of its enjoyments. To imagine this mode of motion to be, in any sense, a change from a prior attitude and habit of the erect kind, or being furnished with wings, indicates a perfect ignorance of the anatomy of serpents. Yet it has been said by learned and eminent theological interpreters, that, before this crime was committed, the serpent probably did 'not go upon his belly, but moved upon the hinder part of his body, with his head, breast, and belly upright' (Clarke's *Bible*, p. 1690). This notion may have obtained credence from the fact that some of the numerous serpent species, when excited, raise the neck pretty high; but the posture is to strike, and they cannot maintain it in creeping except for a very short distance.

Neither do they 'eat dust.' All serpents are carnivorous; their food, according to the size and power of the species, is taken from the tribes of insects, worms, frogs, and toads, and newts, birds, mice, and other small quadrupeds, till the scale ascends to the pythons and boas, which can master and swallow very large animals. The excellent writer just cited, in his anxiety to do honour, as he deemed it, to the accuracy of

Scripture allusions, has said of the serpent, 'Now that he creeps with his very mouth upon the earth, he must necessarily take his food out of the dust, and so lick in some of the dust with it.' But this is not the fact. Serpents habitually obtain their food among herbage or in water; they seize their prey with the mouth, often elevate the head, and are no more exposed to the necessity of swallowing adherent earth than are carnivorous birds or quadrupeds. At the same time, it may be understood figuratively, '*Eating the dust* is but another term for grovelling in the dust; and this is equivalent to being reduced to a condition of meanness, shame, and contempt.—See Micah vii. 17.'

But these and other inconsistencies and difficulties (insuperable they do indeed appear to us) are swept away when we consider the fact before stated, that the Hebrew, literally rendered, is *THE serpent was, &c.*, and that it refers specifically and personally to a rational and accountable being, the *spirit of lying and cruelty, the devil, the Satan, the old serpent*. That God, the infinitely holy, good, and wise, should have permitted any one or more celestial spirits to apostatize from purity, and to be the successful seducers of mankind, is indeed an awful and overwhelming mystery. But it is not more so than the permitted existence of many among mankind, whose rare talents and extraordinary command of power and opportunity, combined with extreme depravity, have rendered them the plague and curse of the earth; and the whole merges into the awful and insolvable problem, Why has the All-perfect Deity permitted evil at all? We are firmly assured that He will bring forth, at last, the most triumphant evidence that 'He is righteous in all his ways, and holy in all his works.' In the mean time, our happiness lies in the implicit confidence which we cannot but feel to be due to the Being of Infinite Perfection.

The remaining part of the denunciation upon the false and cruel seducer sent a beam of light into the agonized hearts of our guilty first parents: 'And enmity will I put between thee and the woman, and between thy seed and her seed: he will attack thee [on] the head, and thou wilt attack him [at] the heel.' Christian interpreters generally regard this as the first gospel-promise, and we think with good reason. It was a manifestation of mercy: it revealed a Deliverer, who 'should be a human being, in a peculiar sense the offspring of the female, who should also, in some way not yet made known, counteract and remedy the injury inflicted, and who, though partially suffering from the malignant power, should, in the end, completely conquer it, and convert its very success into its own punishment' (J. Pye Smith, *Scripture Testimony to the Messiah*, vol. i. p. 226).

The awful threatening to man was, 'In the day that thou eatest of it, thou wilt die the death.' The infliction is *Death* in the most comprehensive sense, that which stands opposed to *Life*, the life of not only animal enjoyment, but holy happiness, the life which comported with the image of God. This was lost by the fall; and the sentence of physical death was pronounced, to be executed in due time. Divine mercy gave a long respite.

The same mercy was displayed in still more tempering the terrors of justice. The garden of delights was not to be the abode of rebellious creatures. But before they were turned out into a bleak and dreary wilderness, God was pleased to direct them to make clothing suitable to their new and degraded condition, of the skins of animals. That those animals had been offered in sacrifice is a conjecture supported by so much probable evidence, that we may regard it as a well-established truth. Any attempt to force back the way, to gain anew the tree of life, and take violent or fraudulent possession, would have been equally impious and nugatory. The sacrifice (which all approximative argument obliges us to admit), united with the promise of a deliverer, and the promise of substantial clothing, contained much hope of pardon and grace. The terrible debarring by lightning flashes and their consequent thunder, and by visible supernatural agency (Gen. iii. 22-24), from a return to the bowers of bliss, are expressed in the characteristic patriarchal style of anthropopathy; but the meaning evidently is, that the fallen creature is unable by any efforts of his own to reinstate himself in the favour of God, and that whatever hope of restoration he may be allowed to cherish must spring solely from free benevolence. Thus, in laying the first stone of the temple, which shall be an immortal habitation of the Divine glory, it was manifested that 'Salvation is of the Lord,' and that 'grace reigneth through righteousness unto eternal life.'

From this time we have little recorded of the lives of Adam and Eve. Their three sons are mentioned with important circumstances in connection with each of them. See the articles CAIN, ABEL, and SETH. Cain was probably born in the year after the fall; Abel, possibly some years later; Seth, certainly one hundred and thirty years from the creation of his parents. After that, Adam lived eight hundred years, and had sons and daughters, doubtless by Eve, and then he died, nine hundred and thirty years old. In that prodigious period many events, and those of great importance, must have occurred; but the wise providence of God has not seen fit to preserve to us any memorial of them, and scarcely any vestiges or hints are afforded of the occupations and mode of life of men through the antediluvian period [ANTEDILUVIANS].

2. ADAM, a city at some distance east from the Jordan, to which, or beyond which, the overflow of the waters of that river extended when the course of the stream to the Dead Sea was stayed to afford the Israelites a passage across its channel.

ADAMAH. [ADMAH.]

ADAMANT. The word thus rendered is, in Hebrew, SHAMIR. It occurs in Jer. xvii. 1; Ezek. iii. 9; Zech. vii. 12. The Sept. in Jer. xvii. 1, and the Vulgate in all these passages, take it for the diamond. The signification of the word, 'a sharp point,' countenances this interpretation, the diamond being for its hardness used in perforating and cutting other minerals. Indeed, this use of the *shamir* is distinctly alluded to in Jer. xvii. 1, where the *stylus* pointed with it is distinguished from one of iron. The two other passages also favour this view by using it figuratively to express the hardness and

obduracy of the Israelites. Our Authorized Version has 'diamond' in Jer. xvii. 1, and 'adamant' in the other texts; but in the original the word is the same in all. Bochart, however, rejects the usual explanation, and conceives it to mean 'emery.' This is a calcined iron mixed with siliceous earth, occurring in livid scales of such hardness that in ancient times, as at present, it was used for polishing and engraving precious stones, diamonds excepted. Rosemüller urges in favour of this notion that if the Hebrews had been acquainted with the diamond, and with the manner of working it, we should doubtless have found it among the stones of the high-priest's breastplate; and that, as the *shamir* was not one of the stones thus employed, therefore it was not the diamond. But to this it may be answered, that it was perhaps not used because it could not be engraved on, or was possibly not introduced until a later period.

A'DAR (Esth. iii. 7) is the sixth month of the civil and the twelfth of the ecclesiastical year of the Jews. The name was first introduced after the Captivity. The following are the chief days in it which are set apart for commemoration:—The 7th is a fast for the death of Moses (Deut. xxxiv. 5, 6). On the 9th there was a fast in memory of the contention or open rupture of the celebrated schools of Hillel and Shammai, which happened but a few years before the birth of Christ. The 13th is the so-called 'Fast of Esther.' Iken observes (*Antiq. Hebr.* p. 150) that this was not an actual fast, but merely a commemoration of Esther's fast of three days (Esth. iv. 16), and a preparation for the ensuing festival. Nevertheless, as Esther appears, from the date of Haman's edict, and from the course of the narrative, to have fasted in Nisan, Buxtorf adduces from the Rabbins the following account of the name of this fast, and of the foundation of its observance in Adar, that the Jews assembled together on the 13th, in the time of Esther, and that, after the example of Moses, who fasted when the Israelites were about to engage in battle with the Amalekites, they devoted that day to fasting and prayer, in preparation for the perilous trial which awaited them on the morrow. In this sense, this fast would stand in the most direct relation to the feast of Purim. The 13th was also, 'by a common decree,' appointed as a festival in memory of the death of Nicanor (2 Macc. xv. 36). The 14th and 15th were devoted to the feast of Purim (Esth. ix. 21). In case the year was an intercalary one, when the month of Adar occurred twice, this feast was first moderately observed in the intercalary Adar, and then celebrated with full splendour in the ensuing Adar. The former of these two celebrations was then called the *lesser*, and the latter the *great Purim*.

ADASA, or ADANSA, called also by Josephus ADAZER, ADACO, and ACODACO, a city in the tribe of Ephraim, said to have been four miles from Beth-horon, and not far from Gophna. It was the scene of some important transactions in the history of the Maccabees (1 Mac. vii. 40, 45; Joseph. *Antiq.* xii. 10. 5; *Bell. Jud.* i. 1).

ADBEEL, one of the twelve sons of Ishmael, and founder of an Arabian tribe (Gen. xxv. 13, 16).

ADDER, the English name of a kind of serpent. It occurs several times in the English version of the Bible, and is there used not for a particular species, but generally for several of this dangerous class of reptiles. We have before us a list, far from complete, of the erpetology of Palestine, Arabia, and Egypt, in which there are, among forty-three species indicated, about eight whose bite is accompanied with a venomous effusion, and therefore almost all very dangerous. In our present state of knowledge we deem it best to discuss, under the words SERPENT and VIPER, all the Hebrew names not noticed in this article, and to refer to them those occurring in our version under the appellations of 'asp,' 'cockatrice,' &c.; and likewise to review the allusions to colossal boas and pythons, and, finally, to notice water-snakes and murenae, which translators and biblical naturalists have totally overlooked, although they must exist in the lakes of the Delta, are abundant on the north coast of Africa, and often exceed eight feet in length.

In this place we shall retain that genus alone which Laurenti and Cuvier have established

upon characters distinguished from the innocuous coluber, and the venomous vipera, and denominated *naja*.

The genus *Naja*—Haridi (?) of Savary—is distinguished by a plaited head, large, very venomous fangs, a neck dilatable under excitement, which raises the ribs of the anterior part of the body into the form of a disk or hood, when the scales, usually not imbricated, but lying in juxtaposition, are separated, and expose the skin, which at that time displays bright iridescent gleams, contrasting highly with their brown, yellow, and bluish colours. The species attain at least an equal, if not a superior, size to the generality of the genus viper; are more massive in their structure; and some possess the faculty of self-inflation to triple their diameter, gradually forcing the body upwards into an erect position, until, by a convulsive crisis, they are said suddenly to strike backwards at an enemy or a pursuer. With such powers of destroying animal life, and with an aspect at once terrible and resplendent, it may be easily imagined how soon fear and superstition would

5. *Naja Haje*; and the form of *Cneph* from the Egyptian Monuments.

6. *Naja Tripudians* and *Cobra di Capello*; or, Hooded and Spectacled Snakes.

combine, at periods anterior to historical data, to raise these monsters into divinities, and endeavour to deprecate their wrath by the blandishments of worship; and how design and cupidity would teach these very votaries the manner of subduing their ferocity, of extracting their instruments of mischief, and making them subservient to the wonder and amusement of the vulgar, by using certain cadences of sound which affect their hearing, and exciting in them a desire to perform a kind of pleasurable movements that may be compared to dancing. Hence the *nagas* of the East, the *hag-worms* of the West, and the *haje*, have all been deified, styled agathodæmon or good spirit; and figures of them occur wherever the superstition of Pagan antiquity has been accompanied by the arts of civilization.

The most prominent species of the genus at present is the *naja tripudians*, *cobra di capello*, hooded or spectacled snake of India, venerated by the natives; even by the serpent-charmers styled the good serpent to this day, and yet so

ferocious that it is one of the very few that will attack a man when surprised in its haunt, although it may be gorged with prey. This species is usually marked on the nape with two round spots, transversely connected in the form of a pair of spectacles; but among several varieties, one, perhaps distinct, is without the marks, and has a glossy golden hood, which may make it identical with the *naja haje* of Egypt, the undoubted *Ihh-nuphi*, *cneph*, or agathodæmon of Ancient Egypt, and accurately represented on the walls of its temples, in almost innumerable instances, both in form and colour. This serpent also inflates the skin on the neck, not in the expanded form of a hood, but rather into an intumescence of the neck. As in the former, there is no marked difference of appearance between the sexes; but the psilli, or charms, by a particular pressure on the neck have the power of rendering the inflation of the animal, already noticed as a character of the genus, so intense, that the serpent becomes rigid, and can be held out horizontally as if it were a rod.

This practice explains what the soothsayers of Pharaoh could perform when they were opposing Moses. That the rods of the magicians of Pharaoh were of the same external character with the rod of Aaron, is evident from no different denomination being given to them: therefore we may infer that they used a real serpent as a rod—namely the species now called *haje*—for their imposture; since they no doubt did what the present serpent-charmers perform with the same species, by means of the temporary *asphyxiation*, or suspension of vitality, before noticed, and producing restoration to active life by liberating or throwing down. Thus we have the miraculous character of the prophet's mission shown by his real rod becoming a serpent, and the magicians' real serpents merely assuming the form of rods; and when both were opposed in a state of animated existence, by the rod devouring the living animals, conquering the great typical personification of the protecting divinity of Egypt.

This species of serpent may be regarded as extending to India and Ceylon; and probably the *naja tripudians* is likewise an inhabitant of Arabia, if not of Egypt, although the assertion of the fact (common in authors) does not exclude a supposition that they take the two species to be only one. We are disposed to refer the 'winged' or 'flying' serpent to the *naja tripudians*, in one of its varieties, because—with its hood dilated into a kind of shining wings on each side of the neck, standing, in undulating motion, one-half or more erect, rigid, and fierce in attack, and deadly poisonous, yet still denominated 'good spirit,' and in Egypt ever figured in combination with the winged globe—it well may have received the name of *saraph*, *swallowing* or *decouring*, and may thus meet all the valid objections, and conciliate seemingly opposite comments (see Num. xxi. 6, 8; Deut. viii. 15; Isa. xiv. 29; xxx. 6).

ACUSUN is another name of a serpent which may be considered as specifically different from the former, though it is most probably one more of this group of terrible creatures. The root of the name implies bending back, recurving, but not coiling up, for all snakes have that faculty. The syllable *ach*, however, shows a connection with the former denominations; and both are perfectly reconcilable with a serpent very common at the Cape of Good Hope, not unfrequent in Western Africa, and probably extending over that whole continent, excepting perhaps Morocco. It is the 'poff-adder' of the Dutch colonists, about three feet in length, and about six inches in circumference at the middle of the body; the head is larger than is usual in serpents; the eyes are large, and very brilliant; the back beautifully marked in half circles, and the colours black, bright yellow, and dark brown; the belly yellow; the appearance at all times, but chiefly when excited, extremely brilliant; the upper jaw greatly protruding, somewhat like what occurs in the shark, places the mouth back towards the throat, and this structure is said to be connected with the practice of the animal when intending to bite, to swell its skin till it suddenly rises up, and strikes backwards as if it fell over. It is this faculty which appears to be indicated by the Hebrew name *achusub*, and therefore we

believe it to refer to that species, or to one nearly allied to it. The Dutch name (poff-adder, o. spooch-adder) shows that, in the act of swelling remarkable eruptions and spittings take place, all which no doubt are so many warnings, the bite being fatal. The poff-adder usually resides among brushwood in stony places and rocks, is fond of basking in the sun, rather slow in moving, and is by nature timid (SERPENT; VIPER).

AD'DON, one of several places mentioned in Neh. vii. 61, being towns in the land of captivity, from which those who returned to Palestine were unable to 'shew their father's house, or their seed, whether they were of Israel.' This, probably, means that they were unable to furnish such undeniable legal proof as was required in such cases. And this is in some degree explained by the subsequent (v. 63) mention of priests who were expelled the priesthood because their descent was not found to be genealogically registered. These instances show the importance which was attached to their genealogies by the Jews (GENEALOGY).

ADIABENE, the principal of the six provinces into which Assyria was divided. Pliny and Ammianus comprehend the whole of Assyria under this name, which, however, properly denoted only the province which was watered by the rivers Diab and Adiab, or the Great and Little Zab (Dhab), which flow into the Tigris below Nineveh (Mosul), from the north-east. This region is not mentioned in Scripture; but in Josephus, its queen Helena and her son Izates, who became converts to Judaism, are very often named (Joseph. *Antiq.* xx. 2, 4; *Bell. Jud.* ii. 16, 19; v. 4, 6, 11).

ADIDA, a fortified town in the tribe of Judah. In 1 Macc. xii. 38, we read that Simon Maccabæus set up 'Adida in Sephela, and made it strong with bolts and bars.' Eusebius says that Sephela was the name given in his time to the open country about Elcuthropolis. And this Adida in Sephela is probably the same which is mentioned in the next chapter (xiii. 13) as 'Adida over against the plain,' where Simon Maccabæus encamped to dispute the entrance into Judæa of Tryphon, who had treacherously seized on Jonathan at Ptolemais. In the parallel passage Josephus (*Antiq.* xiii. 6, 5) adds that this Adida was upon a hill, before which lay the plains of Judæa. One of the places which Josephus calls Adida (*Bell. Jud.* iv. 3, 1) appears to have been near the Jordan, and was probably the Hadid of Ezra ii. 33.

ADJURATION. This is a solemn act of appeal, whereby one man, usually a person vested with natural or official authority, impose upon another the obligation of speaking or acting as if under the solemnity of an oath. We have an example of this in the New Testament when the high-priest thus calls upon Christ, 'I adjure thee by the living God, tell us' &c.—(Matt. xxvi. 63; see also Mark v. 7; Acts xix 13; 1 Thes. v. 27). An oath, although thus imposed upon one without his consent, was no only binding, but solemn in the highest degree; and when connected with a question, an answer was compulsory, which answer being as upon oath, any falsehood in it would be perjury. Thus our Saviour, who had previously disdained to

reply to the charges brought against him, now felt himself bound to answer the question put to him.

AD'MAH, one of the cities in the vale of Siddim (Gen. x. 19), which had a king of its own (Gen. xiv. 2). It was destroyed along with Sodom and Gomorrah (Gen. xix. 24; Hos. xi. 8).

ADONIBE'ZEK (*lord of Bezek*), king or lord of Bezek, a town which Eusebius places 17 miles east of Neapolis or Shechem. The small extent of the kingdoms in and around Palestine at the time of its invasion by the Hebrews is shown by the fact that this petty king had subdued no less than seventy of them; and the barbarity of the war-usages in those early times is painfully shown by his cutting off all the thumbs and great toes of his prisoners, and allowing them no food but that which they gathered under his table. These conquests made Adonibezek 'a triton among the minnows'; and we find him at the head of the confederated Canaanites and Perizzites, against whom the tribes of Judah and Simeon marched after the death of Joshua. His army was routed and himself taken prisoner. The victors failed not to express their indignation at the mode in which he had treated his captives, by dealing with him in the same manner.

AD ONI'JAH (*Jehovah [is] my Lord*), the fourth son of David, by Hagith. He was born after his father became king, but when he reigned over Judah only (2 Sam. iii. 4). According to the Oriental notion developed in the article ABSALOM, Adonijah might have considered his claim superior to that of his eldest brother AMNON, who is supposed to have been born while his father was in a private station; but not that of Absalom, who was not only his elder brother, and born while his father was a king, but was of royal descent on the side of his mother. When, however, Amnon and Absalom were both dead, he became, by order of birth, the heir-apparent to the throne. But this order had been set aside in favour of Solomon, who was born while his father was king of all Israel. Absalom perished in attempting to assert his claim of primogeniture, in opposition to this arrangement. Unawed by this example, Adonijah assumed the state of an heir-apparent, who, from the advanced age of David, must soon be king. But it does not appear to have been his wish to trouble his father as Absalom had done; for he waited till David appeared at the point of death, when he called around him a number of influential men, whom he had previously gained over, and caused himself to be proclaimed king. This was a formidable attempt to subvert the appointment made by the Divine king of Israel; for Adonijah was supported by such men as Joab, the general-in-chief, and Abiathar, the high-priest; both of whom had followed David in all his fortunes. But his plot was, notwithstanding, defeated by the prompt measure taken by David, who directed Solomon to be at once proclaimed, and crowned, and admitted to the real exercise of the sovereign power. Adonijah then saw that all was lost, and fled to the altar, which he refused to leave without a promise of pardon from King Solomon. This he received, but was warned that any further attempt of the same kind would be fatal to him. Accordingly, when, some time

after the death of David, Adonijah covertly endeavoured to reproduce his claim through a marriage with Abishag, the virgin widow of his father (ABISHAG), his design was at once penetrated by the king, by whose order he was instantly put to death (1 Kings i-ii. 13-25).

ADONIRAM (*lord of height*, that is, *high lord*) (1 Kings iv. 6). This name is exhibited in the contracted form of ADORAM in 2 Sam. xx. 24; 1 Kings xii. 18; and of HADORAM in 2 Chron. x. 18.

1. ADONIRAM, or HADORAM, son of Toi, king of Hamath, who was sent by his father to congratulate David on his victory over their common enemy Hadarezer, king of Syria (1 Chron. xviii. 10). This prince is called Joram in 2 Sam. viii. 10.

2. ADONIRAM. A person of this name is mentioned as receiver-general of the imposts in the reigns of David, Solomon, and Rehoboam. Only one incident is recorded in connection with this person. When the ten tribes seceded from the house of David, and made Jeroboam king, Rehoboam sent Adoniram among them, for the purpose, we may presume, of collecting the usual imposts, which had become very heavy. Perhaps he had been rigid in his invidious office under Solomon: at all events the collector of the imposts which had occasioned the revolt was not the person whose presence was the most likely to soothe the exasperated passions of the people. They rose upon him, and stoned him till he died (1 Kings xii. 18).

ADONIZEDEK. The name denotes *lord of justice*, i. e. *just lord*, but some would rather have it to mean *king of Zedek*. He was the Canaanitish king of Jerusalem when the Israelites invaded Palestine; and the similarity of the name to that of a more ancient king of (as is supposed) the same place, Melchi-zedek (*king of justice*, or *king of Zedek*), has suggested that Zedek was one of the ancient names of Jerusalem. Be that as it may, this Adonizedek was the first of the native princes that attempted to make head against the invaders. After Jericho and Ai were taken, and the Gibeonites had succeeded in forming a treaty with the Israelites, Adonizedek was the first to rouse himself from the stupor which had fallen on the Canaanites (Josh. x. 1, 3), and he induced the other Amoritical kings of Hebron, Jarmuth, Lachish, and Eglon, to join him in a confederacy against the enemy. They did not, however, march directly against the invaders, but went and besieged the Gibeonites, to punish them for the discouraging example which their secession from the common cause had afforded. Joshua no sooner heard of this than he marched all night from Gilgal to the relief of his allies; and falling unexpectedly upon the besiegers, soon put them to utter rout. The pursuit was long, and was signalized by Joshua's famous command to the sun and moon, as well as by a tremendous hail-storm, which greatly distressed the fugitive Amorites (Joshua). The five kings took refuge in a cave; but were observed, and by Joshua's order the mouth of it was closed with large stones, and a guard set over it, until the pursuit was over. When the pursuers returned, the cave was opened, and the five kings brought out. The Hebrew chiefs then set their feet upon the necks of the prostrate

monarchs—an ancient mark of triumph, of which the monuments of Persia and Egypt still afford illustrations. They were then slain, and their bodies hanged on trees until the evening, when, as the law forbade a longer exposure of the dead (Deut. xxi. 23), they were taken down, and cast into the cave, the mouth of which was filled up with large stones, which remained long after (Josh. x. 1-27). The severe treatment of these kings by Joshua has been censured and defended with equal disregard of the real circumstances, which are, that the war was avowedly one of extermination, no quarter being given or expected on either side; and that the war-usages of the Jews were neither worse nor better than those of the people with whom they fought, who would most certainly have treated Joshua and the other Hebrew chiefs in the same manner, had they fallen into their hands.

ADOPTION. The Old Testament does not contain any word equivalent to this; but the act occurs in various forms. The New Testament has the word often (Rom. viii. 15, 23; ix. 4; Gal. iv. 5; Eph. i. 5); but no example of the act occurs. The term signifies the *placing as a son of one who is not so by birth*.

The practice of adoption had its origin in the desire for male offspring among those who have, in the ordinary course, been denied that blessing, or have been deprived of it by circumstances. This feeling is common to our nature; but its operation is less marked in those countries where the equalizing influences of high civilization lessen the peculiar privileges of the paternal character, and where the security and the well-observed laws by which estates descend and property is transmitted, withdraw one of the principal inducements to the practice. And thus most of the instances in the Bible occur in the patriarchal period. The law of Moses, by settling the relations of families and the rules of descent, and by formally establishing the Levirate law, which in some sort secured a representative posterity even to a man who died without children, appears to have put some check upon this custom. The allusions in the New Testament are mostly to practices of adoption which then existed among the Greeks and Romans, and rather to the latter than to the former; for among the more highly civilized Greeks adoption was less frequent than among the Romans. In the East the practice has always been common, especially among the Semitic races, in whom the love of offspring has at all times been strongly manifested.

It is scarcely necessary to say that adoption was confined to sons. The whole Bible history affords no example of the adoption of a female.

The first instances of adoption which occur in Scripture are less the acts of men than of women, who, being themselves barren, gave their female slaves to their husbands, with the view of adopting the children they might bear. Thus Sarah gave her handmaid Hagar to Abraham; and the son that was born, Ishmael, appears to have been considered as her son as well as Abraham's, until Isaac was born. In like manner Rachel, having no children, gave her handmaid Bilhah to her husband, who had by her Dan and Naphthali (Gen. xxx. 5-9); on which his other wife, Leah, although she had sons of her own, yet *fearing that she had left off bearing, claimed the*

right of giving her handmaid Zilpah to Jacob, that she might thus increase their number; and by this means she had Gad and Asher (Gen. xxx. 9-13). In this way the greatest possible approximation to a natural relation was produced. The child was the son of the husband, and, the mother being the property of the wife, the progeny must be her property also; and the act of more particular appropriation seems to have been that, at the time of birth, the handmaid brought forth her child 'upon the knees of the adoptive mother' (Gen. xxx. 3). A curious fact is elicited by the peculiar circumstances in Sarah's case, which were almost the only circumstances that could have arisen to try the question, whether a mistress retained her power, as such, over a female slave whom she had thus vicariously employed, and over the progeny of that slave, even though by her own husband. The answer is given, rather startlingly, in the affirmative in the words of Sarah, who, when the birth of Isaac had wholly changed her feelings and position, and when she was exasperated by the offensive conduct of Hagar and her son, addressed her husband thus, 'Cast forth this bond-woman and her son; for the son of this bond-woman shall not be heir with my son, even with Isaac' (Gen. xxi. 10).

A previous instance of adoption in the history of Abraham, when as yet he had no children, appears to be discoverable in his saying, 'One born in my house is mine heir.' This unquestionably denotes a house-born slave, as distinguished from one bought with money. Abraham had several such; and the one to whom he is supposed here to refer is his faithful and devoted steward Eliezer. This, therefore, is a case in which a slave was adopted as a son—a practice still very common in the East. A boy is often purchased young, adopted by his master, brought up in his faith, and educated as his son; or if the owner has a daughter, he adopts him through a marriage with that daughter, and the family which springs from this union is counted as descended from him. But house-born slaves are usually preferred, as these have never had any home but their master's house, are considered members of his family, and are generally the most faithful of his adherents. This practice of slave adoption was very common among the Romans; and, as such, is more than once referred to by St. Paul (Rom. viii. 15; Gal. iv. 5-6), the transition from the condition of a slave to that of a son, and the privilege of applying the tender name of 'Father' to the former 'Master,' affording a beautiful illustration of the change which takes place from the bondage of the law to the freedom and privileges of the Christian state.

As in most cases the adopted son was to be considered dead to the family from which he sprung, the separation of natural ties and connections was avoided by this preference of slaves, who were mostly foreigners or of foreign descent. For the same reason the Chinese make their adoptions from children in the hospitals, who have been abandoned by their parents. The Tartars are the only people we know who prefer to adopt their near relatives—nephews or cousins, or, failing them, a Tartar of their own banner. The only Scriptural example of this

kind is that in which Jacob adopted his own grandsons Ephraim and Manasseh to be counted as his sons (Gen. xlviii. 6). The object of this remarkable adoption was, that whereas Joseph himself could only have one share of his father's heritage along with his brothers, the adoption of his two sons enabled Jacob, through them, to bestow two portions upon his favourite son. The adoption of Moses by Pharaoh's daughter (Exod. ii. 1-10) is an incident rather than a practice; but it recalls what has just been stated respecting the adoption of outcast children by the Chinese. In 1 Chron. ii. 34, &c., there is an instance recorded of a daughter being married to a free slave, and the children being counted as those of the woman's father. The same chapter gives another instance. Machir (grandson of Joseph) gives his daughter in marriage to Hezron of the tribe of Judah. She gave birth to Segub, who was the father of Jair. Jair possessed twenty-three cities in the land of Gilead, which came to him in right of his grandmother, the daughter of Machir; and he acquired other towns in the same quarter, which made up his possessions to three-score towns or villages (1 Chron. ii. 21-24; Josh. xiii. 30; 1 Kings iv. 13). Now this Jair, though of the tribe of Judah by his grandfather, is, in Num. xxxii. 41, counted as of Manasseh, for the obvious reason which the comparison of these texts suggests, that, through his grandmother, he inherited the property, and was the lineal representative of Machir, the son of Manasseh.

ADORAIM, a town in the south of Judah, enumerated along with Hebron and Mareshah, as one of the cities fortified by Rehoboam (2 Chron. xi. 9). This town does not occur in any writer after Josephus, until the recent researches of Dr. Robinson, who discovered it under the name of Dura, the first feeble letter having been dropped. It is situated five miles W. by S. from Hebron, and is a large village, seated on the eastern slope of a cultivated hill, with olive-groves and fields of grain all around. There are no ruins.

ADORATION. This word is compounded of *ad* 'to,' and *os, oris*, 'the mouth,' and literally signifies to apply the hand to the mouth, that is, 'to kiss the hand.' The *act* is described in Scripture as one of worship (Job xxxi. 26, 27). And this very clearly intimates that kissing the hand was considered an overt act of worship in the East.

The same act was used as a mark of respect in the presence of kings and persons high in office or station. Or rather, perhaps, the hand was not merely kissed and then withdrawn from the mouth, but held continuously before or upon

the mouth, to which allusion is made in such texts as Judg. xviii. 19; Job xxi. 5; xxix. 9; xl. 4; Ps. xxxix. 9. In one of the sculptures at Persepolis a king is seated on his throne, and before him a person standing in a bent posture, with his hand laid upon his mouth as he addresses the sovereign (fig. 1). Exactly the same attitude is observed in the sculptures at Thebes, where one person, among several (in various postures of respect) who appear before the scribes to be registered, has his hand placed thus submissively upon his mouth (fig. 2).

ADRAM'MELECH is mentioned, together with Anammelech, in 2 Kings xvii. 31, as one of the idols whose worship the inhabitants of Sepharvaim established in Samaria, when they were transferred thither by the king of Assyria, and whom they worshipped by the sacrifice of their children by fire. This constitutes the whole of our certain knowledge of this idol.

2. ADRAMMELECH, one of the sons and murderers of Sennacherib, king of Assyria (2 Kings xix. 37; Isa. xxxvii. 38).

ADRAMYT'TIUM, a sea-port town in the province of Mysia in Asia Minor, opposite the Isle of Lesbos, and an Athenian colony. It is mentioned in Scripture only, from the fact that the ship in which Paul embarked at Caesarea as a prisoner on his way to Italy, belonged to Adramyttium (Acts xxvii. 2). It was rare to find a vessel going direct from Palestine to Italy. The usual course, therefore, was to embark in some ship bound to one of the ports of Asia Minor, and there go on board a vessel sailing for Italy. This was the course taken by the centurion who had charge of Paul. The ship of Adramyttium took them to Myra in Lycia, and here they embarked in an Alexandrian vessel bound for Italy. Adramyttium is still called Adramyt. It is built on a hill, contains about 1000 houses, and is still a place of some commerce.

ADRIATIC SEA (Acts xxvii. 27). This name is now confined to the gulf lying between Italy on one side, and the coasts of Dalmatia and Albania on the other. But in St. Paul's time it extended to all that part of the Mediterranean between Crete and Sicily. This fact is of importance, as relieving us from the necessity of finding the island of Melita on which Paul was shipwrecked, in the present Adriatic gulf; and consequently removing the chief difficulty in the way of the identification of that island with the present Malta.

A'DRIEL (*the flock of God*), the person to whom Saul gave in marriage his daughter Merab, who had been originally promised to David (1 Sam. xviii. 19). Five sons sprung from this union, who were taken to make up the number of Saul's descendants, whose lives, on the principle of blood-revenge, were required by the Gibeonites to avenge the cruelties which Saul had exercised towards their race [GIBEONITES].

ADULLAM, an old city (Gen. xxxvii. 1, 12, 20) in the plain country of the tribe of Judah (Josh. xv. 35), and one of the royal cities of the Canaanites (Josh. xii. 15). It was one of the towns which Rehoboam fortified (2 Chron. xi. 7; Micah i. 15), and is mentioned after the Captivity (Neh. xi. 30; 2 Macc. 12, 38). It is evident that Adullam was one of the cities of 'the valley,' or plain between the hill country

of Judah and the sea; and from its place in the lists of names (especially 2 Chron. xi. 7), it appears not to have been far from the Philistine city of Gath. It is probable, however, that the 'cave of Adullam' (1 Sam. xxii. 1) was not in the vicinity of the city, where no such cave has been found, but in the mountainous wilderness in the west of Judah towards the Dead Sea. This conjecture is favoured by the fact that the usual haunts of David were in this quarter; whence he moved into the land of Moab, which was quite contiguous, whereas he must have crossed the whole breadth of the land, if the cave of Adullam had been near the city of that name. The particular cave, usually pointed out as 'the cave of Adullam,' is about six miles south-west of Bethlehem, in the side of a deep ravine which passes below the Frank's mountain on the south. It is an immense natural cavern, with numerous passages, the mouth of which can be approached only on foot along the side of the cliff. It seems probable that David, as a native of Bethlehem, must have been well acquainted with this remarkable spot, and had probably often availed himself of its shelter when out with his father's flocks. It would therefore naturally occur to him as a place of refuge when he fled from Gath; and his purpose of forming a band of followers was much more likely to be realized here, in the neighbourhood of his native place, than in the westward plain, where the city of Adullam lay.

ADULTERY. In the common acceptation of the word, adultery denotes the sexual intercourse of a married woman with any other man than her husband, or of a married man with any other woman than his wife. But the crime is not understood in this extent among Eastern nations, nor was it so understood by the Jews. With them, adultery was the act whereby any married man was exposed to the risk of having a spurious offspring imposed upon him. An adulterer was, therefore, any man who had illicit intercourse with a married or betrothed woman; and an adulteress was a betrothed or married woman who had intercourse with any other man than her husband. An intercourse between a married man and an unmarried woman was not, as with us, deemed adultery, but fornication; a great sin, but not, like adultery, involving the contingency of polluting a descent, of turning aside an inheritance, or of imposing upon a man a charge which did not belong to him. Adultery was thus considered a great social wrong, against which society protected itself by much severer penalties than attended an unchaste act not involving the same contingencies.

It will be seen that this Oriental limitation of adultery is intimately connected with the existence of polygamy. If adultery be defined as a breach of the marriage covenant, then, where the contract is between one man and one woman, as in Christian countries, the man as much as the woman infringes the covenant, or commits adultery, by *every* act of intercourse with any other woman: but where polygamy is allowed, where the husband may marry other wives, and take to himself concubines and slaves, the marriage contract cannot and does not convey to the woman a legal title that the man should belong to her alone. If, therefore, a Jew associated

with a woman who was not his wife, his concubine, or his slave, he was guilty of unchastity, but committed no offence which gave a wife reason to complain that her legal rights had been infringed. If, however, the woman with whom he associated was the wife of another, he was guilty of adultery, not by infringing his own marriage covenant, but by causing a breach of that which existed between that woman and her husband. By thus excluding from the name and punishment of adultery the offence which did not involve the enormous wrong of imposing upon a man a supposititious offspring, in a nation where the succession to landed property went entirely by birth, so that a father could not by his testament alienate it from any one who was regarded as his son—the law was enabled, with less severity than if the inferior offence had been included, to punish the crime with death. It is still so punished wherever the practice of polygamy has similarly operated in limiting the crime—not, perhaps, that the law expressly assigns that punishment, but it recognises the right of the injured party to inflict it, and, in fact, leaves it, in a great degree, in his hands. Now death was the punishment of adultery before the time of Moses; and if he had assigned a less punishment, his law would have been inoperative, for private vengeance, sanctioned by usage, would still have inflicted death. But by adopting it into the law, those restrictions were imposed upon its operation which necessarily arise when the calm inquiry of public justice is substituted for the impulsive action of excited hands. Thus, death would be less frequently inflicted; and that this effect followed seems to be implied in the fact that the whole biblical history offers no example of capital punishment for the crime. Eventually, divorce superseded all other punishment.

It seems that the Roman law made the same important distinction with the Hebrew, between the infidelity of the husband and of the wife. 'Adultery' was defined by the civilians to be the violation of another man's bed, so that the infidelity of the husband to his own wife could not alone constitute the offence.

It is understood that the crime was punished among the Assyrians and Chaldeans by cutting off the nose and the ears; and this brings to mind the passage in which the prophet Ezekiel (xxiii. 25), after, in the name of the Lord, reproving Israel and Judah for their adulteries (i.e. idolatries) with the Assyrians and Chaldeans, threatens the punishment, 'they shall take away thy nose and thy ears.' One or both of these mutilations, most generally that of the nose, were also inflicted by other nations, as the Persians and Egyptians, and even the Romans; but we suspect that among the former, as with the latter, it was less a judicial punishment than a summary infliction by the aggrieved party. It would also seem that these mutilations were more usually inflicted on the male than the female adulterer. In Egypt, however, cutting off the nose was the female punishment, and the man was beaten terribly with rods. The respect with which the conjugal union was treated in that country in the earliest times is manifested in the history of Abraham (Gen. xii. 19).

ADULTERY, TRIAL OF. It would be

unjust to the spirit of the Mosaic legislation to suppose that the trial of the suspected wife by the bitter water, called the *Water of Jealousy*, was by it first produced. It is to be regarded as an attempt to mitigate the evils of, and to bring under legal control, an old custom which could not be entirely abrogated.

The original usage, which it was designed to mitigate, was probably of the kind which we still find in Western Africa, where, when a party is accused of murder, adultery, or witchcraft, if he denies the crime, he is required to drink the red water, and on refusing is deemed guilty of the offence. But in Africa the drink is highly poisonous in itself, and, if rightly prepared, the only chance of escape is the rejection of it by the stomach, whereas, among the Hebrews, the 'water of jealousy,' however unpleasant, was prepared in a prescribed manner with ingredients known to all to be perfectly innocent. It could not therefore injure the innocent, and its action upon the guilty must have resulted, not from the effects of the drink itself, but from the consciousness of having committed a horrible perjury. As regulated, then, by the law of Moses, the trial for suspected adultery by the bitter water amounted to this, that a woman suspected of adultery by her husband was allowed to repel the charge by a public oath of purgation, which oath was designedly made so solemn in itself, and was attended by such awful circumstances, that it was in the highest degree unlikely that it would be dared by any woman not supported by the consciousness of innocence. And the fact that no instance of the actual application of the ordeal occurs in Scripture, affords some countenance to the assertion of the Jewish writers, that the trial was so much dreaded by the women, that those who were really guilty generally avoided it by confession; and that thus the trial itself early fell into disuse. And if, as we have supposed, this mode of trial was only tolerated by Moses, the ultimate neglect of it must have been desired and intended by him. In later times, indeed, it was disputed in the Jewish schools, whether the husband was bound to prosecute his wife to this extremity, or whether it was not lawful for him to connive at and pardon her act, if he were so inclined. There were some who held that he was bound by his duty to prosecute, while others maintained that it was left to his pleasure.

From the same source we learn that this form of trial was finally abrogated about forty years before the destruction of Jerusalem. The reason assigned is, that the men themselves were at that time generally adulterous; and that God would not fulfil the imprecations of the ordeal oath upon the wife while the husband was guilty of the same crime (John viii. 1-8).

ADULTERY, in the symbolical language of the Old Testament, means idolatry and apostasy from the worship of the true God (Jer. iii. 8, 9; Ezek. xvi. 32; xxiii. 37; also Rev. ii. 22). Hence an *Adulteress* meant an apostate church or city, particularly 'the daughter of Jerusalem,' or the Jewish church and people (Isa. i. 21; Jer. iii. 6, 8, 9; Ezek. xvi. 22; xxiii. 7). This figure resulted from the primary one, which describes the connection between God and his separated people as a marriage between him and them.

By an application of the same figure, 'An adulterous generation' (Matt. xii. 39; xvi. 4; Mark vii. 38) means a faithless and impious generation.

ADUM'MIM, a place which is only twice named in Scripture. Once (Josh. xv. 7), where, from the context, it seems to indicate the border between Judah and Benjamin, and that it was an ascending road between Gilgal (and also Jericho) and Jerusalem. The second notice (Josh. xviii. 17) adds no further information, but repeats 'the ascent to Adummim.' Most commentators take the name to mean 'the place of blood,' and follow Jerome, who finds the place in the dangerous or mountainous part of the road between Jerusalem and Jericho, and supposes that it was so called from the frequent effusion of blood by the robbers, by whom it was much infested. These are curious interpretations of the original word, which merely denotes the redness of the soil or rock. However, as a difficult pass in a desolate rocky region, between important cities, the part of the road indicated by Jerome, and all after him, was as likely to be infested by robbers in earlier times as in those of Jerome and at the present day. Indeed, the character of the road was so notorious, that Christ lays the scene of the parable of the good Samaritan (Luke x.) upon it; and Jerome informs us that Adummim or Adominim was believed to be the place where the traveller (taken as a real person) 'fell among thieves.' He adds that a fort and garrison was maintained here for the safeguard of travellers. The travellers of the present century mention the spot and neighbourhood nearly in the same terms as those of older date. They all represent the road as still infested by robbers, from whom some of them have not escaped without danger. The place thus indicated is about eight miles from Jerusalem, and four from Jericho.

ADVOCATE, one who pleads the cause of another; also one who exhorts, defends, comforts, prays for another. It is an appellation given to the Holy Spirit by Christ (John xiv. 16; xv. 26; xvi. 7), and to Christ himself by an apostle (1 John ii. 1; see also Rom. viii. 34; Heb. vii. 25).

In the forensic sense, advocates or pleaders were not known to the Jews until they came under the dominion of the Romans, and were obliged to transact their law affairs after the Roman manner. Being then little conversant with the Roman laws, and with the forms of the jurists, it was necessary for them, in pleading a cause before the Roman magistrates, to obtain the assistance of a Roman lawyer or *advocate*, who was well versed in the Greek and Latin languages. In all the Roman provinces such men were found, who devoted their time and labour to the pleading of causes and the transacting of other legal business in the provincial courts. It also appears that many Roman youths who had devoted themselves to forensic business used to repair to the provinces with the consuls and prætors, in order, by managing the causes of the provincials, to fit themselves for more important ones at Rome. Such an advocate was Tertullus, whom the Jews employed to accuse Paul before Felix (Acts xxiv. 1) [ACCUSER].

ÆGYPT. [EGYPT.]

ÆNON, *fountain*; the name of a place near Sam'ea, where John baptized (John iii. 23); the reason given, 'because there was much water there,' would suggest that he baptized at the springs from which the place took its name.

ÆTHIOPIA. [ÆTHIOPIA.]

AFFINITY is relationship by marriage, as distinguished from *consanguinity*, which is relationship by blood. Marriages between persons thus related, in various degrees, were forbidden by the law of Moses, which previous usage, in different conditions of society, had allowed. These degrees are enumerated in Lev. xviii. 7, sq. The examples before the law are those of Cain and Abel, who, as the necessity of the case required, married their own sisters. Abraham married Sarah, the daughter of his father by another wife, or else, as some suppose, the daughter of his elder brother by a former wife of his father. Jacob also married the two sisters Leah and Rachel. In the first instance, and even in the second, there was an obvious consanguinity, and only the last offered a previous relationship of affinity merely. So also, in the prohibition of the law, a consanguinity can be traced in what are usually set down as degrees of affinity merely. The degrees of real affinity interdicted are, that a man shall not (nor a woman in the corresponding relations) marry his—1. Father's widow (not his own mother); 2. The daughter of his father's wife by another husband; 3. The widow of his paternal uncle; 4. Nor his brother's widow if he has left children by her; but, if not, he was bound to marry her to raise up children to his deceased brother.

The other prohibitions are connected with the condition of polygamy, and they prohibited a man from having—1. a mother and her daughter for wives at the same time; 2. or two sisters for wives at the same time. These prohibitions, although founded in Oriental notions, adapted to a *particular* condition of society, and connected with the peculiarities of the Levitical marriage law, have been imported wholesale into our canon law. The fitness of this is doubted by many; but as, apart from any moral questions, the prohibited marriages are such as few would, in the present condition of European society, desire to contract, and such as would be deemed repugnant to good taste and correct manners, there is little real matter of regret in this adoption of the Levitical law. Indeed, the objections to this adoption have rested chiefly upon one point; and that happens to be a point in which the law itself appears to have been egregiously misunderstood. This is in the injunction which, under permitted polygamy, forbade a man to have two sisters at once; an injunction which has been construed, under the Christian law, which allows but one wife, to apply equally to the case of a man marrying the sister of a deceased wife. The law itself is, however, so plain, that it is difficult to conceive how its true object—concerning which nearly all commentators are agreed—could have been thus interpreted. It is rendered in our version, 'Neither shalt thou take a wife to her sister, to vex her (or rather, perhaps, to rival her), to uncover her nakedness, *beside the other in her lifetime*.' And the design seems evidently to be to prevent the occurrence of such unseemly jea-

lousies and contentions between sister-wives as embittered the life of Jacob—the father of the twelve tribes. The more recoudeite sense has been extracted, with rather ungentle violence to the principles of Hebrew construction, by making 'vex her' the antecedent of 'in her lifetime,' instead of 'take her sister to her, in her lifetime.' And it is explained, under this view, that the married sister should not be 'vexed' in her lifetime by the prospect that her sister might succeed her. It may be safely said that such an idea would never have occurred in the East, where unmarried sisters are far more rarely than in Europe brought into such acquaintance with the husband of the married sister, as to give occasion for such 'vexation' or 'rivalry' as this. This view of the matter, though completely exploded among real biblical critics, is perhaps not calculated to do much harm, except under peculiar circumstances, and except as it may prove a snare to some sincere but weak consciences.

AFFIRMATIVES. Among the Jews the formula of assent or affirmation was *thou hast said*, or *thou hast rightly said*. It is stated by Aryda and others that this is the prevailing mode in which a person expresses his assent, at this day, in Lebanon, especially when he does not wish to assert anything in express terms. This explains the answer of our Saviour to the high-priest Caiaphas (Matt. xxvi. 64), when he was asked whether he was the Christ, the son of God, and replied, *thou hast said* (see also Matt. xxvi. 25). All readers of even translations are familiar with a frequent elegance of the Scriptures, or rather of the Hebrew language, in using an affirmative and negative together, by which the sense is rendered more emphatic: sometimes the negative first, as Ps. cxviii. 17, 'I shall not die, but live,' &c.; sometimes the negative first, as Isa. xxxviii. 1, 'Thou shalt die, and not live.' In John i. 20, there is a remarkable instance of emphasis produced by a negative being placed between two affirmatives—'And he confessed, and denied not, but confessed, I am not the Christ.'

AFRICA. This 'quarter of the world' is not mentioned as such by any general name in Scripture, although some of its regions are indicated. It is thought by some, however, that Africa, or as much of it as was then known, is denoted by 'the land of Ham,' in several of the Psalms. But we are inclined to think that the context rather restricts this designation of Egypt. Whether Africa was really 'the land of Ham,' that is, was peopled by the descendants of Ham, is quite another question [HAM].

AG'ABUS, the name of 'a prophet,' supposed to have been one of the seventy disciples of Christ. He, with others, came from Judaea to Antioch, while Paul and Barnabas (A.D. 43) were there, and announced an approaching famine, which actually occurred the following year. Some writers suppose that the famine was general; but most modern commentators unite in understanding that the terms of the original apply not to the whole world, nor even to all the Roman empire, but, as in Luke ii. 1, to Judaea only, and that the reference is to that famine which, in the fourth year of Claudius, overspread Palestine. The poor Jews, in general, were then relieved by the Queen of Adiabene, who sent to

purchase corn in Egypt for them; and for the relief of the Christians in that country contributions were raised by the brethren at Antioch, and conveyed to Jerusalem by Paul and Barnabas (Acts xi. 27-30). Many years after, this same Agabus met Paul at Cæsarea, and warned him of the sufferings which awaited him if he prosecuted his journey to Jerusalem.

AGAG, the name of two kings of the Amalekites, and perhaps a common name of all their kings, like Pharaoh in Egypt (comp. Num. xxiv. 7; 1 Sam. xv. 8, 9, 20, 32). The first of these passages would imply that the king of the Amalekites was, then at least, a greater monarch, and his people a greater people, than is commonly imagined [AMALEKITES]. The latter references are to that king of the Amalekites who was spared by Saul, contrary to that solemn vow of devotedness to destruction, whereby the nation, as such, had of old precluded itself from giving any quarter to that people (Exod. xvii. 14; Deut. xxv. 17-19). Hence, when Samuel arrived in the camp of Saul, he ordered Agag to be brought forth. He came 'pleasantly,' deeming secure the life which the king had spared. But the prophet ordered him to be cut in pieces; and the expression which he employed—'As thy sword hath made women childless, so shall thy mother be childless among women'—indicates that, apart from the obligations of the vow, some such example of retributive justice was intended as had been exercised in the case of Adonibezek; or, in other words, that Agag had made himself infamous by the same treatment of some prisoners of distinction (probably Israelites) as he now received from Samuel. The unusual mode in which his death was inflicted strongly supports this conclusion.

AGAGITE, used as a Gentile name for Amalekite in Est. iii. 1, 10; viii. 3, 5.

AGATE, a precious or rather ornamental stone, which was one of those in the breast-plate of the high-priest (Exod. xxviii. 19, xxxix. 12). This stone is popularly known in this country under the name of Scotch pebble. There are few countries in which agates of some quality or other are not produced. The finest are those of India; they are plentiful, and sometimes fine, in Italy, Spain, and Germany; but those found in this country are seldom good.

Agate is one of the numerous modifications of form under which silica presents itself, almost in a state of purity, forming 98 per cent. of the entire mineral. The siliceous particles are not so arranged as to produce the transparency of rock crystal, but a semi-pellucid, sometimes almost opaque substance, with a resinous or waxy fracture; and various shades of colour are produced by minute quantities of iron. The same stone sometimes contains parts of different degrees of translucency, and of various shades of colour; and the endless combinations of these produce the beautiful and singular internal forms, for which, together with the high polish they are capable of receiving, agates obtain their value as precious stones. The Scripture text shows the early use of this stone for engraving; and several antique agates, engraved with exquisite beauty, are still preserved in the cabinets of the curious.

AGE. [CHRONOLOGY; GENERATION; LONGEVITY.]

AGE, OLD. The strong desire of a protracted life, and the marked respect with which aged persons were treated among the Jews, are very often indicated in the Scriptures. The most striking instance which Job can give of the respect in which he was once held, is that *even* old men stood up as he passed them in the streets (Job xxix. 8), the force of which is illustrated by the injunction in the law, 'Before the hoary head thou shalt stand up, and shalt reverence the aged' (Lev. xix. 32). Similar injunctions are repeated in the Apocrypha, so as to show the deportment expected from young men towards their seniors in company. Thus, in describing a feast, the author of Ecclesiasticus (xxxii. 3, 7) says, 'Speak thou that art the elder, for it becometh thee. Speak, young man, if there be need of thee, and yet scarcely, when thou art twice asked.'

Thus the attainment of old age is constantly promised or described as a blessing (Gen. xv. 15; Job v. 26), and communities as highly favoured in which old people abound (Isa. lxx. 20; Zech. viii. 4), while premature death is the greatest of calamities upon individuals, and to the families to which they belong (1 Sam. ii. 32); the aged are constantly supposed to excel in understanding and judgment (Job. xii. 20; xv. 10; xxxii. 9; 1 Kings xii. 6, 8), and the mercilessness of the Chaldeans is expressed by their having 'no compassion' upon the 'old man, or him who stooped for age' (2 Chron. xxxvi. 17).

The strong desire to attain old age was necessarily in some degree connected with or resembled the respect paid to aged persons; for people would scarcely desire to be old, were the aged neglected or regarded with mere suffering.

Attention to age was very general in ancient times; and is still observed in all such conditions of society as those through which the Israelites passed. Among the Egyptians, the young men rose before the aged, and always yielded to them the first place. The youth of Sparta did the same, and were silent—or, as the Hebrews would say, laid their hand upon their mouth—whenever their elders spoke. At Athens, and in other Greek states, old men were treated with corresponding respect. In China the deference for the aged, and the honours and distinctions awarded to them, form a capital point in the government, and among the Moslems of Western Asia, whose usages offer so many analogies to those of the Hebrews, the same regard for seniority is strongly shown. Among the Arabs it is very seldom that a youth can be permitted to eat with men. With the Turks, age, even between brothers, is the object of marked deference.

AGONY, a word directly meaning *contest*, and especially the contests by wrestling, &c. in the public games; whence it is applied metaphorically to a severe *struggle* or *conflict* with pain and suffering. *Agony* is the actual struggle with present evil, and is thus distinguished from *anguish*, which arises from the reflection on evil that is past. In the New Testament the word is only used by Luke (xx. 44), and is employed by him with terrible significance to describe the fearful struggle which our Lord sustained in the

garden of Gethsemane. The circumstances of this mysterious transaction are recorded in Matt. xxvi. 36-46; Mark xiv. 32-42; Luke xx. 39-48; Heb. v. 7, 8. None of these passages, taken separately, contains a full history of our Saviour's agony. Each of the three Evangelists has omitted some things which the others have recorded, and all are very brief. The passage in Hebrews is only an incidental notice. The three Evangelists appear to have had the same design, namely, to convey to their readers an idea of the intensity of the Lord's distress; but they compass it in different ways. Luke alone notices the agony, the bloody sweat, and the appearance of an angel from heaven strengthening him. Matthew and Mark alone record the change which appeared in his countenance and manner, the complaint which he uttered of the overpowering sorrows of his soul, and the repetition of the same prayer. All agree that he prayed for the removal of what he called 'this cup,' and are careful to note that he qualified this earnest petition by a preference of his Father's will to his own.

With regard to the cause of his overwhelming distress, Jesus himself points it out in the prayer, 'If it be possible, let this cup pass from me;' the cup which his Father had appointed for him; and the question is, what does he mean by 'this cup.' Doddridge and others think that he means the instant agony, the trouble that he then actually endured. But this is satisfactorily answered by Dr. Mayer, who shows by reference to John xviii. 18, that the cup respecting which he prayed was one that was then before him, which he had not yet taken up to drink, and which he desired, if possible, that the Father should remove. It could, therefore, be no other than the scene of suffering upon which he was about to enter. It was the death which the Father had appointed for him—the death of the cross—with all the attending circumstances which aggravated its horror; that scene of woe which began with his arrest in the garden, and was consummated by his death on Calvary. Jesus had long been familiar with this prospect, and had looked to it as the appointed termination of his ministry (Matt. xvi. 21; xvii. 9-12; xx. 17, 19, 28; Mark x. 32-34; John x. 18; xii. 32, 33). But when he looked forward to this destination, as the hour approached, a chill of horror sometimes came over him, and found expression in external signs of distress (John xii. 27; comp. Luke xii. 49, 50). It is manifest, therefore, that something more than the cross was now before him, and that he was now placed in a new and hitherto untried situation. Dr. Mayer says: 'I have no hesitation in believing that he was here put upon the trial of his obedience. It was the purpose of God to subject the obedience of Jesus to a severe ordeal, in order that, like gold tried in the furnace, it might be an act of more perfect and illustrious virtue; and for this end he permitted him to be assailed by the fiercest temptation to disobey his will and to refuse the appointed cup. In pursuance of this purpose, the mind of Jesus was left to pass under a dark cloud, his views lost their clearness, the Father's will was shrouded in obscurity, the cross appeared in ten-fold horror, and nature was left to indulge her feelings, and to put forth her reluctance.'

Under another head [BLOODY SWEAT] will be found the considerations suggested by one of the remarkable circumstances of this event.

AGRARIAN LAW. To this, or some such heading, belongs the consideration of the peculiar laws by which the distribution and tenure of land were regulated among the Hebrew people; while the modes and forms in which the land was cultivated belong to AGRICULTURE.

The Hebrews were for the most part a pastoral people until they were settled in Palestine, and their pastoral habits were mainly instrumental in keeping them distinct and separate from the Egyptians, who were agriculturists, and had a strong dislike to a shepherd life (Gen. xli. 34). But when they became an independent and sovereign nation, the same result of separation from other nations was to be aided by inducing them to devote their chief attention to the culture of the soil.

It was, doubtless, in subservience to this object, and to facilitate the change, that the Israelites were put in possession of a country already in a state of high cultivation (Deut. vi. 11). And it was in order to retain them in this condition, to give them a vital interest in it, and to make it a source of happiness to them, that a very peculiar agrarian law was given to them. An equal distribution of the soil (Num. xxvi. 53-54) was the basis of the agrarian law. By it provision was made for the support of 600,000 yeomanry, with (according to different calculations) from sixteen to twenty-five acres of land each. This land they held independent of all temporal superiors, by direct tenure from Jehovah their sovereign, by whose power they were to acquire the territory, and under whose protection they were to enjoy and retain it. But this law was guarded by other provisions equally wise and salutary. The accumulation of debt was prevented, first, by prohibiting every Hebrew from accepting of interest (Lev. xxv. 35, 36) from any of his fellow-citizens; next, by establishing a regular release of debts every seventh year; and, finally, by ordering that no lands could be alienated for ever, but must, on each year of Jubilee, or every seventh Sabbatic year, revert to the families which originally possessed them. Thus, without absolutely depriving individuals of all temporary dominion over their landed property, it re-established, every fiftieth year, that original and equal distribution of it, which was the foundation of the national polity; and as the period of such reversion was fixed and regular, all parties had due notice of the terms on which they negotiated; so that there was no ground for public commotion or private complaint.

This law, by which landed property was released in the year of Jubilee from all previous obligations, did not extend to houses in towns, which, if not redeemed within one year after being sold, were alienated for ever (Lev. xxv. 29, 30). This must have given to property in the country a decided preference over property in cities, and must have greatly contributed to the essential object of all those regulations, by affording an inducement to every Hebrew to reside on and cultivate his land. Further, the original distribution of the land was to the several tribes according to their families, so that each tribe was, so to speak, settled in the same county,

and each family in the same barony or hundred. Nor was the estate of any family in one tribe permitted to pass into another, even by the marriage of an heiress (Num. xxvii.); so that not only was the original balance of property preserved, but the closest and dearest connections of affinity attached to each other the inhabitants of every vicinage.

For this land a kind of quit-rent was payable to the sovereign proprietor, in the form of a tenth or tithe of the produce, which was assigned to the priesthood (Turnes). The condition of military service was also attached to the land: as it appears that every freeholder (Deut. xx. 5) was obliged to attend at the general muster of the national army, and to serve in it, at his own expense (often more than repaid by the plunder), is long as the occasion required. In this direction, therefore, the agrarian law operated in securing a body of 600,000 men, inured to labour and industry, always assumed to be ready, as they were bound, to come forward at their country's call. This great body of national yeomanry, every one of whom had an important stake in the national independence, was officered by its own hereditary chiefs, heads of tribes and families comp. Exod. xviii. and Num. xxxi. 14); and must have presented an insuperable obstacle to treacherous ambition and political intrigue, and to every attempt to overthrow the Hebrew commonwealth and establish despotic power. Nor were these institutions less wisely adapted to secure the state against foreign violence, and at the same time prevent offensive wars and remote conquests. For while this vast body of hardy yeomanry were always ready to defend their country, when assailed by foreign foes, yet, being constantly employed in agriculture, attached to domestic life, and enjoying at home the society of the numerous relatives who peopled their neighbourhood, war must have been in a high degree aversive to their tastes and habits. Religion also took part in preventing them from being captivated by the splendour of military glory. On returning from battle, even if victorious, in order to bring them back to more peaceful feelings after the rage of war, the law required them to consider themselves as polluted by the slaughter, and unworthy of appearing in the camp of Jehovah until they had employed an entire day in the rites of purification (Num. xix. 13-16; xxxi. 19). Besides, the force was entirely infantry; the law forbidding even the kings to multiply horses in their train (Deut. xvii. 16); and this, with the ordinance requiring the attendance of all the males three times every year at Jerusalem, proved the intention of the legislator to confine the natives within the limits of the Promised Land, and rendered long and distant wars and conquests impossible without the virtual renunciation of that religion which was incorporated with their whole civil polity, and which was, in fact, the charter by which they held their property and enjoyed all their rights.

AGRICULTURE. The antiquity of agriculture is intimated in the brief history of Cain and Abel (Gen. iv. 2, 3). But of the actual state of agriculture before the deluge we know nothing. Whatever knowledge was possessed by the old world was doubtless transmitted to the new by Noah and his sons; and that this knowledge was

considerable is implied in the fact that one of the operations of Noah, when he began to be a husbandman, was to plant a vineyard, and to make wine with the fruit (Gen. ix. 20). There are few agricultural notices belonging to the patriarchal period, but they suffice to show that the land of Canaan was in a state of cultivation, and that the inhabitants possessed what were at a later date the principal products of the soil in the same country. In giving to the Israelites possession of a country already under cultivation, it was the Divine intention that they should keep up that cultivation, and become themselves an agricultural people; and in doing this they doubtless adopted the practices of agriculture which they found already established in the country.

As the condition of the seasons lies at the root of all agricultural operations, it should be noticed that the variations of sunshine and rain, which with us extend throughout the year, are in Palestine confined chiefly to the latter part of autumn and the winter. During all the rest of the year the sky is almost uninterruptedly cloudless, and rain very rarely falls. The autumnal rains usually commence at the latter end of October or the beginning of November, not suddenly, but by degrees, which gives opportunity to the husbandman to sow his wheat and barley. The rains continue during November and December, but afterwards they occur at longer intervals; and rain is rare after March, and almost never occurs as late as May. The cold of winter is not severe; and as the ground is never frozen, the labours of the husbandman are not entirely interrupted. Snow falls in different parts of the country, but never lies long on the ground. In the plains and valleys the heat of summer is oppressive, but not in the more elevated tracts. In such high grounds the nights are cool, often with heavy dew. The total absence of rain in summer soon destroys the verdure of the fields, and gives to the general landscape, even in the high country, an aspect of drought and barrenness. No green thing remains but the foliage of the scattered fruit trees, and occasional vineyards and fields of millet. In autumn the whole land becomes dry and parched; the cisterns are nearly empty; and all nature, animate and inanimate, looks forward with longing for the return of the rainy season. In the hill country the time of harvest is later than in the plains of the Jordan and of the sea-coast. The barley harvest is about a fortnight earlier than that of wheat. In the plain of the Jordan the wheat harvest is early in May; in the plains of the coast and of Esdraelon it is towards the latter end of that month; and in the hills, not until June. The general vintage is in September, but the first grapes ripen in July; and from that time the towns are well supplied with this fruit.

SOIL, &c.—The geological characters of the soil in Palestine have never been satisfactorily stated; but the different epithets of description which travellers employ enable us to know that it differs considerably, both in its appearance and character, in different parts of the land; but wherever soil of any kind exists, even to a very slight depth, it is found to be highly fertile. As parts of Palestine are hilly, and hills have seldom much depth of soil, the mode of cultivating them in terraces was anciently, and is now, much em-

ployed. A series of low stone walls, one above another, across the face of the hill, arrested the soil brought down by the rains, and afforded a series of levels for the operations of the husbandman. This mode of cultivation is usual in Lebanon, and is not unfrequent in Palestine, where the remains of terraces across the hills, in various parts of the country, attest the extent to which it was anciently carried.

In such a climate as that of Palestine, water is the great fertilizing agent. The rains of autumn and winter, and the dews of spring, suffice for the ordinary objects of agriculture; but the ancient inhabitants were able, in some parts, to avert even the aridity which the summer droughts occasioned, and to keep up a garden-like verdure, by means of aqueducts communicating with the brooks and rivers (Ps. i. 3; lxv. 10; Prov. xxi. 1; Isa. xxx. 25; xxxii. 2, 20; Hos. xii. 11). Hence springs, fountains, and rivulets were as much esteemed by husbandmen as by shepherds (Josh. xv. 19; Judg. i. 15). The soil was also cleared of stones, and carefully cultivated; and its fertility was increased by the ashes to which the dry stubble and herbage were occasionally reduced by burning over the surface of the ground (Prov. xxiv. 31; Isa. vii. 23; x. 17; xxxii. 13; xlvii. 14; Matt. iii. 12; Luke iii. 17). The dung, and, in the neighbourhood of Jerusalem, the blood of animals, were also used to enrich the soil (2 Kings ix. 37; Ps. lxxxiii. 10; Isa. xxv. 10; Jer. ix. 22; Luke xiv. 34, 35).

That the soil might not be exhausted, it was ordered that every seventh year should be a sabbath of rest to the land. There was to be no sowing or reaping, no pruning of vines or olives, no vintage or gathering of fruits; and whatever grew of itself was to be left to the poor, the stranger, and the beast of the field (Lev. xxv. 1-7). But such an observance required more faith than the Israelites were prepared to exercise. It was for a long time utterly neglected (Lev. xxvi. 34, 35; 2 Chron. xxxvi. 21), but after the Captivity it was more observed. By this remarkable institution the Hebrews were also trained to habits of economy and foresight, and invited to exercise a large degree of trust in the bountiful providence of their Divine King.

FIELDS.—Syria, including Palestine, was regarded by the ancients as one of the first countries for corn. Wheat was abundant and excellent; and there is still one bearded sort, the ear of which is three times as heavy, and contains twice as many grains, as our common English wheat. Barley was also much cultivated, not only for bread, but because it was the only kind of corn which was given to beasts; for oats and rye do not grow in warm climates. Hay was not in use; and therefore the barley was mixed with chopped straw to form the food of cattle (Gen. xxiv. 25, 32; Judg. xix. 19, &c.). Other objects of field culture were millet, spelt, various kinds of beans and peas, pepperwort, cummin, cucumbers, melons, flax, and, perhaps, cotton. Many other articles might be mentioned as being now cultivated in Palestine; but, as their names do not occur in Scripture, we cannot with certainty know which of them were grown there in the ancient times.

Anciently, as now, in Palestine and the East the arable lands were not divided by hedges into

fields, as in this country. The ripening products therefore presented an expanse of culture unbroken, although perhaps variegated, in a large view, by the difference of the products grown. The boundaries of lands were therefore marked by stones as landmarks, which, even in patriarchal times, it was deemed a heinous wrong to remove (Job. xxiv. 2); and the law pronounced a curse upon those who, without authority, displaced them (Deut. xix. 14; xxvii. 17). The walls and hedges which are occasionally mentioned in Scripture belonged to orchards, gardens, and vineyards.

8. Modern Syrian Plough.

AGRICULTURAL OPERATIONS.—Of late years much light has been thrown upon the agricultural operations and implements of ancient times, by the discovery of various representations on the sculptured monuments and painted tombs of Egypt. As these agree surprisingly with the notices in the Bible, and, indeed, differ little from what is still employed in Syria and Egypt, it is very safe to receive the instruction which they offer.

Ploughing.—This has always been a light and superficial operation in the East. At first, the ground was opened with pointed sticks; then, a kind of hoe was employed; and this, in many parts of the world, is still the substitute for a plough. But the plough was known in Egypt and Syria before the Hebrews became cultivators (Job i. 14). In the East, however, it has always been a light and inartificial implement. At first, it was little more than a stout branch of a tree, from which projected another limb, shortened and pointed. This, being turned into the ground, made the furrows; while at the farther end of the larger branch was fastened a transverse yoke, to which the oxen were harnessed. Afterwards a handle to guide the plough was added. Thus the plough consisted of—1. the pole; 2. the point or share; 3. the handle; 4. the yoke. The Syrian plough is, and doubtless was, light enough for a man to carry in his hand. We annex a figure of the ancient Egyptian plough, which

9. Ancient Egyptian Plough.

had the most resemblance to the one now used (as figured in No. 8), and the comparison between them will probably suggest a fair idea of the plough which was in use among the Hebrews.

The following cut (from Sir Charles Fellows' work on Asia Minor) shows the parts of a still lighter plough used in Asia Minor and Syria, with but a single handle, and with different shares according to the work it has to execute.

1. The plough. 2. The pole. 3. Shares (various).
4. Handle. 5. Yokes. 6. Ox-goad.

The plough was drawn by oxen, which were sometimes impelled by a scourge (Isa. x. 26; Nahum iii. 2); but oftener by a long staff, furnished at one end with a flat piece of metal for clearing the plough, and at the other with a spike for goading the oxen. This ox-goad might be easily used as a spear (Judg. iii. 31; 1 Sam. xiii. 21). Sometimes men followed the plough with hoes to break the clods (Isa. xxviii. 24); but in later times a kind of hammer was employed, which appears to have been then, as now, merely a thick block of wood, pressed down by a weight, or by a man sitting on it, and drawn over the ploughed field.

12. Ploughing and Sowing. Ancient Egyptian.

by the hoe (for breaking the clods) the sower followed the plough, holding in the left hand a basket of seed, which he scattered with the right hand, while another person filled a fresh basket. We also see that the mode of sowing was what we call 'broad-cast,' in which the seed is thrown loosely over the field (Matt. xiii. 3-8). In Egypt, when the levels were low, and the water had continued long upon the land, they often dispensed with the plough altogether; and probably, like the present inhabitants, broke up the ground with hoes, or simply dragged the moist mud with bushes after the seed had been thrown upon the surface. To this cultivation without ploughing Moses probably alludes (Deut. xi. 10), when he tells the Hebrews that the land to which they were going was *not* like the land of Egypt, where they 'sowed their seed and watered it with their foot as a garden of herbs.' It does not seem that any instrument resembling our *harrow* was known; the word rendered to *harrow*, in Job xxxix. 10, means literally to *break the clods*, and is so rendered in Isa. xxviii. 24; Hos. x. 11; and for this purpose the means used have been already indicated. The passage in Job is, however, important. It shows that this breaking of clods was not always by hand, but that some

Sowing.—The ground, having been ploughed as soon as the autumnal rains had mollified the soil, was fit, by the end of October, to receive the seed; and the sowing of wheat continued, in different situations, through November into December. Barley was not generally sown till January and February. The seed appears to have been sown and harrowed at the same time; although sometimes it was ploughed in by a cross furrow.

11. Sowing. Ancient Egyptian.

Ploughing in the Seed.—The Egyptian paintings illustrate the Scriptures by showing that in those soils which needed no previous preparation

kind of instrument was drawn by an animal over the ploughed field, most probably the rough log which is still in use.

Harvest.—It has been already indicated that the time of the wheat harvest in Palestine varies, in different situations, from early in May to late in June; and that the barley harvest is about a fortnight earlier than that of wheat. Among the Israelites, as with all other people, the harvest was a season of joy, and as such is more than once alluded to in Scripture (Ps. xxvi. 5; Isa. ix. 3).

Reaping.—Different modes of reaping are indicated in Scripture, and illustrated by the Egyptian monuments.

13. Reaping.

In the most ancient times, the

corn was plucked up by the roots, which continued to be the practice with particular kinds of grain after the sickle was known. In Egypt, at this day, barley and dhnrah (maize) are pulled up by the roots. 'Wheat, as well as barley in general,' says Russell, 'does not grow half as high as in Britain; and is therefore, like other grain, not reaped with the sickle, but plucked up by the roots with the hand. In other parts of the country, where the corn grows ranker, the sickle is used.' When the sickle was used, the wheat was either cropped off under the ear or cut close to the ground. In the former case, the straw was afterwards plucked up for use; in the latter, the stubble was left and burnt on the ground for manure. As the Egyptians needed not such manure, and were economical of straw, they generally followed the former method; while the Israelites, whose lands derived benefit from the burnt stubble, used the latter; although the practice of cutting off the ears was also

14. Binding Sheaves.

known to them (Job xxiv. 24). Cropping the ears short, the Egyptians did not generally bind them into sheaves, but removed them in baskets. Sometimes, however, they bound them into *double* sheaves; and such as they plucked up were bound into single long sheaves. The Israelites appear generally to have made up their corn into sheaves (Gen. xxxvii. 7; Lev. xxiii. 10-15; Ruth ii. 7, 15; Job xxiv. 10; Jer. ix. 22; Mich. iv. 12), which were collected into a heap, or removed in a cart (Amos ii. 13) to the threshing-floor. The carts were probably similar to those which are still employed for the same purpose.

With regard to the sickles, there appear to have been two kinds in use as among the Egyptians. The figures of these Egyptian sickles probably mark the difference between them. One

15. Sickles.

was very much like our common reaping-hook, while the other had more resemblance in its shape to a scythe, and in the Egyptian examples appears to have been toothed. The reapers were the owners and their children, men-servants and women-servants, and day-labourers (Ruth ii. 4,

6, 21, 23; John iv. 36; James v. 4). Refreshments were provided for them, especially drink, of which the gleaners were allowed to partake (Ruth ii. 9). So in the Egyptian harvest-scenes, we perceive a provision of water in skins, hung against trees, or in jars upon stands, with the reapers drinking, and gleaners applying to share the draught. Among the Israelites, gleaning

16. Egyptian Harvest Scene.

was one of the stated provisions for the poor: and for their benefit the corners of the field were left unreaped, and the reapers might not return for a forgotten sheaf. The gleaners were however to obtain in the first place the express permission of the proprietor or his steward (Lev. xix. 9, 10; Deut. xxiv. 19; Ruth ii. 2, 7).

17. Threshing by Cattle.

Threshing.—The ancient mode of threshing, as described in Scripture and figured on the Egyptian monuments, is still preserved in Palestine. Formerly the sheaves were conveyed from the field to the threshing-floor in carts; but now they are borne, generally, on the backs of camels and asses. The threshing-floor is a level plot of ground, of a circular shape, generally about fifty feet in diameter, prepared for use by beating down the earth till a hard floor is formed (Gen. 1. 10; Judg. vi. 37; 2 Sam. xxiv. 16, 24). Sometimes several of these floors are contiguous to each other. The sheaves are spread out upon them; and the grain is trodden out by oxen, cows, and young cattle, arranged five abreast, and driven in a circle, or rather in all directions, over the floor. This was the common mode in the Bible times; and Moses forbade that the oxen thus employed should be muzzled to prevent them from tasting the corn (Deut. xxv. 4; Isa. xxviii. 28). *Fails*, or sticks, were only used in threshing small quantities, or for the lighter kinds of grain (Ruth ii. 17; Isa. xxviii. 27). There were, however, some kinds of threshing-machines, which are still used in Palestine and Egypt. One of them, represented in the annexed figure, is very much used in Palestine. It is composed of two thick planks, fastened together side by side, and bent upwards in front. Sharp fragments of stone are fixed into holes bored in the bottom. This machine is drawn over the corn by oxen, a man or boy sometimes sitting on it to increase the weight. It not only separates the grain, but

cuts the straw and makes it fit for fodder (2 Kings xiii. 7). This is, most probably, the

18. Syrian Corn-Drage.

'corn-drag,' which is mentioned in Scripture (Isa. xxviii. 27; xli. 15; Amos i. 3, rendered 'threshing instrument'), and would seem to have been sometimes furnished with iron points instead of stones. The Bible also notices a machine called a *Noreg* (2 Sam. xxiv. 22; 1 Chron. xxi. 23; Isa. xli. 15), which is unquestionably the same which bears in Arabic the name of *Noreg*. This machine is not now often seen in Palestine; but is more used in some parts of Syria, and is common in Egypt. It is a sort of

19. Threshing by the Noreg.

frame of wood, in which are inserted three wooden rollers, armed with iron teeth, &c. It bears a sort of seat or chair, in which the driver sits to give the benefit of his weight. It is generally drawn over the corn by two oxen, and separates the grain, and breaks up the straw even more effectually than the drag. In all these processes, the corn is occasionally turned by a fork; and, when sufficiently threshed, is thrown up by the same fork against the wind to separate the grain, which is then gathered up and winnowed.

Winnowing.—This was generally accomplished by repeating the process of tossing up the grain against the wind with a fork (Jer. iv. 11, 12), by which the broken straw and chaff were dispersed, and the grain fell to the ground.

20. Winnowing.

The grain afterwards passed through a sieve to separate the bits of earth and other impurities. After this, it underwent a still further purification, by being tossed up with wooden scoops or short-handled shovels, such as we see in Egyptian paintings.

AGRIPPA [HERODIAN FAMILY]. Although of the two Herods, father and son, who also bore the name of Agrippa, the latter is best known by his Roman name, it seems best to include him with the other members of the Herodian dynasty, under the name which he bore among his own people.

A'GUR, the author of the sayings contained in Prov. xxx., which the inscription describes as composed of the precepts delivered by 'Agur, the son of Jakeh,' to his friends 'Ithiel and Ucal.' Beyond this everything that has been stated of him, and of the time in which he lived, is pure conjecture.

A'HAB (*father's brother*), son of Omri, and the sixth king of Israel, who reigned twenty-two years, beginning in B.C. 918 and ending in 897. Ahab was, upon the whole, the weakest of all the Israelitish monarchs; and although there are occasional traits of character which show that he was not without good feelings and dispositions, the history of his reign shows that weakness of character in a king may sometimes be as injurious in its effects as wickedness. Many of the evils of his reign may be ascribed to the close connection which he formed with the Phœnicians. The wife of Ahab was Jezebel, the daughter of Ethbaal, or Ithobaal, king of Tyre. She was a woman of a decided and energetic character, and, as such, soon established that influence over her husband which such women always acquire over weak, and not unfrequently also over strong, men. Ahab, being entirely under the control of Jezebel, sanctioned the introduction, and eventually established the worship of the Phœnician idols, and especially of the sun-god Baal. Hitherto the golden calves in Dan and Bethel had been the only objects of idolatrous worship in Israel, and they were intended as symbols of JEHOVAH. But all reserve and limitation were now abandoned. The king built a temple at Samaria, and erected an image, and consecrated a grove to Baal. A multitude of the priests and prophets of Baal were maintained. Idolatry became the predominant religion; and Jehovah, with the golden calves as symbolical representations of him, were viewed with no more reverence than Baal and his image. At length the judgment of God on Ahab and on his house was pronounced by Elijah, that, during the reign of his son, his whole race should be exterminated. Ahab died of the wounds which he received in a battle with the Syrians, according to a prediction of Micaiah, which the king disbelieved, but yet endeavoured to avert by disguising himself in the action (1 Kings xvi. 29; xxii. 40).

2. AHAB and ZEDEKIAH. The names of two false prophets, who deceived the Israelites at Babylon. For this they were threatened by Jeremiah, who foretold that they should be put to death by the king of Babylon in the presence of those whom they had beguiled; and that in following times it should become a common malediction to say, 'The Lord make thee like Ahab

and Zedekiah, whom the king of Babylon roasted in the fire' (Jer. xxix. 21, 22).

AHASUERUS, or ACHASHEROSH, is the name, or rather the *title*, of four Median and Persian monarchs mentioned in the Bible.

The first Ahasuerus is incidentally mentioned, in Dan. ix. 1, as the father of Darius the Mede. It is generally agreed that the person here referred to is the Astyages of profane history. See the article DARIUS.

The second Ahasuerus occurs in Ezra iv. 6, where it is said that in the beginning of his reign the enemies of the Jews wrote an accusation against them, the result of which is not mentioned. The Persian king here meant seems to be the immediate successor of Cyrus, the frantic tyrant Cambyses, who came to the throne B.C. 529, and died after a reign of seven years and five months.

The third Ahasuerus is the Persian king of the book of Esther. The chief facts recorded of him there, and the *dates* of their occurrence, which are important in the subsequent inquiry, are these: In the *third* year of his reign he made a sumptuous banquet for all his nobility, and prolonged the feast for 180 days. Being on one occasion merry with wine, he ordered his queen Vashti to be brought out, to show the people her beauty. On her refusal to violate the decorum of her sex, he not only indignantly divorced her, but published an edict concerning her disobedience, in order to insure to every husband in his dominions the rule in his own house. In the *seventh* year of his reign he married Esther, a Jewess, who, however, concealed her parentage. In the *twelfth* year of his reign, his minister Haman, who had received some slights from Mordecai the Jew, offered him 10,000 talents of silver for the privilege of ordering a massacre of the Jews in all parts of the empire on an appointed day. The king refused this immense sum, but acceded to his request; and couriers were despatched to the most distant provinces to enjoin the execution of this decree. Before it was accomplished, however, Mordecai and Esther obtained such an influence over him, that he so far annulled his recent enactment as to despatch other couriers to empower the Jews to defend themselves manfully against their enemies on that day; the result of which was, that they slew 800 of his native subjects in Shushan, and 75,000 of them in the provinces.

Although almost every Medo-Persian king, from Cyaxares I. down to Artaxerxes III. (Ochus), has in his turn found some champion to assert his title to be the Ahasuerus of Esther, some have contended on very plausible grounds that Darius Hystaspes is the monarch referred to. But in the first place, it is impossible to find the name of Darius in Achashverosh; and, in the second, the moral evidence is against him. The mild and just character ascribed to Darius renders it highly improbable that, after favouring the Jews from the second to the sixth year of his reign, he should become a senseless tool in the hands of Haman, and consent to their extirpation. Lastly, we read of his marrying two daughters and a grand-daughter of Cyrus, and a daughter of Otanes—and these only; would Darius have repudiated one of these for such a trifle, when his peculiar position, as the

first king of his race, must have rendered such alliances indispensable?

The whole question, therefore, lies between Xerxes and his successor, Artaxerxes Longimanus. As Artaxerxes allowed Ezra to go to Jerusalem with a colony of exiles in the seventh year of his reign (Ezra vii. 1-7); and as he issued a decree in terms so exceedingly favourable to the religious as well as civil interests of the Jews (Ezra vii. 11-26), how could Haman, *five years afterwards*, venture to describe the Jews to him as a people whom, on the very account of their law, it was not for the king's profit to suffer? And how could Haman so directly propose their extermination, in the face of a decree so signally in their favour, and so recently issued by the same king? Especially as the laws of the Medes and Persians might not be altered! Again, as Artaxerxes (assuming always that *he* is the Artachshast of Ezra vii. 1, and not Xerxes) was capable of such liberality to the Jews in the seventh year of his reign, let us not forget that, if he is the Ahasuerus of the book of Esther, it was in that same year that he married the Jewess. Now, if—by taking the first and tenth months in the seventh year of the king (the dates of the departure of Ezra, and of the marriage of Esther) to be the first and tenth months of the *Hebrew* year (as is the usual mode of notation), and not the first and tenth from the period of his *accession*—we assume that the departure of Ezra took place *after* his marriage with her, his clemency might be the effect of her influence on his mind. Then we have to explain how he could be induced to consent to the extirpation of the Jews in the twelfth year of his reign, notwithstanding that her influence still continued, for we find it evidently at work in the twelfth year. But if, on the other hand, his indulgence to Ezra was *before* his marriage, then we have even a greater difficulty to encounter. For then Artaxerxes must have acted from his own unbiassed lenity, and his purposed cruelty in the twelfth year would place him in an incongruous opposition with himself. As we, moreover, find Artaxerxes again propitious to their interests, in the twentieth year of his reign—when he allowed Nehemiah to return to Jerusalem—it is much easier to believe that he was also favourably disposed to them in the twelfth. At any rate, it would be allowing Esther a long time to exercise an influence on his disposition, if his clemency in the twentieth year was due to her, and not to his own inclination. Besides, the fact that neither Ezra nor Nehemiah gives the least hint that the liberal policy of Artaxerxes towards them was owing to the influence of their countrywoman, is an important negative point in the scale of probabilities. In this case also there is a serious difficulty in the name. As Artaxerxes is called *Artachshast* in Ezra and Nehemiah, we certainly might expect the author of the book of Esther to agree with them in the name of a king whom they all had had such occasion to know. Nor is it perhaps unimportant to add, that Norberg asserts, on the authority of native Persian historians, that the *mother* of Bahman, i. e. Artaxerxes Longimanus, was a Jewess. This statement would agree excellently with the theory that Xerxes was Ahasuerus. Lastly, the joint testimony borne to his

clemency and magnanimity by the acts recorded of him in Ezra and Nehemiah, and by the accordant voice of profane writers, prevents us from recognising Artaxerxes in the debauched, imbecile, and cruel tyrant of the book of Esther.

On the ground of moral resemblance to that tyrant, however, every trait leads us to Xerxes. The king who scourged and fettered the sea; who beheaded his engineers because the elements destroyed their bridge over the Hellespont; who so ruthlessly slew the eldest son of Pythius because his father besought him to leave him one sole support of his declining years; who dishonoured the remains of the valiant Leonidas; and who beguiled the shame of his defeat by such a course of sensuality, that he publicly offered a reward for the inventor of a new pleasure—is just the despot to divorce his queen because she would not expose herself to the gaze of drunken revellers; is just the despot to devote a whole people, his subjects, to an indiscriminate massacre; and, by way of preventing that evil, to restore them the right of self-defence (which it is hard to conceive how the first edict ever could have taken away), and thus to sanction their slaughtering thousands of his other subjects.

There are also remarkable coincidences of date between the history of Xerxes and that of Ahasuerus. In the third year of his reign the latter gave a grand feast to his nobles, which lasted 180 days (Esth. i. 3); the former, in his third year, also assembled his chief officers to deliberate on the invasion of Greece. Again, Ahasuerus married Esther at Shushan, in the seventh year of his reign: in the same year of his reign, Xerxes returned to Susa with the mortification of his defeat, and sought to forget himself in pleasure;—not an unlikely occasion for that quest for fair virgins for the harem (Esth. ii. 2). Lastly, the tribute imposed on the land and isles of the sea also accords with the state of his revenue exhausted by his insane attempt against Greece. In fine, these arguments, negative and affirmative, render it so highly probable that Xerxes is the Ahasuerus of the book of Esther, that to demand more conclusive evidence, would be to mistake the very nature of the question.

The fourth Ahasuerus is mentioned in Tobit xiv. 15, in connection with the destruction of Nineveh. That circumstance points out Cyaxares I. as the person intended.

AHA'VA, Ezra viii. 21, 31, the river by which the Jewish exiles assembled their second caravan under Ezra, when returning to Jerusalem. It would seem from ch. viii. 15, that it was designated from a town of the same name: 'I assembled them at the river that flows towards Ahava.' In that case, it could not have been of much importance in itself; and probably it was no other than one of the numerous streams or canals of Mesopotamia communicating with the Euphrates, somewhere in the north-west of Babylonia.

AHAZ (*possessor*), son of Jotham, and eleventh king of Judah, who reigned sixteen years, beginning in B.C. 741, and ending in 726. AHAZ was the most corrupt monarch that had hitherto appeared in Judah. He respected neither Jehovah, the law, nor the prophets; he broke through all the restraints which law and custom

had imposed upon the Hebrew kings, and had regard only to his own depraved inclinations. He introduced the religion of the Syrians into Jerusalem, erected altars to the Syrian gods, altered the temple in many respects after the Syrian model, and at length ventured to shut it up altogether. Such a man could not exercise that *faith* in Jehovah, as the political head of the nation, which formed the *courage* of a Hebrew king. Hence, after he had sustained a few repulses from Pekah and Rezin, his allied foes, when the Edomites had revolted from him, and the Philistines were making incursions into his country, notwithstanding a sure promise of divine deliverance, he called Pul, the king of Assyria, to his aid [ASSYRIA]. He even became tributary to that monarch, on condition of his obliging Syria and Israel to abandon their design of destroying the kingdom of Judah; and thus afforded to Tiglath-pilezer, the successor of Pul, an opportunity of conquering Syria, Israel beyond Jordan, and Galilee. The Assyrians afforded AHAZ no real assistance; on the contrary, they drove him to such extremities that he was scarcely able, with all the riches of the temple, of the nobility, and of the royal treasury, to purchase release from his troublesome protectors. He died at the age of thirty-six (2 Kings xvi.; 2 Chron. xxviii.; Isa. vii.).

1. AHAZIAH (*whom Jehovah sustains*); son and successor of Ahab, and seventh king of Israel. He reigned two years, B.C. 897, 896. It seems that Jezebel exercised over her son the same influence which had guided her husband; and Ahaziah pursued the evil courses of his father. The most signal public event of his reign was the revolt of the Moabites, who took the opportunity of the defeat and death of Ahab to discontinue the tribute which they had paid to the Israelites. Ahaziah became a party in the attempt of Jehoshaphat, king of Judah, to revive the maritime traffic by the Red Sea; in consequence of which the enterprise was blasted, and came to nothing (2 Chron. xx. 35-37). Soon after, Ahaziah, having been much injured by a fall from the roof-gallery of his palace, had the infatuation to send to consult the oracle of Baalzebub, the god of Ekron, respecting his recovery. But the messengers were met and sent back by Elijah, who himself announced to the king that he should rise no more from the bed on which he lay (1 Kings xxii. 51, to 2 Kings i. 18).

2. AHAZIAH, otherwise JEHOAHAZ, son of Jehoram by Athaliah, daughter of Ahab and Jezebel, and sixth king of Judah. He reigned but one year (B.C. 885), and that wickedly, suffering himself in all things to be guided by the wicked counsels of his idolatrous mother, Athaliah. He cultivated the connections which had unhappily grown up between the two dynasties, and which had now been cemented by marriage. Hence he joined his uncle Jehoram of Israel in an expedition against Hazael, king of Damascus-Syria, for the recovery of Ramoth-Gilead; and afterwards paid him a visit while he lay wounded in his summer palace of Jezreel. The two kings rode out in their several chariots to meet Jehu; and when Jehoram was shot through the heart, Ahaziah attempted to escape, but was pursued, and being mortally wounded, had only strength to reach Megiddo, where he died. His body was

conveyed by his servants in a chariot to Jerusalem for interment (2 Kings ix. 28).

1. **AHI'AH** (*friend of Jehorah*); (1 Sam. xiv. 3), son of Ahitub, and high-priest in the reign of Saul, and brother and predecessor of the Ahimelech whom Saul slew for assisting David. Seeing that Ahimelech was also high-priest in the same reign, and was also the son of Ahitub (1 Sam. xxii. 11), some have thought that both names belonged to the same person; but this seems less likely than the explanation which has just been given.

2. **AHIAH**, one of the two secretaries of Solomon (1 Kings iv. 3). Two other persons of this name occur in 1 Sam. xiv. 3; 1 Chron. viii. 7.

AHI'AM, one of David's thirty heroes (2 Sam. xxiii. 33).

AHIE'ZER (*brother of help*), the hereditary chief or prince of the tribe of Dan at the time that the Israelites quitted Egypt (Num. i. 12).

AHI'HUD (*brother, i. e. friend of the Jews*), the prince of the tribe of Asher, who, with the other chiefs of tribes, acted with Joshua and Eleazer in dividing the Promised Land (Num. xxxiv. 27).

AHI'JAH (same name as **AHIAH**), a prophet residing in Shiloh in the times of Solomon and Jeroboam. He appears to have put on record some of the transactions of the former reign (2 Chron. ix. 29). It devolved on him to announce and sanction the separation of the ten tribes from the house of David, as well as the foundation (1 Kings xi. 29-39), and, after many years, the subversion of the dynasty of Jeroboam (1 Kings xiv. 7-11) [**JEROBOAM**].

AHI'KAM (*brother of the enemy*), one of the four persons of distinction whom Josiah sent to consult Huldah, the prophetess (2 Kings xxii. 12-14). Ahikam and his family are honourably distinguished for their protection of the prophet Jeremiah (Jer. xxvi. 24; xxxix. 14).

AHI'MAAZ (*brother of anger, i. e. irascible*), son and successor of Zadok, who was joint high-priest in the reign of David, and sole high-priest in that of Solomon. His history belongs to the time of David, to whom he rendered an important service during the revolt of Absalom. David having refused to allow the ark of God to be taken from Jerusalem when he fled thence, the high-priests, Zadok and Abiathar, necessarily remained in attendance upon it; but their sons, Ahimaz and Jonathan, concealed themselves outside the city, to be in readiness to bear off to David any important information, respecting the movements and designs of Absalom, which they might receive from within. Accordingly, Hushai having communicated to the priests the result of the council of war, in which his own advice was preferred to that of Ahithophel [**ABSALEM**], they instantly sent a girl (probably to avoid suspicion) to direct Ahimaz and Jonathan to speed away with the intelligence. The transaction was, however, witnessed and betrayed by a lad, and the messengers were so hotly pursued that they took refuge in a dry cistern, over which the woman of the house placed a covering, and spread thereon parched corn. She told the pursuers that the messengers had passed on in haste; and when all was safe, she released them, on which they made their way to David (2 Sam.

xv. 24-37; xvii. 16-21). As may be inferred from his being chosen for this service, Ahimaz was swift of foot. Of this we have a notable example soon after, when, on the defeat and death of Absalom, he prevailed on Joab to allow him to carry the tidings to David. Another messenger, Cush, had previously been despatched, but Ahimaz outstripped him, and first came in with the news. He was known afar off by the manner of his running, and the king said, 'He is a good man, and cometh with good tidings'; and this favourable character is justified by the delicacy with which he waived that part of his intelligence concerning the death of Absalom, which he knew would greatly distress so fond a father as David (2 Sam. xviii. 19-33).

AHI'MAN (*brother of a gift*), one of three famous giants, of the race of Anak, who dwelt at Hebron when the Hebrew spies explored the land (Num. xiii. 22).

AHI'MELECH (*brother of the king, i. e. the king's friend*); he was son of Ahitub, and brother of Ahiah, who was most probably his predecessor in the high-priesthood [**AHIAH**]. When David fled from Saul, he went to Nob, a city of the priests in Benjamin, where the tabernacle then was; and by representing himself as on pressing business from the king, he obtained from Ahimelech, who had no other, some of the sacred bread which had been removed from the presence-table. He was also furnished with the sword which he had himself taken from Goliath, and which had been laid up as a trophy in the tabernacle (1 Sam. xxi. 1-9). These circumstances were witnessed by Doeg, an Edomite in the service of Saul, and were so reported by him to the jealous king as to appear acts of connivance at, and support to, David's imagined disloyal designs. Saul immediately sent for Ahimelech and the other priests then at Nob, and laid this crime to their charge, which they repelled by declaring their ignorance of any hostile designs on the part of David towards Saul or his kingdom. This, however, availed them not; for the king commanded his guard to slay them. Their refusal to fall upon persons invested with so sacred a character might have brought even Saul to reason; but he repeated the order to Doeg himself, and was too readily obeyed by that malignant person, who, with the men under his orders, not only slew the priests then present, eighty-six in number, but marched to Nob, and put to the sword every living creature it contained. The only one of the priests that escaped was Abiathar, son of Ahimelech, who fled to David, and afterwards became high priest (1 Sam. xxii.) [**ABIATHAR**].

AHI'ADAB (*liberal, or, noble brother*), one of the twelve officers who, in as many districts into which the country was divided, raised supplies of provisions in monthly rotation for the royal household. Ahinadab's district was the southern half of the region beyond the Jordan (1 Kings iv. 14).

AHI'NOAM (*brother of pleasantness*), a woman of Jezreel, one of the wives of David, and mother of Amnon. She was taken captive by the Amalekites when they plundered Ziklag, but was recovered by David (1 Sam. xxv. 43; xxvii. 3; xxx. 5; 2 Sam. ii. 2; iii. 2).

AHI'O (*brotherly*), one of the sons of Abin-

adab, who, with his brother Uzzah, drove the new cart on which the ark was placed when David first attempted to remove it to Jerusalem. Ahio went before to guide the oxen, while Uzzah walked by the cart (2 Sam. vi. 3, 4) [UZZAH].

AHI'KA (*brother of evil*), chief of the tribe of Naphtali when the Israelites quitted Egypt (Num. i. 15).

AHI'SHAR (*brother of the dawn*), the officer who was 'over the household' of King Solomon (1 Kings iv. 6). This has always been a place of high importance and great influence in the East.

AHIITH'OPHEL (*brother of foolishness*), the very singular name of a man who, in the time of David, was renowned throughout all Israel for his worldly wisdom. He is, in fact, the only man mentioned in the Scriptures as having acquired a reputation for political sagacity among the Jews; and they regarded his counsels as oracles (2 Sam. xvi. 23). He was of the council of David; but was at Giloh, his native place, at the time of Absalom's revolt, whence he was summoned to Jerusalem; and it shows the strength of Absalom's cause in Israel that a man so capable of foreseeing results, and of estimating the probabilities of success, took his side in so daring an attempt (2 Sam. xv. 12). The news of this defection appears to have occasioned David more alarm than any other single incident in the rebellion. He earnestly prayed God to turn the sage counsel of Ahithophel 'to foolishness' (probably alluding to his name); and being immediately after joined by his old friend Hushai, he induced him to go over to Absalom with the express view that he might be instrumental in defeating the counsels of this dangerous person (xv. 31-37). Psalm lv. is supposed to contain (12-14) a further expression of David's feelings at this treachery of one whom he had so completely trusted, and whom he calls, 'My companion, my guide, and my familiar friend.' The detestable advice which Ahithophel gave Absalom to appropriate his father's harem, committed him absolutely to the cause of the young prince, since after that he could hope for no reconciliation with David (2 Sam. xvi. 20-23). His proposal as to the conduct of the war undoubtedly indicated the best course that could have been taken under the circumstances; and so it seemed to the council, until Hushai interposed with his plausible advice, the object of which was to gain time to enable David to collect his resources [ABSALOM]. When Ahithophel saw that his counsel was rejected for that of Hushai, the far-seeing man gave up the cause of Absalom for lost; and he forthwith saddled his ass, returned to his home at Giloh, deliberately settled his affairs, and then hanged himself, and was buried in the sepulchre of his fathers, *a.c.* 1023 (ch. xvii.). This is the only case of suicide which the Old Testament records, unless the last acts of Samson and Saul may be regarded as such.

1. AHI'TUB (*brother of goodness*), son of Phineas, and grandson of the high-priest Eli. His father Phinehas having been slain when the ark of God was taken by the Philistines, he succeeded his grandfather Eli *a.c.* 1141, and was himself succeeded by his son Ahiah about *a.c.* 1093.

2. AHITUB was also the name of the father of Zadok, who was made high-priest by Saul after the death of Ahimelech (2 Sam. viii. 17; 1 Chron. vi. 8). There is not the slightest ground for the notion that this Ahitub was ever high-priest himself—indeed, it is historically impossible.

AHO'LAH (*her tent*) and AHO'LIBAH (*my tent is in her*), two fictitious or symbolical names adopted by Ezekiel (xxiii. 4) to denote the two kingdoms of Samaria (Israel) and Judah. They are both symbolically described as lewd women, adulteresses, prostituting themselves to the Egyptians and the Assyrians, in imitating their abominations and idolatries; wherefore Jehovah abandoned them to those very people for whom they showed such inordinate and impure affection. They were carried into captivity, and reduced to the severest servitude. The allegory is an epitome of the history of the Jewish church.

AHO'LIAB (*tent of his father*), of the tribe of Dan, a skilful artificer appointed along with Bezaleel to construct the Tabernacle (Exod. xxxv. 34).

AHUZZ'ZATH (*possession*), the 'friend' of Abimelech II., king of Gerar, who attended him on his visit to Isaac (Gen. xxvi. 26). In him occurs the first instance of that unofficial but important personage in ancient Oriental courts, called 'the king's friend,' or favourite.

AI (Josh. vii. 2; Gen. xii. 8; Neh. xi. 31; Isa. x. 28), a royal city of the Canaanites, which lay east of Bethel. It existed in the time of Abraham, who pitched his tent between the two cities (Gen. xii. 8; xiii. 3); but it is chiefly noted for its capture and destruction by Joshua (vii. 2-5; viii. 1-29). This, as a military transaction, is noticed elsewhere [AMORCADE]. At a later period Ai was rebuilt, and is mentioned by Isaiah (x. 28), and also after the Captivity. The site was known, and some scanty ruins still existed in the time of Eusebius and Jerome, but Dr. Robinson was unable to discover any certain traces of either.

AIR, the atmosphere, as opposed to the ether, or higher and purer region (Acts xxii. 24; 1 Thess. iv. 17; Rev. ii. 2; xvi. 17). The phrase *to speak into the air* (1 Cor. xiv. 9) is a proverbial expression to denote speaking in vain, and *to beat the air* (1 Cor. ix. 26), denotes acting in vain, and is a proverbial allusion to an abortive stroke into the air in pugilistic contests. The later Jews, in common with the Gentiles, especially the Pythagoreans, believed the air to be peopled with spirits, under the government of a chief, who there held his seat of empire. These spirits were supposed to be powerful, but malignant, and to incite men to evil. The early Christian fathers entertained the same belief, which has indeed come down to our own times.

AJ'ALON, a town and valley in the tribe of Dan (Josh. xix. 42), which was given to the Levites (Josh. xxi. 24; 1 Chron. vi. 69). It was not far from Bethshemesh (2 Chron. xxviii. 18); it was one of the places which Rehoboam fortified (2 Chron. xi. 10), and among the strongholds which the Philistines took from Ahaz (2 Chron. xxviii. 18). But the town, or rather the valley to which the town gave name, derives its chief renown from the circumstance that

when Joshua, in pursuit of the five kings, arrived at some point near Upper Beth-horon, looking back upon Gibeon and down upon the noble valley before him, he uttered the celebrated command: 'Sun, stand thou still on Gibeon, and thou moon, in the valley of Ajalon' (Josh. x. 12). The site of the town has been identified with the small village of Yalo near Beit Ur (Beth-horon), and a broad wady to the north of it appears to be the valley of the same name.

AKRA'BIM (*Scorpion-height*), an ascent, hill, or chain of hills, which, from the name, would appear to have been much infested by scorpions and serpents, as some districts in that quarter certainly were (Deut. viii. 15). It was one of the points which are only mentioned in describing the frontier-line of the Promised Land southward (Judg. i. 36), and has been conjectured to be the same with the mountains of Ak'abah, which bound the great valley of Arabah on the east.

ALABASTER. This word occurs in the New Testament only in the notice of the 'alabaster box,' or rather vessel, of 'ointment of spikenard, very precious,' which a woman broke, and with its valuable contents anointed the head of Jesus, as he sat at supper in Bethany in the house of Simon the leper (Matt. xxvi. 7; Mark xiv. 3). At Alabastron, in Egypt, there was a manufactory of small pots and vessels for holding perfumes, which were made from a stone found in the neighbouring mountains. The Greeks gave to these vessels the name of the

21.

city from which they came. This name was eventually extended to the stone of which they were formed; and at length it was applied without distinction to all perfume vessels, of whatever materials they consisted. It does not, therefore, by any means follow that the alabastron which the woman used at Bethany was really of alabaster: but a probability that it was such arises from the fact, that vessels made of this stone were deemed peculiarly suitable for the most costly and powerful perfumes.

ALEXANDER THE GREAT. This mighty king is named in the opening of the first book of Maccabees, and is alluded to in the prophecies of

Daniel. These, however, are not the best reasons for giving his name a place in this work: he is chiefly entitled to notice here because his military career permanently affected the political state of the Jewish people, as well as their philosophy and literature. It is not our part, therefore, to detail even the outlines of his history, but to point out the causes and nature of this great revolution, and the influence which, formally through Alexander, Greece has exerted over the religious history of the West.

The conquest of Western Asia by Greeks was so thoroughly provided for by predisposing causes, as to be no mere accident ascribable to Alexander as an individual. The personal ge-

22.

nus of the Macedonian hero, however, determined the form and the suddenness of the conquest; and, in spite of his premature death, the policy which he pursued seems to have left some permanent effects.

His respectful behaviour to the Jewish high-priest has been much dwelt on by Josephus (*Antiq.* xi. 8. 4-6), a writer whose trustworthiness has been much overrated. The story has been questioned on several grounds. Some of the results, however, can hardly be erroneous, such as, that Alexander guaranteed to the Jews, not in Judaea only, but in Babylonia and Media, the free observance of their hereditary laws, and on this ground exempted them from tribute every seventh (or sabbatical) year. It is then far from improbable that the politic invader affected to have seen and heard the high-priest in a dream (as Josephus relates), and showed him great reverence, as to one who had declared 'that he would go before him and give the empire of Persia into his hand.'

Immediately after, Alexander invaded and conquered Egypt, and showed to its gods the same respect as to those of Greece. Almost without a pause he founded the celebrated city of Alexandria (B.C. 332), an event which, perhaps more than any other cause, permanently altered the state of the East, and brought about a direct interchange of mind between Greece, Egypt, and Judaea [ALEXANDRIA].

The great founder of Alexandria died in his thirty-second year, B.C. 323. The empire which he then left to be quarrelled for by his generals comprised the whole dominions of Persia, with the homage and obedience of Greece superadded. But on the final settlement which took place after the battle of Ipsus (B.C. 301), Seleucus, the

Greek representative of Persian majesty, reigned over a less extended district than the last Darius. Not only were Egypt and Cyprus severed from the Eastern empire, but Palestine and Cælosyria also fell to their ruler, placing Jerusalem for nearly a century beneath an Egyptian monarch. On this subject, see further under **ANTIOCHUS**.

23.

2. **ALEXANDER**, surnamed **BALAS**, from his mother Bala, a personage who figures in the history of the Maccabees and in Josephus. His extraction is doubtful; but he professed to be the natural son of Antiochus Epiphanes, and in that capacity, out of opposition to Demetrius Soter, he was recognised as king of Syria by the king of Egypt, by the Romans, and eventually by Jonathan Maccabeus, on the part of the Jews (1 Macc. x. 18). Demetrius was not long after slain in battle, and Balas obtained possession of the kingdom. He then sought to strengthen himself by a marriage with the king of Egypt's daughter. Prosperity ruined Alexander; his voluptuousness, debauchery, and misgovernment rendered his reign odious, and encouraged Demetrius Nicator, the eldest son of the late Demetrius Soter, to appear in arms, and claim his father's crown. Alexander took the field against him; but the defection of his father-in-law Ptolemy proved fatal to his cause; he was defeated in a pitched battle, and fled with 500 cavalry to Abœ in Arabia, and sought refuge with the emir Zabdiel. This Arabian murdered his confiding guest in the fifth year of his reign over Syria, and sent his head to Ptolemy, who himself died the same year, *n.c.* 145. Balas left a young son, who was eventually made king of Syria by Tryphon, under the name of Antiochus Theos.

3. **ALEXANDER JANNÆUS**, the first prince of the Maccabean dynasty who assumed the name of king [MACCABEES].

4. **ALEXANDER**, son of Herod the Great and Mariamne [HERODIAN FAMILY].

5. **ALEXANDER**, a Jew of Ephesus, known only from the part he took in the uproar about Diana, which was raised there by the preaching of Paul. As the inhabitants confounded the Jews and Jewish Christians, the former put forward Alexander to speak on their behalf, but he was unable in the tumult to obtain a hearing (Acts xix. 33).

6. **ALEXANDER**, a coppersmith or brazier (mentioned in 1 Tim. i. 20; 2 Tim. iv. 14), who with Hymenæus and others broached certain heresies touching the resurrection, for which they were excommunicated by St. Paul. These per-

sons, and especially Alexander, appear to have maligned the faith they had forsaken, as well as the character of the apostle.

ALEXANDRIA (Acts vi. 9; xviii. 24; xxvii. 6), the chief maritime city and long the metropolis of Lower Egypt. It is situated on the Mediterranean, twelve miles west of the Canopic mouth of the Nile, in 31° 13' N. lat. and 25° 53' E. long. It owes its origin to the comprehensive policy of Alexander, who perceived that the usual channels of commerce might be advantageously altered; and that a city occupying this site could not fail to become the common emporium for the traffic of the eastern and western worlds, by means of the river Nile, and the two adjacent seas, the Red Sea and the Mediterranean; and the high prosperity which, as such, Alexandria very rapidly attained, proved the soundness of his judgment, and exceeded any expectations which even he could have entertained. For a long period Alexandria was the greatest of known cities; for Nineveh and Babylon had fallen, and Rome had not yet risen to pre-eminence; and even when Rome became the mistress of the world, and Alexandria only the metropolis of a province, the latter was second only to the former in wealth, extent, and importance; and was honoured with the magnificent titles of the second metropolis of the world, the city of cities, the queen of the East, a second Rome.

The city was founded in *n.c.* 332, and was built under the superintendence of the same architect (Dinocrates) who had rebuilt the Temple of Diana at Ephesus. The ancient city appears to have been of seven times the extent of the modern. If we may judge from the length of the two main streets (crossing each other at right angles) by which it was intersected, the city was about four miles long by one and a half wide; and in the time of Diodorus it contained a free population of 300,000 persons, or probably 600,000, if we double the former number, as Manner suggests, in order to include the slaves. The port of Alexandria was secure, but difficult of access; in consequence of which, a magnificent pharos, or lighthouse, was erected upon an islet at the entrance, which was connected with the mainland by a dyke. This pharos was accounted one of the 'seven' wonders of the world. It was begun by Ptolemy Soter, and completed under Ptolemy Philadelphus, by Sostratus of Cnidus, *n.c.* 283. It was a square structure of white marble, on the top of which fires were kept constantly burning for the direction of mariners. It was erected at a cost of 800 talents, which, if Attic, would amount to 165,000*l.*, if Alexandrian, to twice that sum. It was a wonder in those times, when such erections were almost unknown; but, in itself, the Eddystone lighthouse is, in all probability, ten times more wonderful.

The business of working out the great design of Alexander could not have devolved on a more fitting person than Ptolemy Soter. From his first arrival in Egypt, he made Alexandria his residence; and no sooner had he some respite from war, then he bent all the resources of his mind to draw to his kingdom the whole trade of the East, which the Tyrians had, up to his time, carried on by sea to Elath, and from thence, by the way of Rhinocorura, to Tyre. He built a

24.

city on the west side of the Red Sea, whence he sent out fleets to all those countries to which the Phœnicians traded from Elath. But, observing that the Red Sea, by reason of rocks and shoals, was very dangerous towards its northern extremity, he transferred the trade to another city, which he founded at the greatest practicable distance southward. This port, which was almost on the borders of Ethiopia, he called, from his mother, Bereuce; but the harbour being found inconvenient, the neighbouring city of Myos Hormos was preferred. Thither the products of the East and South were conveyed by sea; and were from thence taken on camels to Coptus, on the Nile, where they were again shipped for Alexandria, and from that city were dispersed to all the nations of the west, in exchange for merchandise which was afterwards exported to the East. By these means, the whole trade was fixed at Alexandria, which thus became the chief mart of all the traffic between the East and West, and which continued to be the greatest emporium in the world for above seventeen centuries, until the discovery of the passage by the Cape of Good Hope opened another channel for the commerce of the East.

Alexandria became not only the seat of commerce, but of learning and the liberal sciences. This distinction also it owed to Ptolemy Soter, himself a man of education, who founded an academy, or society of learned men, who devoted themselves to the study of philosophy, literature, and science. For their use he made a collection of choice books, which, by degrees, increased under his successors until it became the finest library in the world, and numbered 700,000 volumes. It sustained repeated losses, by fire and otherwise, but these losses were as repeatedly repaired; and it continued to be of great fame

and use in those parts, until it was at length burnt by the Saracens when they made themselves masters of Alexandria in A.D. 642. Undoubtedly the Jews at Alexandria shared in the benefit of these institutions, as the Christians did afterwards; for the city was not only a seat of heathen, but of Jewish, and subsequently of Christian learning. It will be remembered that the celebrated translation of the Hebrew Scriptures into Greek [SEPTUAGINT] was made, under every encouragement from Ptolemy Philadelphus, principally for the use of the Jews in Alexandria, who knew only the Greek language.

At its foundation Alexandria was peopled less by Egyptians than by colonies of Greeks, Jews, and other foreigners. The Jews, however much their religion was disliked, were valued as citizens; and every encouragement was held out by Alexander himself and by his successors in Egypt, to induce them to settle in the new city. The same privileges as those of the first class of inhabitants (the Greeks) were accorded to them, as well as the free exercise of their religion and peculiar usages: and this, with the protection and peace which a powerful state afforded against the perpetual conflicts and troubles of Palestine, and with the inclination to traffic, which had been acquired during the Captivity, gradually drew such immense numbers of Jews to Alexandria, that they eventually formed a very large portion of its vast population, and at the same time constituted a most thriving and important section of the Jewish nation. The Jewish inhabitants of Alexandria are therefore often mentioned in the later history of the nation; and their importance as a section of that nation would doubtless have been more frequently indicated, had not the Jews of Egypt thrown off

their ecclesiastical dependence upon Jerusalem and its temple, and formed a separate establishment of their own, in imitation of it, at a place about twelve miles north of Heliopolis, and called Onion, from Onias, the expelled high-priest, by whom it was founded.

The inhabitants of Alexandria were divided into three classes: 1. The Macedonians, the original founders of the city; 2. the mercenaries who had served under Alexander; 3. the native Egyptians. Through the favour of Alexander and Ptolemy Soter, the Jews were admitted into the first of these classes, and this privilege was so important that it had great effect in drawing them to the new city.

The dreadful persecution which the Jews of Alexandria underwent in A.D. 39, shows that, notwithstanding their long establishment there, no relations of friendliness had arisen between them and the other inhabitants, by whom in fact they were intensely hated. This feeling was so well known, that at the date indicated, the Roman governor Avilius Flaccus, who was anxious to ingratiate himself with the citizens, was persuaded that the surest way of winning their affections was to withdraw his protection from the Jews, against whom the emperor was already exasperated by their refusal to acknowledge his right to divine honours, which he insanely claimed, or to admit his images into their synagogues. In consequence of the connivance of Flaccus, the unfortunate Jews were treated with every species of outrage and insult. Their synagogues were levelled with the ground, consumed by fire, or profaned by the emperor's statues. They were deprived of the rights of citizenship, and declared aliens. Their houses, shops, and warehouses were plundered of their effects, and they themselves were pent up in one narrow corner of the city, where the greater part were obliged to lie in the open air, and where the supplies of food being cut off, many of them died of hardship and hunger; and whoever was found beyond the boundary, whether he had escaped from the assigned limits, or had come in from the country, was seized and put to death with horrid tortures.

At length king Herod Agrippa, who stayed long enough in Alexandria to see the beginning of these atrocities, transmitted to the emperor such a report of the real state of affairs as induced him to send a centurion to arrest Flaccus, and bring him a prisoner to Rome. This put the rioters in a false position, and brought some relief to the Jews; but the tumult still continued, and as the magistrates refused to acknowledge the citizenship of the Jews, it was at length agreed that both parties should send delegates, five on each side, to Rome, and refer the decision of the controversy to the emperor. At the head of the Jewish delegation was the celebrated Philo, to whom we owe the account of these transactions; and at the head of the Alexandrians was the noted Apion. The latter chiefly rested their case upon the fact that the Jews were the only people who refused to consecrate images to the emperor, or to swear by his name. But on this point the Jewish delegates defended themselves so well, that Caligula himself said, 'These men are not so wicked as ignorant and unhappy, in not believing me to be a god!' The

ultimate result of this appeal is not known, but the Jews of Alexandria continued to be harassed during the remainder of Caligula's reign; and their alabarch Alexander Lysimachus (brother of Philo) was thrown into prison, where he remained till he was discharged by Claudius, upon whose accession to the empire the Alexandrian Jews betook themselves to arms. This occasioned such disturbances that they attracted the attention of the emperor, who, at the joint entreaty of Herod and Agrippa, issued an edict conferring on the Jews of Egypt all their ancient privileges. The state of feeling in Alexandria which these facts indicate, was very far from being allayed when the revolt of the Jews in Palestine caused even those of the nation who dwelt in foreign parts to be regarded as enemies, both by the populace and the government. In Alexandria, on a public occasion, they were attacked, and those who could not save themselves by flight were put to the sword. Only three were taken alive, and they were dragged through the city to be consigned to the flames. The indignation of the Jews rose beyond all bounds at this spectacle. They first assailed the Greek citizens with stones, and then rushed with lighted torches to the amphitheatre, to set it on fire and burn all the people who were there assembled. The Roman prefect Tiberius Alexander, finding that milder measures were of no avail, sent out a body of 17,000 soldiers, who slew about 50,000 of the Jews, and plundered and burned their dwellings.

After the close of the war in Palestine, new disturbances were excited in Egypt by the Sicarii, many of whom had fled thither. They endeavoured to persuade the Jews to acknowledge no king but God, and to throw off the Roman yoke. Such persons as opposed their designs and tendered wiser counsels to their brethren, they secretly assassinated, according to their custom. But the principal Jews in Alexandria having in a general assembly earnestly warned the people against these fanatics, who had been the authors of all the troubles in Palestine, about 600 of them were delivered up to the Romans. Several fled into the Thebaid, but were apprehended and brought back. The most cruel tortures which could be devised had no effect in compelling them to acknowledge the emperor for their sovereign; and even their children seemed endowed with souls fearless of death, and bodies incapable of pain. Vespasian, when informed of these transactions, sent orders that the Jewish temple in Egypt should be destroyed. Lupus the prefect, however, only shut it up, after having taken out the consecrated gifts; but his successor Paulinus stripped it completely, and excluded the Jews entirely from it. This was in A.D. 75, being the 343rd year from the building of the temple by Onias.

St. Mark is said to have introduced the Christian religion into Alexandria, which early became one of the strongholds of the true faith. The Jews continued to form a principal portion of the inhabitants, and remained in the enjoyment of their civil rights till A.D. 415, when they incurred the hatred of Cyril the patriarch, at whose instance they were expelled, to the number of 40,000, and their synagogues destroyed. However, when Aurou, in A.D. 640, took the

place for the caliph Omar, he wrote to his master in these terms: 'I have taken the great city of the west, which contains 4000 palaces, 4000 baths, 400 theatres, 12,000 shops for the sale of vegetable food, and 40,000 tributary Jews.' From that time the prosperity of Alexandria very rapidly declined; and when, in 969, the Fatemite caliphs seized on Egypt and built New Cairo, it was speedily reduced to the rank of a secondary Egyptian city. The discovery of the passage to the East by the Cape, in 1497, almost annihilated its remaining commercial importance; and although the commercial and maritime enterprises of Mehemet Ali have again raised it to some distinction, Alexandria must still be accounted as one of those great ancient cities whose glory has departed. The number of Jews does not now exceed 500. The whole population at the present time (1843) is between 36,000 and 40,000, of whom 4876 are foreigners.

ALGUM, or ALMUG TREES (1 Kings x. 11; 2 Chron. ix. 10, 11). With regard to Ophir, the place from which these trees were brought to us, there appears no doubt that it was to the southward of the Red Sea, and was most probably in some part of India. Various trees have been attempted to be identified with the almug, but the balance of evidence seems to be in favour of the sandal-wood, which is known and highly esteemed in India. The tree which produces it is a native of the mountainous parts of the coast of Malabar, where large quantities are cut for export to China, to different parts of India, and to the Persian and Arabian gulfs. The outer parts of this tree are white and without odour; the parts near the root are most fragrant, especially of such trees as grow in hilly situations and stony ground. The trees vary in diameter from 9 inches to a foot, and are about 25 or 30 feet in height, but the stems soon begin to branch. This wood is white, fine-grained, and agreeably fragrant, and is much employed for making rosaries, fans, elegant boxes, and cabinets.

25 [Santalum album.]

As sandal-wood has been famed in the East from very early times, it is more likely than any other to have attracted the notice of, and been desired by, more northern nations.

That it, therefore, might have attained celebrity, even in very early ages, is not at all unlikely; that it should have attracted the notice of Phœnician merchants visiting the west coast of India is highly probable; and also that they should have thought it worthy of being taken as a part of their cargo on their return from Ophir. That it is well calculated for musical instruments is confirmed by the authority of Professor Wheatstone, who says, 'I know no reason why sandal-wood should not have been employed in ancient days for constructing musical instruments. It is not so employed at present, because there are many much cheaper woods which present a far handsomer appearance. Musical instruments would appear very unfinished to modern taste unless varnished or French-polished, and it would be worse than useless to treat fragrant woods in this way. Formerly perhaps it might have been more the fashion to delight the senses of smell and hearing simultaneously than it is with us, in which case odoriferous woods would be preferred for things so much handled as musical instruments are.'

ALLEGORY. This word is found in the Authorized Version of Gal. iv. 24, but it does not actually exist as a noun in the Greek Testament, nor even in the Septuagint. In the passage in question Saint Paul cites the history of the free-born Isaac and the slave-born Ishmael, and in proceeding to apply it spiritually, he says, not as in our version, 'which things are an allegory,' but 'which things are allegorized.' This is of some importance; for in the one case the Apostle is made to declare a portion of Old Testament history an allegory, whereas in truth he only speaks of it as allegorically applied. Allegories themselves are, however, of frequent occurrence in Scripture, although that name is not there applied to them.

An ALLEGORY has been sometimes considered as only a lengthened metaphor; at other times, as a continuation of metaphors. But the nature of allegory itself, and the character of allegorical interpretation, will be best understood by attending to the origin of the term which denotes it. Now the term 'Allegory,' according to its original and proper meaning, denotes a representation of one thing which is intended to excite the representation of another thing. Every allegory must therefore be subjected to a twofold examination: we must first examine the immediate representation, and then consider what other representation it is intended to excite. In most allegories the immediate representation is made in the form of a narrative; and, since it is the object of the allegory itself to convey a moral, not an historic truth, the narrative is commonly fictitious. The immediate representation is of no further value than as it leads to the ultimate representation. It is the application or the moral of the allegory which constitutes its worth.

Every parable is a kind of allegory; and as an example, especially clear and correct, we may refer to the parable of the sower (Luke viii. 5-15). In this we have a plain narrative, a statement of a few simple and intelligible facts, such, probably, as had fallen within the observation of the persons to whom our Saviour addressed himself. When he had finished the narrative, or

the immediate representation of the allegory, he then gave the explanation or ultimate representation of it; that is, he gave the allegorical interpretation of it. And that the interpretation was an interpretation, not of the words, but of the things signified by the words, is evident from the explanation itself: 'The seed is the word of God; those by the wayside are they that hear,' &c. (ver. 11, &c.). The impressive and pathetic allegory addressed by Nathan to David affords a similar instance of an allegorical narrative accompanied with its explanation (2 Sam. xii. 1-14).

But allegorical narratives are frequently left to explain themselves, especially when the resemblance between the immediate and ultimate representation is sufficiently apparent to make an explanation unnecessary. Of this kind we cannot have a more striking example than that beautiful one contained in the 80th Psalm: 'Thou broughtest a vine out of Egypt,' &c.

The use of allegorical interpretation is not, however, confined to mere allegory, or fictitious narratives, but is extended also to history, or real narratives. And in this case the grammatical meaning of a passage is called its *historical* meaning, in contradistinction to its *allegorical* meaning. There are two different modes in which Scripture history has been thus allegorized. According to one mode, facts and circumstances, especially those recorded in the Old Testament, have been applied to other facts and circumstances, of which they have been described as *representative*. According to the other mode, these facts and circumstances have been described as mere *emblems*. The former mode is warranted by the practice of the sacred writers themselves; for when facts and circumstances are so applied, they are applied as *types* of those things to which the application is made: but no such authority in favour of the latter mode of allegorical interpretation can be produced.

ALLELUJA. [HALLELUJAH.]

ALLIANCES. From a dread lest the example of foreign nations should draw the Israelites into the worship of idols, they were made a peculiar and separate people, and intercourse and alliance with such nations were strongly interdicted (Lev. xviii. 3, 4; xx. 22, 23). The tendency to idolatry was in those times so strong, that the safety of the Israelites lay in the most complete isolation that could be realized; and it was to assist this object that a country more than usually separated from others by its natural boundaries was assigned to them. It was shut in by the sea on the west, by deserts on the south and east, and by mountains and forests on the north. Among a people so situated we should not expect to hear much of alliances with other nations.

By far the most remarkable alliance in the political history of the Hebrews is that between Solomon and Hiram king of Tyre, which may primarily be referred to the affection which the latter entertained for David (1 Kings v. 2). He 'sent carpenters and masons' to build David an house (2 Sam. v. 11), and wishing to cultivate the friendly intercourse thus opened with the Hebrew nation, on the death of David he sent an embassy to condole with Solomon on the death of his father, and to congratulate him on his ac-

cession (1 Kings v. 1). The plans of the young king rendered the friendship of Hiram a matter of importance, and accordingly 'a league' was formed (1 Kings v. 12) between them: and that this league had a reference not merely to the special matter then in view, but was a general league of amity, is evinced by the fact that more than 250 years after, a prophet denounces the Lord's vengeance upon Tyre, because she 'remembered not the brotherly covenant' (Amos i. 9). Under this league large bodies of Jews and Phœnicians were associated, first in preparing the materials for the Temple (1 Kings v. 6-18), and afterwards in navigating the Red Sea and the Indian Ocean (1 Kings ix. 26-28). The disastrous consequences of even the seemingly least objectionable alliances may be seen in the long train of evils, both to the kingdom of Israel and of Judah, which ensued from the marriage of Ahab with Jezebel, the king of Tyre's daughter (AHAB; JEZEBEL). These consequences had been manifested even in the time of Solomon; for he formed matrimonial alliances with most of the neighbouring kingdoms, and to the influence of his idolatrous wives are ascribed the abominations which darkened the latter days of the wise king (1 Kings xi. 1-8).

The prophets, who were alive to these consequences, often raised their voices against such dangerous connections (1 Kings xi. 11; 2 Chron. xvi. 7; xix. 2; xxv. 7, &c.; Isa. vii. 17), without effect. The Jewish history, after Solomon, affords examples of several treaties with different kings of Syria, and with the kings of Assyria and Babylon (see 1 Kings xv. 16-20; 2 Kings xvi. 5, &c.; 2 Chron. xxviii. 16, &c.). In later times, the Maccabees appear to have considered themselves unrestrained by any but the ordinary prudential considerations in contracting alliances. The most remarkable alliance of this kind was the treaty made with the Romans by Judas Maccabæus, which, having been concluded at Rome, was given upon brass and deposited in the Capitol (1 Macc. viii. 22-28; Josephus, *Antiq.* xii. 10).

Anterior to the Mosaic institutions, such alliances with foreigners were permitted, or at least tolerated. Abraham was in alliance with some of the Canaanitish princes (Gen. xiv. 13); he also entered into a regular treaty of alliance, being the first on record, with the Philistine king Abimelech (xxi. 22, *sq.*), which was renewed by their sons (xxvi. 26-30). Even after the law, it appears, from some of the instances already adduced, that such alliances with distant nations as could not be supposed to have any dangerous effect upon the religion or morals of the people, were not deemed to be interdicted. The treaty with the Gibeonites is a remarkable proof of this. Believing that the ambassadors came from a great distance, Joshua and the elders readily entered into an alliance with them; and are condemned for it only on the ground that the Gibeonites were in fact their near neighbours (Josh. ix. 3-27).

From the time of the patriarchs, a covenant of alliance was sealed by the blood of some victim. A heifer, a goat, a ram, a turtle dove, and a young pigeon, were immolated in confirmation of the covenant between the Lord and Abraham (Gen. xv. 9). The animal or animals sacrificed

were cut in two (except birds, ver. 10), to typify the doom of perjurers. For allusions to this usage see Jer. xxxiv. 18; Sus. 55, 59; Matt. xxiv. 51; Luke xii. 46. The perpetuity of covenants of alliance thus contracted is expressed by calling them 'covenants of salt' (Num. xviii. 19; 2 Chron. xiii. 5), salt being the symbol of incorruption. The case of the Gibeonites affords an exemplary instance, scarcely equalled in the annals of any nation, of scrupulous adherence to such engagements. The Israelites had been absolutely cheated into the alliance; but, having been confirmed by oaths, it was deemed to be inviolable (Josh. ix. 19). The prophet Ezekiel (xvii. 13-16) pours terrible denunciations upon king Zedekiah, for acting contrary to his sworn covenant with the king of Babylon. In this respect the Jews were certainly most favourably distinguished among the ancient nations; and, from numerous intimations in Josephus, it appears that their character for fidelity to their engagements was so generally recognised after the Captivity, as often to procure for them highly favourable consideration from the rulers of Western Asia and of Egypt.

AL-LON-BACHUTH (*the oak of weeping*), a place in Bethel, where Rebekah's nurse was buried (Gen. xxxv. 8).

AL-MON, one of the three cities which belonged to the priests in the tribe of Benjamin (Josh. xxi. 18). It is supposed to be the same as the Alemeth of 1 Chron. vi. 60.

AL-MON-DIBLATHAIM, one of the stations of the Israelites on their way from Mount Hor to the plains of Moab, round by Mount Seir (Num. xxxiii. 46).

ALMOND TREE (Gen. xliii. 11; Num. xvii. 8; Eccles. xii. 5; Jer. i. 11). This tree is a native of Syria and Palestine, and is highly ornamental from the beauty of its blossoms.

26. [Almond Tree.]

The form of the almond would lead to its selection for ornamental carved work (Exod. xxv. 33, 34; xxxvii. 19), independently of its form-

ing an esteemed esculent, as well as probably yielding a useful oil. In Eccles. xii. 5, it is said, 'The almond tree shall flourish, and the fruit of the caper droop, because man goeth to his long home.' This evidently refers to the profuse flowering and white appearance of the almond tree when in full bloom, and before its leaves appear. It is hence adduced as illustrative of the hoary hairs of age, in the same way as the drooping of the fruit of the caper seems to refer to the hanging down of the head. Dr. Kitto mentions the almond among the first trees that flower in January. 'There are two species of *Amygdalus* in Palestine: the common *almond* tree, and the *peach* tree, and both are this month in blossom in every part of Palestine, on both sides of the Jordan. It was doubtless from this winter blossoming of the almond tree, not less than from the snowy whiteness of the blossoms, that the hoary head of the aged man is, by a beautiful metaphor, said in Scripture to flourish like the almond tree' (*Physic. Hist. of Palestine*).

ALMS. The regulations of the Mosaic law respecting property, and its benign spirit towards the poor, went far to prevent the existence of penury as a permanent condition in society, and, consequently, by precluding beggary, to render the need of almsgiving unnecessary. Poverty, however, considered as a state of comparative want, Moses seems to have contemplated as a probable event in the social frame which he had established; and accordingly, by the appointment of specific regulations, and the enjoining of a general spirit of tender-heartedness, he sought to prevent destitution and its evil consequences (Lev. xxv. 35; Deut. xv. 7, &c.). The great antiquity of the practice of benevolence towards the poor is shown in the very beautiful passage which is found in Job xxix. 13 *et seq.* How high the esteem was in which this virtue continued to be held in the time of the Hebrew monarchy may be learnt from Ps. xli. 1; see also Ps. cxli. 9; Prov. xiv. 31. The progress of social corruption, however, led to the oppression of the poor, which the prophets, after their manner, faithfully reprobated (Isa. lviii. 7); where, among other neglected duties, the Israelites are required to deal their bread to the hungry, and to bring the outcast poor to their house. See also Isa. x. 2; Amos ii. 7; Jer. v. 28; Ezek. xxii. 29.

However favourable to the poor the Mosaic institutions were, they do not appear to have wholly prevented beggary; for the imprecation found in Psalm cix. 10, 'Let his children be vagabonds and beg,' implies the existence of beggary as a known social condition. Begging naturally led to almsgiving, though the language of the Bible does not present us with a term for 'alms' till the period of the Babylonish captivity, during the calamities attendant on which the need probably introduced the practice. From Dan. iv. 27 it would appear that almsgiving had come to be regarded as a means of conciliating God's favour and of warding off evil. At a still later period this idea took a firm seat in the national mind, and alms-deeds were regarded as a mark of distinguished virtue. That begging was customary in the time of the Saviour is clear from Mark x. 46. And that it was usual

for the worshippers, as they entered the temple, to give relief, appears from the context, and particularly from the fine answer to the lame man's entreaty, made by the apostle Peter. The general spirit of Christianity, in regard to succouring the needy, is nowhere better seen than in 1 John iii. 17: 'Whoso hath this world's good, and seeth his brother have need, and shutteth up his bowels from him, how dwelleth the love of God in him?' With the faithful and conscientious observance of the 'royal law' of love, particular manifestations of mercy to the poor seem to be left by Christianity to be determined by time, place, and circumstances; and it cannot be supposed that a religion, one of whose principles is 'that, if any would not work, neither should he eat' (2 Thess. iii. 10), can give any sanction to indiscriminate almsgiving, or intend to encourage the crowd of wandering, idle beggars with which some parts of the world are still infested. The emphatic language employed by the Lord Jesus Christ and others (Luke iii. 11; vi. 30; xi. 41; xii. 33; Matt. vi. 1; Acts ix. 36; x. 2, 4) is designed to enforce the general duty of a merciful and practical regard to the distresses of the indigent; while the absence of ostentation, and even secrecy, which the Saviour enjoined in connection with almsgiving, was intended to correct actual abuses, and bring the practice into harmony with the spirit of the Gospel. In the remarkable reflections of Jesus on the widow's mite (Mark xii. 42) is found a principle of great value, to the effect that the magnitude of men's offerings to God is to be measured by the disposition of mind whence they proceed; a principle which cuts up by the very roots the idea that merit attaches itself to almsgiving as such, and increases in proportion to the number and costliness of our alms-deeds.

One of the earliest effects of the working of Christianity in the hearts of its professors was the care which it led them to take of the poor and indigent in the 'household of faith.' Neglected and despised by the world, cut off from its sympathies, and denied any succour it might have given, the members of the early churches were careful not only to make provision in each case for its own poor, but to contribute to the necessities of other though distant communities (Acts xi. 29; xxiv. 17; 2 Cor. ix. 12). This commendable practice seems to have had its Christian origin in the deeply interesting fact (which appears from John xiii. 29) that the Saviour and his attendants were wont, notwithstanding their own comparative poverty, to contribute out of their small resources something for the relief of the needy.

ALOE'S, the two words which are so rendered occur in several passages of the Old Testament, as in Psalm xlv. 8; Prov. vii. 17; Canticles iv. 14, and evidently mean some odoriferous substance which ought not to be confounded with the bitter and nauseous aloes famed only as a medicine, and which is usually disagreeable in odour and nauseous in taste, and could never have been employed as a perfume. The words referred to seem to indicate a kind of fragrant wood called *Agallochum*, which was brought from India and Arabia. There can be little or no doubt that the same odoriferous wood is intended in John xix. 39, where we are told

that when the body of our Saviour was taken down from the cross, Nicodemus brought myrrh and aloes for the purpose of winding up the body in linen clothes with these spices.

ALPHA (Α), the first letter of the Greek alphabet, corresponding to the Hebrew *Alaph*. Both the Hebrews and the Greeks employed the letters of their alphabets as numerals, and Α (*Alpha* or *Alaph*) therefore denoted one or the first. Hence our Lord says of himself, that he is *Alpha* and *Omega*, i. e. the first and the last, the beginning and the ending, as he himself explains it (Rev. i. 8, 11; xxi. 6; xxii. 13).

1. ALPHÆUS, father of James the Less (Matt. x. 3; Luke vi. 15), and husband of Mary, the sister of our Lord's mother (John xix. 25); for which reason James is called 'the Lord's brother' [BROTHER]. By comparing John xix. 25, with Luke xxiv. 10, and Matt. x. 3, it appears that Alphæus is the same person as Cleophas; Alphæus being his Greek, and Cleophas his Hebrew or Syriac name [NAMES].

2. ALPHÆUS, the father of the evangelist Levi or Matthew (Mark ii. 14).

ALTAR. The first altar we read of in the Bible was that erected by Noah on leaving the ark. Mention is made of altars erected by Abraham (Gen. xii. 7; xiii. 4; xxii. 9); by Isaac (xxvi. 25); by Jacob (xxxiii. 20; xxxv. 1, 3); by Moses (Exod. xvii. 15). After the giving of the law, the Israelites were commanded to make an altar of earth; they were also permitted to employ stones, but no iron tool was to be applied to them. This has been generally understood as an interdiction of sculpture, in order to guard against a violation of the second commandment. Altars were frequently built on high places. Thus Solomon built an high place for Chemosh (1 Kings xi. 7), and Josiah brake down and burnt the high place, and stamped it small to powder (2 Kings xxiii. 15). This practice, however, was forbidden by the Mosaic law (Deut. xii. 13; xvi. 5), except in particular instances, such as those of Gideon (Judg. vi. 26) and David (2 Sam. xxiv. 18). It is said of Solomon 'that he loved the Lord, walking in the statutes of David, his father, only he sacrificed the burnt incense on the high places' (1 Kings iii. 3). Altars were sometimes built on the roofs of houses: in 2 Kings xxiii. 12, we read of the altars that were on the top of the upper chamber of Ahaz. In the tabernacle, and afterwards in the temple, two altars were erected, one for sacrifices, the other for incense: the table for the shew-bread is also sometimes called an altar.

1. The altar of burnt-offering belonging to the tabernacle was a hollow square, five cubits in length and breadth, and three cubits in height; it was made of Shittim-wood [SHITTIM], and overlaid with plates of brass. In the middle there was a ledge or projection, on which the priest stood while officiating; immediately below this, a brass grating was let down into the altar to support the fire, with four rings attached, through which poles were passed, when the altar was removed. As the priests were forbidden to go up by steps to the altar (Exod. xx. 26), a slope of earth was probably made rising to a level with the ledge.

In Exod. xxvii. 3, the following utensils are

mentioned as belonging to the altar, all of which were to be made of brass. (1) pans or dishes to receive the ashes that fell through the grating. (2) shovels for cleaning the altar. (3) vessels for receiving the blood and sprinkling it on the altar. (4) large forks to turn the pieces of flesh or to take them off the fire (see 1 Sam. ii. 13). (5) 'fire-pans,' the same word is elsewhere translated *censers*, Num. xvi. 17; but in Exod. xxv. 38, 'anuff-dishes.'

2. The altar of burnt-offering in Solomon's temple was of much larger dimensions, 'twenty cubits in length and breadth, and ten in height' (2 Chron. iv. 1), and was made entirely of brass. It is said of Asa that he renewed, that is, either *repaired* (in which sense the word is evidently used in 2 Chron. xxiv. 4) or *reconsecrated* the altar of the Lord that was before the porch of the Lord (2 Chron. xv. 8). This altar was removed by king Ahas (2 Kings xvi. 14); it was 'cleansed' by Hezekiah; and in the latter part of Manasseh's reign was rebuilt.

3. Of the altar of burnt-offering in the second temple, the canonical scriptures give us no information excepting that it was erected before the foundations of the temple were laid (Ezra iii. 3, 6) on the same place where it had formerly been built. From the Apocrypha, however, we may infer that it was made, not of brass, but of unhewn stone.

4. The altar of burnt-offering erected by Herod is thus described by Josephus: 'Before this temple stood the altar, fifteen cubits high, and equal both in length and breadth, each of which dimensions was fifty cubits. The figure it was built in was a square, and it had corners like horns, and the passage up to it was by an insensible acclivity from the south. It was formed without any iron tool, nor did any iron tool so much as touch it at any time.' The dimensions of this altar, however, are differently stated in the Mishna. On the south side was an inclined plane, 32 cubits long and 16 cubits broad, made likewise of unhewn stones. A pipe was connected with the south-west horn, through which the blood of the victims was discharged by a subterraneous passage into the brook Kedron. Under the altar was a cavity to receive the drink-offerings, which was covered with a marble slab, and cleansed from time to time. On the north side of the altar several iron rings were fixed to fasten the victims. Lastly, a red line was drawn round the middle of the altar to distinguish between the blood that was to be sprinkled above and below it.

II. The second altar belonging to the Jewish worship was the *altar of incense*, called also the golden altar (Num. iv. 11). It was placed between the table of shew-bread and the golden candlestick, in the most holy place.

1. This altar in the tabernacle was made of Shittim-wood overlaid with gold plates, one cubit in length and breadth, and two cubits in height. It had horns (Lev. iv. 7) of the same materials; and round the flat surface was a border of gold, underneath which were the rings to receive 'the staves made of Shittim-wood, overlaid with gold to bear it withal' (Exod. xxx. 1-5).

2. The altar in Solomon's Temple was similar, but made of cedar (1 Kings vi. 20; vii. 48; 1 Chron. xxviii. 18) overlaid with gold.

3. The altar in the second temple was taken away by Antiochus Epiphanes (1 Macc. i. 21), and restored by Judas Maccabeus (1 Macc. iv. 49). On the arch of Titus there appears no altar of incense.

ALTARS, FORMS OF. In the preceding article the reader is furnished with all the positive information which we possess respecting the altars mentioned in Scripture; but as, with regard to material objects so frequently named as altars, we feel a desire to have distinct images in the mind, some further remarks respecting the forms which they probably bore, may not be unacceptable.

The direction to the Israelites, at the time of their leaving Egypt, to construct their altars of unhewn stones or of earth, is doubtless to be understood as an injunction to follow the usage of their patriarchal ancestors; and not to adopt the customs, full of idolatrous associations, which they had seen in Egypt, or might see in the land of Canaan. As they were also strictly enjoined to destroy the altars of the Canaanites, it is more than probable that the direction was levelled against such usages as those into which that people had fallen. The conclusion deducible from this, that the patriarchal altars were of unhewn stones or of earth, is confirmed by the circumstances under which they were erected, and by the fact that they are always described as being 'built.' The provision that they *might* be made of earth, applies doubtless to situations in which stones could not be easily obtained, as in the open plains and wildernesses. Familiar analogies lead to the inference that the largest stones that could be found in the neighbourhood would be employed to form the altar; but where no large stones could be had, that heaps of smaller ones might be made to serve.

As these altars were erected in the open air, and were very carefully preserved, there is at least a strong probability that some of those ancient monuments of unhewn stone, usually called Druidical remains, which are found in all parts of the world, were derived from the altars of primitive times. These are diversified in their forms; and their peculiar uses have been very much disputed. It is admitted, however, that some of them must have been altars; but the difficulty is, to determine whether these altars are to be sought in the Cromlechs or the Kistvaens. It seems to us that the arguments preponderate in favour of the opinion that the Cromlechs are the representatives of the primitive altars, and that the Kistvaens (stones disposed in a chest-like form) are analogous to the altars of the Jewish ritual and of some of the pagan religions [ARK].

Cromlechs, as is well known, are somewhat in the form of a table, one large stone being supported, in a horizontal or slightly inclined position, upon three or more, but usually three stones, set upright. That they were used as altars is almost instinctively suggested to every one that views them; and this conclusion is strengthened when, as is often the case, we observe a small circular hole through which probably the rope was run by which the victims, when slaughtered, were bound to the altar, as they were to the angular projections or 'horns' of the Jewish altar (Ps. cxviii. 27). It was

27.

natural that where a sufficiency of large stones could not be found, heaps of smaller ones should be employed; and that, when practicable, a large flat stone would be placed on the top, to give a proper level for the fire and the sacrifice. Such are the cairn-altars, of which many still remain; but as they are sometimes found in places where stones of large size might have been obtained, it seems that in later times such altars had a special appropriation; and that the sacred fires were burned on them, and sacrifices offered to Bel, Baal, or the Sun.

28.

The injunction that there should be no ascent by steps to the altar appears to have been imperfectly understood. There are no accounts or figures of altars so elevated in their fabric as to require such steps for the officiating priests; but when altars are found on rocks or hills, the ascent to them is sometimes facilitated by steps cut in the rock. This, therefore, may have been an indirect way of preventing that erection of altars in high places which the Scriptures so often reprobate.

It is usually supposed, however, that the effect of this prohibition was, that the tabernacle altar, like most ancient altars, was so low as to need no ascent; or else that some other kind of ascent was provided. The former is probably right, for the altar was but three cubits high, and was designed to be portable. There is one error in these and other figures of the Jewish altars composed from the descriptions; namely, with regard to the 'horns,' which were placed at the corners, called 'the horns of the altar' (Exod. xxvii. 2; xxix. 12; 1 Kings ii. 28), and to which the victims were tied at the time of sacrifice. The word horn was applied by the Jews as an epithet descriptive of any point projecting in any direction after the manner of a horn (not necessarily like a horn in shape); and there is no reason to doubt that the horns of the successive altars of burnt-offerings resembled those corners projecting upwards which are seen in many ancient altars. These are shown in the view depicting the probable form of the Jewish altar of burnt-offerings.

By the time of Solomon it appears to have

29.

been understood that the interdiction of steps of ascent did not imply that the altar was to be low, but rather that it was to be high, and that only a particular mode of ascent was forbidden. The altar of the temple was not less than ten cubits high, and some means of ascent must have been provided. The usual representations of Solomon's altar are formed chiefly from the descriptions of that in Herod's temple given by Josephus and the Rabbins; and although this last was almost one-third higher and larger than the other, it was doubtless upon the same model. The altar of the first temple had been seen, and could be described, by many of those who were present when that of the second temple was erected; and the latter was known to those by whom Herod's altar was built. Very different figures, however, have been formed from these descriptions, and that which we here introduce is perhaps the best and most probable of them.

30.

THE ALTAR OF INCENSE, being very simple in its parts and uses, has been represented with so little difference, except in some ornamental details, that one of the figures designed from the descriptions may suffice.

It is not our object to describe the altars of other nations; but, to supply materials for comparison and illustration, a group of the altars of the principal nations of Oriental and classical antiquity is here introduced. One obvious remark occurs, namely, that all the Oriental altars are square or oblong, whereas those of Greece

31.

and Rome are more usually round; and that, upon the whole, the Hebrew altars were in accordance with the general Oriental type. In all of them we observe bases with corresponding projections at the top; and in some we find the true model of the 'horns,' or prominent and pointed angles.

32. [1, 2, 3, Greek. 4, Egyptian. 5, Babylonian. 6, Roman. 7, 8, Persian.]

ALTAR AT ATHENS. St. Paul, in his admired address before the judges of the Areopagus at Athens, declares that he perceived that the Athenians were in all things too superstitious, for that, as he was passing by and beholding their devotions, he found an altar, inscribed, 'TO THE UNKNOWN GOD'; and adds, with unexpected force, 'Him whom ye worship without knowing, I set forth unto you' (Acts xvii. 22, 23). The questions suggested by the mention of an altar at Athens, thus inscribed 'to the unknown God,' have engaged much attention. Different opinions have been entertained on the subject, and various conjectures made regarding it. No certain information, however, can now be obtained respecting the precise reference of the apostle,

and we are content to rest in the conclusion of Professor Robinson: 'So much at least is certain, that altars to an unknown god or gods existed at Athens. But the attempt to ascertain definitively whom the Athenians worshipped under this appellation must ever remain fruitless for want of sufficient data. The inscription afforded to Paul a happy occasion of proclaiming the Gospel; and those who embraced it found indeed that the being whom they had thus "ignorantly worshipped," was the one only living and true God.'

ALUSH, one of the places at which the Hebrews rested on their way to Mount Sinai (Num. xxxiii. 13). It was between Dophkah and Rephidim. The Jewish Chronology makes it twelve miles from the former and eight from the latter station.

AMALEK, a son of Eliphaz (the first-born of Esau) by his concubine Timna; he was the chieftain, or Emir, of an Idumæan tribe (Gen. xxxvi. 16).

AM'ALEKITES, the name of a nation inhabiting the country to the south of Palestine between Idumæa and Egypt, and to the east of the Dead Sea and Mount Seir. 'The Amalekite dwell in the land of the south' (Num. xiii. 29). 'Saul smote the Amalekites from Havilah until thou comest to Shur, that is over against Egypt' (1 Sam. xv. 7). 'David went up and invaded the Geshurites, and Gezrites, and the Amalekites for those nations were of old the inhabitants of the land as thou goest to Shur, even unto the land of Egypt' (1 Sam. xxvii. 8). In 1 Chron. iv. 42, it is said that the sons of Simeon went to Mount Seir and smote the rest of the Amalekites that were escaped. According to Josephus the Amalekites inhabited Gobelitis and Petra, and were the most warlike of the nations in those parts: and elsewhere he speaks of them as 'reaching from Pelusium of Egypt to the Red Sea.' We find, also, that they had a settlement in that part of Palestine which was allotted to the tribe of Ephraim. The first mention of the Amalekites in the Bible is Gen. xiv. 7; Chedorlaomer and his confederates returned and came to En-Mishpat, which is Kadesh, and smote all the country of the Amalekites, and also the Amorites that dwelt in Hazezon-tamar. The Amalekites were the first assailants of the Israelites after their passage through the Red Sea (Exod. xvii.). It has been thought improbable that in so short a period the descendants of Esau's grandson could have been sufficiently numerous and powerful to attack the host of Israel; but within nearly the same period the tribe of Ephraim had increased so that it could muster 40,500 men able to bear arms, and Manasseh 32,200: and admitting in the case of the Israelites an extraordinary rate of increase (Exod. i. 12, 20), still, if we consider the prostrating influence of slavery on the national character, and the absence of warlike habits, it is easy to conceive that a comparatively small band of marauders would be a very formidable foe to an undisciplined multitude, circumstanced as the Israelites were, in a locality so adapted to irregular warfare. It appears too that the attack was made on the most defenceless portion of the host. 'Remember (said Moses) what Amalek did unto thee by the way when ye were come

forth out of Egypt; how he met thee by the way and smote the hindmost of thee, even all that were feeble behind thee, when thou wast faint and weary' (Deut. xxv. 17, 18). In the Pentateuch the Amalekites are frequently mentioned in connection with the Canaanites (Num. xiv. 25, 43, 45), and, in the book of Judges, with the Moabites and Ammonites (Judg. iii. 13); with the Midianites (Judg. vi. 3; vii. 12; 'The Midianites, and the Amalekites, and all the children of the East lay along in the valley like grasshoppers for multitude; and their camels were without number, as the sand by the sea-side for multitude'); with the Kenites (1 Sam. xv. 6). By divine command, as a retribution for their hostility to the Israelites on leaving Egypt (1 Sam. xv. 2), Saul invaded their country with an army of 210,000 men, and 'utterly destroyed all the people with the edge of the sword,' but he preserved their king Agag alive, and the best of the cattle, and by this act of disobedience forfeited the regal authority over Israel. About twenty years later they were attacked by David during his residence among the Philistines (1 Sam. xxvii.). It is said 'that he smote the land and left neither man nor woman alive'; this language must be taken with some limitation, for shortly after the Amalekites were sufficiently recovered from their defeat to make reprisals, and burnt Ziklag with fire (1 Sam. xxx.). David, on his return from the camp of Achish, surprised them while celebrating their success, 'eating, and drinking, and dancing,' and 'smote them from twilight even unto the evening of the next day, and there escaped not a man of them save 400 young men which rode upon camels, and fled' (1 Sam. xxx. 17). At a later period, we find that David dedicated to the Lord the silver and gold of Amalek and other conquered nations (2 Sam. viii. 12). The last notice of the Amalekites as a nation is in 1 Chron. iv. 43, from which we learn that in the days of Hezekiah, king of Judah, 500 men of the sons of Simeon 'went to Mount Seir, and smote the rest of the Amalekites that were escaped.'

In the book of Esther, Haman is called the Agagite, and was probably a descendant of the royal line (Num. xxiv. 7; 1 Sam. xv. 8). Josephus says that he was by birth an Amalekite.

AMANA, a mountain mentioned in Cant. iv. 8. Some have supposed it to be Mount Amanus in Cilicia, to which the dominion of Solomon is alleged to have extended northward. But the context, with other circumstances, leaves little doubt that this Mount Amanus was rather the southern part or summit of Anti-Libanus, and was so called perhaps from containing the sources of the river Amanus [ABANA].

1. AMARIAH (*whom Jehovah said*, i. e. *promised*), equivalent to the Greek name Theophrastus, mentioned in 1 Chron. vi. 7, in the list of the descendants of Aaron by his eldest son Eleazer. He was the son of Meraioth and the father of Ahitub, who was (not the grandson and successor of Eli of the same name, but) the father of that Zadok in whose person Saul restored the high-priesthood to the line of Eleazer. The years during which the younger line of Ithamar enjoyed the pontificate in the persons of Eli, Ahitub, and Abimelech (who was slain by king Saul at Nob) doubtless more than cover the time

of Amariah and his son Ahitub; and it is therefore sufficiently certain that they never were high-priests in fact, although their names are given to carry on the direct line of succession to Zadok.

2. AMARIAH, high-priest at a later period, the son of Azariah, and also father of a second Ahitub (1 Chron. vi. 11). In like manner, in the same list, there are three high-priests bearing the name of Azariah.

3. AMARIAH, great-grandfather of the prophet Zeplaniah (Zeph. i. 1).

1. AMASA (*burden*), son of Abigail, a sister of king David. As his name does not occur prior to Absalom's rebellion (2 Sam. xvii. 25), he must have been neglected by David in comparison with Joab and Abishai, the sons of his other sister Zeruiah, who had before then been raised to great power and influence. This apparent estrangement may perhaps be connected with the fact that Abigail had married an Ishmaelite called Jethier, who was the father of Amasa. This is the more likely, as the fact is pointedly mentioned (1 Chron. ii. 17), or covertly indicated (2 Sam. xvii. 25) whenever the name of Abigail occurs, whereas we are quite ignorant who was the husband of the other sister, Zeruiah, and father of her distinguished sons. We may thus form a conjecture of the grounds on which Amasa joined Absalom, and obtained the command of the rebel army. He was defeated by his cousin Joab, who commanded the army of David. This transaction appears to have made David sensible of the neglect with which Amasa had been treated; and he eventually offered him not only pardon, but the command of the army in the room of Joab (2 Sam. xix. 13), whose overbearing conduct had become intolerable to him, and to whom he could not entirely forgive the death of Absalom. David, however, was too good a soldier himself to have made this offer, had not Amasa, notwithstanding his defeat, displayed high military qualities during his command of Absalom's army. But on the breaking out of Sheba's rebellion, Amasa was so tardy in his movements (probably from the reluctance of the troops to follow him), that David despatched Abishai with the household troops in pursuit of Sheba, and Joab joined his brother as a volunteer. When they reached 'the great stone of Gibeon,' they were overtaken by Amasa with the force he had been able to collect. Joab thought this a favourable opportunity of getting rid of so dangerous a rival, and immediately executed the treacherous purpose he had formed. He saluted Amasa, asked him of his health, and took his beard in his right hand to kiss him, while with the unheeded left hand he smote him dead with his sword. Joab then put himself at the head of the troops, and continued the pursuit of Sheba; and such was his popularity with the army, that David was unable to remove him from the command, or to call him to account for this bloody deed: B.C. 1022 [ABNER; ABSALOM; JOAB].

2. AMASA, a chief of Ephraim, who, with others, vehemently resisted the retention as prisoners of the persons whom Pekah, king of Israel, had taken captive in a successful campaign against Ahaz, king of Judah (2 Chron. xxviii. 12).

AMASA'I, the principal leader of a considerable body of men from the tribes of Judah and Benjamin, who joined David at Ziklag. The words with which David received them indicate some apprehension, which was instantly dissipated by a fervent declaration of attachment from Amasai (1 Chron. xii. 16-18).

1. AMAZIAH (*whom Jehovah strengthens*, i. e. *God-strengthened*), son of Joash, and eighth king of Judah. He was 25 years old when he began to reign, and he reigned 29 years—from B.C. 838 to B.C. 809. He commenced his sovereignty by punishing the murderers of his father; and it is mentioned that he respected the law of Moses, by not including the children in the doom of their parents, which seems to show that a contrary practice had previously existed. In the twelfth year of his reign Amaziah attempted to re-impose upon the Edomites the yoke of Judah, which they had cast off in the time of Jehoram. The strength of Edom is evinced by the fact that Amaziah considered the unaided strength of his own kingdom unequal to this undertaking, and therefore hired an auxiliary force of 100,000 men from the king of Israel for 100,000 talents of silver. This is the first example of a mercenary army that occurs in the history of the Jews. It did not, however, render any other service than that of giving Amaziah an opportunity of manifesting that he knew his true place in the Hebrew constitution, as the viceroy and vassal of the king JEHOVAH [KING]. A prophet commanded him, in the name of the Lord, to send back the auxiliaries, on the ground that the state of alienation from God in which the kingdom of Israel lay, rendered such assistance not only useless but dangerous. The king obeyed this seemingly hard command, and sent the men home, although by doing so he lost not only their services and the 100,000 talents, which had been already paid, but incurred the resentment of the Israelites, who were naturally exasperated at the indignity shown to them.

But the obedience of Amaziah was rewarded by a great victory over the Edomites, ten thousand of whom were slain in battle, and ten thousand more were savagely destroyed by being hurled down from the high cliffs of their native mountains. But the Edomites afterwards were avenged; for among the goods which fell to the conqueror were some of their idols, which, although impotent to deliver their own worshippers, Amaziah betook himself to worship. This proved his ruin. Puffed up by his late victories, he thought also of reducing the ten tribes under his dominion. In this attempt he was defeated by king Joash of Israel, who carried him a prisoner to Jerusalem. Joash broke down great part of the city wall, plundered the city, and even laid his hands upon the sacred things of the temple. He, however, left Amaziah on the throne, but not without taking hostages for his good behaviour. The disasters which Amaziah's infatuation had brought upon Judah probably occasioned the conspiracy in which he lost his life. On receiving intelligence of this conspiracy he hastened to throw himself into the fortress of Lachish; but he was pursued and slain by the conspirators, who brought back his body 'upon horses' to Jerusalem for interment in the royal sepulchre (2 Kings xiv.; 2 Chron. xxv.).

2. AMAZIAH, the priest of the golden calves at Bethel, in the time of Jeroboam II. He complained to the king of Amos's prophecies of coming evil, and urged the prophet himself to withdraw into the kingdom of Judah and prophesy there (Amos vii. 10-17).

AMBER. The substance thus designated in the Authorized Version is in Hebrew called CHASMI, and was probably a composition of several sorts of metal, since even the term by which the word is rendered by the Greeks frequently signifies a composition of gold and silver. The ancients were acquainted with the art of amalgamating various species of metal; and the Latin *aurichalcum* is said to have possessed the *brightness of gold* and the *hardness of copper*, and might not improbably have been our present *platina*, which has been re-discovered in the Ural mountains, after having long been known as an American fossil. It is not improbable that this was the metal termed 'fine copper' (Ezra viii. 27).

AMBIDEXTER, one who can use the left hand as well as the right, or, more literally, one whose hands are both right hands. It was long supposed that both hands are naturally equal, and that the preference of the right hand, and comparative incapacity of the left, are the result of education and habit. But it is now known that the difference is really physical, and that the ambidexterous condition of the hands is not a natural development.

The capacity of equal action with both hands was highly prized in ancient times, especially in war. Among the Hebrews this quality seems to have been most common in the tribe of Benjamin, as all the persons noticed as being endued with it were of that tribe. By comparing Judg. iii. 15, xx. 16, with 1 Chron. xii. 2, we may gather that the persons mentioned in the two former texts as 'left-handed,' were really ambidexters. In the latter text we learn that the Benjamites who joined David at Ziklag were 'mighty men, helpers of the war. They were armed with bows, and could use both the right hand and the left in hurling [slinging] and shooting arrows out of a bow.' There were thirty of them; and as they appear to have been all of one family, it might almost seem as if the greater commonness of this power among the Benjamites arose from its being an hereditary peculiarity of certain families in that tribe. It may also partly have been the result of cultivation; for although the left hand is not naturally an equally strong and ready instrument as the right hand, it may doubtless be often rendered such by early and suitable training.

AMEN. This word is strictly an adjective, signifying 'firm,' and, metaphorically, 'faithful.' Thus in Rev. iii. 14, our Lord is called 'the amen, the faithful and true witness.' In Isa. lxxv. 16, the Heb. has 'the God of amen,' which our version renders 'the God of truth,' i. e. of *fidelity*. In its adverbial sense Amen means *certainly, truly, surely*. It is used in the beginning of a sentence by way of emphasis—rarely in the Old Test. (Jer. xxviii. 6), but often by our Saviour in the New, where it is commonly translated 'Verily.' In John's gospel alone it is often used by him in this way double, i. e. 'verily, verily.' In the end of a sentence it often occurs singly or repeated, especially at the end of

hymns or prayers; as 'amen and amen' (Ps. xli. 13; lxxii. 19; lxxxix. 52). The proper signification of it in this position is to confirm the words which have preceded, and invoke the fulfilment of them: 'so be it.' Hence in oaths, after the priest has repeated the words of the covenant or imprecation, all those who pronounced the *amen* bound themselves by the oath (Num. v. 22; Deut. xxvii. 15, 26; Neh. v. 13; viii. 6; 1 Chron. xvi. 36; comp. Ps. cvi. 48).

AMETHYST. The word thus translated in the common version is in Hebrew *ACHLAMAH*, and is the name of the precious stone mentioned in Scripture as the ninth in the breastplate of the high-priest (Exod. xxviii. 19; xxxix. 12): in the New Testament the precise word *amethyst* (which is Greek) designates the twelfth stone in the foundations of the New Jerusalem (Rev. xxi. 20).

The transparent gems called amethysts are of a colour which seems composed of a strong blue and deep red; and according as either of these prevails, exhibit different tinges of purple, sometimes approaching to violet, and sometimes declining even to a rose colour. All the varieties of it are comprehended under two species, the *Oriental Amethyst* and the *Occidental Amethyst*. The Oriental amethyst is very scarce, and of great hardness, lustre, and beauty. It is in fact a rare variety of the adamantine spar, or corundum. Next to the diamond, it is the hardest substance known. It contains about 90 per cent. of alumina, a little iron, and a little silica. Of this species, emery, used in cutting and polishing glass, &c., is a granular variety. To this species also belongs the sapphire, the most valuable of gems next to the diamond; and of which the Oriental amethyst is merely a violet variety. Like other sapphires, it loses its colour in the fire, and comes out with so much of the lustre and colour of the diamond, that the most experienced jeweller may be deceived by it.

The more common, or Occidental amethyst, is a variety of quartz, or rock crystal, and is found in various forms in many parts of the world, as India, Siberia, Sweden, Germany, Spain; and even in England very beautiful specimens of tolerable hardness have been discovered. This also loses its colour in the fire.

Amethysts were much used by the ancients for rings and amulets; and the reason given by Pliny—because they were easily cut—shows that the Occidental species is to be understood. The ancients believed that the amethyst possessed the power of dispelling drunkenness in those who wore or touched it, and hence its Greek name. In like manner, the Rabbins derive its Jewish name from its supposed power of procuring dreams to the wearer.

1. **AMINADAB** (*kindred of the prince*), one of the ancestors of David and of Christ (Matt. i. 4). He was the son of Aram, and the father of Naasson, and of Elisheba, who became the wife of Aaron (Exod. vi. 23).

2. **AMINADAB**, in Cant. vi. 12. The chariots of this Aminadab are mentioned as proverbial for their swiftness. Of himself we know nothing more than what is here glanced at, from which he appears to have been, like Jehu, one of the most celebrated charioteers of his day.

AM'MAN. [RABBAH.]

AM'MON. [No AMMON.]

AMMONITES, the descendants of the younger son of Lot (Gen. xix. 38). They originally occupied a tract of country east of the Amorites, and separated from the Moabites by the river Arnon. It was previously in the possession of a gigantic race called Zamzummins (Deut. ii. 20), 'but the Lord destroyed them before the Ammonites, and they succeeded them and dwelt in their stead.' The Israelites on reaching the borders of the Promised Land, were commanded not to molest the children of Ammon, for the sake of their progenitor Lot. But, though thus preserved from the annoyance which the passage of such an immense host through their country might have occasioned, they showed them no hospitality or kindness; they were therefore prohibited from 'entering the congregation of the Lord' (i. e. from being admitted into the civil community of the Israelites) 'to the tenth generation for ever' (Deut. xxiii. 3). This is evidently intended to be a perpetual prohibition, and was so understood by Nehemiah (Neh. xiii. 1). The first mention of their active hostility against Israel occurs in Judges iii. 13. About 140 years later we are informed that the children of Israel forsook Jehovah and served the gods of various nations, including those of the children of Ammon, and the anger of Jehovah was kindled against them, and he sold them into the hands of the Philistines and of the children of Ammon. The Ammonites crossed over the Jordan, and fought with Judah, Benjamin, and Ephraim, so that 'Israel was sore distressed.' In answer to Jephthah's messengers (Judg. xi. 12), the king of Ammon charged the Israelites with having taken away that part of his territories which lay between the rivers Arnon and Jabbok, which, in Joshua xiii. 25, is called 'half the land of the children of Ammon,' but was in the possession of the Amorites when the Israelites invaded it; and this fact was urged by Jephthah, in order to prove that the charge was ill-founded. Jephthah 'smote them from Aroer to Minnith, even twenty cities, with a very great slaughter' (Judg. xi. 33). The Ammonites were again signally defeated by Saul (b.c. 1095) (1 Sam. xi. 11), and, according to Josephus, their king Nahash was slain. His successor, who bore the same name, was a friend of David, and died some years after his accession to the throne. In consequence of the gross insult offered to David's ambassadors by his son Hanun (2 Sam. x. 4), a war ensued, in which the Ammonites were defeated, and their allies the Syrians were so daunted 'that they feared to help the children of Ammon any more' (2 Sam. x. 19). In the following year David took their metropolis, Rabbah, and great abundance of spoil, which is probably mentioned by anticipation in 2 Sam. viii. 12 (2 Sam. x. 14; xii. 26-31). In the reign of Jehoshaphat (b.c. 896) the Ammonites joined with the Moabites and other tribes belonging to Mount Seir, to invade Judah; but, by the divine intervention, were led to destroy one another. Jehoshaphat and his people were three days in gathering the spoil (2 Chron. xx. 25). The Ammonites 'gave gifts' to Uzziah (2 Chron. xxvi. 8), and paid a tribute to his son Jotham for three successive years, consisting of 100 talents of silver, 1000

measures of wheat, and as many of barley. When the two and a half tribes were carried away captive, the Ammonites took possession of the towns belonging to the tribe of Gad (Jerem. xlix. 1). 'Bands of the children of Ammon' and of other nations came up with Nebuchadnezzar against Jerusalem (B.C. 607), and joined in exulting over its fall (Ezek. xxv. 3, 6). Yet they allowed some of the fugitive Jews to take refuge among them, and even to intermarry (Jer. xl. 11; Neh. xiii. 23). On the return of the Jews from Babylon the Ammonites manifested their ancient hostility by deriding and opposing the rebuilding of Jerusalem (Neh. iv. 3, 7, 8). Both Ezra and Nehemiah expressed vehement indignation against those Jews who had intermarried with the heathen, and thus transgressed the divine command (Deut. vii. 3; Ezra x.; Neh. xiii. 25). Judas Maccabeus (B.C. 164) fought many battles with the Ammonites, and took Jazer with the towns belonging to it. Justin Martyr affirms that in his time the Ammonites were still numerous.

The national idol of the Ammonites was Molech or Milcom, whose worship was introduced among the Israelites by the Ammonitish wives of Solomon (1 Kings xi. 5, 7); and the high places built by that sovereign for this 'abomination' were not destroyed till the reign of Josiah (B.C. 610) (2 Kings xxiii. 13).

Besides Nahash and Hanun, an Ammonitish king Baalis is mentioned by Jeremiah (xl. 14).

In the writings of the prophets terrible denunciations are uttered against the Ammonites on account of their rancorous hostility to the people of Israel; and the destruction of their metropolis, Rabbah, is distinctly foretold (Zeph. ii. 8; Jer. xlix. 1-6; Ezek. xxv. 1-5, 10; Amos i. 13-15).

AM'NON (*faithful*), the eldest son of David, by Ahinoam of Jezreel. He was born at Hebron, about B.C. 1056. He is only known for his atrocious conduct towards his half-sister Tamar, which her full-brother Ahsalom revenged two years after, by causing him to be assassinated while a guest at his table, in B.C. 1032 (2 Sam. xiii.) [ABSA'LOM].

A'MON (Jer. xli. 25) is the name of an Egyptian god, in whom the classical writers unanimously recognise their own Zeus and Jupiter. His chief temple and oracle in Egypt

were at Thebes, a city peculiarly consecrated to him, and which is probably meant by the No and No Amon of the prophets. He is generally represented on Egyptian monuments by the seated figure of a man with a ram's head, or by that of an entire ram, and of a blue colour. In honour of him, the inhabitants of the Thebaid abstained from the flesh of sheep, but they annually sacrificed a ram to him and dressed his image in the hide.

As for the power which was worshipped under the form of Amon, it has been asserted that the Libyans adored the setting sun under that of their Ammon; others have endeavoured to prove that Amon represented the sun at the vernal equinox. But nothing very definite is known upon the subject, though the fact seems placed beyond a doubt that Amon bears some relation to the sun.

AMON (*artificer*), son of Manasseh, and fourteenth king of Judah, who began to reign B.C. 641, and reigned two years. He appears to have derived little benefit from the instructive example which the sin, punishment, and repentance of his father offered; for he restored idolatry, and again set up the images which Manasseh had cast down. He was assassinated in a court conspiracy: but the people put the regicides to death, and raised to the throne his son Josiah, then but eight years old (2 Kings xxi. 19-26; 2 Chron. xxxiii. 21-25).

AMORITES, the descendants of one of the sons of Canaan. They were the most powerful and distinguished of the Canaanitish nations. We find them first noticed in Gen. xiv. 7. In the promise to Abraham (Gen. xv. 21), the Amorites are specified as one of the nations whose country would be given to his posterity. But at that time three confederates of the patriarch belonged to this tribe; Mamre, Aner, and Eshcol (Gen. xiv. 13, 24). When the Israelites were about to enter the promised land, the Amorites occupied a tract on both sides of the Jordan. That part of their territories which lay to the east of the Jordan was allotted to the tribes of Reuben, Gad, and half the tribe of Manasseh. They were under two kings—Sihon, king of Heshbon, and Og, king of Bashan (Deut. i. 4; Josh. xii. 4; xiii. 12). Before hostilities commenced messengers were sent to Sihon, requesting permission to pass through his land; but Sihon refused, and came to Jahaz and fought with Israel; and Israel smote him with the edge of the sword, and possessed his land from Arnon (Modjeh) unto Jabbok (Zerka) (Num. xxi. 24). Og also gave battle to the Israelites at Edrei, and was totally defeated. After the capture of Ai, five kings of the Amorites, whose dominions lay within the allotment of the tribe of Judah, leagued together to wreak vengeance on the Gibeonites for having made a separate peace with the invaders. Joshua, on being apprised of their design, marched to Gibeon and defeated them with great slaughter (Josh. x. 10). Another confederacy was shortly after formed on a still larger scale; the associated forces are described as 'much people, even as the sand upon the sea-shore in multitude, with horses and chariots very many' (Josh. xi. 4). Joshua came suddenly upon them by the waters of Merom (the modern lake Huleh), and Israel

smote them until they left none remaining (Josh. xi. 8). Still, after their severe defeats, the Amorites, by means of their war-chariots and cavalry, confined the Danites to the hills, and would not suffer them to settle in the plains: they even succeeded in retaining possession of some of the mountainous parts (Judg. i. 34-36). It is mentioned as an extraordinary circumstance that in the days of Samuel there was peace between Israel and the Amorites (1 Sam. vii. 14). In Solomon's reign a tribute of bond-service was levied on the remnant of the Amorites and other Canaanitish nations (1 Kings ix. 21; 2 Chron. viii. 8).

A'MOS (*borne*), one of the twelve minor prophets, and a contemporary of Isaiah and Hosea. He was a native of Tekoah, about six miles south of Bethlehem, inhabited chiefly by shepherds, to which class he belonged, being also a dresser of sycamore-trees. The period during which he filled the prophetic office was of short duration, unless we suppose that he uttered other predictions which are not recorded. It is stated expressly that he prophesied in the days of Uzziah, king of Judah, and in the days of Jeroboam, the son of Joash, king of Israel, two years before the earthquake (Amos i. 1). As Uzziah and Jeroboam were contemporaries for about fourteen years, from B.C. 798 to 784, the latter of these dates will mark the period when Amos prophesied.

When Amos received his commission, the kingdom of Israel, which had been 'cut short' by Hazael (2 Kings x. 32) towards the close of Jehu's reign, was restored to its ancient limits and splendour by Jeroboam the Second (2 Kings xiv. 25). But the restoration of national prosperity was followed by the prevalence of luxury, licentiousness, and oppression, to an extent that again provoked the divine displeasure, and Amos was called from the sheep-folds to be the barbing of the coming judgments. Not that his commission was limited entirely to Israel. The thunder-storm (as Ruckert poetically expresses it) rolls over all the surrounding kingdoms, touches Judah in its progress, and at length settles upon Israel. Chap. i.; ii. 1-5, form a solemn prelude to the main subject; nation after nation is summoned to judgment. Israel is then addressed in the same style, and in chap. iii. (after a brief rebuke of the twelve tribes collectively) its degenerate state is strikingly portrayed, and the denunciations of divine justice are intermingled, like repeated thunder-claps, to the end of chap. vi. The seventh and eighth chapters contain various symbolical visions, with a brief historical episode (vii. 10-17). In the ninth chapter the majesty of Jehovah and the terrors of his justice are set forth with a sublimity of diction which rivals and partly copies that of the royal Psalmist (comp. vers. 2, 3, with Ps. cix., and ver. 6 with Ps. civ.). Towards the close the scene brightens, and from the eleventh verse to the end the promises of the divine mercy and returning favour to the chosen race are exhibited in imagery of great beauty taken from rural life.

The writings of this prophet afford clear evidence that the existing religious institutions both of Judah and Israel (with the exception of the corruptions introduced by Jeroboam) were

framed according to the rules prescribed in the Pentateuch, a fact which furnishes a conclusive argument for the genuineness of the Mosaic records.

The canonicity of the book of Amos is amply supported both by Jewish and Christian authorities. Philo, Josephus, and the Talmud include it among the minor prophets. It is also in the catalogues of Melito, Jerome, and the 60th canon of the Council of Laodicea. Justin Martyr quotes a considerable part of the 5th and 6th chapters, which he introduces by saying, — 'Hear how he speaks concerning these by Amos, one of the twelve.' There are two quotations from it in the New Testament: the first (v. 25, 26) by the proto-martyr Stephen, Acts vii. 42; the second (ix. 11) by the apostle James, Acts xv. 16.

A'MOSIS, an Egyptian monarch, the founder of the eighteenth dynasty, who ascended the throne in B.C. 1575. The period of his accession, and the change which then took place in the reigning family, strongly confirm the opinion of his being the 'new king who knew not Joseph' (Exod. i. 8); and if it be considered that he was from the distant province of Thebes, it is reasonable to expect that the Hebrews would be strangers to him, and that he would be likely to look upon them with the same distrust and contempt with which the Egyptians usually regarded foreigners.

AMPHIPOLIS, a city of Greece, through which Paul and Silas passed on their way from Philippi to Thessalonica (Acts xvii. 1). It was situated on the left bank of the river Strymon just below its egress from the lake Kerkine (now Takino), and about three miles above its influx into the sea. This situation upon the banks of a navigable river, a short distance from the sea, with the vicinity of the woods of Kerkine, and the gold-mines of Mount Pangæus, rendered Amphipolis a place of much importance, and an object of contest between the Thracians, Athenians, Macedonians, and Macedonians, to whom it successively belonged. It has long been in ruins; and a village of about one hundred houses, called Jeni-keui, now occupies part of its site.

AM'TAM, son of Kohath, of the tribe of Levi. He married his father's sister Jochebed, by whom he had Aaron, Miriam, and Moses. He died in Egypt, at the age of 137 years (Exod. vi.).

AM'RAPHEL, king of Shinar, one of the four kings who invaded Palestine in the time of Abraham (Gen. xiv. 1, 2, sq.) [ABRAHAM; CHEDORLAOMER].

AMULET (Isa. iii. 20). From the earliest ages the Orientals have believed in the influences of the stars, in spells, witchcraft, and the malign power of the evil eye; and to protect themselves against the maladies and other evils which such influences were supposed to occasion, almost all the ancient nations wore amulets. These amulets consisted, and still consist, chiefly of tickets inscribed with sacred sentences, and of certain stones or pieces of metal. Not only were persons thus protected, but even houses were, as they still are, guarded from supposed malign influences by certain holy inscriptions upon the doors.

The previous existence of these customs is

implied in the attempt of Moses to turn them to becoming uses, by directing that certain passages extracted from the law should be employed (Exod. xiii. 9, 16; Deut. vi. 8; xi. 18). The door-schedules being noticed elsewhere, we here limit our attention to personal amulets. By this religious appropriation the then all-pervading tendency to idolatry was in this matter obviated, although in later times, when the tendency to idolatry had passed away, such written scrolls degenerated into instruments of superstition.

34. [1. Modern Oriental. 2, 3, 4, 5. Ancient Egyptian.]

The ear-rings (Auth. Vers.) of Isa. iii. 20, it is now allowed, denote *amulets*, although they served also the purpose of ornament. They were probably precious stones, or small plates of gold or silver, with sentences of the law or magic formulæ inscribed on them, and worn in the ears, or suspended by a chain round the neck. It is certain that earrings were sometimes used in this way as instruments of superstition, and that at a very early period (Gen. xxxv. 4), and they are still used as charms in the East. Augustin speaks strongly against ear-rings that were worn as amulets in his time.

Some have supposed that these amulets were charms inscribed on silver and gold similar to those ornamental little cases for written charms which are still used by Arab women. This is represented in the first figure of the cut No. 34. The writing is covered with waxed cloth, and enclosed in a case of thin embossed gold or silver, which is attached to a silk string, or a chain, and generally hung on the right side, above the girdle, the string or chain being passed over the left shoulder. Amulets of this shape, or of a triangular form, are worn by women and children; and those of the latter shape are often attached to children's head-dress.

The superstitions connected with amulets grew to a great height in the later periods of the Jewish history. 'There was hardly any people in the whole world,' says Lightfoot, 'that more used or were more fond of amulets, charms, mutterings, exorcisms, and all kinds of enchantments. . . . The amulets were either little roots hung about the neck of sick persons, or, what was more common, bits of paper (and parch-

ment), with words written on them, whereby it was supposed that diseases were either driven away or cured. They wore such amulets all the week, but were forbidden to go abroad with them on the Sabbath, unless they were "approved amulets," that is, were prescribed by a person who knew that at least three persons had been

50.

cured by the same means. In these amulets mysterious names and characters were occasionally employed, in lieu of extracts from the law. One of the most usual of these was the cabalistic hexagonal figure known as the "shield of David" and "the seal of Solomon."

A'NAB, one of the cities in the mountains of Judah, from which Joshua expelled the Anakim (Josh. xi. 21; xv. 50).

A'NAH (*responder*), son of Zibeon the Hivite, and father of Esau's wife Aholibamah (Gen. xxxvi. 24). While feeding asses in the desert he discovered 'warm springs,' as the original is rendered by Jerome. Gesenius and most modern critics think this interpretation correct, supported as it is by the fact that warm springs are still found in the region east of the Dead Sea.

A'NAKIM, or BENE-ANAK and BENE-ANAKIM, a wandering nation of southern Canaan, descended from Anak, whose name it bore (Josh. xi. 21). It was composed of three tribes, descended from and named after the three sons of Anak—Ahiman, Sesai, and Talmi. When the Israelites invaded Canaan, the Anakim were in possession of Hebron, Debir, Anak, and other towns in the country of the south. Their formidable stature and appearance alarmed the Hebrew spies; but they were eventually overcome and expelled by Caleb, when the remnant of the race took refuge among the Philistines (Num. xiii. 33; Deut. ix. 2; Josh. xi. 21; xiv. 12; Judg. i. 20).

ANAM'MELECH (2 Kings xvii. 31) is mentioned, together with Adrammelech, as a god of the people of Sepharvaim, who colonized Samaria. He was also worshipped by the sacrifice of children by fire. No satisfactory etymology of the name has been discovered. The same obscurity prevails as to the form under which the god was worshipped.

1. ANANI'AS (same name as Hananiah, whom *Jehovah hath graciously given*), son of Nebedaeus, was made high-priest in the time of the procurator Tiberius Alexander, about A.D. 47, by Herod, king of Chalcis, who for this purpose removed Joseph, son of Camydus, from the high-priesthood. He held the office with credit, until Agrippa gave it to Ismael, the son of Talsi, who succeeded a short time before the departure of

the procurator Felix, and occupied the station also under his successor Festus. Ananias, after retiring from his high-priesthood, 'increased in glory every day,' and obtained favour with the citizens, and with Albinus, the Roman procurator, by a lavish use of the great wealth he had hoarded. His prosperity met with a dark and painful termination. The assassins, who played so fearful a part in the Jewish war, set fire to his house in the commencement of it, and compelled him to seek refuge by concealment; but being discovered in an aqueduct, he was captured and slain.

It was this Ananias before whom Paul was brought, in the procuratorship of Felix (Acts xxiii.). After this hearing Paul was sent to Caesarea, whither Ananias repaired, in order to lay a formal charge against him before Felix, who postponed the matter, detaining the apostle meanwhile, and placing him under the supervision of a Roman centurion (Acts xxiv.).

2. ANANIAS, a Christian belonging to the infant church at Jerusalem, who, conspiring with his wife Sapphira to deceive and defraud the brethren, was overtaken by sudden death, and immediately buried. The Christian community at Jerusalem appear to have entered into a solemn agreement, that each and all should devote their property to the great work of furthering the Gospel and giving succour to the needy. Accordingly they proceeded to sell their possessions, and brought the proceeds into the common stock of the church. Thus Barnabas (Acts iv. 36, 37) 'having land, sold it, and brought the money, and laid it at the apostles' feet.' The apostles then had the general disposal, if they had not also the immediate distribution, of the common funds. The contributions, therefore, were designed for the sacred purposes of religion (Acts i. 1-11).

As all the members of the Jerusalem church had thus agreed to hold their property in common, for the furtherance of the holy work in which they were engaged, if any one of them withheld a part, and offered the remainder as a whole, he committed two offences—he defrauded the church, and was guilty of falsehood: and as his act related not to secular but to religious affairs, and had an injurious bearing, both as an example, and as a positive transgression against the Gospel while it was yet struggling into existence, Ananias lied not unto man, but unto God, and was guilty of a sin of the deepest dye. Had Ananias chosen to keep his property for his own worldly purposes, he was at liberty, as Peter intimates, so to do; but he had in fact alienated it to pious purposes, and it was therefore no longer his own. Yet he wished to deal with it in part as if it were so, showing at the same time that he was conscious of his misdeed, by presenting the residue to the common treasury as if it had been his entire property. He wished to satisfy his selfish cravings, and at the same time to enjoy the reputation of being purely disinterested, like the rest of the church. He attempted to serve God and Mammon.

With strange inconsistency on the part of those who deny miracles altogether, unbelievers have accused Peter of cruelly smiting Ananias and his wife with instant death. The sacred narrative, however, ascribes to Peter nothing more than a

spirited exposure of their aggravated offence. Their death, the reader is left to infer, was by the hand of God; nor is any ground afforded in the narrative (Acts v. 1-11) for holding that Peter was in any way employed as an immediate instrument of the miracle.

3. ANANIAS, a Christian of Damascus (Acts ix. 10; xxii. 12), held in high repute, to whom the Lord appeared in a vision, and bade him proceed to 'the street which is called Straight, and inquire in the house of Judas for one called Saul of Tarsus: for, behold, he prayeth.' Ananias had difficulty in giving credence to the message, remembering how much evil Paul had done to the saints at Jerusalem, and knowing that he had come to Damascus with authority to lay waste the church of Christ there. Receiving, however, an assurance that the persecutor had been converted, and called to the work of preaching the Gospel to the Gentiles, Ananias went to Paul, and, putting his hands on him, bade him receive his sight, when immediately there fell from his eyes as it had been scales; and, recovering the sight which he had lost when the Lord appeared to him on his way to Damascus, Paul, the new convert, arose, and was baptized, and preached Jesus Christ.

Tradition represents Ananias as the first that published the Gospel in Damascus, over which place he was subsequently made bishop; but having roused, by his zeal, the hatred of the Jews, he was seized by them, scourged, and finally stoned to death in his own church.

ANATHEMA, literally anything laid up or suspended, and hence anything laid up in a temple, set apart as sacred.

The corresponding Hebrew word means a person or thing consecrated or devoted irrevocably to God (Lev. xxvii. 21, 28); hence, in reference to living creatures, the devoted thing, whether man or beast, must be put to death (Lev. xxvii. 29). The prominent idea, therefore, which the word conveyed was that of a person or thing devoted to destruction, or accursed. Thus the cities of the Canaanites were anathematized (Num. xxi. 2, 3). Thus, again, the city of Jericho was made an anathema to the Lord (Josh. vi. 17); that is, every living thing in it (except Rahab and her family) was devoted to death; that which could be destroyed by fire was burnt, and all that could not be thus consumed (as gold and silver) was for ever alienated from man and devoted to the use of the sanctuary (Josh. vi. 24). The prominence thus given to the idea of a thing accursed led naturally to the use of the word in cases where there was no reference whatever to consecration to the service of God, as in Deut. vii. 26; it is sometimes used to designate the curse itself (e. g. Deut. xx. 17).

In this sense, also, the Jews of later times use the Hebrew term, though with a somewhat different meaning as to the curse intended, employing it to signify excommunication or exclusion from the Jewish church. The more recent Rabbinical writers reckon three kinds or degrees of excommunication. The first of these is merely a temporary separation or suspension from ecclesiastical privileges, involving, however, various civil inconveniences, particularly seclusion from society to the distance of four cubits. The person thus excommunicated was not debarred enter-

ing the temple, but instead of going in on the right hand, as was customary, he was obliged to enter on the left, the usual way of departure; if he died whilst in this condition there was no mourning for him, but a stone was thrown on his coffin to indicate that he was separated from the people and had deserved stoning. This kind of excommunication lasted thirty days, and was pronounced without a curse. If the individual did not repent at the expiration of the term, the second kind of excommunication was resorted to. This could only be pronounced by an assembly of at least ten persons, and was always accompanied with curses. A person thus excommunicated was cut off from all religious and social privileges: and it was unlawful either to eat or drink with him (compare 1 Cor. v. 11). If the excommunicated person still continued impudent, a yet more severe sentence was pronounced against him, which is described as a complete excision from the church and the giving up of the individual to the judgment of God and to final perdition. There is, however, reason to believe that these three grades are of comparatively recent origin.

As it is on all hands admitted that the Hebrew term which is the equivalent of *anathema* properly denotes, in its Rabbinical use, an excommunication accompanied with the most severe curses and denunciations of evil, we are prepared to find that the *anathema* of the New Testament always implies execration; but it is very doubtful whether it is ever used to designate a judicial act of excommunication. The phrase 'to call Jesus anathema' (1 Cor. xii. 3) refers not to a judicial sentence pronounced by the Jewish authorities, but to the act of any private individual who execrated him and pronounced him accursed. The term, as it is used in reference to any who should preach another gospel, 'Let him be anathema' (Gal. i. 8, 9), has the same meaning as, let him be accounted execrable and accursed. There is very great diversity of opinion respecting the meaning of the word in Rom. ix. 3; some understand it to signify excommunication from the Christian church, whilst most of the fathers, together with a great number of modern interpreters, explain the term as referring to the Jewish practice of excommunication. On the other hand, many adopt the more general meaning of accursed. The great difficulty is to ascertain the extent of the evil which Paul expresses his willingness to undergo; Chrysostom, Calvin, and many others understand it to include final separation, not indeed from the love, but from the presence of Christ; others limit it to a violent death; and others, again, explain it as meaning the same kind of curse as that under which the Jews then were, from which they might be delivered by repentance and the reception of the Gospel. There seems, however, little reason to suppose that a judicial act of the Christian Church is intended, and we may remark that much of the difficulty which commentators have felt seems to have arisen from their not keeping in mind that the Apostle does not speak of his wish as a possible thing, and their consequently pursuing to all its results what should be regarded simply as an expression of the most intense desire.

The phrase 'let him be anathema maran-atha,'

seems to be intended as simply an expression of detestation. Though, however, we find little or no evidence of the use of the word *anathema* in the New Testament as the technical term for excommunication, it is certain that it obtained this meaning in the early ages of the church.

ANATHOTII, one of the towns belonging to the priests in the tribe of Benjamin, and as such a city of refuge (Josh. xxi. 18; Jer. i. 1). It occurs also in 2 Sam. xxiii. 27; Ezra ii. 23; Neh. vii. 27; but is chiefly memorable as the birthplace and usual residence of the prophet Jeremiah (Jer. i. 1; xi. 21-22; xxix. 27). Dr. Robinson appears to have discovered this place in the present village of *Anata*, at the distance of an hour and a quarter from Jerusalem. It is seated on a broad ridge of hills, and commands an extensive view of the eastern slope of the mountainous tract of Benjamin; including also the valley of the Jordan, and the northern part of the Dead Sea. It seems to have been once a walled town and a place of strength. Portions of the wall still remain, built of large hewn stones, and apparently ancient, as are also the foundations of some of the houses. It is now a small and very poor village. From the vicinity a favourite kind of building-stone is carried to Jerusalem.

ANCHOR. [SHIP.]

ANDREW, one of the twelve apostles. He was a native of the city of Bethsaida in Galilee, and brother of Simon Peter. He was at first a disciple of John the Baptist, and was led to receive Jesus as the Messiah in consequence of John's expressly pointing him out as 'the Lamb of God' (John i. 36). His first care, after he had satisfied himself as to the validity of the claims of Jesus, was to bring to him his brother Simon. Neither of them, however, became at that time stated attendants on our Lord; for we find that they were still pursuing their occupation of fishermen on the sea of Galilee when Jesus, after John's imprisonment, called them to follow him (Mark i. 14, 18). Very little is related of Andrew by any of the evangelists; the principal incidents in which his name occurs during the life of Christ are, the feeding of the five thousand (John vi. 8); his introducing to our Lord certain Greeks who desired to see him (John xii. 22); and his asking, along with his brother Simon and the two sons of Zebedee, for a further explanation of what our Lord had said in reference to the destruction of the temple (Mark xiii. 3). Of his subsequent history and labours we have no authentic record. Tradition assigns Scythia, Greece, and Thrace as the scenes of his ministry; and he is said to have suffered crucifixion at Patræ in Achaia, on a cross of the form (X), commonly known as 'St. Andrew's cross.'

1. ANDRONICUS, the regent-governor of Antioch in the absence of Antiochus Epiphanes, who, at the instigation of Menelaus, put to death the deposed high-priest Onias; for which deed he was himself ignominiously slain on the return of Antiochus (2 Macc. iv.) B.C. 179 [ONIAS].

2. ANDRONICUS, a Jewish Christian, the kinsman and fellow-prisoner of Paul (Rom. xvi. 7).

1. A'NER, ESH'COL, and MAM'RE, three Canaanitish chiefs in the neighbourhood of He-

bron, who joined their forces with those of Abraham in pursuit of Chedorlaomer and his allies, who had pillaged Sodom and carried Lot away captive (Gen. xiv. 24). These chiefs did not, however, imitate the disinterested conduct of the patriarch, but retained their portion of the spoil [ABRAHAM].

2. ANER, a city of Manasseh, given to the Levites of Kohath's family (1 Chron. vi. 70).

ANGELS, a word signifying, both in Hebrew and Greek, *messengers*, and therefore used to denote whatever God employs to execute his purposes, or to manifest his presence or his power. In some passages it occurs in the sense of an ordinary messenger (Job. i. 14; 1 Sam. xi. 3; Luke vii. 24; ix. 52): in others it is applied to prophets (Isa. xlii. 19; Hag. i. 13; Mal. iii.): to priests (Eccl. v. 6; Mal. ii. 7): to ministers of the New Testament (Rev. i. 20). It is also applied to impersonal agents; as to the pillar of cloud (Exod. xiv. 19): to the postilence (2 Sam. xiv. 16, 17; 2 Kings xix. 35): to the winds ('who maketh the winds his angels.' Ps. civ. 4): so likewise, plagues generally, are called 'evil angels' (Ps. lxxviii. 49), and Paul calls his thorn in the flesh an 'angel of Satan' (2 Cor. xii. 7).

But this name is more eminently and distinctively applied to certain spiritual beings or heavenly intelligences, employed by God as the ministers of His will, and usually distinguished as *angels of God* or *angels of Jehovah*. In this case the name has respect to their official capacity as 'messengers,' and not to their nature or condition. In the Scriptures we have frequent notices of spiritual intelligences, existing in another state of being, and constituting a celestial family, or hierarchy, over which Jehovah presides. The practice of the Jews, of referring to the agency of angels every manifestation of the greatness and power of God, has led some to contend that angels have no real existence, but are mere personifications of unknown powers of nature: but there are numerous passages in the Scriptures which are wholly inconsistent with this notion, and if Matt. xxii. 30, stood alone in its testimony, it ought to settle the question. So likewise, the passage in which the high dignity of Christ is established, by arguing that he is superior to the angels (Heb. i. 4. *seq.*), would be without force or meaning if angels had no real existence.

That these superior beings are very numerous is evident from the following expressions, Dan. vii. 10, 'thousands of thousands,' and 'ten thousand times ten thousand;' Matt. xxvi. 53, 'more than twelve legions of angels;' Luke ii. 13, 'multitude of the heavenly host;' Heb. xii. 22, 23, 'myriads of angels.' It is probable, from the nature of the case, that among so great a multitude there may be different grades and classes, and even natures—ascending from man towards God, and forming a chain of being to fill up the vast space between the Creator and man—the lowest of his intellectual creatures. This may be inferred from the analogies which pervade the chain of being on the earth whereon we live, which is as much the divine creation as the world of spirits. Accordingly the Scriptures describe angels as existing in a society composed of members of unequal dignity, power,

and excellence, and as having chiefs and rulers (Zech. i. 11; iii. 7; Dan. x. 13; Jude 9; 1 Thess. iv. 16).

In the Scriptures angels appear with bodies, and in the human form; and no intimation is anywhere given that these bodies are not real, or that they are only assumed for the time and then laid aside. The fact that angels always appeared in the human form, does not, indeed, prove that this form naturally belongs to them. But that which is not pure spirit must have some form or other: and angels *may* have the human form; but other forms are possible. The question as to the food of angels has been very much discussed. If they do eat, we can know nothing of their actual food; for the manna is manifestly called 'angels' food' (Ps. lxxviii. 25), merely by way of expressing its excellence. The only real question, therefore, is whether they feed at all or not. We sometimes find angels, in their terrene manifestations, eating and drinking (Gen. xviii. 8; xix. 3); but in Judg. xiii. 13, 16, the angel who appeared to Manoah declined, in a very pointed manner, to accept his hospitality.

The passage already referred to in Matt. xxii. 30, teaches by implication that there is no distinction of sex among the angels. In the Scriptures indeed the angels are all males: but they appear to be so represented, not to mark any distinction of sex, but because the masculine is the more honourable gender. Angels are never described with marks of age, but sometimes with those of youth (Mark xvi. 5). The constant absence of the features of age indicates the continual vigour and freshness of immortality. The angels never die (Luke xx. 36). But no being besides God himself has essential immortality (1 Tim. vi. 16): every other being therefore is mortal in itself, and can be immortal only by the will of God. Angels, consequently, are not eternal, but had a beginning, although there is no record of their creation.

The preceding considerations apply chiefly to the *existence* and *nature* of angels. Some of their *attributes* may be collected from other passages of Scripture. That they are of superhuman intelligence is implied in Mark xiii. 32: 'But of that day and hour knoweth no man, not even the angels in heaven.' That their power is great, may be gathered from such expressions as 'mighty angels' (2 Thess. i. 7); 'angels, powerful in strength' (Ps. ciii. 20); 'angels who are greater [than man] in power and might.' The moral perfection of angels is shown by such phrases as 'holy angels' (Luke ix. 26); 'the elect angels' (1 Tim. v. 21). Their felicity is beyond question in itself, but is evinced by the passage (Luke xx. 36) in which the blessed in the future world are said to be 'like unto the angels, and sons of God.'

The *ministry* of angels, or that they are employed by God as the instruments of His will, is very clearly taught in the Scriptures. The very name, as already explained, shows that God employs their agency in the dispensations of His Providence. And it is further evident, from certain actions which are ascribed wholly to them (Matt. xiii. 41, 49; xxiv. 31; Luke xvi. 22); and from the Scriptural narratives of other events, in the accomplishment of which they

acted a visible part (Luke i. 11, 26; ii. 9, *sq.*; Acts, v. 19, 20; x. 3, 19; xii. 7; xxvii. 23), that their agency is employed principally in the guidance of the destinies of man. In those cases also in which the agency is concealed from our view, we may admit the probability of its existence; because we are told that God sends them forth 'to minister to those who shall be heirs of salvation' (Heb. i. 14; also Ps. xxxiv. 7; xci. 11; Matt. xviii. 10). But the angels, when employed for our welfare, do not act independently, but as the instruments of God, and by His command (Ps. ciii. 20; civ. 4; Heb. i. 13, 14): not unto them, therefore, are our confidence and adoration due, but only unto him (Rev. xix. 10; xxii. 9) whom the angels themselves reverently worship.

It was a favourite opinion of the Christian fathers that every individual is under the care of a particular angel, who is assigned to him as a guardian. They spoke also of two angels, the one good, the other evil, whom they conceived to be attendant on each individual; the good angel prompting to all good, and averting ill; and the evil angel prompting to all ill, and averting good. The Jews (excepting the Sadducees) entertained this belief. There is, however, nothing to authorise this notion in the Bible. The passages (Ps. xxxiv. 7; Matt. xviii. 10) usually referred to in support of it, have assuredly no such meaning. The former, divested of its poetical shape, simply denotes that God employs the ministry of angels to deliver his people from affliction and danger; and the celebrated passage in Matthew cannot well mean anything more than that the infant children of believers, or, if preferable, the least among the disciples of Christ, whom the ministers of the church might be disposed to neglect from their apparent insignificance, are in such estimation elsewhere, that the angels do not think it below their dignity to minister to them [SATAN].

ANGLING. The Scripture contains several allusions to this mode of taking fish. The first of these occurs as early as the time of Job:—'Canst thou draw out leviathan with an hook; or his tongue [palate, which is usually pierced by the hook] with a cord [line], which thou lettest down? Canst thou put a hook into his

nose, or bore his jaw through with a thorn?' (Job xli. 1, 2). This last phrase obviously refers to the thorns which were sometimes used as hooks, and which are long after mentioned (Amos iv. 2), in the Arth. Vers. 'fish-hooks,' literally, the thorns of fishing.

Of the various passages relating to this subject, the most remarkable is that which records, as an important part of the 'burden of Egypt,' that 'the fishers also shall mourn; and all they that cast angle [the hook] into the brooks shall lament, and they that spread nets upon the waters shall languish' (Isa. xix. 8). In this poetical description of a part of the calamities which were to befall Egypt, we are furnished with an account of the various modes of fishing practised in that country, which is in exact conformity with the scenes depicted in the old tomb of Egypt. Angling appears to have been regarded chiefly as an amusement, in which the Egyptians of all ranks found much enjoyment. Not content with the abundance afforded by the Nile, they constructed within their ground spacious sluices or ponds for fish (Isa. xix. 10), where they fed them for the table, where they amused themselves by angling, and by the dexterous use of the *bident*. These favourite occupations were not confined to young persons, nor thought unworthy of men of serious habits; and an Egyptian of consequence is frequently represented in the sculptures catching fish in a canal or lake, with the line, or spearing them as they glided past the bank. Sometimes the angler posted himself in a shady spot at the water's edge, and having ordered his servant to spread a mat upon the ground, he sat upon it as he threw the line; and some, with higher notions of comfort, used a chair for the same purpose. The rod was short, and apparently of one piece: the line usually single, though instances occur of a double line, each furnished with its own hook. The fishermen generally used the net in preference to the line, but on some occasions they used the latter, seated or standing on the bank. It is, however, probable that there were people who could not afford the expense of nets; and the use of the line is generally confined in like manner at the present day to the poorer classes, who depend upon skill or good fortune for their subsistence.

This last was doubtless the state of many in ancient Palestine, and probably furnished the only case in which angling was there practised, as we find no instance of it for mere amusement. The fish caught in the lake of Tiberias were, some time since, taken exclusively with the rod and line, in the absence of boats upon that water; and probably this is the case still. The Egyptian hooks were of bronze, as appears from the specimens that have been found. Insects, natural or artificial, were not used in angling, ground bait being exclusively employed; and the float does not appear to have been known.

ANISE. The original Greek word *ANETHON*, which occurs in Matt. xxiii. 23, was commonly employed by the Greek and Roman writers to designate a plant used both medicinally and as an article of diet. In Europe the word has always been used to denote a similar plant, which is familiarly known by the name of Dill, and there is no doubt that in the above passage

it should have been so rendered. The common dill is an annual plant, growing wild among the corn in Spain and Portugal; and on the coast of Italy, in Egypt, and about Astracan. It resembles *fennel*, but is smaller, has more glaucous leaves, and a less pleasant smell: the fruit or seeds, which are finely divided by capillary segments, are elliptical, broader, flatter, and surrounded with a membranous disk. They have a warm and aromatic taste, owing to the presence of a pale yellow volatile oil, which itself has a hot taste and a peculiar penetrating odour.

36. [*Anethum graveolens*.]

The error in translation here pointed out is not of very great consequence, as both the *anise* and the *dill* are umbelliferous plants, which are found cultivated in the south of Europe. The seeds of both are employed as condiments and carminatives, and have been so from very early times; but the *anethon* is more especially a genus of Eastern cultivation, since either the *dill* or another species is reared in all the countries from Syria to India. Jewish authorities state that the seed, the leaves, and the stem of *dill* were 'subject to tithing,' which indicates that the herb was eaten, as is indeed the case with the Eastern species in the present day.

ANKLETS. This word does not occur in Scripture, but the ornament which it denotes is clearly indicated by 'the tinkling (or jingling) ornaments about the feet,' mentioned in the curious description of female attire which we find in Isa. iii. Even in the absence of special notice, we might very safely conclude that an ornament to which the Oriental women have always been so partial was not unknown to the Jewish ladies. In Egypt anklets of gold have been found, which are generally in the shape of simple rings, often however in that of snakes, and sometimes inlaid with enamel or even precious stones. The sculptures show that they were worn by men as well as women. Their present use among the women of Arabia and Egypt sufficiently illustrates the Scriptural allusion. The Koran (xxiv. 31) forbids women 'to make a noise with their feet,' which, says Mr. Lane, 'alludes to the practice of knocking together the anklets, which the Arab women in the time of the prophet used to wear, and which are still worn by many women in Egypt.' The same writer states that 'Anklets of solid gold and silver, and of the form here sketched (like fig. 3), are worn by some ladies, but are more

uncommon than they formerly were. They are of course very heavy, and, knocking together as the woman walks, make a ringing noise.' He thinks that in the text referred to (Isa. iii. 16) the prophet alludes to this kind of anklet, but admits that the description may apply to another kind, which he describes as 'Anklets of solid silver, worn by the wives of some of the richer peasants, and of the sheykhs of villages. Small ones of iron are worn by many children. It was also a common custom among the Arabs for girls or young women to wear a string of bells on their feet. I have seen many little girls in Cairo with small round bells attached to their anklets. Perhaps it is to the sound of ornaments of this kind, rather than of the more common anklet, that Isaiah alludes.' The anklets in use

38.
[1, 2, 3, 5, 6, 7. Ancient Oriental. 3, 4, 8. Modern Oriental.]

among the Arab women in the country of the Tigris and Euphrates are not usually solid, but hollow, so that, in striking against each other, they emit a much more sharp and sonorous sound than solid ones.

1. AN'NA, wife of Tobit, whose history is contained in the apocryphal book named after him (Tob. i. 9, &c.).

2. ANNA, an aged widow, daughter of Phanael, of the tribe of Asher. She had married early, but after seven years her husband died, and during her long widowhood she daily attended the morning and evening services of the Temple. Anna was eighty-four years old when the infant Jesus was brought to the Temple by his mother, and entering as Simeon pronounced his thanksgiving, she also broke forth in praise to God for the fulfilment of his ancient promises (Luke ii. 36, 37).

ANOINTING. The practice of anointing with perfumed oils or ointments appears to have been very common among the Hebrews, as it was among the ancient Egyptians. The practice, as to its essential meaning, still remaining in the East; but perfumed waters are now far more commonly employed than oils or ointments.

In the Scriptures three kinds of anointing are distinguishable:—1. For consecration and inauguration; 2. For guests and strangers; 3. For health and cleanliness. Of these in order.

1. *Consecration and Inauguration.*—The act of anointing appears to have been viewed as emblematical of a particular sanctification; of a designation to the service of God; or to a holy and sacred use. Hence the anointing of the high-

priests (Exod. xxix. 29; Lev. iv. 3), and even of the sacred vessels of the tabernacle (Exod. xxx. 26, &c.); and hence also, probably, the anointing of the king, who, as 'the Lord's anointed,' and, under the Hebrew constitution, the viceroy of Jehovah, was undoubtedly invested with a sacred character.

The first instance of anointing which the Scriptures record is that of Aaron, when he was solemnly set apart to the high-priesthood. Being first invested with the rich robes of his high office, the sacred oil was poured in much profusion upon his head. It is from this that the high-priest, as well as the king, is called 'the Anointed' (Lev. iv. 3, 5, 16; vi. 20; Ps. cxxxiii. 2). In fact, anointing being the principal ceremony of regal inauguration among the Jews, as crowning is with us, 'anointed,' as applied to a king, has much the same signification as 'crowned.'

As the custom of inaugural anointing first occurs among the Israelites immediately after they left Egypt, and no example of the same kind is met with previously, it is fair to conclude that the practice and the notions connected with it were acquired in that country. With the Egyptians, as with the Jews, the investiture to any sacred office, as that of king or priest, was confirmed by this external sign; and as the Jewish lawgiver mentions the ceremony of pouring oil upon the head of the high-priest *after* he had put on his entire dress, with the mitre and crown, the Egyptians represent the anointing of their priests and kings *after* they were attired in their full robes, with the cap and crown upon their heads. Some of the sculptures introduce a priest pouring oil over the monarch.

39.

2. The anointing of our Saviour's feet by 'the woman who was a sinner' (Luke vii. 38), led to the remark that the host himself had neglected to anoint his head (vii. 46); whence we learn that this was a mark of attention which those who gave entertainments paid to their guests. Among the Egyptians anointing was the ordinary token of welcome to guests in every party at the house of a friend; and in Egypt, no less than in Judæa, the metaphorical expression 'anointed with the oil of gladness' was fully understood, and applied to the ordinary occurrences of life. It was customary for a servant

to attend every guest as he seated himself, and to anoint his head.

3. It is probable, however, that the Egyptians, as well as the Greeks and Jews, anointed themselves at home, before going abroad, although they expected the observance of this etiquette on the part of their entertainer. That the Jews thus anointed themselves, not only when paying a visit, but on ordinary occasions, is shown by many passages, especially those which describe the omission of it as a sign of mourning (Deut. xxviii. 40; Ruth iii. 3; 2 Sam. xiv. 2; Dan. x. 3; Amos vi. 6; Mic. vi. 15; Esth. ii. 12; Ps. civ. 15; Isa. lxi. 3; Eccles. ix. 8; Cant. i. 3; iv. 10; also Judith x. 3; Sus. 17; Eccles. xxxix. 26; Wisd. ii. 7). One of these passages (Ps. civ. 15, 'oil that maketh the face to shine') shows very clearly that not only the hair but the skin was anointed.

Anointing the Sick.—The Orientals are indeed strongly persuaded of the sanative properties of oil; and it was under this impression that the Jews anointed the sick, and applied oil to wounds (Ps. cix. 18; Isa. i. 6; Mark vi. 13; Luke x. 34; James v. 14). Anointing was used in sundry disorders, as well as to promote the general health of the body. It was hence, as a salutary and approved medicament, that the seventy disciples were directed to 'anoint the sick' (Mark vi. 13); and hence also the sick man is directed by St. James to send for the elders of the church, who were 'to pray for him, anointing him with oil in the name of the Lord.'

Anointing the Dead.—The practice of anointing the bodies of the dead is intimated in Mark xiv. 8, and Luke xxiii. 56. This ceremony was performed after the body was washed, and was designed to check the progress of corruption. Although, from the mode of application, it is called anointing, the substance employed appears to have been a solution of odoriferous drugs. This (together with the laying of the body in spices) was the only kind of embalment in use among the Jews [BURIAL].

ANT, fifth order of insects, occurs Prov. vi. 6; xxx. 25. Ants have only latterly become the subjects of accurate observation, and the result has dissipated many erroneous notions respecting them, and revealed much interesting information concerning their domestic polity, language, migrations, affections, passions, virtues, wars, diversions, &c. The following facts are selected as relevant to Scriptural illustration. Ants dwell together in societies; and although they have 'no guide, overseer, or ruler,' yet they have all one soul, and are animated by one object—their own welfare and the welfare of each other. Each individual strenuously pursues his own peculiar duties; and regards (except in the case of females), and is regarded by, every other member of the republic with equal respect and affection. They devote the utmost attention to their young. The egg is cleaned and licked, and gradually expands under this treatment, till the worm is hatched, which is then tended and fed with the most affectionate care. They continue their assiduity to the pupa, or chrysalis, which is the third transformation. They heap up the pupa, which greatly resemble so many grains of wheat, or rather rice, by hundreds in their spacious lodges, watch them in

an attitude of defence, carry them out to enjoy the radiance of the sun, and remove them to different situations in the nest, according to the required degree of temperature; open the pupa, and at the precise moment of the transformation, disenthral the new-born insect of its habitments.

The most prevalent and inexcusable error, however, respecting ants, has been the belief that they hoard up grains of corn, chiefly wheat, for their supply during winter, having first bitten out the germ to prevent it from growing in their nests. This notion, however, is now completely exploded with regard to European ants. The mistake has no doubt arisen from the great similarity, both in shape, size, and colour, before mentioned, of the pupa or chrysalis of the ant to a grain of corn, and from the ants being observed to carry them about, and to open the cuticle to let out the enclosed insect. It is now also ascertained beyond a doubt that European ants, hitherto properly examined, feed on corn, or any other kind of grain. Nor was any species of ant been yet found of any kind laid up in its nest. The truth is, that ants are chiefly carnivorous, preying indiscriminately on all the soft parts of other insects, and especially the viscera; also upon worms, whether dead or alive, and small birds or animals. If unable to drag their booty to the nest, they make an abundant meal upon it, and, like the bee, disgorge it, upon their return home, for the use of their companions; and they appear able to retain at pleasure the nutritious juices unchanged for a considerable time. Ants are also extremely fond of saccharine matter, which they obtain from the exudation of trees, or from ripe fruits, &c.; but their favourite food is the saccharine exudation from the body of the aphides, or plant-lice. These insects insert their tube or sucker between the fibres of vegetables, where they find a most substantial nutriment. This nutriment they retain a considerable time, if no ant approaches them. The ant has the talent of procuring it from the aphides at pleasure. It approaches the aphid, strikes it gently and repeatedly with its antennæ, when it instantly discharges the juice by two tubes, easily discerned to be standing out from its body. These creatures are the *milch kine* of the ants. By a remarkable coincidence, which M. Huber justly considers too much to be ascribed to chance, the aphides and the ants become torpid at the same degree of cold (27° Fahr.), and revive together at the same degree of warmth. He says, 'I am not acquainted with any ants to whom the art of obtaining from the pucerons (aphides) their subsistence is unknown. We might even venture to affirm that these insects are made for their use' (Huber, *Natural History of Ants*, p. 210, &c.).

It is highly probable that the exotic ants subsist by similar means. The accounts given us of the termites, or ants, inhabiting the hottest climates, clearly show that they are carnivorous. Bosman, in his description of Guinea, says that they will devour a sheep in one night, and that a fowl is amusement to them only for an hour. In these situations living animals often become their victims. An Italian missionary at Congo relates that a cow in a stall had been known to

be devoured by these devastators. We have therefore every reason to conclude that the ants of Palestine, like those of Europe, are carnivorous, become torpid in winter, and need no magazine of provisions. The words of Solomon (Prov. vi. 6, &c.), properly considered, give no countenance to the ancient error respecting ants. He does not affirm that the ant, which he proposes to the sluggard as an example, laid up in her magazine stores of grain against winter, but that, with considerable prudence and foresight, she makes use of *proper seasons* to collect a supply of provisions sufficient for her purposes. There is not a word in them implying that she stores up grain or other provisions. She prepares her bread and gathers her food (namely, such food as is suited to her) in summer and harvest (that is, when it is most plentiful), and thus shows her wisdom and prudence by using the advantages offered to her. The sense is thus ably given by Dr. Hammond: '*As in the matter just mentioned the least delay is pernicious, so in all things else sluggishness, or negligence of those things which concern us most nearly, should ever be avoided; and if we need any instructor on this head, we may go to one of the least and meanest of creatures.*' The moral, then, intimated in Solomon's allusion to the ant, is simply to avail one's self of the *favourable time without delay*.

ANTEDILUVIANS, the name given collectively to the people who lived before the Deluge. The interval from the Creation to that event is not less, even according to the Hebrew text, than 1657 years, being not more than 691 years shorter than that between the Deluge and the birth of Christ, and only 167 years less than from the birth of Christ to the present time, and equal to about two-sevenths of the whole period from the Creation. By the Samaritan and Septuagint texts (as adjusted by Hales) a much greater duration is assigned to the antediluvian period—namely, 2256 years, which nearly equals the Hebrew interval from the Deluge to the birth of Christ, and much exceeds the interval from the birth of Christ to the present time.

In the article 'ADAM' it has been shown that the father of men was something more than 'the noble savage,' or rather the grown-up infant, which some have represented him. He was an instructed man;—and the immediate descendants of a man so instructed could not be an ignorant or uncultivated people. Their pursuits from the first were agricultural and pastoral; for it is remarkable that of the strictly savage or hunting condition of life there is not the slightest trace before the Deluge. In fact, savagism is not discoverable before the Confusion of Tongues, and was in all likelihood a degeneracy from a state of cultivation, eventually produced in particular communities by that great social convulsion. All that was peculiar in the circumstances of the antediluvian period was eminently favourable to civilization.

By reason of their length of life, the antediluvians had ample opportunities of acquiring the highest skill in the mechanical arts. They had also more encouragement in protracted undertakings, and stronger inducements to the erection of superior, more costly, more durable, and more capacious edifices and monuments,

public and private, than exist at present. They might reasonably calculate on reaping the benefit of their labour and expenditure. The earth itself was probably more equally fertile, and its climate more uniformly healthful, and more auspicious to longevity, and consequently to every kind of mental and corporeal exertion and enterprise, than has been the case since the great convulsion which took place at the Deluge.

But probably the greatest advantage enjoyed by the antediluvians, and which must have been in the highest degree favourable to their advancement in the arts of life, was the uniformity of language. Nothing could have tended more powerfully to maintain, equalize, and promote whatever advantages were enjoyed, and to prevent any portion of the human race from degenerating into savage life.

The opinion that the old world was acquainted with *astronomy*, is chiefly founded on the ages of Seth and his descendants being particularly set down (Gen. v. 6, *sqq.*), and the precise year, month, and day being stated in which Noah and his family, &c. entered the ark, and made their egress from it (Gen. vii. 11; viii. 13). The knowledge of *zoology*, which Adam possessed, was doubtless imparted to his children; and we find that Noah was so minutely informed on the subject as to distinguish between clean and unclean beasts, and that his instructions extended to birds of every kind (Gen. vii. 2-4). A knowledge of some essential principles in *botany* is shown by the fact that Adam knew how to distinguish 'seed-bearing herb' and 'tree in which is a seed-bearing fruit,' with 'every green herb' (Gen. i. 29, 30). With *mineralogy* the antediluvians were at least so far acquainted as to distinguish metals; and in the description of the garden of Eden gold and precious stones are noticed (Gen. ii. 12). That the antediluvians were acquainted with *music* is certain; for it is expressly said that Jubal (while Adam was still alive) became 'the father of those who handle the *kinnur* and *huyab*' (Gen. iv. 21). The *kinnur* was evidently a stringed instrument resembling a lyre; and the *huyab* was without doubt the pandean pipe, composed of reeds of different lengths joined together. This clearly intimates considerable progress in the science.

Our materials are too scanty to allow us to affirm that the antediluvians possessed the means of communicating their ideas by writing or by hieroglyphics, although tradition, and a hint or two in the Scriptures, might support the assertion. With regard to *architecture*, it is a singular and important fact that Cain, when he was driven from his first abode, built a city in the land to which he went, and called it Enoch, after his son. This shows that the descendants of Adam lived in houses and towns from the first, and consequently affords another confirmation of the argument for the original cultivation of the human family. The *metallurgy* of the antediluvians has been noticed in 'ADAM:' and to what is there said of *agriculture* we shall only add a reference to the case of Noah, who, immediately after the Flood, became a husbandman, and planted a vineyard. He also knew the method of fermenting the juice of the grape; for it is said he drank of the wine, which produced inebriation (Gen. ix. 20, 21). This

knowledge he doubtless obtained from his progenitors anterior to the destruction of the old world.

Pasturage appears to have been coeval with husbandry. Abel was a keeper of sheep, while his brother was a tiller of the ground (Gen. iv. 2); but there is no necessity for supposing that Cain's husbandry excluded the care of cattle. The class of tent-dwelling pastors—that is, of those who live in tents that they may move with their flocks and herds from one pasture-ground to another—did not originate till comparatively late after the Fall; for Jabal, the seventh from Adam in the line of Cain, is said to have been the 'father' or founder of that mode of life (Gen. iv. 20).

It is impossible to speak with any decision respecting the form or forms of government which prevailed before the Deluge. The slight intimations to be found on the subject seem to favour the notion that the particular governments were patriarchal, subject to a general theocratical control. The right of property was recognised, for Abel and Jabal possessed flocks, and Cain built a city. From Noah's familiarity with the distinction of clean and unclean beasts (Gen. vii. 2), it would seem that the Levitical rules on this subject were by no means new when laid down in the code of Moses.

Marriage, and all the relations springing from it, existed from the beginning (Gen. i. 23-25); and although polygamy was known among the antediluvians (Gen. iv. 19), it was most probably unlawful; for it must have been obvious that, if more than one wife had been necessary for a man, the Lord would not have confined the first man to one woman. The marriage of the sons of Seth with the daughters of Cain appears to have been prohibited, since the consequence of it was that universal depravity in the family of Seth so forcibly expressed in this short passage, 'All flesh had corrupted its way upon the earth' (Gen. vi. 12).

It is probable that even the longevity of the antediluvians may have contributed to the general corruption of manners. As there was probably a good deal of time upon their hands, the temptations to idleness were likely to be very strong; and the next step would be to licentious habits and selfish violence. The ample leisure possessed by the children of Adam might have been employed for many excellent purposes of social life and religious obedience, and undoubtedly it was so employed by many; but to the larger part it became a snare and the occasion of temptations, so that 'the wickedness of man became great, the earth was corrupt before God, and was filled with violence.'

ANTICHRIST. The meaning attached to this word has been greatly modified by the controversies of various churches and sects. In Scripture, however, and the early Christian writers, it has an application sufficiently distinct from partial interpretations. Antichrist, according to St. John, is the ruling spirit of error, the enemy of the truth of the Gospel as it is displayed in the divinity and holiness of Christ. This is the primary meaning of the term, and we are led at once to consider it as the proper title of Satan. But the same apostle speaks of the existence of many antichrists; whence we

learn that it is applicable to any being who opposes Christ in the high places of spiritual wickedness.

ANTI-LIBANUS. [LEBANON.]

AN'TIOCH. Two places of this name are mentioned in the New Testament. 1. A city on the banks of the Orontes, 300 miles north of Jerusalem, and about 30 from the Mediterranean. It was situated in the province of Seleucia, called Tetrapolis. It was the metropolis of Syria, the

40.

residence of the Syrian kings, and afterwards became the capital of the Roman provinces in Asia. It ranked third, after Rome and Alexandria, among the cities of the empire, and was little inferior in size and splendour to the latter. Its suburb Daphne was celebrated for its grove and fountains, its asylum and temple were dedicated to Apollo and Diana. It was very populous; within 150 years after its erection the Jews slew 100,000 persons in it in one day. In the time of Chrysostom the population was computed at 200,000, of whom one-half, or even a greater proportion, were professors of Christianity. Cicero speaks of the city as distinguished by men of learning and the cultivation of the arts. A multitude of Jews resided in it. Seleucus Nicator granted them the rights of citizenship, and placed them on a perfect equality with the other inhabitants. These privileges were continued to them by Vespasian and Titus. Antioch is called *libera* by Pliny, having obtained from Pompey the privilege of being governed by its own laws.

The Christian faith was introduced at an early period into Antioch, and with great success (Acts xi. 19, 21, 24). The name '*Christians*' was here first applied to its professors (Acts xi. 26). Antioch soon became a central point for the diffusion of Christianity among the Gentiles, and maintained for several centuries a high rank in the Christian world. A controversy which arose between certain Jewish believers from Jerusalem and the Gentile converts at Antioch respecting the permanent obligation of the right of circumcision was the occasion of the first apostolic council or convention (Acts xv.). Antioch was the scene of the early labours of the apostle Paul, and the place whence he set forth on his first missionary labours (Acts xi. 26; xiii. 2). Ignatius

was the second bishop or overseer of the church, for about forty years, till his martyrdom in A.D. 107.

As the ecclesiastical system became gradually assimilated to the political, the churches in those cities which held the highest civil rank assumed a corresponding superiority in relation to other Christian communities. Such was the case at Rome, Alexandria, and Antioch, and, in the course of time, at Constantinople and Jerusalem, where the term Exarch was applied to the resident bishop, but shortly exchanged for that of Patriarch. At the present time there are three prelates in Syria who claim the title of patriarchs of Antioch, namely: (1) the patriarch of the Greek church; (2) of the Syrian Monophysites; (3) of the Maronites.

Few cities have undergone and survived greater vicissitudes and disasters than Antioch. In A.D. 260 Sapor, the Persian king, surprised and pillaged it, and multitudes of the inhabitants were slain or sold as slaves. It has been frequently brought to the verge of utter ruin by earthquakes; by that of A.D. 526 no less than 250,000 persons were destroyed, the population being swelled by an influx of strangers to the festival of the Ascension. The emperor Justinian gave forty-five centenaries of gold (180,000*l.*) to restore the city. Scarcely had it resumed its ancient splendour (A.D. 540) when it was again taken and delivered to the flames by Chosroes. In A.D. 638 it was captured by the Saracens. In A.D. 975 it was retaken by Nicephorus Phocas. In A.D. 1084 the son of the governor Philaretus betrayed it into the hands of Soliman. Seventeen years after the Duke of Normandy entered it at the head of 300,000 Crusaders; but as the citadel still held out, the victors were in their turn besieged by a fresh host under Kerbogha and twenty-eight emirs, which at last gave way to their desperate valour. In A.D. 1268 Antioch was occupied and ruined by Baidebar or Bilars, sultan of Egypt and Syria; this first seat of the Christian name being dispeopled by the slaughter of 17,000 persons, and the captivity of 100,000. About the middle of the fifteenth century the three patriarchs of Alexandria, Antioch, and Jerusalem convoked a synod, and renounced all connection with the Latin church.

Antioch at present belongs to the Pashalic of Haleb (Aleppo), and bears the name of *Antakia*. The inhabitants are said to have amounted to twenty thousand before the earthquake of 1822, which destroyed four or five thousand. The present town stands on scarcely one-third of the area enclosed by the ancient wall, of which the line may be easily traced.

2. ANTIOCH in (or near) *Pisidia*, being a border city, was considered at different times as belonging to different provinces. It was founded by Seleucus Nicator, and its first inhabitants were from Magnesia on the Maander. After the defeat of Antiochus (III.) the Great by the Romans, it came into the possession of Eumenes, king of Pergamus, and was afterwards transferred to Amyntas. On his death the Romans made it the seat of a proconsular government, and invested it with the privileges of immunity from taxes and a municipal constitution similar to that of the Italian towns. When Paul and Barnabas visited this city (Acts xiii. 14), they

found a Jewish synagogue and a considerable number of proselytes, and met with great success among the Gentiles (v. 48), but, through the violent opposition of the Jews, were obliged to leave the place, which they did in strict accordance with their Lord's injunction (v. 51, compared with Matt. x. 14; Luke ix. 5).

Till within a very recent period Antioch was supposed to have been situated where the town of *Ak-Sheker* now stands; but later investigations have determined its site to be adjoining the town of Yalobatch; and Mr. Arundell observed there the remains of several temples and churches, besides a theatre and a magnificent aqueduct; of the latter twenty-one arches still remained in a perfect state.

ANTIOCHUS, a name which may be interpreted *he who withstands, or lasts out*; and denotes military prowess, as do many other of the Greek names. It was borne by one of the generals of Philip, whose son, Seleucus, by the help of the first Ptolemy, established himself (B.C. 312) as ruler of Babylon. For eleven years more the contest in Asia continued, while Antigonous was grasping at universal supremacy. At length, in 301, he was defeated and slain in the decisive battle of Ipsus, in Phrygia. Ptolemy, son of Lagos, had meanwhile become master of southern Syria; and Seleucus was too much indebted to him to be disposed to eject him by force from this possession. In fact, the three first Ptolemies (B.C. 323-222) looked on their extra-Egyptian possessions as their sole guarantee for the safety of Egypt itself against their formidable neighbour, and succeeded in keeping the mastery, not only of Palestine and Cœle-Syria, and of many towns on that coast, but of Cyrene and other parts of Libya, of Cyprus, and other islands, with numerous maritime posts all round Asia Minor. A permanent fleet was probably kept up at Samos, so that their arms reached to the Hellespont; and for some time they ruled over Thrace. Thus Syria was divided between two great powers, the northern half falling to Seleucus and his successors, the southern to the Ptolemies; and this explains the titles 'king of the north' and 'king of the south,' in the 11th chapter of Daniel. The line dividing them was drawn somewhat to the north of Damascus, the capital of Cœle-Syria.

The first Seleucus built a prodigious number of cities with Greek institutions, not, like Alexander, from military or commercial policy, but to gratify ostentation, or his love for Greece. To people his new cities was often a difficult matter; and this led to the bestowal of premiums on those who were willing to become citizens. Hence we may account for the extraordinary privileges which the Jews enjoyed in them all, having equal rights with Macedonians. But there was still another cause which recommended the Jews to the Syrian kings. A nation thus diffused through their ill-compacted empire, formed a band most useful to gird its parts together. To win the hearts of the Jews, was to win the allegiance of a brave brotherhood, who would be devoted to their protector, and who could never make common cause with any spirit of local independence. For this reason Antiochus the Great, and doubtless his predecessors also, put peculiar trust in Jewish garrisons.

41. [Antiochus the Great.]

Again: through the great revolution of Asia, the Hebrews of Palestine were now placed nearly on the frontier of two mighty monarchies; and it would seem that the rival powers *bid* against one another for their good will—so great were the benefits showered upon them by the second Ptolemy. Even when a war broke out for the possession of Cœle-Syria, under Antiochus the Great, and the fourth Ptolemy (B.C. 218, 217), though the people of Judæa, as part of the battlefield and contested possession, were exposed to severe suffering, it was not the worse for their ultimate prospects. Antiochus at least, when at a later period (B.C. 198) left master of southern Syria, did but take occasion to heap on the Jews and Jerusalem new honours and exemptions.

The Syrian empire, as left by Antiochus the Great to his son, was greatly weaker than that which the first Seleucus founded. Scarcely, indeed, had the second of the line begun to reign (B.C. 283) when four sovereigns in Asia Minor established their complete independence:—the kings of Pontus, Bithynia, Cappadocia, and Pergamus. In the next reign—that of Antiochus Theos—the revolt of the Parthians under Arsaces (B.C. 250) was followed speedily by that of the distant province of Bactriana. For thirty years together the Parthians continued to grow at the expense of the Syrian monarchy. The great Antiochus passed a life of war (B.C. 223-187). In his youth he had to contend against his revolted satrap of Media, and afterwards against his kinsman Achæus, in Asia Minor. Besides this, he was seven years engaged in successful campaigns against the Parthians and the king of Bactriana; and, finally, met unexpected and staggering reverses in war with the Romans, so that his last days were inglorious and his resources thoroughly broken. Respecting the reign of his son, Seleucus Philopator (B.C. 187-176), we know little, except that he left his kingdom tributary to the Romans [see also *SELEUCUS PHILOPATOR*]. In Daniel, xi. 20, he is named a *raiser of taxes*, which shows what was the chief direction of policy in his reign. Seleucus having been assassinated by one of his courtiers, his brother Antiochus Epiphanes hastened to occupy the vacant throne, although the natural heir, Demetrius, son of Seleucus, was alive, but a hostage at Rome. In Daniel xi. 21 it is indicated that he gained the kingdom *by flatteries*; and there can be no doubt that a most lavish bribery was his chief instrument. According to the description in Livy (xli. 20), the magnificence of his largesses had almost the appearance of insanity.

A prince of such a temper and in such a position, whose nominal empire was still extensive,

though its real strength and wealth were departing, may naturally have conceived, the first moment that he felt pecuniary need, the design of plundering the Jewish temple. At such a crisis, the advantage of the deed might seem to overbalance the odium incurred: yet, as he would convert every Jew in his empire into a deadly enemy, a second step would become necessary—

42. [Antiochus Epiphanes.]

to crush the power of the Jews, and destroy their national organization. The design, therefore, of prohibiting circumcision and their whole ceremonial, would naturally ally itself to the plan of spoliation, without supposing any previous enmity against the nation on his part. We have written enough to show how surprising to the Jews must have been the sudden and almost incredible change of policy on the part of the rulers of Syria; and how peculiarly aggravated the enmity Antiochus Epiphanes must in any case have drawn on himself. Instead of crushing his apparently puny foes, he raised up heroes against himself [MACCABEES], who, helped by the civil wars of his successors, at length achieved the deliverance of their people; so that in the 176th year of the Seleucidæ (B.C. 143) their independence was formally acknowledged, and they began to date from this period as a new birth of their nation.

The change of policy, from conciliation to cruel persecution, which makes the reign of Epiphanes an era in the relation of the Jews to the Syrian monarchy, has perhaps had great permanent moral results. It is not impossible that perseverance in the conciliating plan might have sapped the energy of Jewish national faith: while it is certain that persecution kindled their zeal and cemented their unity. Jerusalem, by its sufferings, became only the more sacred in the eyes of its absent citizens; who vied in replacing the wealth which the sacrilegious Epiphanes had ravished. According to 1 Maccab. vi. 1-16, this king died shortly after an attempt to plunder a temple at Elymais; and Josephus follows that account.

An outline of the deeds of the kings of Syria in war and peace, down to Antiochus Epiphanes, is presented in the 11th chapter of Daniel; in which Epiphanes and his father are the two principal figures. The wars and treaties of the kings of Syria and Egypt from B.C. 280 to B.C. 165 are described so minutely and so truly, in vv. 6-36, as to force all reasonable and well-informed men to choose between the alternatives,—either that it is a most signal and luminous prediction, or that it was written after the event.

Besides Antiochus Epiphanes, the book of Maccabees mentions his son, called Antiochus

Epiphanes, and another young Antiochus, son of Alexander Balas, the usurper; both of whom were murdered at a tender age. In the two last chapters of the book a fourth Antiochus appears, called by the Greeks *Sidetes*, from the town of Sida, in Pamphylia. This is the last king of that house, whose reputation and power were not unworthy of the great name of Seleucus. In the year B.C. 134 he besieged Jerusalem, and having taken it next year, after a severe siege, he pulled down the walls, and reduced the nation once more to subjection, after only ten years' independence.

ANTIPAS, a person named as 'a faithful witness,' or martyr, in Rev. ii. 13.

2. ANTIPAS, or HEROD-ANTIPAS. [HERODIAN FAMILY.]

ANTIPATER. [HERODIAN FAMILY.]

ANTIPATRIS, a city built by Herod the Great, on the site of a former place called Caphar-saba. The spot was well watered, and fertile; a stream flowed round the city, and in its neighbourhood were groves of large trees. Caphar-saba was 120 stadia from Joppa; and between the two places Alexander Balas drew a trench, with a wall and wooden towers, as a defence against the approach of Antiochus. Antipatris also lay between Casarea and Lydia, its distance from the former place being twenty-six Roman miles. On the road from Ramlah to Nazareth, north of Ras-el Ain, there is a village called Kafir Saba; and as its position is almost in exact agreement with the position assigned to Antipatris, it is supposed to be the same place, this Kafir Saba being no other than the reproduced name of Caphar-saba, which, as in many other instances, has again supplanted the foreign, arbitrary, and later name of Antipatris. St. Paul was brought from Jerusalem to Antipatris by night, on his route to Casarea (Acts xxiii. 31).

ANTONIA, a fortress in Jerusalem, on the north side of the area of the temple, often mentioned by Josephus in his account of the later wars of the Jews. It was originally built by the Maccabees, under the name of Baris, and was afterwards rebuilt with great strength and splendour by the first Herod. This fortress is the 'castle' into which Paul was carried from the temple by the soldiers: from the stairs of which he addressed the people collected in the adjacent court (Acts xxi. 31-40).

APE. The word is in the Hebrew *Kaphi*, and it occurs only in 1 Kings x. 22 and 2 Chron. ix. 21, as among the curiosities in natural history brought back by Solomon's ships from their distant voyages to Ophir. The name seems to have been introduced along with the animals, for in Sanscrit and Malabaric *kapi* is the name for an ape. We cannot of course attempt to determine the species brought into Palestine on the occasion indicated; and the probability indeed is, that the name is a general one for all or any of the quadrupeds of which the Hebrews had any knowledge. When we consider the mode in which these animals were introduced, it is curious to compare this with the scene in the tomb of Thothmes III. at Thebes, where the presents and tributes of various distant nations are represented as being brought to the king. Among these are several living animals, includ-

43. [Apes from Egyptian Monuments.]

ing six quadrumanous animals. The smallest and most effaced may be apes; but the others, and in particular the three here copied, are undoubtedly Macaci or Cynoccephali, that is, a species of the genus baboon, or baboon-like apes. The association renders these figures interesting; but it is impossible to say that the animals brought to Solomon were of these kinds, or indeed to say to what species they should be referred [SATVR].

APPEL'LES, a Christian at Rome, whom Paul salutes in his Epistle to the Church there (Rom. xvi. 10), and calls 'approved in Christ,' i.e. an approved Christian. According to the old church traditions Appelles was one of the seventy disciples, and bishop either of Smyrna or Hieracleia.

APHARSACHITES or APHARSATHCHITES, the name of the nation to which belonged one portion of the colonists whom the Assyrian king planted in Samaria (Ezra iv. 9; v. 6).

A'PHEK: the name signifies *strength*; hence a citadel or fortified town. There were at least three places so called, viz. :—

1. APHEK, a city in the tribe of Asher (Josh. xiii. 4; xix. 30), called Aphik in Judg. i. 31, where we also learn that the tribe was unable to gain possession of it. A village called Afka is still found in Lebanon, situated at the bottom of a valley, and may possibly mark the site of this Aphek.

2. APHEK, a town near which Benhadad was defeated by the Israelites (1 Kings xx. 26. *sq.*), which seems to correspond to the Aphaca of Eusebius, situated to the east of the Sea of Galilee, and which is mentioned by Burckhardt, Seetzen, and others under the name of Feik.

3. APHEK, a city in the tribe of Issachar, not far from Jezreel, where the Philistines twice encamped before battles with the Israelites (1 Sam. iv. 1; xxix. 1; comp. xxviii. 4). Either

this or the first Aphek, but most probably this, was the *Aphek* mentioned in Josh. xii. 18, as a royal city of the Canaanites.

APIHE'KAH, a town in the mountains of Judah (Josh. xv. 23).

APHER'EMA, one of the three toparchies added to Judæa by the kings of Syria (1 Macc. xi. 34). This is perhaps the Ephraim or Ephraim mentioned in John xi. 54.

API'SES, head of the eighteenth sacerdotal family of the twenty-four into which the priests were divided by David for the service of the temple (1 Chron. xxiv. 15).

APOC'RYPHA (*hidden, secreted, mysterious*), a term in theology, applied in various senses to denote certain books claiming a sacred character.

In the *Bibliothèque Sacrée*, by the Rev. Dominican Fathers Richard and Giraud (Paris, 1822), the term is defined to signify—(1) anonymous or pseudepigraphal books; (2) those which are not publicly read, although they may be read with edification in private; (3) those which do not pass for authentic and of divine authority, although they pass for being composed by a sacred author or an apostle, as the *Epistle of Barnabas*; and (4) dangerous books composed by ancient heretics to favour their opinions. They also apply the name 'to books which, after having been contested, are put into the canon by consent of the churches, as Tobit,' &c. And Jahn applies it in its most strict sense, and that which it has borne since the fourth century, to books which, from their inscription or the author's name, or the subject, might easily be taken for inspired books, but are not so in reality.

The apocryphal books, such as the 3d and 4th books of Esdras, the Book of Enoch, &c., which were all known to the ancient Fathers, have descended to our times; and, although incontestably spurious, are of considerable value from their antiquity, as throwing light upon the religious and theological opinions of the first centuries. The most curious are the 3rd and 4th books of Esdras, and the Book of Enoch, which has been but recently discovered, and has acquired peculiar interest from its containing the passage cited by the apostle Jude [ENOCH]. Nor are the apocryphal books of the New Testament destitute of interest. Although the spurious Acts extant have no longer any defenders of their genuineness, they are not without their value to the Biblical student, and have been applied with success to illustrate the style and language of the genuine books, to which they bear a close analogy. Some of the apocryphal books have not been without their defenders in modern times. They are, however, regarded by most as originally not of an earlier date than the second century, and as containing interpolations which betray the fourth or fifth; they can, therefore, only be considered as evidence of the practice of the Church at the period when they were written.

Most of the apocryphal Gospels and Acts noticed by the fathers, and which are generally thought to have been the fictions of heretics in the second century, have long since fallen into oblivion. Of those which remain, although some have been considered by learned men as

genuine works of the apostolic age, yet the greater part are universally rejected as spurious, and as written in the second and third centuries. Whatever authority is to be ascribed to these documents, it cannot be denied that the early Church evinced a high degree of discrimination in the difficult task of distinguishing the genuine from the spurious books. 'It is not so easy a matter,' says Jones, 'as is commonly imagined, rightly to settle the canon of the New Testament. For my own part, I declare, with many learned men, that in the whole compass of learning I know no question involved with more intricacies and perplexing difficulties than this' (*New and Full Method*, i. 15). This writer conceives that testimony and tradition are the principal means of ascertaining whether a book be canonical or apocryphal. Inquiries of this kind, however, must of necessity be confined to the few. The mass of Christians, who have neither time nor other means of satisfying themselves, must confide, in questions of this kind, either in the judgment of the learned, or the testimony at least, if not the authority, of the Church; and it ought to be a matter of much thankfulness to the private Christian, that the researches of the most learned and diligent inquirers have conspired, in respect to the chief books of Scripture, in adding the weight of their evidence to the testimony of the Church Universal.

APOLLONIA, a city of Macedonia, in the province of Mygdonia, situated between Amphipolis and Thessalonica, thirty Roman miles from the former, and thirty six from the latter. St. Paul passed through Amphipolis and Apollonia in his way to Thessalonica (Acts xvii. 1).

APOLLOS, a Jew of Alexandria, is described as a *learned*, or, as some understand it, an *eloquent man*, well versed in the Scriptures and the Jewish religion (Acts xviii. 24). About A.D. 56 he came to Ephesus, where, in the synagogues, 'he spake boldly the things of the Lord, knowing only the baptism of John' (ver. 25); by which we are probably to understand that he knew and taught the doctrine of a Messiah, whose coming John had announced, but knew not that Jesus was the Christ. His fervour, however, attracted the notice of Aquila and Priscilla, whom Paul had left at Ephesus; and they instructed him in this higher doctrine, which he thenceforth taught openly, with great zeal and power (ver. 26). Having heard from his new friends, who were much attached to Paul, of that apostle's proceedings in Achaia, and especially at Corinth, he resolved to go thither, and was encouraged in this design by the brethren at Ephesus, who furnished him with letters of introduction. On his arrival there he was very useful in watering the seed which Paul had sown, and was instrumental in gaining many new converts from Judaism. There was perhaps no apostle or apostolical man who so much resembled Paul in attainments and character as Apollos. His immediate disciples became so much attached to him, as well nigh to have produced a schism in the Church, some saying, 'I am of Paul'; others, 'I am of Apollos'; others, 'I am of Cephas' (1 Cor. iii. 4-7, 22). There must, probably, have been some difference in their mode of teaching to occasion this; and from the first Epistle to the Corinthians it would appear that Apollos was not prepared to go so far

as Paul in abandoning the figments of Judaism, and insisted less on the (to the Jews) obnoxious position that the Gospel was open to the Gentiles. There was nothing, however, to prevent these two eminent men from being perfectly united in the bonds of Christian affection and brotherhood. When Apollos heard that Paul was again at Ephesus, he went thither to see him; and as he was there when the first Epistle to the Corinthians was written (A.D. 59), there can be no doubt that the apostle received from him his information concerning the divisions in that church, which he so forcibly reproveth. It strongly illustrates the character of Apollos and Paul, that the former, doubtless in disgust at those divisions with which his name had been associated, declined to return to Corinth; while the latter, with generous confidence, urged him to do so (1 Cor. xvi. 12). Paul again mentions Apollos kindly in Tit. iii. 13, and recommends him and Zenas the lawyer to the attention of Titus, knowing that they designed to visit Crete, where Titus then was.

APOSTLE, a person sent by another; a messenger.

The term is generally employed in the New Testament as the descriptive appellation of a comparatively small class of men, to whom Jesus Christ entrusted the organization of his church and the dissemination of his religion among mankind. At an early period of his ministry 'he ordained twelve' of his disciples 'that they should be with him.' 'These he named apostles.' Some time afterwards 'he gave to them power against unclean spirits to cast them out, and to heal all manner of disease'; 'and he sent them to preach the kingdom of God' (Mark iii. 14; Matt. x. 1-5; Mark vi. 7; Luke vi. 13; ix. 1). To them he gave 'the keys of the kingdom of God,' and constituted them princes over the spiritual Israel, that 'people whom God was to take from among the Gentiles, for his name' (Matt. xvi. 19; xviii. 18; xix. 28; Luke xxii. 30). Previously to his death he promised to them the Holy Spirit, to fit them to be the founders and governors of the Christian church (John xiv. 16, 17, 26; xv. 26, 27; xvi. 7-15). After his resurrection he solemnly confirmed their call, saying, 'As the Father hath sent me, so send I you; and gave them a commission to 'preach the Gospel to every creature' (John xx. 21-23; Matt. xxviii. 18-20). After his ascension he, on the day of Pentecost, communicated to them those supernatural gifts which were necessary to the performance of the high functions he had commissioned them to exercise; and in the exercise of these gifts, they, in the Gospel history and in their epistles, with the Apocalypse, gave a complete view of the will of their Master in reference to that new order of things of which he was the author. They 'had the mind of Christ.' They spoke 'the wisdom of God in a mystery.' That mystery 'God revealed to them by his Spirit,' and they spoke it 'not in words which man's wisdom teacheth, but which the Holy Ghost teacheth.' They were 'ambassadors for Christ,' and besought men, 'in Christ's stead, to be reconciled to God.' They authoritatively taught the doctrine and the law of their Lord; they organized churches, and required them to 'keep the traditions,' i.e. the doctrines and 'ordinances delivered to them' (Acts ii.

1 Cor. ii. 16; ii. 7, 10, 13; 2 Cor. v. 20; 1 Cor. xi. 2). Of the twelve originally ordained to the apostleship, one, Judas Iscariot, 'fell from it by transgression,' and Matthias, 'who had companied' with the other Apostles 'all the time that the Lord Jesus went out and in among them,' was by lot substituted in his place (Acts i. 17-26). Saul of Tarsus, afterwards termed Paul, was also miraculously added to the number of these permanent rulers of the Christian society (Acts ix.; xxii.; xxvi. 15-18; 1 Tim. i. 12; ii. 7; 2 Tim. i. 11).

The characteristic features of this highest office in the Christian church have been very accurately delineated by McLean, in his *Apostolic Commission*. 'It was essential to their office—

1. That they should have seen the Lord, and been eye and ear witnesses of what they testified to the world (John xv. 27). This is laid down as an essential requisite in the choice of one to succeed Judas (Acts i. 21, 22). Paul is no exception here; for, speaking of those who saw Christ after his resurrection, he adds, 'and last of all he was seen of me' (1 Cor. xv. 8). And this he elsewhere mentions as one of his apostolic qualifications: 'Am I not an apostle? have I not seen the Lord?' (1 Cor. ix. 1). So that his 'seeing that Just One and hearing the word of his mouth' was necessary to his being 'a witness of what he thus saw and heard' (Acts xxii. 14, 15).
2. They must have been immediately called and chosen to that office by Christ himself. This was the case with every one of them (Luke vi. 13; Gal. i. 1). Matthias not excepted; for, as he had been a chosen disciple of Christ before, so the Lord, by determining the lot, declared his choice, and immediately called him to the office of an apostle (Acts i. 24-26).
3. Infallible inspiration was also essentially necessary to that office (John xvi. 13; 1 Cor. ii. 10; Gal. i. 11, 12). They had not only to explain the true sense and spirit of the Old Testament (Luke xxiv. 27; Acts xxvi. 22, 23; xxviii. 23), which were hid from the Jewish doctors, but also to give forth the New Testament revelation to the world, which was to be the unalterable standard of faith and practice in all succeeding generations (1 Pet. i. 25; 1 John iv. 6).
4. Another apostolic qualification was the power of working miracles (Mark xvi. 20; Acts ii. 43), such as speaking with divers tongues, curing the lame, healing the sick, raising the dead, discerning of spirits, conferring those gifts upon others, &c. (1 Cor. xii. 8-11). These were the credentials of their divine mission (2 Cor. xii. 12). Miracles were necessary to confirm their doctrine at its first publication, and to gain credit to it in the world as a revelation from God, and by these 'God bare them witness' (Heb. ii. 4).
5. To these characteristics may be added the *universality* of their mission. Their charge was not confined to any particular visible church, like that of ordinary pastors, but, being the oracles of God to men, they had 'the care of all the churches' (2 Cor. xi. 28). They had a power to settle their faith and order as a model to future ages, to determine all controversies (Acts xvi. 4), and to exercise the rod of discipline upon all offenders, whether pastors or flock (1 Cor. v. 3-6; 2 Cor. x. 8; xiii. 10).

It must be obvious, from this scriptural account of the apostolical office, that the Apostles

had, in the strict sense of the term, no successors. Their qualifications were supernatural, and their work, once performed, remains in the infallible record of the New Testament, for the advantage of the Church and the world in all future ages. They are the only authoritative teachers of Christian doctrine and law. All official men in Christian churches can legitimately claim no higher place than expounders of the doctrines and administrators of the laws found in their writings.

The word 'apostle' occurs once in the New Testament (Heb. iii. 1) as a descriptive designation of Jesus Christ: 'The apostle of our profession,' i. e. the apostle whom we profess or acknowledge. The Jews were in the habit of applying the corresponding Hebrew term to the person who presided over the synagogue, and directed all its officers and affairs. The Church is represented as 'the house or family of God,' over which he had placed, during the Jewish economy, Moses, as the superintendent,—over which he has placed, under the Christian economy, Christ Jesus. The import of the term *apostle*, is—divinely-commissioned superintendent; and of the whole phrase, '*the apostle of our profession*,' the divinely-commissioned superintendent, whom we Christians acknowledge, in contradistinction to the divinely-appointed superintendent Moses, whom the Jews acknowledged.

It is scarcely worth while to remark that the Creed, commonly called 'The Apostles', though very ancient, has no claim to the name, except as it contains apostolical doctrine.

APPEAL. The right of appeal to superior tribunals has generally been considered an essential concomitant of inferior judicatories. When, from the paucity of the population or any other cause, the subjects of litigation are few, justice is usually administered by the first authority in the state, from whose award no appeal can lie. But when the multiplication of causes precludes the continuance of this practice, and one or more inferior courts take cognizance of the less important matters, the right of appeal to the superior tribunal is allowed, with increasing restrictions as, in the course of time, subjects of litigation multiply, and as the people become weaned from the notion that the administration of justice is the proper function of the chief civil magistrate.

In the desert Moses at first judged all causes himself; and when, finding his time and strength unequal to his duty, he, at the suggestion of Jethro, established a series of judicatories in a numerically ascending scale (Exod. xviii. 13-26), he arranged that cases of difficulty should be referred from the inferior to the superior tribunals, and in the last instance to himself. Although not distinctly stated, it appears from various circumstances that the clients had a right of appeal, similar to that which the courts had of reference. When the prospective distribution into towns, of the population which had hitherto remained in one compact body, made other arrangements necessary, it was directed that there should be a similar reference of difficult cases to the metropolitan court or chief magistrate ('the judge that shall be in those days') for the time being (Deut. xvi. 18; xvii. 8-12). That there was a concur-

rent right of appeal, appears from the use Absalom made of the delay of justice, which arose from the great number of cases that came before the king his father (2 Sam. xv. 2-4). These were doubtless appeal cases according to the above direction.

Of the later practice, before and after the time of Christ, we have some clearer knowledge from Josephus and the Talmudists. It seems that a man could carry his case by appeal through all the inferior courts to the Grand Sanhedrim at Jerusalem, whose decision was in the highest degree absolute and final. The Jews themselves trace the origin of these later usages up to the time of Moses: they were at all events based on early principles, and therefore reflect back some light upon the intimations respecting the right of appeal which we find in the sacred books.

The most remarkable case of appeal in the New Testament belongs to another class. It is the celebrated appeal of St. Paul from the tribunal of the Roman procurator Festus to that of the emperor; in consequence of which he was sent as a prisoner to Rome (Acts xxv. 10, 11). Such an appeal having been once lodged, the governor had nothing more to do with the case: he could not even dismiss it, although he might be satisfied that the matter was frivolous, and not worth forwarding to Rome. Accordingly, when Paul was again heard by Festus and king Agrippa (merely to obtain materials for a report to the emperor), it was admitted that the apostle might have been liberated if he had not appealed to Caesar (Acts xxvi. 32).

It may easily be seen that a right of appeal which, like this, involved a long and expensive journey, was by no means frequently resorted to. In lodging his appeal Paul exercised one of the high privileges of Roman citizenship which belonged to him by birth (Acts xxii. 28). [CITIZENSHIP.] 'The right of appeal connected with that privilege originated in the Valerian, Porcian, and Sempronian laws, by which it was enacted that if any magistrate should order flagellation or death to be inflicted upon a Roman citizen, the accused person might appeal to the judgment of the people. But what was originally the prerogative of the people had in Paul's time become that of the emperor, and appeal therefore was made to him. Hence Pliny mentions that he had sent to Rome some Christians, who were Roman citizens, and had appealed unto Caesar. This privilege could not be disallowed by any magistrate to any person whom the law entitled to it. Indeed, very heavy penalties were attached to any refusal to grant it, or to furnish the party with facilities for going to Rome.

APPHIA, the name of a woman (Philemon 2) who is supposed by Chrysostom and Theodoret to have been the wife of Philemon.

APPII-FORUM, a market town in Italy, 43 Roman miles from Rome, on the great road from Rome to Brundisium, constructed by Appius Claudius. The remains of an ancient town, supposed to be Appii-Forum, are still observed at a place called Casarillo di Santa Maria, on the border of the Pontine marshes. When Saint Paul was taken to Italy, some of the Christians of Rome, being apprised of his approach, journeyed to meet him as far as 'Appii-Forum and

the Three Taverns' (Acts xxviii. 15), a town eight or ten miles nearer to Rome than Appii-Forum. The 'Three Taverns' was certainly a place of rest and refreshment, probably on account of the badness of the water at Appii-Forum, and the probability is that some of the Christians remained at the 'Three Taverns,' where it was known the advancing party would rest, while some others went on as far as Appii-Forum to meet Paul on the road.

APPLE. The word *Tappuach* is thus rendered in the Authorized Version. Most authors on Biblical Botany admit that *apple* is not the correct translation, for that fruit is indifferent in Palestine, being produced of good quality only on Mount Lebanon, and in Damascus. Many contend that 'quince' is the correct translation of *Tappuach*. Though somewhat more suitable than the apple, we think that neither the quince tree nor fruit is so superior to others as to be selected for notice in the passages of Scripture where *tappuach* occurs. The citron, we think, has the best claim to be considered the *Tappuach* of Scripture, as it was esteemed by the ancients, and known to the Hebrews, and conspicuously different, both as a fruit and a tree, from the ordinary vegetation of Syria, and the only one of the orange tribe which was known to the ancients. The orange, lemon, and lime, were introduced to the knowledge of Europeans at a much later period, probably by the Arabs from India. That the citron was well known to the Hebrews we have the assurance in the fact mentioned by Josephus, that at the Feast of Tabernacles king Alexander Jannæus was pelted with citrons, which the Jews had in their hands; for, as he says, 'the law required that at that feast every one should have branches of the palm-tree and citron-tree. There is nothing improbable in the Hebrews having made use of boughs of the citron, as it was a native of Media, and well known to the Greeks at a very early period; and indeed on some old coins of Samaria, the citron may be seen, as well as the palm-tree; and it is not an unimportant confirmation that the Jews still continue to make offerings of citrons at the Feast of Tabernacles. Citrons, accordingly, are imported in considerable quantities for this purpose, and are afterwards sold, being more highly esteemed after having been so offered.

The *tappuach*, or citron-tree, is mentioned chiefly in the Canticles, ch. ii. 3, 'as the citron tree among the trees of the wood'; ver. 5, 'Comfort me with citrons, for I am sick of love'; vii. 8, 'The smell of thy nose like citrons'; so in viii. 5. Again, in Prov. xxv. 11, 'A word fitly spoken is like apples of gold (or rather golden citrons) in baskets of silver.' In Joel i. 12, it is enumerated with the vine, the fig-tree, the palm, and pomegranate, as among the most valuable trees of Palestine. The rich colour, fragrant odour, and handsome appearance of the tree, whether in flower or in fruit, are particularly suited to all the above passages of Scripture.

AQUILA, a Jew with whom Paul became acquainted on his first visit to Corinth; a native of Pontus, and by occupation a tent-maker. He and his wife Priscilla had been obliged to leave Rome in consequence of an edict issued by the

Emperor Claudius, by which all Jews were banished from Rome. Whether Aquila and Priscilla were at that time converts to the Christian faith cannot be positively determined; but at all events, they had embraced Christianity before Paul left Corinth; for we are informed that they accompanied him to Ephesus, and meeting there with Apollos, who 'knew only the baptism of John,' they 'instructed him in the way of God more perfectly' (Acts xviii. 25, 26). From that time they appear to have been zealous promoters of the Christian cause. Paul styles them his 'helpers in Christ Jesus,' and intimates that they had exposed themselves to imminent danger on his account (Rom. xvi. 3, 4). When Paul wrote his epistle to the Romans they were at Rome; but some years after they returned to Ephesus, for Paul sends salutations to them in his Second Epistle to Timothy (2 Tim. iv. 19). Their occupation as tent-makers probably rendered it necessary for them to keep a number of workmen constantly resident in their family, and to these (to such of them at least as had embraced the Christian faith) may refer the remarkable expression, '*the Church that is in their house.*'

AR, the capital city of the Moabites (Num. xxi. 28; Deut. ii. 9, 18, 29), near the river Arnon (Deut. ii. 18, 24; Num. xxi. 13-15). It appears to have been burnt by King Sihon (Num. xxi. 28), and Isaiah, in describing the future calamities of the Moabites, says, 'In the night, Ar of Moab is laid waste and brought to silence' (Isa. xv. 1). In his comment on this passage, Jerome states that in his youth there was a great earthquake, by which Ar was destroyed in the night-time.

This city was also called Rabbah or Rabbath, and, to distinguish it from Rabbath of Ammon, Rabbath-Moab. The site still bears the name of Rabbah. It is about 17 miles east of the Dead Sea, 10 miles south of the Arnon (Modjeb), and about the same distance north of Kerek. The ruins of Rabbah are situated on a low hill, which commands the whole plain. They present nothing of interest except two old Roman temples and some tanks.

ARA'BIA, an extensive region occupying the south-western extremity of Asia, between 12° 45' and 34½° N. lat., and 32½° and 60° E. long. from Greenwich; having on the W. the Isthmus of Suez and the Red Sea (called from it the *Arabian Gulf*), which separate it from Africa; on the S. the Indian Ocean; and on the E. the Persian Gulf and the Euphrates. The boundary to the north has never been well defined. It is one of the few countries of the south where the descendants of the aboriginal inhabitants have neither been extirpated nor expelled by northern invaders. They have not only retained possession of their ancestral homes, but have sent forth colonies to all the adjacent regions, and even to more distant lands, both in Africa and Asia.

With the history of no country save that of Palestine are there connected so many hallowed and impressive associations as with that of Arabia. Here lived and suffered the holy patriarch Job; here Moses, when 'a stranger and a shepherd,' saw the burning, unconsuming bush; here Elijah found shelter from the rage

of persecution; here was the scene of all the marvellous displays of divine power and mercy that followed the deliverance of Israel from the Egyptian yoke, and accompanied their journeyings to the Promised Land; and here Jehovah manifested himself in visible glory to his people. From the influence of these associations, combined with its proximity to Palestine, and the close affinity in blood, manners, and customs between the northern portion of its inhabitants and the Jews, Arabia is a region of peculiar interest to the student of the Bible; and it is chiefly in its relation to subjects of Bible study that we are now to consider it.

In early times the Hebrews included a part of what we call Arabia among the countries they vaguely designated as 'the East,' the inhabitants being numbered among the 'Sons of the East,' i. e. Orientals. But there is no evidence to show that these phrases are ever applied to the whole of the country known to us as Arabia. They appear to have been commonly used in speaking of those parts which lay due east of Palestine, or on the north-east and south-east; though occasionally they do seem to point to tracts which lay indeed to the south and south-west of that country, but to the east and south-east of Egypt.

44. [Bedouin Arabs.]

We find the name *Arab* first beginning to occur about the time of Solomon. It designated a portion of the country, an inhabitant being called Arabi, an Arabian (Isa. xiii. 20), or in later Hebrew, Arbi (Neh. ii. 19), the plural of which was Arbim (2 Chr. xxi. 16), or Arbiim (*Arabians*) (2 Chr. xvii. 11). In some places these names seem to be given to the Nomadic tribes generally (Isa. xiii. 20; Jer. iii. 2) and their country (Isa. xxi. 13). The kings of

Arabia from whom Solomon (2 Chr. ix. 14) and Jehosaphat (2 Chr. xvii. 11) received gifts were, probably, Beduin chiefs; though in the place parallel to the former text (1 Kings x. 15), instead of *Arab* we find *Ereb*, rendered in Jer. xxv. 20, 24, 'mingled people,' but which Gesenius, following the Chaldee, understands to mean 'foreign allies.' It is to be remarked, however, that in all the passages where the word *Arab* occurs it designates only a small portion of the territory known to us as Arabia. Thus in the account given by Ezekiel (xxvii. 21) of the Arabian tribes that traded with Tyre, mention is specially made of *Arab* (comp. Jer. xxv. 24). In 2 Chr. xxi. 16; xxii. 1; xxvi. 7; Neh. iv. 7, we find the Arabians classed with the Philistines, the Ethiopians (i. e. the Asiatic Cushites, of whom they are said to have been neighbours), the Mehnims, the Ammonites, and Ashdodites. At what period this name *Arab* was extended to the whole region it is impossible to ascertain. From it the Greeks formed the word *Arabia*, which occurs twice in the New Testament; in Gal. i. 17, in reference probably to the tract adjacent to Damascus Syria, and in Gal. iv. 25, in reference to the peninsula of Mount Sinai. Arabs are mentioned among the strangers assembled at Jerusalem at the Pentecost (Acts ii. 11).

The early Greek geographers mention only two divisions of this vast region, *Happy* and *Desert Arabia*. But after the city of Petra, in Idumæa, had become celebrated as the metropolis of a commercial people, the Nabathæans, it gave name to a third division, viz. *Arabia Petraea* (improperly translated *Stony Arabia*); and this threefold division has obtained throughout Europe ever since.

1. *ARABIA FELIX*, i. e. *Happy Arabia*. This part of Arabia lies between the Red Sea on the west and the Persian Gulf on the east, the boundary to the north being an imaginary line drawn between their respective northern extremities, Akaba and Basra or Bussora. It thus embraces by far the greater portion of the country known to us as Arabia.

Arabia may be described generally as an elevated table-land, the mountain ranges of which are by some regarded as a continuation of those of Syria. In Arabia Felix the ridges, which are very high in the interior, slope gently on the east towards the Persian Gulf, and on the north-east towards the vast plains of the desert. On the west the declivities are steeper, and on the north-west the chains are connected with those of Arabia Petraea. Commencing our survey at the north end of the Red Sea, the first province which lies along its shore is the *Hedjaz*. This was the cradle of Mohammedan superstition, containing both Mecca, where the prophet was born, and Medina, where he was buried; and hence it became the Holy Land of the Moslem, whither they resort in pilgrimage from all parts of the East. It is on the whole a barren tract, consisting chiefly of rugged mountains and sandy plains. Still more unproductive, however, is the long, flat, dreary belt, of varying width, called *Tehama*, which runs along the coast to the south of Hedjaz, and was at no distant period covered by the sea. But next to this comes *Yemen*, the true Arabia Felix of the ancients,

'Araby the Blest' of modern poets, and doubtless the finest portion of the peninsula. Yet if it be distinguished for fertility and beauty, it is chiefly in the way of contrast, for it is far from coming up to the expectations which travellers had formed of it. Turning from the west to the south coast of the peninsula, we next come to the extensive province of *Hhadramaut* (the *Hazarmaveth* of the Bible), a region not unlike Yemen in its general features, with the exception of the tracts called *Mahhrah* and *Sahar*, which are dreary deserts. The south-east corner of the peninsula, between *Hhadramaut* and the Persian Gulf, is occupied by the important district of *Oman*, which has been in all ages famous for its trade, which has been greatly extended by the present innaum of Muscat. Along the Persian Gulf northward stretches the province of *Lahsa*, or rather *El Hasa*, to which belong the Bahrein Islands, famous for their pearls. The districts we have enumerated all lie along the coasts, but beyond them in the south stretches the vast desert of *Akhaf*, or *Roba-el-Khali*, i. e. 'the empty abode,' a desolate and dreary unexplored waste of sand. To the north of this extends the great central province of *Nedched* or *Nejd*. It may be described as having been the great *officina gentium* of the south, as were Scandinavia and Tartary of the north; for it is the region whence there issued at different periods those countless hordes of Arabs which overran a great part of Asia and Africa. Here too was the origin and the seat of the Wahabees (so formidable until subdued in 1818 by Mehemet Ali, pasha of Egypt), their chief town being *Dereyeh*.

The geological structure and mineralogical productions of this part of Arabia are in a great measure unknown. In the mountains about Mecca and Medina the predominant rocks are of grey and red granite, porphyry, and limestone. This is also the case in the great chain that runs southward towards Maskat; only that in the ridge that rises behind the *Tehama* there is found schistus and basalt instead of granite. Traces of volcanic action may be perceived around Medina, as also at Aden and in many other parts of the peninsula. Hot-springs are of frequent occurrence on the Hadjee or pilgrim road to Mecca. The ancients believed that Arabia yielded both gold and precious stones, but Niebuhr doubts if this ever was the case. The most valuable ore found now is the lead of Oman: what is called the Mocha stone is a species of agate that comes from India. The native iron is coarse and brittle; at Loheia and elsewhere there are hills of fossil salt. Arabia Felix has always been famous for frankincense, myrrh, aloes, balsam, gums, cassia, &c.; but it is doubtful whether the last-mentioned and other articles supposed to be indigenous were not imported from India. Here are found all the fruits of temperate and warm climates, among which the *date*, the fruit of the palm tree, is the most common, and is, along with the species of grain called *dhourra*, the staple article of food. But the most valuable vegetable production is coffee; for Yemen, if not its native country, is the *habitat* where it has reached the greatest state of perfection. In the animal kingdom Arabia possesses, in common with the adjacent

regions, the camel, panthers, lynxes, hyenas, jackals, gazelles, asses (wild and tame), monkeys, &c. But the glory of Arabia is its *horse*. As in no other country is that animal so much esteemed, so in no other are its noble qualities of swiftness, endurance, temper, attachment to man, so finely developed. Of the insect tribes, the locust, both from its numbers and its destructiveness, is the most formidable scourge to vegetation. The Arabian seas swarm with fish, sea-fowl, and shells; coral abounds in the Red Sea, and pearls in the Persian Gulf.

2. **ARABIA DESERTA.** This takes in that portion of the country which lies north of Arabia Felix, and is bounded on the north-east by the Euphrates, on the north-west by Syria, and on the west by Palestine and Arabia Petraea. So far as it has yet been explored, Desert Arabia appears to be one continuous, elevated, interminable *steppe*, occasionally intersected by ranges of hills. Sand and salt are the chief elements of the soil, which in many places is entirely bare, but elsewhere yields stunted and thorny shrubs or thinly-scattered saline plants. That part of the wilderness called *El Ihammad* lies on the Syrian frontier, extending from the Haaran to the Euphrates, and is one immense dead and dreary level, very scantily supplied with water, except near the banks of the river, where the fields are irrigated by wheels and other artificial contrivances.

The sky in these deserts is generally cloudless, but the burning heat of the sun is moderated by cooling winds, which, however, raise fearful tempests of sand and dust. Here, too, as in other regions of the East, occasionally prevails the burning, suffocating south-east wind, called by the Arabs *El Hharir* (the Hot), but more commonly *Samum*, and by the Turks *Saucyli* (both words meaning 'the Poisonous'), the effects of which, however, have by some travellers been greatly exaggerated. This is probably 'the east wind' and the 'wind from the desert' spoken of in Scripture. Another phenomenon, which is not peculiar, indeed, to Desert Arabia, but is seen there in greatest frequency and perfection, is what the French call the *mirage*, the delusive appearance of an expanse of water, created by the tremulous, undulatory movement of the vapours raised by the excessive heat of a meridian sun. It is called in Arabic *scrab*, and is no doubt the Hebrew *sarab* of Isa. xxxv. 7, which our translators have rendered 'the parched ground.'

3. **ARABIA PETRÆA** appears to have derived its name from its chief town *Petra* (i. e. a rock), although (as is remarked by Burckhardt) the epithet is also appropriate on account of the rocky mountains and stony plains which compose its surface. It embraces all the north-western portion of the country; being bounded on the east by Desert and Happy Arabia, on the north by Palestine and the Mediterranean, on the west by Egypt, and on the south by the Red Sea. This division of Arabia has been of late years visited by a great many travellers from Europe, and is consequently much better known than the other portions of the country. Confining ourselves at present to a general outline, we refer for details to the articles *SINAI*, *EXODUS*, *EDOM*, *MOAB*, &c. Beginning at the northern

frontier, there meets the elevated plain of Belka, to the east of the Dead Sea, the district of Kerak (Kir), the ancient territory of the Moabites, their kinsmen of Ammon having settled to the north of this, in Arabia Deserta. The north border of Moab was the brook Arnon, now the Wady-el-Modjeb; to the south of Moab, separated from it by the Wady-el-Ahsey, lay Mount Seir, the dominion of the Edomites, or *Idumæa*, reaching as far as to Elath on the Red Sea. The great valley which runs from the Dead Sea to that point consists, first, of el-Ghor, which is comparatively low, but gradually rises by a succession of limestone cliffs into the more elevated plain of *elArabah*, formerly mentioned. 'We were now,' says Professor Robinson (*Biblical Researches*, vol. ii. p. 502), 'upon the plain or rather the rolling desert, of the *Arabah*; the surface was in general loose gravel and stones, everywhere furrowed and torn with the beds of torrents. A more frightful desert it had hardly been our lot to behold. The mountains beyond presented a most uninviting and hideous aspect; precipices and naked conical peaks of chalky and gravelly formation rising one above another without a sign of life or vegetation.' The character of the mountains on the east of Arabah is quite different from those on the west. The latter, which seemed to be not more than two-thirds as high, are wholly desert and sterile; while these on the east appear to enjoy a sufficiency of rain, and are covered with tufts of herbs and occasional trees. This mountainous region is divided into two districts: that to the north is called *Jabal* (i. e. mountains, the Gebel of Ps lxxxiii. 7); that to the south *Esh-Sherah*. To the district of Esh-Sherah belongs Mount Hor, the burial-place of Aaron, towering above the Wady Moua (valley of Moses), where are the celebrated ruins of Petra (the ancient capital of the Nabathæo-Idumæans), the mountainous tract immediately west of the Arabah, is a desert limestone region, full of precipitous ridges, through which no travelled road has ever passed.

To the west of Idumæa extends the 'great and terrible wilderness' of *et-Tih*, i. e. 'the Wandering,' so called from being the scene of the wanderings of the children of Israel. It consists of vast interminable plains, a hard gravelly soil, and irregular ridges of limestone hills. It appears that the middle of this desert is occupied by a long central basin, extending from Jebel-et-Tih (i. e. the mountain of the wandering, a chain pretty far south) to the shores of the Mediterranean. This basin descends towards the north with a rapid slope, and is drained through all its length by Wady-el-Arish, which enters the sea near the place of the same name, on the borders of Egypt.

This description of the formation of the northern desert will enable us to form a more distinct conception of the general features of the peninsula of Sinai, which lies south of it, being formed by the two arms of the Red Sea, the Gulfs of Akaba and Suez. If the parallel of the north coast of Egypt be extended eastward to the great Wady-el-Arabah, it appears that the desert, south of this parallel, rises gradually towards the south, until on the summit of the ridge Et-Tih, between the two gulfs, it attains the elevation of 4322 feet. The waters of all this great tract

flow off northward either to the Mediterranean or the Dead Sea. The Tih forms a sort of offset, and along its southern base the surface sinks at once to the height of only about 3000 feet, forming the sandy plain which extends nearly across the peninsula. After this the mountains of the peninsula proper commence, and rise rapidly through the formations of sandstone, grüstein, porphyry, and granite, into the lofty masses of St. Catherine and Um Shamer, the former of which has an elevation of 8168 Paris feet, or nearly double that of the Tih. Here the waters all run eastward or westward to the Gulfs of Akaba and Suez.

The soil of the Sinaitic peninsula is in general very unproductive, yielding only palm-trees, acacias, tamarisks, colocintida, and dwarfish, thorny shrubs. Among the animals may be mentioned the mountain-goat, gazelles, leopards, a kind of marmot called *wabber* (Coxey), the *sheeb*, supposed by Col. C. Hamilton Smith to be a species of wild wolf-dog, &c.: of birds there are eagles, partridges, pigeons, the *katta*, a species of quail, &c. There are serpents, as in ancient times (Num. xxi. 4, 5), and travellers speak of a large lizard called *dhub*, common in the desert, but of unusually frequent occurrence here. The peninsula is inhabited by Bedouin Arabs, and its entire population was estimated by Burckhardt at not more than 4000 souls.

Though this part of Arabia must ever be memorable as the scene of the journeying of the Israelites from Egypt to the Promised Land, yet very few of the spots mentioned in Scripture can now be identified; nor, after the lapse of so many centuries, ought that to be occasion of surprise. According to Niebuhr, Robinson, &c. they crossed the Red Sea near Suez, but the tradition of the country fixes the point of transit eight or ten miles south of Suez, opposite the place called Ayan Mousa, i. e. the Fountains of Moses, where Robinson recently found seven wells, some of which, however, were mere excavations in the sand. About 15½ hours (33 geographical miles) south-east of that is the Well of Hawārah, the *Marah* of Scripture, whose bitter water is pronounced by the Arabs to be the worst in these regions. Two or three hours south of Hawārah the traveller comes to the Wady Ghurundel, supposed to be the *Elim* of Moses. From the plain of El-kaa, which Robinson takes to be the desert of Sin (not to be confounded with that of *Zin*, which belonged to the great desert of Kadesh), they would enter the Sinaitic range, probably along the upper part of Wady Feiran and through the Wady-esh-Sheikh, one of the principal valleys of the peninsula. The Arabs call this whole cluster of mountains *Jebel-et-Tūr*; the Christians generally designate it as '*Sinai*,' and give the name of *Horeb* to a particular mountain, whereas in Scripture the names are used interchangeably. [SINAI.]

Having now taken a rapid survey of this extensive region in its three divisions, let us advert to the people by whom it was at first settled, and by whose descendants it is still inhabited. There is a prevalent notion that the Arabs, both of the south and north, are descended from Ishmael; but the idea of the southern Arabs being of the posterity of Ishmael is entirely without foundation, and seems to have originated in the tra-

dition invented by Arab vanity, that they, as well as the Jews, are of the seed of Abraham—a vanity which, besides disfiguring and falsifying the whole history of the patriarch and his son Ishmael, has transferred the scene of it from Palestine to Mecca. If we go to the most authentic source of ancient ethnography, the book of Genesis, we there find that the vast tracts of country known to us under the name of Arabia gradually became peopled by a variety of tribes of different lineage, though it is now impossible to determine the precise limits within which they fixed their permanent or nomadic abode. We shall here exhibit a tabular view of these races in chronological order, i. e. according to the successive eras of their respective progenitors:—

I. HAMITES, i. e. the posterity of *Cush*, Ham's eldest son, whose descendants appear to have settled in the south of Arabia, and to have sent colonies across the Red Sea to the opposite coast of Africa; and hence *Cush* became a general name for 'the south,' and specially for Arabian and African Ethiopia. The sons of *Cush* (Gen. x. 7) were Seba, Havilah, Sabtah, Raamah or Ragma (his sons, Sheba and Dedan), and Sab-thea.

II. SHEMITES, including the following:

A. *Joktanites*, i. e. the descendants of Joktan, the second son of Eber, Shem's great-grandson (Gen. x. 25, 26). According to Arab tradition Joktan, after the confusion of tongues and dispersion at Babel, settled in Yemen, where he reigned as king. Joktan had thirteen sons, some of whose names may be obscurely traced in the designations of certain districts in Arabia Felix. Their names were Almodad, Shaleph, Hhazarmaveth (preserved in the name of the province of Hhadramaut), Jarach, Hadoram, Uzal (believed by the Arabs to have been the founder of Sanaa in Yemen), Dikla, Obal, Alimael, Sheba, Ophir, Havilah, and Jobab.

B. *Abrahamites*, divided into—

(a) *Hagarites* or *Hagarites*, so called from Hagar the mother; otherwise termed *Ishmaelites* from her son. The twelve sons of Ishmael (Gen. xxv. 13-15), who gave names to separate tribes, were Nebaioth (the Nabathæans in Arabia Petraea), Kedar, Abdeel, Mibsam, Mishna, Dumah, Massa, Hadad or Hadar, Thema, Jetur, Naphish (the Itureans and Naphishæans near the tribe of Gad: 1 Chron. v. 19, 20), and Kedmah. They appear to have been for the most part located near to Palestine on the east and south-east.

(b) *Keturahites*, i. e. the descendants of Abraham and his second wife Keturah, by whom he had six sons (Gen. xxv. 2): Simram, Jokshan (who, like Raamah, son of Cush, was also the father of two sons, Sheba and Dedan), Medan, Midian, Jishbak, and Shuah. Among these, the posterity of *Midian* became the best known.

(c) *Edomites*, i. e. the descendants of Esau, who possessed Mount Seir and the adjacent region, called from them Idumæa. They and the Nabathæans formed in later times a flourishing commercial state, the capital of which was the remarkable city called Petra.

C. *Nahorites*, the descendants of Nahor, Abraham's brother, who seem to have peopled the land of Uz, the country of Job, and of *Buz*, the country of his friend Elihu the Buzite, these

being the names of Nahor's sons (Gen. xxii. 21).

D. *Lotites*, viz.:

(a) *Meabites*, who occupied the northern portion of Arabia Petraea, as above described; and their kinsmen, the —

(b) *Ammonites*, who lived north of them, in Arabia Deserta.

Besides these, the Bible mentions various other tribes who resided within the bounds of Arabia, but whose descent is unknown, e.g. the Amalekites, the Kenites, the Horites, the inhabitants of Maon, Hazor, Vedan, and Javan-Meusal (Ezek. xxvii. 19).

In process of time some of these tribes were perhaps wholly extirpated (as seems to have been the case with the Amalekites), but the rest were more or less mingled together by inter-marriages, by military conquests, political revolutions, and other causes of which history has preserved no record; and thus amalgamated, they became known to the rest of the world as the 'Arabs,' a people whose physical and mental characteristics are very strongly and distinctly marked. In both respects they rank very high among the nations; so much so, that some have regarded them as furnishing the *prototype*—the primitive model form—the standard figure of the human species.

The inhabitants of Arabia have, from remote antiquity, been divided into two great classes, viz. the *townsmen* (including villagers), and the *men of the desert*, such being the meaning of the word '*Bedawees*' or Bedouins, the designation given to the 'dwellers in the wilderness.' From the nature of their country, the latter are necessitated to lead the life of *nomades*, or wandering shepherds; and since the days of the patriarchs (who were themselves of that occupation) the extensive *steppes* which form so large a portion of Arabia, have been traversed by a pastoral but warlike people, who, in their mode of life, their food, their dress, their dwellings, their manners, customs, and government, have always continued, and still continue, almost unalterably the same. They consist of a great many separate tribes, who are collected into different encampments dispersed through the territory which they claim as their own; and they move from one spot to another (commonly in the neighbourhood of pools or wells) as soon as the stunted pasture is exhausted by their cattle. It is only here and there that the ground is susceptible of cultivation, and the tillage of it is commonly left to peasants, who are often the vassals of the Bedawees, and whom (as well as all 'townsmen') they regard with contempt as an inferior race. Having constantly to shift their residence, they live in movable tents (comp. Isa. xiii. 20; Jer. xlix. 29), from which circumstance they received from the Greeks the name of *Scenites*, dwellers in tents [TEXTS]. The heads of tribes are called *sheikhs*, a word of various import, but used in this case as a title of honour; the government is hereditary in the family of each sheikh, but elective as to the particular individual appointed. Their allegiance, however, consists more in following his example as a leader than in obeying his commands; and, if dissatisfied with his government, they will depose or abandon him. As the independent lords of their own

deserts, the Bedawees have from time immemorial demanded tribute or presents from all travellers or caravans (Isa. xli. 13) passing through their country; the transition from which to robbery is so natural, that they attach to the latter no disgrace, plundering without mercy all who are unable to resist them, or who have not secured the protection of their tribe. Their watching for travellers 'in the ways,' i.e. the frequented routes through the desert, is alluded to Jer. iii. 2; Ezra viii. 31; and the fleetness of their horses in carrying them into the 'depths of the wilderness,' beyond the reach of their pursuers, seems what is referred to in Isa. lxi. 13, 14. Their warlike incursions into more settled districts are often noticed (e.g. Job i. 15; 2 Chron. xxi. 16; xxvi. 7). The acuteness of their bodily senses is very remarkable, and is exemplified in their astonishing sagacity in tracing and distinguishing the footsteps of men and cattle. The law of blood-revenge sows the seeds of perpetual feuds; and what was predicted (Gen. xvi. 12) of the posterity of Ishmael, the 'wild-ass man' (a term most graphically descriptive of a Bedawee), holds true of the whole people [BLOOD-REVENGE]. They show bravery in repelling a public enemy, but when they fight for plunder, they behave like cowards. Their bodily frame is spare, but athletic and active, inured to fatigue and capable of undergoing great privations: their minds are acute and inquisitive; and though their manners are somewhat grave and formal, they are of a lively and social disposition. Of their moral virtues it is necessary to speak with caution. They were long held up as models of good faith, incorruptible integrity, and the most generous hospitality to strangers; but many recent travellers deny them the possession of these qualities; and it is certain that whatever they may have been once, the Bedawees, like all the unsophisticated 'children of nature,' have been much corrupted by the influx of foreigners, and the national character is in every point of view lowest where they are most exposed to the continual passage of strangers.

In the language of the Arabians we find the full and adult development of the genius of that group of languages of Western Asia which is now usually distinguished as the Syro-Arabian. In the abundance of its roots, in the manifold variety of its formations, in the syntactical delicacies of its construction, it stands pre-eminent as a language among all its sisters. Every class of composition also: the wild and yet noble lyrics of the son of the desert, who had 'nothing to glory in but his sword, his guest, and his fervid tongue;' the impassioned and often sublime appeals of the Koran; the sentimental poetry of a Mutanabbi; the artless simplicity of their usual narrative style, and the philosophic disquisition of an Ibn Chaldun; the subtleties of the grammarian and scholiast; medicine, natural history, and the metaphysical speculations of the Aristotelian school—all have found the Arabic language a fitting exponent of their feeling and thought. And, although confined within the bounds of the Peninsula by circumstances to which we owe the preservation of its pure antique form, yet Islam made it the written and spoken language of the whole of Western Asia, of Eastern and Northern Africa, of Spain, and of

some of the islands of the Mediterranean; and the ecclesiastical language of Persia, Turkey, and all other lands which receive the Mohammedan faith; in all which places it has left sensible traces of its former occupancy, and in many of which it is still the living or the learned idiom. The close affinity, and consequently the incalculable philological use, of the Arabic with regard to the Hebrew language and its other sisters, may be considered partly as a question of theory, and partly as one of fact. The former would regard the concurrent records which the Old Testament and their own traditions have preserved of the several links by which the Arabs were connected with different generations of the Hebrew line, and the evidences which Scripture offers of persons speaking Arabic being intelligible to the Hebrews; the latter would observe the demonstrable identity between them in the main features of a language, and the more subtle, but no less convincing traces of resemblance even in the points in which their diversity is most apparent. Thus springing from the same root as the Hebrew, and possessing such traces of affinity to a late period of Scripture history, this dialect was further enabled, by several circumstances in the social state of the nation, to retain its native resemblance of type until the date of the earliest extant written documents. These circumstances were, the almost insular position of the country, which prevented conquest or commerce from debasing the language of its inhabitants; the fact that so large a portion of the nation adhered to a mode of life in which every impression was, as it were, stereotyped, and knew no variation for ages; and the great and just pride which they felt in the purity of their language, which is still a characteristic of the Bedouins.

The principal source of the wealth of ancient Arabia was its commerce. So early as the days of Jacob (Gen. xxxvii. 28) we read of a mixed caravan of Arab merchants (Ishmaelites and Midianites) who were engaged in the conveyance of various foreign articles to Egypt, and made no scruple to add Joseph, 'a slave,' to their other purchases. The Arabs were, doubtless, the first navigators of their own seas, and the great carriers of the produce of India, Abyssinia, and other remote countries to Western Asia and Egypt. Various Indian productions thus obtained were common among the Hebrews at an early period of their history (Exod. xxx. 23, 25). The traffic of the Red Sea was to Solomon a source of great profit; and the extensive commerce of *Sabara* (Sheba, now Yemen) is mentioned by profane writers as well as alluded to in Scripture (1 Kings x. 10-15). In the description of the foreign trade of Tyre (Ezek. xxvii. 19-24) various Arab tribes are introduced (comp. Isa. lx. 6; Jer. vi. 20; 2 Chron. ix. 14). The Nabathæo-Idumeans became a great trading people, their capital being Petra. The transit-trade from India continued to enrich Arabia until the discovery of the passage to India by the Cape of Good Hope; but the invention of steam-navigation has now restored the ancient route for travellers by the Red Sea.

Arabia, in ancient times, generally preserved its independence, unaffected by those great events which changed the destiny of the surrounding nations; and in the sixth century of our era,

the decline of the Roman empire and the corruptions and distractions of the Eastern church favoured the impulse given by a wild and warlike fanaticism. Mahomet arose, and succeeded in gathering around his standard the nomadic tribes of central Arabia; and in less than fifty years that standard waved triumphant 'from the straits of Gibraltar to the hitherto unconquered regions beyond the Oxus.' The khalifs transferred the seat of government successively to Damascus, Kufa, and Bagdad; but amid the distractions of their foreign wars, the chiefs of the interior of Arabia gradually shook off their feeble allegiance, and resumed their ancient habits of independence, which, notwithstanding the revolutions that have since occurred, they for the most part retain. At present, indeed, the authority of Mehmet Ali, the Pasha of Egypt, is acknowledged over a great portion of the northern part of Arabia, while in the south the Imam of Maskat exercises dominion over a much greater extent of country than did any of his predecessors.

ARAD, an ancient city on the southernmost borders of Palestine, whose inhabitants drove back the Israelites as they attempted to penetrate from Kadesh into Canaan (Num. xxi. 1), but were eventually subdued by Joshua, along with the other southern Canaanites (Josh. xii. 14, comp. x. 41; also Judg. i. 16). Eusebius and Jerome place Arad twenty Roman miles from Hebron. This accords well with the situation of a hill called Tell 'Arad, which Dr. Robinson observed on the road from Petra to Hebron. He describes it as 'a barren-looking eminence rising above the country around.' He did not examine the spot, but the Arabs said there were no ruins upon or near it, but only a cavern. The name alone is, however, too decisive to admit a doubt that the hill marks the site of the ancient Arad.

ARAM, the name given by the Hebrews to the tract of country lying between Phœnicia on the west, Palestine on the south, Arabia Deserta and the river Tigris on the east, and the mountain range of Taurus on the north. Many parts of this extensive territory have a much lower level than Palestine, but it might receive the designation of 'the highlands,' because it does rise to a greater elevation than that country at most points of immediate contact, and especially on the side of Lebanon. Aram, or Aramea, seems to have corresponded generally to the *Syria* and *Mesopotamia* of the Greeks and Romans (see those articles). We find the following divisions expressly noticed in Scripture:—1. ARAM-DAMMESEK, the 'Syria of Damascus' conquered by David, 2 Sam. viii. 5, 6, where it denotes only the territory around Damascus; but elsewhere 'Aram,' in connection with its capital 'Damascus,' appears to be used in a wider sense for Syria Proper (Isa. vii. 1, 8; xvii. 3; Amos i. 5). To this part of Aram the 'land of Hadrach' seems to have belonged (Zech. ix. 1). 2. ARAM-MAACHAH (1 Chron. xix. 6), or simply *Maachah* (2 Sam. x. 6, 8), was not far from the northern border of the Israelites on the east of the Jordan (comp. Deut. iii. 14, with Josh. xiii. 11, 13). 3. ARAM-BETH-RECHOB, the precise locality of which cannot with certainty be determined. 4. ARAM-ZORAH (2 Sam. x. 6). Jewish tradition

has placed Zobah at Aleppo, whereas Syrian tradition identifies it with Nisibis, a city in the north-east of Mesopotamia. The former seems a much nearer approximation to the truth. We may gather from 2 Sam. viii. 3, x. 16, that the eastern boundary of Aram-Zobah was the Euphrates, but Nisibis was far beyond that river. The people of Zobah are uniformly spoken of as near neighbours of the Israelites, the Damasceenes, and other Syrians; and in one place (2 Chron. viii. 3) Hamath is called Hamath-Zobah, as pertaining to that district. We, therefore, conclude that Aram-Zobah extended from the Euphrates westward, perhaps as far north as to Aleppo. It was long the most powerful of the petty kingdoms of Aramæa, its princes commonly bearing the name of Hadadezer or Hadazer. 5. ARAM-NAHARAIM, i. e. *Aram of the Two Rivers*, or Mesopotamia. The rivers which enclose Mesopotamia are the Euphrates on the west and the Tigris on the east; but it is doubtful whether the Aram-Naharaim of Scripture embraces the whole of that tract or only the northern portion of it (comp. Gen. xxiv. 10; Deut. xxiii. 4; Judg. iii. 8). A part of this region of Aram is also called *Padan-Aram*, the plain of Aram (Gen. xxv. 20; xxviii. 2, 6, 7; xxxi. 18; xxxiii. 18), and once simply *Padan* (Gen. xlviii. 7), also *Sedch-Aram*, the field of Aram (Hos. xii. 13).

But though the districts now enumerated be the only ones expressly named in the Bible as belonging to Aram, there is no doubt that many more territories were included in that extensive region, e.g. Geshur, Hul, Arpad, Riblah, Tadmor, Hauran, Abilene, &c., though some of them may have formed part of the divisions already specified. It appears from the ethnographic table in the tenth chapter of Genesis (vers. 22, 23) that Aram was a son of Shem, and that his own sons were Uz, Hul, Gether, and Mash. Another Aram is mentioned (Gen. xxii. 21) as the grandson of Nahor and son of Kenuel, but he is not to be thought of here. The descent of the Aramæans from a son of Shem is confirmed by their language, which was one of the branches of the Semitic family, and nearly allied to the Hebrew.

The Aramaic language—that whole, of which the Chaldee and Syriac dialects form the parts—constitutes the northern and least developed branch of the Syro-Arabian family of tongues. Its cradle was probably on the banks of the Cyrus, according to the best interpretation of Amos ix. 7; but Mesopotamia, Babylonia, and Syria form what may be considered its home and proper domain. Political events, however, subsequently caused it to supplant Hebrew in Palestine; and then it became the prevailing form of speech from the Tigris to the shore of the Mediterranean, and, in a contrary direction, from Armenia down to the confines of Arabia. After obtaining such a wide dominion, it was forced, from the ninth century onwards, to give way before the encroaching ascendancy of Arabic; and it now only survives, as a living tongue, among the Syrian Christians in the neighbourhood of Mosul. According to historical records, and also according to the comparatively ruder form of the Aramaic language itself, we might suppose that it represents, even

in the state in which we have it, some image of that aboriginal type which the Hebrews and Arabians, under more favourable social and climatical influences, subsequently developed into fulness of sound and structure. But it is difficult for us now to discern the particular vestiges of this archaic form; for, not only did the Aramaic not work out its own development of the original elements common to the whole Syro-Arabian sisterhood of languages, but it was pre-eminently exposed, both by neighbourhood and by conquest, to harsh collision with languages of an utterly different family. Moreover, it is the only one of the three great Syro-Arabian branches which has no fruits of a purely national literature to boast of. We possess no monument whatever of its own genius; not any work which may be considered the product of the political and religious culture of the nation, and characteristic of it—as is so emphatically the case both with the Hebrews and the Arabs. The first time we see the language, it is used by Jews as the vehicle of Jewish thought; and although, when we next meet it, it is employed by native authors, yet they write under the literary impulses of Christianity, and under the Greek influence on thought and language which necessarily accompanied that religion. These two modifications, which constitute and define the so-called Chaldee and Syriac dialects, are the only forms in which the normal and standard Aramaic has been preserved to us.

ARARAT occurs nowhere in Scripture as the name of a mountain, but only as the name of a country, upon the 'mountains' of which the ark rested during the subsidence of the flood (Gen. viii. 4).

The only other passages where 'Ararat' occurs are 2 Kings xix. 37 (Isa. xxxvii. 38) and Jer. li. 27. In the former it is spoken of as the country whither the sons of Sennacherib, king of Assyria, fled, after they had murdered their father. This points to a territory which did not form part of the immediate dominion of Assyria, and yet might not be far off from it. The description is quite applicable to Armenia, and is supported by the tradition of that country. The other Scripture text (Jer. li. 27) mentions Ararat, along with Minni and Ashkenaz, as kingdoms summoned to arm themselves against Babylon. In the parallel place in Isa. xiii. 2-4, the invaders of Babylonia are described as 'issuing from the mountains'; and if by *Minni* we understand the *Mingas* in Armenia, and by *Ashkenaz* some country on the *Euxine* Sea, which may have had its original name, *Azenos*, from Ashkenaz, a son of Gomer, the progenitor of the Cimmerians (Gen. x. 2, 3)—then we arrive at the same conclusion, viz., that Ararat was a mountainous region north of Assyria, and in all probability in Armenia. In Ezek. xxxviii. 6, we find Togarmah, another part of Armenia, connected with Gomer, and in Ezek. xxvii. 14, with Meshech and Tubal, all tribes of the north. With this agree the traditions of the Jewish and Christian churches, and likewise the accounts of the native Armenian writers.

But though it may be concluded with tolerable certainty that the land of Ararat is to be identified with a portion of Armenia, we possess no historical data for fixing on any one mountain

in that country as the resting-place of the ark.

The earliest tradition fixed on one of the chain of mountains which separate Armenia on the south from Mesopotamia, and which, as they also inclose Kurdistan, the land of the Kurds, obtained the name of the Kardui, or Carduchian range, corrupted into Gordiæan and Cordyæan. This was at one time the prevalent opinion among the Eastern churches, but it has now declined in credit and given place (at least among the Christians of the West) to that which now obtains, and according to which the ark rested on a great mountain in the north of Armenia—to which (so strongly did the idea take hold of the popular belief) was, in course of time, given the very name of Ararat, as if no doubt could be entertained that it was the Ararat of Scripture. We have seen, however, that in the Bible

Ararat is nowhere the name of a mountain, and by the native Armenians the mountain in question was never so designated. Still there is no doubt of the antiquity of the tradition of this being (as it is sometimes termed) the 'Mother of the World.' The Persians call it Kûhi Nûch, 'Noah's Mountain.'

The mountain thus known to Europeans as Ararat consists of two immense conical elevations (one peak considerably lower than the other), towering in massive and majestic grandeur from the valley of the Arax, the ancient Araxes. Smith and Dwight give its position N. 57° W. of Nakhchevan, and S. 25° W. of Erivan; and remark, in describing it before the recent earthquake, that in no part of the world had they seen any mountain whose imposing appearance could plead half so powerfully as this a claim to the honour of having once been the

45.

stepping-stone between the old world and the new. 'It appeared,' says Ker Porter, 'as if the hugest mountains of the world had been piled upon each other to form this one sublime immensity of earth and rocks and snow. The icy peaks of its double heads rose majestically into the clear and cloudless heavens; the sun blazed bright upon them, and the reflection sent forth a dazzling radiance equal to other suns. My eye, not able to rest for any length of time upon the blinding glory of its summits, wandered down the apparently interminable sides, till I could no longer trace their vast lines in the mists of the horizon; when an irrepressible impulse immediately carrying my eye upwards, again refixed my gaze upon the awful glare of Ararat.' To the same effect Morier writes:—'Nothing can be more beautiful than its shape, more awful than its height. All the surrounding mountains

sink into insignificance when compared to it. It is perfect in all its parts; no hard rugged feature, no unnatural prominences, everything is in harmony, and all combines to render it one of the sublimest objects in nature.'

Several attempts had been made to reach the top of Ararat, but few persons had got beyond the limit of perpetual snow. The honour was reserved to a German, Dr. Parrot, in the employment of Russia, who, in his Journey to Ararat, gives the following particulars:—'The summit of the Great Ararat is in 39° 42' N. lat., and 61° 55' E. long. from Ferro. Its perpendicular height is 16,254 Paris feet above the level of the sea, and 13,350 above the plain of the Araxes. The Little Ararat is 12,284 Paris feet above the sea, and 9561 above the plain of the Araxes.' After he and his party had failed in two attempts to ascend, the third was suc-

cessful, and on the 27th September (o. s.), 1829, they stood on the summit of Mount Ararat. It was a slightly convex, almost circular platform, about 200 Paris feet in diameter, composed of eternal ice, unbroken by a rock or stone: on account of the immense distances, nothing could be seen distinctly.

Since the memorable ascent of Dr. Parrot, Ararat has been the scene of a fearful calamity. An earthquake, which in a few moments changed the entire aspect of the country, commenced on the 20th of June (o. s.), 1840, and continued, at intervals, until the 1st of September. The destruction of houses and other property in a wide tract of country around was very great; fortunately, the earthquake having happened during the day, the loss of lives did not exceed fifty. The scene of greatest devastation was in the narrow valley of Akorhi, where the masses of rock, ice, and snow, detached from the summit of Ararat and its lateral points, were thrown at one single bound from a height of 6000 feet to the bottom of the valley, where they lay scattered over an extent of several miles.

ARAU'NAH, or ORNAN, a man of the Jebusite nation, which possessed Jerusalem before it was taken by the Israelites. His threshing-floor was on Mount Moriah; and when he understood that it was required for the site of the Temple, he liberally offered the ground to David as a free gift; but the king insisted on paying the full value for it (2 Sam. xxiv. 18; 1 Chron. xxi. 18).

AR'BA. [HERRON.]

ARCHELA'US, son of Herod the Great, and his successor in Idumæa, Judæa, and Samaria (Matt. ii. 22) [HERODIAN FAMILY].

ARCHERY. [ARMA.]

ARCHIP'PUS, a Christian minister, whom St. Paul calls his 'fellow-soldier,' in Philen. 2, and whom he exhorts to renewed activity in Col. iv. 17. From the latter reference it would seem that Archippus had exercised the office of Evangelista sometimes at Ephesus, sometimes elsewhere; and that he finally resided at Colosse, and there discharged the office of presiding presbyter or bishop when St. Paul wrote to the Colossian church.

ARCHITECTURE. It was formerly common to claim for the Hebrews the invention of scientific architecture, and to allege that classic antiquity was indebted to the Temple of Solomon for the principles and many of the details of the art. This statement, however, is totally without foundation.

There has never in fact been any people for whom a peculiar style of architecture could with less probability be claimed than for the Israelites. On leaving Egypt they could only be acquainted with Egyptian art. On entering Canaan they necessarily occupied the buildings of which they had dispossessed the previous inhabitants; and the succeeding generations would naturally erect such buildings as the country previously contained. The architecture of Palestine, and, as such, eventually that of the Jews, had doubtless its own characteristics, by which it was suited to the climate and condition of the country; and in the course of time many improvements would no doubt arise from the causes which usually operate in producing change in any practical art.

From the want of historical data and from the total absence of architectural remains, the degree in which these causes operated in imparting a peculiar character to the Jewish architecture cannot now be determined; for the oldest ruins in the country do not ascend beyond the period of the Roman domination. It does, however, seem probable that among the Hebrews architecture was always kept within the limits of a mechanical craft, and never rose to the rank of a fine art. Their usual dwelling-houses differed little from those of other Eastern nations, and we nowhere find anything indicative of exterior embellishment. Splendid edifices, such as the palace of David and the temple of Solomon, were completed by the assistance of Phœnician artists (2 Sam. v. 11; 1 Kings v. 6, 18; 1 Chron. xiv. 1). After the Babylonish exile, the assistance of such foreigners was likewise resorted to for the restoration of the Temple (Ezra iii. 7). From the time of the Maccabæan dynasty, the Greek taste began to gain ground, especially under the Herodian princes, and was shown in the structure and embellishment of many towns, baths, colonnades, theatres and castles. The Phœnician style, which seems to have had some affinity with the Egyptian, was not, however, superseded by the Grecian; and even as late as the Mishna, we read of Tyrian windows, Tyrian porches, &c. [House].

With regard to the instruments used by builders—besides the more common, such as the axe, saw, &c., we find incidental mention of the compass, the plumb-line (Amos vii. 7), and the measuring-line.

AREOPAGUS, an Anglicized form of the original words, signifying in reference to place, Mars Hill, but in reference to persons, the Council, which was held on the hill. The Council was also termed the Council on Mars Hill; sometimes the Upper Council, from the elevated position where it was held; and sometimes simply, but emphatically, the Council: but it retained, till a late period, the original designation of Mars Hill. The place and the Council are topics of interest to the Biblical student, chiefly from their being the scene of the interesting narrative and sublime discourse found in Acts xvii., where it appears that the apostle Paul, feeling himself moved, by the evidences of idolatry with which the city of Athens was crowded, to preach Jesus and the resurrection, both in the Jewish synagogues and in the market place, was set upon by certain Epicurean and Stoic philosophers, and led to the Areopagus, in order that they might learn from him the meaning and design of his new doctrine. Whether or not the Apostle was criminally arraigned, as a setter forth of strange gods, before the tribunal which held its sittings on the hill, may be considered as undetermined, though the balance of evidence seems to incline to the affirmative. Whichever view on this point is adopted, the dignified, temperate, and high-minded bearing of Paul under the peculiar circumstances in which he was placed are worthy of high admiration, and will appear the more striking the more the associations are known and weighed which covered and surrounded the spot where he stood. Nor does his eloquent discourse appear to have been without good effect; for

though some mocked, and some procrastinated, yet others believed, among whom was a member of the Council, 'Dionysius, the Areopagite.'

The court of Areopagus was one of the oldest and most honoured, not only in Athens, but in the whole of Greece, and, indeed, in the ancient world. Through a long succession of centuries, it preserved its existence amid changes corresponding with those which the state underwent, till at least the age of the Cæsars.

Its origin ascends back into the darkest mythical period. From the first its constitution was essentially aristocratic; a character which to some extent it retained even after the democratic reforms which Solon introduced into the Athenian constitution. Following the political tendencies of the state, the Areopagus became in process of time less and less aristocratical, and parted piecemeal with most of its important functions. First its political power was taken away, then its jurisdiction in cases of murder, and even its moral influence gradually departed. During the sway of the Thirty Tyrants its power, or rather its political existence, was destroyed. On their overthrow it recovered some consideration, and the oversight of the execution of the laws was restored to it by an express decree. The precise time when it ceased to exist cannot be determined; but evidence is not wanting to show that in later periods its members ceased to be uniformly characterized by blameless morals.

It is not easy to give a correct summary of its several functions, as the classic writers are not agreed in their statements, and the jurisdiction of the court varied, as has been seen, with times and circumstances. They have, however, been divided into six general classes:—I. Its judicial function; II. Its political; III. Its police function; IV. Its religious; V. Its educational; and VI. (only partially) its financial.

Passing by certain functions, such as acting as a court of appeal, and of general supervision, which under special circumstances, and when empowered by the people, the Areopagus from time to time discharged, we will say a few words in explanation of the points already named, giving a less restricted space to those which concern its moral and religious influence. Its judicial function embraced trials for murder and manslaughter, and was the oldest and most peculiar sphere of its activity. The indictment was brought by the second or king-archon, whose duties were for the most part of a religious nature. Then followed the oath of both parties, accompanied by solemn appeals to the gods. After this the accuser and the accused had the option of making a speech, which, however, they were obliged to keep free from all extraneous matter, as well as from mere rhetorical ornaments. After the first speech, the accused was permitted to go into voluntary banishment, if he had no reason to expect a favourable issue. Theft, poisoning, wounding, incendiarism, and treason, belonged also to this department of jurisdiction in the court of the Areopagus.

Its political function consisted in the constant watch which it kept over the legal condition of the state, acting as overseer and guardian of the laws.

Its police function also made it a protector

and upholder of the institutions and laws. In this character the Areopagus had jurisdiction over novelties in religion, in worship, in customs, in everything that departed from the traditional and established usages and modes of thought, which a regard to their ancestors endeared to the nation. The members of the court had a right to take oversight of festive meetings in private houses. In ancient times they fixed the number of the guests, and determined the style of the entertainment. If a person had no obvious means of subsisting, or was known to live in idleness, he was liable to an action before the Areopagus; if condemned three times, he was punished with the loss of his civil rights. In later times the court possessed the right of giving permission to teachers (philosophers and rhetoricians) to establish themselves and pursue their profession in the city.

Its strictly religious jurisdiction extended itself over the public creed, worship, and sacrifices, embracing generally everything which could come under the denomination of sacred things. It was its special duty to see that the religion of the state was kept pure from all foreign elements. The accusation of impiety—the vagueness of which admitted almost any charge connected with religious innovations—belonged in a special manner to this tribunal. The freethinking poet Euripides stood in fear of, and was restrained by, the Areopagus. Its proceeding in such cases was sometimes rather of an admonitory than punitive character.

Not less influential was its moral and educational power. Isocrates speaks of the care which it took of good manners and good order. Quintilian relates that the Areopagus condemned a boy for plucking out the eyes of a quail—a proceeding which has been both misunderstood and misrepresented, but which its original narrator approved, assigning no insufficient reason, namely, that the act was a sign of a cruel disposition, likely in advanced life to lead to baneful actions. The court exercised a salutary influence in general over the Athenian youth, their educators and their education.

Its financial position is not well understood; most probably it varied more than any other part of its administration with the changes which the constitution of the city underwent. It may suffice to mention, that in the Persian war the Areopagus had the merit of completing the number of men required for the fleet, by paying eight drachmæ to each.

ARETAS, the common name of several Arabian kings. 1. The first of whom we have any notice was a contemporary of the Jewish high-priest Jason and of Antiochus Epiphanes about B.C. 170 (2 Macc. v. 8). 2. Josephus mentions an Aretas, king of the Arabians contemporary with Alexander Jannæus (died B.C. 79) and his sons. After defeating Antiochus Dionysus, he reigned over Coele-Syria, 'being called to the government by those that held Damascus by reason of the hatred they bore to Ptolemy Mennæus.' He took part with Hyrcanus in his contest for the sovereignty with his brother Aristobulus, and laid siege to Jerusalem, but, on the approach of the Roman general Scæurus, he retreated to Philadelphia. Hyrcanus and Aretas were pursued and defeated by Aristobulus, at

a place called Papyron, and lost above 6000 men. Three or four years after, Scaurus, to whom Pompey had committed the government of Cœle-Syria, invaded Petra, but finding it difficult to obtain provisions for his army, he consented to withdraw on the offer of 300 talents from Aretas. 3. Aretas, whose name was originally Æneas, succeeded Obodas. He was the father-in-law of Herod Antipas. The latter made proposals of marriage to the wife of his half-brother Herod-Philip, Herodias, the daughter of Aristobulus their brother, and the sister of Agrippa the Great. In consequence of this, the daughter of Aretas returned to her father, and a war (which had been fomented by previous disputes about the limits of their respective countries) ensued between Aretas and Herod. The army

45.

of the latter was totally destroyed, and on his sending an account of his disaster to Rome, the emperor immediately ordered Vitellius to bring Aretas prisoner alive, or, if dead, to send his head. But while Vitellius was on his march to Petra, news arrived of the death of Tiberius, upon which, after administering the oath of allegiance to his troops, he dismissed them to winter-quarters and returned to Rome. It must have been at this juncture that Aretas took possession of Damascus, and placed a governor in it with a garrison. For a knowledge of this fact we are indebted to the apostle Paul.

AR'GOB, a district in Bashan, east of the Lake of Gennesareth, which was given to the half-tribe of Manasseh (Deut. iii. 4, 13; 1 Kings iv. 13.)

1. A'RIEL, a word meaning 'lion of God,' and correctly enough rendered by 'lion-like,' in 2 Sam. xxiii. 20; 1 Chron. xi. 22. It was applied as an epithet of distinction to bold and warlike persons, as among the Arabians, who sur-named Ali 'The Lion of God.'

2. ARIEL. The same word is used as a local proper name in Isa. xxix. 1, 2, applied to Jerusalem—'as victorious under God'—says Dr. Lee; and in Ezek. xlili. 15, 16, to the altar of burnt-offerings.

ARIMATHEA, the birth-place of the wealthy Joseph, in whose sepulchre our Lord was laid (Matt. xxvii. 57; John xix. 38). The Arimathea of Joseph is generally regarded as the same place as the Ramathaim of Samuel, which stood near Lydda or Diospolis. Hence it has by some been identified with the existing Ramleh.

Ramleh is in N. lat. 31° 59', and E. long. 35° 28', 8 miles S.E. from Joppa, and 24 miles N.W. by W. from Jerusalem. It lies in the fine undulating plain of Sharon, upon the eastern side of a broad low swell rising from a fertile though sandy plain. Like Gaza and Jaffa, this town is surrounded by olive-groves and gardens of vegetables and delicious fruits. Occasional

palm-trees are also seen, as well as the kharob and the sycamore. The streets are few; the houses are of stone, and many of them large and well built. There are five mosques, two or more of which are said to have once been Christian churches; and there is here one of the largest Latin convents in Palestine. The place is supposed to contain about 3000 inhabitants, of whom two-thirds are Moslems, and the rest Christians, chiefly of the Greek church, with a

47.

few Armenians. The inhabitants carry on some trade in cotton and soap. The great caravan-road between Egypt and Damascus, Smyrna, and Constantinople passes through Ramleh, as well as the most frequented road for European pilgrims and travellers between Joppa and Jerusalem. The isolated tower, of which a figure is here given, is the most conspicuous object in or about the city. It is about 120 feet in height,

of Saracenic architecture, square, and built with well-bewn stone. According to the Moslem account it belonged to a ruined mosque. It bears the date 718 A.H. (A.D. 1310), and an Arabian author reports the completion at Ramleh, in that year, of a minaret unique for its loftiness and grandeur, by the sultan of Egypt, Nazir Mohammed ibn Kelawan. Among the plantations which surround the town occur, at every step, dry wells, cisterns fallen in, and vast vaulted reservoirs, which show that the city must in former times have been upwards of a league and a half in extent.

ARISTARCHUS, a faithful adherent of St. Paul, whose name repeatedly occurs in the Acts and Epistles (Acts xix. 29; xx. 4; xxvii. 2; Col. iv. 10; Philem. 24). He was a native of Thessalonica, and became the companion of St. Paul, whom he accompanied to Ephesus, where he was seized and nearly killed in the tumult raised by the silversmiths. He left that city with the Apostle, and accompanied him in his subsequent journeys, even when taken as a prisoner to Rome: indeed, Aristarchus was himself sent thither as a prisoner, or became such while there, for Paul calls him his 'fellow-prisoner' (Col. iv. 10). The traditions of the Greek church represent Aristarchus as bishop of Apamea in Phrygia.

ARISTOBULUS, a person named by Paul in Rom. xvi. 10, where he sends salutations to his household. He is not himself saluted; hence he may not have been a believer, or he may have been absent or dead. Nothing certain is known respecting him.

Aristobulus is a Greek name, adopted by the Romans, and in very common use among them. It was also adopted by the Jews, and was borne by several persons in the Maccabean and Herodian families mentioned by Josephus and in the books of Maccabees.

ARITHMETIC, the science of numbers or reckoning, was unquestionably practised as an art in the dawn of civilization. In the absence of positive information we seem authorized in referring the first knowledge of arithmetic to the East. From India, Chaldea, Phœnicia, and Egypt, the science passed to the Greeks, who extended its laws, improved its processes, and widened its sphere. To what extent the Orientals carried their acquaintance with arithmetic cannot be determined. The greatest discovery in this department of the mathematics, namely, the establishment of our system of ciphers, belongs undoubtedly not to Arabia, as is generally supposed, but to the remote East, probably India. Our numerals were made known to these western parts by the Arabians, who, though they were nothing more than the medium of transmission, have enjoyed the honour of giving them their name.

The Hebrews were not a scientific, but a religious and practical nation. What they borrowed from others of the arts of life they used without surrounding it with theory or expanding and framing it into a system. Of their knowledge of arithmetic little is known beyond what may be fairly inferred from the pursuits and trades which they carried on, for the successful prosecution of which some skill at least in its simpler processes must have been absolutely necessary;

and the large amounts which appear here and there in the sacred books serve to show that their acquaintance with the art of reckoning was considerable. Even in fractions they were not inexperienced. For figures, the Jews, after the Babylonish exile, made use of the letters of the alphabet; and it is not unlikely that the ancient Hebrews did the same.

ARK, NOAH'S (Gen. vi. 14). Vast labour and much ingenuity have been employed by various writers, in the attempt to determine the form of Noah's ark and the arrangement of its parts. The success has not been equal to the exertion; for, on comparing the few simple facts in the Scripture narrative, every one feels how slight positive data there are for the minute descriptions and elaborate representations which such writers have given. That form of the ark which repeated pictorial representations have rendered familiar—a kind of house in a kind of boat—has not only no foundation in Scripture, but is contrary to reason. The form thus given to it is fitted for progression and for cutting the waves; whereas the ark of Noah was really destined to float idly upon the waters, without any other motion than that which it received from them. If we examine the passage in Gen. vi. 14-16, we can only draw from it the conclusion that the ark was not a boat or ship, but a building in the form of a parallelogram, 300 cubits long, 50 cubits broad, and 30 cubits high. So far as the name affords any evidence, it also goes to show that the ark of Noah was not a regularly-built vessel, but merely intended to float at large upon the waters. We may, therefore, probably with justice, regard it as a large, oblong, floating house, with a roof either flat or only slightly inclined. It was constructed with three stories, and had a door in the side. There is no mention of windows in the side, but above, i. e. probably in the flat roof, where Noah was commanded to make them of a cubit in size (Gen. vi. 16).

The purpose of this ark was, to preserve certain persons and animals from the Deluge with which God intended to overwhelm the land, in punishment for man's iniquities. The persons were eight—Noah and his wife, with his three sons and their wives (Gen. vii. 7; 2 Pet. ii. 5). The animals were, one pair of every 'unclean' animal, and seven pairs of all that were 'clean.' By 'clean,' we understand fit, and by 'unclean,' unfit for food or for sacrifice. Of birds there were seven pairs (Gen. vii. 2, 3). Those who have written professedly and largely on the subject, have been at great pains to provide for all the existing species of animals in the ark of Noah, showing how they might be distributed, fed, and otherwise provided for. But they are very far from having cleared the matter of all its difficulties; which are much greater than they, in their general ignorance of natural history, were aware of. These difficulties, however, chiefly arise from the assumption that the species of *all the earth* were collected in the ark. The number of such species has been vastly under-rated by these writers—partly from ignorance, and partly from the desire to limit the number for which they imagined they required to provide. They have usually satisfied themselves with a provision for three or four hundred

species at most. 'But of the existing mammalia,' says Dr. J. Pye Smith, 'considerably more than one thousand species are known; of birds, fully five thousand; of reptiles, very few kinds of which can live in water, two thousand; and the researches of travellers and naturalists are making frequent and most interesting additions to the number of these and all other classes. Of insects (using the word in the popular sense) the number of species is immense; to say one hundred thousand would be moderate: each has its appropriate habitation and food, and these are necessary to its life; and the larger number could not live in water. Also the innumerable millions upon millions of animalcules must be provided for; for they have all their appropriate and diversified places and circumstances of existence.' Nor do these numbers form the only difficulty; for, as the same writer observes:— 'All land animals have their geographical regions, to which their constitutional natures are congenial, and many could not live in any other situation. We cannot represent to ourselves the idea of their being brought into one small spot, from the polar regions, the torrid zone, and all the other climates of Asia, Africa, Europe, America, Australia, and the thousands of islands, their preservation and provision, and the final disposal of them, without bringing up the idea of miracles more stupendous than any which are recorded in Scripture.'

The difficulty of assembling in one spot, and of providing for in the ark, the various mammalia and birds alone, even without including the otherwise essential provision for reptiles, insects, and fishes, is quite sufficient to suggest some error in the current belief. We are to consider the different kinds of accommodation and food which would be required for animals of such different habits and climates, and the necessary provision for ventilation and for cleansing the stables or dens. And if so much ingenuity has been required in devising arrangements for the comparatively small number of species which the writers on the ark have been willing to admit into it; what provision can be made for the immensely larger number which, under the supposed conditions, would really have required its shelter?

There seems no way of meeting these difficulties but by adopting the suggestion of Bishop Stillington, approved by Matthew Poole, Dr. J. Pye Smith, Le Clerc, Rosenmüller, and others, namely, that, as the object of the Deluge was to sweep man from the earth, it did not extend beyond that region of the earth which man then inhabited, and that only the animals of that region were preserved in the ark. The bishop expresses his belief that the Flood was universal as to mankind, and that all men, except those preserved in the ark, were destroyed; but he sees no evidence from Scripture that the whole earth was then inhabited; he does not think that it can ever be proved to have been so; and he asks, what reason there can be to extend the Flood beyond the occasion of it? [DELUGE.]

As Noah was the progenitor of all the nations of the earth, and as the ark was the second cradle of the human race, we might expect to find in all nations traditions and reports more or less distinct respecting him, the ark in which he was

saved, and the Deluge in general. Accordingly no nation is known in which such traditions have not been found. Our present concern, however, is only with the ark. And as it appears that an ark, that is, a boat or chest, was carried about with great ceremony in most of the ancient mysteries, and occupied an eminent station in the holy places, it has with much reason been concluded that this was originally intended to represent the ark of Noah, which eventually came to be regarded with superstitious reverence. On this point the historical and mythological testimonies are very clear and conclusive. The tradition of a deluge, by which the race of man was swept from the face of the earth, has been traced among the Chaldeans, Egyptians, Phœnicians, Assyrians, Persians, Greeks, Romans, Goths, Druids, Chinese, Hindoos, Burmese,

48.

Mexicans, Peruvians, Brazilians, Nicaraguans, the inhabitants of Western Caledonia, and the islanders of the Pacific; and among most of them also the belief has prevailed that certain individuals were preserved in an ark, ship, boat, or raft, to replenish the desolated earth with inhabitants. These traditions, moreover, are corroborated by coins and monuments of stone. Of the latter there are the sculptures of Egypt and of India; and it is not unlikely that those of the monuments called Druidical, which bear the name of kist-vaens, and in which the stones are disposed in the form of a chest or house, were intended as memorials of the ark.

49.

50.

With regard to the evidence furnished by coins, we shall confine our illustrations to the two famous medals of Apamea. These medals belong, the one to the elder Philip, and the other to Pertinax. In the former it is extremely interesting to observe that on the front of the ark is the name of Noah, in Greek characters. The designs on these medals correspond remarkably, although the legends somewhat vary. In both we perceive the ark floating on the water, containing the patriarch and his wife, the dove on wing, the olive-branch, and the raven perched on the ark. These medals also represent Noah and his wife on *terra firma*, in the attitude of rendering thanks for their safety. The genuineness of these medals has been established beyond all question, and the coincidences which they offer are at least exceedingly curious.

ARK OF THE COVENANT. The word here used for ark is, as already explained, different from that which is applied to the ark of Noah. It is the common name for a chest or coffer, whether applied to the ark in the tabernacle, to a coffin, to a mummy-chest (Gen. i. 26), or to a chest for money (2 Kings xii. 9, 10). Our word *ark* has the same meaning, being derived from the Latin *arca*, a chest. The distinction between *aron* and the present word has already been suggested. The sacred chest is distinguished from others as the 'ark of God' (1 Sam. iii. 3); 'ark of the covenant' (Josh. iii. 6); and 'ark of the law' (Exod. xxv. 22). This ark was a kind of chest, of an oblong shape, made of shittim (acacia) wood, a cubit and a half broad and high, two cubits long, and covered on all sides with the purest gold. It was ornamented on its upper surface with a border or rim of gold; and on each of the two sides, at equal distances from the top, were two gold rings, in which were placed (to remain there perpetually) the gold-covered poles by which the ark was carried, and which continued with it after it was deposited in the tabernacle. The lid or cover of the ark was of the same length and breadth, and made of the purest gold. Over it, at the two extremities, were two cherubim, with their faces turned towards each other, and inclined a little towards the lid (otherwise called the *mercy seat*). Their wings, which were spread out over the top of the ark, formed the throne of God, the King of Israel, while the ark itself was his footstool (Exod. xxv. 10-22; xxxvii. 1-9).

This ark was the most sacred object among the Israelites: it was deposited in the innermost and holiest part of the tabernacle, called 'the holy of holies' (and afterwards in the corresponding apartment of the Temple), where it stood so that one end of each of the poles by which it was carried (which were drawn out so far as to allow the ark to be placed against the back wall), touched the veil which separated the two apartments of the tabernacle (1 Kings viii. 8). In the ark were deposited the tables of the law (Exod. xxv. 16). A quantity of manna was laid up beside the ark in a vase of gold (Exod. xvi. 32, 36; 1 Kings viii. 9); as were also the rod of Aaron (Num. xvii. 10), and a copy of the book of the law (Deut. xxxi. 26).

Nothing is more apparent throughout the historical Scriptures than the extreme sanctity which attached to the ark, as the material sym-

bol of the Divine presence. During the marches of the Israelites it was covered with a purple pall, and borne by the priests, with great reverence and care, in advance of the host (Num. iv. 5, 6; x. 33). It was before the ark, thus in advance, that the waters of the Jordan separated; and it remained in the bed of the river, with the attendant priests, until the whole host had passed over; and no sooner was it also brought up than the waters resumed their course (Josh. iii.; iv. 7, 10, 11, 17, 18). The ark was similarly conspicuous in the grand procession round Jericho (Josh. vi. 4, 6, 8, 11, 12). It is not wonderful therefore that the neighbouring nations, who had no notion of spiritual worship, looked upon it as the God of the Israelites (1 Sam. iv. 6, 7), a delusion which may have been strengthened by the figures of the cherubim on it. After the settlement of the Jews in Palestine, the ark remained in the tabernacle at Shiloh, until, in the time of Eli, it was carried along with the army in the war against the Philistines, under the superstitious notion that it would secure the victory to the Hebrews. They were, however, not only beaten, but the ark itself was taken by the Philistines (1 Sam. iv. 3-11), whose triumph was, however, very short lived, as they were so oppressed by the hand of God, that, after seven months, they were glad to send it back again (1 Sam. v. 7). After that it remained apart from the tabernacle, at Kirjath-jearim (vii. 1, 2), where it continued until the time of David, who purposed to remove it to Jerusalem; but the old prescribed mode of removing it from place to place was so much neglected as to cause the death of Uzzah, in consequence of which it was left in the house of Obedom (2 Sam. vi. 1-11); but after three months David took courage, and succeeded in effecting its safe removal, in grand procession, to Mount Zion (ver. 12-19). When the Temple of Solomon was completed, the ark was deposited in the sanctuary (1 Kings viii. 6-9). The passage in 2 Chron. xxxv. 3, in which Josiah directs the Levites to restore the ark to the holy place, is understood by some to imply that it had either been removed by Amon, who put an idol in its place, which is assumed to have been the 'trespass' of which he is said to have been guilty (2 Chron. xxxiii. 23); or that the priests themselves had withdrawn it during idolatrous times, and preserved it in some secret place, or had removed it from one place to another. But it seems more likely that it had been taken from the holy of holies during the purification and repairs of the temple by this same Josiah, and that he, in this passage, merely directs it to be again set in its place. What became of the ark when the Temple was plundered and destroyed by the Babylonians is not known, and all conjecture is useless. It is certain, however, from the consent of all the Jewish writers, that the old ark was not contained in the second temple, and there is no evidence that any new one was made. Indeed the absence of the ark is one of the important particulars in which this temple was held to be inferior to that of Solomon. The most holy place is therefore generally considered to have been empty in the second temple.

ARK/ITES, the inhabitants of Arka, mentioned in Gen. x. 17; 1 Chron. i. 15, as descended from the Phœnician or Sidonian branch of the great

family of Canaan. This, in fact, as well as the other small northern states of Phœnicia, was a colony from the great parent state of Sidon. Arka, or Aera, their chief town, lay between Tripolis and Antardus, at the western base of Lebanon, 32 R. miles from Antardus, and 18 miles from Tripoli. Burckhardt, in travelling from the north-east of Lebanon to Tripoli, at the distance of about four miles south of the Nahr-el-keber (Eleutherus), came to a hill called Tel-Arka, which, from its regularly flattened conical form and smooth sides, appeared to be artificial. Upon an elevation on its east and south sides, which commands a beautiful view over the plain, the sea, and the Anzeyry mountains, are large and extensive heaps of rubbish, traces of ancient dwellings, blocks of hewn stone, remains of walls, and fragments of granite columns. These are no doubt the remains of Arka; and the hill was probably the acropolis or citadel, or the site of a temple.

ARM. This word is frequently used in Scripture in a metaphorical sense to denote power. Hence, to 'break the arm' is to diminish or destroy the power (Ps. x. 15; Ezek. xxx. 21; Jer. xlviii. 25). It is also employed to denote the infinite power of God (Ps. lxxxix. 13; xlviii. 2; Isa. liii. 1; John xii. 38). In a few places the metaphor is, with great force, extended to the action of the arm, as:—'I will redeem you with a stretched out arm' (Exod. vi. 5), that is, with a power fully exerted. The figure is here taken from the attitude of ancient warriors baring and outstretching the arm for fight. Thus in Isa. lii. 10, 'Jehovah hath made bare his holy arm in the sight of all the nations.'

ARMAGED'DON, properly 'the mountain of Megiddo,' a city on the west of the river Jordan, rebuilt by Solomon (1 Kings ix. 15). Both Ahaziah and Josiah died there. In the mystical language of prophecy, the word mountain represents the Church, and the events which took place at Megiddo are supposed to have had a typical reference to the sorrows and triumphs of the people of God under the Gospel. 'In that day,' says Zechariah, xii. 11, 'shall there be a great mourning in Jerusalem, as the mourning of Hadadrimmon in the valley of Megiddon;' referring to the death of Josiah. But the same spot witnessed, at an earlier period, the greatest triumph of Israel, when 'fought the kings of Canaan in Taanach by the waters of Megiddo' (Judg. v. 19). 'He gathered them together into a place called in the Hebrew tongue Armageddon,' is the language of the Apocalypse; and the word has been translated by some as 'the mountain of destruction,' by others as 'the mountain of the gospel;' many ingenious speculations having been employed on the passage in which it occurs, but with little satisfaction to the more sober readers of divine revelation.

ARME'NIA, a country of Western Asia, is not mentioned in Scripture under that name, but is supposed to be alluded to in the three following Hebrew designations, which seem to refer either to the country as a whole, or to particular districts. I. *Ararat*, the land upon (or over) the mountains of which the ark rested at the Deluge (Gen. viii. 4); whither the sons of Sennacherib fled after murdering their father (2 Kings xix. 37; Isa. xxxvii. 38); and one of the 'kingdoms'

summoned, along with Minni and Ashkenaz, to arm against Babylon (Jer. li. 27). II. *Minni* is mentioned in Jer. li. 27, along with Ararat and Ashkenaz, as a kingdom called to arm itself against Babylon. The name is by some taken for a contraction of 'Armenia.' III. *Thogarmah*, mentioned by the prophet Ezekiel xxvii. 14: xxxviii. 6.

The boundaries of Armenia may be described generally as the southern range of the Caucasus on the north, and a branch of the Taurus on the south. It forms an elevated table-land, whence rise mountains which (with the exception of the gigantic Ararat) are of moderate height. The climate is generally cold, but salubrious. The country abounds in romantic forest and mountain scenery, and rich pasture-land, especially in the districts which border upon Persia. Ancient writers notice the wealth of Armenia in metals and precious stones. The great rivers Euphrates and Tigris both take their rise in this region, as also the Araxes, and the Kur or Cyrus. Armenia is commonly divided into *Greater* and *Lesser*, the line of separation being the Euphrates; but the former constitutes by far the larger portion, and indeed the other is often regarded as pertaining rather to Asia Minor. There was anciently a kingdom of Armenia, with its metropolis Artaxata: it was sometimes an independent state, but most commonly tributary to some more powerful neighbour. Indeed at no period was the whole of this region ever comprised under one government, but Assyria, Media, Syria, and Cappadocia shared the dominion or allegiance of some portion of it, just as it is now divided among the Persians, Russians, Turks, and Kurds. In later times Armenia was the border-country where the Romans and Parthians fruitlessly strove for the mastery; and since then it has been the frequent battle-field of the neighbouring states. Towards the end of the last war between Russia and Turkey, large bodies of native Armenians emigrated into the Russian dominions, so that their number in what is termed Turkish Armenia is now considerably reduced. By the treaty of Turkomanshee (21st Feb. 1828) Persia ceded to Russia the Khanats of Erivan and Nakhchivan. The boundary-line (drawn from the Turkish dominions) passes over the Little Ararat; the line of separation between Persian and Turkish Armenia also begins at Ararat: so that this famous mountain is now the central boundary-stone of these three empires.

Christianity was first established in Armenia in the fourth century; the Armenian church has a close affinity to the Greek church in its forms and polity; it is described by the American missionaries who are settled in the country as in a state of great corruption and debasement. The total number of the Armenian nation throughout the world is supposed not to exceed 2,000,000. Their favourite pursuit is commerce, and their merchants are found in all parts of the East.

The Armenian or Haikan language, notwithstanding the great antiquity of the nation to which it belongs, possesses no literary documents prior to the fifth century of the Christian era. The translation of the Bible, begun by Mesrob in the year 410, is the earliest monument of the language that has come down to us. The dialect in which this version is written, and in which i-

is still publicly read in their churches, is called the old Armenian. The dialect now in use—the modern Armenian—in which they preach and carry on the intercourse of daily life, not only departs from the elder form by dialectal changes in the native elements of the language itself, but also by the great intermixture of Persian and Turkish words which has resulted from the conquest and subjection of the country. It is, perhaps, this diversity of the ancient and modern idioms which has given rise to the many conflicting opinions that exist as to the relation in which the Armenian stands to other languages. As to form, it is said to be rough and full of consonants; to possess *ten* cases in the noun—a number which is only exceeded by the Finnish; to have no dual; to have no mode of denoting gender in the noun by change of form; to bear a remarkable resemblance to Greek in the use of the participle, and in the whole syntactical structure; and to have adopted the Arabian system of metre.

ARMLET. Although this word has the same meaning as *bracelet*, yet the latter is practically so exclusively used to denote the ornament of the wrist, that it seems proper to distinguish by *armlet* the similar ornament which is worn on the upper arm. There is also this difference between them, that in the East bracelets are generally worn by women, and armlets only by

31.

men. The armlet, however, is in use among men only as one of the insignia of sovereign power. The Egyptian kings are represented with armlets, which were also worn by the Egyptian women. These, however, are not jewelled, but of plain or enamelled metal, as was in all likelihood the case among the Hebrews.

ARMS, ARMOUR. In order to give a clear view of this subject, we shall endeavour to show succinctly, and from the best authorities now available, what were the weapons, both offensive and defensive, used by the ancient Asiatics.

The instruments at first employed in the chase, or to repel wild beasts, but converted by the wicked to the destruction of their fellow-men, or used by the peaceable to oppose aggression, were naturally the most simple. Among these were the club and the throwing-bat. The first consisted originally of a heavy piece of wood, variously shaped, made to strike with, and, according to its form, denominated a mace, a bar, a *bazamer*, or a maul. This weapon was in use among the Hebrews; for, in the time of the kings, wood had already been superseded by metal; and the rod of iron (Ps. ii. 9) is supposed to mean a mace, or gavellock, or crowbar. It is an instrument of great power when used by a

strong arm. The throwstick, made of thorn-wood, is the same instrument which we see

figured on Egyptian monuments. By the native Arabs it is still called *lissan*, and was anciently known among us by the name of crooked billet. These instruments, supplied with a sharp edge, would naturally constitute a battle-axe, and a kind of sword; and such in the rudest ages we find them, made with flints set into a groove, or with sharks' teeth firmly secured to the staff with twisted sinews. On the earliest monuments of Egypt, for these ruder instruments is already seen substituted a piece of metal with a steel or bronze blade fastened into a globe, thus forming a falchion-axe; and also a lunate-blade, riveted in three places to the handle, forming a true battle-axe; and there were, besides, true bills or axes in form like our own.

Next came the dirk or poniard, the Hebrew name of which may possibly retain some allusion to the original instrument made of the antelope's horn, merely sharpened, which is still used in every part of the East where the material can be procured. From existing figures, the dirk appears to have been early made of metal in Egypt, and worn stuck in a girdle; but, from several texts (1 Sam. xvii. 39; 2 Sam. xx. 8; and 1 Kings xx. 11), it is evident that the real

sword was slung in a belt, and that 'girding' and 'loosing the sword' were synonymous terms

1. Horn Dagger.
2, 3. Swords.

4, 5. Tulwar Swords.
6. Quarter-pike.

for commencing and ending a war. The blades were, it seems, always short; and the dirk-sword, at least, was always double-edged. The sheath was ornamented and polished. In Egypt there were larger and heavier swords, more nearly like modern tulwars, and of the form of an English round-pointed table-knife. But while metal was scarce, there were also swords which might be called quarter-pikes, being composed of a very short wooden handle, surmounted by a spear-head. In Nubia, swords of heavy wood are still in use.

1, 2. Spear-heads. 3, 4. Darts.
5. Oryx horn spear-head.

The spear was another offensive weapon common to all the nations of antiquity, and was of various size, weight, and length. Probably the shepherd Hebrews, like nations similarly situated in northern Africa, anciently made use of the horn of an oryx, or a leucoryx, above three feet long, straightened in water, and sheathed upon a thorn-wood staff. When sharpened, this instrument would penetrate the hide of a bull, and, according to Strabo, even of an elephant: it was light, very difficult to break, resisted the blow of a battle-axe, and the animals which furnished it were abundant in Arabia and

in the desert east of Palestine. At a later period, the head was of brass, and afterwards of iron. Very ponderous weapons of this kind were often used in Egypt by the heavy infantry; and, from various circumstances, it may be inferred that among the Hebrews and their immediate neighbours, commanders in particular were distinguished by heavy spears. Among these were generally ranked the most valiant in fight and the largest in stature; such as Goliath, 'whose spear was like a weaver's beam' (1 Sam. xvii. 7), and whose spear's head weighed six hundred shekels of iron; which by some is asserted to be equal to twenty-five pounds weight. The spear had a point of metal at the butt-end to fix it in the ground, perhaps with the same massy globe above it, which is still in use, intended to counter-balance the point. It was with this ferret that Abner slew Asahel (2 Sam. ii. 22, 23).

The javelins appear to have had different forms. In most nations of antiquity the infantry, not bearing a spear, carried two darts, those lightly armed using both for long casts, and the heavy-armed only one for that purpose; the second, more ponderous than the other, being reserved for throwing when close to the enemy, or for handling in the manner of a spear. While on the subject of the javelin, it may be remarked that, by the act of casting one at David (1 Sam. xix. 9, 10), Saul virtually absolved him from his allegiance; for by the customs of ancient Asia, preserved in the usages of the Teutonic and other nations, the custom of the East Franks, &c., to throw a dart at a freedman, who escaped from it by flight, was the demonstrative token of manumission given by his lord or master; he was thereby sent out of hand, manumissus, well expressed in the old English phrase 'scot-free.' But for this act of Saul, David might have been viewed as a rebel.

1, 2, 3, 4. Bows. 5, 6. Quivers. 7, 8. Arrows.

But the chief offensive weapon in Egypt, and from the nature of the country, it may be inferred, in Palestine also, was the war-bow. From the simple implements used by the first hunters, consisting merely of an elastic reed, a branch of a tree, or rib of palm, the bow became in the

course of time very strong and tall, was made of brass, of wood backed with horn, or of horn entirely, and even of ivory; some being shaped like the common English bow, and others, particularly those used by riding nations, like the buffalo horn. There were various modes of bending this instrument, by pressure of the knee, or by the foot treading the bow, or by setting one end against the foot, drawing the middle with the hand of the same side towards the hip, and pushing the upper point forward with the second hand, till the thumb passed the loop of the string beyond the neck. The horned bows of the cavalry, shaped like those of the Chinese, occur on monuments of antiquity. This was the Parthian bow, as is proved by several Persian bas-reliefs, and may have been in use in the time of the Elamites, who were a mounted people. These bows were carried in cases to protect the string, which was composed of deer sinews, from injury, and were slung on the right hip of the rider, except when on the point of engaging. Then the string was often cast over the head, and the bow hung upon the breast, with the two nocks above each shoulder, like a pair of horns. The arrows were likewise enclosed in a case or quiver, hung sometimes on the shoulder, and at other times on the left side; and six or eight flight-arrows were commonly stuck in the edge of the cap, ready to be pulled out and put to the string. The infantry always carried the arrows in a quiver on the right shoulder, and the bow was kept unbent until the moment of action. On a march it was carried on the shield arm, where there was frequently also a horn bracer secured below the elbow to receive the shock from the string when an arrow was discharged. The flight or long-range arrows were commonly of reed, not always feathered, and mostly tipped with flint points; but the shot or aimed arrows, used for nearer purposes, were of wood tipped with metal, about 30 inches long, and winged with three lines of feathers, like those in modern use: they varied in length at different periods, and according to the substance of the bows.

The last missile instrument to be mentioned is the sling (Job xli. 28), an improvement upon

56.

[Egyptian Slingers and Sling.]

the simple act of throwing stones. It was the favourite weapon of the Benjamites, a small tribe, not making a great mass in an order of

battle, but well composed for light troops. They could also boast of using the sling equally well with the left hand as with the right. The sling was made of plaited though, somewhat broad in the middle, to lodge the stone or leaden missile, and was twirled two or three times round before the stone was allowed to take flight. Stones could not be cast above 400 feet, but leaden bullets could be thrown as far as 600 feet. The force as well as precision of aim which might be attained in the use of this instrument was remarkably shown in the case of David; and several nations of antiquity boasted of great skill in the practice of the sling.

All these hand-weapons were in use at different periods, not only among the Hebrews and Egyptians, but likewise in Assyria, Persia, Greece, and Macedonia. The Roman pilum was a kind of dart, distinguished from those of other nations chiefly by its weight, and the great proportional length of the metal or iron part, which constituted one half of the whole, or from two and a half to three feet. Much of this length was hollow, and received nearly twenty inches of the shaft within it: the point was never hooked like that of common darts.

DEFENSIVE ARMS.—The most ancient defensive piece was the shield, buckler, roundel, or target, composed of a great variety of materials,

57.

1. The Tsenna, or Great Shield. 2. Common Egyptian Shield. 3. Target. 4, 5. Ancient Shields of unknown tribes. 6. Roundel.

very different in form and size. The Hebrews had the word *tsenna*, a great shield for defence and protection (Gen. xv. 1; Ps. xlvii. 9; Prov. xxx. 5), which is commonly found in connection with spear, and was the shelter of heavily-armed infantry; and the *magin*, a buckler, or smaller shield, which, from a similar juxtaposition with sword, bow, and arrows, appears to have been the defence of other-armed infantry and of chiefs: a third called *sokairah* or roundel, may have been appropriated to archers and slingers; and there were others called *shelatim*, apparently similar to the *magin*, and only differing from it in ornament. In the more advanced eras of civilization shields were made of light wood not liable to split, covered with bull-hide of two or more thicknesses and bordered with metal: the lighter

kinds were made of wicker-work or osier, similarly, but less solidly covered; of double ox-hide cut into a round form. There were others of a single hide, extremely thick from having been boiled; their surface presented an appearance of many folds, like round waves up and down, which yielded, but could rarely be penetrated. We may infer that at first the Hebrews borrowed the forms in use in Egypt, and had their common shields, a kind of parallelogram, broadest and arched at the top, and cut square beneath, bordered with metal, the surface being covered with raw hide with the hair on. The lighter shields may have been soaked in oil and dried in the shade to make them hard. During the Assyrian and Persian supremacy the Hebrews may have used the square, oblong, and round shields of these nations, and may have subsequently copied those of Greece and Rome. The princes of Israel had shields of precious metals: all were managed by a wooden or leathern handle, and often slung by a thong over the neck. The tsema was most likely what in the feudal ages would have been called a *pavise*, for such occurs on the Egyptian monuments. This was about five feet high, with a pointed arch above and square below, resembling the feudal knight's shield, but that the point was reversed. Shields were hung upon the battlements of walls, and, as still occurs, chiefly above gates of cities by the watch and ward. In time of peace they were covered to preserve them from the sun, and in war uncovered; this sign was poetically used to denote coming hostilities, as in Isa. xxii. 6, &c.

The *Helmet* was next in consideration, and in the earliest ages was made of osier, or rushes, in the form of a beehive, or of a skull-cap. The skins of the heads of animals—of lions, bears, wild boars, bulls, and horses—were likewise adopted,

which the turban is usually wound; but these were almost invariably supplied with long lap-pets to cover the ears and the back of the head, and princes usually wore a radiated crown on the summit. This was the form of the Syrian, probably of the Assyrian helmets, excepting that the last mentioned were of brass, though they still retained the low cylindrical shape. Some helmet of this kind was worn by the trained infantry, who were spearmen among the Hebrews; but archers and slingers had round skull-caps of skins, felts, or quilted stuffs, such as are still in use among the Arabs.

Body Armour.—The most ancient Persian idols are clad in shagged skins. In Egypt cuirasses were manufactured of leather, of brass, and of a succession of iron hoops, chiefly covering the abdomen and the shoulders; but a more ancient national form was a kind of thorax, tippet, or square, with an opening for the head in it, the four points covering the breast, back, and both upper arms. This was affected in particular by the royal band of relatives who surrounded the Pharaoh, were his subordinate commanders, messengers, and body-guards, bearing his standards, ensign-fausts, and sun-screens, his portable throne, his bow and arrows. Beneath this square was another piece, protecting the trunk of the body, and both were in general covered with a red-coloured cloth or stuff. On the oldest scitile vases a shoulder-piece likewise occurs, worn by Greek and Etruscan warriors. It covers the upper edge of the body armour, is perforated in the middle for the head to pass, but hangs equal on the breast and back, square on the shoulders, and is evidently of leather. By the use of metal for defensive armour, the Carians appear to have created astonishment among the Egyptians, and therefore to have been the first nation so pro-

and were adorned with rows of teeth, manes, and bristles. Wood, linen cloth in many folds, and a kind of felt, were also in early use, and some of them may be observed worn by the nations of Asia at war with the conqueror kings of Egypt, even before the departure of Israel. At that time also these kings had helmets of metal, of rounded or pointed forms. The nations of farther Asia used the woollen or braided caps, still retained, and now called *kaouk* and *fez*, around

- 59.
1. Egyptian tigitated. 2. Sleeve of ring-mail, Ionian.

tected in Western Asia; nevertheless, in the tombs of the kings near Thebes, a tigitated hauberk is represented, composed of small three-coloured pieces of metal; one golden, the others reddish and green. It is this kind of armour which may be meant by the Hebrew word *techera*, the closest interpretation of which appears to be a tiling. In 2 Chron. xviii. 33, Ahab may have been struck in one of the grooves

or slits in the squares of his techera, or between two of them where they do not overlap; or perhaps, with more probability, between the metal hoops of the trunk of the tippet before mentioned, where the thorax overlaps the abdomen. The term 'scales,' in the case of Goliath's armour, denotes squamous armour, most likely where the pieces were sewed upon a cloth, and not hinged to each other, as in the techera. The techera could not well be worn without an under-garment of some density to resist the friction of metal; and this was probably the dress which Saul put upon David before he assumed the breastplate and girdle.

The *Cuirass* and *Corset* were, strictly speaking, of prepared leather, but often composed of quilted cloths: the former in general denotes, in antiquity, a suit with leathern appendages at the bottom and at the shoulder, as used by the Romans; the latter, one in which the barrel did not come down below the hips. In later ages it

1, 2. Early Greek.
3. Greek.

4, 5. Roman.
6. Barbarian.

always designates a breast and back piece of steel. It is, however, requisite to observe, that in estimating the meaning of Hebrew names for armour of all kinds, they are liable to the same laxity of use which all other languages have manifested.

The *Girdle*, or more properly the baldric or belt, was of leather, studded with metal plates or bullae; broad when the armour was slight, and then might be girt upon the hips; otherwise it supported the sword scarf-wise from the shoulder.

Greaves were likewise known, even so early as the time of David, for Goliath wore them. They consisted of a pair of shin-covers of brass or strong leather, bound by thongs round the calves and above the ankles. They reached only to the knees, excepting among the Greeks, whose greaves, elastic behind, caught nearly the

whole leg, and were raised in front above the knees.

AR'NON, a river forming the southern boundary of trans-Jordanic Palestine, and separating it from the land of Moab (Num. xxii. 13, 26; Dent. ii. 24; iii. 8, 16; Josh. xii. 1; Isa. xvi. 2; Jer. xlviii. 20). It now bears the name of Wady Modjeb, and rises in the mountains of Gilead, near Katrane, whence it pursues a circuitous course of about eighty miles to the Dead Sea. It flows in a rocky bed, and, at the part visited by Burckhardt, in a channel so deep and precipitous as to appear inaccessible; yet along this, winding among huge fragments of rock, lies the most frequented road, and, not being far from Dibon, probably that taken by the Israelites. The stream is almost dried up in summer; but huge masses of rock, torn from the banks, and deposited high above the usual channel, evince its fulness and impetuosity in the rainy season.

AROER, a town on the north side of the river Arnon, and therefore on the southern border of the territory conquered from the Amorites, which was assigned to the tribes of Reuben and Gad (Dent. ii. 36; Josh. xii. 2; xiii. 9). The Amorites had previously dispossessed the Ammonites of this territory; and although in the texts cited the town seems to be given to Reuben, it is mentioned as a Moabitish city by Jeremiah (xlviii. 19). Burckhardt found the ruins of this town under the name of Araayr, on the edge of a precipice overlooking the river. Aroer is always named in conjunction with 'the city that is in the midst of the river;' whence it has been conjectured that, like Rabbath Ammon [which see], it consisted of two parts, or distinct cities; the one on the bank of the river, and the other in the valley beneath, surrounded, either naturally or artificially, by the waters of the river.

2. AROER, one of the towns 'built,' or probably rebuilt, by the tribe of Gad (Num. xxxii. 34). Burckhardt, in journeying from Salt towards Rabbath Ammon, notices a ruined site, called Ayra, as 'one of the towns built by the tribe of Gad.' It is about seven miles south-west from Salt. Aroer of Gad is also mentioned in Judg. xi. 33, and 2 Sam. xxiv. 5.

3. AROER, a city in the tribe of Judah (1 Sam. xxx. 28).

4. AROER, a city in the south of Judah, to which David sent presents after recovering the spoil of Ziklag (1 Sam. xxx. 26, 28). At the distance of twenty geographical miles S. by W. from Hebron, there is a broad valley called Ararah, in which are evident traces of an ancient village or town. The identity of name shows that this was the Aroer of Judah.

ARPHAD, or ARPAD, a Syrian city, having its own king, and always associated in Scripture with Hamath, the Epiphania of the Greeks (2 Kings xviii. 34; xix. 34; Isa. x. 9; xxxvi. 19). But all the explanations given respecting it are purely conjectural, and Arphad must still be numbered among unascertained Scriptural sites.

ARPHAX'AD, the son of Shem, and father of Salah; born one year after the Deluge, and died B.C. 1904, aged 438 years (Gen. xi. 12, &c.).

ARROW. This word is frequently used as the symbol of calamities or diseases inflicted by God (Job vi. 4; xxxiv. 6; Ps. xxxviii. 2; Dent. xxxii. 23; comp. Ezek. v. 16; Zech. ix. 14).

Lightnings are, by a very fine figure, described as the arrows of God (Ps. xviii. 14; cxliv. 6; Habak. iii. 11; comp. Wisd. v. 21; 2 Sam. xxii. 15). 'Arrow' is occasionally used to denote some sudden or inevitable danger; as in Ps. xci. 5:—'The arrow that flieth by day.' It is also figurative of anything injurious, as a deceitful tongue (Ps. cxxix. 4; Jer. ix. 7); a bitter word (Ps. lxxiv. 3); a false testimony (Prov. xxv. 18). The arrow is, however, not always symbolical of evil. In Ps. cxxvii. 4, 5, well-conditioned children are compared to 'arrows in the hands of a mighty man'; i.e. instruments of power and action. The arrow is also used in a good sense to denote the efficient and irresistible energy of the word of God in the hands of the Messiah (Ps. xlv. 6; Isa. xlv. 2).

ARROWS. [ARMS.]

ARROWS, DIVINATION BY. [DIVINATION.]

ARTAXERXES, ARTACHSHAST. The word, which is supposed to mean *great king*, is the title under which more than one Persian king is mentioned in the Old Testament.

The first ARTACHSHAST is mentioned in Ezra iv. 7-24, as the Persian king who, at the instigation of the adversaries of the Jews, obstructed the rebuilding of the Temple, from his time to that of Darius, king of Persia. According to the arguments adduced in the article *ANABASERES*, this king is the immediate predecessor of Darius Hystaspis, and can be no other than the Magian impostor, Smerdis, who seized on the throne B.C. 521, and was murdered after a usurpation of less than eight months (Herod. iii. 61-78).

As to the second ARTACHSHAST, in the seventh year of whose reign Ezra led a second colony of the Jewish exiles back to Jerusalem (Ezra vii. 1, *sq.*), the opinions are divided between Xerxes and his son Artaxerxes Longimanus, and it is difficult, if not impossible, to arrive at any certain conclusion on the subject.

The third ARTACHSHAST is the Persian king who, in the twentieth year of his reign, considerably allowed Nehemiah to go to Jerusalem for the furtherance of purely national objects, invested him with the government of his own people, and allowed him to remain there for twelve years (Neh. ii. 1, *sq.*; v. 14). It is almost unanimously agreed that the king here intended is Artaxerxes Longimanus, who reigned from the year 464 to 425 B.C.

ARTEMAS. This name (which is a contraction for Artemidorus) occurs only once (Tit. iii. 12), as that of an esteemed disciple whom St. Paul desired to send into Crete to supply the place of Titus, whom he invited to visit him at Nicopolis. When the Epistle was written, the Apostle seems not to have decided whether he should send Artemas or Tychicus for this purpose.

ARVAD, or, as it might be spelt, ARTAD, whence the present name Ruad, a small island and city on the coast of Syria, called by the Greeks Aradus, by which name it is mentioned in 1 Macc. xv. 23. It is a small rocky island, opposite the mouth of the river Eleutherus, to the north of Tripolis, about one mile in circumference and two miles from the shore. Strabo describes it as a rock rising in the midst of the waves, and modern travellers state that it is

steep on every side. Strabo also describes the houses as exceedingly lofty, and were doubtless so built, on account of the scantiness of the site; hence, for its size, it was exceedingly populous.

ARVADITES (Gen. x. 18; 1 Chron. i. 16), the inhabitants of the island Aradus [ARVAD], and doubtless also of the neighbouring coast. The Arvadites were descended from Arvad, one of the sons of Canaan (Gen. x. 18). Strabo describes the Arvadites as a colony from Sidon. They were noted mariners (Ezek. xxvii. 8, 11), and formed a distinct state, with a king of their own; yet they appear to have been in some dependence upon Tyre, for the prophet represents them as furnishing their contingent of mariners to that city (Ezek. xxvii. 8, 11). The Arvadites took their full share in the maritime traffic for which the Phœnician nation was celebrated, particularly after Tyre and Sidon had fallen under the dominion of the Græco-Syrian kings.

ARUMAH, otherwise RUMAH, a city near Shechem, where Abimelech encamped (Judg. ix. 41).

ASA (*healing* or *physician*), son of Abijah, grandson of Rehoboam, and third king of Judah. He began to reign two years before the death of Jeroboam, in Israel, and he reigned forty-one years, from B.C. 955 to 914. Asa was very young at his accession, the affairs of the government were administered by his mother, or, according to some (comp. 1 Kings xv. 1, 10), his grandmother Maachab, who is understood to have been a granddaughter of Absalom [MAACHAB]. She gave much encouragement to idolatry; but the young king, on assuming the reins of government, zealously rooted out the idolatrous practices which had grown up during his minority and under the preceding reigns; and only the altars in the 'high places' were suffered to remain (1 Kings xv. 11-13; 2 Chron. xiv. 2-5). He neglected no human means of putting his kingdom in the best possible military condition, for which ample opportunity was afforded by the peace which he enjoyed in the ten first years of his reign. And his resources were so well organized, and the population had so increased, that he was eventually in a condition to count on the military services of 580,000 men (2 Chron. xiv. 6-8). In the eleventh year of his reign, relying upon the Divine aid, Asa attacked and defeated the numerous host of the Cushite king Zerah, who had penetrated through Arabia Petraea into the vale of Zephathah, with an immense host (2 Chron. xiv. 9-15.) As the triumphant Judahites were returning, laden with spoil, to Jerusalem, they were met by the prophet Azariah, who declared this splendid victory to be a consequence of Asa's confidence in Jehovah, and exhorted him to perseverance. Thus encouraged, the king exerted himself to extirpate the remnants of idolatry, and caused the people to renew their covenant with Jehovah (2 Chron. xv. 1-15). It was this clear knowledge of his dependent political position, as the vice-gerent of Jehovah, which won for Asa the highest praise that could be given to a Jewish king—that he walked in the steps of his ancestor David (1 Kings xv. 11).

Nevertheless, the king failed towards the latter end of his reign to maintain the character he had thus acquired. When Baasha, king of Israel,

had renewed the war between the two kingdoms, and had taken Ramah, which he was proceeding to fortify as a frontier barrier. Asa, the conqueror of Zerah, was so far wanting to his kingdom and his God, as to employ the wealth of the Temple and of the royal treasures to induce the king of Syria (Damascus) to make a diversion in his favour by invading the dominions of Baasha. By this means he recovered Ramah, indeed; but his treasures were squandered, and he incurred the rebuke of the prophet Hanani, whom he cast into prison, being, as it seems, both alarmed and enraged at the effect his address was calculated to produce upon the people. Other persons (who had probably manifested their disapprobation) also suffered from his anger (1 Kings xv. 16-22; 2 Chron. xvi. 1-10). In the three last years of his life Asa was afflicted with a grievous 'disease in his feet,' and it is mentioned to his reproach that he placed too much confidence in his physicians. At his death, however, it appeared that his popularity had not been substantially impaired; for he was honoured with a funeral of unusual cost and magnificence (2 Chron. xvi. 11-14).

ASAHEL (*God-created*), son of David's sister Zeruiah, and brother of Joab and Abishai. He was noted for his swiftness of foot; and after the battle at Gibeon he pursued and overtook Abner, who, with great reluctance, and to preserve his own life, slew him with a backthrust of his spear, B.C. 1055 [ABNER] (2 Sam. ii. 18-23).

ASAPH (*assembler*), a Levite, son of Barachias (1 Chron. vi. 39; xv. 17), eminent as a musician, and appointed by David to preside over the sacred choral services which he organized. The 'sons of Asaph' are afterwards mentioned as choristers of the temple (1 Chron. xxv. 1, 2; 2 Chron. xx. 14; xxix. 13; Ezra ii. 41; iii. 10; Neh. vii. 44; xi. 22); and this office appears to have been made hereditary in his family (1 Chron. xxv. 1, 2). Asaph was celebrated in after times as a prophet and poet (2 Chron. xxix. 30; Neh. xii. 16), and the titles of twelve of the Psalms (lxxiii. to lxxxiii.) bear his name. The merits of this appropriation are elsewhere examined [PSALMS].—There were two other persons named Asaph: one who occupied the distinguished post of 'recorder' to king Hezekiah (2 Kings xviii. 18; Isa. xxxvi. 3); another who was keeper of the royal forests under Artaxerxes (Neh. ii. 8).

ASCENSION. The event spoken of under this title is among those which Christians of every age have contemplated with the most profound satisfaction. It was in his ascension that Christ exhibited the perfect triumph of humanity over every antagonist, whether in itself, or in the circumstances under which it may be supposed to exist. The contemplation of this, the entrance of the Redeemer into glory, inspired the prophets of old with the noblest views of his kingdom. 'Thou hast ascended on high; thou hast led captivity captive; thou hast received gifts for men; yea, for the rebellious also, that the Lord God might dwell among them' (Ps. lxviii. 18); and 'Lift up your heads, O ye gates; and be ye lift up, ye everlasting doors, and the king of glory shall come in' (Ps. xxiv. 9). That something of vast importance, in respect to the completion of the great scheme of salvation, was involved in this event, appears

from the words of our Lord himself, 'Touch me not, for I am not yet ascended to my Father: but go to my brethren, and say unto them, I ascend unto my Father, and your Father; and to my God and your God' (John xx. 17). Nor was it till this had taken place that he poured out the grace of the Spirit upon his church, or began the higher exercises of his office as a mediating priest. In the primitive church, the feast of the Ascension, called also by St. Chrysostom the Assumption of Christ, was considered, like the solemn days of the Nativity and the Passion, as of apostolic origin. St. Chrysostom, in his homily on the subject, calls it an illustrious and refulgent day, and describes the exaltation of Christ as the grand proof of God's reconciliation to mankind.

AS'ENATH, the daughter of Potipherah, priest of On, whom the king of Egypt bestowed in marriage upon Joseph, with the view probably of strengthening his position in Egypt by this high connection. The considerations suggested by this marriage belong to another place [JOSEPH]; and attention is here only required to the name, which, in common with other words of foreign origin, has attracted considerable notice. The most probable interpretation is that it means *worshipper of Neith*—the titular goddess of Sais, the Athene of the Greeks.

ASH. The word thus translated occurs only once in Scripture (Isa. xlv. 14), and is variously translated. Some consider *pine-tree* to be the correct translation, others the *rubus* or *bramble*. Celsius quotes from the Arab author, 'Abu l Fadli, the description of a tree called *aran*, which appears well suited to the passage, though it has not yet been ascertained what tree is intended. The *aran* is said to be a tree of Arabia Petraea, of a thorny nature, inhabiting the valleys, but found also in the mountains, where it is however less thorny. The wood is said to be much valued for cleaning the teeth. The fruit is in bunches like small grapes. The berry is noxious while green, and bitter like galls; as it ripens it becomes red, then black and somewhat sweetish, and when eaten is grateful to the stomach, &c., and seems to act as a stimulant medicine. Sprengel supposes this to be the caper plant. To us it appears to agree in some respects with *Salvadora persica*, but not in all points, and therefore it is preferable to leave it as one of those still requiring investigation by some traveller in Syria conversant both with plants and their Oriental names and uses.

ASHDOD, the Azotus of the Greeks and Romans, and so called in 1 Macc. iv. 15; Acts viii. 40; a city on the summit of a grassy hill, near the Mediterranean coast, nearly mid-way between Gaza and Joppa, being 18 geog. miles N. by E. from the former, and 21 S. from the latter; and it is more exactly mid-way between Askelon and Ekron, being 10 geog. miles N. by E. from the former, and S. by W. from the latter. Ashdod was a city of the Philistines, and the chief town of one of their five states (Josh. xiii. 3; 1 Sam. vi. 17). It was the seat of the worship of Dagon (1 Sam. v. 5; 1 Macc. xi. 4); and it was before its shrine in this city that the captured ark was deposited and triumphed over the idol (1 Sam. v. 1-9). Ashdod was assigned to Judah; but many centuries passed before this and the other Phi-

listine towns were subdued [PHILISTINES]; and it appears never to have been permanently in possession of the Judahites, although it was dismantled by Uzziah, who built towns in the territory of Ashdod (1 Chron. xxvi. 6). It is mentioned to the reproach of the Jews returned from captivity, that they married wives of Ashdod, with the result that the children of these marriages spoke a mongrel dialect, half Hebrew and half in the speech of Ashdod (Neh. xiii. 23, 24). These facts indicate the ancient importance of Ashdod. It was indeed a place of great strength; and being on the usual military route between Syria and Egypt, the possession of it became an object of importance in the wars between Egypt and the great northern powers. Hence it was secured by the Assyrians before invading Egypt (Isa. i. 1, *sq.*); and at a later date it was taken by Psammetichus, after a siege of twenty-nine years, being the longest siege on record. The destruction of Ashdod was foretold by the prophets (Jer. xxv. 20; Amos i. 8; iii. 9; Zeph. ii. 4; Zach. ix. 6); and was accomplished by the Maccabees (1 Macc. v. 68; x. 77-84; xi. 4). It was, however, rebuilt, and was included in the dominion of Herod the Great, who bequeathed it, with two other towns, to his sister Salome. The evangelist Philip was found at Ashdod after he had baptized the Ethiopian eunuch (Acts viii. 40). Azotus early became the seat of a bishopric; and we find a bishop of Azotus present at the councils of Nice, of Chalcedon, A.D. 339, of Seleucia, and of Jerusalem, A.D. 536.

Ashdod exists at present as an inconsiderable village. The site is marked by ancient ruins, such as broken arches, and partly buried fragments of marble columns; there is also what has the appearance of a very ancient khan, the principal chamber of which had obviously, at some former period, been used as a Christian chapel. The place is still called *Esdud*.

ASHER (*happy*), one of the sons of Jacob by Zilpah, the handmaid of Leah (Gen. xxx. 13; xxxv. 26), and founder of one of the twelve tribes (Num. xxvi. 44-47). Asher had four sons and one daughter (Gen. xlix. 20; Deut. xxxiii. 24). On quitting Egypt the number of adult males in the tribe of Asher was 41,500, which made it the ninth of the tribes (excluding Levi) in numbers—Ephraim, Manasseh, and Benjamin only being below it. But before entering Canaan an increase of 11,900—an increase exceeded only by Manasseh—raised the number to 53,400, and made it the fifth of the tribes in population (comp. Num. i. 40, 41; xxvi. 47). The inheritance of this tribe lay in a very fruitful country, on the sea-coast, with Lebanon north, Carmel and the tribe of Issachar south, and Zebulun and Naphtali east. It is usually stated that the whole of the Phœnician territories, including Sidon, were assigned to this tribe. But there are various considerations which militate against this conclusion. The Asherites were unable to gain possession for a long time of the territories actually assigned them, but 'dwelt among the Canaanites, the inhabitants of the land' (Judg. i. 32); and, 'as it is not usual to say of a larger number that it dwells among the smaller, the inference is, that they expelled but comparatively few of the Canaanites, leaving them, in fact, a majority of the population.'

ASHES, in the symbolical language of Scripture, denote human frailty (Gen. xviii. 27), deep humiliation (Esth. iv. 1; Jonah iii. 6; Matt. xi. 21; Luke x. 13; Job xlii. 6; Dan. ix. 3). To sit in ashes was a token of grief and mourning (Job ii. 8; Lam. iii. 16; Ezek. xxvii. 30), as was also strewing them upon the head (2 Sam. xiii. 10; Isa. xlii. 3) [MOURNING]. 'Feeding on ashes,' in Ps. cii. 9, appears to express grief, as of one with whose food the ashes with which he is covered mingle. But in Isa. xlv. 20, 'feeding on ashes,' which afford no nourishment, is judged to denote ineffectual means, labour to no purpose. Compare Hos. xii. 1.

ASH'IMA (2 Kings xvii. 30), only once mentioned in the Old Testament as the god of the people of Hamath. The Babylonian Talmud, and the majority of Jewish writers, assert that Ashima was worshipped under the form of a *goat without wool*; the Talmud of Jerusalem says, under that of a *lamb*. Elias Levita, a learned Rabbi of the sixteenth century, assigns the word the sense of *ape*. Jurien and Calmet have proposed other fanciful conjectures. The opinion that this idol had the form of a goat, however, appears to be the one best supported by arguments as well as by authorities.

ASHKENAZ (Gen. x. 3), and ASCHENAZ (Jer. li. 27), the name of a son of Gomer, son of Japhet, and of a tribe of his descendants. In Jeremiah it is placed with Ararat and Minni, provinces of Armenia; whence it is probable that Ashkenaz was a province of Armenia; or at least that it lay not far from it, near the Caucasus, or towards the Black Sea.

ASH'PENAZ, chief of the eunuchs of king Nebuchadnezzar, to whose care Daniel and his companions were consigned, and who changed their names (Dan. i. 3, 7).

ASH'TAROTH and ASHTAROTH-CARNAIM, a town of Bashan (Deut. i. 4; Josh. ix. 10) which was included in the territory of the half-tribe of Manasseh (Josh. xiii. 31), and was assigned to the Levites (1 Chron. vi. 71). It is placed by Eusebius 6 miles from Edrei, the other principal town of Bashan, and 25 miles from Bostra. The town existed in the time of Abraham (Gen. xiv. 5); and as its name of Ashtaroth appears to be derived from the worship of the moon under that name [see the following article], there is little need to look farther than the crescent of that luminary and its symbolical image for an explanation of the addition CARNAIM, or rather KARNAIM, 'horned.' Ashtaroth-Carnaim is now usually identified with Mezareib, the situation of which corresponds accurately enough with the distances given by Eusebius. Here is the first castle on the great pilgrim road from Damascus to Mecca, which was built about 340 years ago by the Sultan Selim. There are no dwellings beyond the castle, and within it only a few mud huts upon the flat roofs of the warehouses, occupied by the peasants who cultivate the neighbouring grounds.

ASHTORETH (1 Kings xi. 5) is the name of a goddess of the Sidonians (1 Kings xi. 5, 33), but also of the Philistines (1 Sam. xxxi. 10), whose worship was introduced among the Israelites during the period of the judges (Jud. ii. 13; 1 Sam. vii. 4), was celebrated by Solomon himself (1 Kings xi. 5), and was finally put down

by Josiah (2 Kings xxiii. 13). She is frequently mentioned in connection with Baal, as the corresponding female divinity (Jud. ii. 13); and, from the addition of the words, 'and all the host of heaven,' in 2 Kings xxiii. 4, it is probable that she represented one of the celestial bodies. There is also reason to believe that she is meant by the 'queen of heaven,' in Jer. vii. 18; xlv. 17; whose worship is there said to have been solemnised by burning incense, pouring libations, and offering cakes.

According to the testimonies of profane writers, the worship of this goddess, under different names, existed in all countries and colonies of the Syro-Arabian nations. She was especially the chief female divinity of the Phœnicians and Syrians, and there can be no doubt was worshipped also at ancient Carthage. The classical writers, who usually endeavoured to identify the gods of other nations with their own, rather than to discriminate between them, have recognised several of their own divinities in Ashtoreth. Thus she was considered to be *Juno* or *Venus*, especially *Venus Urania*.

As for the power of nature, which was worshipped under the name of Ashtoreth, Creuzer and Münster assert that it was the principle of conception and parturition—that subordinate power which is fecundated by a superior influence, but which is the agent of all births throughout the universe. As such, Münster maintains that the *original* form under which Ashtoreth was worshipped was the *moon*; and that the transition from that to the *planet Venus* was unquestionably an innovation of a later date. It is evident that the moon alone can be properly called the queen of heaven; as also that the dependent relation of the moon to the sun makes it a more appropriate symbol of that sex, whose functions as female and mother, throughout the whole extent of animated nature, were embodied in Ashtoreth [BAAL].

The rites of her worship, if we may assume their resembling those which profane authors describe as paid to the cognate goddesses, in part agree with the few indications in the Old Test., in part complete the brief notices there into an accordant picture. The *cakes* mentioned in Jer. vii. 18, were also known to the Greeks, and were by them made in the shape of a sickle, in reference to the new moon. Among animals, the dove, the crab, and, in later times, the lion, were sacred to her; and among fruits, the pomegranate. No blood was shed on her altar; but male animals, and chiefly *kids*, were sacrificed to her. The most prominent part of her worship, however, consisted of those libidinous orgies, which Augustine, who was an eye-witness of their horrors in Carthage, describes with such indignation. Her priests were eunuchs in women's attire (1 Kings xiv. 24), and women (Hos. iv. 14), who, like the Bayaderes of India, prostituted themselves to enrich the temple of this goddess. The prohibition in Deut. xxiii. 18 appears to allude to the dedication of such funds to such a purpose. As for the places consecrated to her worship, although the numerous passages in which the authorized version erroneously speaks of *groves*, are to be deducted (as is explained below), there are yet several occasions on which *gardens* and *shady trees* are mentioned

as peculiar seats of (probably, *her*) lascivious rites (Isa. i. 29; lxv. 3; 1 Kings xiv. 23; Hos. iv. 13; Jer. ii. 20; iii. 13). She also had celebrated temples (1 Sam. xxxi. 10).

As to the form and attributes with which Ashtoreth was represented, the oldest known image, that in Paphos, was a white conical stone. In Canaan she was probably represented as a *cow*. In Phœnicia, she had the head of a cow or bull, as she is seen on coins. Sauchoniaton states that 'Astarte adopted the head of a bull as a symbol of her sovereignty'; he also accounts for the *star* which is her most usual emblem, by saying that 'when she passed through the earth, she found a fallen star, which she consecrated in Tyre. At length, she was figured with the human form, as Lucian expressly testifies of the Syrian goddess—which is substantially the same

61.

as Ashtoreth; and she is so found on coins of Severus, with her head surrounded with rays, sitting on a lion, and holding a thunderbolt and a sceptre in either hand.

To come now to ASHERAH (Judg. vi. 25). Selden was the first who endeavoured to show that this word—which in the LXX. and Vulgate is generally rendered *grove*, in which our authorized version has followed them—must in *some* places, for the sake of the sense, be taken to mean a *wooden image* of Ashtoreth; and it may now be regarded as a settled point that Asherah is a *name*, and also denotes an image of this goddess.

Some of the arguments which support this opinion are briefly as follows. It is argued that Asherah almost always occurs with words which denote *idols* and *statues of idols*; that the verbs which are employed to express the making an Asherah, are incompatible with the idea of a grove, as they are such as *to build, to shape, to erect*; that the words used to denote the destruction of an Asherah are those of *breaking to pieces, subverting*; that the *image* of Asherah is placed in the Temple (2 Kings xxi. 7); and that Asherah is coupled with Baal in precisely the same way as Ashtoreth is: comp. Judg. ii. 13; x. 6; 1 Kings xviii. 19; 2 Kings xxiii. 4; and particularly Judges iii. 7, and ii. 13, where the plural form of both words is explained as of itself denoting *images* of this goddess. Besides, Selden objects that the signification *grove* is even incongruous in 2 Kings xvii. 10, where we read of '*setting up groves under every green tree*.' On the strength of these arguments most modern scholars assume that Asherah is a *name* for Ashtoreth, and that it denotes more especially the relation of that goddess to the *planet Venus*, as the lesser star of

good fortune. It appears, namely, to be an indisputable fact that both Baal and Ashtoreth, although their primary relation was to the sun and moon, came in process of time to be connected, in the religious conceptions of the Syro-Arabians, with the planets Jupiter and Venus, as the two stars of good fortune [See the article MENT].

ASIA. The ancients had no divisions of the world into parts or quarters; and hence the word Asia, in the modern large sense, does not occur in Scripture. Indeed it does not at all occur, in any sense, in the Hebrew Scriptures, but is found in the books of the Maccabees and in the New Testament. It there applies, in the *largest* sense, to that peninsular portion of Asia which, since the fifth century, has been known by the name of Asia Minor; and, in a narrower sense, to a certain portion thereof which was known as Asia Proper. Thus, it is now generally agreed,—1. That 'Asia' denotes the whole of ASIA MINOR, in the texts Acts ix. 26, 27; xx. 4, 16, 18; xxvii. 2. &c.: but, 2. That only ASIA PROPER, the Roman or Proconsular Asia, is denoted in Acts ii. 9; vi. 9; xix. 10, 22; 2 Tim. i. 15; 1 Pet. i. 6; Rev. i. 4, 11. ASIA MINOR comprehended Bithynia, Pontus, Galatia, Cappadocia, Cilicia, Pamphylia, Pisidia, Lycania, Phrygia, Mysia, Troas (all of which are mentioned in the New Testament), Lydia, Ionia, Æolis (which are sometimes included under Lydia), Caria, Doris, and Lycia. ASIA PROPER, or Proconsular Asia, comprehended the provinces of Phrygia, Mysia, Caria, and Lydia. But it is evident that St. Luke uses the term Asia in a sense still more restricted, for in one place he counts Phrygia (Acts ii. 9, 10), and in another Mysia (xvi. 6, 7), as provinces distinct from Asia. Hence it is probable that in many, if not all, of the second set of references the word Asia denotes only Ionia, or the entire western coast, of which Ephesus was the capital, and in which the seven churches were situated. This is called Asia also by Strabo.

ASIARCHÆ (Acts xix. 31; Auth. Vers. 'certain of the chief of Asia'). These asiarchæ, who derived their appellation from the name of the province over which they presided (as Syriarchæ, 2 Macc. xii. 2. Lyciarch, Cariarch, &c.), were in Proconsular Asia the chief presidents of the religious rites, whose office it was to exhibit every year, in honour of the gods and of the Roman emperor, solemn games in the theatre. This they did at their own expense, whence none but the most opulent persons could bear the office, although only of one year's continuance. The appointment was much as follows: at the beginning of every year (i. e. about the autumnal equinox) each of the cities of Asia held a public assembly, in order to nominate one of their citizens as asiarch. A person was then sent to the general council of the province, at some one of the principal cities, as Ephesus, Smyrna, Sardis, &c., to announce the name of the individual who had been selected. Of the persons thus nominated by the cities the council designated ten, and it is probable that one chosen by the proconsul was pre-eminently the asiarch, but that the other nine acted as his assessors and also bore that title.

ASKELON, a city of the Philistines, and seat

of one of their five states (Judg. xiv. 19; 1 Sam. vi. 17; 2 Sam. i. 20). It was situated on the Mediterranean coast, between Gaza and Ashdod, twelve geog. miles north of the former, and ten S. by W. from the latter, and thirty-seven S.W.W. from Jerusalem. It was the only one of the five great Philistine towns that was a maritime port, and stood out close to the shore. Askelon was assigned to the tribe of Judah (Josh. xiii. 13; comp. Judg. i. 18); but it was never for any length of time in possession of the Israelites. The part of the country in which it stood abounded in aromatic plants, onions, and vines. It was well fortified, and early became the seat of the worship of Decerto. After the time of Alexander it shared the lot of Phœnicia, and also of Judea, being tributary sometimes to Egypt, and at other times to Syria. The magnificent Herod was born at Askelon, and although the city did not belong to his dominion, he adorned it with fountains, baths, and colonnades: and after his death Salome, his sister, resided there in a palace which Caesar bestowed upon her. It suffered much in the Jewish war with the Romans, but afterwards it again revived, and in the middle ages was noted not only as a stronghold, but as a wealthy and important town. The town bears a prominent part in the history of the Crusades. After being several times dismantled and re-fortified in the times of Saladin and Richard, its fortifications were at length totally destroyed by the Sultan Bibars in A.D. 1270, and the port filled up with stones, for fear of future attempts on the part of the Crusaders. Its desolation has long been complete, and little now remains of it but the walls, with numerous fragments of granite pillars. The situation is described as strong; the thick walls, flanked with towers, were built on the top of a ridge of rock that encircles the town, and terminates at each end in the sea. The place still bears the name of Askulan.

ASMODEUS (Tob. iii. 8), a demon or evil spirit, mentioned in the Apocryphal book of Tobit as having beset Sarah, the daughter of Raguel, and killed the seven husbands whom she had married before Tobit. The Rabbins call Asmodeus, as well as Beelzebub, 'the prince of devils,' whence the two names have been supposed to refer to the same demon. But this title they also give to 'the angel of death,' as the destroyer of all mankind. Thus the story in Tobit means no more than that the seven husbands died successively on their marriage with Sarah.

ASMONÆANS. [MACCABEES.]

ASNAPPER, the name of the king, or possibly Assyrian satrap, who sent the Cuthæan colonies into Palestine (Ezra iv. 10). Taking him for king of Assyria, he is generally identified with Esar-haddon, although some believe the name to denote Salmanezar. The title ('most noble') which is given to him belonged to the satraps.

ASPA'LATHUS, a name which occurs only in the Apocrypha (Ecclus. xxiv. 15), where the substance which it indicates is enumerated with the other spices and perfumes to which wisdom is compared. Though this drug is not mentioned in the canonical Scriptures, it is probable that it may have been one of the substances

comprehended under the general name of spices. It was no doubt one of the substances employed by the ancients as a perfume and incense, as it forms one of the ingredients of the cyphi, or compound incense made use of by the Egyptian priests. The substance which was called asphaltus has not been very clearly ascertained.

ASPHALTUM (Auth. Vers. 'pitch') doubtless derives its name from the Lake Asphaltites (Dead Sea), whence it was abundantly obtained. Usually asphaltum is of a shining black colour; it is solid and brittle, with a conchoidal fracture, altogether not unlike common pitch. Its specific gravity is from 1 to 1.6, and it consists chiefly of bituminous oil, hydrogen gas, and charcoal. It is found partly as a solid dry fossil, intermixed in layers of plaster, marl, or slate, and partly as liquid tar flowing from cavities in rocks or in the earth, or swimming upon the surface of lakes or natural wells. To judge from Gen. xiv. 10, mines of asphaltum must have existed formerly on the spot where subsequently the Dead Sea, or Lake Asphaltites, was formed. The Palestine earth-pitch seems, however, to have had the preference over all the other sorts. It was used among the ancients partly for covering boats, paying the bottoms of vessels (Gen. vi. 14: Exod. ii. 3), and partly as a substitute for mortar in buildings; and it is thought that the bricks of which the walls of Babylon were built (Gen. xi. 3) had been cemented with hot bitumen, which imparted to them great solidity. In ancient Babylon asphaltum was made use of also as fuel, as the environs have from the earliest times been renowned for the abundance of asphalt-mines. Neither were the ancient Jews unacquainted with the medicinal properties of that mineral.

The asphaltum was also used among the ancient Egyptians for embalming the dead. This operation was performed in three different ways: the first with slaggy mineral pitch alone; the second with a mixture of this bitumen and a liquor extracted from the cedar; and the third with a similar mixture, to which resinous and aromatic substances were added.

Asphaltum is found in masses on the shore of the Dead Sea, or floating on the surface of its waters. The local Arabs affirm that the bitumen only appears after earthquakes. They allege that after the earthquake of 1834 huge quantities of it were cast upon the shore, of which the Jehalin Arabs alone took about 60 kuntars (each of 98 lbs.) to market. There was another earthquake on January 1, 1837, and soon after a large mass of asphaltum (compared by one person to an island, and by another to a house) was discovered floating on the sea, and was driven aground on the western side, near Usdum. The neighbouring Arabs assembled, cut it up with axes, removed it by camels' loads, and sold it at the rate of four piastres the *rutl*, or pound; the product is said to have been about 3000 dollars. Except during these two years, the Sheik of the Jehalin, a man fifty years old, had never known bitumen appear in the sea, nor heard of it from his fathers.

ASS. 1. The common working ass of Western Asia (called in the Hebrew *Chamor*), is an animal of small stature, frequently represented on Egyptian monuments with panniers on the

back, usually of a reddish colour. It appears to be a domesticated race of the wild ass of Arabia, Mesopotamia, and Southern Persia.

In its natural state it never seeks woody, but upland pasture, mountainous and rocky retreats; and it is habituated to stand on the brink of precipices (a practice not entirely obliterated in our own domestic races), whence, with protruded ears, it surveys the scene below, blowing and at length braying in extreme excitement. This habit is beautifully depicted by Jeremiah (xvii. 6; xlviii. 6).

The Anth. Vers. translates the Hebrew words *Oir*, *Oirim*, 'young ass,' 'colt'; but this rendering does not appear on all occasions to be correct, the word being sometimes used where the *Oirim* or *Ourim* carry loads and till the ground, which seems to afford evidence of, at least, full growth (Isa. xxx. 6, 24). The word *Aton*, *Atunuth*, is unsatisfactorily rendered 'she-ass,' unless we suppose it to refer to a breed of greater beauty and importance than the common, namely, the silver grey of Africa; which being large and indocile, the females were anciently selected in preference for riding, and on that account formed

62. [Domestic Ass of Western Asia.]

a valuable kind of property. It is now the fashion, as it was during the Parthian empire, and probably in the time of the Judges, to dapple this breed with spots of orange or crimson, or of both colours together; and although the taste may be puerile, we conceive that it is the record of remote conquest achieved by a nation of Central Asia mounted on spotted or clouded horses, and revived by the Parthians, who were similarly equipped.

As this animal was most serviceable to man, its name was held in respect rather than contempt. It is alleged, indeed, that the ass was held in contempt in Egypt; but among the Arabs and Jews we have 'the voice of one crying in the wilderness,' a solemn allusion derived from the wild ass, almost the only voice in the desert; and in the distinguishing epithet of Mirvan II., last Omniad caliph, who was called the wild ass of Mesopotamia—proofs that no idea of contempt was associated with the prophet's metaphor, and that, by such a designation, no insult was intended to the person or dignity of the prince.

2. **WILD ASS.** By this term the Scripture seems

to intend the horse-ass, or wild mule. The species is first noticed by Aristotle, who mentions nine of these animals as being brought to Phrygia by Pharnaces the satrap, whereof three were living in the time of his son Pharnabazus. The allusion of Jeremiah, in speaking of the wild ass (xiv. 6), most forcibly depicts the scarcity of food when this species, inured to the desert and to want of water, are made the prominent example of suffering. They were most likely used in traces to draw chariots (Isa. xxi. 7). The wild ass is little inferior to the wild horse; in shape it resembles a mule, in gracefulness a horse, and in colour it is silvery, with broad spaces of flaxen or bright bay on the thigh, flank, shoulder, neck, and head; the ears are wide like the zebra's, and the neck is clothed with a vertical dark mane prolonged in a stripe to the tuft of the tail. The company of this animal is liked by horses, and, when domesticated, it is gentle: it is now found wild from the deserts of

63. [Wild Ass.]

the Oxus and Jaxartes to China and Central India. In Cutch it is never known to drink, and in whole districts which it frequents water is not to be found. Though the natives talk of the fine flavour of the flesh, and the Gour in Persia is the food of heroes, to an European its smell is abominable.

MULE occurs in 2 Sam. xiii. 29; 1 Kings i. 33; x. 25; and in other places. This animal is sufficiently well known to require no particular description. Where, or at what period, breeding mules was first commenced is totally unknown, although, from several circumstances, Western Asia may be regarded as the locality; and the era as coinciding with that of the first kings of Israel. In the time of David, to be allowed to ride on the king's own mule was an understood concession of great, if not sovereign authority, and several years before the mention of this event all the king's sons already rode upon mules. It does not appear that the Hebrew people, at this early period at least, bred mules; they received them from Armenia; but the most beautiful were no doubt brought from the vicinity of Bassora.

ASSHUR, a son of Shem, who gave his name to Assyria (Gen. x. 11-22) [ASSYRIA].

ASSIDÆANS (the *pious* or *righteous*; 1 Mac. vii. 13). As a description of a particular body of men this word does not occur in the canonical

Scriptures, nor in Josephus; but in the First Book of Maccabees it is applied to the body of zealous and devoted men who rose at the signal for armed resistance given by Mattathias, the father of the Maccabees, and who, under him and his successors, upheld with the sword the great doctrine of the unity of God, and stemmed the advancing tide of Grecian manners and idolatries.

In the entire absence of collateral information, it seems the safest course to conclude that the Assidæans were a body of eminently zealous men, devoted to the Law, who joined Mattathias very early, and remained the constant adherents of him and his son Judas—not, like the mass of their supporters, rising occasionally and then relapsing into the ordinary pursuits of life. It is possible that, as Jennings conjectures, the name came to be applied to them by their enemies as a term of reproach, like 'Puritans' formerly in this country, and 'saints' very often in the present day.

AS'SOS, a town of Lesser Mysia, or of Adramyttium, opposite the island of Lesbos, or Mitylene. Paul came hither on foot from Troas, to meet with his friends, in order to take shipping for Mitylene (Acts xx. 13, 14). It is now a miserable village, called Beiram, built high upon the rocks on the side towards the land.

ASSYR'IA. We must here distinguish between the country of Assyria, and the Assyrian empire. They are both designated in Hebrew by Asshur. The Asshurim of Gen. xxv. 3, were, however, an Arab tribe; and in Ezek. xxvii. 6, the word *ashurim* (in our version 'Ashurites') is only an abbreviated form of *teashur*, box-wood.

1. ASSYRIA PROPER was a region east of the Tigris, the capital of which was Nineveh. It derived its name from the progenitor of the aboriginal inhabitants—Asshur, the second son of Shem (Gen. x. 22; 1 Chron. i. 17). Its limits in early times are unknown; but when its monarchs enlarged their dominions by conquest, the name of this metropolitan province was extended to the whole empire.

According to Ptolemy, Assyria was in his day bounded on the north by Armenia, the Gordian or Carduchian mountains, especially by Mount Niphates; on the west by the river Tigris and Mesopotamia; on the south by Susiana, or Chuzistan, in Persia, and by Babylonia; and on the east by a part of Media, and mounts Choathras and Zagros. It corresponded to the modern Kurdistan, or country of the Kurds (at least to its larger and western portion), with a part of the pashalik of Mosul. 'Assyria,' says Mr. Ainsworth (*Researches in Assyria, Babylonia, and Chaldea*, Lond. 1838), 'including Taurus, is distinguished into three districts: by its *structure*, into a district of plutonic and metamorphic rocks, a district of sedimentary formations, and a district of alluvial deposits; by *configuration*, into a district of mountains, a district of stony or sandy plains, and a district of low watery plains; by *natural productions*, into a country of forests and fruit-trees, of olives, wine, corn, and pasturage, or of barren rocks; a country of mulberry, cotton, maize, tobacco, or of barren clay, sand, pebbly or rocky plains; and into a country of date-trees, rice, and pasturage, or a land of saline plants.' The northern

part is little else than a mass of mountains, which, near Julamerk, rise to a very great height, Mount Jewar being supposed to have an elevation of 15,000 feet; in the south it is more level, but the plains are often burnt up with scorching heat, while the traveller, looking northward, sees a snowy alpine ridge hanging like a cloud in mid air. On the west this country is skirted by the great river Tigris, the Hiddekel of the Hebrews (Gen. ii. 14; Dan. x. 4), noted for the impetuosity of its current [TIGRIS].

The most remarkable feature, says Ainsworth, in the vegetation of Taurus, is the abundance of trees, shrubs, and plants in the northern, and their comparative absence in the southern district. Besides the productions above enumerated, Kurdistan yields gall-nuts, gum-arabic, mastich, manna (used as sugar), madder, castor-oil, and various kinds of grain, pulse, and fruit. Rich informs us that a great quantity of honey, of the finest quality, is produced; the bees (comp. Isa. vii. 18, 'the bee in the land of Assyria') are kept in hives of mud. The naphtha springs, on the east of the Tigris, are less productive than those in Mesopotamia, but they are much more numerous. The zoology of the mountain district includes bears (black and brown), panthers, lynxes, wolves, foxes, marmots, dormice, fallow and red deer, roebucks, antelopes, &c., and likewise goats, but not (as was once supposed) of the Angora breed. In the plains are found lions, tigers, hyænas, beavers, jerboas, wild boars, camels, &c.

Ptolemy divides Assyria into six provinces. Farthest north lay *Arrapachitis*, south of it was *Calakine*, perhaps the Chalach of 2 Kings xvii. 6; xviii. 11. Next came *Adiabene*, so called from the above-mentioned rivers Dhab or Diab; it was so important a district of Assyria, as sometimes to give name to the whole country [ADIABENE]. North-east of it lay *Arbelitis*, in which was Arbel, famous for the battle in which Alexander triumphed over Darius. South of this lay the two provinces of *Apolloniatis* and *Sittahene*. The capital of the whole country was Nineveh, the Ninos of the Greeks, the Hebrew name being supposed to denote 'the abode of Ninos,' the founder of the empire. Its site is believed to have been on the east bank of the Tigris, opposite the modern town of Mosul, where there is now a small town called Nebbi Yunus (i. e. the prophet Jonah) [NINEVEH]. At the town of Al Kosh, N. of Mosul, tradition places the birth and burial of the prophet Nahum, and the Jews resort thither in pilgrimage to his tomb.

The greater part of the country which formed Assyria Proper is under the nominal sway of the Turks, who compose a considerable proportion of the population of the towns and larger villages, filling nearly all public offices, and differing in nothing from other Osmanlis. But the aboriginal inhabitants of the country, and of the whole mountain-tract that here divides Turkey from Persia, are the *Kurds*, from whom the country is now designated Kurdistan. They are still, as of old, a barbarous and warlike race, occasionally yielding a formal allegiance, on the west, to the Turks, and, on the east, to the Persians, but never wholly subdued; indeed, some of the more

powerful tribes, such as the Hakkary, have maintained an entire independence. Some of them are stationary in villages, while others roam far and wide, beyond the limits of their own country, as nomadic shepherds; but they are all, more or less, addicted to predatory habits, and are regarded with great dread by their more peaceful neighbours. They profess the faith of Islam, and are of the Soonee sect. All travellers have remarked many points of resemblance between them and the ancient Highlanders of Scotland.

The Christian population is scattered over the whole region, but is found chiefly in the north. It includes Chaldeans, who form that branch of the Nestorians that adheres to the church of Rome, a few Jacobites, or monophysite Syrians, Armenians, &c. But the most interesting portion is the ancient church of the primitive *Nestorians*, a lively interest in which has lately been excited in the religious world by the publications of the American missionaries, especially by a work entitled *The Nestorians*, by Asahel Grant, M.D. Lond. 1841. Besides the settlements of this people in the plain of Ooroomiah to the east, and in various parts of Kurdistan, where they are in a state of vassalage, there has been for ages an independent community of Nestorians in the wildest and most inaccessible part of the country. It lies at nearly equal distances from the lakes of Van and Ooroomah, and the Tigris, and is hemmed in on every side by tribes of ferocious Kurds; but, entrenched in their fastnesses, the Nestorians have defied the storms of revolution and desolation that have so often swept over the adjacent regions; and in their character of bold and intrepid, though rude and fierce mountaineers, have so entirely maintained their independence unto the present day, as to bear among the neighbours the proud title of *Ashiret*, 'the tributeless.' The attempts lately made by Dr. Grant and others to prove that this interesting people are the descendants of the ten 'lost' tribes of Israel, cannot be regarded as successful, and will not bear the test of rigid examination. Another peculiar race that is met with in this and the neighbouring countries is that of the Yezidees, whom Grant and Ainsworth would likewise connect with the ten tribes; but it seems much more probable that they are an offshoot from the ancient Manichees, their alleged worship of the Evil Principle amounting to no more than a reverence which keeps them from speaking of him with disrespect. Besides the dwellers in towns, and the agricultural population, there are a vast number of wandering tribes, not only of Kurds, but of Arabs, Turkomans, and other classes of robbers, who, by keeping the settled inhabitants in constant dread of property and life, check every effort at improvement; and, in consequence of this, and the influence of bad government, many of the finest portions of the country are little better than unproductive wastes.

2. THE ASSYRIAN EMPIRE. No portion of ancient history is involved in greater obscurity than that of the empire of Assyria. In attempting to arrange even the facts deducible from Scripture, a difficulty presents itself at the outset, arising from the ambiguity of the account given of the origin of the earliest Assyrian state in Gen. x. 11. After describing Nimrod, son of

Cush, 'as a mighty one in the earth,' the historian adds (ver. 10), 'And the beginning of his kingdom (or rather, the first theatre of his dominion) was Babel, and Erech, and Accad, and Calneh, in the land of Shinar,' i.e. *Babylonia*. Then follow the words:—'Out of that land went forth Asshur and builded Nineveh,' or (as it is in the margin) 'out of that land he (i.e. Nimrod) went out into Assyria and builded Nineveh.' Looking at the entire context, and following the natural current of the writer's thoughts, we shall find that the *second* translation yields the most congruous sense. It likewise agrees with the native tradition, that the founder of the Assyrian monarchy and the builder of Nineveh was one and the same person, viz. Ninus, from whom it derived its name, and in that case the designation of Nimrod (the Rebel) was not his proper name, but an opprobrious appellation imposed on him by his enemies. Modern local tradition likewise connects Nimrod with Assyria.

But though Nimrod's 'kingdom' embraced the lands both of Shinar and Asshur, we are left in the dark as to whether Babylon or Nineveh became the permanent seat of government, and consequently, whether his empire should be designated that of Babylonia or that of Assyria. No certain traces of it, indeed, are to be found in Scripture for ages after its erection. In the days of Abraham, we hear of a king of Elam (i.e. Elymais, in the south of Persia) named Chedorlaomer, who had held in subjection for twelve years five petty princes of Palestine (Gen. xiv. 4), and who, in consequence of their rebellion, invaded that country along with three other kings, one of whom was 'Amraphel, king of Shinar.' It is possible that Chedorlaomer was an Assyrian viceroy, and the others his deputies; for at a later period the Assyrian boasted, 'Are not my princes altogether kings?' (Isa. x. 8). Yet some have rather concluded from the narrative, that by this time the monarchy of Nimrod had been broken up, or that at least the seat of government had been transferred to Elam. Be this as it may, the name of Assyria as an independent state does not again appear in Scripture till the closing period of the age of Moses. Balaam, a seer from the northern part of Mesopotamia, in the neighbourhood of Assyria, addressing the Kenites, a mountain tribe on the east side of the Jordan, 'took up his parable,' i.e. raised his oracular, prophetic chant, and said, 'Durable is thy dwelling-place! Yea in a rock putteth thou thy nest: nevertheless, wasted shall be the Kenite, until Asshur shall lead them captive.' The prediction found its fulfilment in the Kenites being gradually reduced in strength (comp. 1 Sam. xv. 6), till they finally shared the fate of the trans-Jordanite tribes, and were swept away into captivity by the Assyrians (1 Chron. v. 26; 2 Kings xvi. 9; xix. 12, 13; 1 Chron. ii. 55). But as a counterpart to this, Balaam next sees a vision of retaliatory vengeance on their oppressors, and the awful prospect of the threatened devastations, though beheld in far distant times, extorts from him the exclamation, 'Ah! who shall live when God doeth this? For ships shall come from the coast of Chittim, and shall afflict Asshur, and shall afflict Eber, but he also [the invader] shall perish for ever.' This is not without obscurity; but it has commonly been sup-

posed to point to the conquest of the regions that once formed the Assyrian empire, first by the Macedonians from Greece, and then by the Romans, both of whose empires were in their turn overthrown.

In the time of the Judges, the people of Israel became subject to a king of Mesopotamia, Chushanrishathaim (Judg. iii. 8), who is by Josephus styled King of the Assyrians; but we are left in the same ignorance as in the case of Chedorlaomer, as to whether he was an independent sovereign or only a viceroy for another. The first king of Assyria alluded to in the Bible, is he who reigned at Nineveh when the prophet Jonah was sent thither (Jon. iii. 6). Hales supposes him to have been the father of Pul, the first Assyrian monarch named in Scripture, and dates the commencement of his reign B.C. 821. By that time the metropolis of the empire had become 'an exceeding great' and populous city, but one pre-eminent in wickedness (Jon. i. 2: iii. 3; iv. 11).

The first expressly recorded appearance of the Assyrian power in the countries west of the Euphrates is in the reign of Menahem, king of Israel, against whom 'the God of Israel stirred up the spirit of Pul (or Phul), king of Assyria' (1 Chron. v. 26), who invaded the country, and exacted a tribute of a thousand talents of silver 'that his hand' i.e. his favour, 'might be with him to confirm the kingdom in his hand' (2 Kings xv. 19, 20). Newton places this event in the year B.C. 770, in the twentieth year of Pul's reign, the commencement of which he fixes in the year B.C. 790. About this period we find the prophet Hosea making frequent allusions to the practice both of Israel and Judaea, to throw themselves for support on the kings of Assyria. The supposition of Newton is adopted by Hales, that at Pul's death his dominions were divided between his two sons, Tiglath-pileser and Nabonassar, the latter being made ruler at Babylon, from the date of whose government or reign the celebrated era of Nabonassar took its rise, corresponding to B.C. 747. When Ahaz, king of Judah, was hard pressed by the combined forces of Pekah, king of Israel, and Rezin, king of Damascus-Syria, he purchased Tiglath-pileser's assistance with a large sum, taken out of his own and the Temple treasury. The Assyrian king accordingly invaded the territories of both the confederated kings, and annexed a portion of them to his own dominions, carrying captive a number of their subjects (2 Kings xv. 29; xvi. 5-10; 1 Chron. v. 26; 2 Chron. xxviii. 16; Isa. vii. 1-11; comp. Amos i. 5; ix. 7). His successor was Shalman (Hos. x. 4), *Shalmaneser* or *Salmanasser*, the Enemessar of the apocryphal book Tobit (ch. i. 2). He made Hoshea, king of Israel, his tributary vassal (2 Kings xvii. 3); but finding him secretly negotiating with So or Sobaco (the Sabakoph of the monuments), king of Egypt, he laid siege to the Israelitish capital, Samaria, took it after an investment of three years (B.C. 719), and then reduced the country of the ten tribes to a province of his empire, carrying into captivity the king and his people, and settling Cutheans from Babylonia in their room (2 Kings xvii. 3-6; xviii. 9-11). Hezekiah, king of Judah, seems to have been for a time his vassal (2 Kings xviii. 7). The empire

of Assyria seems now to have reached its greatest extent, having had the Mediterranean for its boundary on the west, and including within its limits Media and Kir on the north, as well as Elam on the south (2 Kings xvi. 9; xvii. 5; Isa. xx. 6). In the twentieth chapter of Isaiah (ver. 1), there is mention of a king of Assyria, *Sargon*, in whose reign Tartan besieged and took Ashdod in Philistia. He is supposed to have been the successor of Shalmaneser, and to have had a short reign of two or three years. His attack on Egypt may have arisen from the jealousy which the Assyrians entertained of that nation's influence over Palestine ever since the negotiation between its king So. and Hoshea, king of Israel. From many incidental expressions in the book of Isaiah we can infer that there was at this time a strong Egyptian party among the Jews, for that people are often warned against relying for help on Egypt, instead of simply confiding in Jehovah (Isa. xxx. 2; xxxi. 1; comp. xx. 5, 6). The result of Tartan's expedition against Egypt and Ethiopia was predicted by Isaiah while that general was yet on the Egyptian frontier at Ashdod (Isa. xx. 1-4); and it is not improbable that it is to this Assyrian invasion that the prophet Nahum refers when he speaks (iii. 8-10) of the subjugation of No, i.e. No-Ammun, or Thebes, the capital of Upper Egypt, and the captivity of its inhabitants. The occupation of the country by the Assyrians, however, must have been very transient, for in the reign of Sargon's successor, *Sennacherib*, or *Sacherib*, we find Hezekiah, king of Judah, throwing off the Assyrian yoke, and allying himself with Egypt (2 Kings xviii. 7, 21). This brought against him Sennacherib with a mighty host, which, without difficulty, subdued the fenced cities of Judah, and compelled him to purchase peace by the payment of a large tribute. But 'the treacherous dealer dealt very treacherously' (Isa. xxxiii. 1); and, notwithstanding the agreement, proceeded to invest Jerusalem. In answer, however, to the prayers of the 'good king' of Judah, the Assyrian was diverted from his purpose, partly by the 'rumour' (Isa. xxxvii. 6) of the approach of Tirhakah, king of Ethiopia, and partly by the sudden and miraculous destruction of a great part of his army (2 Kings xviii. 13-37; xix.; Isa. xxxvi. and xxxvii.). He himself fled to Nineveh, where, in course of time, when worshipping in the temple of his god Nisroch, he was slain by his sons Adrammelech and Sharezer, the parricides escaping into the land of Armenia—a fact which is preserved in that country's traditional history [ARARAT].

Sennacherib was succeeded by his son Earsaddon, or Assaraddon, who had been his father's viceroy at Babylon (2 Kings xix. 37; Isa. xxxvii. 38). Hales regards him as the first Sardanapalus. The only notice taken of him in Scripture is that he settled some colonists in Samaria (Ezra iv. 2), and as (at ver. 10) that colonization is ascribed to the 'great and noble Assnapper,' it is supposed that that was another name for Earsaddon, but it may have been one of the great officers of his empire. It seems to have been in his reign that the captains of the Assyrian host invaded and ravaged Judah, carrying Manasseh, the king, captive to Babylon.

The subsequent history of the empire is involved in almost as much obscurity as that of its origin and rise. The Medes had already shaken off the yoke, and the Chaldeans soon appear on the scene as the dominant nation of Western Asia; yet Assyria, though much reduced in extent, existed as an independent state for a considerable period after Earsaddon. The last monarch was Sarac, or Sardanapalus II. (B.C. 636), in whose reign Cyaxares, king of Media, and Nabopolassar, viceroy of Babylon, combined against Assyria, took Nineveh, and, dividing what remained of the empire between them, reduced Assyria Proper to a province of Media (B.C. 606).

In this brief sketch of the history of the Assyrian empire, we have mainly followed the writers of the Old Testament, from whom alone any consistent account can be derived.

The political constitution of the Assyrian empire was no doubt similar to that of other ancient states of the East, such as Chaldaea and Persia. The monarch, called 'the great king' (2 Kings xviii. 19; Isa. xxxvi. 4), ruled as a despot, surrounded with his guards, and only accessible to those who were near his person. Under him there were provincial satraps, called in Isa. x. 8, 'princes' of the rank and power of ordinary kings. The great officers of the household were commonly eunuchs. The religion of the Assyrians was, in its leading features, the same as that of the Chaldeans, viz. the symbolical worship of the heavenly bodies, especially the planets. In Scripture there is mention of Nisroch, Adrammelech, Anammelech, Nebchaz, Tartak, &c., as the names of idols worshipped by the natives either of Assyria Proper or of the adjacent countries which they had subdued.

ASTRONOMY, that science which treats of the laws of the stars, or heavenly bodies, considered in reference to their magnitude, movements, and respective influence one upon another. Astronomy may be divided into empirical and scientific; the first being founded on the apparent phenomena and movements of the heavenly bodies, the second upon their real phenomena and movements. The knowledge of the ancients was limited to the first; or if they possessed any truths connected with the second, they were nothing more than bold or fortunate guesses, which were not followed out to their legitimate consequences, nor formed into a systematic whole.

The cradle of astronomy is to be found in Asia. The few and imperfect notices which have come down to these times give a concurrent testimony in favour of this statement, and therefore agrees the fact that the climate, the mode of life, and the occupations of the Oriental nations that were first civilized, prompted them to watch and observe the starry heavens. The Chaldeans are accounted to have excelled in astronomical knowledge.

Pliny, in his celebrated enumeration of the inventors of the arts, sciences, and conveniences of life, ascribes the discovery of astronomy to Phœnician mariners; and in the same chapter he speaks of astronomical observations found on burnt bricks among the Babylonians, which ascend to above 2200 years B.C. Alexander sent to Aristotle from Babylon a series of astronomical observations, extending through 1900

years. The astronomical knowledge of the Chinese and Indians goes up to a still earlier period. From the remote East astronomy travelled in a westerly direction. The Egyptians at a very early period had some acquaintance with it. To them is to be ascribed a pretty near determination of the length of the year, as consisting of 365 days 6 hours. The Egyptians were the teachers of the Greeks.

Some portion of the knowledge which prevailed on the subject would no doubt penetrate to and become the inheritance of the Hebrews, who do not, however, appear to have possessed any views of astronomy which raised their knowledge to the rank of a science, or made it approach to a more correct theory of the mechanism of the heavens than that which was generally held. Nor, if the Bible is taken as the witness, do the ancient Israelites appear to have had extensive knowledge in the matter. They possessed such an acquaintance with it as tillers of the ground and herdsmen might be expected to form while pursuing their business, having, as was natural, their minds directed to those regions of the heavens which night after night brought before their eyes: accordingly, the peculiar Oriental names of the constellations are derived from circumstances connected with a nomadic people. A peculiarity of the greatest importance belongs to the knowledge which the Israelites display of the heavens, namely, that it is thoroughly imbued with a religious character; nor is it possible to find in any other writings, even at this day, so much pure and elevated piety, in connection with observations on the starry firmament, as may be gathered even in single books of the Bible (Amos v. 8; Psalm xix.).

As early as the days of the patriarchs the minds of pious men were attracted and enraptured by the splendour of the skies (Gen. xxxvii. 9); and imagery borrowed from the starry world soon fixed itself firmly in human speech. The sun and moon were distinguished from other heavenly bodies, in consequence of their magnitude and their brilliancy, as being the lights of heaven and earth (Gen. i. 16); and from the course of the moon time was divided into parts, or months, of which the oldest form of the year, the lunar, was made up. Every new moon was greeted with religious festivities. While, however, the sun in his power, the moon walking in brightness, and all the stars of light conspired to excite devotion, their influence on the hearts of the ancient Israelites, who were happily instructed in a knowledge of the true God, the one Jehovah, the sole Creator of the world, stopped short of that idolatrous feeling, and was free from those idolatrous practices to which, among nations of less religious knowledge—and especially among their own neighbours, the Babylonians, for instance—it is unhappily known to have led.

As early as the time of the composition of perhaps the oldest book in the Bible, namely, that of Job, the constellations were distinguished one from another, and designated by peculiar and appropriate names (Job ix. 9; xxxviii. 31). In the Bible are found—1. the morning star, the planet Venus (Isa. xiv. 12; Rev. ii. 28); 2. (Job ix. 9; xxxviii. 35; Amos v. 8), the Pleiades; 3. Orion, a large and brilliant constellation,

which stands in a line with the Pleiades. The Orientals seemed to have conceived of Orion as a huge giant who had warred against God, and as bound in chains to the firmament of heaven (Job xxxviii. 31); and it has been conjectured that this notion is the foundation of the history of Nimrod; 4. Arcturus (Job ix. 9), the Great Bear; 5. (Job xxvi. 13, 'the crooked serpent'), Draco, between the Great and the Little Bear; a constellation which spreads itself in windings across the heavens; 6. Castor and Pollux (Acts xxviii. 11), Gemini, or the Twins, on the belt of the Zodiac, which is mentioned in 2 Kings xxiii. 5, under the general name of 'the planets.' The entire body of the stars was called 'the host of heaven' (Isa. xl. 26; Jer. xxxiii. 22).

No trace is found in the Old Testament of a division of the heavenly bodies into planets, fixed stars, and comets; but in Jude 13, the phrase 'wandering stars' is employed figuratively.

After the Babylonish exile the Jews were compelled, even for the sake of their calendar, to attend at least to the course of the moon, which became an object of study, and delineations were made of the shapes that she assumes.

At an early period of the world the worship of the stars arose from that contemplation of them which in every part of the globe, and particularly in the East, has been found a source of deep and tranquil pleasure. 'Men by nature' 'deemed either fire or wind, or the swift air, or the circle of the stars, or the violent water, or the lights of heaven, to be the gods which govern the world': 'with whose beauty being delighted, they took them to be gods' (Wisdom xiii. 2). Accordingly, the religion of the Egyptians, of the Chaldees, Assyrians, and the ancient Arabians, was nothing else than star-worship, although in the case of the first its origin is more thickly veiled. The sun, moon, and seven planets excited most attention, and won the greatest observance. We thus find among the Babylonians Jupiter (Belus, Isa. lxx. 11), Venus (Isa. lxx. 11, where the first is rendered in the common version 'that troop,' the second 'that number'). Both these were considered good principles. Mercury, honoured as the secretary of heaven, is also found in Isa. xlvi. 1, 'Nebo stoopeth'; Saturn (Amos, v. 26); Mars (2 Kings, xvii. 30): the two last were worshipped as principles of evil. The character of this worship was formed from the notions which were entertained of the good or ill which certain stars occasioned. Astrology found its sphere principally in stars connected with the birth of individuals. It concerned itself also with the determination of lucky and unlucky days: so in Job. iii. 3, 'Let the day perish wherein I was born'; and Gal. iv. 10, 'Ye observe days, and months, and times, and years.' The Chaldeans, who studied the stars at a very early period, were much given to astrology, and were celebrated for their skill in that pretended science (Isa. xlvii. 13). In Daniel ii. 27; v. 11, the calculators of nativities are named. Comets were for the most part considered heralds of evil tidings. The Orientals of the present day hold astrology in honour, and stipendiary astrologers form a part of their court.

ATAD, the person on whose threshing-floor the sons of Jacob and the Egyptians who accom-

panied them performed their final act of solemn mourning for Jacob (Gen. l. 11); on which account the place was afterwards called Abel-Mizraim, 'the mourning of the Egyptians.'

AT'AROTH. Several places of this name (which means *crowns*) occur in the Scriptures. 1. *Ataroth-beth-Joab*, in the tribe of Judah (1 Chron. ii. 54). 2. *Ataroth*, on the borders of Ephraim (Josh. xvi. 2, 7), which some identify with, and others distinguish from, the *Ataroth-Addar* of the same tribe mentioned in Josh. xvi. 5; xviii. 13. 3. *Ataroth*, in the tribe of Gad, beyond the Jordan (Num. xxxii. 3, 34). 4. *Ataroth-Shophan*, in the same tribe (Num. xxxii. 35), which some identify with the preceding; but it appears more likely that the addition was used to distinguish the one from the other.

ATERGATIS is the name of a Syrian goddess, whose temple is mentioned in 2 Macc. xii. 26. That temple appears, by comparing 1 Macc. vii. 43, to have been situated at Ashteroth-Karnaim. Her worship also flourished at Mabûg (i.e. Bambyce), afterwards called Hierapolis according to Pliny.

There is little doubt that Atergatis is the same divinity as Derketo, which was worshipped in Phœnicia and at Ascalon under the form of a woman with a fish's tail, or with a woman's face only and the entire body of a fish; that fishes were sacred to her, and that the inhabitants abstained from eating them in honour of her.

64.

Atergatis is thus a name under which the ancients worshipped some modification of the same power which was adored under that of Ashteroth. The fish-form shows that Atergatis bears some relation, perhaps that of a female counterpart, to Dagon.

ATHALIAH (*whom Jehoram afflicts*), daughter of Ahab, king of Israel, doubtless by his idolatrous wife Jezebel. She is also called the daughter of Omri (2 Chron. xxii. 2), who was the father of Ahab; but by a comparison of texts it would appear that she is so called only as being his grand-daughter. Athaliah became the wife of Jehoram, the son of Jehoshaphat, king of Judah. This marriage may fairly be considered the act of the parents; and it is one of the few stains upon the character of the good Jehoshaphat that he was so ready, if not anxious, to connect himself with the idolatrous house of Ahab. Had he not married the heir of his crown to Athaliah, many evils and much bloodshed might have been spared to the royal family and to the kingdom. When Jehoram came to the crown, he, as might be expected, 'walked in the ways of the house of Ahab,' which the sacred writer obviously attributes to this marriage, by adding, 'for he had the daughter of Ahab to wife' (2 Chron. xxi. 6). This king died B.C. 885, and was succeeded by his youngest son Ahaziah, who reigned but one year, and whose death arose from his being, by blood and by circumstances, involved in the doom of Ahab's house [AHAZIAH]. Before

this Athaliah had acquired much influence in public affairs, and had used that influence for evil; and when the tidings of her son's untimely death reached Jerusalem, she resolved to seat herself upon the throne of David, at whatever cost. To this end she caused all the male branches of the royal family to be massacred (2 Kings xi. 1); and by thus shedding the blood of her own grandchildren, she undesignedly became the instrument of giving completion to the doom on her father's house, which Jehu had partially accomplished, B.C. 884. One infant son of Ahaziah, however, was saved by his aunt Jehoshaba, wife of the high-priest Jehoiada, and was concealed within the walls of the temple, and there brought up so secretly that his existence was unsuspected by Athaliah. But in the seventh year (B.C. 878) of her blood-stained and evil reign, the sounds of unwonted commotion and exulting shouts within the temple courts drew her thither, where she beheld the young Joash standing as a crowned king by the pillar of inauguration, and acknowledged as sovereign by the acclamations of the assembled multitude. Her cries of 'Treason!' failed to excite any movement in her favour, and Jehoiada, the high-priest, who had organized this bold and successful attempt, without allowing time for pause, ordered the Levitical guards to remove her from the sacred precincts to instant death (2 Kings xi.; 2 Chron. xxi. 6; xxii. 10-12; xxiii.).

ATHENS. This celebrated city, as the birth-place of Plato, and through him so widely influential on Judaism and Christianity, deserves something else than a geographical notice here. We shall briefly allude to the stages of her history, and remark on some of the causes of her pre-eminent greatness in arms, arts, and intellectual subtlety.

The earlier and more obscure period of the Grecian province named Attica reaches down nearly to the final establishment of democracy in it. Yet we know enough to see that the foundations of her greatness were then already laid. To a king named Theseus (whose deeds are too much mixed with fable to be narrated as history) is ascribed the credit of uniting all the country-towns of Attica into a single state, the capital of which was Athens. This is the first political event that we can trust as historical, although its date and circumstances are by no means free from obscurity.

The population of this province was variously called Pelasgian, Achaian, and Ionian, and probably corresponds most nearly to what was afterwards called Æolian. The first name carries the mind back to an extremely primitive period. When the Dorians, another tribe of Greeks of very different temperament, invaded and occupied the southern peninsula, great numbers of its Achaian inhabitants took refuge in Attica. Shortly after, the Dorians were repulsed in an inroad against Athens, an event which has transmitted to legendary renown the name of King Codrus; and thenceforward Athens was looked upon as the bulwark of the Ionian tribes against the barbarous Dorians. Overloaded with population, Attica now poured forth colonies into Asia; some of which, as Miletus, soon rose to great eminence, and sent out numerous colonies themselves; so that Athens was revered as a

mother of nations, by powerful children scattered along the western and northern coasts of Anatolia.

Dim tradition shows us isolated priesthools and elective kings in the earliest times of Attica; these however gradually gave way to an aristocracy, which in a series of years established themselves as a hereditary ruling caste. But a country 'ever unravaged' (and such was their boast) could not fail to increase in wealth and numbers; and after two or three centuries, while the highest commoners pressed on the nobles, the lowest became overwhelmed with debt. The disorders caused by the strife of the former were vainly sought to be stayed by the institutions of Draco; the sufferings of the latter were ended, and the sources of violence dried up, by the enactments of Solon. Henceforth the Athenians revered the laws of Solon as the groundwork of

their whole civil polity; yet they retained by the side of them the ordinances of Draco in many matters pertaining to religion. The date of Solon's reforms was probably B.C. 594.

The usurpation of Pisistratus and his sons made a partial breach in the constitution; but upon their expulsion, a more serious change was effected by Cleisthenes, head of the noble house of the Alenæonidae (B.C. 508), almost in the same year in which Tarquin was expelled from Rome. An entirely new organization of the Attic tribes was framed, which destroyed whatever remained of the power of the nobles as an order, and established among the freemen a democracy, in fact, as well as in form. Out of this proceeded all the good and all the evil with which the name of Athens is associated; and though greatness which shot up so suddenly could not be permanent, there can be no diffi-

culty in deciding that the good greatly preponderated.

Very soon after this commenced hostilities with Persia; and the self-denying, romantic, successful bravery of Athens, with the generous affability and great talents of her statesmen, soon raised her to the head of the whole Ionian confederacy. As long as Persia was to be feared, Athens was loved; but after tasting the sweets of power, her sway degenerated into a despotism, and created at length, in the war called the Peloponnesian, a coalition of all Dorian and Æolian Greece against her (B.C. 431). In spite of a fatal pestilence and the revolt of her Ionian subjects, the naval skill of Athenian seamen and the enterprise of Athenian commanders proved more than a match for the hostile confederacy; and when Athens at last fell (B.C. 404), she fell by the effects of internal sedition more truly than by Spartan lances or Persian gold, or even by her own rash and overgrasping ambition. The demoralizing effects of this war on all Greece were

infinitely the worst result of it, and they were transmitted to succeeding generations. It was substantially a civil war in every province; and, as all the inhabitants of Attica were every summer forced to take refuge in the few fortresses they possessed, or in Athens itself, the simple countrymen became transformed into a hungry and profligate town rabble.

From the earliest times the Ionians loved the lyre and the song, and the hymns of poets formed the staple of Athenian education. The constitution of Solon admitted and demanded in the people a great knowledge of law, with a large share in its daily administration. Thus the acuteness of the lawyer was grafted on the imagination of the poet. These are the two intellectual elements out of which Athenian wisdom was developed; but it was stimulated and enriched by extended political action and political experience. History and Philosophy, as the words are understood in modern Europe, had their birth in Athens about the time of the Peloponnesian war. Then

first, also, the Oratory of the bar and of the popular assembly was systematically cultivated, and the elements of mathematical science were admitted into the education of an accomplished man.

In the imitative arts of Sculpture and Painting, as well as in Architecture, it need hardly be said that Athens carried off the palm in Greece: yet, in all these, the Asiatic colonies vied with her. Miletus took the start of her in literary composition; and, under slight conceivable changes, might have become the Athens of the world. But all details on these subjects would be here out of place.

That Athens after the Peloponnesian war never recovered the political place which she previously held, can excite no surprise—that she rose so high towards it was truly wonderful. Sparta and Thebes, which successively aspired to the ‘leadership’ of Greece, abused their power as flagrantly as Athens had done, and, at the same time, more coarsely. The never-ending cabals, the treaties made and violated, the coalitions and breaches, the alliances and wars, recurring every few years, destroyed all mutual confidence, and all possibility of again uniting Greece in any permanent form of independence; and, in consequence, the whole country was soon swallowed up in the kingdom of Macedonia. With the loss of civil liberty, Athens lost her genius, her manly mind, and whatever remained of her virtue: she long continued to produce talents, which were too often made tools of iniquity, panders to power, and petty artificers of false philosophy.

A Christian church existed in Athens soon after the apostolic times; but as the city had no political importance, the church never assumed any eminent position.

ATONEMENT (See Rom. xi. 15; 2 Cor. v. 18, 19). In ecclesiastical writers, and in the canons of Councils, the word rendered *atonement* is employed to signify the reconciliation of offenders to the Church after a due course of penitence. Of this there are said to have been two kinds: the one consisting merely in the remission of punishment; the other, in the restoration of the penitent to all the rights and privileges of communion. For the doctrine of Atonement, see articles SACRIFICE, REDEMPTION.

ATONEMENT, DAY OF (*day of pardon*, Lev. xxiii. 27; xxv. 9). Though perhaps originally meant as a temporary day of expiation for the sin of the golden calf (as some would infer from Exod. xxxiii.), yet it was permanently instituted by Moses as a day of atonement for sins in general; and this day—the 10th of Tishri (our September)—is indeed the only fast ordained by Moses. This great fast commenced at sunset of the previous day, and lasted twenty-four hours, that is, from sunset to sunset. The ceremonies observed on this occasion are minutely described in Leviticus xvi., and were of a very laborious character, especially for the high-priest, who had to prepare himself during the previous seven days in nearly solitary confinement for the peculiar services that awaited him, and abstain during that period from all that could render him unclean, or disturb his devotions. The most remarkable ceremony of the day was the entrance of the high-priest into the Sanctuary, a thing not allowed on any other day, and to which Paul alludes, Heb. ix. 7.

The other duties of the high-priest on that day consisted in frequent washings, changing his clothes, lighting the lamps, burning incense, &c.; which operations commenced soon after midnight of the 10th of the seventh month (Tishri). The ceremonies of worship peculiar to this day alone (besides those which were common to it with all other days) were: 1. That the high-priest, in his pontifical dress, confessed his own sins and those of his family, for the expiation of which he offered a bullock, on which he laid them; 2. That two goats were set aside, one of which was by lot sacrificed to Jehovah, while the other (Azazel), which was determined by lot to be set at liberty, was sent to the desert burdened with the sins of the people (Lev. xvi.).

On this day also the high-priest gave his blessing to the whole nation; and the remainder of the day was spent in prayers and other works of penance.

Among the present orthodox Jews, for the scape-goat of old, a cock seems to have been substituted, which they call pardon, atonement, and which, on the eve of the day of Atonement, they turn three times round their head, each time saying (in Hebrew) that the cock is to be sacrificed instead of them, after which it is slaughtered and eaten. Towards evening of the 9th of Tishri, and before they take the last meal for the next twenty-four hours, they repair to the synagogue, and each inflicts upon his neighbour thirty-nine blows with a piece of leather. Most of the Jews on that day (of atonement) wear a white gown—the same shrouds in which they are buried; while all of them are obliged to stand the whole day without shoes, or even slippers.

ATTALIA, a maritime city of Pamphylia, in Asia Minor, near the mouth of the river Catarrhactes. It derived its name from its founder, Attalus Philadelphus, king of Pergamos. It was visited by Paul and Barnabas, A.D. 45 (Acts xiv. 25). It still exists under the name of Adalia, and extensive and important ruins attest the former consequence of the city.

ATTITUDES. The allusions in Scripture to attitudes and postures expressive of adoration, supplication, and respect, are very numerous. From these we learn enough to perceive that the usages of the Hebrews in this respect were very nearly, if not altogether, the same as those which are still practised in the East, and which the paintings and sculptures of Egypt show to have been of old employed in that country. These sources supply ample materials for illustration, which it may be well to arrange under those heads into which such acts naturally divide themselves.

ADORATION AND HOMAGE.—The Moslems in their prayers throw themselves successively, and according to an established routine, into the various postures (nine in number) which they deem the most appropriate to the several parts of the service. For the sake of reference and comparison, we have introduced them all at the head of this article; as we have no doubt that the Hebrews employed on one occasion or another nearly all the various postures which the Moslems exhibit on one occasion. This is the chief difference. In public and common worship the Hebrews prayed *standing*; but in their sepa-

66.

rate and private acts of worship they assumed the position which, according to their modes of doing homage or showing respect, seemed to them the most suitable to their present feelings or objects. It would appear, however, that some form of kneeling was most usual in private devotions (1 Kings viii. 54; Ezra ix. 5; Dan. vi. 10; 2 Chron. vi. 13).

STANDING in public prayer is still the practice of the Jews. This posture was adopted from the synagogue by the primitive Christians; and is still maintained by the Oriental Churches. This appears, from their monuments, to have been the custom also among the ancient Persians

67.

and Egyptians, although the latter certainly sometimes kneeled before their gods. In the Moslem worship, four of the nine positions (cut 66, figs. 1, 2, 4, 8) are standing ones; and that posture which is repeated in three out of these four (2, 4, 8), may be pointed out as the proper Oriental posture of reverential standing, with folded hands. It is the posture in which people stand before kings and great men.

While in this attitude of worship, the hands were sometimes stretched forth towards heaven in supplication or invocation (1 Kings viii. 22; 2 Chron. vi. 12, 29; Isa. i. 15). This was per-

68.

haps not so much the conventional posture (1 in the Moslem series), as the more natural posture of standing adoration with outspread hands, which we observe on the Egyptian monuments. The uplifting of one hand (the right) only in taking an oath was so common, that to say, 'I have lifted up my hand,' was equivalent to 'I

have sworn' (Gen. xiv. 22; comp. xli. 44; Deut. xxxii. 40). This posture was also common among other ancient nations; and we find examples of it in the sculptures of Persia (fig. 1) and Rome (fig. 2).

KNEELING is very often described as a posture of worship (1 Kings viii. 54; Ezra ix. 5; Dan. vi. 10; 2 Chron. vi. 13; comp. 1 Kings xix. 18; Luke xxii. 41; Acts vii. 60). This is still an Oriental custom, and three forms of it occur (5, 6, 9) in the Moslem devotions. It was also in use, although not very frequent, among the ancient Egyptians; who likewise, as well as the Hebrews (Exod. xxxiv. 8; 2 Chron. xxix. 29; Isa. i. 15), sometimes prostrated themselves upon the ground. The usual mode of prostration among the Hebrews by which they expressed the most intense humiliation, was by bringing not only the body but the head to the ground.

69.

The ordinary mode of prostration at the present time, and probably anciently, is that shown in one of the postures of Moslem worship (5), in which the body is not thrown flat upon the ground, but rests upon the knees, arms, and head. In order to express devotion, sorrow, compunction, or humiliation, the Israelites threw dust upon their heads (Josh. vii. 6; Job ii. 12; Lam. ii. 10; Ezek. xxiv. 7; Rev. xviii. 19), as was done also by the ancient Egyptians, and is still done by the modern Orientals. Under similar circumstances it was usual to smite the breast (Luke xviii. 13). This was also a prac-

70.

tice among the Egyptians, and the monuments at Thebes exhibit persons engaged in this act while they kneel upon one knee.

In 1 Chron. xvii. 16 we are told that 'David the king came and sat before the Lord,' and in that posture gave utterance to eloquent prayer.

or rather thanksgiving, which the sequel of the chapter contains. Those unacquainted with Eastern manners are surprised at this. But there is a mode of sitting in the East which is highly respectful and even reverential. It is that which occurs in the Moslem forms of worship (9). The person first kneels, and then sits back upon his heels. Attention is also paid to the position of the hands, which they cross, fold, or hide in the opposite sleeves. The variety of this formal sitting, which the following figure

71.

represents, is highly respectful. The prophet Elijah must have been in this or some other similar posture when he inclined himself so much forward in prayer that his head almost touched his knees (1 Kings xviii. 42).

SUPPLICATION, when addressed externally to man, cannot possibly be exhibited in any other forms than those which are used in supplication to God. Uplifted hands, kneeling, prostration, are common to both. On the Egyptian monuments, suppliant captives, of different nations, are represented as kneeling or standing with outspread hands. *Prostration, or falling at the feet* of a person, is often mentioned in Scripture as

72.

an act of supplication or of reverence, or of both (1 Sam. xxv. 24; 2 Kings iv. 37; Esth. viii. 3; Matt. xviii. 29; xxviii. 9; Mark v. 22; Luke viii. 41; John xi. 32; Acts x. 25). Sometimes in this posture, or with the knees bent as before indicated, the Orientals bring their forehead to the ground, and before resuming an erect position either kiss the earth, or the feet, or border of the garment of the king or prince before whom they are allowed to appear. There is no doubt that a similar practice existed among the Jews (Matt. ix. 20; Luke vii. 38, 45). *Kissing the hand* of another as a mark of affectionate respect, we do not remember as distinctly mentioned in Scripture. But as the Jews had the other forms of Oriental salutation, we may conclude that they had this also, although it does not happen to have been specially noticed. *Kissing one's own hand* is mentioned as early as the time of Job (xxxi. 27), as an act of homage to the heavenly bodies. It was properly a salutation, and as such an act of adoration to them. The Romans in like manner kissed their hands

as they passed the temples or statues of their gods [ADORATION].

It appears from 1 Sam. x. 1; 1 Kings xix. 18; Ps. ii. 12; that there was a peculiar kiss of homage, the character of which is not indicated. It was probably that kiss upon the forehead expressive of high respect which was formerly, if not now, in use among the Bedouins.

BOWING.—In the Scriptures there are different words descriptive of various postures of respectful bowing; as *to incline* or *bow down the head*, *to bend down the body very low*, *to bend the knee*, also *to bless*. These terms indicate a conformity with the existing usages of the East, in which the modes of bowing are equally diversified, and, in all likelihood, the same. These are—1. touching the lips and the forehead with

73.

the right hand, with or without an inclination of the head or of the body, and with or without previously touching the ground; 2. placing the right hand upon the breast, with or without an inclination of the head or of the body; 3. bending the body very low, with folded arms; 4. bending the body and resting the hands on the knees: this is one of the postures of prayer, and is indicative of the highest respect in the presence of kings and princes.

It appears to have been usual for a person to receive a blessing in a kneeling posture. We know also that the person who gave the blessing laid his hands upon the head of the person blessed (Gen. xlviii. 14). This is exactly the case at the present day in the East, and a picture of the existing custom would furnish a perfect illustration of the patriarchal form of blessing. This may be perceived from the annexed engraving.

74.

AVA (2 Kings xvii. 24), also **IVAN** (2 Kings xviii. 34; xix. 13; Isa. xxxvii. 13), the capital of a small monarchical state conquered by the Assyrians, and from which king Shalmaneser sent colonies into Samaria. It is most probable that Ava was a Syrian or Mesopotamian town, of which no trace can now be found either in ancient writers or in the Oriental topographers.

AVEN, a plain, 'the plain of the sun,' of Damascus Syria (Amos i. 5). It is usually supposed to be the same as the plain of Baalbec, or

valley of Baal, where there was a magnificent temple dedicated to the sun.

AUGUSTUS (*venerable*), the title assumed by Octavius, who, after his adoption by Julius Caesar, took the name of Octavianus (*i.e.* *Ex-Octavius*), according to the Roman fashion; and was the first peacefully acknowledged emperor of Rome. He was emperor at the birth and during half the lifetime of our Lord; but his name has no connection with Scriptural events, and occurs only once (Luke ii. 1) in the New Testament.

AVIM, called also AVITES and HIVITES, a people descended from Canaan (Gen. x. 17), who originally occupied the southernmost portion of that territory in Palestine along the Mediterranean coast, which the Caphtorim or Philistines afterwards possessed (Deut. ii. 23). As the territory of the Avim is mentioned in Josh. xiii. 3, in addition to the five Philistine states, it would appear that it was not included in theirs, and that the expulsion of the Avim was by a Philistine invasion prior to that by which the five principalities were founded. The territory began at Gaza, and extended southward to 'the river of Egypt' (Deut. ii. 23), forming what was the sole Philistine kingdom of Gerar in the time of Abraham, when we do not hear of any other Philistine states. There were then Avim, or Hivites, at Shechem (Gen. xxiv. 2), and we afterwards find them also at Gibeon (Josh. ix. 7), and beyond the Jordan, at the foot of Mount Hermon (Josh. xi. 3); but we have no means of knowing whether these were original settlements of the Avim, or were formed out of the fragments of the nation which the Philistines expelled from southern Palestine. The original country of the Avim is called Hazerim in Deut. ii. 23 [GERAR; PHILISTINES].

AWL. The Hebrew word which denotes an awl or other instrument for boring a small hole, occurs in Exod. xxi. 6; Deut. xv. 17. Considering that the Israelites had at that time recently withdrawn from their long sojourn in Egypt,

75.

there can be no doubt that the instruments were the same as those of that country, the forms of which, from actual specimens in the British Museum, are shown in the annexed cut. They are such as were used by the sandal-makers and other workers in leather.

AXE. Several instruments of this description are so discriminated in Scripture as to show that the Hebrews had them of different forms and for various uses. 1. *garzen*, which occurs in Deut. xix. 5; xx. 19; 1 Kings vi. 7; Isa. x. 15. From these passages it appears that this kind was employed in felling trees, and in hewing large timber for building. The conjecture of Gesenius,

that in 1 Kings v. 7 it denotes the axe of a stone mason, is by no means conclusive. The first text supposes a case of the head slipping from the helve in felling a tree. This would suggest that it was shaped like fig. 3, which is just the same instrument as our common hatchet, and appears to have been applied by the ancient Egyptians to the same general use as with us. 2. *matzad*, which occur only in Isa. xlv. 12; and Jer. x. 3. From these passages it appears to have been a lighter implement than the former, or a kind of adze, used for fashioning or carving wood into shape; it was probably, therefore, like figs. 4 to 7, which the Egyptians employed for this purpose. The differences of form and size, as indicated in the figures, appear to have been determined with reference to light or heavy work: fig. 3 is a finer carving-tool. 3. *qardom*; this is the commonest name for an axe or hatchet. It is this of which we read in Judg. ix. 48; Ps. lxxiv. 5; 1 Sam. xiii. 20, 21; Jer. xlv. 22. It appears to have been more exclusively employed than the *garzen* for felling trees, and had therefore probably a heavier head. In one of the

76.

Egyptian sculptures the inhabitants of Lebanon are represented as felling pine-trees with axes like fig. 1. As the one used by the Egyptians for the same purpose was also of this shape, there is little doubt that it was also in use among the Hebrews.

The word rendered 'axe' in 2 Kings vi. 5 is literally 'iron'; but as an axe is certainly intended, the passage is valuable as showing that the axe-heads among the Hebrews were of iron. Those which have been found in Egypt are of bronze, which was very anciently and generally used for the purpose.

AZARIAH (*whom Jehovah aids*), a very common name among the Hebrews, and hence borne by a considerable number of persons mentioned in Scripture.

1. AZARIAH, a high-priest (1 Chron. vi. 9), perhaps the same with Amariah, who lived under Jehoshaphat king of Judah (2 Chron. xix. 11), about B.C. 896.

2. AZARIAH, son of Johanan, a high-priest (1 Chron. vi. 10), whom some suppose the same

as Zechariah, son of Jehoiada, who was killed B.C. 840 (2 Chron. xxiv. 20-22).

3. AZARIAH, the high-priest who opposed king Uzziah in offering incense to Jehovah (2 Chron. xxvi. 17).

4. AZARIAH, a high-priest in the time of Hezekiah (2 Chron. xxxi. 10).

5. AZARIAH, the father of Seraiah, who was the last high-priest before the Captivity (1 Chron. vi. 14).

6. AZARIAH, son of the high-priest Zadok; but it is uncertain if he succeeded his father (1 Kings iv. 2).

7. AZARIAH, captain of King Solomon's guards (1 Kings iv. 5).

8. AZARIAH, otherwise called Uzziah, king of Judah [UZZIAH].

9. AZARIAH, a prophet who met king Asa on his return from a great victory over the Cushite king Zerah (2 Chron. xxiii. 1) [ASA].

10. AZARIAH, a person to whom the high-priest Jehoiada made known the secret of the existence of the young prince Joash, and who assisted in placing him on the throne (2 Chron. xv. 1).

11. AZARIAH, one of the two sons of king Jehoshaphat (2 Chron. xxi. 2).

12. AZARIAH, one of the 'proud men' who rebuked Jeremiah for advising the people that remained in Palestine, after the expatriation to Babylon, not to retire into Egypt; and who took the prophet himself and Baruch along with them to that country (Jer. xliii. 2-7).

13. AZARIAH, the Chaldean name of Abednego, one of Daniel's three friends who were cast into the fiery furnace (Dan. i. 7; iii. 9).

AZZAH, a mode of spelling the Hebrew name which is elsewhere rendered Gaza. The name occurs in this form in Deut. ii. 23; Jer. xxv. 20; which last clearly shows that Gaza is intended.

B.

BA'AL (*lord, master*). As the idolatrous nations of the Syro-Arabian race had several gods, this word, by means of some accessory distinction, became applicable as a name to many different deities.

1. BAAL (with the definite article, Judg. ii. 13; Jer. xix. 5; xxxix. 35; Rom. xi. 4) is appropriated to the chief male divinity of the Phœnicians, the principal seat of whose worship was at Tyre. The idolatrous Israelites adopted the worship of this god (almost always in conjunction with that of Ashoreth) in the period of the Judges (Judg. ii. 13); they continued it in the reigns of Ahaz and Manasseh, kings of Judah (2 Chron. xxviii. 2; 2 Kings xxi. 3); and, among the kings of Israel, especially in the reign of Ahab, who, partly through the influence of his wife, the daughter of the Sidonian king Ethbaal, appears to have made a systematic attempt to suppress the worship of God altogether, and to substitute that of Baal in its stead (1 Kings xvi. 31); and in that of Hosea (2 Kings xvii. 16), although Jehu and Jehoiada once severally destroyed the temples and priesthood of the idol (2 Kings x. 18, *sq.*; xi. 18).

We read of altars, images, and temples

erected to Baal (1 Kings xvi. 32; 2 Kings iii. 2). The altars were generally on heights, as the summits of hills or the roofs of houses (Jer. xix. 5; xxxii. 29). His priesthood were a very numerous body (1 Kings xviii. 19), and were divided into the two classes of prophets and of priests (2 Kings x. 19). As to the rites by which he was worshipped, there is most frequent mention of incense being offered to him (2 Kings xxiii. 5), but also of bullocks being sacrificed (1 Kings xviii. 26), and even of children, as to Moloch (Jer. xix. 5). According to the description in 1 Kings xviii., the priests, during the sacrifice, danced about the altar, and, when their prayers were not answered, cut themselves with knives until the blood flowed. We also read of homage paid to him by bowing the knee, and by kissing his image (1 Kings xix. 18), and that his worshippers used to swear by his name (Jer. xii. 16).

As to the power of nature which was adored under the form of the Tyrian Baal, many of the passages above cited show evidently that it was one of the heavenly bodies; or, if we admit that resemblance between the Babylonian and Persian religions which Munter assumes, not one of the heavenly bodies really, but the *astral spirit* residing in one of them; and the same line of induction as that which is pursued in the case of Ashoreth, his female counterpart, leads to the conclusion that it was the sun.

2. BA'AL BE'RITH, *covenant-lord* (Judg. ix. 4), is the name of a god worshipped by the people of Shechem (Judg. viii. 33; ix. 4, 46).

3. BA'AL PEOR appears to have been properly the idol of the Moabites (Num. xxv. 1-9; Deut. iv. 3; Jos. xxii. 17; Ps. cvi. 28; Hos. ix. 10); but also of the Midianites (Num. xxxi. 15, 16).

It is the common opinion that this god was worshipped by obscene rites. The utmost, however, that the passages in which this god is named express, is the fact that the Israelites received this idolatry from the women of Moab, and were led away to eat of their sacrifices (*cf.* Ps. cvi. 28); but it is very possible for that sex to have been the means of seducing them into the adoption of their worship, without the idolatry itself being of an obscene kind. It is also remarkable that so few authors are agreed even as to the general character of these rites. Most Jewish authorities represent his worship to have consisted of rites which are filthy in the extreme, but not lascivious. With regard to the origin of the term Peor, it is supposed to have been the original name of the mountain; and Baal Peor to be the designation of the god worshipped there. Some identify this god with CHEMOSH.

4. BA'ALZEBUB (*fly-lord*) occurs in 2 Kings i. 2-16, as the god of the Philistines at Ekron, whose oracle Abaziah sent to consult. There is much diversity of opinion as to the signification of this name, according as authors consider the title to be one of honour, as used by his worshippers, or one of contempt.

The analogy of classical idolatry would lead us to conclude that all these Baals are only the same god under various modifications of attributes and emblems; but the scanty notices to which we owe all our knowledge of Syro-Arabian idolatry do not furnish data for any decided opinion on this subject.

BAAL is often found as the first element of compound names of places. In this case, Gesenius thinks that it seldom, if ever, has any reference to the god of that name; but that it denotes the place which *possesses*, which is the *abode* of the thing signified by the latter half of the compound.

BA'ALAH, BAALAH-JUDAH, KIRIATH-BAAL KIRIATH JEARIM].

BAALAH (Josh. xv. 29). BALAH (Josh. xix. 3), BILJAH (1 Chron. iv. 29), a town in the tribe of Simeon, usually confounded with Baalath; but, as the latter was in Dan and this in Simeon, they would appear to have been distinct.

BA'ALATH, a town in the tribe of Dan (Josh. xiv. 44), apparently the same that was afterwards rebuilt by Solomon (1 Kings ix. 18).

BA'ALATH-BEER, probably the same as the Baal of 1 Chron. iv. 33—a city of Simeon;

called also Ramath-Negeb, or Southern Ramath (Josh. xix. 8; comp. 1 Sam. xxx. 27).

BA'AL-GAD, a city 'in the valley of Lebanon under Mount Hermon' (Josh. xi. 17; xii. 7). We are also informed that among those parts of Palestine which were unsubdued by the Hebrews at the death of Joshua, was 'all Lebanon towards the sun-rising, from Baal-gad, under Mount Hermon, unto the entering into Hamath' (Josh. xiii. 5). This position of Baal-Gad is not unfavourable to the conclusion which some have reached, that it is no other than the place which, from a temple consecrated to the sun, that stood there, was called by the Greeks *Heliopolis*, i. e. city of the sun; and which the natives called and still call Baalbek, a word apparently of the same meaning.

Baalbek is pleasantly situated on the lowest declivity of Anti-Libanus, at the opening of a small valley into the plain El-Bekaa. Through

this valley runs a small stream, divided into numberless rills for irrigation. The place is in N. lat. $34^{\circ} 1' 30''$, and E. long. $36^{\circ} 11'$, distant 109 geogr. miles from Palmyra, and $38\frac{1}{2}$ from Tripoli.

Its origin appears to be lost in the most remote antiquity, and the historical notices of it are very scanty. In the absence of more positive information we can only conjecture that its situation on the high-road of commerce between Tyre, Palmyra, and the farther East, must have contributed largely to the wealth and magnificence which it manifestly attained. It is mentioned under the name of Heliopolis by Josephus, and also by Pliny. From the reverses of Roman coins we learn that Heliopolis was constituted a colony by Julius Cæsar; that it was the seat of a Roman garrison in the time of Augustus. Some of the coins of later date contain curious representations of the temple.

After the age of Constantine the splendid temples of Baalbek were probably consigned to neglect and decay, unless indeed, as some appearances indicate, they were then consecrated to Christian worship. From the accounts of Oriental writers Baalbek seems to have continued a place of importance down to the time of the Moslem invasion of Syria. They describe it as one of the most splendid of Syrian cities, enriched with stately palaces, adorned with monuments of ancient times, and abounding with trees, fountains, and whatever contributes to luxurious enjoyment. On the advance of the Moslems, it was reported to the emperor Heraclius as protected by a citadel of great strength, and well able to sustain a siege. After the capture of Damascus it was regularly invested by the Moslems, and—containing an overflowing population, amply supplied with provisions and military stores—it made a courageous defence, but

length capitulated. Its importance at that period is attested by the ransom exacted by the conquerors, consisting of 2000 ounces of gold, 1000 ounces of silver, 2000 silk vests, and 1000 swords, together with the arms of the garrison. It afterwards became the mart for the rich pillage of Syria: but its prosperity soon received a fatal blow from the khalif of Damascus, by whom it was sacked and dismantled, and the principal inhabitants put to the sword (A.D. 748). During the Crusades, being incapable of making any resistance, it seems to have quietly submitted to the strongest. In the year 1400 it was pillaged by Timour Beg, in his progress to Damascus, after he had taken Aleppo. Afterwards it fell into the hands of the Metaweli—a barbarous predatory tribe, who were nearly exterminated when Djeddar Pasha permanently subjected the whole district to Turkish supremacy.

The ruins of Heliopolis lie on an eastern branch of the mountain, and are called, by way of eminence, the Castle. The most prominent objects visible from the plain are a lofty portico of six columns, part of the great temple, and the walls and columns of another smaller temple a little below, surrounded by green trees. There is also a singular and unique circular temple, if it may be so called, of which we give a figure. These, with a curious column on the highest point within the walls, form the only erect portions of the ruins. The ruins at Baalbek in the mass are apparently of three successive eras: first, the gigantic hewn stones, in the face of the platform or basement on which the temple stands, and which appear to be remains of older buildings, perhaps of the more ancient temple which occupied the site. These celebrated blocks, which in fact form the great wonder of the place, vary from 30 to 40 feet in length; but there are three, forming an upper course 20 feet from the ground, which together measure 190 feet, being severally of the enormous dimensions of 63 and 64 feet in length, by 12 in breadth and thickness. 'They are,' says Richter, 'the largest stones I have ever seen, and might of themselves have easily given rise to the popular opinion that Baalbek was built by angels at the command of Solomon. The whole wall, indeed, is composed of immense stones, and its resemblance to the remains of the Temple of Solomon, which are still shown in the foundations of the mosque Es-Sakkara on Mount Moriah, cannot fail to be observed.' In the neighbouring quarries, from which they were cut, one stone, hewn out but not carried away, is of much larger dimensions than any of those which have been mentioned. To the second and third eras belong the Roman temples, which, being of and about the time of Antoninus Pius, present some of the finest specimens of Corinthian architecture in existence, and possess a wonderful grandeur and majesty from their lofty and imposing situation (Addison, ii. 57).

The present Baalbek is a small village to the east of the ruins, in a sad state of wretchedness and decay. It is little more than a heap of rubbish, the houses being built of mud and sun-dried bricks. The population of 5000, which the place is said to have contained in 1751, is now reduced to barely 2000 persons; the two handsome mosques and fine serai of the Emir,

mentioned by Burckhardt, are no longer distinguishable; and travellers may now inquire in vain for the grapes, the pomegranates, and the fruits which were formerly so abundant.

BA'AL-GUR, or GUR-BAAL. We read in 2 Chron. xxvi. 7, that 'the Lord assisted Uzziah against the Philistines, and against the Arabians that dwelt in Gur-Baal.' It was doubtless some town of Arabia-Petræa.

BA'AL-HAM'ON, a place where Solomon is said to have had a vineyard (Cant. viii. 11). There was a place called Hamon, in the tribe of Asher (Josh. xix. 28), which Ewald thinks was the same as Baal-Hamon. The book of Judith (viii. 3) places a Balamon or Belamon in central Palestine, which suggests another alternative.

BA'AL-HA'ZOR, the place where Absalom kept his flocks, and held his sheep-shearing feast (2 Sam. xiii. 23). It is said to have been 'beside Ephraim,' not in the tribe of that name, but near the city called Ephraim which was in the tribe of Judah, and is mentioned in 2 Chron. xiii. 19, John xi. 54. This Ephraim is placed by Eusebius eight miles from Jerusalem on the road to Jericho; and is supposed by Ewald to have been between Bethel and Jericho.

BA'AL-HER'MON (1 Chron. v. 23; Judg. iii. 3). It seems to have been a place in or near Mount Hermon, and not far from Baal-gad, if it was not, as some suppose, the same place.

BA'AL-ME'ON (Num. xxxii. 38; 1 Chron. v. 8; otherwise BETH-MEON, Jer. xlviii. 23, and BETH-BAAL-MEON, Josh. xiii. 17), a town in the tribe of Reuben beyond the Jordan, but which was in the possession of the Moabites in the time of Ezekiel (xxv. 9). At the distance of two miles south-east of Heshbon, Burckhardt found the ruins of a place called *Myoun*, or (as Dr. Robinson corrects it) *Mō'in*, which is doubtless the same.

BA'AL-PER'AZIM. This name, meaning 'place of breaches,' was imposed by David upon a place in or near the valley of Rephaim, where he defeated the Philistines (2 Sam. v. 20; comp. 1 Chron. xiv. 11; Isa. xxviii. 21).

BA'AL-SHAL'ISHA (2 Kings iv. 42), a place in the district of Shalisha (1 Sam. ix. 4). Eusebius and Jerome describe it as a city fifteen Roman miles north from Diospolis, near Mount Ephraim.

BA'AL-TA'MAR, a place near Gibeon, in the tribe of Benjamin, where the other tribes fought with the Benjamites (Judg. xx. 33).

BA'AL-ZE'PHON, a town belonging to Egypt, on the border of the Red Sea (Exod. xiv. 2; Num. xxxiii. 7). Nothing is known of its situation.

BA'BEL, TOWER OF. From the account given in Genesis xi. 1-9, it appears that the primitive fathers of mankind having, from the time of the Deluge, wandered without fixed abode, settled at length in the land of Shinar, where they took up a permanent residence. As yet they had remained together without experiencing those vicissitudes and changes in their outward lot which encourage the formation of different modes of speech, and were, therefore, of one language. Arrived however in the land of Shinar, and finding materials suitable for the construction of edifices, they proceeded to make and burn bricks, and using the bitumen, in which

parts of the country abound, for cement, they built a city and a tower of great elevation. A divine interference, however, is related to have taken place. In consequence, the language of the builders was confounded, so that they were no longer able to understand each other. They therefore 'left off to build the city,' and were scattered 'abroad upon the face of all the earth.' The narrative adds that the place took its name of Babel (confusion) from this confusion of tongues. That the work was subsequently resumed, and in process of time completed, is known on the best historical vouchers.

The sacred narrative (Gen. xi. 4) assigns as the reason which prompted men to the undertaking, a desire to possess a building so large and high as might be a mark and rallying point in the vast plains where they had settled, in order to prevent their being scattered abroad, and thus the ties of kindred be rudely sundered, individuals be involved in peril, and their numbers be prematurely thinned at a time when population was weak and insufficient. Such an attempt agrees with the circumstances in which the sons of Noah were placed, and is in itself of a commendable nature. But that some ambitious and unworthy motives were blended with these feelings is clearly implied in the sacred record.

After the lapse of so many centuries, and the occurrence in 'the land of Shinar' of so many revolutions, it is not to be expected that the identification of the Tower of Babel with any actual ruin should be easy, or lead to any very certain result. The majority of opinions, however, among the learned, make it the same as the temple of Belus described by Herodotus, which is found in the dilapidated remains of the Birs Nimrud.

FIG.

From the Holy Scriptures it appears that when Nebuchadnezzar conquered Jerusalem and levelled most of the city with the ground, 'he brought away the treasures of the temple, and the treasures of the king's house, and put them all into the temple of Bel at Babylon.' The brazen and other vessels which Solomon had caused to be made for the service of Jehovah are said to have been broken up by order of the Assyrian monarch, and formed into the famous

gates of brass which so long adorned the superb entrances into the great area of the temple of Belus. The purposes to which this splendid edifice was appropriated varied in some degree with the changes in opinions and manners which successive ages brought. Consecrated at the first, as it probably was, to the immoderate ambition of the monotheistic children of the Deluge, it passed to the Sabian religion, and thus falling one degree from purity of worship, became a temple of the sun and the rest of the hosts of heaven, till, in the natural progress of corruption, it sank into gross idolatry; and was polluted by the vices which generally accompanied the observances of heathen superstition. In one purpose it undoubtedly proved of service to mankind. The Babylonians were given to the study of astronomy. This ennobling pursuit was one of the peculiar functions of the learned men, denominated by Herodotus, Chaldeans, the priests of Belus; and the temple was crowned by an astronomical observatory, from the elevation of which the starry heavens could be most advantageously studied over plains so open and wide, and in an atmosphere so clear and bright, as those of Babylonia.

The present appearance of the tower as preserved in the Birs Nimrud is deeply impressive, rising suddenly as it does out of a wide desert plain, with its rent, fragmentary, and fire-blasted pile, masses of vitrified matter lying around, and the whole hill itself on which it stands caked and hardened out of the materials with which the temple had been built. A very considerable space round the tower, forming a vast court or area, is covered with ruins, affording abundant vestiges of former buildings; exhibiting uneven heaps of various sizes, covered with masses of broken brick, tiles, and vitrified fragments—all bespeaking some signal overthrow in former days. The towerlike ruin on the summit is a solid mass 28 feet broad, constructed of the most beautiful brick masonry. It is rent from the top nearly halfway to the bottom. It is perforated in ranges of square openings. At its base lie several immense unshapen masses of fine brickwork—some changed to a state of the hardest vitrification, affording evidence of the action of fire which seems to have been the lightning of heaven. The base of the tower, at present, measures 2082 feet in circumference. Hardly half of its former altitude remains. From its summit, the view in the distance presents to the south an arid desert plain; to the west the same trackless waste; towards the north-east marks of buried ruins are visible to a vast distance.

BABYLON; the name in Hebrew is Babel, from the confusion of tongues (Gen. xi. 1-9). In Daniel iv. 27 the place is appropriately termed 'Babylon the Great.' This famous city was the metropolis of the province of Babylon and of the Babylonio-Chaldean empire. It was situated in a wide plain on the Euphrates, which divided it into two nearly equal parts. According to the book of Genesis, its foundations were laid at the same time with those of the tower of Babel. In the revolutions of centuries it underwent many changes, and received successive reparations and additions. Semiramis and Nebuchadnezzar are those to whom the city was indebted for its greatest augmentations and its chief splendour.

Its site has been ascertained to be near Hillah, about forty miles from Bagdad.

According to Herodotus, the walls of Babylon were sixty miles in circumference, built of large bricks cemented together with bitumen, and raised round the city in the form of an exact square; hence they measured fifteen miles along each face. They were 87 feet thick and 350 feet high, protected on the outside by a vast ditch lined with the same material, and proportioned in depth and width to the elevation of the walls. The city was entered by twenty-five gates on each side, made of solid brass, and additionally strengthened by 250 towers, so placed that between every two gates were four towers, and four additional ones at the four corners. The whole city contained 676 squares, each two miles and a quarter in circumference. The river ran through the city from north to south; and on each side was a quay of the same thickness as the walls of the city, and 100 stadia in length. In these quays were gates of brass, and from each of them steps descending into the river. A bridge was thrown across the river, of great beauty and admirable contrivance, a furlong in length and 30 feet in breadth. The greatest circumference ascribed by the ancients to the city walls is 480 stadia, the most moderate 360. The smallest computation supposes an area for the city of which we can now scarcely form an idea. Its population however may not have been in proportion to its extent. The place was probably what in these days would be considered an enclosed district rather than a compact city.

One or two additional facts may aid in conveying a full idea of this great and magnificent city. When Cyrus took Babylon by turning the Euphrates into a neighbouring lake, the dwellers in the middle of the place were not for some time aware that their fellow-townsmen who were near the walls had been captured. From the fallen towers of Babylon have arisen not only all the present cities in its vicinity, but others which, like itself, have long since gone down into the dust. Since the days of Alexander four capitals, at least, have been built out of its remains—Seleucia by the Greeks, Ctesiphon by the Parthians, Al Maidan by the Persians, and Kufa by the Caliphs; with towns, villages, and caravansaries without number. The necessary fragments and materials were transported along the rivers and the canals. The new palace built by Nebuchadnezzar was prodigious in size and superb in embellishments. Its outer wall embraced six miles; within that circumference were two other embattled walls, besides a great tower. Three brazen gates led into the grand area, and every gate of consequence throughout the city was of brass.

The palace was splendidly decorated with statues of men and animals, with vessels of gold and silver, and furnished with luxuries of all kinds brought thither from conquests in Egypt, Palestine, and Tyre. Its greatest boast were the hanging gardens. They are attributed to the gallantry of Nebuchadnezzar, who constructed them in compliance with a wish of his queen Amytis to possess elevated groves such as she had enjoyed on the hills around her native Ecbatana. Babylon was all flat; and to accomplish so extravagant a desire an artificial mountain

was reared, 400 feet on each side, while terraces one above another rose to a height that overtopped the walls of the city, that is, above 300 feet in elevation. The ascent from terrace to terrace was made by corresponding flights of steps. The level of each terrace or garden was then formed in the following manner: the top of the piers was first laid over with flat stones, 16 feet in length and 4 feet in width; on these stones were spread beds of matting, then a thick layer of bitumen; after which came two courses of bricks, which were covered with sheets of solid lead. The earth was heaped on this platform; and in order to admit the roots of large trees, prodigious hollow piers were built and filled with mould. From the Euphrates, which flowed close to the foundation, water was drawn up by machinery. The whole had, to those who saw it from a distance, the appearance of woods overhanging mountains. Such was the completion of Nebuchadnezzar's work, when he found himself at rest in his house, and flourished in his palace. The king spoke and said, 'Is not this great Babylon that I have built for the house of the kingdom by the might of my power, and the honour of my majesty' (Dan. iv.). Nowhere could the king have taken so comprehensive a view of the city he had so magnificently constructed and adorned as when walking on the highest terrace of the gardens of his palace.

The remains of this palace are supposed to be found in the vast mound or hill called by the natives Kasr. It is of irregular form, 800 yards in length and 600 yards in breadth. Its appear-

79.

ance is constantly undergoing change from the continual digging which takes place in its inexhaustible quarries for brick of the strongest and finest material. Hence the mass is furrowed into deep ravines, crossing and recrossing each other in every direction. On the north side of the Kasr, amongst the mouldering fragments, and elevated on a sort of ridge, stands the famous solitary tree, called by the Arabs Atheleh; it bears every mark of antiquity in appearance, situation, and tradition. Its trunk was originally enormous; but, worn away by the lapse of ages, it is now but a ruin amid ruins: nevertheless it

bears spreading and ever-green branches. This tree is revered by the Arabs as holy, from a tradition current among them, that the Almighty himself preserved it here from the earliest time, to form a refuge for the Caliph Ali, who, fainting with fatigue from the battle of Hillah, found secure repose under its shade.

In digging in the extensive mounds which constitute the ruins of Babylon, an endless succession of curious objects is found from time to time.

Babylon, as the centre of a great kingdom, was the seat of boundless luxury, and its inhabitants were notorious for their addiction to self-indulgence and effeminacy. On the ground of their awful wickedness the Babylonians were threatened with condign punishment, through the mouths of the prophets; and the tyranny with which the rulers of the city exercised their sway was not without a decided effect in bringing on them the terrific consequences of the Divine vengeance. Nor in the whole range of literature is there anything to be found approaching to the sublimity, force, and terror with which Isaiah and others speak on this painful subject (Isa. xiv. 11; xlvii. 1; Jer. li. 39; Dan. v. 1).

Under Nabonidus, the last king, *B.C.* 538 or 539, Babylon was taken by Cyrus, after a siege of two years. An insurrection, under Darius Hystaspis (*B.C.* 500), the object of which was to gain emancipation from Persian bondage, led that prince to punish the Babylonians by throwing down the walls and gates which had been left by Cyrus, and by expelling them from their homes. Xerxes plundered and destroyed the temple of Belus, which Alexander the Great would probably, but for his death, have restored. Under Seleucus Nicator the city began to sink speedily, after that monarch built Seleucia on the Tigris, and made it his place of abode. In the time of Strabo and Diocorus Siculus the place lay in ruins. Jerome, in the fourth century of the Christian era, learnt that the site of Babylon had been converted into a park or hunting-ground for the recreation of the Persian monarchs, and that, in order to preserve the game, the walls had been from time to time repaired.

More thorough destruction than that which has overtaken Babylon cannot well be conceived. Rich was unable to discover any traces of its vast walls, and even its site has been a subject of dispute. 'On its ruins,' says he, 'there is not a single tree growing, except the old one,' which only serves to make the desolation more apparent. Ruins like those of Babylon, composed of rubbish impregnated with nitre, cannot be cultivated. The ruins of Babylon and its vicinity consist in general of mounds of earth formed by the decomposition of buildings, channelled and furrowed by the weather, and having the surface strewn with pieces of brick, bitumen, and pottery.

Neither the ancient nor the modern authorities are in exact agreement respecting particular places and localities, and any attempt to fix them now can be nothing more than an approach to the reality.

BABYLONIA (so called from the name of its chief city, termed also Chaldaea, from those who at a later period inhabited it), a province of Middle Asia, bordered on the north by Mesopotamia, on the east by the Tigris, on the south by

the Persian Gulf, and on the west by the Arabian Desert. On the north it begins at the point where the Euphrates and Tigris approach each other, and extends to their common outlet in the Persian Gulf, pretty nearly comprising the country now designated Irak Arabi. The climate is temperate and salubrious. The country in ancient times was very prolific, especially in corn and palms. Timber-trees it did not produce. Many parts had springs of naphtha. As rain is infrequent, even in the winter months, the country owes its fruitfulness to the annual overflow of the Euphrates and the Tigris, whose waters are conveyed over the land by means of canals.

The alluvial plains of Babylonia, Chaldaea, and Susiana, including all the river, lake, and newer marine deposits at the head of the Persian Gulf, occupy an extent of about 32,400 square geographic miles. The rivers are the Euphrates and its tributaries, the Tigris and its tributaries, the Kerah, the Karun and its tributaries, the Jerahi, and the Idiyun; constituting, altogether, a vast hydrographical basin of 189,200 geographic square miles; containing, within itself, a central deposit of 32,400 miles of alluvium, almost entirely brought down by the waters of the various rivers, and which have been accumulating from periods long antecedent to all historical records. The modern accumulation of soil in Babylonia from annual inundations is still very great. Several canals convey water at certain seasons of the year from one river and part of the country to another. In general, the alluvium that is brought down by canals and rivulets, and deposited at their mouths, is a fine clay. The great extent of the plain of Babylonia is everywhere altered by artificial works. There is still some cultivation and some irrigation. Flocks pasture in meadows of coarse grasses; the Arabs' dusky encampments are met with here and there; but, except on the banks of the Euphrates, there are few remains of the date-groves, the vineyards, and the gardens which adorned the same land in the days of Artaxerxes; and still less of the population and labour which must have made a garden of such soil in the time of Nebuchadnezzar. The vegetation of these tracts is characterized by the usual saline plants, the river banks being fringed by shrubberies of tamarisk and acacia, and occasional groves of a poplar which has been mistaken for a willow.

The Euphrates is still a majestic stream, but wanders through a dreary solitude. Its banks are hoary with reeds, and the grey osier-willows are yet there on which the captives of Israel hung up their harps, and, while Jerusalem was not, refused to be comforted. According to Rennel its breadth at Babylon is about 491 English feet. Rich ascertained its depth to be 2½ fathoms, and that the current runs gently at the medium rate of about two knots an hour. The Euphrates is far less rapid than the Tigris, and rises at an earlier period. When at its height—from the latter end of April to the latter end of June—it overflows the surrounding country. The ruins of Babylon are then so inundated as to render many parts of them inaccessible. The course of the river through the site of Babylon is north and south. During the three great empires of the East, no tract of the whole appears to have been so reputed for fertility and riches as the dis-

trict of Babylonia, which arose in the main from the proper management of the mighty river which flowed through it. But the abundance of the country has vanished as clean away as if 'the besom of desolation' had swept it from north to south; the whole land, from the outskirts of Bagdad to the farthest reach of sight, lying a melancholy waste.

In order to defend the country against hostile attacks from its neighbours, northward from Babylon, between the two rivers, a wall was built, which is known under the name of the Median Wall. The Babylonians were famous for the manufacture of cloth and carpets: they also excelled in making perfumes, in carving in wood, and in working in precious stones. They were a commercial as well as a manufacturing people, and carried on a very extensive trade alike by land and by sea. Babylon was indeed a commercial depot between the Eastern and the Western worlds (Ezek. xvii. 4; Isa. xliii. 14). Thus favoured by nature and aided by art, Babylonia became the first abode of social order and the cradle of civilization.

The original inhabitants were without doubt of the Shemitic family; and their language belonged to the class of tongues spoken by that race, particularly to the Aramaic branch, and was indeed a dialect similar to that which is now called Chaldee.

From the account which is found in Gen. x. 8, *Nimrod*, the son of Cush, appears to have founded the kingdom of Babylon, and to have been its first sovereign. In the 14th chap. of the same book, *Amraphel* is cursorily mentioned as king of Shinar. In the reign of Hezekiah (a.c. 713)—2 Kings xx. 12—*Berodach-baladan*, the son of Baladan, was 'king of Babylon,' and 'sent letters and a present unto Hezekiah, for he had heard that Hezekiah had been sick.' About a hundred years later, Jeremiah and Habakkuk speak of the invasion of the Babylonians under the name of the Chaldeans; and now *Nebuchadnezzar* appears in the historical books (2 Kings xxiv. 1, sq.; Jer. xxxvi. 9, 27) as head of the all-subduing empire of Babylon. *Evilmerodach* (2 Kings xxv. 27; Jer. lii. 31), son of the preceding, is also mentioned as 'king of Babylon;' and with *Belshazzar* (Dan. v. 1, 30) the line of the Chaldean kings was closed: he perished in the conquest of Babylon by the Medo-Persians (Dan. v. 31), and Darius, the Median, took the kingdom.

The domination of the Chaldeans in Babylon has given historians some trouble to explain. The Chaldeans appear to have originally been a nomadic tribe in the mountains of Armenia, numbers of whom are thought to have settled in Babylon as subjects, where, having been civilized and grown powerful, they seized the supreme power and founded a Chaldeo-Babylonian empire.

There can be little doubt that the Chaldeans were a distinct nation. In connection with Babylonia they are to be regarded as a conquering nation as well as a learned people: they introduced a correct method of reckoning time, and began their reign with Nabonassar, a.c. 747. The brilliant period of the Chaldeo-Babylonian empire extended to a.c. 538, when the great city, in accordance with the prophecy of Daniel, was sacked and destroyed. Babylonia, during this

period, was 'the land of the Chaldeans,' the same as that into which the children of Judah were carried away captive (Jer. xxiv. 5); which contained Babylon (Jer. i. 1; Ezek. xii. 13); was the seat of the king of Babylon (Jer. xxv. 12), and contained the house of the god of Nebuchadnezzar (Dan. i. 1, 2).

BA'CA and BECAIM occur, the first in Ps. lxxxiv. 6, 'Who passing through the valley of Baca make it a well; the rain also filleth the pools;' the second in 2 Sam. v. 23, 24, and in 1 Chron. xiv. 14, 15, 'And let it be, when thou hearest the sound of a going in the tops of the mulberry trees, that thou shalt bestir thyself.' Neither the *mulberry* nor the *pear-tree*, considered by some to be the *baca* of the Scriptures, satisfies translators and commentators, because they do not possess any characters particularly suitable to the above passages.

It is evident that the tree alluded to, whatever it is, must be common in Palestine, must grow in the neighbourhood of water, have its leaves easily moved, and have a name in some of the cognate languages similar to the Hebrew *Baca*. The only one with which we are acquainted answering to these conditions is that called *bak* by the Arabs, or rather *shajiat al-bak*—that is, the *fly* or *gnat* tree.

As it appears to us sufficiently clear that the *bak*-tree is a kind of poplar, and as the Arabic '*bak*' is very similar to the Hebrew '*Baca*,' so it is probable that one of the kinds of poplar may be intended in the above passages of Scripture. And it must be noted that the poplar is as appropriate as any tree can be for the elucidation of the passages in which *baca* occurs. For the poplar is well known to delight in moist situations, and Bishop Horne, in his *Comm.* on Psalm lxxxiv., has inferred that in the valley of *Baca* the Israelites, on their way to Jerusalem, were refreshed by plenty of water. It is not less appropriate in the passages in 2 Samuel and 1 Chronicles, as no tree is more remarkable than the poplar for the ease with which its leaves are rustled by the slightest movement of the air; an effect which might be caused in a still night even by the movement of a body of men on the ground, when attacked in flank or when unprepared. That poplars are common in Palestine may be proved from Kitto's *Palestine*, i. 114: 'Of poplars we only know, with certainty, that the black poplar, the aspen, and the Lombardy poplar grow in Palestine. The aspen, whose long leaf-stalks cause the leaves to tremble with every breath of wind, unites with the willow and the oak to overshadow the watercourses of the Lower Lebanon, and, with the oleander and the acacia, to adorn the ravines of southern Palestine: we do not know that the Lombardy poplar has been noticed but by Lord Lindsay, who describes it as growing with the walnut-tree and weeping-willow under the deep torrents of the Upper Lebanon.'

BADGER. This is unquestionably a wrong interpretation of the word *tachash*, since the badger is not found in Southern Asia, and has not as yet been noticed out of Europe. The word occurs in the plural form in Exod. xxv. 5; xvi. 14; xxxv. 7, 23; xxxvi. 19; xxxix. 34; Num. iv. 6, 8, 10, 11, 12, 14, 25; and Ezek. xvi. 10; and in connection with *oroth*, skins, is used to

denote the covering of the Tabernacle. Negroland and Central and Eastern Africa contain a number of ruminating animals of the great antelope family; which are known to the natives under various names, such as pacasse, empacasse, thacasse, facasse, and tachaitze, all more or less varieties of the word tachash: they are of considerable size; often of slaty and purple grey colours, and might be termed stag-goats and ox-goats. Of these one or more occur in the hunting-scenes on Egyptian monuments, and therefore we may conclude that the skins were accessible in abundance, and may have been dressed with the hair on for coverings of baggage, and for boots, such as we see worn by the human figures in the same processions. Thus we have the greater number of the conditions of the question sufficiently realized to enable us to draw the inference that tachash refers to a ruminant of the Aigocerine or Damaline groups, most likely of an iron-grey or slaty-coloured species.

BAG, a purse or pouch (Deut. xxv. 13; Job xiv. 17; 1 Sam. xvii. 40; Luke xii. 33). The money deposited in the treasuries of Eastern princes, or intended for large payments, or to be sent to a government as taxes or tribute, is collected in long narrow bags or purses, each containing a certain amount of money, and sealed with the official seal. As the money is counted for this purpose, and sealed with great care by officers properly appointed, the bag, or purse, passes current, as long as the seal remains unbroken, for the amount marked thereon. In the receipt and payment of large sums, this is a great and important convenience in countries where the management of large transactions by paper is unknown, or where a currency is chiefly or wholly of silver: it saves the great trouble of counting or weighing loose money. This usage is so well established, that, at this day, in the Levant, 'a purse' is the very name for a certain amount of money (now five pounds sterling), and all large payments are stated in 'purses.' The antiquity of this custom is attested by the monu-

80.

ments of Egypt, in which the ambassadors of distant nations are represented as bringing their tributes in sealed bags of money to Thothmes III.; and we see the same bags deposited intact in the royal treasury. When coined money was not used, the seal must have been considered a voucher not only for the amount, but for the purity of the metal. The money collected in the Temple, in the time of Joash, seems to have been made up into bags of equal value after this fashion; which were probably delivered, sealed, to those who paid the workmen (2 Kings xii. 10; comp. also 2 Kings v. 23; Tobit ix. 5; xi. 16).

BAHURIM, a place not far from Jerusalem, beyond the Mount of Olives, on the road to the

Jordan, where Shimei cursed and threw stones at David (2 Sam. xvi. 5).

BA'LAAM is supposed by some to mean *lord of the people*; but by others *destruction of the people*—an allusion to his supposed supernatural powers. The first mention of this remarkable person is in Numbers xxii. 5, where we are informed that Balak 'sent messengers unto Balaam the son of Beor to Pethor, which is by the river of the land of the children of his people. Of the numerous paradoxes which we find in 'this strange mixture of a man,' as Bishop Newton terms him, not the least striking is that with the practice of an art expressly forbidden to the Israelites (Deut. xviii. 10), he united the knowledge and worship of Jehovah, and was in the habit of receiving intimations of his will (Num. xxii. 8). The inquiry naturally arises, by what means did he become acquainted with the true religion? Dr. Hengstenberg suggests that he was led to renounce idolatry by the reports that reached him of the miracles attending the Exodus; and that having experienced the deceptive nature of the soothsaying art, he hoped by becoming a worshipper of the God of the Hebrews, to acquire fresh power over nature, and a clearer insight into futurity. Yet the sacred narrative gives us no reason to suppose that he had any previous knowledge of the Israelites. In Num. xxii. 11, he merely repeats Balak's message, 'Behold there is a people come out of Egypt' &c., without intimating that he had heard of the miracles wrought on their behalf. The allusion in Num. xxiii. 22 might be prompted by the Divine afflatus which he then felt. And had he been actuated, in the first instance, by motives of personal aggrandizement, it seems hardly probable that he would have been favoured with those divine communications with which his language in Num. xxii. 8 implies a familiarity. Since, in the case of Simon Magus, the offer to 'purchase the gift of God with money' (Acts viii. 20) called forth an immediate and awful rebuke from the Apostles, would not Balaam's attempt to obtain a similar gift with a direct view to personal emolument and fame have met with a similar repulse? In the absence of more copious and precise information, may we not reasonably conjecture that Jacob's residence for twenty years in Mesopotamia contributed to maintain some just ideas of religion, though mingled with much superstition? To this source and the existing remains of Patriarchal religion, Balaam was probably indebted for that truth which he unhappily 'held in unrighteousness' (Rom. i. 18).

On the narrative contained in Numbers xxii. 22-35 a difference of opinion has long existed, even among those who fully admit its authenticity. The advocates for a literal interpretation urge, that in a historical work and a narrative bearing the same character, it would be unnatural to regard any of the occurrences as taking place in vision, unless expressly so stated;—that it would be difficult to determine where the vision begins, and where it ends;—that Jehovah's 'opening the mouth of the ass' (Num. xxii. 28) must have been an external act; and, finally, that Peter's language is decidedly in favour of the literal sense:—'The dumb ass, speaking with a man's voice, reproved the madness of the Pro-

phet' (2 Peter ii. 16). Those who conceive that the speaking of the ass and the appearance of the Angel occurred in vision to Balaam insist upon the fact that dreams and visions were the ordinary methods by which God made himself known to the Prophets (Num. xii. 6); they remark that Balaam, in the introduction to his third and fourth prophecies (xxiv. 3, 4, 15), speaks of himself as 'the man who had his eyes shut' (c. Lam. iii. 8), and who, on falling down in prophetic ecstasy, had his eyes opened;—that he expressed no surprise on hearing the ass speak; and that neither his servants nor the Moabitish princes who accompanied him appear to have been cognizant of any supernatural appearance.

BAL'ADAN. [MERODACHI-BALADAN.]

BAL'AK (*emptier, spoiler*), son of Zippor, and king of the Moabites (Num. xxii. 2, 4), who was so terrified at the approach of the victorious army of the Israelites, who in their passage through the desert had encamped near the confines of his territory, that he applied to Balaam, who was then reputed to possess great influence with the higher spirits, to curse them. From Judg. xiv. 25, it is clear that Balak was so certain of the fulfilment of Balaam's blessing, 'blessed is he that blesseth thee, and cursed is he that curseth thee' (Num. xxiv. 9), that he never afterwards made the least military attempt to oppose the Israelites (comp. Mic. vi. 5; Rev. ii. 14).

BALANCE. [WEIGHING.]

BALDNESS may be artificial or natural. Artificial baldness, caused by cutting or shaving off the hair of the head, a custom among all the ancient and Eastern nations, in token of mourning for the death of a near relative (Jer. xvi. 6; Amos viii. 10; Micah i. 16), Moses forbade to the Israelites (Deut. xiv. 1), probably for the very reason of its being a heathen custom; for a leading object of his policy was to remove the Jews as far as possible from the ways and customs of the surrounding nations. Natural baldness was always treated among the Israelites with contempt (Lev. xiii. 40, &c.), and a bald man was not unfrequently exposed to the ridicule of the mob (2 Kings ii. 23; Isa. iii. 17), perhaps from the suspicion of being under some leprous taint. The public prejudice thus entertained against a bald-headed man was perhaps the main reason why he was declared unfit for the priestly office (Lev. xxi. 20).

BALM. This substance is mentioned in Gen. xxxviii. 25; xliii. 11; Jer. viii. 22; xli. 8; xlv. 11; Ezek. xxvii. 17, as a medicinal aromatic. It is shown in the following article that this 'balm' could not have been the product of the so called balsam-tree, or balm of Gilead tree; and the product actually denoted by the word is in fact unknown.

BALSAM-TREE. The balsam-tree was one of the most celebrated and highly esteemed among the ancients. It is supposed to be referred to under the Hebrew names BASAM and BAAL-SHYMEN, translated 'spices,' in Exod. xxxv. 28; 1 Kings x. 10; Sol. Song. v. 1, 13. It would appear, however, from ancient authors that the plant yielding balsam was never very common in Palestine—in fact, that it was confined to one locality, where it was found only as a plant in cultivation, though it may have been, and pro-

bably was, introduced at a very early period. That it has long disappeared from thence is evident from the testimony of all travellers in Palestine. That it was a southern plant we may believe from its being cultivated in the warm southern valley of Jericho, and that it was introduced into that locality we have the testimony of Josephus, who says that it was brought thither by the Queen of Sheba.

The balsam-tree, or balm of Gilead tree, as it is also very generally called, is not a native of that region, nor indeed does it appear ever to have been cultivated there. The true balsam, we have seen, was cultivated near Jericho, and at a later age in Egypt. From that country it has been traced to Arabia.

The balsam-tree, having been described by various travellers, is now pretty well known. It forms a middle-sized tree, with spreading branches and a smooth ash-coloured bark, but which is no doubt rough in the older parts. The ultimate branches are short, and thorn-like, with small very short abortive branchlets, bearing at their extremities the leaves and flowers. The fruit is pointed, fleshy, with a viscid pulp.

This species is now considered to be identical with the *Amyris opobalsamum* of Forskal, found by him in Arabia, in the neighbourhood of the caravansera of Oude, not far from Has, and the wounded bark of which yields opobalsamum, or balsam of Mecca. It is as highly esteemed by all Orientals in the present day as it was by the civilized nations of antiquity. Another species was discovered by Forskal, and called by him *Amyris Kafal*. It is a tree with reddish-coloured wood, and with branches rather spinous. The younger leaflets are described as being villous and acute, the old ones smooth, often obtuse; the berry compressed, with an elevated ridge on each side, the apex forming a black prominent point. The wood he describes as forming an article

81.

of considerable commerce, especially to Egypt, where water-vessels are impregnated with its smoke. It is probably the twigs of this species which are taken to India, and there sold under the name of aod-i-balessan; that is, the wood of the balsam-tree. *Carpobalsamum* was probably only the fruit of one of these species. *Opobal-*

samum, or juice of the balsam, is generally described as the finest kind, of a greenish colour, and found in the kernel of the fruit. Carpopalsamum is said to have been made by the expression of the fruit when in maturity, and xylobal-samum, by the expression or decoction of the small new twigs, which are of a reddish colour. But the ancients probably employed both the fruit and the wood for macerating in oil, which would extract the odour. The greatest quantity of balsam, and the best in quality, must in all times have been produced by an incision into the bark when the juice is in its strongest circulation, in July, August, and the beginning of September. It is then received into a small earthen bottle, and every day's produce is poured into a larger, which is kept closely corked. The whole quantity collected is but small. When Sultan Selim conquered Egypt and Arabia in 1516, three pounds were ordered to be sent yearly as a tribute to Constantinople.

BANQUETS. Festive meetings among the Jews were held only towards the close of the day, as it was not till business was over that the Jews freely indulged in the pleasures of the table; and although in the days of Christ these meals were, after the Roman fashion, called *suppers*, they corresponded exactly to the dinners of modern times, the hour fixed for them varying from five to six o'clock P.M., or sometimes later.

On occasions of ceremony the company were invited a considerable time previous to the celebration of the feast; and on the day and at the hour appointed, an express by one or more servants, according to the number and distance of the expected guests, was despatched to announce that the preparations were completed, and that their presence was looked for immediately (Matt. xxii. 8; Luke xiv. 17). This custom obtains in the East at the present day; and the second invitation, which is sent to none but such as have been already invited, and have declared their acceptance, is always verbal, and is delivered by the messenger in his master's name, and frequently in the very language of Scripture.

At the small entrance door a servant was stationed to receive the tablets or cards of those who were expected; and as curiosity usually collected a crowd of troublesome spectators, anxious to press forward into the scene of gaiety, the gate was opened only so far as was necessary for the admission of a single person at a time, who, on presenting his invitation ticket, was conducted through a long and narrow passage into the receiving-room; and then, after the whole company were assembled, the master of the house shut the door with his own hands—a signal to the servant to allow himself to be prevailed on neither by noise nor by importunities, however loud and long continued, to admit the bystanders. To this custom there is a manifest reference in Luke xiii. 24, and Matt. xxv. 10.

One of the first marks of courtesy shown to the guests, after saluting the host, was the refreshment of water and fragrant oil or perfumes; and hence we find our Lord complaining of Simon's omission of these customary civilities (Luke vii. 44; see also Mark vii. 4) [ANONING]. But a far higher, though necessarily less frequent attention paid to their friends by the great, was the

custom of furnishing each of the company with a magnificent habit of a light and showy colour, and richly embroidered, to be worn during the festivity (Eccles. ix. 8; Rev. iii. 4, 5). The loose and flowing style of this gorgeous mantle made it equally suitable for all; and it is almost incredible what a variety of such sumptuous garments the wardrobes of some great men could supply to equip a numerous party. In a large company, even of respectable persons, some might appear in a plainer and humbler garb than accorded with the taste of the entertainer; and where this arose from necessity or limited means, it would have been harsh and unreasonable in the extreme to attach blame, or to command the instant and ignominious expulsion of the guest from the banquet-room. But where a well-appointed and sumptuous wardrobe was opened for the use of every guest,—to refuse the gay and splendid costume which the munificence of the host provided, and to persist in appearing in one's own habiliments, implied a contempt both for the master of the house and his entertainment, which could not fail to provoke resentment—and our Lord therefore spoke in accordance with a well-known custom of his country, when, in the parable of the marriage of the king's son, he describes the stern displeasure of the king on discovering one of the guests without a wedding-garment, and his instant command to thrust him out (Matt. xxii. 11). At private banquets the master of the house of course presided, and did the honours of the occasion; but in large and mixed companies it was anciently customary to elect a governor of the feast (John ii. 8; see also Eccles. xxxii. 1), who should not merely perform the office of chairman, in preserving order and decorum, but take upon himself the general management of the festivities. As this office was considered a post of great responsibility and delicacy, as well as honour, the choice which among the Greeks and Romans was left to the decision of dice, was more wisely made by the Jews to fall upon him who was known to be possessed of the requisite qualities—a ready wit and convivial turn, and at the same time firmness of character and habits of temperance. The guests were scrupulously arranged according to their respective ranks. This was done either by the host or governor, who, in the case of a family, placed them according to seniority (Gen. xliii. 33), and in the case of others, assigned the most honourable a place near his own person; or it was done by the party themselves, on their successive arrivals, and after surveying the company, taking up the position which it appeared fittest for each according to their respective claims to occupy. It might be expected that among the Orientals, by whom the laws of etiquette in these matters are strictly observed, many absurd and ludicrous contests for precedence must take place, from the arrogance of some and the determined perseverance of others to wedge themselves into the seat they deem themselves entitled to. Accordingly Morier informs us, that, in Persia, 'it is easy to observe by the countenances of those present, when any one has taken a higher place than he ought. 'On one occasion,' he adds, 'when an assembly was nearly full, the governor of Kashan, a man of humble mien, came in, and had seated himself at the lowest place, when the host, after having

testified his particular attentions to him by numerous expressions of welcome, pointed with his hand to an upper seat, which he desired him to take' (*Second Journey*). As a counterpart to this, Dr. Clarke states that 'at a wedding feast he attended in the house of a rich merchant at St. Jean d'Acre, two persons who had seated themselves at the top were noticed by the master of ceremonies, and obliged to move lower down.' The knowledge of these peculiarities serves to illustrate several passages of Scripture (Prov. xxv. 6, 7; Matt. xxiii. 6; and especially Luke xiv. 7, where we find Jesus making the unseemly ambition of the Pharisees the subject of severe and merited animadversion).

It would be difficult within a short compass to describe the form and arrangements of the table, as the entertainments spoken of in Scripture were not all conducted in a uniform style. In ancient Egypt, as in Persia, the tables were ranged along the sides of the room, and the guests were placed with their faces towards the walls. Persons of high official station were honoured with a table apart for themselves at the head of the room; and in these particulars every reader of the Bible will trace an exact correspondence to the arrangements of Joseph's entertainments to his brethren. According to Lightfoot, the tables of the Jews were either wholly uncovered, or two-thirds were spread with a cloth, while the remaining third was left bare for the dishes and vegetables. In the days of our Lord the prevailing form was the triclinium, the mode of reclining at which is described elsewhere [ACCUBATION]. This effeminate practice was not introduced until near the close of the Old Testament history, for the ancient Israelites sat round a low table, cross-legged, like the Orientals of the present day.

The convenience of knives and forks being unknown in the East, or, where known, being a modern innovation, the hand is the only instrument used in conveying food to the mouth, and the common practice, their food being chiefly prepared in a liquid form, is to dip their thin wafer-like bread into the dish, and folding it between their thumb and two fingers, enclose a portion of the contents. It is not uncommon to see several hands plunged into one dish at the same time. But where the party is numerous, the two persons near or opposite are commonly joined in one dish; and accordingly, at the last Passover, Judas, being close to his master, was pointed out as the traitor by being designated as the person 'dipping his hand with Jesus in the dish.' The Apostle John, whose advantageous situation enabled him to hear the minutest parts of the conversation, has recorded the fact of our Lord, in reply to the question 'Who is it?' answering it by 'giving a sop to Judas when he had dipped' (John xlii. 26); and this leads us to mention it as not the least among the peculiarities of Oriental manners, that a host often dips his hand into a dish, and lifting a handful of what he considers a dainty, offers the sop to one of his friends. In earlier ages, a double or a more liberal portion, or a choice piece of cookery, was the form in which a landlord showed his respect for the individual he delighted to honour (Gen. xliii. 34; 1 Sam. i. 4; x. 23; Prov. xxi. 15).

In the course of the entertainment servants are

VOL. I.

frequently employed in sprinkling the head and person of the guests with odoriferous perfumes, which, probably to counteract the effects of too copious perspiration, they use in great profusion, and the fragrance of which, though generally too strong for Europeans, is deemed an agreeable refreshment (see Ps. xlv. 8; xxiii. 5; cxxxiii. 2).

The various items of which an Oriental entertainment consists, bread, flesh, fish, fowls, melted butter, honey, and fruits, are in many places set on the table at once, in defiance of all taste. They are brought in upon trays—one, containing several dishes, being assigned to a group of two or at most three persons, and the number and quality of the dishes being regulated according to the rank and consideration of the party seated before it. In ordinary cases four or five dishes constitute the portion allotted to a guest; but if he be a person of consequence, or one to whom the host is desirous of showing more than ordinary marks of attention, other viands are successively brought in, until, if every vacant corner of the tray is occupied, the bowls are piled one above another. The object of this rude but liberal hospitality is, not that the individual thus honoured is expected to surfeit himself by an excess of indulgence in order to testify his sense of the entertainer's kindness, but that he may enjoy the means of gratifying his palate with greater variety; and hence we read of Joseph's displaying his partiality for Benjamin by making his 'mess five times so much as any of theirs' (Gen. xliii. 34). The shoulder of a lamb, roasted, and plentifully besmeared with butter and milk, is regarded as a great delicacy still, as it was also in the days of Samuel. But according to the favourite cookery of the Orientals, their animal food is for the most part cut into small pieces, stewed, or prepared in a liquid state, such as seems to have been the 'broth' presented by Gideon to the angel (Judg. vi. 19). The made-up dishes are 'savory meat,' being highly seasoned, and bring to remembrance the marrow and fatness which were esteemed as the most choice morsels in ancient times. As to drink, when particular attention was intended to be shown to a guest, his cup was filled with wine till it ran over (Ps. xxiii. 5), and it is said that the ancient Persians began their feasts with wine, whence it was called 'a banquet of wine' (Esther v. 6).

The hands, for occasionally both were required, besmeared with grease during the process of eating, were anciently cleaned by rubbing them with the soft part of the bread, the crumbs of which, being allowed to fall, became the portion of dogs (Matt. xv. 27; Luke xvi. 21). But the most common way now at the conclusion of a feast is for a servant to go round to each guest with water to wash, a service which is performed by the menial pouring a stream over their hands, which is received into a strainer at the bottom of the basin. This humble office Elisha performed to his master (2 Kings iii. 11).

People of rank and opulence in the East frequently give public entertainments to the poor. The rich man in the parable, whose guests disappointed him, despatched his servants on the instant to invite those that might be found sitting by the hedges and the highways—a measure which, in the circumstances, was absolutely neces-

■

sary, as the heat of the climate would spoil the meats long before they could be consumed by the members of his own household. But many of the great, from benevolence or ostentation, are in the habit of proclaiming set days for giving feasts to the poor; and then, at the time appointed, may be seen crowds of the blind, the halt, and the maimed bending their steps to the scene of entertainment. This species of charity claims a venerable antiquity. Our Lord recommended his wealthy hearers to practise it rather than spend their fortunes, as they did, on luxurious living (Luke xiv. 12); and as such invitations to the poor are of necessity given by public proclamation, and female messengers are employed to publish them, it is probably to the same venerable practice that Solomon alludes in Prov. ix. 3.

BAPTISM. A conviction of the holiness of God excites in man the notion that he cannot possibly come into any amicable relation with him before he is cleansed of sin, which separates him from God. This sentiment found a very widely extended symbolic expression in the lustrations which formed an essential part of the ceremonial creeds of the ancient nations. In the language of the prophets, cleansing with water is used as an emblem of the purification of the heart, which in the Messianic age is to glorify the soul in her innermost recesses, and to embrace the whole of the theocratic nation (Ezek. xxxvi. 25, *sq.*; Zech. xiii. 1). Such declarations gave rise to or nourished the expectation that the advent of the Messiah would manifest itself by a preparatory lustration, by which Elijah or some other great prophet would pave the way for him. This supposition lies evidently at the bottom of the questions which the Jews put to John the Baptist (John i. 25: comp. Matt. and Luke, iii. 7), whether he was the Messiah, or Elijah, or some other prophet? and if not, why he undertook to baptize? Thus we can completely clear up the historical derivation of the rite, as used by John and Christ, from the general and natural symbol of baptism, from the Jewish custom in particular, and from the expectation of a Messianic consecration. Dans, Ziegler, and others have, nevertheless, supposed it to be derived from the Jewish ceremonial of baptizing *proselytes*; and Wetstein has traced that rite up to a date earlier than Christianity. But this opinion is not at all tenable: for, as an act which strictly gives *validity* to the admission of a proselyte, and is no mere *accompaniment* to his admission, baptism certainly is not alluded to in the New Testament; while, as to the passages quoted in proof from the classical (profane) writers of that period, they are all open to the most fundamental objections. Nor is the utter silence of Josephus and Philo on the subject, notwithstanding their various opportunities of touching on it, a less weighty argument against this view. It is true that mention is made in the Talmud of that regulation as already existing in the first century A.D.; but such statements belong only to the traditions of the Gemara, and require careful investigation before they can serve as proper authority. This Jewish rite was probably originally only a purifying ceremony; and it was raised to the character of an initiating and indispensable rite co-ordinate with that of sacrifice and circumcision,

only *after* the destruction of the Temple, when sacrifices had ceased, and the circumcision of proselytes had, by reason of public edicts, become more and more impracticable.

BAPTISM OF JOHN.—It was the principal object of John the Baptist to combat the prevailing opinion, that the performance of external ceremonies was sufficient to secure participation in the kingdom of God and his promises; he required repentance, therefore, as a preparation for the approaching kingdom of the Messiah. That he may possibly have baptized *heathens* also, seems to follow from his censuring the Pharisees for confiding in their descent from Abraham, while they had no share in his spirit: yet it should not be overlooked that this remark was drawn from him by the course of the argument (Matt. iii. 8, 9; Luke iii. 7, 8). We must, on the whole, assume that John considered the existing Judaism as a stepping-stone by which the Gentiles were to arrive at the kingdom of God in its Messianic form. The general point of view from which John contemplated the Messiah and his kingdom was that of the Old Testament, though closely bordering on Christianity. He regards, it is true, an alteration in the mind and spirit as an indispensable condition for partaking in the kingdom of the Messiah; still he looked for its establishment by means of conflict and external force, with which the Messiah was to be endowed; and he expected in him a Judge and Avenger, who was to set up outward and visible distinctions. It is, therefore, by no means a matter of indifference whether baptism be administered in the name of that Christ who flouted before the mind of John, or of the suffering and glorified One, such as the apostles knew him; and whether it was considered a preparation for a political, or a consecration into a spiritual theocracy. John was so far from this latter view, so far from contemplating a purely spiritual development of the kingdom of God, that he even began subsequently to entertain doubts concerning Christ (Matt. xi. 2). John's baptism had not the character of an immediate, but merely of a preparatory consecration for the glorified theocracy (John i. 31). The Apostles, therefore, found it necessary to re-baptize the disciples of John, who had still adhered to the notions of their master on that head (Acts xix.). To this apostolic judgment Tertullian appeals, and in his opinion coincide the most eminent teachers of the ancient church, both of the East and the West.

THE BAPTISM OF JESUS BY JOHN (Matt. iii. 13, *sq.*; Mark i. 9, *sq.*; Luke iii. 21, *sq.*; comp. John i. 19, *sq.*; the latter passage refers to a time *after* the baptism, and describes, ver. 32, the incidental facts attending it).—The baptism of Jesus, as the first act of his public career, is one of the most important events recorded in evangelical history: great difficulty is also involved in reconciling the various accounts given by the Evangelists of that transaction, and the several points connected with it. To question the fact itself, not even the *negative criticism* of Dr. Strauss has dared. This is, however, all that has been conceded by that criticism, viz., the mere and bare fact 'that Christ was baptized by John,' while all the circumstances of the event are placed in the region of mythology or fiction.

Critical inquiry suggests the following questions:—

1. In what relation did Jesus stand to John before the baptism?

2. What object did Jesus intend to obtain by that baptism?

3. In what sense are we to take the miraculous incidents attending that act?

With regard to the first point, we might be apt to infer, from Luke and Matthew, that there had been an acquaintance between Christ and John even prior to the baptism; and that hence John declines (Matt. iii. 14) to baptize Jesus, arguing that he needed to be baptized by him. This, however, seems to be at variance with John i. 31, 33. Lücke (*Comment.* i. p. 416, *sq.* 3rd edit.) takes the words 'I knew him not' in their strict and exclusive sense. John, he says, could not have spoken in this manner if he had at all known Jesus; and had he known him, he could not, as a prophet, have failed to discover, even at an earlier period, the but too evident 'glory' of the Messiah. In fact, the narrative of the first three Gospels presupposes the same, since, as the herald of the Messiah, he could give that refusal (Matt. iii. 14) to the Messiah alone.

With regard to the second point at issue, as to the object of Christ in undergoing baptism, we find, in the first instance, that he ranked this action among those of his Messianic calling. This object is still more defined by John the Baptist (John i. 31), which Lücke interprets in the following words: 'Only by entering into that community which was to be introductory to the Messianic, by attaching himself to the Baptist like any other man, was it possible for Christ to reveal himself to the Baptist, and through him to others.' Christ, with his never-failing reliance on God, never for a moment could doubt of his own mission, or of the right period when his character was to be made manifest by God; but John needed to receive that assurance, in order to be the herald of the Messiah who was actually come. For all others whom John baptized, either before or after Christ, this act was a mere preparatory consecration to the kingdom of the Messiah; while for Jesus it was a direct and immediate consecration, by means of which he manifested the commencement of his career as the founder of the new theocracy, which began at the very moment of his baptism, the initiatory character of which constituted its general principle and tendency.

With respect to the *miraculous incidents which accompanied the baptism of Jesus*, if we take for our starting-point the narration of the three first Gospels, that the Holy Spirit really and visibly descended in the form of a dove, and proclaimed Jesus, in an audible voice, to be the Son of God, there can be no difficulty in bringing it to harmonize with the statement in the Gospel of John. This literal sense of the text has, indeed, for a long time been the prevailing interpretation, though many doubts respecting it had very early forced themselves on the minds of sober inquirers, traces of which are to be found in Origen, and which Strauss has more elaborately renewed. To the natural explanations beyond that of Paulus, that the dove was a *real* one, which had by chance flown near the spot at that moment; that of Meyer, that it was the figure

of a meteor which was just then visible in the sky; and that of Kuinoel (*ad Matth.* iii.), who considers the dove as a figure for lightning, and the voice for that of thunder, which the eye-witnesses, in their extatic feelings, considered as a divine voice, such as the Jews called a *Bath-kol* (Meyer). Such interpretations are not only irreconcilable with the evangelical text, but even presuppose a violation of the common order of nature, in favour of adherence to which these interpretations are advanced.

A more close investigation of the subject, however, induces us to take as a starting-point the account of the Apostle St. John. It is John the Baptist himself who speaks. He was an eye-witness, nay, to judge from Matthew and John, the only one present with Jesus, and is consequently the only source—with or without Christ—of information. Indeed, if there were more people present, as we are almost inclined to infer from Luke, they cannot have perceived the miracles attending the baptism of Jesus, or John and Christ would no doubt have appealed to their testimony in verification of them.

In thus taking the statement in St. John for the authentic basis of the whole history, a few slight hints in it may afford us the means of solving the difficulties attending the *literal* conception of the text. John the Baptist knows nothing of an external and audible voice, and when he assures us (i. 33) that he had in the Spirit received the promise, that the Messiah would be made manifest by the Spirit descending upon him, and *remaining*—be it *upon* or *in* him—there; this very *remaining* assuredly precludes any material appearance in the shape of a bird. The internal probability of the text, therefore, speaks in favour of a spiritual vision in the mind of the Baptist; this view is still more strengthened by the fact, that Luke supposes there were many more present, who notwithstanding perceived nothing at all of the miraculous incidents. The reason that the Spirit in the vision assumed the figure of a dove, we would rather seek in the peculiar flight and movement of that bird, than in its form and shape. This interpretation moreover has the advantage of exhibiting the philosophic connection of the incidents, since the Baptist appears more conspicuously as the immediate end of the divine dispensation. Christ had thus the intention of being introduced by him into the Messianic sphere of operation, while the Baptist recognises this to be his own peculiar calling: the signs by which he was to know the Messiah had been intimated to him, and now that they had come to pass, the prophecy and his mission were fulfilled.

None of the Evangelists give any authority for the common tradition that the descent of the Spirit upon Christ was sensibly witnessed by the *multitude*. Matthew simply states that the vision appeared to Christ; Mark adds that the Spirit appeared to him 'as a dove descending upon him'; Luke, more generally, states only the fact of the Spirit's descent in a sensible form; and John informs us that besides Christ this vision was witnessed also by the Baptist.

CHRISTIAN BAPTISM.—Jesus, having undergone baptism as the founder of the new kingdom, ordained it as a legal act by which individuals were to obtain the rights of citizens therein.

Though he caused many to be baptized by his disciples (John iv. 1, 2), yet *all* were not baptized who were converted to him; neither was it even necessary after they had obtained participation in him by his personal choice and forgiving of sin. But when he could no longer personally and immediately choose and receive members of his kingdom, when at the same time all had been accomplished which the founder thought necessary for its completion, he gave power to the spiritual community to receive, in his stead, members by *baptism* (Matt. xxviii. 19; Mark xvi. 16). Baptism essentially denotes the regenerating of him who receives it, his participation both in the divine life of Christ and the promises rested on it, as well as his reception as a member of the Christian community.

Each of these momentous points implies all the rest; and the germ of all is contained in the words of Christ (Matt. xxviii. 19). The details are variously digested by the Apostles according to their peculiar modes of thinking. John dwells—in like manner as he does on the holy communion—almost exclusively on the internal nature of baptism, the immediate mystical union of the Spirit with Christ; baptism is with him equivalent to 'being born again' (John iii. 3, 7). Paul gives more explicitly and completely the other points also. He understands by it not only the union of the individual with the Head, by the giving one's self up to the Redeemer and the receiving of his life (Gal. iii. 27), but also the union with the other members (*ib.* 28; 1 Cor. xii. 13; Ephes. iv. 5; v. 26). He expresses a spiritual purport by saying that it intimates on the part of those who have received it, their being joined with Christ in his death and raised with him in his resurrection.

As regards the *design* of Christian Baptism, different views have been adopted by different parties. The principal are the following:—

1. *That it is a direct instrument of grace*; the application of water to the person by a properly qualified functionary being regarded as the appointed vehicle by which God bestows regenerating grace upon men. This is the Romanist and Anglo-Catholic view.

2. *That though not an instrument it is a seal of grace*; divine blessings being thereby confirmed and obnoxious to the individual. This is the doctrine of the Confessors of the majority of the Reformed Churches.

3. *That it is neither an instrument nor a seal of grace, but simply a ceremony of initiation into Church membership*. This is the Socinian view of the ordinance.

4. *That it is a token of regeneration*; to be received only by those who give evidence of being really regenerated. This is the view adopted by the Baptists.

5. *That it is a symbol of purification*; the use of which simply announces that the religion of Christ is a purifying religion, and intimates that the party receiving the rite assumes the profession, and is to be instructed in the principles, of that religion. This opinion is extensively entertained amongst the Congregationalists of England.

Differences of opinion have also been introduced respecting the proper *mode* of baptism. Some contend that it should be by *immersion*

alone; others, that it should be only by *affusion* or *sprinkling*; and others, that it matters not in which way it be done, the only thing required being the ritual application of water to the person. The first class appeal to the use of *baptizo* by the classical authors, with whom they affirm it is always used in the sense of *dipping* or *immersing*; and to such expressions as 'being buried with Christ in baptism,' &c., where they understand an allusion to a typical burial, by submersion in water. The second class rely upon the usage of *baptizo* by the sacred writers, who, they allege, employ it frequently where immersion is not to be supposed, as when they speak of 'baptism with fire,' and 'baptism with the Spirit,' upon the alleged impossibility of immersing such multitudes as we learn were baptized at once in Jerusalem on the day of Pentecost; upon the supposed improbability of an Eastern female like Lydia allowing herself to be publicly immersed by a man whom she had never seen before; upon the language used by Paul at Philippi, when he commanded water to be *brought* into the room, that he might baptize the jailor and his family, language which, it is said, cannot be understood of such a quantity of water as would be required to immerse in succession a whole household; and upon the use of the term *baptism*, to designate what is elsewhere spoken of as the *outpouring* of the Spirit. The third class maintain, that according to universal usage *baptizo* signifies simply *to wet*, and that the following preposition determines whether it is to be taken in the sense of wetting by immersion or not; they urge especially that the word as used in the New Testament possesses so much of a *technical* character, that it is not possible from it to deduce any correct inference as to the *mode* of baptizing; and they adduce historical evidence to show that baptism was performed indifferently by immersion or affusion as convenience dictated.

In fine, differences of opinion have arisen respecting the proper *subjects* of baptism. Here also we have three classes.

1. Those who maintain that baptism is to be administered only to those who believe and give evidence of being regenerated. This opinion is grounded chiefly upon the positions that, Repentance and Faith are distinctly prescribed in the New Testament as conditions of baptism, and the alleged fact that the Apostles did not baptize any, until satisfied that they sincerely believed. It is urged also by the advocates of this opinion, against the practice of infant baptism, that not only are infants excluded from baptism by their inability to comply with the required terms, but that they are virtually excluded by their baptism not being expressly enjoined in the New Testament. It is also alleged that infant baptism was unknown to the Early Church, and was a corrupt invention of the patristic age.

2. Those who contend that baptism is to be administered not only to believers who have not been before baptized, but to the infant offspring of believers. This opinion is chiefly based on the covenant established by God with Abraham. This covenant it is maintained was the everlasting covenant, the covenant of grace; under it a connection of a spiritual kind was recognised as existing between parents and their children; in

virtue of this the latter received the sign of the covenanted blessings; no evidence can be adduced that this divinely-appointed connection has been abrogated, though the sign of the covenant has been changed; on the contrary, there is abundant evidence to show that the Apostles administered to the children of converts to Christianity the same rite, that of baptism, which they administered to the converts themselves. It is also affirmed by this party that the requiring of faith and repentance as a condition of baptism in the case of adults cannot be fairly held as including children, inasmuch as by the same reasoning children dying in infancy would be excluded from salvation. It is denied that the absence of any express injunction to baptize children virtually prohibits their baptism; and the assertion that infant baptism was unknown in the primitive age is rebutted by historical evidence.

3. Those who assert that baptism is to be administered to all who either will place themselves under Christian instruction, such as adults who have grown up as heathens, Jews, or infidels; or who may be thus placed by their parents or guardians, such as infants. In support of this view, stress is laid upon our Lord's words when he commanded his Apostles to go and teach and baptize *all nations*; the 'baptizing' being regarded as associated with the 'teaching' and commensurate with it, whilst what is said about 'believing' is regarded as relating to something which may or may not follow the teaching and baptizing, but which is declared to be essential to salvation. It is argued that the Apostolic practice was altogether in accordance with this view of our Lord's commission, inasmuch as the multitudes frequently baptized by the Apostles were such, that to obtain satisfactory evidence of the knowledge and piety of each individual was impossible in the time which elapsed between the Apostles' preaching and the baptizing to which it led; whilst such cases as those of Simon Magus and the Philippian Jailor show that even very ignorant men, and men who could not possibly give what any person would receive as credible evidence of piety, were at once baptized. The practice of the Apostles also in baptizing whole households, including children and servants, without asking any questions as to their knowledge and belief, is urged in favour of this opinion, as well as the corresponding practice of the Church.

BAPTISM FOR THE DEAD.—Paul (1 Cor. xv. 29) uses this phrase. Few passages have undergone more numerous and arbitrary emendations than this text. We shall examine first—

A. *Those interpretations which take it to be some particular application of baptism.*

1. Some imagine that Paul speaks of a baptism which a living man receives in the place of a dead one.

Various passages have been quoted from the fathers in support of this opinion; but all we can infer from their statements is, that baptism by substitution had taken place among the Marcionites, and perhaps also among the Cerinthians and other smaller sects towards the end of the fourth century; but that it existed between that period and the time when Paul wrote the above passage is wholly unsubstantiated.

The idea, then, that such a superstitious custom

existed in the Corinthian community is devoid of all historical evidence.

The difficulties will still more increase, if we were to admit, with Olshausen, Rückert, and De Wette, that the Apostle approved of the absurd practice in question, since he would thus be brought into contradiction with his own principles on the importance of faith and external works, which he develops in his Epistle to the Galatians. In the words of Paul we discover no opinion of his own concerning the justice or injustice of the rite; it is merely brought in as an *argumentum ex concessis* in favour of the object which he pursues through the whole chapter (comp. 1 Cor. ii. 5). However much may be objected against this interpretation, it is by far more reasonable than the explanations given by other critics. The Corinthian community was certainly of a mixed character, consisting of individuals of various views, ways of thinking, and different stages of education: so that there might still have existed a small number among them capable of such absurdities. We are not sufficiently acquainted with all the particulars of the case to maintain the contrary, while the simple grammatical sense of the passage is decidedly in favour of the proposed interpretation.

2. Origen, Luther, Chemnitz, and Joh. Gerhard, interpret the words as relating to baptism over the graves of the members of the community, a favourite *rendezvous* of the early Christians. Luther says that in order to strengthen their faith in the resurrection, the Christians baptized over the tombs of the dead. But the custom alluded to dates from a much later period.

3. Epiphanius mentions also a view, according to which the word rendered 'dead' is to be translated *mortally ill* persons whose baptism was expedited by sprinkling water upon them on their death-bed, instead of immersing them in the usual way; the rite is known under the name of *baptismus clinicus, lectualis*. But few of the modern theologians (among whom, however, are Calvin and Estius) advocate this view, which transgresses not less against the words of the text than against all historical knowledge of the subject.

4. *The interpretations which suppose that the text speaks of general church baptism.* To these belongs the oldest opinion we know of, given in Tertullian, according to which the Greek word rendered 'for' is here taken in the sense of *on account of*, and the word rendered 'the dead' in that of *dead bodies*, they themselves, the baptized, as dead persons. The notion which lies at the bottom of this version is, that the body possesses a guarantee for resurrection in the act of baptism, in which it also shares. The sinking under and rising up is with them a symbol of burying and resurrection.

2. A later view, expressed by Chrysostom, adopts the same meaning as regards 'the dead,' but construes the whole clause 'in behalf of the dead,' to signify 'in the belief of the resurrection of the dead.' This ungrammatical version is adopted by Theophylact: 'Why are men baptized at all in behalf of resurrection, that is, in expectation of resurrection, if the dead rise not?'

3. Pelagius, Olearius, Fabricius, are of opinion that the phrase 'on account of the dead,' or 'of those who are dead,' although strictly plural,

here alludes to an individual, namely, to Christ, 'on account of whom' we are baptized, alluding to Rom. vi. 3.

4. Among the best interpretations is that of Spanheim and Joh. Christ. Wolf. They consider 'the dead' to be martyrs and other believers, who, by firmness and cheerful hope of resurrection, have given in death a worthy example, by which others were also animated to receive baptism. Still this meaning would be almost too briefly and enigmatically expressed, when no particular reason for it is known, while also the allusion to the exemplary death of many Christians could chiefly apply to the martyrs alone, of whom there were as yet none at Corinth.

5. Olhausen's interpretation is of a rather doubtful character. The meaning of the passage he takes to be, that 'all who are converted to the church are baptized—for the good of the dead, as it requires a certain number (Rom. xi. 12-25), a "fullness" of believers, before the resurrection can take place. Every one therefore who is baptized is so for the good of believers collectively, and of those who have already died in the Lord.' Olhausen is himself aware that the Apostle could not have expected that such a difficult and remote idea, which he himself calls 'a mystery,' would be understood by his readers without a further explanation and development of his doctrine. He therefore proposes an explanation, in which it is argued that the miseries and hardships Christians have to struggle against in this life can only be compensated by resurrection. Death causes, as it were, vacancies in the full ranks of the believers, which are again filled up by other individuals. 'What would it profit those who are baptized in the place of the dead (to fill up their place in the community) if there be no resurrection?'

BAR, a Hebrew word meaning *son*, but used only poetically in that language (Ps. ii. 12; Prov. xxi. 2). In Syriac, however, *Bar* answered to the more common Hebrew word for son, i. e. *ben*; and hence in later times, in the New Testament, it takes the same place in the formation of proper names which *Ben* had formerly occupied in the Old Testament.

BARAB'BAS, a person who had forfeited his life for sedition and murder (Mark xv. 7; Luke xxiii. 25). As a rebel, he was subject to the punishment laid down by the Roman law for such political offences; while, as a murderer, he could not escape death even by the civil code of the Jews. But the latter were so bent on the death of Jesus, that, of the two, they preferred pardoning this double criminal (Matt. xxvii. 16-26; Mark xv. 7-15; Luke xxiii. 18-25; John xviii. 40).

BARACHI'AS, father of the Zechariah (Zecharias) mentioned in Matt. xxiii. 35 [ZECHARIAH].

BAR'AK, *lightning*; son of Abinoam of Kadesh-Naphtali, a Galilean city of refuge in the tribe of Naphtali (Judg. iv. 6; comp. Josh. xix. 37; xxi. 32). He was summoned by the prophetess Deborah to take the field against the hostile army of the Canaanitish king Jabin, commanded by Sisera, with 10,000 men from the tribes of Naphtali and Zebulun, and to encamp on Mount Tabor, probably because the 900 chariots of iron (Judg. iv. 3), in which the main force of Sisera consisted, could not so easily manoeuvre on uneven ground. After some hesi-

tation, he resolved to do her bidding, on condition that she would go with him, which she readily promised. Confiding, therefore, in the God of Israel, he attacked the hostile army by surprise, put them to flight, and routed them to the last man. In conjunction with Deborah, he afterwards composed a song of victory in commemoration of that event (Judg. v. 14, 15, 16).

BARBARIAN. This term is used in the New Testament, as in classical writers, to denote other nations of the earth in distinction from the Greeks. 'I am debtor both to the Greeks and Barbarians.' In Coloss. iii. 11, 'Greek nor Jew—Barbarian, Scythian'—*Barbarian* seems to refer to those nations of the Roman empire who did not speak Greek, and *Scythian* to nations not under the Roman dominion. In 1 Cor. xiv. 11 the term is applied to a difference of language: 'If I know not the meaning of the voice, I shall be unto him that speaketh a barbarian ('as of another language,' *Geneva Vers.*), and he that speaketh shall be a barbarian ('as of another language,' *Geneva Vers.*) unto me.' Strabo (xiv. 2) suggests that the word *Bar-bar-os* was originally an imitative sound, designed to express a harsh dissonant language, or sometimes the indistinct articulation of the Greek by foreigners.

BAR-JESUS. [ELYMAS.]

BAR-JONA (*son of Jonas*), the patronymic appellation of the Apostle Peter (Matt. xvi. 17).

BARLEY. This grain is mentioned in Scripture as cultivated and used in Egypt (Exod. ix. 31), and in Palestine (Lev. xxvii. 16; Deut. viii. 8; 2 Chron. ii. 10; Ruth ii. 17; 2 Sam. xiv. 30; Isa. xxviii. 25; Jer. xli. 8; Joel i. 11). Barley was given to cattle, especially horses (1 Kings iv. 28), and was indeed the only corn grain given to them, as oats and rye were unknown to the Hebrews, and are not now grown in Palestine. This is still the chief use of barley in Western Asia. Bread made of barley was, however, used by the poorer classes (Judg. vii. 13; 2 Kings iv. 42; John vi. 9, 13; comp. Ezek. iv. 9). In Palestine barley was for the most part sown at the time of the autumnal rains, October—November, and again in early spring, or rather as soon as the depth of winter had passed. The barley of the first crop was ready by the time of the Passover, in the month Abib, March—April (Ruth i. 22; 2 Sam. xxi. 9; Judith viii. 2); April is the month in which the barley-harvest is chiefly gathered in, although it begins earlier in some parts and later in others.

In Exod. ix. 31, we are told that the plague of hail, some time before the Passover, destroyed the barley, which was then in the green ear; but not the wheat or the rye, which were only in the blade. This is minutely corroborated by the fact that the barley sown after the inundation is reaped, some after ninety days, some in the fourth month, and that it there ripens a month earlier than the wheat.

BARNABAS. His name was originally *Joses*, or *Joseph* (Acts iv. 36), but he received from the Apostles the surname of Barnabas, which signifies the *Son of Prophecy*. Luke interprets it by *Son of Exhortation*. It can hardly be doubted that this name was given to Joses to denote his eminence as a Christian teacher. He is described by Luke as 'a good man, full of the Holy Ghost and of faith' (Acts xi. 24). He was a native of

Cyprus, but the son of Jewish parents of the tribe of Levi. From Acts iv. 36, 37, it appears that he was possessed of land, but whether in Judaea or Cyprus is not stated. He generously disposed of the whole for the benefit of the Christian community, and 'laid the money at the Apostles' feet.' As this transaction occurred soon after the day of Pentecost, he must have been an early convert to the Christian faith.

When Paul made his first appearance in Jerusalem after his conversion, Barnabas introduced him to the Apostles, and attested his sincerity (Acts ix. 27). Though the conversion of Cornelius and his household, with its attendant circumstances, had given the Jewish Christians clearer views of the comprehensive character of the new dispensation, yet the accession of a large number of Gentiles to the church at Antioch was an event so extraordinary, that the Apostles and brethren at Jerusalem resolved on deputing one of their number to investigate it. Their choice was fixed on Barnabas. After witnessing the flourishing condition of the church, and adding fresh converts by his personal exertions, he visited Tarsus to obtain the assistance of Saul, who returned with him to Antioch, where they laboured for a whole year (Acts xi. 23-26). In anticipation of the famine predicted by Agabus, the Antiochian Christians made a contribution for their poorer brethren at Jerusalem, and sent it by the hands of Barnabas and Saul (Acts xi. 28-30), who speedily returned, bringing with them John Mark, a nephew of the former. By divine direction (Acts xiii. 2) they were separated to the office of missionaries, and as such visited Cyprus and some of the principal cities in Asia Minor (Acts xiii. 14). Soon after their return to Antioch, the peace of the church was disturbed by certain zealots from Judaea, who insisted on the observance of the rite of circumcision by the Gentile converts. To settle the controversy, Paul and Barnabas were deputed to consult the Apostles and elders at Jerusalem (Acts xv. 1, 2); they returned to communicate the result of their conference (ver. 22), accompanied by Judas Barsabas and Silas, or Silvanus. On preparing for a second missionary tour, a dispute arose between them on account of John Mark, which ended in their taking different routes; Paul and Silas went through Syria and Cilicia, while Barnabas and his nephew revisited his native island (Acts xv. 36-41). At this point Barnabas disappears from Luke's narrative, which to its close is occupied solely with the labours and sufferings of Paul. From the Epistles of the latter a few hints (the only authentic sources of information) may be gleaned relative to his early friend and associate. From 1 Cor. ix. 5, 6, it would appear that Barnabas was unmarried, and supported himself, like Paul, by some manual occupation. In Gal. ii. 1, we have an account of the reception given to Paul and Barnabas by the Apostles at Jerusalem, probably on the occasion mentioned in Acts xv. In the same chapter (ver. 13) we are informed that Barnabas so far yielded to the Judaizing zealots at Antioch, as to separate himself for a time from communion with the Gentile converts. Respecting the later years of Barnabas we have no authentic information. The year when he died cannot be determined with certainty; if his nephew, as some have supposed, joined Paul

after that event, it must have taken place not later than A.D. 63 or 64.

BARENNESS is, in the East, the hardest lot that can befall a woman, and was considered among the Israelites as the heaviest punishment with which the Lord could visit a female (Gen. xvi. 2; xxx. 1-23; 1 Sam. i. 6, 29; Isa. xlvii. 9; xlix. 21; Luke i. 25). This general notion of the disgrace of barrenness in a woman may early have given rise, in the patriarchal age, to the custom among barren wives of introducing to their husbands their maid-servants, and of regarding the children born in that concubinage as their own, by which they thought to cover their own disgrace of barrenness (Gen. xvi. 2; xxx. 3).

BAR'SABAS. [JOSEPH BAR'SABAS; JUDAS BAR'SABAS.]

BARTHOLOMEW (*the son of Tolmai*, 2 Sam. xiii. 37) was one of the twelve Apostles, and is generally supposed to have been the same individual who in John's Gospel is called Nathanael. The reason of this opinion is, that in the three first Gospels Philip and Bartholomew are constantly named together, while Nathanael is nowhere mentioned; on the contrary, in the fourth Gospel the names of Philip and Nathanael are similarly combined, but nothing is said of Bartholomew. Nathanael therefore must be considered as his real name, while Bartholomew merely expresses his filial relation. He was a native of Cana in Galilee (John xxi. 2). He was introduced by Philip to Jesus, who, on seeing him approach, at once pronounced that eulogy on his character which has made his name almost synonymous with sincerity: 'Behold an Israelite indeed, in whom there is no guile' (John i. 47). He was one of the disciples to whom our Lord appeared after his resurrection, at the Sea of Tiberias (John xxi. 2); he was also a witness of the Ascension, and returned with the other Apostles to Jerusalem (Acts i. 4, 12, 13). Of his subsequent history we have little more than vague traditions.

BARTIMEUS, *son of Timeus*, the blind beggar of Jericho whom Christ restored to sight (Mark x. 46).

BARUCH, *blessed*; the faithful friend and amanuensis of the prophet Jeremiah, was of a noble family of the tribe of Judah, and generally considered to be the brother of the prophet Seraiah, both being represented as sons of Neriah; and to Baruch the prophet Jeremiah dictated all his oracles. During the siege of Jerusalem, Baruch was selected as the depositary of the deed of purchase which Jeremiah had made of the territory of Hanameel, to which deed he had been a witness. In the fourth year of the reign of Jehoiachin, king of Judah (B.C. 605), Baruch was directed to write all the prophecies delivered by Jeremiah up to that period, and to read them to the people, which he did from a window in the Temple upon two solemn occasions. He afterwards read them before the counsellors of the king at a private interview, when Baruch being asked to give an account of the manner in which the prophecy had been composed, gave an exact description of the mode in which he had taken it down from the prophet's dictation. Upon this they ordered him to leave the roll, advising that he and Jeremiah should conceal themselves. They then informed the king of what had taken

place, upon which he had the roll read to him; but, after hearing a part of it, he cut it with a penknife, and, notwithstanding the remonstrances of his counsellors, threw it into the fire of his winter parlour, where he was sitting. He then ordered Jeremiah and Baruch to be seized, but they could not be found. The Jews to this day commemorate the burning of this roll by an annual fast. Another roll was now written by Baruch from the prophet's dictation, containing all that was in the former, with some additions, the most remarkable of which is the prophecy respecting the ruin of Jehoiachim and his house, as the punishment of his impious act. This roll is the prophecy of Jeremiah which we now possess. Baruch, being himself terrified at the threats contained in the prophetic roll, received the comforting assurance that he would himself be delivered from the calamities which should befall Judah and Jerusalem. After the capture of Jerusalem, in the eleventh year of the reign of king Zedekiah, when the Jews, after their return from Babylon, obstinately persisted in their determination to migrate to Egypt, against the remonstrances of the prophet, both Baruch and Jeremiah accompanied them to that country, where they remained until the death of Jeremiah. There is no account in Scripture of Baruch's return from Egypt, but the Rabbins allege that he died in Babylon, in the twelfth year of the exile. Josephus asserts that he was well skilled in the Hebrew language; and that, after the taking of Jerusalem, Nebuzaradan treated Baruch with consideration, from respect to Jeremiah, whose misfortunes he had shared, and whom he had accompanied to prison and exile (*Antiq.* x. 11).

BARUCH, BOOK OF (ΑΠΟΚΡΥΦΑ), follows next after the book of Jeremiah in the Septuagint Version. Several learned writers strongly contend for its canonicity; but the weight of evidence is generally believed to preponderate against it.

The subject of the book is (1) an exhortation to wisdom and a due observance of the law. (2) It then introduces Jerusalem as a widow, comforting her children with the hope of a return. (3) An answer follows in confirmation of this hope. A prologue is prefixed, stating that Baruch had read his book to Jeremiah and the people in Babylon by the river Sud (Euphrates), by which the people were brought to repentance, and sent the book with a letter and presents to Jerusalem.

BARZIL/LAI, a wealthy old Gileadite of Rogelim, who distinguished himself by his loyalty when David fled beyond the Jordan from his son Absalom. He sent in a liberal supply of provisions, beds, and other conveniences for the use of the king's followers (2 Sam. xvii. 27; xix. 32). On the king's triumphant return, Barzillai attended him as far as the Jordan, but declined, by reason of his advanced age, to proceed to Jerusalem and receive the favours to which he had entitled himself.

BASHAN, a name which probably denotes the peculiar fertility of the soil. The sacred writers include in Bashan that part of the country eastward of the Jordan which was given to half the tribe of Manasseh, situated to the north of Gilead. The first notice of this country is in Gen. xiv. 5; compare with Josh. xii. 4. When the Israelites invaded the Promised Land, Argob, a province of

Bashan, contained 'sixty fenced cities, with walls and gates and brazen bars, besides unwalled towns a great many' (Deut. iii. 4, 5; 1 Kings iv. 13). These were all taken by the Israelites, and Og and his people utterly destroyed. Golan, one of the cities of refuge, was situated in this country (Deut. iv. 43; Josh. xx. 8; xxi. 27). Solomon appointed twelve officers to furnish the monthly supplies for the royal household, and allotted the region of Argob to the son of Geber (1 Kings iv. 13). Towards the close of Jehu's reign Hazael invaded the land of Israel, and smote the whole eastern territory, 'even Gilead and Bashan' (2 Kings x. 33); but after his death the cities he had taken were recovered by Jehoash (Josh. x. 25), who defeated the Syrians in three battles, as Elisha had predicted (2 Kings xiii. 19). After the captivity the name Batanea was applied to only a part of the ancient Bashan; the rest being called Trachonitis, Ananitis, and Gaulanitis. All these provinces were granted by Augustus to Herod the Great, and on his death Batanea formed a part of Philip's tetrarchy. At his decease, A.D. 34, it was annexed, by Tiberius, to the province of Syria; but in A.D. 37 it was given by Caligula to Herod Agrippa, the son of Aristobolus, with the title of king (Acts xii. 1). From the time of Agrippa's death, in A.D. 44, to A.D. 53, the government again reverted to the Romans, but it was then restored by Claudius to Agrippa II. (Acts xxv. 13). The richness of the pasture-land of Bashan, and the consequent superiority of its breed of cattle, are frequently alluded to in the Scriptures. We read in Deut. xxxii. 14, of 'rams of the breed of Bashan' (Ezek. xxxix. 18). 'Rams, lambs, bulls, goats, all of them fattings of Bashan.' The oaks of Bashan are mentioned in connection with the cedars of Lebanon (Isa. ii. 13; Zech. xi. 2). In Ezekiel's description of the wealth and magnificence of Tyre it is said, 'Of the oaks of Bashan have they made their oars' (xxvii. 6). The ancient commentators on Amos iv. 1, 'the kine of Bashan,' Jerome, Theodoret, and Cyril, speak in the strongest terms of the exuberant fertility of Bashan, and modern travellers corroborate their assertions.

BASKET. There are several words in the Hebrew Scriptures by which different kinds of baskets appear to be indicated:—

1. DUD, which occurs in 2 Kings x. 7, where the heads of Ahab's sons are sent from Samaria to Jezreel in baskets; Jer. xxiv. 2, as containing figs; and Ps. lxxxi. 6 (rendered *pots*), also as containing figs; where, therefore, deliverance from the baskets means deliverance from the

ondage of carrying burdens in baskets. In fact, very heavy burdens were thus carried in Egypt, as corn in very large baskets from the field to the threshing-floor, and from the threshing-floor to the granaries. They were carried between two men by a pole resting on their *shoulders*; which agrees with the previous clause of the cited text, 'I removed his shoulder from the burden.' This labour and form of the basket are often shown in the Egyptian sculptures.

2. *TERA*, which occurs in connection with agricultural objects, 'the basket and the store' (Deut. xxvi. 2-4; xxviii. 15-17), and would therefore appear to have been somewhat similar to the above; and, in fact, the Egyptian sculptures show different baskets applied to this use.

3. *KILUB*. From the etymology, this appears to have been an interwoven basket, made of leaves or rushes. In Lev. v. 27, however, it is used for a bird-cage, which must have been of open work, and probably not unlike our own ricker bird-cages. The name is also applied to fruit-baskets (Amos viii. 1, 2). Egyptian examples of which are presented in figs. 2 and 4 which contain pomegranates) of the annexed cut.

83. [Ancient Egyptian.]

4. *SALSILLOTH*, occurs only in Jer. vi. 9, where it obviously denotes baskets in which grapes were deposited as they were gathered. The form of the baskets used for this purpose is often shown on the Egyptian monuments, and is similar to that represented in fig. 4, cut 83.

5. In all the other places where the word basket occurs, we are doubtless to understand a basket made of rushes, similar both in form and material to those used by carpenters for carrying their tools. This is still the common kind of basket throughout Western Asia; and its use in ancient Egypt is shown by an actual specimen which was found in a tomb at Thebes, and which is now in the British Museum. It was, in fact, a carpenter's basket, and contained his tools (fig. 1, cut 83).

The specimens of Egyptian baskets in the British Museum, represented in our cut, convey a favourable idea of the basket-work of ancient times. Some of these are worked ornamentally with colours (figs. 3, 5, cut 83). And besides these the monuments exhibit a large variety of hand-baskets, of different shapes, and so extensively employed as to show the numerous applications of basket-work in the remote times to which these representations extend. They are mostly manufactured, the stronger and larger

sorts of the fibres, and the finer of the leaves of the palm-tree, and not infrequently of rushes, but more seldom of reeds.

BASTARD (Deut. xxiii. 2, and Zech. ix. 6). Some understand by this word the offspring of prostitutes, but they forget that prostitutes were expressly forbidden to be tolerated by the law of Moses (Lev. xix. 29; Deut. xxiii. 17). The most probable conjecture is that which applies the term to the offspring of heathen prostitutes in the neighbourhood of Palestine; since no provision was made by Moses against their toleration, and who were a sort of priestesses to the Syrian goddess Astarte (comp. Num. xxv. 1, sq; Hos. iv. 14; 1 Kings xiv. 24; xv. 12; xxii. 47; 2 Kings xxiii. 7).

That there existed such bastard offspring among the Jews, is proved by the history of Jephthah (Judg. xi. 1-7), who on this account was expelled, and deprived of his patrimony.

BAT occurs in Lev. xi. 19; Deut. xiv. 18. Isa. ii. 20; and Baruch vi. 22. In Hebrew the word implies flying in the dark; which, taken in connection with the sentence 'moreover the owl and every creeping thing that flieth is unclean unto you; they shall not be eaten,' is so clear, that there cannot be a mistake respecting the order of animals meant. At first sight, animals so diminutive, lean, and repugnant to the senses, must appear scarcely to have required the legislator's attention; but the fact evidently shows that there were at the time men or tribes who ate animals classed with bats, a practice still in vogue in the great Australasian islands, where the frugivorous Pteropi of the harpi or goblin family, by our seamen denominated flying-dogs, and erroneously vampires, are caught and eaten; but where the insectivorous true bats, such as the genera common in Europe, are rejected. Some of the species of harpies are of the bulk of a rat, with from three to four feet of expanse between the tips of the wings; they have a fierce dog-like head, and are nearly all marked with a space of rufous hair from the forehead over the neck and along part of the back. They reside in the most dense foliage of large trees, whence they fly out at night and do considerable damage to the plantations of fruit-trees. It was to one or more species of this section of Chiroptera that the Mosaic prohibition was perhaps directed; and it is likewise to them that may be referred the foundation of the ancient legends concerning harpies, which, however much they may be distorted, have a basis of truth. Indeed, when we consider their voice, the faculty they have of feeding with their thumbs, their formidable teeth, their habit of flying in the day during dark weather, and their willingness, though they are frugivorous, to devour not only insects, but also the blood and flesh of small animals, we may admit that originally they were more daring in the presence of man; that their true characters are but moderately amplified by poetical fancy; and that the Mosaic injunction was strikingly appropriate.

In the text of Scripture where allusion is made to caverns and dark places, true *Vespertilionidæ*, or insect-eating bats, similar to the European, are clearly designated.

BATH-SHERA, also *BATH-SHERA*, daughter of Eliam, grand-daughter of Ahitophel, and wife of Uriah; she was seduced and became pregnant

by King David during the absence of her husband, who was then engaged at the siege of Rabbah (2 Sam. xi. 4, 5; Ps. li. 2). The child thus born in adultery became ill and died (2 Sam. xii. 15-18). After the lapse of the period of mourning for her husband, who was slain by the contrivance of David (xi. 15), she was legally married to the king (xi. 27), and bore him Solomon (xii. 24; 1 Kings i. 11; ii. 13). In 1 Chron. iii. 5, she is called Bath-shua instead of Bath-sheba; and her father Ammiel, instead of Eliam (comp. Matt. i. 6). The other children of Bath-sheba are named in 2 Sam. v. 14; 1 Chron. iii. 5. She is afterwards mentioned only in consequence of her good-natured intercession for Adonijah, which incidentally displays the respect with which she was treated by king Solomon, her son (1 Kings ii. 19). [DAVID; ADONIJAH.]

BATTLE, SYSTEM OF. Though the Hebrews in their mode of conducting warlike operations varied somewhat in the course of ages, and are elsewhere shown to have been swayed by the practice of greater and more military nations, still, from the period when the institution of royalty gave rise to an organized system, it was a maxim to spare the soldiers all unnecessary fatigue before an engagement, and to supply them liberally with food. Their arms were enjoined to be in the best order, and when drawn up for battle they formed a line of solid squares of a hundred men, each square being ten deep, and with sufficient interval between them to allow of facility in movements, and for the slingers to pass through. The archers may have occupied the two flanks, or formed in the rear, according to the intentions of the commander on the occasion; but the slingers were always stationed in the rear until they were ordered forward to impede a hostile approach, or to commence an engagement somewhat in the manner of modern skirmishers. Meantime, while the trumpets waited to sound the last signal, the king, or his representative, appeared in his sacred dress, except when he wished to remain unknown, as at Megiddo (2 Chron. xxxv. 22), and proceeded to make the final dispositions, in the middle of his chosen braves, attended by priests who, by their exhortations, animated the ranks within hearing. It was now, we may suppose, when the enemy was at hand, that the slingers would be ordered to pass between the intervals of the line of solid squares, open their order, and with shouts, let fly their stone or leaden missiles, until by the gradual approach of the opposing fronts they would be hemmed in, and be recalled to the rear, or to cover a flank. Then would come the signal to charge, and the great shout of battle; the heavy infantry, receiving the order to attack, would press direct upon the front of the enemy, under cover of their shields and levelled spears; the rear ranks might then, if so armed, cast their second darts, and archers from their rear shoot high, so as to pitch the arrows over their own main line of spearmen into the dense masses beyond them. If the enemy broke through the intervals, we may imagine that a line of charioteers in reserve, breaking from their position, might in part charge among the disordered ranks of the foe, drive them back, and facilitate the restoration of the oppressed masses,

or wheeling round a flank, fall upon the enemy, or be encountered by a similar manœuvre, and perhaps repulsed. The king, meanwhile, surrounded by his princes, posted close to the rear of his line of battle, and in the middle of the showered missiles, would watch the enemy and remedy every disorder. Thus it was that several of the sovereigns of Judah were slain (2 Chron. xviii. 33, and xxxv. 23), and that such an enormous waste of human life took place: for the shock of two hostile lines of masses at least ten in depth, advancing under the confidence of breastplate and shield, when once engaged hand to hand, had difficulties of no ordinary nature to retreat; because the hindmost ranks not feeling personally the first slaughter, would not, and the foremost could not, fall back; neither could the commanders disengage the line without a certainty of being defeated. The fate of the day was therefore no longer within the control of the chief, and nothing but obstinate valour was left to decide the victory. Under such circumstances defeat led to irretrievable confusion; and where either party possessed superiority in cavalry and chariots of war, it would be materially increased: but where the infantry alone had principally to pursue a broken enemy, that force, laden with shields, and preserving order, could overtake very few who chose to abandon their defensive armour, unless they were hemmed in by the locality. Sometimes a part of the army was posted in ambush, but this manœuvre was most commonly practised against the garrisons of cities (Josh. viii. 12; Judg. xx. 38). In the case of Abraham (Gen. xiv. 16), when he led a small body of his own people suddenly collected, and fell upon the guard of the captives, released them, and recovered the booty, it was a surprise, not an ambush; nor is it necessary that he should have fallen in with the main army of the enemy. At a later period, there is no doubt the Hebrew armies, in imitation of the Romans, formed into more than one line of masses; but, it may be added, there is ample evidence that they always possessed more stubborn valour than discipline.

BATTEMENT. [HOUSE.]

BAY-TREE, or LAUREL. This word occurs only once in Scripture, namely in Ps. xxxvii. 35: 'I have seen the wicked in great power, spreading himself like a green bay-tree.' Commentators and translators have differed respecting the meaning of this word, some supposing it to indicate a specific tree, as the laurel; and others, supported by the Septuagint and Vulgate, the cedar of Lebanon. It is by some considered to mean an evergreen tree, and by others, a green tree that grows in its native soil, or that has not suffered by transplanting, as such a tree spreads itself luxuriantly. It appears to us that the Hebrew word would indicate some tree resembling the bay-tree, rather than the bay-tree itself; but until that can be discovered, the latter is, upon the whole, well suited to stand as its representative.

The laurel, or bay-tree, *laurus nobilis* of botanists, is well known to the Asiatics by its Arabic name of *ghar*, under which it is mentioned by Serapion and Avicenna, who quote chiefly Dioscorides and Galen, thus indicating that they had not much original information of

their own respecting a tree which is probably not indigenous in the countries in which they wrote. The leaves and berries of the laurel, as well as the bark and the root, were employed in medicine: the berries continue, even in the present day, to be exported to India, where we found them in the bazaars, under the name of

84. [Bay-tree. *Laurus nobilis*.]

hubul-ghar, being still esteemed as a stimulant medicinal, though not possessed of any properties superior to those of the laurels of more southern latitudes. The bay-tree is well known to be common in the south of Europe, as in Spain, Italy, Greece, and the Levant. It is usually from 20 to 30 feet in height, often having a bushy appearance, from throwing up so many suckers; but in England it has attained a height of 60 feet, which is not unusual in warmer climates. It is unnecessary to allude further to the celebrity which it attained among the ancients—a celebrity which has not yet passed away, the laurel-wreath being still the symbolical crown as well of warriors as of poets. Its ever green grateful appearance, its thick shade, and the agreeable spicy odour of its leaves, point it out as that which was most likely in the eye of the Psalmist,

BDELLIUM. This word occurs but twice in the Scriptures: in Gen. ii. 12, as a product of the land of Havilah; and Num. xi. 7, where the manna is likened to it. It has been much disputed among critics, both ancient and modern. Some consider it as a precious stone, and the Jewish Rabbins, together with some modern commentators, translate it by *pearl*. But it is more than probable that the pearl was as yet unknown in the time of Moses; and it is nowhere mentioned in the Old Testament under its proper name except in Esth. i. 6.

It is, therefore, most probable that the Hebrew *bedolach* is the aromatic gum *bdellium*, which issues from a tree growing in Arabia, Media, and the Indies. Pliny's description of the tree from which the *bdellium* is taken makes Kämpfer's assertion highly probable, that it is the sort of *alium*-tree so frequently met with on the Persian

coast and in Arabia Felix. The term *bdellium*, however, is applied to two gummy resinous substances. One of them is the *Indian bdellium*, or *false myrrh* (perhaps the *bdellium* of the Scriptures), which is obtained from *Amyris* (*balsamodendron*?) *Commiphora*. The trunk of the tree is covered with a light-coloured pellicle, as in the common birch, which peels off from time to time, exposing to view a smooth green coat, which in succession supplies other similar exfoliations. This tree diffuses a grateful fragrance, like that of the finest myrrh, to a considerable distance around. Dr. Royle was informed that this species yielded *bdellium*; and in confirmation of this statement, we may add that many of the specimens of this *bdellium* in the British Museum have a yellow pellicle adhering to them, precisely like that of the common birch, and that some of the pieces are perforated by spiny branches—another character serving to recognise the origin of the *bdellium*. Indian *bdellium* has considerable resemblance to myrrh. Many of the pieces have hairs adhering to them.

The other kind of *bdellium* is called *African bdellium*. It is a natural production of Senegal, and is called by the natives, who make tooth-picks of its spines, *niottout*. It consists of rounded or oval tears, from one to two inches in diameter, of a dull and waxy fracture, which in the course of time become opaque, and are covered externally by a white or yellowish dust. It has a feeble but peculiar odour, and a bitter taste.

BEANS. This word occurs twice in Scripture. The first occasion is in 2 Sam. xvii. 28, where beans are described as being brought to David, as well as wheat, barley, lentils, &c., as is the custom at the present day in many parts of the East when a traveller arrives at a village. So in Ezekiel iv. 9, the prophet is directed to take wheat, barley, *beans*, lentils, &c., and make bread thereof. The common beans, or at least one of its varieties, has been employed as an article of diet from the most ancient times. Beans were employed as articles of diet by the ancients, as they are by the moderns; and are considered to give rise to flatulence, but otherwise to be wholesome and nutritious. They are cultivated over a great part of the old world, from the north of Europe to the south of India; in the latter, however, forming the cold weather cultivation, with wheat, peas, &c. They are extensively cultivated in Egypt and Arabia. Dr. Kitto states that the extent of their cultivation in Palestine he had no means of knowing. In Egypt they are sown in November, and reaped in the middle of February (three and a half months in the ground); but in Syria they may be had throughout the spring. The stalks are cut down with the scythe, and these are afterwards cut and crushed, to fit them for the food of camels, oxen, and goats. The beans themselves, when sent to a market, are often deprived of their skins. Basnage reports it as the sentiment of some of the Rabbins, that beans were not lawful to the priests, on account of their being considered the appropriate food of mourning and affliction: but he does not refer to the authority; and neither in the sacred books nor in the Mishna can be found any traces of the notion to which he alludes. So far from attaching any

sort of impurity to this legume, it is described as among the first-fruit offerings; and several other articles in the latter collection prove that the Hebrews had beans largely in use, after they had passed them through the mill.

BEAR is noticed in 1 Sam. xvii. 34, 36, 37; 2 Sam. xvii. 8; 2 Kings ii. 24; Prov. xvii. 12; xxviii. 15; Isa. xl. 7; Lam. iii. 10; Hos. xiii. 8; Amos v. 19, &c. The genus *Ursus* is the largest of all the plantigrade carnassiers, and with the faculty of subsisting on fruit or honey unites a greater or less propensity, according to the species, to slaughter and animal food. To a sullen and ferocious disposition it joins immense strength, little vulnerability, considerable sagacity, and the power of climbing trees. The brown bear, *Ursus arctos*, is the most sanguinary of the species of the Old Continent, and *Ursus Syriacus*, or the

65. [Syrian Bear.]

bear of Palestine, is one very nearly allied to it, differing only in the stature being proportionably lower and longer, the head and tail more prolonged, and the colour a dull buff or light bay, often clouded, like the Pyrenean variety, with darker brown. On the back there is a ridge of long semi-erect hairs running from the neck to the tail. It is still found in the elevated woody parts of Lebanon.

BEARD (THE). Ancient nations in general agreed with the modern inhabitants of the East in attaching a great value to the possession of a beard. The total absence of it or a spare and stunted sprinkling of hair upon the chin, is thought by the Orientals to be as great a deformity to the features as the want of a nose would appear to us; while, on the contrary, a long and bushy beard, flowing down in luxuriant profusion to the breast, is considered not only a most graceful ornament to the person, but as contributing in no small degree to respectability and dignity of character. With this knowledge of the extraordinary respect and value which have in all ages been attached to the beard in the East, we are prepared to expect that a corresponding care would be taken to preserve and improve its appearance; and, accordingly, to dress and anoint it with oil and perfume was, with the better classes at least, an indispensable part of their daily toilet (Ps. cxxxiii. 2). In many cases it was dyed with variegated colours, by a tedious and troublesome operation. On the other hand, the allowing the beard to remain in a foul and dishevelled state, or to cut it off, was one of the most striking outward indications of

deep and overwhelming sorrow (2 Sam. xix. 24; Ezra ix. 13; Isa. xv. 2; Jer. xli. 5).

Nor was less jealousy shown in guarding the honour of, than in setting off to advantage, this attribute of manhood. The slightest exhibition of contempt, by sneering, spitting at, pulling, or even pressing against it in a rude and careless manner, was resented as an insult, such as would now, among men of the world, be deemed expiable only by a duel. No one was permitted to touch it except in the way of respectful and affectionate salutation, which was done by gently taking hold of its extremity with the right hand and kissing it; but even in that case it was only wives in approaching their husbands, children their parents, or the nearest and most attached friends, to whom this unusual liberty was granted. The act itself being an expression of kind and cordial familiarity, its performance by Joub shows in a flagrant light the base and unprincipled conduct of that ruthless veteran, when he took Amasa by the beard with his right hand to kiss him (rather *it*), and then having assumed this attitude under the mask of the most friendly feelings, smote his unsuspecting victim under the fifth rib (2 Sam. xx. 9).

To be deprived of a beard was, and still is, in some places of the East, the badge of servitude—a mark of infamy, that degraded a person from the ranks of men to those of slaves and women. Among people influenced by such ideas, we can easily conceive how deep and intolerable was the affront which the king of the Ammonites put upon the ambassadors of David, when, among other acts of insolence, he shaved off one-half of their beards, and sent them home in that grotesque condition, exposed to the derision of their countrymen (2 Sam. x.). Persons of their high rank, who, in all probability, were fastidious about the orderly state and graceful appearance of their beards, would be even more sensitive as to this ignominious treatment than those of a humbler condition; and, as the shaving off one-half of the beard was among some ancient nations the punishment of cowardice, these circumstances united will help to account for the spirit of determined revenge which the king and the whole nation of Israel breathed, on intelligence of the national outrage.

From the above facts it is clear that the Israelites maintained their beard and the ideas connected with it, during their abode among the Egyptians, who were a shaven people. This is not unimportant among the indications which evince that, whatever they learned of good or evil in that country, they preserved the appearance and habits of a separate people. As the Egyptians shaved their beards off entirely, the injunction in Lev. xix. 27 against shaving 'the corners of the beard' must have been levelled against the practice of some other and bearded nation. The prohibition is usually understood to apply against rounding the corners of the beard where it joins the hair; and the reason is supposed to have been to preclude a superstition of certain Arabian tribes, who, by shaving off or rounding away the beard where it joined the hair of the head, devoted themselves to a certain deity who held among them the place which Bacchus did among the Greeks (comp. Jer. ix. 26; xxv. 23; xlix. 32). The ultimate effect

seems to have been altogether to prevent the Jews from shaving off the edges of their beards. The effect of this prohibition in establishing a distinction of the Jews from other nations cannot be understood, unless we contemplate the extravagant diversity in which the beard was and is treated by the nations of the East. The cut is very interesting, being a collection of bearded heads of foreigners obtained from the

85.

Egyptian monuments, and, without doubt, including the beards, head-dresses, and physiognomies of most of the nations bordering on Egypt and Palestine. In nearly all of them we see that the upper edges of the beard were shaven off, and apparently the hair of the upper lip.

The ancient Egyptians, although they shaved their beards, had the singular custom of tying a false beard upon the chin. This was probably in the way of a compromise between their love of cleanliness and their desire to preserve some trace of the distinguishing sign of manhood. They were made of plaited hair, and had a peculiar form according to the rank of the persons by whom they were worn. Private individuals had a small beard, scarcely two inches long; that of a king was of considerable length, and square at the bottom; and the figures of gods were distinguished by its turning up at the end.

87. [2, 3, 5, 11. Gods. 1, 4, 6, 9, 10. Kings. 7, 8. Private persons.]

BEASTS. In the Bible, this word, when used in contradistinction to *man* (Ps. xxxvi. 6), denotes a brute creature generally; when in contradistinction to *creeping things* (Rev. xi. 2-7; xxvii. 26), it has reference to four-footed animals; and when to *wild mammalia*, as in Gen. i. 25, means domesticated cattle.

The zoology of Scripture may, in a general sense, be said to embrace the whole range of ani-

mated nature; but after the first brief notice of the creation of animals recorded in Genesis, it is limited more particularly to the animals found in Egypt, Arabia, Palestine, Syria, and the countries eastward, in some cases, to beyond the Euphrates. It comprehends mammalia, birds, reptiles, fishes, and invertebrate animals: but in a work like the Bible, written for a far different purpose, we might naturally expect that only a small part of these would be found described, and that generical indications would more frequently occur than specific characteristics. As the intention of Scripture, in its allusions to animate or inanimate objects, was not scientific description, but the illustration of arguments and precepts by images drawn from objects familiar to those to whom it was addressed, it is not to be expected that zoology or botany should be treated systematically, or in terms such as modern science has adopted; yet where we can now fully ascertain the true meaning of the text, the imagery drawn from natural history is always forcible, correct, and effective, even where it treats the subject under the conditions of the contemporary popular belief; for, had the inspired writers entered into explanations on matters of science not then commonly understood, the poetical force of the imagery, and consequently its intended effect, must necessarily have been greatly diminished; yet, where system is appropriate, we find a classified general distribution of the creation, simple indeed, but sufficiently applicable to all the purposes for which it was introduced. It resembles other parts of the philosophy of the earliest nations, in which the physical distribution of matter, excepting so far as man is concerned, proceeds by triads. Botany is treated under the heads of grass, shrubs, and trees: in animated nature, beginning with the lowest organized in the watery element, we have first 'the moving creature that hath life,' animalcula, crustacea, insecta, &c.; second, fishes and amphibia, including the huge tenants of the waters, whether or not they also frequent the land, crocodiles, python serpents, and perhaps even those which are now considered as of a more ancient zoology than the present system, the great Saurians of geology; and third, it appears, birds, 'flying creatures' (Gen. i. 20); and still advancing (cetaceans, pinnatipeds, whales and seals being excluded), we have quadrupeds, forming three other divisions or orders: 1st, cattle, embracing the ruminant herbivora, generally gregarious, and capable of domesticity; 2nd, wild beasts, carnivora, including all beasts of prey; and 3rd, reptiles, minor quadrupeds, such as creep by means of many feet, or glide along the surface of the soil, serpents, annelides, &c.; finally, we have man, standing alone in intellectual supremacy. The classification of Moses, as it may be drawn from Deuteronomy, appears to be confined to *Vertebrata* alone, or animals having a spine and ribs, although the fourth class might include others: taking man as one, it forms five classes—1st, Man; 2nd, Beasts; 3rd, Birds; 4th, Reptiles; 5th, Fishes. It is the same as that in Leviticus xi., where beasts are further distinguished into those with solid hoofs and those with cloven feet. But the passage specially refers to animals that might be lawfully eaten because they were clean, and others

prohibited because they were declared unclean, although some of them, according to the common belief of the time, might ruminant; for it may be repeated that the Scriptures were not intended to embrace anatomical disquisitions aiming at the advancement of human science, but to convey moral and religious truth, without disturbing the received opinions of the time on questions having little or no relation to their main object. In like manner, fishes and birds are divided into clean and unclean; and, taken altogether, the classification now described forms an excellent series of distinctions, which, even at the present day, and in countries far distant from the scene where it was ordained, still remains applicable, with little exception, and from its intrinsic propriety will remain in force, notwithstanding our present knowledge of the manners and opinions of the East and of Egypt has rendered many of the earlier comments upon it in a great measure useless.

BEDS. The manner of sleeping in warm Eastern climates was, and is, necessarily very different from that which is followed in our colder regions. The present usages appear to be the same as those of the ancient Jews, and sufficiently explain the passages of Scripture which bear on the subject. Beds of feathers are altogether unknown, and the Orientals lie exceedingly hard. Poor people who have no certain home, or when on a journey, or employed distant from their homes, sleep on mats or wrapped in their outer garment, which from its importance in this respect was forbidden to be retained in pledge over night from the owner (Gen. ix. 21, 23; Exod. xxii. 27; Deut. xxv. 13). Under such circumstances a stone covered with some folded cloth or piece of dress is often used for a pillow (Gen. xxviii. 11). The more wealthy classes sleep on mattresses stuffed with wool or cotton, and which are often no other than a quilt thickly padded, either used singly or one or more placed upon each other. A similar quilt of finer materials forms the coverlet in winter, and in summer a thin blanket suffices; but sometimes the convenient outer garment is used for the latter purpose, and was so among the Jews, as we see from 1 Sam. xix. 3. The difference of use here is, that the poor *wrap themselves up* in it, and it forms all their bed; whereas when used by the rich it is as a *covering* only. A pillow is placed upon the mattress, and over both, in good houses, is laid a sheet. The bolsters are more valuable than the mattresses, both for their coverings and material: they are usually stuffed with cotton or other soft substance (Ezek. xviii. 20); but instead of these, skins of goats or sheep appear to have been formerly used by the poorer classes and in the harder ages. These skins were probably sewed up in the natural shape, like water-skins, and stuffed with chaff or wool (1 Sam. xix. 13).

It has been doubted whether different Hebrew words translated 'couch,' and 'bed,' and 'bedstead' in the authorized version were actually bedsteads of different sorts, or simply the standing and fixed divans, such as those on which the Western Asiatics commonly make their beds at night. It has been usually thought that the choice lay between these alternatives, because it has not been understood that in the East there

is, in fact, a varied arrangement in this matter: and there is reason to think that the different Hebrew words answer to and describe similarly different arrangements, although we may be unable now to give to the several Hebrew words the distinctive applications to still subsisting things.

The divan, or *daïs*, is a slightly elevated platform at the upper end, and often along the sides of the room. On this are laid the mattresses on which the Western Asiatics sit cross-legged in the day-time, with large cushions against the wall to support the back. At night the light bedding is usually laid out upon this divan, and beds for many persons are easily formed. The bedding is removed in the morning, and deposited in recesses in the room, made for the purpose. This is, however, a sort of general sleeping-room for the males of the family and for guests, none but the master having access to the inner parts of the house, where alone there are proper and distinct bed-chambers, where the bedding is either laid on the carpeted floor or placed on a low frame or bedstead.

The most common bedstead in Egypt and Arabia is of this shape, framed rudely of palm-

88.

sticks. It was used in ancient Egypt, and is figured in the mural paintings. In Palestine, Syria, Persia, where the palm-tree is not common, and where timber is more plentiful, a bed-frame of similar shape is made of boards. This kind of bedstead is also used upon the house-tops during the season in which people sleep there. It is more than likely that Og's bedstead was of this description (Deut. iii. 11). In the times in which he lived the palm-tree was more common in Palestine than at present, and those in ordinary use were probably formed of palm-sticks. Thus formed, they are incapable of sustaining any undue weight without being disjointed and bent awry; and this would dictate the necessity of making the bedstead destined to sustain the vast bulk of Og rather with rods of iron than with the mid-ribs of the palm-fronds. These bedsteads are also of a length seldom more than a few inches beyond the average human stature (commonly 6 feet 3 inches), and hence the propriety with which the length of Og's bedstead is stated to convey an idea of his stature.

It is not necessary to suppose that the bedsteads were all of this sort. There are traces of a sort of portable couch (1 Sam. xix. 15), which appears to have served as a sofa for sitting on in the day-time (1 Sam. xxviii. 23; Ezek. xxiii. 41; Amos vi. 4); and there is now the less reason to doubt that the ancient Hebrews had a convenience of this sort, as we find such couches in use among the neighbouring nations, and figured on their monuments. The subjoined example is from ancient Egypt.

A bed with a tester is mentioned in Judith xvi. 23, which, with other indications and the frequent mention of rich tapestries hung upon and about a

bed for luxuriousness and ornament, proves that such beds as are still used by royal and distin-

89.

guished personages were not unknown under the Hebrew monarchies (comp. Esth. i. 6; Prov. vii. 16, sq.; Ezek. xxiii. 41).

It is evident that the ancient Jews, like the modern inhabitants of their land, seldom or never changed their dress on going to bed. Most people only divest themselves of their outer garment, and loosen the ligature of the waist, excepting during the hottest part of the summer, when they sleep almost entirely unclothed.

BEE (occurs in Deut. i. 44; Judg. xiv. 8; Ps. cxviii. 12; Isa. vii. 18). This insect belongs to the family *apidae*, order *hymenoptera*, species *apis mellifica*, commonly called the honey-bee, because this species has often yielded honey to man.

In proceeding to notice the principal passages of Scripture in which the bee is mentioned, we first pause at Deut. i. 44, where Moses alludes to the irresistible vengeance with which bees pursue their enemies: 'The Amorites came out against you and chased you as bees do, and destroyed you in Seir unto Hormah.' The powerlessness of man under the united attacks of these insects is well attested. Pliny relates that bees were so troublesome in some parts of Crete, that the inhabitants were compelled to forsake their homes; and Ælian records that some places in Scythia were formerly inaccessible on account of the swarms of bees with which they were infested. Park relates that at Doofroo, some of the people being in search of honey, unfortunately disturbed a swarm of bees, which came out in great numbers, attacked both men and beasts, obliged them to fly in all directions, so that he feared an end had been put to his journey, and that one ass died the same night, and another the next morning. Even in this country the stings of two exasperated hives have been known to kill a horse in a few minutes.

The reference to the bee contained in Judg. xiv. 8, has attracted the notice of most readers. It is related in the 5th and 6th verses that Samson, aided by supernatural strength, rent a young lion, that warred against him, as he would have rent a kid, and that 'after a time,' as he returned to take his wife, he turned aside to see the carcass of the lion, and, behold, there was a swarm of bees and honey in the carcass of the lion. It has been hastily concluded that this narrative favours the mistaken notion of the ancients, possibly derived from misunderstanding this very account, that bees might be engendered in the dead bodies of animals; and ancient authors are quoted to testify to the aversion of bees to flesh, unpleasant smells,

and filthy places. But it may readily be perceived that it is not said that the bees were bred in the body of the lion. Again, the frequently recurring phrase, 'after a time,' literally 'after days,' introduced into the text, proves that at least sufficient time had elapsed for all the flesh of the animal to have been removed by birds and beasts of prey, the ants, &c. The Syriac version translates 'the bony carcass.' The learned Bochart remarks that the Hebrew phrase sometimes signifies a whole year, and in this passage it would seem likely to have this meaning, because such was the length of time which usually elapsed between espousal and marriage (see ver. 7). The circumstance that 'honey' was found in the carcass as well as bees, shows that sufficient time had elapsed since their possession of it, for all the flesh to be removed. Nor is such an abode for bees, probably in the skull or thorax, more unsuitable than a hollow in a rock, or in a tree, or in the ground, in which we know they often reside, or those clay nests which they build for themselves in Brazil. Nor is the fact without parallel. Herodotus relates that a swarm of bees took up their abode in the skull of one Silius, an ancient invader of Cyprus, which they filled with honeycombs, after the inhabitants had suspended it over the gate of their city. A similar story is told by Aldrovandus of some bees that inhabited and built their combs in a human skeleton in a tomb in a church at Verona.

The phrase in Ps. cxviii. 12, 'They compassed me about like bees,' is easily understood by all who know the manner in which bees attack the object of their fury.

The only remaining passage has been strangely misunderstood (Isa. vii. 18): 'The Lord shall hiss for the fly that is in the uttermost parts of the river of Egypt, and for the bee that is in the land of Assyria.' Here the fly and the bee are no doubt personifications of those inveterate enemies of Israel, the Egyptians and Assyrians, whom the Lord threatened to excite against his disobedient people. But the hissing for them has been interpreted, even by modern writers of eminence, as involving 'an allusion to the practice of calling out the bees from their hives, by a hissing or whistling sound, to their labour in the fields, and summoning them to return when the heavens begin to lower, or the shadows of evening to fall.' No one has offered any proof of the existence of such a custom, and the idea will itself seem sufficiently strange to all who are acquainted with the habits of bees. The true reference is, no doubt, to the custom of the people of the East, and even of many parts of Europe, of calling the attention of any one in the street, &c. by a significant hiss or rather *hist*, as Bishop Lowth translates the word both here and in Isa. v. 26. Hissing, or rather histing, is in use among us for setting a dog on any object. Hence the sense of the threatening is, I will direct the hostile attention of the Egyptians and Assyrians against you.

BEELZEBUL, the name assigned (Matt. xii. 24) to the prince of the demons. There is no doubt that the reading *Beelzebub* is the one which has the support of almost every critical authority; and the *Beelzebub* of the *Peshito* (if indeed it is not a corruption, as Michaelis thinks), and of the Vulgate, and of some modern versions, has probably been accommodated to the name of the

Philistine god *Baalzebub*. Some of those who consider the latter to have been a reverential title for that god, believe that Beelzebub is a wilful corruption of it, in order to make it contemptible. [BAAL.]

BEER, a well; a local proper name, denoting, whether by itself or in composition, the presence of a well of water. There were two places so called.—1. A place in the land of Moab, which was one of the encampments of the Israelites (Num. xxi. 16).—2. A town in the tribe of Judah. It is mentioned only once in Scripture (Judg. ix. 21), as the place to which Jotham fled. It is supposed to be the same with the modern Bireh, a large village situated on the ridge, running from east to west, which bounds the northern prospect, as beheld from Jerusalem and its vicinity, and may be seen from a great distance north and south. It contains a population of 700 Moslems. The houses are low, and many of them half underground. Many large stones and various substructions evince the antiquity of the site; and there are remains of a fine old church of the time of the Crusades.

BEEROTH, the plural of Beer, and by many taken for the same place. It is mentioned as a city of the Gibeonites (Josh. ix. 17), and was reckoned in the tribe of Benjamin (2 Sam. iv. 2; Ezra ii. 25).

BEER-SHEBA, *well of the oath*; a place in the southernmost part of Canaan, celebrated for the sojourn of the patriarchs. It took its name from the *well* which was dug there by Abraham, and the oath which confirmed his treaty with Abimelech (Gen. xxi. 31). It seems to have been a favourite station of that patriarch, and here he planted one of those 'groves' which formed the temples of those remote times (Gen. xxi. 33). A town of some consequence afterwards arose on the spot, and retained the same name. It was first assigned to the tribe of Judah (Josh. xv. 28), and afterwards transferred to Simeon (Josh. xix. 2), but was still popularly ascribed to Judah (2 Sam. xxiv. 7). Being the southernmost city of the land, its name is of frequent occurrence as being proverbially used in describing the extent of the land, in the phrase 'from Dan (in the north) to Beersheba' (in the south), and reversely, 'from Beersheba unto Dan' (Judg. xx. 1; 2 Sam. xvii. 11; 1 Chron. xxi. 2; 2 Chron. xxx. 5). It was at Beersheba that Samuel established his sons as judges for the southernmost districts (1 Sam. viii. 2); it was from thence that Elijah wandered out into the southern desert (1 Kings xix. 3); here was one of the chief seats of idolatrous worship in the time of Uzziah (Amos v. 5; viii. 14); and to this place, among others, the Jews returned after the Captivity (Neh. xi. 27, 30). This is the last time its name occurs in the Old Testament. In the New Testament it is not once mentioned; and for many centuries it seems to have been in a great measure forgotten. Its site was recently visited by Dr. Robinson, who, on converging from the desert and entering the borders of Palestine, came upon two deep wells still called Bir-es-Leba, situate on the northern side of a wide watercourse called Wady ir-Leba. These wells are 55 rods apart. They are circular, and stoned up very neatly with masonry, apparently very ancient. The water in both was pure and sweet, and in great abundance; the finest, indeed,

the travellers had found since leaving Sinai. Both wells were surrounded with drinking-troughs of stone for camels and flocks, such as were doubtless used of old by the flocks which were fed on the adjacent hills. No ruins were at first visible; but, on examination, foundations of former dwellings were traced, dispersed loosely over the low hills to the north of the wells, and in the hollows between. They seem to have been built chiefly of round stones, although some of the stones are squared and some hewn; suggesting the idea of a small straggling city. The site of the wells is nearly midway between the southern end of the Dead Sea and the Mediterranean at Raphaa, or twenty-seven miles south-east from Gaza, and about the same distance south-by-west from Hebron.

BEEVES. The rearing of horned cattle was encouraged by the people of Israel. These animals were protected in some cases by express provisions of the law; they were held clean, being the usual sacrifice of consideration, and the chief article of flesh diet of the population. Judging from Egyptian remains, there were two great breeds of straight-backed cattle, the long-horned and the short-horned; and in Upper Egypt at least, there was one without horns. Another hunched species existed, which served to draw chariots, yoked in the same manner as the Brahmin bulls of India are at present.

In Egypt the straight-backed or common cattle appear to have formed a very handsome breed with lunate horns. They were generally spotted black or red upon a white ground, and there were, besides, others white, red, or black. They all served for common use, but those without red were selected when new sacred bulls were to be supplied; for they alone had the colours which could show the marks made by chance or by art, and required to fit the animal for the purpose intended. There was, besides, a sacred cow; and a black bull was worshipped at Hermopolis.

In Palestine the breed of cattle was most likely in ancient times, as it still is, inferior in size to the Egyptian.

Unless the name be taken synonymously with that of other species, there is not in the Bible any indication of the buffalo. The Asiatic species was not known in Greece till the time of Aristotle. The indigenous buffaloes of Africa, amounting at least to two very distinct species, appear to have belonged to the south and west of that continent, and only at a later period to have approached Egypt as far as the present Bornou; for none are figured on any known monument in either Upper or Lower Egypt. With regard, however, to wild oxen of the true Taurine genus, some may, at a very remote period, have been found in Hahan, evidently the origin of the name,—a region where mountain, wood, and water, all connecting the Syrian Libanus with Taurus, were favourable to their existence; but the wild bulls of the district, mentioned in Ps. xxii. 12, and in various other passages, appear, nevertheless, to refer to domestic species, probably left to propagate without much human superintendence, except annually marking the increase, and selecting a portion for consumption, in the same manner as is still practised in some parts of Europe.

BEGGARS. [ALMS.]

BEHEMOTH (Job xl. 15) is regarded as the plural of *behemah*, but commentators are by no means agreed as to its true meaning. A number of learned men, with Bochart and Calmet at their head, understand the word in the singular number as a specific name, denoting the hippopotamus, seeking to prove, by somewhat forced

90. [Hippopotamus.]

interpretations of the beautiful poetical allusions in Job xl. 15-24, the exactness of the description when compared with the species, which, however, in some respects is more applicable to the elephant, while in others it is equally so to both animals. Hence the term behemoth, taken intensely (for in some places it is admitted to designate cattle in general), may be assumed to be a poetical personification of the great Pachydermata, or even Herbivora, wherein the idea of hippopotamus is predominant. This view accounts for the ascription to it of characters not truly applicable to one species; for instance, the tail is likened to a cedar, which is only admissible in the case of the elephant; again, 'the mountains bring him forth food'; 'he trusteth that he can draw up Jordan,' a river which elephants alone could reach; 'his nose pierceth through snares,' certainly more indicative of that animal's proboscis with its extraordinary delicacy of scent and touch, ever cautiously applied, than of the obtuse perceptions of the river-horse. Finally, the elephant is far more dangerous as an enemy than the hippopotamus, which numerous pictorial sculptures on the monuments of Egypt represent as fearlessly speared by a single hunter standing on his float of log and reeds. Yet although the elephant is scarcely less fond of water, the description referring to manners, such as lying under the shade of willows among reeds, in fens, &c., is more directly characteristic of the hippopotamus. The book of Job appears, from many internal indications, to have been written in Asia, and is full of knowledge, although that knowledge is not expressed according to the precise technicalities of modern science; it offers pictures in magnificent outline, without condescending to minute and laboured details. Considered in this light, the expression in Ps. l. 10, 'For every beast of the forest is mine, and the cattle (behemoth) upon a thousand hills,' acquires a grandeur and force far surpassing the mere idea of cattle of various kinds. If, therefore, we take this plural noun to bear the meaning here briefly indicated, we may likewise consider the *leviathan*, its counterpart, a similarly generalized term with the idea of the crocodile most prominent; but from the very name indicating a twisting animal, and which from various texts

evidently include the great pythons, cetacea, and sharks of the surrounding seas and deserts, it conveys a more sublime allusion than if limited to the crocodile, an animal familiar to every Egyptian, and well known even in Palestine.

BE'KAH, half a shekel. [WEIGHTS.]

BEL is the name under which the national god of the Babylonians is cursorily mentioned in Isa. xli. 1; Jer. l. 2; li. 44. This deity is also noticed in Bar. vi. 40, and the apocryphal addition to the book of Daniel, where we read of meat and drink being daily offered to him, according to a usage occurring in classical idolatry. A particular account of the pyramidal temple of Bel, at Babylon, is given by Herodotus, who also states that the sacrifices of this god consisted of adult cattle, of their young, when sucking, and of incense.

The question whether the sun or the planet Jupiter was the power of nature adored under the name of Bel, is discussed under the article BAAL.

BEL and DRAGON. [DANIEL, APOCRYPHAL ADDITIONS TO.]

BELL. [ZOAR.]

BELL. The first bells known in history are those small golden bells which were attached to the lower part of the blue robe (the robe of the ephod) which formed part of the dress of the high-priest in his sacerdotal ministrations (Exod. xxviii. 33, 34; comp. Ecclus. xiv. 11). They were there placed alternately with the pomegranate-shaped knobs, one of these being between every two of the bells. The number of these bells is not mentioned in Scripture; but tradition states that there were sixty-six. We need not seek any other reason for this rather singular use of bells than that which is assigned: 'His sound shall be heard when he goeth into the holy place before the Lord, and when he cometh out, that he die not' (Exod. xxviii. 35); by which we may understand that the sound of the bells manifested that he was properly arrayed in the robes of ceremony which he was required to wear when he entered the presence-chamber of the Great King; and that as no minister can enter the presence of an earthly potentate abruptly and unannounced, so he (whom no human being could introduce) was to have his entrance harbingered by the sound of the bells he wore. This sound, heard outside, also notified to the people the time in which he was engaged in his sacred ministrations, and during which they remained in prayer (Luke i. 9, 10).

'BELLS OF THE HORSES' are mentioned in Zech. xiv. 20, which were probably such as were hung to the bridles or foreheads, or to belts around the necks, of horses trained for war, that they might thereby be accustomed to noise and tumult, and not by their alarm expose the riders to danger in actual warfare. We incline to think, however, that the use of horse-bells with which the Jews were most familiar, and which the prophet had in view, was that which at present exists in the East, and in other countries where carriage by pack-horses and mules is common. The laden animals, being without riders, have bells hung from their necks, that they may be kept together, in traversing by night the open plains and deserts, by paths and roads unconfined by fences or boundaries; that

they may be cheered by the sound of the bells; and that if any horse strays, its place may be known by the sound of its bell, while the general sound from the caravan enables the traveller who has strayed or lingered, to find and regain his party, even in the night.

That the same motto, HOLINESS TO THE LORD, which was upon the mitre of the high-priest, should, in the happy days foretold by the prophet, be inscribed even upon the bells of the horses, manifestly signifies that all things, from the highest to the lowest, should in those days be sanctified to God.

It is remarkable that there is no appearance of bells of any kind in the Egyptian monuments.

BELLOWS. This word only occurs in Jer. vi. 29, and is there used with reference to the casting of metal. As fires in the East are always of wood or charcoal, a sufficient heat for ordinary purposes is soon raised by the help of fans, and the use of bellows is confined to the workers in metal. Such was the case anciently; and in the mural paintings of Egypt we observe no bellows but such as are used for the forge or furnace. They thus occur as early as the time of Moses, being represented in a tomb at Thebes which bears the name of Thothmes III. They

91.

consisted of a leathern bag, secured and fitted into a frame, from which a long pipe extended for carrying the wind to the fire. They were worked by the feet, the operator standing upon them with one under each foot and pressing them alternately, while he pulled up each exhausted skin with a string he held in his hand. In one instance it is observed from the painting, that when the man left the bellows they were raised as if filled with air, and this would imply a knowledge of the valve.

BELLY. Among the Hebrews, and with most ancient nations, the belly was regarded as the seat of the carnal affections, as being, according to the notions of antiquity, that which first partakes of sensual pleasures (Tit. i. 12; Phil. iii. 19; Rom. xvi. 18). It is used likewise symbolically for the heart, the innermost recesses of the soul (Prov. xviii. 8; xx. 27; xxii. 18). The *embittering* of the belly signifies all the train of evils which may come upon a man (Jer. iv. 19; ix. 15; comp. Numb. v. 27).

BELSHAZZAR is the name given in the book of Daniel to the last king of the Chaldees, under whom Babylon was taken by the Medes and Persians. Nothing is really known of this king except from the book of Daniel.

BELTESHAZZAR. [DANIEL.]

BEN (*son*), is often found as the first element of proper names; in which case the word which

follows it is always to be considered dependent on it in the relation of our genitive. The word which follows *Ben* may either be of itself a proper name, or be an appellative or abstract, the principle of the connection being essentially the same in both cases. [BAR.]

BENAI'AH, son of Jehoiada, and commander of David's guard (the Cherethites and Pelethites, 2 Sam. viii. 18). His exploits were celebrated in Israel. He overcame two Moabitish champions ('lions of God'), slew an Egyptian giant with his own spear, and went down into an exhausted cistern and destroyed a lion which had fallen into it when covered with snow (2 Sam. xxiii. 21). Benaiah (doubtless with the guard he commanded) adhered to Solomon when Joab and others attempted to set up Adonijah; and when that attempt failed, he, as belonged to his office, was sent to put Joab to death, after which he was appointed commander in chief in his place (1 Kings i. 36; ii. 29). Some persons named Benaiah returned from the exile with Ezra (x. 25, 30, 35, 43).

BENHADAD (*son of Hadad*), the name of three kings of Damascus-Syria. As to the latter part of this name, Hadad, there is little doubt that it is the name of the Syrian god ADAD.

1. **BENHADAD**, the king of Syria who was subsidised by Asa king of Judah to invade Israel, and thereby compel Baasha (who had invaded Judah) to return to defend his own kingdom (1 Kings xv. 18). [ASA.] This Benhadad has, with some reason, been supposed to be Hadad the Edomite who rebelled against Solomon (1 Kings xi. 25).

2. **BENHADAD**, king of Syria, son of the preceding. His earlier history is much involved in that of Ahab, with whom he was constantly at war [AHAB]. He owed the signal defeat in which that war terminated to the vain notion that assimilated JEHOVAH to the local deities which the nations of Syria worshipped, deeming Him 'a God of the hills,' but impotent to defend his votaries in 'the plains' (1 Kings xx. 1-30). Instead of pursuing his victory, Ahab concluded a peace with the defeated Benhadad, which was observed for about twelve years, when the Syrian king declared war against Jehoram the son of Ahab, and invaded Israel: but all his plans and operations were frustrated by being made known to Jehoram by the prophet Elisha (2 Kings vi. 8, *ad fin.*). After some years he however renewed the war, and besieged Jehoram in his capital, Samaria, until the inhabitants were reduced to the last extremities and most revolting resources by famine. The siege was then unexpectedly raised, according to a prediction of Elisha, through a panic infused into the besiegers, who concluding that a noise which they seemed to hear portended the advance upon them of a foreign host procured by Jehoram, thought only of saving themselves by flight. The next year Benhadad, learning that Elisha, through whom so many of his designs had been brought to nought, had arrived at Damascus, sent an officer of distinction named Hazael with presents, to consult him as to his recovery from an illness under which he then suffered. The prophet answered, that his disease was not mortal, but that he would nevertheless

die. This was accomplished a few days after by this very Hazael, who smothered the sick monarch in his bed, and mounted the throne in his stead, B.C. 884 (2 Kings viii. 7-15). [ELISHA; HAZAEL; JEHORAM.]

3. BENHADAD, king of Syria, son of the Hazael just mentioned. He was thrice defeated by Jehoash, king of Israel, who recovered from him all the territories beyond Jordan which Hazael had rent from the dominion of Israel (2 Kings xiii. 3, 24, 25).

BENJAMIN, youngest son of Jacob, by Rachel (Gen. xxxv. 18). His mother died immediately after he was born, and with her last breath named him Ben-Oni, '*Son of my pain*,' which the father changed into Benjamin, a word of nearly the same sound, but portending comfort and consolation, '*Son of my right hand*,' probably alluding to the support and protection he promised himself from this, his last child, in his old age.

The tribe of Benjamin, though the least numerous of Israel, became nevertheless a considerable race in process of time. In the desert it counted 35,400 warriors, all above twenty years of age (Num. i. 36; ii. 22); and, at the entrance of Israel into Canaan, even as many as 45,000. The portion allotted to this tribe was in proportion to its small number, and was encompassed by the districts of Ephraim, Dan, and Judah, in central Palestine. The territory, though rather small, was highly-cultivated and naturally fertile, and contained thirty-six towns (with the villages appertaining to them), which are named in Josh. xviii. 21-28; and the principal of which were Jericho, Bethagla, Bethel, Gibeon, Ramah, and Jebus or Jerusalem. This latter place subsequently became the capital of the whole Jewish empire; but was, after the division of the land, still in possession of the Jebusites. The lower or less fortified part had been taken by Judah (Judg. i. 8), who in this matter had almost a common interest with Benjamin; but Zion, the upper part, was not finally wrested from the Jebusites till the time of David (2 Sam. v. 6, sq.). In the time of the Judges, the tribe of Benjamin became involved in a civil war with the other eleven tribes, for having refused to give up to justice the malefactors of Gibeon who had publicly violated and caused the death of a concubine of a man of Ephraim, who had passed with her through Gibeon. This war terminated in the almost utter extinction of the tribe; leaving no hope for its regeneration from the circumstance, that, not only had nearly all the women of that tribe been previously slain by their foes, but the eleven other tribes had engaged themselves by a solemn oath not to marry their daughters to any man belonging to Benjamin. When the thirst of revenge, however, had abated, they found means to evade the letter of the oath, and to revive the tribe again by an alliance with them (Judg. xxi. 20, 21). This revival was so rapid, that in the time of David it already numbered 59,434 able warriors (1 Chron. vii. 6-12); in that of Asa, 280,000 (2 Chron. xiv. 8); and in that of Jehoshaphat, 200,000 (2 Chron. xvii. 17).

This tribe had also the honour of giving the first king to the Jews, Saul being a Benjamite (1 Sam. ix. 1, 2). After his death, the Ben-

jamites, as might have been expected, declared themselves for his son Ishbosheth (2 Sam. ii. 8, sq.); until, after the assassination of that prince, David became king of all Israel. David having at last expelled the Jebusites from Zion, and made it his own residence, the close alliance that seems previously to have existed between the tribes of Benjamin and Judah (Judg. i. 8) was cemented by the circumstance that, while Jerusalem actually belonged to the district of Benjamin, that of Judah was immediately contiguous to it. Thus it happened, that, at the division of the kingdom after the death of Solomon, Benjamin espoused the cause of Judah, and formed, together with it, a kingdom by themselves. Indeed, the two tribes stood always in such a close connection, as often to be included under the single term Judah (1 Kings xi. 13; xii. 20). After the exile, also, these two tribes constituted the flower of the new Jewish colony in Palestine (comp. Ezr. xi. 1; x. 9).

BEREA (Acts xvii. 10), a city of Macedonia, situate on the river Astræus, not far from Pella, towards the south-west, and near Mount Bermius. It was afterwards called Irenopolis, and is now known by the name of Boor. Paul and Silas withdrew to this place from Thessalonica; and the Jewish residents are described as more ingenuous, and of a better disposition (not 'more noble,' as in the Authorized Version) 'than those of Thessalonica,' in that they diligently searched the Scriptures to ascertain the truth of the doctrines taught by the Apostles.

BERNICE, eldest daughter of Herod Agrippa I., and sister of the younger Agrippa (Acts xxv. 23, 26; xxvi. 30). She was married to her uncle Herod, king of Chalcis; and after his death, in order to avoid the merited suspicion of incest with her brother Agrippa, she became the wife of Polemon, king of Cilicia. This connection being soon dissolved, she returned to her brother, and afterwards became the mistress of Vespasian and Titus.

BERYL. This is supposed by some to be the precious stone intended by the word *shoham*, which occurs in Gen. ii. 12; Exod. xxviii. 9; xxxv. 9-27; Job xxviii. 16; Ezek. xxviii. 13. Whether the beryl be the *shoham* or not, it is a Scriptural stone by virtue of the mention of it in Rev. xxi. 20. There is no doubt that the stone which we call beryl is the substance to which the ancients gave the same name. It is of a pale sea-green colour, inclining sometimes to water blue, and sometimes to yellow. In its crystallized form it exhibits hexagonal columns striped longitudinally. The *shoham* furnished the shoulder-pieces in the breastplate of the high-priest, on each of which six names were engraved, and for this purpose the stalky beryl, consisting of long, stout, hexagonal pieces, was peculiarly suited. Beryls are found, but not often, in collections of ancient gems. In Gen. ii. 12, the *shoham* is named as the product of Havilah; in Job xxviii. 16, it is mentioned as a stone of great value, being classed with the sapphire and the gold of Ophir; in Ezek. xxviii. 13, it appears as a valuable article of commerce.

Luther, relying upon the authority of some ancient versions, makes the *shoham* to have been the onyx. This indeed is the stone usually given for the *shoham* in Hebrew lexicons, and

is the one which the Authorized Version has also adopted.

BESOR, a brook mentioned in 1 Sam. xxx. 9. It is without doubt the same that Richardson crossed on approaching Gaza from the south, and which he calls Oa di Gaza (Wady Gaza). The bed was thirty yards wide, and its stream was, early in April, already exhausted, although some stagnant water remained.

BETH (*house*) is often found as the first element of proper names of places in the Bible. It is only necessary to observe that, in all such compounds, as Bethel, &c., the latter part of the word must be considered, according to our Occidental languages, to depend on the former in the relation of the *genitive*; so that Bethel can only mean 'house of God.' The notion of *house* is, of course, capable of a wide application, and is used to mean temple, habitation, place, according to the sense of the word with which it is combined.

BETHABARA or BETHBARAH. This name means *place of the ford*, i. e. of or over the Jordan; and is mentioned in John i. 28, as the place where John baptized. The best manuscripts and recent editions, however, have Bethany: the reading Bethabara appears to have arisen from the conjecture of Origen, who in his day found no such place on the Jordan as Bethany, but knew a town called Bethabara, where John was said to have baptized, and therefore took the unwarrantable liberty of changing the reading.

BETHANY (*place of dates*). 1. The place near the Jordan where John baptized, the exact situation of which is unknown. Some copies here read Bethabara, as stated in the preceding article. 2. BETHANY, a town or village about fifteen furlongs east-south-east from Jerusalem, beyond the Mount of Olives (John i. 18), so called, probably, from the number of palm-trees that grew around. It was the residence of Lazarus and his sisters Mary and Martha, and Jesus often went out from Jerusalem to lodge there (Matt. xxi. 17; xxvi. 6; Mark xi. 1, 11, 12; xiv. 3; Luke xix. 29; xxiv. 50; John xi. 1, 18; xii. 1). The place still subsists in a shallow wady on the eastern slope of the Mount of Olives. Dr. Robinson reached Bethany in three-quarters of an hour from the Damascus gate of Jerusalem; which gives a distance corresponding to the fifteen furlongs (stadia) of the Evangelist. It is a poor village of about twenty families. The only marks of antiquity are some hewn stones from more ancient buildings, found in the walls of some of the houses. The monks, indeed, show the house of Mary and Martha, and of Simon the leper, and also the sepulchre of Lazarus, all of which are constantly mentioned in the narratives of pilgrims and travellers. The sepulchre is a deep vault, like a cellar, excavated in the limestone rock in the middle of the village, to which there is a descent by twenty-six steps. Dr. Robinson alleges that there is not the slightest probability of its ever having been the tomb of Lazarus. The form is not that of the ancient sepulchres, nor does its situation accord with the narrative of the New Testament, which implies that the tomb was not in the town (John xvi. 31, 38).

BETH-ARBEL, a place mentioned only in Hos. x. 14; and as it there seems to be implied that it was an impregnable fortress, the probabi-

lity is strengthened of its being the same as the Arbela of Josephus. This was a village in Galilee, near which were certain fortified caverns. They are first mentioned in connection with the march of Hachides into Judaea, at which time they were occupied by many fugitives, and the Syrian general encamped there long enough to subdue them. At a later period these caverns formed the retreats of banded robbers, who greatly distressed the inhabitants throughout that quarter, and were at length extirpated by Herod. These same caverns were afterwards fortified by Josephus himself against the Romans during his command in Galilee. There is little doubt that Arbela of Galilee, with its fortified caverns, may be identified with the present Kulat ibn Maan and the adjacent ruins now known as Irbid.

BETH-A'VEN (*house of idols*), a nickname for the town of Bethel, applied to it after it became the seat of the worship of the golden calves (BETHEL). There was, however, a town of this name not far from Bethel eastward (Josh. vii. 2; 1 Sam. xiii. 5), the existence of which, perhaps, occasioned the transfer of the name to Bethel. There was also a desert of the same name (Josh. xviii. 12).

BETH'EL, originally Luz, an ancient town which Eusebius places 12 R. miles north of Jerusalem, on the right hand of the road to Shechem. Jacob rested here one night on his way to Padan-Aram, and commemorated the vision with which he was favoured by erecting and pouring oil upon the stone which had served him for a pillow, and giving to the place the name of Bethel (*place or house of God*), which eventually superseded the more ancient designation of Luz (Gen. xxviii. 11-19). Under that name it is mentioned prophetically with reference to the earlier time of Abraham (Gen. xii. 8; xiii. 3). After his prosperous return, Bethel became a favourite station with Jacob: here he built an altar, buried Deborah, received the name of Israel (for the second time), and promises of blessing; and here also he accomplished the vow which he had made on his going forth (Gen. xxxv. 1-15; comp. xxxii. 28, 29; xxviii. 20-22). It seems not to have been a town in those early times; but at the conquest of the land, Bethel is mentioned as the royal city of the Canaanites (Josh. xii. 16). It became a boundary town of Benjamin towards Ephraim (Josh. xviii. 22), and was actually conquered by the latter tribe from the Canaanites (Judg. i. 22-26). At this place, already consecrated in the time of the patriarchs, the ark of the covenant was, apparently for a long while, deposited [ARK], and probably the tabernacle also (Judg. xx. 26; comp. 1 Sam. x. 3). It was also one of the places at which Samuel held in rotation his court of justice (1 Sam. vii. 16). After the separation of the kingdoms Bethel was included in that of Israel, which seems to show, that although originally in the formal distribution assigned to Benjamin, it had been actually possessed by Ephraim in right of conquest from the Canaanites—which might have been held by that somewhat unscrupulous tribe to determine the right of possession to a place of importance close on their own frontier. Jeroboam made it the southern seat (Dan being the northern) of the worship of the golden calves; and it seems to have been the chief seat of that worship (1 Kings xii. 28-33; xiii. 1). This appropriation, however, completely desecrated

Bethel in the estimation of the orthodox Jews; and the prophets name it with abhorrence and contempt—even applying to it the name of Beth-aven (*house of idols*) instead Bethel (*house of God*) (Amos ii. 5; Hos. iv. 15; v. 8; x. 5, 8). The town was taken from Jeroboam by Abijah, king of Judah (2 Chron. xiii. 19); but it again reverted to Israel (2 Kings x. 28). After the Israelites were carried away captive by the Assyrians, all traces of this illegal worship were extinguished, by Josiah, king of Judah, who thus fulfilled a prophecy made to Jeroboam 350 years before (2 Kings xiii. 1, 2; xxiii. 15-18). The place was still in existence after the Captivity, and was in the possession of the Benjamites (Ezra ii. 28; Neh. vii. 32). In the time of the Maccabees Bethel was fortified by Bacchides for the king of Syria. It is not named in the New Testament; but it still existed, and was taken by Vespasian. It is described by Eusebius and Jerome as a small village; and this is the last notice of it as an inhabited place. Bethel and its name were believed to have perished until within these few years; when it has been identified with Beitin, the situation of which corresponds very exactly with the position assigned to the ancient Bethel. The ruins, which are considerable, lie upon the point of a low hill, between the heads of two shallow wadis which unite below, and run off into a deep and rugged valley. The spot is shut in by higher land on every side.

BETHER. The Mountains of Bether are only mentioned in Cant. ii. 17; viii. 14; and no place called Bether occurs elsewhere. The word means, properly, *dissection*. The mountains of Bether may therefore be *mountains of disjunction, of separation*, etc., that is, mountains cut up, divided by ravines, etc.

BETHESDA (*house or place of mercy*), a pool at the Sheep-gate of Jerusalem, built round with porches for the accommodation of the sick who sought benefit from the healing virtues of the water, and upon one of whom Christ performed the healing miracle recorded by St. John (v. 2-9). That which is now, and has long been pointed out as the Pool of Bethesda, is a dry basin or reservoir outside the northern wall of the enclosure around the Temple Mount, of which wall its southern side may be said to form a part. The east end of it is close to the present gate of St. Stephen. The pool measures 300 feet in length,

150 feet in breadth, and 75 in depth from the bottom, besides the rubbish which has been accumulated in it for ages. Dr. Robinson is of opinion that this excavation is not entitled to the designation it bears; but his arguments have been so forcibly met by more recent and not less useful inquirers, that until some better alternative is offered, it will be well to acquiesce in the local conclusion.

BETH-HORON: two places of this name are distinguished in Scripture as the Upper and Nether Beth-horon (Josh. xvi. 3, 5; xviii. 13; 1 Chron. vii. 24). The Nether Beth-horon lay in the N.W. corner of Benjamin; and between the two places was a pass called both the ascent and descent of Beth-horon, leading from the region of Gibeon (el-Jib) down to the western plain (Josh. xviii. 13, 14; x. 10, 11). Down this pass the five kings of the Amorites were driven by Joshua (Josh. x. 11). The upper and lower towns were both fortified by Solomon (1 Kings ix. 17; 2 Chron. viii. 5). Cestius Gallus, the Roman pro-consul of Syria, in his march from Caesarea to Jerusalem, after having burned Lydda, ascended the mountain by Beth-horon and encamped near Gibeon. From these intimations it would appear that in ancient times, as at the present day, the great road of communication and of heavy transport between Jerusalem and the sea-coast was by the pass of Beth-horon.

The two Beth-horons still exist under the name of Beit-Ur. The Lower Beit-Ur is upon the top of a low ridge, which is separated by a wady, or narrow valley, from the foot of the mountain upon which the Upper Beit-Ur stands. Both are now inhabited villages. The lower is very small, but foundations of large stones indicate an ancient site—doubtless that of the Nether Beth-horon. The Upper Beit-Ur is likewise small, but also exhibits traces of ancient walls and foundations. In the steep ascent to it the rock is in some parts cut away, and the path formed into steps, indicating an ancient road. On the first offset or step of the ascent are foundations of huge stones, the remains perhaps of a castle that once guarded the pass.

It is remarkable that the places are still distinguished as Beit-Ur el-Foka (the Upper), and Beit-Ur el-Tahta (the Lower).

BETHLEHEM, (*house or place of bread*, i. q. *Bread-town*;) a city of Judah (Judg. xvii. 7), six miles southward from Jerusalem, on the road to Hebron. It was generally called Bethlehem-Judah, to distinguish it from another Bethlehem in Zebulun (Josh. xix. 15; Judg. xii. 10). It is also called Ephrathah (the fruitful), and its inhabitants Ephratites (Gen. xlviii. 7; Mic. v. 2). Bethlehem is chiefly celebrated as the birth place of David and of Christ, and as the scene of the Book of Ruth. It was fortified by Rehoboam (2 Chron. xi. 6); but it does not appear to have been a place of much importance; for Micah, extolling the moral pre-eminence of Bethlehem, says, 'Thou Bethlehem Ephrathah, though thou be little among the thousands of Judah,' &c (Mic. v. 2). There never has been any dispute or doubt about the site of Bethlehem, which has always been an inhabited place, and, from its sacred associations, has been visited by an unbroken series of pilgrims and travellers. It is now a large straggling village, beautifully situ-

99. [Pool of Bethesda.]

ated on the brow of a high hill, and consisting chiefly of one broad and principal street. The houses are built for the most part of clay and bricks; and every house is provided with an apiary, the beehives of which are constructed of a series of earthen pots, ranged on the house-tops. The inhabitants are said to be 3000, and were all native Christians at the time of the most recent visits; for Ibrahim Pasha, finding that the Moslem and Christian inhabitants were always at strife, caused the former to withdraw, and left the village in quiet possession of the latter, whose numbers had always greatly predominated. The chief trade and manufacture of the inhabitants consist of beads, crosses, and other relics, which are sold at a great profit. Some of the articles, wrought in mother-of-pearl, are carved with more skill than one would expect to find in that remote quarter; and the workmanship in some instances would not discredit the artists of Britain. The people are said to be remarkable for their ferocity and rudeness, which is indeed the common character of the inhabitants of most of the places accounted holy in the East.

At the farthest extremity of the town is the Latin convent, connected with which is the Church of the Nativity, said to have been built by the empress Helena. It has suffered much from time, but still bears manifest traces of its Grecian origin; and is alleged to be the most chaste architectural building now remaining in Palestine. Two spiral staircases lead to the cave called the 'Grotto of the Nativity,' which is about 20 feet below the level of the church. This cave is lined with Italian marbles, and lighted by numerous lamps. Here the pilgrim is conducted with due solemnity to a star inlaid in the marble, marking the exact spot where the Saviour was born, and corresponding to that in the firmament occupied by the meteor which intimated that great event; he is then led to one of the sides, where, in a kind of recess, a little below the level of the rest of the floor, is a block of white marble, hollowed out in the form of a manger, and said to mark the place of the one in which the infant Jesus was laid. His attention is afterwards directed to the 'Sepulchre of the Innocents;' to the grotto in which St. Jerome passed the greater portion of his life; and to the chapels dedicated to Joseph and other saints. There has been much controversy respecting the claims of this grotto to be regarded as the place in which our Lord was born. Tradition is in its favour, but facts and probabilities are against it. It is useless to deny that there is much force in a tradition regarding a locality, which can be traced up to a period not remote from that of the event commemorated; and this event was so important as to make the scene of it a point of such unremitting attention, that the knowledge of the spot was not likely to be lost. This view would be greatly strengthened if it could be satisfactorily proved that Hadrian, to cast odium upon the mysteries of the Christian religion, not only erected statues of Jupiter and Venus over the holy Sepulchre and on Calvary, but placed one of Adonis over the spot of the Nativity at Bethlehem. This part of the evidence is examined under another head [GOLGOTHA]. Against tradition, whatever may be its value in the pre-

sent case, we have to place the utter improbability that a *subterranean* cavern like this, with a steep descent, should ever have been used as a stable for cattle, and, what is more, for the stable of a khan or caravanserai, which doubtless the 'inn' of Luke ii. 7 was. Although therefore it is true that cattle are, and always have been, stabled in caverns in the East; yet certainly not in such caverns as this, which appears to have been originally a tomb. Old empty tombs often, it is argued, afford shelter to man and cattle; but such was not the case among the Jews, who held themselves ceremonially defiled by contact with sepulchres. Besides, the circumstance of Christ's having been born in a cave would not have been less remarkable than his being laid in a manger, and was more likely to have been noticed by the Evangelist, if it had occurred: and it is also to be observed that the present grotto is at some distance from the town, whereas Christ appears to have been born in the town, and whatever may be the case in the open country, it has never been usual in towns to employ caverns as stables for cattle.

On the north-east side of the town is a deep valley, alleged to be that in which the angels appeared to the shepherds announcing the birth of the Saviour (Luke ii. 8). In the same valley is a fountain of delicious water, said with reasonable probability to be that for which David longed, and which three of his mighty men procured for him, at the hazard of their lives (2 Sam. xxiii. 15-18).

BETH-NIMRA, or simply NIMRA, a town in the tribe of Gad (Num. xxxii. 3, 36; Josh. xiii. 27), which Eusebius places five Roman miles north of Livias. This leaves no doubt of its being the same ruined city called Nimrin, south of Szalt, which Burckhardt mentions as situated near the point where the Wady Shoeb joins the Jordan.

BETHPHA'GE (*house of figs*),—comp. Cant. ii. 13), a small village, which our Lord, coming from Jericho, appears to have entered before reaching Bethany (Matt. xxi. 1; Luke xix. 29); it probably, therefore, lay near the latter place, a little below it to the east. No trace of it now exists.

BETH-REHOB. [REHOB.]

BETHSA'IDA (*fishing-town*), a town (John i. 45; Mark viii. 23) in Galilee (John xii. 21), on the western side of the sea of Tiberias, towards the middle, and not far from Capernaum (Mark vi. 45; viii. 22). It was the native place of Peter, Andrew, and Philip, and the frequent residence of Jesus. This gives some notion of the neighbourhood in which it lay; but the precise site is utterly unknown, and the very name has long eluded the search of travellers.

2. BETHSA'IDA. Christ fed the 5000 'near to a city called Bethsaida' (Luke ix. 10); but it is evident from the parallel passages (Matt. xiv. 13; Mark vi. 32-45), that this event took place, not in Galilee, but on the eastern side of the lake. This was held to be one of the greatest difficulties in sacred geography, till the ingenious Reland afforded materials for a satisfactory solution of it, by distinguishing *two* Bethsidas; one on the western, and the other on the north-eastern border of the lake. The former was undoubtedly 'the city of Andrew and Peter,' and, it is in perfect agreement with the sacred text to

conclude that it was the Bethsaida near which Christ fed the five thousand, and also, probably, where the blind man was restored to sight. It was originally only a village, called Bethsaida, but was rebuilt and enlarged by Philip the Tetrarch not long after the birth of Christ, and received the name of Julias in honour of Julia the daughter of Augustus (Luke iii. 1). Philip seems to have made it his occasional residence; and here he died, and was buried in a costly tomb.

BETH-SHA'N (*house of rest, or Rest-town*), a city belonging to the half-tribe of Manasseh, west of the Jordan, and situated in a valley of that river, where it is bounded westward by a low chain of the Gilboa mountains. It is on the road from Jerusalem to Damascus, and is about two miles from the Jordan, eighteen from the southern end of Lake Gennesareth, and twenty-three from Nazareth. It also bore the name of Scythopolis, perhaps because Scythians had settled there in the time of Josiah (B.C. 631), in their passage through Palestine towards Egypt.

Although Bethshan was assigned to Manasseh (Josh. xvii. 11), it was not conquered by that tribe (Judg. i. 17). The body of Saul was fastened to the wall of Bethshan by the Philistines (1 Sam. xxxi. 10). The ancient native name, as well as the town itself, still exists in the Beisan of the present day. It stands on a rising ground somewhat above the valley of the Jordan, or in the valley of Jezreel, where it opens into the Jordan valley. It is a poor place, containing not more than sixty or seventy houses, inhabited by Moslems. The ruins of the ancient city are of considerable extent. It was built along the banks of the rivulet which waters the town and in the valleys formed by its several branches, and must have been nearly three miles in circumference. The chief remains are large heaps of black hewn stones, with many foundations of houses and fragments of a few columns.

BETH-SHEMESH (*house of the sun, i. q. Sun-town*), a sacerdotal city (Josh. xxi. 16; 1 Sam. vi. 15; 1 Chron. vi. 59) in the tribe of Judah, on the south-east border of Dan (Josh. xv. 10), and the land of the Philistines (1 Sam. vi. 12), probably in a lowland plain (2 Kings xiv. 1); and placed by Eusebius ten Roman miles from Eleutheropolis, in the direction of the road to Nicopolis. It belonged at an early date to the Philistines, and they had again obtained possession of it in the time of Ahaz (1 Kings iv. 9; 2 Chron. xxviii. 18). It was to this place that the ark was taken by the milek king from the land of the Philistines, and it was here that, according to the present text, 'fifty thousand and threescore and ten men' were miraculously slain for irreverently exploring the sacred shrine (1 Sam. vi. 19). This number has occasioned much discussion. It appears likely that the text has been corrupted in transcription by an erroneous solution of an arithmetical sign. The Syriac and Arabic have 5070 instead of 50070. At the distance, and in the vicinity indicated by Eusebius and Jerome, a place called Ain Shems was found by Dr. Robinson, and, with great probability, identified with Beth-Shemesh. The name is applied to the ruins of an Arab village constructed of ancient materials. To the west of the village,

upon and around the plateau of a low swell or mound, are the vestiges of a former extensive city, consisting of many foundations and the remains of ancient walls of hewn stone.

BETHU'EL, son of Abraham's brother Nahor, and father of Laban and of Rebecca, whom Isaac married (Gen. xxii. 22, 23).

BETHUL'A, a place mentioned only in the Apocryphal book of Judith (iv. 5: vii. 1, 3), and which appears to have lain near the plain of Esdraelon on the south, not far from Dothaim, and to have guarded one of the passes towards Jerusalem. Its site is still undetermined.

BETH'ZUR, a town in the tribe of Judah (Josh. xv. 58), twenty Roman miles from Jerusalem, on the road to Hebron, and consequently two miles from the latter city. It was fortified by Rehoboam (2 Chron. xi. 7). The inhabitants assisted in building the walls of Jerusalem (Neh. iii. 16). Lysias was defeated in the neighbourhood by Judas Maccabeus, who fortified the place as a stronghold against Idumaea. It was besieged and taken by Antiochus Eupator, and fortified by Bacchides, whose garrison defended themselves against Jonathan Maccabeus; but it was taken and fortified by his brother Simon. Josephus calls Beth-zur the strongest fortress in Judea. Its site has not been ascertained.

BETROTHING. [MARRIAGE.]

BE'ZEK, a city over which Adoni-bezek was king (Judg. i. 4, sq.), and where Saul mustered his army to march to the relief of Jabesh-Gilead (1 Sam. xi. 8). Eusebius and Jerome mention two towns of this name close together, seventeen miles from Neapolis in Shechem, on the road to Bethshan.

BE'ZER, a city beyond the Jordan, in the tribe of Reuben, and one of the six cities of refuge (Deut. iv. 43; Josh. xx. 8). The site is unknown.

BIBLE, a name supposed to have been first applied in the fifth century to denote the collective volume of the sacred writings. The word occurs in the Prologue to Ecclesiasticus, 'the Law, the Prophets, and the rest of the books,' and 2 Tim. iv. 13, 'and the books.' Before the adoption of this name the more usual terms in the Christian Church by which the sacred books were denominated were, the Scripture or Writing, the Scriptures, the Sacred Writings, and the Sacred Letters. The term in question was first applied to the entire collection of sacred writings by St. Chrysostom. In the course of time it superseded all others both in the Eastern and Western Church, and is now everywhere the popular appellation.

The Bible is divided into the Old and New Testaments. The name Old Testament is applied to the books of Moses by St. Paul (2 Cor. iii. 14), inasmuch as the former covenant comprised the whole scheme of the Mosaic revelation, and the history of this is contained in them. The names given to the Old Testament were, the Scriptures (Matt. xxi. 42); Scripture (2 Pet. i. 20); the Holy Scriptures (Rom. i. 2); the sacred letters (2 Tim. iii. 15); the holy books, the law (John xii. 34); the law, the prophets, and the psalms (Luke xxiv. 44); the law and the prophets (Matt. v. 17); the law, the prophets, and the other books (Prol. Eclus.); the books of the old covenant (Neh. viii. 8); the book of the covenant (1 Macc. i. 57; 2 Kings xxiii. 2).

The other books (not in the canon) were called apocryphal, ecclesiastical, and deuterocanonical. The term New Testament has been in common use since the third century, and is employed by Eusebius in the same sense in which it is now commonly applied. Tertullian employs the same phrase, and also that of 'the Divine Instrument' in the same signification. For detailed information on subjects connected with BIBLE, see SCRIPTURE, HOLY.

BIER. [BURIAL.]

BIG'THAN, an eunuch in the court of king Ahasuerus, whose conspiracy against that monarch was frustrated through the disclosures of Mordecai (Esth. ii. 21).

BIL'DAD the Shuhite, one of the friends of Job, and the second of his opponents in the disputation (Job ii. 11; viii. 1; xviii. 1; xxv. 1). The Shuah of which the Septuagint makes Bildad the prince, or patriarch, was probably the district assigned to Shuah, the sixth son of Abraham by Keturah, and called by his name. This was doubtless in Arabia Petrea, if Shuah settled in the same quarter as his brothers, of which there can be little doubt; and to this region we are to refer the town and district to which he gave his name, and in which Bildad was doubtless a person of consequence, if not the chief (SHUAH).

BIL'HAH, the handmaid whom the childless Rachel bestowed upon her husband Jacob, that through her she might have children. Bilhah became the mother of Dan and Naphtali (Gen. xxx. 1-8).

BIRD-CAGES are named in Jer. v. 27; Rev. xviii. 2; and are perhaps implied in Job xli. 5, where 'playing with a bird' is mentioned. This just suffices to show that the ancient Israelites kept birds in cages; but we have no further information on the subject, nor any allusions to the singing of birds so kept. The cages were

93.

probably of the some forms which we still observe in the East, and which are shown in the annexed engraving. It is remarkable that there is no appearance of bird-cages in any of the domestic scenes which are portrayed on the mural tablets of the Egyptians.

BIRDS may be defined oviparous vertebrate animals, organized for flight.

In the Mosaic law, birds were distinguished as clean and unclean: the first being allowed for the table, because they fed on grain, seeds, and vegetables; and the second forbidden, because they subsisted on flesh and carrion. The birds most anciently used in sacrifice were, it seems, turtle-doves and pigeons. In Kitto's *Physical History of Palestine* there is a more complete notice than exists elsewhere of the actual ornithology of the Holy Land.

BIRDS'-NESTS. The law in Deut. xxii. 6, 7, directs that if one falls in with a bird's-nest with eggs or young, he shall allow the dam to

escape, and not take her as well as the nest. The reason Maimonides gives for this is, 'The eggs on which the dam is sitting, or the young ones which have need of her, are not, in general, permitted to be eaten; and when the dam is allowed to escape, she is not distressed by seeing her young ones carried off. It thus frequently happens that all are untouched, because that which might be taken may not be lawfully eaten.'

BIRTH. In Eastern countries child-birth is usually attended with much less pain and difficulty than in our northern regions; although Oriental females are not to be regarded as exempt from the common doom of woman, 'in sorrow shalt thou bring forth children' (Gen. iii. 16). It is however uncertain whether the difference arise from the effect of climate or from the circumstances attending advanced civilization; perhaps both causes operate, to a certain degree, in producing the effect. Climate must have some effect; but it is observed that the difficulty of childbirth, under any climate, increases with the advance of civilization, and that in any climate the class on which the advanced condition of society most operates finds the pangs of childbirth the most severe. Such consideration may probably account for the fact that the Hebrew women, after they had long been under the influence of the Egyptian climate, passed through the childbirth pangs with much more facility than the women of Egypt, whose habits of life were more refined and self-indulgent (Exod. i. 19). The child was no sooner born than it was washed in a bath and rubbed with salt (Exek. xvi. 4); it was then tightly swathed or bandaged to prevent those distortions to which the tender frame of an infant is so much exposed during the first days of life (Job xxxviii. 9; Ezek. xvi. 4; Luke ii. 7, 11).

It was the custom at a very ancient period for the father, while music celebrated the event, to clasp the new-born child to his bosom, and by this ceremony he was understood to declare it to be his own (Gen. i. 23; Job iii. 3; Ps. xxii. 10). This practice was imitated by those wives who adopted the children of their handmaids (Gen. xvi. 2; xxx. 3-5). The messenger who brought to the father the first news that a son was born unto him was received with pleasure and rewarded with presents (Job iii. 3; Jer. xx. 15), as is still the custom in Persia and other Eastern countries. The birth of a daughter was less noticed, the disappointment at its not being a son subduing for the time the satisfaction which the birth of any child naturally occasions. Among the Israelites, the mother, after the birth of a son, continued unclean seven days; and she remained at home during the thirty-three days succeeding the seven of uncleanness, forming altogether forty days of seclusion. After the birth of a daughter the number of the days of uncleanness and seclusion at home was doubled. At the expiration of this period she went into the tabernacle or temple, and presented a yearling lamb, or, if she was poor, two turtle-doves and two young pigeons, as a sacrifice of purification (Lev. xii. 1-8; Luke ii. 22) [CHILDREN].

BIRTH-DAYS. The observance of birth-days may be traced to a very ancient date; and the birth-day of the first-born son seems in particular to have been celebrated with a degree of

festivity proportioned to the joy which the event of his actual birth occasioned (Job i. 4, 13, 18). The birth-days of the Egyptian kings were celebrated with great pomp as early as the time of Joseph (Gen. xl. 20). These days were in Egypt looked upon as holy; no business was done upon them, and all parties indulged in festivities suitable to the occasion. Every Egyptian attached much importance to the day, and even to the hour of his birth; and it is probable that, as in Persia, each individual kept his birth-day with great rejoicings, welcoming his friends with all the amusements of society, and a more than usual profusion of delicacies of the table. In the Bible there is no instance of birth-day celebrations among the Jews themselves. The example of Herod the tetrarch (Matt. xiv. 6), the celebration of whose birth-day cost John the Baptist his life, can scarcely be regarded as such, the family to which he belonged being notorious for its adoption of heathen customs. In fact, the later Jews at least regarded birth-day celebrations as parts of idolatrous worship; and this probably on account of the idolatrous rites with which they were observed in honour of those who were regarded as the patron gods of the day on which the party was born.

BIRTH-RIGHT. This term denotes the rights or privileges belonging to the first-born among the Hebrews. The particular advantages which these conferred were the following:—

1. A right to the priesthood. The first-born became the priest in virtue of his priority of descent, provided no blemish or defect attached to him. Reuben was the first-born of the twelve patriarchs, and therefore the honour of the priesthood belonged to his tribe. God, however, transferred it from the tribe of Reuben to that of Levi (Num. iii. 12, 13; viii. 18). Hence the first-born of the other tribes were redeemed from serving God as priests, by a sum not exceeding five shekels. Being presented before the Lord in the temple, they were redeemed immediately after the thirtieth day from their birth (Num. xviii. 15, 16; Luke ii. 22). It is to be observed, that only the first-born who were *fit for the priesthood* (i.e. such as had no defect, spot, or blemish) were thus presented to the priest.

2. The first-born received a double portion of his father's property. There is some difficulty in determining precisely what is meant by a double portion. Some suppose that half the inheritance was received by the elder brother, and that the other half was equally divided among the remaining brethren. This is not probable. The Rabbins believe that the elder brother received twice as much as any of the rest; and there is no reason to doubt the correctness of this opinion. When the first-born died before his father's property was divided, and left children, the right of the father descended to the children, and not to the brother next of age.

3. He succeeded to the official authority possessed by his father. If the latter was a king, the former was regarded as his legitimate successor, unless some unusual event or arrangement interfered.

After the law was given through Moses, the right of primogeniture could not be transferred from the first-born to a younger child at the father's option. In the patriarchal age, however,

it was in the power of the parent thus to convey it from the eldest to another child (Deut. xxi. 15-17; Gen. xxv. 31, 32).

It is not difficult to perceive the reason why the first-born enjoyed greater privileges than the rest of the children. The peculiar honour attaching to them is easily accounted for. They are to be viewed as having reference to the Redeemer, the first-born of the Virgin. Hence in the Epistle to the Romans (viii. 29), it is written concerning the Son, 'that he might be the *first-born* among many brethren;' and in Col. i. 18, 'who is the beginning, the *first-born* from the dead; that in all things he might have the pre-eminence' (see also Heb. i. 4, 5, 6). As the first-born had a double portion, so the Lord Jesus, as Mediator, has an inheritance superior to his brethren; he is exalted to the right hand of the Majesty on high, where he reigns until all his enemies shall be subdued. The universe is his rightful dominion in his mediatorial character. Again, he alone is a true priest: he fulfilled all the functions of the sacerdotal office; and the Levites, to whom, under the law, the priesthood was transferred from all the first-born of Israel, derived the efficacy of their ministrations from their connection with the great high-priest.

BISHOP. The active controversy in which the subject of episcopacy has been involved although it has not reconciled conflicting opinions, has brought out the historical facts in their fullest clearness. The able and candid on opposite sides can scarcely be said to differ as to the facts themselves; but they differ in their estimate of them.

The Apostles originally appointed men to superintend the spiritual, and occasionally even the secular wants of the churches (Acts xiv. 23; xi. 30; see also 2 Tim. ii. 2), who were ordinarily called *elders*, from their age, sometimes *overseers* (bishops), from their office. They are also said to *preside* (1 Thess. v. 12; 1 Tim. v. 17), never to *rule*, which has far too despotic a sound. In the Epistle to the Hebrews (xiii. 7, 17, 24) they are named *leading men* (comp. Acts xv. 22); and figuratively, *shepherds* (Ephes. iv. 11). But that they did not always teach is clear from 1 Tim. v. 17; and the name Elders proves that originally age, experience, and character were their most necessary qualifications. They were to be married men with families (1 Tim. iii. 4), and with converted children (Tit. i. 6). In the beginning there had been no time to train teachers, and teaching was regarded far more in the light of a gift than an office; yet St. Paul places 'ability to teach' among episcopal qualifications (1 Tim. iii. 2; Titus i. 9; the latter of which passages should be translated, 'that he may be able both to exhort men by sound teaching, and also to refute opposers'). That teachers had obtained in St. Paul's day a fixed official position, is manifest from Gal. vi. 6, and 1 Cor. ix. 14, where he claims for them a right to worldly maintenance: in fact, that the *shepherds* ordered to 'feed the flock,' and be its 'overseers' (1 Pet. v. 2), were to feed them with knowledge and instruction, will never be disputed, except to support a hypothesis. The *leaders* also, in Heb. xiii. 7, are described as 'speaking unto you the word of God.' Ecclesiastical history joins in proving that the two offices of teaching and superintending were, with few

exceptions, combined in the same persons, as, indeed, the nature of things dictated.

That during St. Paul's lifetime no difference between elders and bishops yet existed in the consciousness of the church, is manifest from the entire absence of distinctive names (Acts xx. 17-28; 1 Pet. v. 1, 2). The mention of bishops and deacons in Phil. i. 1, and 1 Tim. iii., without any notice of elders, proves that at that time no difference of *order* subsisted between bishops and elders. A formal ceremony, it is generally believed, was employed in appointing elders, although it does not appear that as yet any fixed name was appropriated to the idea of ordination. In 1 Cor. xvi. 15 we find the house of Stephanas to have volunteered the task of 'ministering to the saints;' and that this was a ministry 'of the word,' is evident from the Apostle's urging the church 'to submit themselves to such.' It would appear then that a formal investiture into the office was not as yet regarded *essential*. Be this as it may, no one doubts that an ordination by laying on of hands soon became general or universal. Hands were first laid on not to bestow an office, but to solicit a spiritual gift (1 Tim. iv. 14; 2 Tim. i. 6; Acts xiii. 3; xiv. 25; xv. 40). 'To the same effect Acts viii. 17; xix. 6;—passages which explain Heb. vi. 2. On the other hand, the absolute silence of the Scriptures, even if it were not confirmed, as it is, by positive testimony, would prove that no idea of consecration, as distinct from ordination, at that time existed at all; and, consequently, although individual elders may have really discharged functions which would afterwards have been called episcopal, it was not by virtue of a second ordination, nor, therefore, of episcopal rank.

The Apostles themselves, it is held by some, were the real *bishops* of that day, and it is quite evident that they performed many episcopal functions. It may well be true, that the only reason why no bishops (in the modern sense) were then wanting was, because the Apostles were living; but it cannot be inferred that in any strict sense prelates are co-ordinate in rank with the Apostles, and can claim to exercise their powers. The later 'bishop' did not come forward as a successor to the Apostles, but was developed out of the presbyter; much less can it be proved, or alleged with plausibility, that the Apostles took any measures for securing substitutes for themselves (in the high character of Apostles) after their decease. It has been with many a favourite notion that Timothy and Titus exhibit the episcopal type even during the life of Paul; but this is an obvious misconception. They were attached to the person of the Apostle, and not to any one church. In the last Epistle written by him (2 Tim. iv. 9) he calls Timothy suddenly to Rome, in words which prove that the latter was not, at least as yet, bishop, either of Ephesus or of any other church. That Timothy was an *evangelist* is distinctly stated (2 Tim. iv. 5), and that he had received spiritual gifts (i. 6, &c.); there is then no difficulty in accounting for the authority vested in him (1 Tim. v. 1; xix. 22), without imagining him to have been a bishop; which is in fact disproved even by the same Epistle (i. 3). That Titus, moreover, had no local attachment to Crete, is plain from Titus iii. 13, to say nothing of the earlier Epistle, 1 Cor. *passim*. Nor is it true that the episcopal

power developed itself out of wandering Evangelists any more than out of the Apostles.

On the other hand it would seem that the bishop began to elevate himself above the presbyter while the Apostle John was yet alive, and in churches to which he is believed to have peculiarly devoted himself. The meaning of the title *angel*, in the opening chapters of the Apocalypse, has been mystically explained by some; but its true meaning is clear from the nomenclature of the Jewish synagogues. In them, we are told, the minister who ordinarily read the prayers of the congregation, besides acting as their chief functionary in matters of business, was entitled *messenger of the church*. The term 'angel of the church' appears therefore to be nothing but a harsh Hebraism for 'minister of the church.' We therefore here see a single officer, in these rather large Christian communities, elevated into a peculiar prominence, which has been justly regarded as episcopal.

Episcopalians, Presbyterians, and Congregationalists agree in one point, viz. that (because of its utility and general convenience) it is lawful for Christians to take a step for which they have no clear precedent in the Scripture, that of breaking up a church, when it becomes of unwieldy magnitude, into fixed divisions, whether parishes, or congregations. The question then arises, whether the organic union is to be still retained at all. To this (1) Congregationalists reply in the negative, saying that the congregations in different parts of a great city no more need to be in organic union, than those of two different cities; (2) Presbyterians would keep up the union by means of a synod of the elders; (3) Episcopalians desire to unite the separate churches by retaining them under the supervision of a single head—the bishop. It seems impossible to refer to the practice of the Apostles as deciding in favour of *any one* of these methods; for the case had not yet arisen which could have led to the discussion. The city churches had not yet become so large as to make subdivision positively necessary; and, as a fact, it did not take place. To organize distant churches into a fixed and formal connection by synods of their bishops, was, of course, quite a later process; but such unions are by no means rejected, even by Congregationalists, as long as they are used for deliberation and advice, not as assemblies for ruling and commanding. The *spirit* of Episcopacy depends far less on the episcopal form itself, than on the size and wealth of dioceses, and on the union of bishops into synods, whose decisions are to be authoritative on the whole church: to say nothing of territorial establishment and the support of the civil government. If, under any ecclesiastical form, either oppression or disorder should arise, it cannot be defended; but no form is a security against such evils. Our experience may, in these later times, possibly show us which of these systems is on the whole preferable; but the discussion must belong to ecclesiastical history, and would be quite out of place here.

BITH'ON (2 Sam. ii. 29). This name has the same meaning as Bether. It probably denotes a region of hills and valleys, and not any definite place.

BITHYN'IA, a province of Asia Minor, on the Euxine Sea and the Propontis; bounded

on the west by Mysia, on the south and east by Phrygia and Galatia, and on the east by Paphlagonia. The Bithynians were a rude and uncivilized people, Thracians who had colonized this part of Asia, and occupied no towns, but lived in *villages*. That Christian congregations were formed at an early period in Bithynia, is evident from the Apostle Peter having addressed the first of his Epistles to them (1 Pet. i. 1). The Apostle Paul was at one time inclined to go into Bithynia with his assistants Silas and Timothy, 'but the Spirit suffered him not' (Acts xvi. 7).

BITTER, BITTERNESS. Bitterness (Exod. i. 14; Ruth i. 20; Jer. ix. 15) is symbolical of affliction, misery, and servitude. It was for this reason that, in the celebration of the Passover, the servitude of the Israelites in Egypt was typically represented by *bitter herbs*.

The gall of bitterness (Acts viii. 23) describes a state of extreme wickedness, highly offensive to God, and hurtful to others.

A root of bitterness (Heb. xiii. 15) expresses a wicked or scandalous person, or any dangerous sin leading to apostasy.

BITTER HERBS, literally *bitters*. There has been much difference of opinion respecting the kind of herbs denoted by this word.

It however seems very doubtful whether any particular herbs were intended by so general a term as *bitters*; it is far more probable that it denotes whatever bitter herbs, obtainable in the place where the Passover was eaten, might be fitly used with meat.

BITTERN. The word thus rendered occurs but three times in Scripture (Isa. xiv. 23; xxxiv. 11; and Zeph. ii. 14), and has been variously interpreted—owl, osprey, tortoise, porcupine, otter, and in the Arabic, bustard. Bochart, Shaw, Lowth, and other great authorities, have supported the opinion that it refers to the porcupine; but this is in the highest degree improbable, for the texts above quoted make it clear that the animal referred to must from its habits be not a hedgehog, nor even a mammal, but a bird. We think the term most applicable to the heron tribes, whose beaks are formidable spikes that often kill hawks; a fact well known to Eastern hunters. Of these, the common night heron, with its pencil of white feathers in the crest, is a species not uncommon in the marshes of Western Asia; and of several species of bittern, *Ardea (botaurus) stellaris* has pointed long feathers on the neck and breast, freckled with black, and a strong pointed bill. After the breeding-season it migrates and passes the winter in the south, frequenting the marshes and rivers of Asia and Europe, where it then roosts high above ground, uttering a curious note before and after its evening flight, very distinct from the booming sound produced by it in the breeding-season, and while it remains in the marshes. Though not building, like the stork, on the tops of houses, it resorts, like the heron, to ruined structures, and we have been informed that it has been seen on the summit of Taik Kesra at Ctesiphon.

BITUMEN. [ASPHALTUM.]

BLACK. Although the Orientals do not wear black in mourning, they, as did the ancient Jews, regard the colour as a symbol of affliction, disaster, and privation. In fact, the custom of wearing black in mourning is a sort of visible ex-

pression of what is in the East a figure of speech. In Scripture blackness is used as symbolical of afflictions occasioned by drought and famine (Job xxx. 30; Jer. xiv. 2; Lam. iv. 8; v. 10).

In connection with this subject it may be remarked that black is studiously avoided in dress by all Orientals, except in certain garments of hair or wool, which are naturally of that colour. Black is also sometimes imposed as a mark of humiliating distinction by dominant nations upon subject or tributary tribes, the most familiar instance of which is the obligation laid upon the Jews in Turkey of wearing black turbans.

BLASPHEMY signifies a false, irreverent, injurious use of God's names, attributes, words, and works. Whenever men *intentionally* and *directly* attack the perfections of Jehovah, and thus lessen the reverence which others entertain for him, they are *blasphemers*.

By the Mosaic law *blasphemy* was punished with death (Lev. xxiv. 10-16); and the laws of some countries still visit it with the same punishment. Fines, imprisonment, and various corporal inflictions are annexed to the crime by the laws of Great Britain. It is matter, however, of sincere satisfaction, that there are very few instances in which these enactments require to be enforced.

Much has been said and written respecting the *blasphemy* against the Holy Ghost, usually but improperly denominated the *unpardonable sin* against the Holy Ghost. Some refer it to continued opposition to the Gospel, i. e. obstinate impitenence or final unbelief.

But we object to this opinion, because it generalizes the nature of the sin in question. On the contrary, the Scripture account narrows it to a particular sin of a special kind, discountenancing the idea that it is of frequent occurrence, and marked by no circumstances of unwonted aggravation. Besides, all the notices which we have refer it not so much to a state of mind, as to the outward manifestation of a singularly malignant disposition by the utterance of the *lips*.

The occasion on which Christ introduced his mention of it (Matt. xii. 31, &c.; Mark iii. 28, &c.), the subsequent context, and, above all, the words of Mark iii. 30 ('because they said, He hath an unclean spirit') indicate, with tolerable plainness, that the sin in question consisted in attributing the miracles wrought by Christ, or his Apostles in His name, to the agency of Satan. It was by the power of the Holy Ghost, given to the Redeemer without measure, that he cast out devils: and whoever maligned the Saviour by affirming that an unclean spirit actuated and enabled him to expel other spirits, maligned the Holy Ghost.

It is difficult to discover the 'sin unto death,' noticed by the Apostle John (1 John v. 16), although it has been generally thought to coincide with the blasphemy against the Holy Spirit; but the language of John does not afford data for pronouncing them one and the same. The first three Gospels alone describe the *blasphemy* which shall not be forgiven: from it the 'sin unto death' stands apart.

BLASTUS, a man who was *cubicularius* to king Herod Agrippa, or who had the charge of his bedchamber (Acts xii. 20). Such persons

had usually great influence with their masters, and hence the importance attached to Blastus's favouring the peace with Tyre and Sidon.

BLESSING. The terms 'blessing' and 'to bless' occur very often in the Scriptures, and in applications too obvious to require explanation or comment. The patriarchal blessings of sons form the exception, these being, in fact, prophecies rather than blessings, or blessings only in so far as they for the most part involved the invocation and the promise of good things to come upon the parties concerned. The most remarkable instances are those of Isaac 'blessing' Jacob and Esau (Gen. xxvii.); of Jacob 'blessing' his twelve sons (Gen. xlix.); and of Moses 'blessing the twelve tribes' (Deut. xxxiii.).

BLESSING, VALLEY OF. A translation of the name Valley of Berachah (benediction), which was borne by the valley in which Jehoshaphat celebrated the miraculous overthrow of the Moabites and Ammonites. It was from this circumstance it derived its name; and from the indications in the text, it must have been in the tribe of Judah, near the Dead Sea and Engedi, and in the neighbourhood of Tekoa (2 Chron. xx. 23-26).

BLINDING. [PUNISHMENTS.]

BLINDNESS. The frequent occurrence of blindness in the East has always excited the astonishment of travellers. Volney says that, out of a hundred persons in Cairo, he has met twenty quite blind, ten wanting one eye, and twenty others having their eyes red, purulent, or blemished. This is principally owing to the Egyptian ophthalmia, which is endemic in that country and on the coast of Syria. This disease is contagious; but it is not often communicated from one individual to another. It is not confined to the East, but appears here and there throughout Europe. The French and English suffered greatly from it while they were in Egypt, and subsequently.

Small pox is another great cause of blindness in the East.

In the New Testament, blind mendicants are frequently mentioned (Matt. ix. 27; xii. 22; xx. 30; xxi. 14; John v. 3). The blindness of Bar Jesus (Acts xiii. 6) was miraculously produced, and of its nature we know nothing. Examples of blindness from old age occur in Gen. xxvii. 1; 1 Kings xiv. 4; 1 Sam. iv. 15. The Syrian army that came to apprehend Elisha was suddenly smitten with blindness in a miraculous manner (2 Kings vi. 18); and so also was St. Paul (Acts ix. 9). The Mosaic law has not neglected to inculcate humane feelings towards the blind (Lev. xix. 14; Deut. xxvii. 18). Blindness is sometimes threatened in the Old Testament as a punishment for disobedience (Deut. xxviii. 28; Lev. xxvi. 16; Zeph. i. 17).

BLOOD. There are two respects in which the ordinances of the Old and New Testaments concerning blood deserve notice here—the prohibition of its use as an article of food, and the appointment and significance of its use in the ritual of sacrifice; both of which appear to rest on a common ground.

In Gen. ix. 4, where the use of animal food is allowed, it is first absolutely forbidden to eat 'flesh with its soul, its blood;' which expression, were it otherwise obscure, is explained by the

mode in which the same terms are employed in Deut. xii. 23. In the Mosaic law the prohibition is repeated with frequency and emphasis although it is generally introduced in connection with sacrifices, as in Lev. iii. 17; vii. 26; xvii. 10-14; xix. 26; Deut. xii. 16-23; xv. 23. In cases where the prohibition is introduced in connection with the lawful and unlawful articles of diet, the reason which is generally assigned in the text is, that 'the blood is the soul;' and it is ordered that it be poured on the ground like water. But where it is introduced in reference to the portions of the victim which were to be offered to the Lord, then the text, in addition to the former reason, insists that 'the blood expiates by the soul' (Lev. xvii. 11, 12). This strict injunction not only applied to the Israelites, but even to the strangers residing among them. The penalty assigned to its transgression was the being 'cut off from the people;' by which the punishment of death appears to be intended (cf. Heb. x. 28), although it is difficult to ascertain whether it was inflicted by the sword or by stoning. To this is to be added, that the Apostles and elders, assembled in council at Jerusalem, when desirous of settling the extent to which the ceremonial observances were binding upon the converts to Christianity, renewed the injunction to abstain from blood, and coupled it with things offered to idols (Acts xv. 29).

In direct opposition to this emphatic prohibition of blood in the Mosaic law, the customs of uncivilized heathens sanctioned the cutting of slices from the living animal, and the eating of the flesh while quivering with life and dripping with blood. Even Saul's army committed this barbarity, as we read in 1 Sam. xiv. 32; and the prophet also lays it to the charge of the Jews in Ezek. xxxiii. 25. This practice, according to Bruce's testimony, exists at present among the Abyssinians. Moreover, pagan religions, and that of the Phenicians among the rest, appointed the eating and drinking of blood, mixed with wine, as a rite of idolatrous worship, and especially in the ceremonial of swearing. To this the passage in Ps. xvi. 4, appears to allude.

The appointment and significance of the use of blood in the ritual of sacrifice belongs indeed to this head; but their further notice will be more appropriately pursued in the art. SACRIFICE.

BLOOD-REVENGE, or revenge for bloodshed, was regarded among the Jews, as among all the ancient and Asiatic nations, not only as a right, but even as a duty, which devolved upon the nearest relative of the murdered person.

The Mosaic law (Num. xxxv. 31) expressly forbids the acceptance of a ransom for the forfeited life of the murderer, although it might be saved by his seeking an asylum at the altar of the Tabernacle, in case the homicide was accidentally committed (Exod. xxi. 13; 1 Kings i. 50; ii. 28). If, however, after Judaism had been fully developed, no other sanctuary had been tolerated but that of the Temple at Jerusalem, the chances of escape of such an homicide from the hands of the avenger, ere he reached the gates of the Temple, must have become less in proportion to the distance of the spot where the

murder was committed from Jerusalem: six cities of refuge were therefore appointed for the momentary safety of the murderer, in various parts of the kingdom, the roads to which were kept in good order to facilitate his escape (Deut. xix. 3). Thither the avenger durst not follow him, and there he lived in safety until a proper examination had taken place before the authorities of the place (Jos. xx. 6, 9), in order to ascertain whether the murder was a wilful act or not. In the former case he was instantly delivered up to the *Goel*, or avenger of blood, against whom not even the altar could protect him (Exod. xxi. 14; 1 Kings ii. 29); in the latter case, though he was not actually delivered into the hands of the *Goel*, he was notwithstanding not allowed to quit the precincts of the town, but was obliged to remain there all his lifetime, or until the death of the high-priest (Num. xxxv. 6; Deut. xix. 3; Josh. xx. 1-6), if he would not run the risk of falling into the hands of the avenger, and be slain by him with impunity (Num. xxxv. 26; Deut. xix. 6). That such a voluntary exile was considered more in the light of a punishment for manslaughter than a provision for the safe retreat of the homicide is evident from Num. xxxv. 32, where it is expressly forbidden to release him from his confinement on any condition whatever. That the death of the high-priest should have been the means of restoring him to liberty was probably owing to the general custom among the ancients, of granting free pardon to certain prisoners at the demise of their legitimate prince or sovereign, whom the high-priest represented, in a spiritual sense, among the Jews. These wise regulations of the Mosaic law, as far as the spirit of the age allowed it, prevented all family hatred, persecution, and war from ever taking place, as was inevitably the case among the other nations, where any bloodshed whatever, whether wilful or accidental, laid the homicide open to the *dutious* revenge of the relatives and family of the slain person, who again in their turn were then similarly watched and hunted by the opposite party, until a family-war of extermination had legally settled itself from generation to generation, without the least prospect of ever being brought to a peaceful termination. Nor do we indeed find in the Scriptures the least trace of any abuse or mischief ever having arisen from these regulations (comp. 2 Sam. ii. 19, sq.; iii. 21, sq.).

That such institutions are altogether at variance with the spirit of Christianity may be judged from the fact that revenge, so far from being counted a right or duty, was condemned by Christ and his apostles as a vice and passion to be shunned (Acts vii. 60; Matt. v. 44; Luke vi. 28; Rom. xii. 14, sq.; comp. Rom. xiii., where the power of executing revenge is vested in the authorities alone).

BLOODY SWEAT. According to Luke xxii. 44, our Lord's sweat was 'as great drops of blood falling to the ground.' Michaelis takes the passage to mean nothing more than that the drops were as large as falling drops of blood. This, which also appears to be a common explanation, is liable to some objection. For, if an ordinary observer compares a fluid which he is accustomed to see colourless, to blood, which is

so well known and so well characterised by its colour, and does not specify any particular point of resemblance, he would more naturally be understood to allude to the colour, since it is the most prominent and characteristic quality.

There are several cases recorded by the older medical writers, under the title of bloody sweat. With the exception of one or two instances, not above suspicion of fraud, they have, however, all been cases of general hemorrhagic disease, in which blood has flowed from different parts of the body, such as the nose, eyes, ears, lungs, stomach, and bowels, and, lastly, from various parts of the skin. When blood oozes from the skin, it must reach the external surface through orifices in the epidermis, which have been produced by rupture, or we must suppose that it has been extravasated into the sweat-ducts. But, even in this latter case, we must no more consider hemorrhage of the skin to be a modification of the function of sweating, than bleeding from the nose to be a modification of the secretion of mucus. The blood is simply mixed with the sweat, precisely in the same way as, when spit up from the lungs, it is mixed with mucus and saliva in passing through the air-tubes and mouth. It is, therefore, incorrect to suppose that hemorrhage from the skin indicates a state of body at all analogous to that which occasions sweating.

But while experience teaches that cutaneous hemorrhage, when it does occur, is the result of disease, or, at any rate, of a very peculiar idiosyncrasy, and is in no way indicative of the state of the mind, daily experience and the accumulated testimony of ages prove that intense mental emotion and pain produce on the body effects even severer in degree, but of a very different nature. It is familiar to all that terror will blanch the hair, occasion momentary paralysis, fainting, convulsions, melancholy, imbecility, and even sudden death. Excessive grief and joy will produce some of the worst of these. Sweat is caused by fear, and by bodily pain; but not by sorrow, which excites no secretion except tears.

It is very evident, then, that medical experience does not bear at all upon the words of St. Luke. The circumstances connected with our Lord's sufferings in the garden must be considered by themselves, without any reference to actual observation; otherwise, we shall be in danger of rendering a statement, which may be easily received on its own grounds, obscure and contradictory.

BOANERGES (*sons of thunder*, Mark iii. 17), a surname given by Christ to James and John, probably on account of their fervid, impetuous spirit.

BOAR occurs in Lev. xi. 7; Deut. xiv. 8; Ps. lxxx. 13; Prov. xi. 22; Isa. lxxv. 4; lxxvi. 3, 17.

The Hebrew, Egyptian, Arabian, Phœnician, and other neighbouring nations abstained from hog's flesh, and consequently, excepting in Egypt, and (at a later period) beyond the Sea of Galilee, no domesticated swine were reared. Although in Palestine, Syria, and Phœnicia hogs were rarely domesticated, wild boars are often mentioned in the Scriptures, and they were frequent in the time of the Crusades. At present

wild boars frequent the marshes of the Delta, and are not uncommon on Mount Carmel and in the valley of Ajalah. They are abundant about the sources of the Jordan, and lower down where the river enters the Dead Sea. The wild boar of the East, though commonly smaller than the old breeds of domestic swine, grows occasionally to a very large size. It is passive while unmolested, but vindictive and fierce when roused. It is doubtful whether the species is the same as that of Europe, for the farrow are not striped: most likely it is identical with the wild hog of India.

1. BO'AZ, a wealthy Bethlehemite, and near kinsman of the first husband of Ruth, whom he eventually espoused under the obligations of the Levirate law, which he willingly incurred. The conduct of Boaz—his fine spirit, just feeling, piety, and amenity of manners—appears to great advantage in the book of Ruth, and forms an interesting portraiture of the condition and deportment of what was in his time the upper class of Israelites. By his marriage with Ruth he became the father of Obed, from whom came Jesse, the father of David. He was thus one of the direct ancestors of Christ, and as such his name occurs in Matt. i. 5 [RUTH; GENEALOGY].

2. BOAZ, the name given to one of the two brazen pillars which Solomon erected in the court of the Temple [JACHIN and BOAZ].

BOCHIM (*weepings*), the name given to a place (probably near Shiloh, where the tabernacle then was), where an 'angel of the Lord' reproved the assembled Israelites for their disobedience in making leagues with the inhabitants of the land, and for their remissness in taking possession of their heritage. This caused the bitter weeping among the people for which the place took its name (Judg. iii. 1).

BOHAN (*a thumb*), a Reubenite, in whose honour a stone was erected which afterwards served as a boundary-mark on the frontier between Judah and Benjamin (Josh. xv. 6; xviii. 17). It does not appear from the text whether this stone was a sepulchral monument, or set up to commemorate some great exploit performed by this Bohan in the conquest of Canaan.

BOND, BONDAGE. [SLAVERY.]

BOOK. [WRITING.]

BOOK OF LIFE. In Phil. iv. 3, Paul speaks of Clement and other of his fellow-labourers, 'whose names are written in the book of life.' On this Heinrichs observes that as the future life is represented under the image of a citizenship, community, political society, just before (iii. 20), it is in agreement with this to suppose (as usual) a catalogue of the citizens' names, both natural and adopted (Luke x. 20; Rev. xx. 15; xxi. 27), and from which the unworthy are erased (Rev. iii. 5). Thus the names of the good are often represented as *registered in heaven* (Luke x. 20). But this by no means implies a certainty of salvation, but only that at that time the persons were on the list, from which (as in Rev. iii. 5) the names of unworthy members might be erased. This explanation is sufficient and satisfactory for the other important passage in Rev. iii. 5, where the glorified Christ promises to 'him that overcometh,' that he will not blot his name out of the book of life. When God threatened to destroy the Israelites altogether, and make of Moses a great nation—the legislator im-

plored forgiveness for them, and added—'if not, blot me, I pray thee, out of the book which thou hast written' (Exod. xxxii. 34). By this he meant nothing so foolish or absurd as to offer to forfeit eternal life in the world to come—but only that he, and not they, should be cut off from the world and brought to an untimely end.

A *sealed book* (Isa. xxix. 11; Rev. v. 1-3) is a book whose contents are secret, and have for a very long time been so, and are not to be published till the seal is removed.

A *book or roll written within and without*, i. e. on the back side (Rev. v. 1), may be a book containing a long series of events; it not being the custom of the ancients to write on the back side of the roll, unless when the inside would not contain the whole of the writing.

To *eat a book* signifies to consider it carefully, and digest it well in the mind (Jer. xv. 16; Rev. x. 9).

BOOTH, a hut made of branches of trees, and thus distinguished from a tent properly so called. Such were the booths in which Jacob sojourned for a while on his return to the borders of Canaan, whence the place obtained the name of Succoth (Gen. xxxiii. 17); and such were the temporary green sheds in which the Israelites were directed to celebrate the Feast of Tabernacles (Lev. xxiii. 42, 43). As this observance was to commemorate the abode of the Israelites in the wilderness, it has been rather unwisely concluded by some that they there lived in such booths. But it is evident from the narrative, that, during their wanderings, they dwelt in tents; and, indeed, where, in that treeless region, could they have found branches with which to construct their booths? Such structures are only available in well-wooded regions; and it is obvious that the direction to celebrate the feast in booths, rather than in tents, was given because, when the Israelites became a settled people in Palestine, and ceased to have a general use of tents, it was easier for them to erect a temporary shed of green branches than to provide a tent for the occasion.

BORROWING. On the general subject, as a matter of law or precept, see LOAN.

In Exod. xii. 35, we are told that the Israelites, when on the point of their departure from Egypt, 'borrowed of the Egyptians jewels of silver, and jewels of gold, and raiment'; and it is added, that 'the Lord gave the people favour in the sight of the Egyptians, so that they lent unto them such things as they required. And they spoiled the Egyptians.' This was in pursuance of a Divine command which had been given to them through Moses (Exod. iii. 22; xi. 2). This has suggested a difficulty, seeing that the Israelites had certainly no intention to return to Egypt, or to restore the valuables which they thus obtained from their Egyptian 'neighbours'. The general acceptance of the word rendered *borrow* is to *request or demand*, and some have affirmed that it should be so rendered here—that the Israelites did not *borrow* the valuables, but *demand*ed them of their Egyptian neighbours, as an indemnity for their services, and for the hard and bitter bondage which they had endured. To this it has been objected, that the Israelites had been public servants, rendering certain onerous

services to the state, but not in personal bondage to individual Egyptians, whom, nevertheless, they, according to this account, mulcted of much valuable property in compensation for wrongs committed by the state. And that this mode of extorting private and partial compensation for public wrong will not stand the test of our rules of public morality, any more than that of borrowing without the intention to restore. Others are inclined to adhere to the old interpretation, that the Israelites actually did *borrow* the valuables of the Egyptians, with the understanding, on the part of the latter, that they were to be restored. Turn which way we will in this matter, there is but a choice of difficulties; and this leads us to suspect that we are not acquainted with all the facts bearing on the case, in the absence of which we spend our strength for nought in labouring to explain it. One of the difficulties is somewhat softened by the conjecture of Professor Bush, who, in his Note on Exod. xi. 2, observes, 'We are by no means satisfied that Moses was required to *command* the people to practise the device here mentioned. We regard it rather, as far as they were concerned, as the mere *prediction* of a fact that should occur.'

BOSOM. It is usual with the Western Asiatics to carry various sorts of things in the bosom of their dress, which forms a somewhat spacious depository, being wide above the girdle, which confines it so tightly around the waist as to prevent anything from slipping through.

To *have one in our bosom* implies kindness, secrecy, intimacy (Gen. xvi. 5; 2 Sam. xii. 8). Christ is *in the bosom of the Father*; that is, possesses the closest intimacy with, and most perfect knowledge of, the Father (John i. 18). Our Saviour is said to *carry his lumps in his bosom*, which touchingly represents his tender care and watchfulness over them.

BOSSES, the thickest and strongest parts, the prominent points of a buckler [ARMS, ARMOR].

BOTTLE. Natural objects, it is obvious, would be the earliest things employed for holding and preserving liquids; and of natural objects those would be preferred which either

than any other natural product. The first bottles therefore were probably made of the skins of animals. Accordingly we learn from Herodotus that it was customary among the ancient Egyptians to use bottles made of skins; and this is confirmed by the monuments, on which such various forms as the above occur. Fig. 1 is curious as showing the mode in which they were carried by a yoke; and as it balances a large bottle in a case, this skin may be presumed to have contained wine. Fig. 7 is such a skin of water as in the agricultural scenes is suspended from the bough of a tree, and from which the labourers occasionally drink. Figs. 2 and 3 represent two men with skins at their backs, belonging to a party of nomades entering Egypt. This party has been with some plausibility supposed to represent the sons of Jacob.

Skin-bottles doubtless existed among the Hebrews even in patriarchal times; but the first clear notice of them does not occur till Joshua ix. 4, where it is said that the Gibeonites, wishing to impose upon Joshua as if they had come from a long distance, took 'old sacks upon their asses, and wine-bottles *old and rent and bound up*.' Age, then, had the effect of wearing and tearing the bottles in question, which must consequently have been of skin. Our Saviour's language (Matt. ix. 17; Luke v. 37, 38; Mark ii. 22) is thus clearly

95.

explained: 'Men do not put new wine into old bottles, else the bottles break and the wine runneth out, and the bottles perish;' 'New wine must be put in new bottles, and both are preserved.' To the conception of an English reader who knows of no bottles but such as are made of clay or glass, the idea of bottles breaking through age presents an insuperable difficulty; but skins may become 'old, rent, and bound up;' they also prove, in time, hard and inelastic, and would in such a condition be very unfit to hold new wine, probably in a state of active fermentation. Even new skins might be unable to resist the internal pressure caused by fermentation.

As the drinking of wine is illegal among the Moslems who are now in possession of Western Asia, little is seen of the ancient use of skin-bottles for wine, unless among the Christians of Georgia, Armenia, and Lebanon, where they are still thus employed. In Georgia the wine is stowed in large ox-skins, and is moved or kept at hand for use in smaller skins of goats or kids. But skins are still most extensively used throughout Western Asia for water. Their most usual forms are shown in the above cut (95), which also displays the manner in which they are carried. The water-carriers bear water in such skins and in this manner,

96.

presented themselves nearly or quite ready for use, or such as could speedily be wrought into the requisite shape. The skins of animals afford in themselves more conveniences for the purpose

It is an error to represent bottles as being made exclusively of dressed or undressed skins among the ancient Hebrews. Among the Egyptians ornamental vases were of hard stone, alabaster, glass, ivory, bone, porcelain, bronze, silver, or gold; and also for the use of the people generally, of glazed pottery or common earthenware. As early as Thothmes III., assumed to be the Pharaoh of the Exodus, *n.c.* 1490, vases are known to have existed of a shape so elegant and of workmanship so superior, as to show that the art was not, even then, in its infancy.

Many of the bronze vases found at Thebes and in other parts of Egypt are of a quality which cannot fail to excite admiration, and which proves the skill possessed by the Egyptians in the art of working and compounding metals. Their shapes are most various—some neat, some plain, some grotesque; some in form not unlike our cream-jugs, others as devoid of taste as the wine-bottles of our cellars or the flower-pots of our conservatories. They had also bottles, small vases, and pots, used for holding ointment or for other purposes connected with the toilet, which were made of alabaster, glass, porcelain, and hard stone.

1, 3, Earthenware; 2, 5, 6, 7, Green glass; 4, Blue glass; 8, 11, Alabaster; 9, 10, Porcelain.

96.

The perishable nature of skin-bottles led, at an early period, to the employment of instruments of a more durable kind; and it is to be presumed that the children of Israel would, during their sojourn in Egypt, learn, among other arts practised by their masters, that of working in pottery ware. Thus, as early as the days of the Judges (*iv.* 19; *v.* 25), bottles or vases composed of some earthy material, and apparently of a superior make, were in use; for what in the fourth chapter is termed 'a bottle,' is in the fifth designated 'a lordly dish.' Isaiah (*xxx.* 14) expressly mentions 'the bottle of the potters,' as the reading in the margin gives it, being a literal translation from the Hebrew, while the terms which the prophet employs show that he could not have intended any thing made of skin—'he shall break it as the breaking of the potter's vessel that is broken in pieces, so that there shall not be found in the bursting of it a *sherd* to take fire from the hearth, or to take water out of the pit.' (See also *Jerem.* *xix.* 1-10, 11, and *chap.* *xiii.* 12-14.) Metaphorically the word bottle is used, especially in poetry, for the clouds considered as pouring out and pouring down water (*Job xxxviii.* 37).

BOW. [*Arms.*] The bow is frequently men-

tioned symbolically in Scripture. In *Ps.* *vii.* 12, it implies victory, signifying judgments laid up in store against offenders. It is sometimes used to denote lying and falsehood (*Ps.* *lxiv.* 4; *cxv.* 4; *Jer.* *ix.* 3), probably from the many circumstances which tend to render a bow inoperative, especially in unskillful hands. Hence also 'a deceitful bow' (*Ps.* *lxxviii.* 57; *Hos.* *vii.* 16). The bow also signifies *any kind* of arms. The bow and spear are the most frequently mentioned, because the ancients used these most (*Ps.* *xliv.* 6; *xlvi.* 9; *Zech.* *x.* 4; *Josh.* *xviii.* 12). In *Habakk.* *iii.* 9 'thy bow was made bare,' means that it was drawn out of its case. The Orientals used to carry their bows in a case hung on their girdles.

BOWELS are often put by the Hebrew writers for the internal parts generally, the inner man, and so also for *heart*, as we use that term. Hence the bowels are made the seat of tenderness, mercy, and compassion; and thus the Scriptural expressions of the bowels being moved, bowels of mercy, straitened in the bowels, &c. By a similar association of ideas, the bowels are also sometimes made the seat of wisdom and understanding (*Job xxxviii.* 36; *Ps.* *li.* 10; *Isa.* *xvi.* 11).

BOWING. [*ATTITUDES.*]

BOX-TREE (*Isa.* *lx.* 13; *xli.* 19). It is not very certain that the box-tree is really denoted by the Hebrew and so translated; but nothing more probable has been suggested, and it agrees well enough with the indications afforded by the texts in which the name occurs.

The box is a native of most parts of Europe. It grows well in England, as at Boxhill, &c., while that from the Levant is most valued in commerce, in consequence of its being highly esteemed by wood-engravers. Turkey box is yielded by *Burus Balaerica*, a species which is found in Minorca, Sardinia, and Corsica, and also in both European and Asiatic Turkey, and is imported from Constantinople, Smyrna, and the Black Sea. Box is also found on Mount Caucasus, and a species extends even to the Himalaya mountains. It is much employed in the present day by the wood-engraver, the turner, carver, mathematical instrument maker, and the comb and flute maker.

The box-tree, being a native of mountainous regions, was peculiarly adapted to the calcareous formations of Mount Lebanon, and therefore likely to be brought from thence with the coniferous woods for the building of the temple, and was as well suited as the fir and the pine trees for changing the face of the desert.

BOZ'RAH, an ancient city, known also to the Greeks and Romans by the name of *BOSTRA*. In most of the passages of the Old Testament where it is mentioned, it appears as a chief city of the Edomites (*Isa.* *xxxiv.* 6; *lxiii.* 1; *Amos* *i.* 12; *Jer.* *xlix.* 13, 22); but it appears to have been afterwards taken from them by the Moabites, who for a time retained it in their possession.

Bozrah lay southward from Edrei, one of the capitals of Bashan, and, according to Eusebius, 24 Roman miles distant from it. Alexander Severus made it the seat of a Roman colony. In the acts of the Nicene, Ephesian, and Chalcedonian councils mention is made of bishops of Bozrah, and at a later period it became an important seat of the Nestorians. Abulfeda makes

it the capital of the Hauran, in which, according to Burekhardt, it is still one of the most important towns. It has recently been visited by various travellers, who give a very ample description of its ruins, the extent and importance of which are alone sufficient to evince the ancient consequence of the place. They are of various kinds, Greek, Roman, and Saracenic, with traces of the native works in the private dwellings.

These monuments of ancient grandeur serve but to heighten the impression which is created by the present desolation and decay. 'Bozrah,' says Lord Lindsay, 'is now for the most part a heap of ruins, a most dreary spectacle: here and there the direction of a street or alley is discernible, but that is all. The modern inhabitants—mere handful—are almost lost in the maze of ruins. Olive-trees grew here within a few years, they told us—all extinct now, like the vines for

97. (Bozrah.)

which the Bostra of the Romans was famous. And such, in the nineteenth century, and under Moslem rule, is the condition of a city which even in the seventh century, at the time of its capture by the Saracens, was called by Caled "the market-place of Syria, Irak, and the Hedjaz." "I have sworn by myself, saith the Lord of Hosts, that Bozrah shall become a desolation and reproach, a waste and a curse; and all the cities thereof shall be perpetual wastes!" (Jer. xlix. 13.) And it is so.

BRACELET. This name, in strict propriety, is as applicable to circlets worn on the upper part of the arm as to those worn on the wrist; but as it has been found convenient to distinguish the former as **ARMLETS**, the term bracelet must be restricted to the latter. These are, and always have been, much in use among Eastern females. Many of them are of the same shapes and patterns as the armlets, and are often of such considerable weight and bulk as to appear more like manacles than ornaments. Many are often worn one above another on the same arm, so as to occupy the greater part of the space between the wrist and the elbow. The materials vary according to the condition of the wearer. Among the higher classes they are of mother-of-pearl, of fine flexible gold, and of silver, the last being the most common. The poorer women use plated steel, horn, brass, copper, beads, and other materials of a cheap description. Some notion of

the size and value of the bracelets used both now and in ancient times may be formed from the fact that those which were presented by Eleazer to Rebecca weighed ten shekels (Gen. xxiv. 22). The bracelets are sometimes flat, but more frequently round or semicircular, except at the point where they open to admit the hand, where they are flattened. They are frequently hollow, giving the show of bulk (which is much desired) without the inconvenience. Bracelets of gold twisted rope-wise are those now most used in Western Asia: but we cannot determine to what extent this fashion may have existed in ancient times.

BRAMBLE. [THORN.]

BRANCH. As trees, in Scripture, denote great men and princes, so branches, boughs, sprouts, or plants denote their offspring. In conformity with this way of speaking, Christ, in respect of his human nature, is styled a rod from the stem of Jesse, and a branch out of his roots (Isa. xi. 1), that is, a prince arising from the family of David.

A branch is the symbol of kings descended from royal ancestors, as branches from the root (Ezek. xvii. 3, 10; Dan. xi. 7). As only a vigorous tree can send forth vigorous branches, a branch is used as a general symbol of prosperity (Job viii. 16). From these explanations it is easy to see how a branch becomes the symbol of the Messiah (Isa. xi. 1: iv. 2; Jer. xxiii. 15; Zech. iii. 8; vi. 12; and elsewhere). *Branch* is also used as the symbol of idolatrous worship (Ezek. viii. 17), probably in allusion to the general custom of carrying branches as a sign of honour. An *abominable branch* (Isa. xiv. 19) means a tree on which a malefactor has been hanged. In Ezek. xvii. 3 Jehoiachin is called the *highest branch* of the cedar, as being a king.

BRASS. This word occurs in the Authorized Version. But brass is a factitious metal, not known to the early Hebrews, and wherever it occurs, *copper* is to be understood [**COPPER**]. That copper is meant is shown by the text, 'Out of whose hills thou mayest dig brass' (Deut. viii. 9), it being of course impossible to dig a factitious metal, whether brass or bronze, out of mines.

Brass (to retain the word) is in Scripture the symbol of insensibility, baseness, and presumption or obstinacy in sin (Isa. xlviii. 4; Jer. vi. 28; Ezek. xxii. 18). Brass is also a symbol of strength (Ps. cvii. 16; Isa. xlviii. 4; Mic. iv. 13). So in Jer. i. 18 and xv. 20, brazen walls signify a strong and lasting adversary or opponent.

BREAD. The word 'bread' was of far more extensive meaning among the Hebrews than with us. There are passages in which it appears to be applied to all kinds of victuals (Luke xi. 3); but it more generally denotes all kinds of baked and pastry articles of food. It is also used, however, in the more limited sense of bread made from wheat or barley, for rye is little cultivated in the East. Barley being used chiefly by the poor, and for feeding horses [**BARLEY**], *bread*, in the more limited sense, chiefly denotes the various kinds of cake-like bread prepared from *wheaten* flour.

Corn is ground daily in the East. After the wheaten flour is taken from the hand-mill, it is

made into a dough or paste in a small wooden trough. It is next leavened; after which it is made into thin cakes or flaps, round or oval, and then baked.

The *kneading-troughs*, in which the dough is prepared, have no resemblance to ours in size or shape, but are small wooden bowls in which only a comparatively small quantity of dough is prepared. The Bedouin Arabs, indeed, use for this purpose a leather, which can be drawn up into a bag by a running cord along the border, and in which they prepare and often carry their dough. It is clear, from the history of the departure from Egypt, that the flour had first been made into a dough by water only, in which state it had been kept some little time before it was leavened; for when the Israelites were unexpectedly (as to the moment) compelled in all haste to withdraw, it was found that, although the dough had been prepared in the kneading-trough, it was still unleavened (Exod. xii. 34; comp. Hos. vii. 4); and it was in commemoration of this circumstance that they and their descendants in all ages were enjoined to eat only unleavened bread at the feast of the Pass-over. The dough thus prepared is not always baked at home. In towns there are public ovens and bakers by trade; and although the general rule in large and respectable families is to bake the bread at home, much bread is bought of the bakers by unsettled individuals and poor persons; and many small households send their dough to be baked at the public oven, the baker receiving for his trouble a portion of the baked bread, which he adds to his day's stock of bread for sale. Such public ovens and bakers by trade must have existed anciently in Palestine, and in the East generally, as is evident from Hos. vii. 4 and Jer. xxxvii. 21.

For their larger operations the bakers have ovens of brick, not altogether unlike our own; and in large houses there are similar ovens. The ovens used in domestic baking are, however, usually of a portable description, and are large vessels of stone, earthenware, or copper, inside of which, when properly heated, small loaves and cakes are baked, and on the outer surface of which thin flaps of bread, or else a large wafer-like biscuit, may be prepared.

Another mode of baking bread is much used, especially in the villages. A pit is sunk in the middle of the floor of the principal room, about four or five feet deep by three in diameter, well lined with compost or cement. When sufficiently heated by a fire kindled at the bottom, the bread is made by the thin pancake-like flaps of dough being, by a peculiar knack of hand in the women, struck against the oven, to which they adhere for a few moments, till they are sufficiently dressed.

Another sort of oven, or rather mode of baking, is much in use among the pastoral tribes. A shallow hole, about six inches deep by three or four feet in diameter, is made in the ground: this is filled up with dry brushwood, upon which, when kindled, pebbles are thrown to concentrate and retain the heat. Meanwhile the dough is prepared; and when the oven is sufficiently heated, the ashes and pebbles are removed, and the spot well cleaned out. The dough is then deposited in the hollow, and is left there over

night. The cakes thus baked are about two fingers thick, and are very palatable. There can be little doubt that this kind of oven and mode of baking bread were common among the Jews.

There is a baking utensil called in Arabic *tajen*, which appears to have been in use among the ancient Hebrews. It is a sort of pan of earthenware or iron (usually the latter), flat, or slightly convex, which is put over a slow fire, and on which the thin flaps of dough are laid and baked with considerable expedition, although only one cake can be baked in this way at a time. This is not a household mode of preparing bread, but is one of the simple and primitive processes employed by the wandering and semi-wandering tribes, shepherds, husbandmen and others, who have occasion to prepare a small quantity of daily bread in an easy off-hand manner. Bread is also baked in a manner which, although apparently very different, is but a modification of the principle of the *tajen*, and is used chiefly in the houses of the peasantry. There is a cavity in the fire-hearth, in which, when required for baking, a fire is kindled and burnt down to hot embers. A plate of iron, or sometimes copper, is placed over the hole, and on this the bread is baked.

Another mode of baking is in use chiefly among the pastoral tribes, and by travellers in the open country, but is not unknown in the villages. A smooth clear spot is chosen in the loose ground, a sandy soil—so common in the Eastern deserts and harder lands—being preferred. On this a fire is kindled, and, when the ground is sufficiently heated, the embers and ashes are raked aside, and the dough is laid on the heated spot, and then covered over with the glowing embers and ashes which had just been removed. The bread is several times turned, and in less than half an hour is sufficiently baked. Bread thus baked is referred to in Gen. xviii. 6; 1 Kings xviii. 13; xix. 6; Ezek. iv. 12. This is the kind of *ash-bread* which Sarah, on the arrival of the three strangers, was required to bake 'quickly' for the hospitable entertainment of the unknown travellers.

BREASTPLATE, a piece of defensive armour. [ARMS, ARMOUR.]

BREASTPLATE OF THE HIGH-PRIEST, a splendid ornament covering the breast of the high-priest. It was composed of richly embroidered cloth, in which were set, in four rows, twelve precious stones, on each of which was engraved the name of one of the twelve tribes of Israel (Exod. xxviii. 15-29; xxxix. 8-21). [PHRYGIA.]

BRICKS. Bricks compacted with straw and dried in the sun, are those which are chiefly mentioned in the Scriptures. Of such bricks the tower of Babel was doubtless composed [BABEL, BABYLON], and the making of such formed the chief labour of the Israelites when bondsmen in Egypt (Exod. i. 13, 14).

The use of crude brick, baked in the sun, was universal in Upper and Lower Egypt, both for public and private buildings; and the brick-field gave abundant occupation to numerous labourers throughout the country. We find that, independent of native labourers, a great many foreigners were constantly engaged in the brick-

fields at Thebes and other parts of Egypt. The Jews, of course, were not excluded from this drudgery; and, like the captives detained in the Thelaid, they were condemned to the same labour in Lower Egypt. They erected granaries, treasure-cities, and other public buildings for the Egyptian monarch. It has been supposed by some that the captive foreigners represented on the monuments as engaged in brick-making were Jews, and that the scenes represented were those of their actual operations in Egypt. Whether this supposition is correct or not, it is curious to discover other foreign captives occupied in the same manner, and overlooked by similar 'task-masters,' and performing the very same labours as the Israelites described in the Bible; and it is worthy of remark, as noticed by Wilkinson, that *more bricks bearing the name of Thothmes III. who is supposed to have been the king at the time of the Exode have been discovered than at any other period.*

[98. Egyptian Brickmaking.]

The process of manufacture indicated by the representations in cut 98, does not materially differ from that which is still followed in the same country. The clay was brought in baskets from the Nile, thrown into a heap, thoroughly saturated with water, and worked up to a proper temper by the feet of the labourers. This part of the labour in such a climate must have been very fatiguing and unwholesome, and it consequently appears to have been shunned by the native Egyptians. There is an allusion to the severity of this labour in Nahum iii. 14, 15. The clay, when tempered, was cut by an instrument somewhat resembling the agricultural hoe, and moulded in an oblong trough; the bricks were then dried in the sun, and some from their colour appear to have been baked or burned, but no trace of this operation has yet been discovered in the monuments.

BRIDE, BRIDEGRROOM. [MARRIAGE.]

BRIEIS. [THORNS.]

BROOK. The original word (NAHAL) thus translated might better be rendered by *torrent*. It is applied, 1. to small streams arising from a subterraneous spring, and flowing through a deep valley, such as the Arnon, Jabbok, Kidron, Sorek, &c.; and also the brook of the willows, mentioned in Isa. x. 7; 2. to winter-torrents, arising from rains, and which are soon dried up in the warm season (Job vi. 15, 19). Such is the noted river (brook) of Egypt, so often mentioned as at the southernmost border of Canaan (Num. xxix. 5; Josh. xv. 4, 47), and, in fact, such are most of the brooks and streams of Pal-

estine, which are numerous in winter and early spring, but of which very few survive the beginning of the summer.

BROTHER. This term is so variously and extensively applied in Scripture, that it becomes important carefully to distinguish the different acceptations in which it is used.

1. It denotes a brother in the natural sense, whether the offspring of the same father only (Matt. i. 2; Luke iii. 1, 19), or of the same father and mother (Luke vi. 14, &c.).—2. A near relative or kinsman by blood, cousin (Gen. xiii. 8; xiv. 16; Matt. xii. 46; John vii. 3; Acts i. 14; Gal. i. 19).—3. One who is connected with another by any tie of intimacy or fellowship: hence—4. One born in the same country, descended from the same stock, a fellow countryman (Matt. v. 47; Acts iii. 22; Heb. vii. 5; Exod. ii. 11; iv. 18).—5. One of equal rank and dignity (Job xxx. 29; Prov. xviii. 9; Matt. xxiii. 8).—6. Disciples, followers, &c. (Matt. xxv. 40; Heb. ii. 11, 12).—7. One of the same faith (Amos i. 9; Acts ix. 30; xi. 29; 1 Cor. v. xi.); from which and other texts it appears that the first converts to the faith of Jesus were known to each other by the title of Brethren, till the name of Christians was given to them at Antioch (Acts xi. 26).—8. An associate, colleague in office or dignity, &c. (Ezra iii. 2; 1 Cor. i. 1; 2 Cor. i. 1; &c.).—9. One of the same nature, a fellow man (Gen. xiii. 8; xxvi. 31; Matt. v. 22, 23, 24; vii. 5; Heb. ii. 17; viii. 11).—10. One beloved, i.e. as a brother, in a direct address (Acts ii. 25; vi. 3; 1 Thess. v. 1).

BURIAL and SEPULCHRES. Throughout the whole of their national history the Israelites observed the practice of burial. Amongst them, it was deemed not only an act of humanity, but a sacred duty of religion to pay the last honours to the departed; while, to be deprived of these, as was frequently the fate of enemies at the hands of ruthless conquerors (2 Sam. xxi. 9-14; 2 Kings ix. 28, 34; Ps. lxxix. 9; Eccles. vi. 3), was considered the greatest calamity and disgrace which a person could suffer.

On the death of any member of a family, preparations were forthwith made for the burial, which among the Jews, were in many respects similar to those which are common in the East at the present day, and were more or less expensive according to circumstances. After the solemn ceremony of the last kiss and closing the eyes, the corpse, which was perfumed by the nearest relative, having been laid out and the head covered with a napkin, was subjected to entire ablution in warm water (Acts ix. 37), a precaution probably adopted to guard against premature interment. But, besides this first and indispensable attention, other cares of a more elaborate and costly description were amongst certain classes bestowed on the remains of deceased friends, and all of which may be included under the general head of embalming. Nowhere was this operation performed with such religious care and in so scientific a manner as in ancient Egypt, which could boast of a class of professional men trained to the business; and such adepts had these 'physicians' become in the art of preserving dead bodies, that there are mummies still found, which must have existed for many thousand years. The bodies of Jacob and

Joseph underwent this eminently Egyptian preparation for burial, which on both occasions was doubtless executed in a style of the greatest magnificence (Gen. i. 2, 26). Whether this expensive method of embalming was imitated by the earlier Hebrews, we have no distinct accounts; but we learn from their practice in later ages that they had some observance of the kind, only

they substituted a simpler and more expeditious though it must have been a less efficient process, which consisted in merely swathing the corpse round with numerous folds of linen, and sometimes a variety of stuffs, and anointing it with a mixture of aromatic substances, of which aloes and myrrh were the chief ingredients (John xix. 39-40).

99. [Ancient Jewish Funeral: Costume, Modern Syrian.]

The corpse, after receiving the preliminary attentions, was enveloped in the grave-clothes, which were sometimes nothing more than the ordinary dress, or folds of linen cloth wrapped round the body, and a napkin about the head;

100. [Grave-clothes.]

though in other cases a shroud was used. The body thus dressed was deposited in an upper chamber in solemn state, open to the view of all visitors (Acts ix. 37). From the moment the vital spark was extinguished, the members of the family, especially the females, in the violent style of Oriental grief, burst out into shrill, loud, and doleful lamentations, and were soon joined by their friends and neighbours, who, on hearing of the event, crowded to the house in great numbers (Mark v. 38). By the better classes, this duty of sympathizing with the bereaved family was, and still is, performed by a class of females who engaged themselves as professional mourners, and who, seated amid the mourning circle, studied, by vehement sobs and gesticulations, and by singing dirges in which they eulogized the personal qualities or virtuous and benevolent actions of the deceased (Acts ix. 39), to stir the source of tears, and give fresh impulse to the grief of the afflicted relatives. Numbers of these singing men and women lamented the death of Josiah (2 Chron. xxxv. 25). The period between the death and the burial was much shorter than custom sanctions in our country; for a long delay in the removal of a corpse would have been attended with much inconvenience, from the heat of the climate generally, and, among the Jews in particular, from the circumstance that every one that came near the chamber was unclean for a week. Interment, therefore, where there was no embalming, was never postponed beyond twenty-four hours after death, and generally it took place much earlier. There are two instances in sacred history where consignment to the grave followed immediately after decease (Acts v. 6, 10).

Persons of distinction were deposited in coffins.

But the most common mode of carrying a corpse to the grave was on a bier or bed (2 Sam. iii. 31), which in some cases must have been furnished in a costly and elegant style. The bier, however, in use among the common and meaner sort of people was nothing but a plain wooden board, on which, supported by two poles, the body lay concealed only by a slight coverlet from the view of the attendants. On such a humble vehicle was the widow's son of Nain carried (Luke vii. 14), and 'this mode of performing funeral obsequies,' says an intelligent

101. [Ancient Sarcophagi in Palestine.]

traveller, 'obtains equally in the present day among the Jews, Mohammedans, and Christians of the East.' The nearest relatives kept close by the bier, and performed the office of bearers, in which, however, they were assisted by the company in succession. In cases where the expense could be afforded, hired mourners accompanied the procession, and, by every now and then lifting the covering and exposing the corpse, gave the signal to the company to renew their shouts of lamentation.

Sepulchres were, as they still are in the East, —by a prudent arrangement sadly neglected in our country—situated without the precincts of cities. Among the Jews, in the case of Levitical cities, the distance required to be 2000 cubits, and in all it was considerable. Nobody was allowed to be buried within the walls, Jerusalem forming the only exception, and even there the privilege

was reserved for the royal family of David and a few persons of exalted character (1 Kings ii. 10; 2 Kings xiv. 20). In the vicinity of this capital were public cemeteries for the general accommodation of the inhabitants, besides a field appropriated to the burial of *strangers*.

The style of the public cemeteries around the cities of ancient Palestine in all probability resembled that of the present burying-places of the East, of which Dr. Shaw gives the following description:—'They occupy a large space, a great extent of ground being allotted for the purpose. Each family has a portion of it walled in like a garden, where the bones of its ancestors have remained undisturbed for many generations. For in these inclosures the graves are all distinct and separate; each of them having a stone placed upright, both at the head and feet, inscribed with the name or title of the deceased; whilst the intermediate space is either planted with flowers, bordered round with stone, or paved with tiles.'

There were other sepulchres which were private property, erected at the expense and for the use of several families in a neighbourhood, or provided by individuals as a separate burying-place for themselves. These were situated either in some conspicuous place, as Rachel's on the highway to Bethlehem (Gen. xxxv. 19), or in some lonely and sequestered spot, under a wide-spreading tree (Gen. xxxv. 8) in a field or a garden. In common cases, sepulchres were formed by digging a small depth into the ground. Over these, which were considered an humble kind of tomb, the wealthy and great

their own policies.' Not unfrequently, however, the richer classes purchased, like Abraham, some of the natural caverns with which Palestine abounded, and converted them by some suitable alterations into family sepulchres; while others with vast pains and expense made excavations in the solid rock (Matt. xxvii. 60). Many sepulchres of this description are still found in Palestine. Along the sides of those vast caverns niches were cut, or sometimes shelves ranged one above another, on which were deposited the bodies of the dead, while in others the ground-floor of the tomb was raised so as to make different compartments, the lowest place in the family vaults being reserved for the servants. These interior arrangements may be the better understood by the help of the annexed engravings. No. 103 is the interior of the celebrated Tomb of the Kings (so

103. [Interior of Tomb of the Kings.]

called), near Jerusalem. In it are some further specimens of the stone sarcophagi already noticed.

104. [Ground-plans of Sepulchres.]

No. 104 contains two ground-plans showing the general character of the interior arrangements of the more extensive crypts. Some of those found near Tyre, and at Alexandria, are of the round form shown in fig. 1, but these seem exceptions; for the tombs at Jerusalem, in Asia Minor, and generally in Egypt and the East, offer the arrangement shown in fig. 2.

The mouth of the sepulchre was secured by a huge stone (Matt. xxvii. 60; John xi. 38). But the entrance-porch, to which the removal of this rude door gave admittance, was so large that several persons could stand in it and view the interior; and hence we read that the women who visited the sepulchre of our Lord, 'entering in saw a young man sitting, clothed in a long white garment' (Mark xvi. 5); and in like manner, in reference to the flight of steps, that Peter 'stood-

102. [Sepulchral Cupola.]

often erected small stone buildings, in the form of a house or cupola, to serve as their family sepulchre. 'This custom,' says Carne, 'which is of great antiquity, and particularly prevails in the lonely parts of Lebanon, may serve to explain some passages of Scripture. The prophet Samuel was buried in his own house at Ramah, and Joab was buried in his house in the wilderness. These, it is evident, were not their dwelling-houses, but mansions for the dead, or family vaults which they had built within

ing down, and looking in, saw the linen clothes lying' (John xx. 5). Some of the more splendid of these tombs, however, instead of the block of stone, have the porches surmounted with tasteful mason-work, and supported by well-finished colonnades; and as they stand open and exposed, do now, as they did formerly, afford retreats to numbers of vagrants and lawless characters. The rocky valleys around Jerusalem exhibit numberless specimens of these sepulchral excavations. Monuments of this elegant description were erected to many of the prophets and other holy men who figured as prominent characters in the early history of Israel, and it seems to have been considered, in the degenerate age of our Lord, an act of great piety to repair and ornament with

103. [Exterior of Sepulchre: Jerusalem.]

fresh devices the sepulchres of those ancient worthies (Matt. xxiii. 29). All the tombs, however, in the neighbourhood of Jerusalem were at certain seasons whitewashed (Matt. xxiii. 27). The origin of this prevailing custom is to be traced to a desire of making the sepulchres easily discernible, and so preventing the risk of contracting ceremonial defilement through accident or ignorance. To paint them with white was obviously the best preservative against the apprehended danger; and the season chosen for this garniture of the sepulchres was on the return of spring, a little before the Passover, when, the winter rains being over, a long unbroken tract of dry weather usually ensued. The words of Christ referred to were spoken but a few days before the Passover, when the fresh coating of white paint would be conspicuous on all the adjoining hills and valleys; and when we consider the striking contrast that must have been presented between the graceful architecture and carefully dressed appearance of these tombs without, and the disgusting relics of mortality that were mouldering within, we cannot fail to perceive the emphatic energy of the language in which our Lord rebuked the *hypocrisy* of the Pharisees.

It remains only to notice that, during the first few weeks after a burial, members of a family, especially the females, paid frequent visits to the tomb (John xi. 31). This affecting custom still continues in the East.

BURNT-OFFERINGS, sacrifices which owed their Hebrew name (*olah*, literally, 'what goes up,' from *alah*, 'to ascend'), to the circumstance that the whole of the offering was to be consumed by fire upon the altar, and to *rise*, as it were, in smoke towards heaven.

Such burnt-offerings are among the most ancient, if not the earliest, on Scriptural record. We find them already in use in the patriarchal times; hence the opinion of some, that *Abel's* offering (Gen. iv. 4) was a burnt-offering as regarded the firstlings of his flock, while the pieces of fat which he offered was a thank-offering, just in the manner that Moses afterwards ordained, or rather confirmed from ancient custom (Lev. i. sq.). It was a burnt-offering that Noah offered to the Lord after the Deluge (Gen. vii. 20).

Only oxen, male sheep or goats, or turtle-doves and young pigeons, all without blemish, were fit for burnt-offerings. The offerer, in person, was obliged to carry this sacrifice first of all into the fore-court, as far as the gate of the tabernacle or temple, where the animal was examined by the officiating priest to ascertain that it was without blemish. The offerer then laid his hand upon the victim, confessing his sins, and dedicated it as his sacrifice to propitiate the Almighty. The animal was then killed (which might be done by the offerer himself) towards the north of the altar (Lev. i. 11), in allusion, as the Talmud alleges, to the coming of inclement weather (typical of the Divine wrath) from the northern quarter of the heavens. After this began the ceremony of taking up the blood and sprinkling it *around* the altar, that is, upon the lower part of the altar, not immediately upon it, lest it should extinguish the fire thereon (Lev. iii. 2; Deut. xii. 27; 2 Chron. xxix. 22).

The next act was the skinning or flaying of the animal, and the cutting of it into pieces, actions which the offerer himself was allowed to perform (Lev. i. 6). The skin alone belonged to the officiating priest (Lev. vii. 8). The dissection of the animal began with the head, legs, &c., and it was divided into twelve pieces. The priest then took the right shoulder, breast, and entrails, and placing them in the hands of the offerer, he put his own hands beneath those of the former, and thus waved the sacrifice up and down several times in acknowledgment of the all-powerful presence of God. The officiating priest then retraced his steps to the altar, placed the wood upon it in the form of a cross, and lighted the fire. The entrails and legs being cleansed with water, the separated pieces were placed together upon the altar in the form of a slain animal. Poor people were allowed to bring a turtle-dove or a young pigeon as a burnt-offering, these birds being very common and cheap in Palestine. The mode of killing them was by nipping off the head with the nails of the hand.

Standing public burnt-offerings were those used daily morning and evening (Num. xxviii. 3; Exod. xxix. 38), and on the three great festivals (Lev. xxiii. 37; Num. xxviii. 11-27; xxix. 2-22; Lev. xvi. 3; comp. 2 Chron. xxxv. 12-16).

Private and occasional burnt-offerings were those brought by women rising from childbed (Lev. xii. 6); those brought by persons cured of leprosy (*ib. xiv. 19-22*); those brought by persons cleansed from issue (*ib. xv. 14, sq.*); and those brought by the Nazarites when rendered unclean by having come in contact with a dead body (Num. vi. 9), or after the days of their separation were fulfilled (*ib. vi. 14*).

Nor were the burnt-offerings confined to these cases alone; we find them in use almost on all

important occasions, events, and solemnities, whether private or public, and often in very large numbers (comp. Judg. xx. 26; 1 Sam. vii. 9; 2 Chron. xxxi. 2; 1 Kings iii. 4; 1 Chron. xxix. 21; 2 Chron. xxix. 21; Ezra vi. 17; viii. 35). Heathens also were allowed to offer burnt-offerings in the temple, and Augustus gave orders to sacrifice for him every day in the temple at Jerusalem a burnt-offering, consisting of two lambs and one ox.

BUSHEL is used in the Auth. Vers. to express a measure of about a peck.

BUTTER. [MILK.]

BUZ, son of Nahor and Milcah, and brother of Huz (Gen. xxii. 21). Elihu, one of Job's friends, who is distinguished as an Aramæan or Syrian (Job xxxii. 9), was doubtless descended from this Buz. Judgments are denounced upon the tribe of Buz by Jeremiah (xxv. 23); and from the context this tribe appears to have been located in Arabia Deserta.

C.

CAR, a measure mentioned in 2 Kings vi. 25. The Rabbinists make it the sixth part of a *seah* or *attah*, and the eighteenth part of an ephah. In that case a cab contained $\frac{3}{4}$ pints of our wine measure, or $\frac{3}{8}$ pints of our corn measure.

CABUL, a district given to Hiram, king of Tyre, by Solomon, in acknowledgment of the important services which he had rendered towards the building of the Temple (1 Kings ix. 13). Hiram was by no means pleased with the gift, and the district received the name of Cabul (*unpleasing*) from this circumstance. The situation of Cabul has been disputed; but we are content to accept the information of Josephus, who seems to place it in the north-west part of Galilee, adjacent to Tyre.

CÆSAR, a name assumed by, or conferred upon, all the Roman emperors after Julius Cæsar. In this way it became a sort of title like Pharaoh, and, as such, is usually applied to the emperors in the New Testament, without their distinctive proper names (AUGUSTUS). The Cæsars mentioned in the New Testament are Augustus (Luke ii. 1); Tiberius (Luke iii. 1; xx. 22). Claudius (Acts xi. 28); Nero (Acts xxv. 8); Caligula, who succeeded Tiberius, is not mentioned.

CÆSARÆA. There were two important towns in Palestine thus named in compliment to Roman emperors.

1. CÆSARÆA PALESTINA, or Cæsarea of Palestine, so called to distinguish it from the other Cæsarea, from its eminence as the Roman metropolis of Palestine, and the residence of the procurator. It was built by Herod the Great, with much of beauty and convenience, twenty-two years before the birth of Christ. Here he erected one of the most stupendous works of antiquity—a semicircular mole, which protected the port of Cæsarea on the south and west, leaving only a sufficient opening for vessels to enter from the north; so that, within the enclosed space, a fleet might ride at all weathers in perfect security. The mole was constructed of

immense blocks of stone brought from a great distance, and sunk to the depth of 20 fathoms in the sea. Besides this, Herod added many splendid buildings to the city; and when the whole was finished, which was within twelve years from the commencement of the undertaking, he fixed his residence there, and thus elevated the city to the rank of the civil and military capital of Judæa, which rank it continued to enjoy as long as the country remained a province of the Roman empire. Vespasian raised Cæsarea to the rank of a Roman colony, granting it first, exemption from the capitation tax, and afterwards, from the ground taxes. The place was, however, inhabited chiefly by Gentiles, though some thousands of Jews lived in it.

Cæsarea is the scene of several interesting circumstances described in the New Testament, such as the conversion of Cornelius, the first-fruits of the Gentiles (Acts x.); the residence of Philip the Evangelist (Acts xxi. 8); the journey thither of St. Paul; his pleading there before Felix; his imprisonment for two years; and his final pleading before Festus and King Agrippa (Acts xxiv.). It was here also, in the amphitheatre built by his father, that Herod Agrippa was smitten of God and died (Acts xii. 21-23).

On the commencement of the war with the Romans, all the Jewish inhabitants of Cæsarea, to the number of 20,000, were massacred by the Gentiles, who had long held them at feud.

In later times, Cæsarea is chiefly noted as the birth-place and episcopate of Eusebius, the celebrated Church historian, in the beginning of the 4th century.

Cæsarea is almost thirty-five miles north of Joppa or Jaffa, and fifty-five miles from Jerusalem. It still retains the ancient name in the form of Kaisersah; but has long been desolate. The most conspicuous ruin is that of an old castle, at the extremity of the ancient mole. A great extent of ground is covered by the remains of the city. The water is abundant and of excellent quality; and the small vessels of the country often put in here to take in their supplies. Cæsarea is, apparently, never frequented for any other purpose; even the high-road leaves it wide; and it has been visited by very few of the numerous travellers in Palestine. The present tenants of the ruins are snakes, scorpions, lizards, wild boars, and jackals.

2. CÆSARÆA PHILIPPÆ. Towards the springs of the Jordan, and near the foot of Isbel Shrik, or the Prince's Mount, a lofty branch of Lebanon, forming in that direction the boundary between Palestine and Syria Proper, stands a city originally called Banias, which was in later times much enlarged and beautified by Philip the tetrarch, who called it Cæsarea in honour of Tiberius the emperor, adding the cognomen of Philippi to distinguish it from Cæsarea of Palestine. It lay about 120 miles north from Jerusalem, and a day and a half's journey from Damascus (Matt. xvi. 13; Mark viii. 27). Herod Agrippa also still further extended and embellished it. In compliment to the emperor Nero, its name was afterwards changed to *Neronias*; and Titus, after the overthrow of Jerusalem, exhibited some public games here, in which the Jewish prisoners were compelled to fight like

gladiators. Under the Christians it was erected into a bishopric of Phenicia. It has now resumed its original name of Baniás, and has dwindled into a paltry and insignificant village, whose mean and destitute condition contrasts strikingly with the rich and luxuriant character of the surrounding country. It is said that many remains of ancient architecture are found in the neighbourhood. The ruins of the castle of Baniás, which appears to have been a work of the Saracens, crown the summit of the adjoining mountain, and display a wall 10 feet in thickness, by which the fortress was defended. The ruins of another fortified castle are visible on the south of the village, and a substantial bridge which conducts to it, inscribed with an Arabic legend, its date being of the age of the Crusades.

CAI'APHAS, whom Josephus calls Joseph Caiaphas, was high-priest of the Jews in the reign of Tiberius Cæsar (Luke iii. 2). We learn from Josephus that he succeeded Simon the son of Camith (about A.D. 27 or 28), and held the office nine years, when he was deposed. His wife was the daughter of Annas, or Ananias, who had formerly been high-priest, and who still possessed great influence and control in sacerdotal matters, several of his family successively holding the high-priesthood. The names of Annas and Caiaphas are coupled by Luke—'Annas and Caiaphas being the high-priests'; and this has given occasion to no small amount of discussion. The most probable opinion is that Caiaphas was the high-priest, and that Annas was his vicar or deputy. Caiaphas is the high-priest who rent his clothes, and declared Jesus to be worthy of death. When Judas had betrayed him, our Lord was first taken to Annas, who sent him to Caiaphas (John xviii. 13), who perhaps abode in another part of the same palace. What became of Caiaphas after his deposition in A.D. 38, is not known.

CAIN. The derivation of this word is disputed; but it probably signifies an *acquisition* or *possession*. Some degree of mystery attends the immediate origin of the horrible crime of Cain. Abel, it appears, brought two offerings, the one an oblation, the other a sacrifice. Cain brought but the former—a mere acknowledgment, it is supposed, of the sovereignty of God; neglecting to offer the sacrifice which would have been a confession of fallen nature, and, typically, an atonement for sin. It was not, therefore, the mere difference of feeling with which the two offerings were brought which constituted the virtue of the one, or the guilt of the other brother. God's righteous indignation against sin had been plainly revealed; and there can be no doubt that the means of safety, of reconciliation and atonement, were as plainly made known to Adam and his offspring. The refusal, therefore, of the sacrifice was a virtual denial of God's right to condemn the sinner, and at the same time a proud rejection of the proffered means of grace.

The punishment which attended the crime was such as could only be inflicted by an Almighty avenger. It admitted of no escape, scarcely of any conceivable alleviation. Cursed from the earth himself, the earth was doomed to a double barrenness wherever the offender should set his foot. Physical want and hardship, therefore, were among the first of the miseries heaped upon his

head. Next came those of mind and conscience: 'The voice of thy brother's blood crieth unto me from the ground,' was the announcement of his discovered guilt. He could now hear that same voice himself; nor did any retreat remain to him from the terrors of his own soul or those of Divine vengeance. By the statement that 'Cain went out from the presence of the Lord,' probability is given to the conjecture which represents him as abiding, till thus exiled, in some favoured spot where the Almighty still, by visible signs, manifested himself to his fallen creatures. The expression of dread lest, as he wandered over the face of the earth, he might be recognised and slain, has an awful sound when falling from the mouth of a murderer. But he was to be protected against the wrath of his fellow-men; and of this God gave him assurance, not by setting a mark upon him, which is a false translation, but by appointing a sign or token which he himself might understand as a proof that he should not perish by the hand of another, as Abel had perished by his.

It may be worthy of observation, that especial mention is made of the fact, that Cain having travelled into the land of Nod there built a city; and further, that his descendants were chiefly celebrated for their skill in the arts of social life. In both accounts may probably be discovered the powerful struggles with which Cain strove to overcome the difficulties which attended his position as one to whom the tillage of the ground was virtually prohibited.

CAIN'AN (*possessor*). 1. Son of Enos, and father of Mahaleel (Gen. v. 9; 1 Chron. i. 2). 2. Son of Arphaxad, the son of Shem, and father of Salah. His name is wanting in the present copies of the Hebrew Scriptures; but is found in the Septuagint version of Gen. x. 24; xi. 12; and in Luke iii. 36. It is supposed, however, on good grounds, that his name was not originally in the Hebrew text and the Septuagint versions derived from it, and that it was inserted in the text of Luke by some inadvertent transcribers, who, remarking it in some copies of the Septuagint, added it.

CAKES. [BREAD].

CA'LAH, or rather CALACH, a city of Assyria, built by Ashur or Nimrod. It was at some distance from Nineveh, the city of Resen lying between them. Most writers concur in placing it on the Great Zab (the ancient Lycus) not far from its junction with the Tigris.

CA'LEB (*dog*), son of Jephunneh, of the tribe of Judah. He was sent with Joshua and others to explore the land of Canaan, and in consequence of his joining with Joshua in opposing the discouraging accounts brought back by the other spies, they were both specially exempted from the decree of death which was pronounced on the generation to which they belonged (Num. xiii. 6; xiv. 6, 24, 38). When the land of Canaan had been invaded and partly conquered, Caleb was privileged to choose Kirjathaba, or Hebron, and its neighbourhood, for his possession (Josh. xiv. 6-15). He accordingly went and wrested it from the native inhabitants, and thence proceeded to Debir, which was taken for him by his nephew Othniel, who, as his reward, received in marriage the hand of Caleb's daughter [ACHSAH], with a valuable dowry (Josh. xv.

13-19). Caleb is usually supposed to have outlived Joshua.

CALF is mentioned in several places, but not requiring a zoological explanation, it may be sufficient to make a few remarks on the worship of calves and other superstitious practices connected with them. The most ancient and remarkable notice in the Scriptures on this head, is that of the golden calf which was cast by Aaron from the earrings of the people, while the Israelites were encamped at the foot of Sinai and Moses was absent on the Mount. The next notice refers to an event which occurred ages after, when Jeroboam, king of Israel, set up two idols in the form of a calf, the one in Dan and the other in Bethel. This almost incomprehensible degradation of human reason was, more particularly in the first instance, no doubt the result of the debasing influences which operated on the minds of the Israelites during their sojourn in Egypt, where, amid the daily practice of the most degrading and revolting religious ceremonies, they were accustomed to see the image of a sacred calf, surrounded by other symbols, carried in solemn pomp at the head of marring armies; such as may be still seen depicted in the processions of Rameses the Great or Sesostris.

104. [Egyptian Calf-Idol.]

A similar divinity belonged to the earliest Indian, Greek, and even Scandinavian mythologies; and therefore it may be conceived that the symbol, enduring even to this day, was at that period generally understood by the multitude, and consequently that it was afterwards revived by Jeroboam without popular opposition. With regard to Jer. xxxiv. 18, 19, it may be sufficient to mention that many nations of antiquity had a practice of binding themselves to certain resolutions by the ceremony of eating a calf or other victim into two halves or sides, laying them on the ground, and passing between the severed parts. This was considered as constituting a peculiarly binding obligation (comp. Gen. xv. 10, 17).

CAL'NEH, or rather CHALSEN, the fourth of Nimrod's cities (Gen. x. 10), and probably not different from the Calno of Isa. x. 9, or the Canneh of Ezek. xxvii. 23. According to the Chaldee translation, with which Eusebius and Jerome agree, this is the same place that was subsequently called Ctesiphon. It lay on the Tigris, opposite Celeucia, and was for a time the capital of the Parthians. In the time of the prophet Amos, Calneh appears to have constituted an independent principality (Amos vi. 1, 2); but not long after it became, with the rest of

Western Asia, a prey to the Assyrians (Isa. x. 9). About 150 years later, Calneh was still a considerable town, as may be inferred from its being mentioned by Ezekiel (xxvii. 23) among the places which traded with Tyre. The site of Ctesiphon, or Calneh, was afterwards occupied by El-Madain, i. e. *the two cities*, of which the only remains are the ruins of a remarkable palace called Teuk-kesra, some mounds of rubbish, and a considerable extent of massive wall towards the river.

CAL'VARY, the place where Christ was crucified. See GOLGOTHA.

CAMBY'SES. [AHASUERUS.]

CAMEL. The genus *Camelus*, as constituted by modern naturalists, comprises two species positively distinct, but still possessing the common characters of being ruminants without horns, without muzzle, with nostrils forming oblique slits, the upper lid divided, and separately movable and extensible, the soles of the feet horny, with two toes covered by ungulated claws, the limbs long, the abdomen drawn up, and the neck, long and slender, is bent down and up, the reverse of that of a horse, which is arched. Camels have thirty-six teeth in all. They have callosities on the breast-bone and on the flexures of the joints. Of the four stomachs, which they have in common with other animals chewing the cud, the panneh is provided with membranous cells to contain an extra provision of water, enabling the species to subsist for four or more days without drinking. But when in the desert, the camel has the faculty of smelling it afar off, and then, breaking through all control, he rushes onwards to drink, stirring the element previously with a fore foot until quite muddy. Camels are temperate animals, being fed on a march only once in twenty-four hours, with about a pound weight of dates, beans, or barley, and are enabled in the wilderness, by means of their long flexible necks and strong cuspidate teeth, to snap as they pass at thistles and thorny plants. They are emphatically called the ships of the desert; having to cross regions where no vegetation whatever is met with, and where they could not be enabled to continue their march but for the aid of the double or single hunch on the back, which, being composed of muscular fibre, and cellular substance highly adapted for the accumulation of fat, swells in proportion as the animal is healthy and well fed, or sinks by absorption as it supplies the want of sustenance under fatigue and scarcity. Now, when to these endowments are added a lofty stature and great agility; eyes that discover minute objects at a distance; a sense of smelling of prodigious acuteness—ever kept in a state of sensibility by the animal's power of closing the nostrils to exclude the acrid particles of the sandy deserts; a spirit, moreover, of patience, not the result of fear, but of forbearance, carried to the length of self-sacrifice in the practice of obedience, so often exemplified by the camel's boies in great numbers strewing the surface of the desert; when we perceive it furnished with a dense wool, to avert the solar heat and nightly cold, while on the animal, and to clothe and lodge his master when manufactured, and know that the female carries milk to feed him,—we have one of the most incontrovertible examples of Almighty power and beneficence in the adaptation of

means to a direct purpose, that can well be submitted to the apprehension of man; for, without the existence of the camel, immense portions of the surface of the earth would be uninhabitable, and even impassable. Surely the Arabs are right, 'Job's beast is a monument of God's mercy.' The two species are—1. The Bactrian camel, which is large and robust; naturally with two hunches, and originally a native of the highest table-lands of Central Asia, where even now, wild individuals may be found. The species extends through China, Tartary, and Russia, and is principally imported across the mountains into Asia Minor, Syria, and Persia.

107. [Arabian Camel: baggage.]

2. The Arabian camel or dromedary, which has naturally but one hunch, and may be considered as of Western-Asiatic or of African origin, although no kind of camel is figured on any monument of Egypt. We find, however, camels mentioned in Genesis xii. ; but being placed last among the cattle given by Pharaoh to Abraham, the fact seems to show that they were not considered as the most important part of his donation. This can be true only upon the supposition that only a few of these animals were delivered to him, and therefore that they were still rare in the valley of the Nile; though soon after there is abundant evidence of the nations of Syria and Palestine having whole herds of them fully domesticated.

108. [Arabian Camel: saddle.]

Of the Arabian species two very distinct races are noticed; those of stronger frame but slower

pace used to carry burdens, varying from 500 to 700 weight, and travelling little more than twenty-four miles per day; and those of lighter form bred for the saddle with single riders, whereof the fleetest serve to convey intelligence, &c., and travel at the rate of 200 miles in twenty-four hours.

All camels, from their very birth, are taught to bend their limbs and lie down to receive a load or a rider. They are often placed circularly in a recumbent posture, and together with their loads form a sufficient rampart of defence against robbers on horseback. The milk of she-camels is still considered a very nutritive cooling drink, and when turned it becomes intoxicating. Their dung supplies fuel in the desert, and in sandy regions where wood is scarce; and occasionally it is a kind of resource for horses when other food is wanting in the wilderness. Their flesh, particularly the hunch, is in request among the Arabs, but was forbidden to the Hebrews, more perhaps from motives of economy, and to keep the people from again becoming wanderers, than from any real uncleanness. Camels were early a source of riches to the patriarchs, and from that period became an increasing object of rural importance to the several tribes of Israel, who inhabited the grazing and border districts, but still they never equalled the numbers possessed by the Arabs of the desert. On swift dromedaries the trotting motion is so hard that to endure it the rider requires a severe apprenticeship; but riding upon slow camels is not disagreeable, on account of the measured step of their walk; ladies and women in general are conveyed upon them in a kind of wickerwork sedan.

With regard to the passage in Matt. xix. 24, 'It is easier for a camel to go through the eye of a needle,' &c., and that in Matt. xxiii. 24, 'Ye strain at a gnat, and swallow a camel,' it may be sufficient to observe, that both are proverbial expressions, similarly applied in the kindred languages of Asia.

CAMPHIRE occurs twice in the Song of Solomon (i. 14; iv. 13). The Hebrew word is *Kopher*, and has been supposed by some to denote in these places a bunch of grapes, and by others camphor. The word *camphire* is the old mode of spelling *camphor*; but this substance does not appear to have been known to ancient commerce. The word *Kopher* is certainly very like *Kafoor*, the Eastern name for *camphor*, but it also closely resembles the Greek *Kypros*, usually written *Cypros*. Indeed, as has been observed, it is the same word, with the Greek pronunciation and termination. The *Kypros* of the Greeks is, no doubt, the *Lacsonia inermis* of botanists. If we examine the works of Oriental travellers and naturalists, we shall find that this plant is universally esteemed in Eastern countries, and appears to have been so from the earliest times, both on account of the fragrance of its flowers, and the colouring properties of its leaves.

Thus Ranwolff, when at Tripoli, 'found there another tree, not unlike unto our privet, by the Arabians called *Alcana*, or *Henna*, and by the Grecians, in their vulgar tongue, *Schenna*, which they have from Egypt, where, but above all in Cayre, they grow in abundance. The Turks

and Moors nurse these up with great care and diligence, because of their sweet-smelling flowers. They also, as I am informed, keep their leaves all winter, which leaves they powder and mix with the juice of citrons, and stain therewith against great holidays the hair and nails of their children of a red colour, which colour may perhaps be seen with us on the manes and tails of Turkish horses.' This custom of dyeing the nails and the palms of the hands and soles of the feet, of an iron-rust colour, with *henna*, exists throughout the East, from the Mediterranean to the Ganges, as well as in Northern Africa. In some parts the practice is not confined to women and children, but is also followed by men, especially in Persia. In dyeing the beard, the hair is turned to red by this application, which is

109. [*Lawsonia inermis*.]

then changed to black by a preparation of indigo. In dyeing the hair of children, and the tails and manes of horses and asses, the process is allowed to stop at the red colour which the *henna* produces. In reference to this universal practice of the East, Dr. Harris observes that 'the expression in Deut. xxi. 12, "pare her nails," may perhaps rather mean "adorn her nails," and imply the antiquity of this practice. This is a universal custom in Egypt, and not to conform to it would be considered indecent. It seems to have been practised by the ancient Egyptians, for the nails of the mummies are most commonly of a reddish hue.'

CANA, a town in Galilee, not far from Capernaum, where Christ performed his first miracle by turning water into wine (John iv. 46). This Cana is not named in the Old Testament, but is mentioned by Josephus as a village of Galilee. The site has long been identified with the present Kefr Kenna, a small place about four miles north-east from Nazareth, on one of the roads to Tiberias.

There is a ruined place called Kāna el-Jelil, about eight miles N. & E. from Nazareth, which Dr. Robinson is inclined to regard as the more probable site of Cana. His reasons are certainly of considerable weight.

CA'NAAN, son of Ham and grandson of Noah. The transgression of his father Ham (Gen. ix. 22-27), to which some suppose Canaan to have been in some way a party, gave occasion to Noah to pronounce that doom on the descendants of Canaan which was, perhaps, at that moment made known to him by one of those extemporaneous inspirations with which the patriarchal fathers appear in other instances to have been favoured.

CA'NAAN, LAND OF, the ancient name of that portion of Palestine which lay to the west of the Jordan (Gen. xiii. 12; Num. xxxiii. 51; Deut. xi. 30; Judg. xxi. 12), the part beyond the Jordan eastward being distinguished by the general name of Gilead (comp. Judg. xxi. 12). The denomination Canaan included Philistia and Phœnicia (comp. Isa. xxiii. 11; Ezek. xvi. 29; Zeph. ii. 5). The name occurs on Phœnician coins, and was not even unknown to the Carthaginians. For an account of the geography, &c. of the country, see PALESTINE.

CA'NAANITES, the descendants of Canaan, the son of Ham and grandson of Noah, inhabitants of the land of Canaan and the adjoining districts. A general account of the different nations included in the term is given in the present article, and a more detailed account of each will be found under their respective names.

The Israelites were delivered from Egypt by Moses, in order that they might take possession of the land which God had promised to their fathers. This country was then inhabited by the descendants of Canaan, who were divided into seven distinct nations, viz., the Hittites, Girgashites, Amorites, Canaanites, Perizzites, Hivites, and Jebusites. All these tribes are included in the most general acceptance of the term Canaanites; but the word, in its more restricted sense, as applied to one tribe, designated those 'who dwelt by the sea, and by the coasts of Jordan' (Num. xiii. 29). Besides these 'seven nations,' there were several tribes of the Canaanites who lived beyond the borders of the Promised Land, northward. These were the Arkites, Sinites, Arvadites, Zemarites, and Hamathites (Gen. x. 17, 18), with whom, of course, the Israelites had no concern. There were also other tribes of Canaanitish origin (or possibly other names given to some of those already mentioned), who were dispossessed by the Israelites. The chief of these were the Amalekites, the Anakites, and the Rephaim (or 'giants,' as they are frequently called in our translation). These nations, and especially the six or seven so frequently mentioned by name, the Israelites were commanded to dispossess and utterly to destroy (Exod. xxiii. 23; Num. xxxiii. 53; Deut. xx. 16, 17). The destruction, however, was not to be accomplished at once. The promise on the part of God was that he would 'put out those nations by little and little,' and the command to the Israelites corresponded with it; the reason given being, 'lest the beasts of the field increase upon thee' (Exod. xxiii. 29; Deut. vii. 22).

The destructive war commenced with an

attack on the Israelites, by Arad, king of the Canaanites, which issued in the destruction of several cities in the extreme south of Palestine, to which the name of Hormah was given (Num. xxi. 1-3). The Israelites, however, did not follow up this victory, which was simply the consequence of an unprovoked assault on them; but turning back, and compassing the land of Edom, they attempted to pass through the country on the other side of the Jordan, inhabited by a tribe of the Amorites. Their passage being refused, and an attack made on them by Sihon, king of the Amorites, they not only forced their way through his land, but destroyed its inhabitants, and proceeding onwards towards the adjoining kingdom of Bashan, they in like manner destroyed the inhabitants of that district, and slew Og, their king, who was the last of the Rephaim, or giants (Deut. iii. 11). The tract of which they thus became possessed was subsequently allotted to the tribes of Reuben and Gad, and the half tribe of Manasseh.

After the death of Moses the Israelites crossed the Jordan, and, under the conduct of Joshua, took possession of the greater part of the Promised Land, and destroyed its inhabitants. Several cities, however, still held out, particularly Jebus, afterwards Jerusalem, which was not taken till the time of David (2 Sam. v. 6), and Sidon, which seems never to have yielded to the tribe of Asher, to whom it was allotted (Judg. i. 31). Scattered portions also of the Canaanitish nations escaped, and were frequently strong enough to harass, though not to dispossess, the Israelites. The inhabitants of Gibeon, a tribe of the Hivites, made peace by stratagem, and thus escaped the destruction of their fellow-countrymen. Individuals from amongst the Canaanites seem, in later times, to have united themselves, in some way, to the Israelites, and not only to have lived in peace, but to have been capable of holding places of honour and power; thus Uriah, one of David's captains, was a Hittite (1 Chron. xi. 41). In the time of Solomon, when the kingdom had attained its highest glory and greatest power, all the remnants of these nations were made tributary, and bond-service was exacted from them (1 Kings ix. 20). The Girgashites seem to have been either wholly destroyed or absorbed in other tribes. We find no mention of them subsequent to the book of Joshua. The Anakites were completely destroyed by Joshua, except in three cities, Gaza, Gath, and Ashdod (Josh. xi. 21-23); and the powerful nation of the Amalekites, many times defeated and continually harassing the Israelites, were at last totally destroyed by the tribe of Simeon (1 Chron. iv. 43). Even after the return of the Jews from the Babylonish captivity, there were survivors of five of the Canaanitish nations, with whom alliances had been made by the Jews, contrary to the commands which had been given them. Some of the Canaanites, according to ancient tradition, left the land of Canaan on the approach of Joshua, and emigrated to the coast of Africa. Procopius relates that there were in Numidia, at Tignis (*Tingis*), two columns on which were inscribed, in Phœnician characters, 'We are those who fled from the face of Joshua, the robber, the son of Naue.'

The manner in which the Israelites became

possessed of the Promised Land has been so frequently brought as an objection to the inspired character of the Old Testament, and indeed is so far removed from the ordinary providential government of God, that it will be proper, in closing this account, to notice the difficulty which has been felt, and to advert to some of the hypotheses by which it is sought to be removed. Many have asserted, in order to alleviate the difficulty, that an allotment of the world was made by Noah to his three sons, and that by this allotment the Land of Promise fell to the share of Shem—that the descendants of Ham were therefore usurpers and interlopers, and that on this ground the Israelites, as the descendants of Shem, had the right to dispossess them. Others justify the war on the ground that the Canaanites were the first aggressors—a justification which applies only to the territory on the other side of the Jordan. Michaelis asserts that the Israelites had a right to the land of Canaan, as the common pasture land of their herdsmen, in consequence of the undisturbed possession and appropriation of it from the time of Abraham till the departure of Jacob into Egypt—that this claim had never been relinquished, and was well known to the Canaanites, and that therefore the Israelites only took possession of that which belonged to them. The same hypothesis is maintained by Jahn. Another ground of justification has been sought in the supposed identity of race of the Egyptian dynasty under which the Israelites were oppressed, with the tribes that overran Canaan—so that the destruction of the latter was merely an act of retributive justice for the injuries which their compatriots in Egypt had inflicted on the Israelites. To all these and similar attempts to justify, on the ground of *legal right*, the forcible occupation of the land by the Israelites, and the extermination (at least to a great extent) of the existing occupants, it is to be objected, that no such reason as any of these is hinted at in the sacred record. The right to carry on a war of extermination is there rested simply on the divine command to do so. That the Israelites were instruments in God's hand is a lesson not only continually impressed on their minds by the teaching of Moses, but enforced by their defeat whenever they relied on their own strength.

It may be said that this is only shifting the difficulty, and that just in proportion as we exculpate the Israelites from the charges of robbery and murder, in their making war without *legal* ground, we lower the character of the Being whose commands they obeyed, and throw doubt on those commands being really given by God. This has indeed been a favourite objection of infidels to the divine authority of the Old Testament. Such objectors would do well to consider whether God has not an absolute right to dispose of men as he sees fit, and whether an exterminating war, from which there was at least the opportunity of escape by flight, is at all more opposed to our notions of justice than a destroying flood, or earthquake, or pestilence. Again, whether the fact of making a chosen nation of *His* worshippers the instruments of punishing those whose wickedness was notoriously great, did not much more impressively vindicate his character as the only God, who 'will not give his glory to another, nor his praise to graven

images,' than if the punishment had been brought about by natural causes. Such considerations as these must, we apprehend, silence those who complain of injustice done to the Canaanites. But then it is objected further, that such an arrangement is fraught with evil to those who are made the instruments of punishment, and, as an example, is peculiarly liable to be abused by all who have the power to persecute. As to the first of these objections, it must be remembered, that the conduct of the war was never put into the hands of the Israelites—that they were continually reminded that it was for the wickedness of those nations that they were driven out, and, above all, that they themselves would be exposed to similar punishment if they were seduced into idolatry—an evil to which they were especially prone. As to the example, it can apply to no case where there is not an equally clear expression of God's will.

CANDA'CE, or, more correctly, KANDAKE, was the name of that queen of the Ethiopians whose high treasurer was converted to Christianity under the preaching of Philip the Evangelist (Acts viii. 27). The country over which she ruled was not, as some writers allege, what is known to us as Abyssinia; it was that region in Upper Nubia which was called by the Greeks *Meroë*, and is supposed to correspond to the present province of Atbara, lying between 13° and 18° north latitude. The city of Meroë stood near the present Assour, about twenty miles north of Shendy; and the extensive and magnificent ruins found not only there, but along the upper valley of the Nile, attest the art and civilization of the ancient Ethiopians. Meroë, from being long the centre of commercial intercourse between Africa and the south of Asia, became one of the richest countries upon earth; the 'merchandise' and wealth of Ethiopia (Isa. xlv. 14) was the theme of the poets both of Palestine and Greece; and since much of that affluence would find its way into the royal coffers, the circumstance gives emphasis to the phrase—'all the treasure' of Queen Candace. It is further interesting to know, from the testimonies of various profane authors, that for some time both before and after the Christian era, Ethiopia Proper was under the rule of female sovereigns, who all bore the appellation of 'Candace,' which was not so much a proper name as a distinctive title, common to every successive queen, like 'Pharaoh' and 'Ptolemy' to the kings of Egypt, and 'Cæsar' to the emperors of Rome.

A curious confirmation of the fact of female sovereignty having prevailed in Ethiopia has been remarked on the existing monuments of the country. Thus, on the largest sepulchral pyramid near Assour, the ancient Meroë, a female warrior, with the royal ensigns on her head, drags forward a number of captives as offerings to the gods; on another compartment she is in a warlike habit, about to destroy the same group. Heeren, after describing the monuments at Naga, or Naka, south-east of Shendy, says, 'It is evident that these representations possess many peculiarities, and that they are not pure Egyptian. The most remarkable difference appears in the persons offering. The queens appear with the kings; and not merely as presenting offerings, but as heroines and conquerors. Nothing of this

kind has yet been discovered on the Egyptian reliefs, either in Egypt or Nubia. It may therefore with certainty be concluded, that they are subjects peculiar to Ethiopia. It is singular enough, that when Bruce was at Shendy, the government of the district was in the hands of a female called *Sittina*, i. e. the lady or mistress. Irenæus and Eusebius ascribe to Candace's minister her own conversion to Christianity, and the promulgation of the Gospel throughout her kingdom: and with this agrees the Abyssinian tradition, that he was likewise the apostle of Tagré, that part of Abyssinia which lay nearest to Meroë; it is added that he afterwards preached the Gospel in Arabia Felix, and also in the island of Ceylon, where he suffered martyrdom.

CANDLESTICK. The candelabrum which Moses was commanded to make for the tabernacle, after the model shown him in the Mount, is chiefly known to us by the passages in Exod. xxv. 31-40; xxxvii. 17-24; on which some additional light is thrown by the Jewish writers, and by the representation of the spoils of the Temple on the arch of Titus.

110.

The material of which it was made was fine gold, of which an entire talent was expended on the candelabrum itself and its appendages. The mode in which the metal was to be worked is described by a term which appears to mean wrought with the hammer, as opposed to cast by fusion. The structure of the candelabrum, as far as it is defined in the passages referred to, consisted of a base; of a shaft rising out of it; of six arms, which came out by three from two opposite sides of the shaft; of seven lamps, which were supported on the summits of the central shaft and the six arms; and of three different kinds of ornaments belonging to the shaft and arms. These ornaments are called by names which mean *cups*, *globes*, and *blossoms*.

This candelabrum was placed in the Holy Place, on the south side (i. e. to the left of a person entering the tabernacle), opposite the table of shew-bread (Exod. xxvi. 35). Its lamps, which

were supplied with pure olive oil only, were lighted every evening, and extinguished (as it seems) every morning (Exod. xxvii. 21; xxx. 7, 8; Lev. xxiv. 3; 1 Sam. iii. 3; 2 Chron. xiii. 11). Although the tabernacle had no windows, there is no good ground for believing that the lamps burnt by day in it, whatever may have been the usage of the second temple.

In the first temple, instead of this single candelabrum, there were ten candelabra of pure gold, one half of which stood on the north and the other on the south side of the Holy Place. These were carried away to Babylon (Jer. lii. 19). In the temple of Zerubbabel there appears to have been only one candelabrum again (1 Mac. i. 21; iv. 49, 50). It is probable that it also had only seven lamps. At least, that was the case in the candelabrum of the Herodian temple. This candelabrum is the one which, after the destruction of Jerusalem, was carried with other spoils to Rome; then, A.D. 455, became part of the plunder which Genseric transported to Africa; was again, about A.D. 533, recaptured from the Vandals by Belisarius, and carried to Constantinople, and was thence sent off to Jerusalem, and from that time has disappeared altogether. It is to this candelabrum that the representation on the arch of Titus at Rome was intended to apply; and there is reason to believe that, on the whole, it may be relied upon as a reasonably correct representation of the Herodian candelabrum.

CANE (or CALAMUS), SWEET, an aromatic reed, mentioned among the drugs with which sacred perfumes were compounded (Ezek. xxvii. 19). [REED.]

CANKER-WORM. [LOCUST.]

CAN'NEH (Ezek. xxvii. 23), probably the same as CALNEH (Gen. x. 10), which see.

CAN'ON. This word was frequently employed to denote a *rule* or *standard*, by a reference to which the rectitude of opinions or actions may be determined; and as the great standard in all matters of faith and duty was the revealed will of God contained in the Scriptures of the Old and New Testaments, the term came insensibly to be applied to the collective body of those writings which were designated THE CANON or RULE.

The Canon then may be defined to be 'The Authoritative Standard of Religion and Morals, composed of those writings which have been given for this purpose by God to men.'

According to this definition, in order to establish the Canon of Scripture, it is necessary to show that all the books of which it is composed are of divine authority; that they are entire and incorrupt; that, having them, it is complete without any addition from any other source; and that it comprises the whole of those books for which divine authority can be proved. It is obvious that, if any of these four particulars be not true, Scripture cannot be the *sole and supreme* standard of religious truth and duty.

Respecting the *evidence* by which the Canon is thus to be established, there exists considerable difference of opinion amongst Christians. Some contend, with the Catholics, that the authoritative decision of the Church is alone competent to determine the Canon; others appeal to the concurrent testimony of the Jewish and early Christian writers; and others rest their strongest

reliance on the internal evidence furnished by the books of Scripture themselves. We cannot say that we are satisfied with any of these sources of evidence exclusively. As Michaelis remarks, the first is one to which no consistent Protestant can appeal, for the matter to be determined is of such a kind, that, unless we grant the Church to be infallible, it is quite possible that she may at any given period of her existence determine erroneously; and one sees not why the question may not be as successfully investigated by a private individual as by the Church. The concurrent testimony of the ancient witnesses is invaluable so far as it goes; but it may be doubted if it be sufficient of itself to settle this question, for the question is not *entirely* one of facts, and testimony is good proof only for *facts*. As for the internal evidence, one needs only look at the havoc which Semler and his school have made of the Canon, to be satisfied that where doctrinal considerations are allowed to determine exclusively such questions, each man will extend or extruncate the Canon so as to adjust it to the Procrustean couch of his own preconceived notions. As the question is one partly of fact and partly of opinion, the appropriate grounds of decision will be best secured by a combination of authentic testimony with the evidence supplied by the books themselves. We want to know that these books were really written by the persons whose names they bear; we want to be satisfied that these persons were commonly reputed and held by their contemporaries to be assisted by the divine spirit in what they wrote; and we want to be sure that care was taken by those to whom their writings were first addressed, that these should be preserved entire and uncorrupt. For all this we must appeal to the testimony of competent witnesses, as the only suitable evidence for such matters. But after we have ascertained these points affirmatively, we still require to be satisfied that the books themselves contain nothing obviously incompatible with the ascription to their authors of the divine assistance, but, on the contrary, are in all respect favourable to this supposition. We want to see that they are in harmony with each other; that the statements they contain are credible; that the doctrines they teach are not foolish, immoral, or self-contradictory; that their authors really assumed to be under the divine direction in what they wrote, and afforded competent proofs of this to those around them; and that all the circumstances of the case, such as the style of the writers, the allusions made by them to places and events, &c., are in keeping with the conclusion to which the external evidence has already led. In this way we advance to a complete moral proof of the divine authority and canonical claims of the sacred writings.

The books specified as canonical in the 6th Article of the Church of England, and the 1st of the Confession of the Church of Scotland, are received as such by the majority of Protestants. To these the Church of Rome adds, as part of the Old Testament, ten other books, or parts of books, which Protestants reject as Apocryphal [ΑΠΟΚΡΥΦΑ]. For the evidence in support of the genuineness and divine authority of those books universally regarded by Christians as canonical, taken individually, we may refer to the articles

in this work under the titles of these books respectively.

CANTICLES, *Solomon's Song*, or *Song of Songs* as it is designated in the inscription, is generally believed to have been so denominated to denote the superior beauty and excellence of this poem.

In favour of the canonical authority of this book (which has been questioned in ancient and modern times) we may observe, that it is found in all the copies of the Hebrew Bible which have descended to our times, as well as in the version of the Seventy, which was finished some time in the second century before the Christian era. It is also found in all the ancient catalogues which have come down to us from the early Christian church. It has consequently all the external marks of canonicity possessed by any other book of the Old Testament not expressly cited in the New. Those who have questioned its right to a place in the sacred volume have proceeded more on dogmatical than on historico-critical grounds.

The subject of this book is confessedly *Love*. But it has been a matter of much controversy, especially in modern times, what kind of love is here celebrated. It is equally a matter of dispute among divines whether the interpretation of the poem is limited to its obvious and primary meaning, or whether it does not also include a latent mystical and allegorical sense. We shall speak of these subjects in order. And, first, as to the literal and primary meaning, the earliest information which we have is contained in the preface of Origen to his commentary on this book. This eminent scholar holds it to be an epithalamium, or marriage-song, in the form of a drama. This idea has been, in modern times, improved by Lowth, Bossuet, Michaelis, and other commentators. 'The Song of Songs,' says Bishop Lowth, 'for so it is entitled, either on account of the excellence of the subject or of the composition, is an epithalamium, or nuptial dialogue, or rather, if we may be allowed to give it a title more agreeable to the genius of the Hebrews, a Song of Loves. Such is the title of Psalm xlv. It is expressive of the utmost fervour as well as delicacy of passion: it is instinct with all the spirit and sweetness of affection. The principal characters are Solomon himself and his bride, who are represented speaking both in dialogue, and in soliloquy, when accidentally separated. Virgins, also the companions of the bride, are introduced, who seem to be constantly on the stage, and bear a part of the dialogue. Mention is also made of young men, friends of the bridegroom, but they are mute persons. This is exactly conformable to the manners of the Hebrews, who had always a number of companions to the bridegroom, thirty of whom were present in honour of Samson at his nuptial feast (Judg. xiv. 11). In the New Testament, according to the Hebrew idiom, they are called children, or sons of the bridechamber, and friends of the bridegroom. There, too, we find mention of ten virgins who went forth to meet the bridegroom and conduct him home; which circumstances indicate that this poem is founded on the nuptial rites of the Hebrews, and is expressive of the forms or ceremonial of their marriage.'

Bossuet's idea of this poem was, that it is a

regular drama, or pastoral eclogue, consisting of seven acts, each act filling a day, concluding with the Sabbath, inasmuch as the bridegroom on this day does not, as usual, go forth to his rural employments, but proceeds from the marriage chamber into public with his bride. Lowth so far differs from Bossuet as to deny the existence of a regular drama, inasmuch as there is no termination to the plot. Michaelis, in his notes to his German translation of Lowth's *Prelections*, endeavours to overturn the views of Bossuet and Lowth, and to show that this poem can have no relation to the celebration of a marriage, inasmuch as the bridegroom is compelled in his nuptial week to quit his spouse and friends for whole days, in order to attend to his cattle in the pastures. His opinion is, that this poem has no reference to a future marriage, but that the chaste loves of conjugal and domestic life are described. This state, he conceives, in the East, admits of more of the perplexities, jealousies, plots, and artifices of love than it does with us; the scene is more varied, and there is consequently greater scope for invention.

But the idea that the conjugal state, or the loves of married persons, are here referred to, has been strongly opposed by some of the ablest modern writers, who maintain that the chaste mutual loves of two young persons antecedent to marriage are here celebrated.

Here it may be necessary to state, that the learned are divided on the point whether the Canticles consist of one continued and connected poem, or of a number of detached songs or amorets. The first person who maintained the latter opinion was Father Simon, who was on this account unjustly accused of denying the canonicity of the book. This opinion has been subsequently defended by Eichhorn, Jahn, Pareau, and many others. A very general opinion is, that it is an idyl, or rather, a number of idyls, all forming a collective whole. Such is the opinion held among others, by Sir William Jones and Dr. J. Mason Good, in his beautiful translation of the *Song of Songs*. Ewald considers the poem to consist of a drama in four parts. The heroine of the poem, according to this writer, is a country maiden, a native of Engedi, who, while rambling in the plains, fell in with the chariots of Solomon, and was carried by him into his palace.

It has been in all ages a matter of dispute, whether we are to seek for any hidden or occult meaning under the envelope of the literal and obvious sense. While several eminent men have maintained that the object of these poems is confined to the celebration of the mutual love of the sexes, or that its main design, in so far as its sacred character is considered, is the inculcation of marriage, and especially of monogamy, the majority of Christian interpreters, at least since the days of Origen (who wrote ten books of commentaries on this poem), have believed that a divine allegory is contained under the garb of an epithalamium, founded on the historical fact of the marriage of Solomon with the daughter of Pharaoh: others have held it to be a simple allegory, having no historical truth for its basis.

As, however, the Scriptures give no intimation that this book contains a mystical or allegorical

sense, recourse has been had to the analogy of some of the Messianic Psalms, whose application to spiritual objects is recognised in the New Testament. Especially a great resemblance has been observed between the character of the Canticles and the 45th Psalm; and it will suffice for our present purpose to cite the opinion of Rosenmüller, one of the ablest commentators on the Messianic Psalms, in reference to this subject. Professing to follow the opinion of the ancient Hebrews, communicated by the Chaldee paraphrast, and the writer of the Epistle to the Hebrews—namely, that the 45th Psalm celebrated the excellences and praises of the great Messiah; he observes, 'Throughout the latter part of the psalm this allegory, in which the Hebrew poets particularly delighted, is maintained. They were accustomed to represent God as entertaining, towards his chosen people, feelings which they compared to conjugal affections; and which they deduced, under this figure, into all the various and even minute expressions. In the illustrating and beautifying of this allegory, the whole of the Song of Songs is occupied: that the subject of that poem, and that of the psalm before us, is the same, there is no doubt among sound interpreters.' The reader may also refer, in illustration of this subject, to the many passages of the Old and New Testament in which this figure is retained by the sacred writers: such as Isaiah liv. 5; lxii. 5; Jerem. iii. 1, &c.; Ezek. xvi. and xxiii.; Matt. ix. 15; John iii. 29; 2 Cor. xi. 2; Ephes. v. 23, &c.; Rev. xix. 7; xxi. 2; xxii. 17. The tradition of the Jews as preserved by the ancient Chaldee paraphrast is that the poem embodies a figurative description of the gracious conduct of Jehovah towards his people, in delivering them from the Egyptian bondage, conferring great benefits on them during their progress through the wilderness, and conveying them in safety to the promised land. Aben Ezra considered that the Canticles represented the history of the Jews from Abraham to the Messiah. Others have conceived the bride to be Wisdom, with whom Solomon was acquainted from his childhood, and with whose beauty he was captivated. Luther, in his *Commentary on Canticles*, maintained the allegorical interpretation, conceiving Jehovah to be the bridegroom, the bride the Jewish nation, and the poem itself a figurative description of Solomon's civil government. In his *Commentary on 1 Peter*, however, he explains the bride to be the New Testament church.

The modern writers of the Roman church have, in general, followed Origen and Jerome in their allegorical interpretations.

The opinion of those who have acknowledged no other than the literal interpretation of the Canticles has had a considerable influence in the question of the canonicity of the book. Nor is it at all surprising that those who were in the habit of attaching a spiritual meaning to it should find it difficult to believe that a book treating of human love should have a place in the inspired volume.

The author and age of Canticles have been also much disputed. The inscription ascribes it to Solomon; and this is confirmed by the universal voice of antiquity, although some of the Jews have attributed it to Heseekiah.

CAPERNAUM, a city on the north western side of the Lake of Gennesareth, and on the border of the tribes of Zebulun and Naphtali. The infidelity and impenitence of the inhabitants of this place, after the evidence given to them by our Saviour himself of the truth of his mission, brought upon them this heavy denunciation:— 'And thou, Capernaum, which art exalted unto heaven, shalt be brought down to hell: for if the mighty works which have been done in thee had been done in Sodom, it would have remained unto this day,' &c. (Matt. xi. 23.) This seems to have been more than any other place the residence of Christ after he commenced his great mission: and hence the force of the denunciation, which has been so completely accomplished, that even the site of Capernaum is quite uncertain. Dr. Robinson is inclined to look for the site in a place marked only by a mound of ruins, called by the Arabs, Khau Miuyeh. This is situated in the fertile plain on the western border of the Lake of Gennesareth, to which the name of 'the land of Gennesareth' is given by Josephus. This plain is a sort of triangular hollow, formed by the retreat of the mountains about the middle of the western shore. In this plain there are now two fountains, one called 'Ain el Madawarah, the 'Round Fountain'—another called 'Ain et-Tin, near the northern extremity of the plain, and not far from the lake. This is the fountain which Dr. Robinson inclines to regard as that which Josephus mentions under the name of Capharnaum; and which we may conclude was not far from the town, and took its name from it. Near this fountain is a low mound of ruins, occupying a considerable circumference, which certainly offer the best probability that has yet been produced of being the remains of the doomed city: and if these be all its remains, it has, according to that doom, been brought low indeed.

CAPH'TOR (Deut. ii. 23; Jer. xlvii. 4; Amos ix. 7) was the real and proper country of the Philistines. There has been a great diversity of opinion with regard to the exact situation of that country. The general opinion that Caph'tor was Cappadocia is not founded on any sound argument. Others, again, have tried to prove that the Philistines derived their origin from the island of Crete. By far more probable is the opinion, that Caph'tor is the island of Cyprus. From the geographical situation of that island, it may have been known to the Egyptians at a very early period, and they may have sent colonies thither, who afterwards removed, from some reason or other, to the southern coast of Palestine bordering on Egypt.

CAPPADO'CIA, an ancient province of Asia Minor, bounded on the north by Pontus, on the east by the Euphrates and Armenia Minor, on the south by Mount Taurus (beyond which are Cilicia and Syria), and on the east by Phrygia and Galatia. The country is mountainous and abounds in water, and was celebrated for the production of wheat, for its fine pastures, and for its excellent breed of horses, asses, and sheep. The inhabitants were notorious for their dulness and vice. Cappadocia was subjugated by the Persians under Cyrus; but after the time of Alexander the Great it had kings of its own, who bore the common name of Ariarathes. It continued

to be governed by tributary kings under the Romans till A.D. 17, when Tiberius made it a Roman province. Christianity was very early propagated in Cappadocia, for St. Peter names it in addressing the Christian churches in Asia Minor (1 Pet. i. 1). Cappadocians were present at Jerusalem on the day of Pentecost (Acts ii. 9).

CAPTIVITIES. The word *Captivity*, as applied to the people of Israel, has been appropriated, contrary to the analogy of our language, to mean Expatriation. The violent removal of the entire population of a city, or sometimes even of a district, is not an uncommon event in ancient history. As a measure of policy, no objection to it on the ground of humanity was felt by any one; since, in fact, it was a very mild proceeding, in comparison with that of selling a tribe or nation into slavery. Every such destruction of national existence, even in modern times, is apt to be embittered by the simultaneous disruption of religious bonds; but in the ancient world, the positive sanctity attributed to special places, and the local attachment of Deity, made expatriation doubly severe. The Hebrew people, for instance, in many most vital points, could no longer obey their sacred law at all, when personally removed from Jerusalem; and in many others they were forced to modify it by reason of their change of circumstances.

Two principal motives impelled conquering powers thus to transport families in the mass; first, the desire of rapidly filling with a valuable population new cities, built for pride or for policy; next, the determination to break up hostile organizations, or dangerous reminiscences of past greatness. Both might sometimes be combined in the same act. To attain the former object, the skilled artisans would in particular be carried off; while the latter was better effected by transporting all the families of the highest birth, and all the well-trained soldiery.

The expatriation of the Jewish people belongs to two great eras, commonly called the first and second Captivity; yet differing exceedingly in character. It is to the former that the above remarks chiefly apply. In it, the prime of the nation were carried eastward by the monarchs of Assyria and Babylon, and were treated with no unnecessary harshness, even under the dynasty that captured them. That which we name the first Captivity, was by no means brought about by a single removal of the population. In fact, from beginning to end, the period of deportation occupied full 150 years; as the period of return reaches probably through 100. The first blow fell upon the more distant tribes of Israel, about 741 B.C.; when Tiglath-pileser, king of Assyria (2 Kings xv. 29), carried off the pastoral population which lived beyond the Jordan, with Zebulun and Naphtali. (To this event allusion is made in Isaiah ix. 1; a passage very ill translated in our received version.) In the time of this conquering monarch, Assyria was rapidly rising into power, and to aggrandize Nineveh was probably a great object of policy. It is therefore credible, as he had received no particular provocation from the Israelites, that he carried off these masses of population to stock his huge city with. His successor Shalmanezar made the Israelitish king Hoshea tributary. When the

tribute was withheld, he attacked and reduced Samaria (B.C. 721), and, by way of punishment and of prevention, transported into Assyria and Media its king and all the most valuable population remaining to the ten tribes (2 Kings xvii. 6). The families thus removed were, in great measure, settled in very distant cities; many of them probably not far from the Caspian Sea; and their place was supplied by colonies from Babylon and Susia (2 Kings xvii. 24). Such was the end of Israel as a kingdom.—An interval of more than a century followed before Judah was to suffer a similar fate. Two separate deportations are narrated in the book of Kings, three in that of Jeremiah, while a fourth and earlier one appears in the book of Daniel i. 1–3. But it is pretty clear that the people of Judah, as of Israel, were carried out of their land by two principal removals. The former, B.C. 598, was directed to swell the armies and strengthen the towns of the conqueror; for of the 18,000 then carried away, 1000 were ‘craftsmen and smiths, all strong and apt for war,’ and the rest are called ‘mighty men of valour.’ It was not until the rebellion of Zedekiah that Nebuchadnezzar proceeded to the extremity of breaking up the national existence, B.C. 588. As the temple was then burnt, with all the palaces and the city walls, and no government was left but that of the Babylonian satrap, this latter date is evidently the true era of the captivity. Previously Zedekiah was tributary; but so were Josiah and Ahaz long before; the national existence was still saved.

Details concerning the *Return* from the captivity are preserved in the books denominated after Ezra and Nehemiah; and in the prophecies of two contemporaries, Haggai and Zechariah. The first great event is the decree of Cyrus, B.C. 536, in consequence of which 42,360 Jews of Babylon returned under Sheshbazzar, with 7337 slaves, besides cattle. This ended in their building the altar, and laying the foundation of the second temple, 53 years after the destruction of the first. The progress of the work was, however, almost immediately stopped; for Zerubbabel, Joshua, and the rest abruptly refused all help from the half-heathen inhabitants of Samaria, and soon felt the effects of the enmity thus induced. That the mind of Cyrus was changed by their intrigues, we are not informed; but he was probably absent in distant parts, through continual war. When Darius (Hystaspis), an able and generous monarch, ascended the throne, the Jews soon obtained his favour. At this crisis, Zerubbabel was in chief authority (Sheshbazzar perhaps being dead), and under him the temple was begun in the second and ended in the sixth year of Darius, B.C. 520–516. Although this must be reckoned an era in the history, it is not said to have been accompanied with any new immigration of Jews. We pass on to ‘the seventh year of king Artaxerxes’ (Longimanus), Ezra vii. 7, that is, B.C. 458, when Ezra comes up from Babylon to Jerusalem, with the king’s commendatory letters, accompanied by a large body of his nation. The enumeration in Ezra viii. makes them under 1800 males, with their families; perhaps amounting to 5000 persons, young and old: of whom 113 are recounted as having heathen wives (Ezra x. 18–43). In the twentieth year of the same king, or B.C. 445,

Nehemiah, his cupbearer, gains his permission to restore 'his fathers' sepulchres,' and the walls of his native city; and is sent to Jerusalem with large powers. This is the crisis which decided the national restoration of the Jewish people: for before their city was fortified, they had no defence against the now confirmed enmity of their Samaritan neighbours; and, in fact, before the walls could be built, several princes around were able to offer great opposition [SANBALLAT]. The Jewish population was overwhelmed with debt, and had generally mortgaged their little estates to the rich; but Nehemiah's influence succeeded in bringing about a general forfeiture of debts, or at least of the interest: after which we may regard the new order of things to have been finally established in Judea [NEHEMIAH]. From this time forth it is probable that numerous families returned in small parties, as to a secure home, until all the waste land in the neighbourhood was re-occupied.

There has been great difference of opinion as to how the 70 years of captivity spoken of by Jeremiah (xxv. 12; xxix. 10) are to be estimated. A plausible opinion would make them last from the destruction of the first temple, B.C. 588, to the finishing of the second, B.C. 516; but the words of the text so specify 'the punishing of the king of Babylon' as the end of the 70 years—which gives us the date B.C. 538—that many cling to the belief that a first captivity took place in the third year of Jehoiakim, B.C. 605. But, in fact, if we read Jeremiah himself, it may appear that in ch. xxv. he intends to compute the 70 years from the time at which he speaks (ver. 1, 'in the fourth year of Jehoiakim,' i. e. B.C. 604); and that in xxix. 10, the number 'seventy years' is still kept up, in remembrance of the former prophecy, although the language there used is very lax.

The great mass of the Israelitish race nevertheless remained in dispersion. Previous to the captivity, many Israelites had settled in Egypt (Zech. x. 11; Isa. xix. 18), and many Jews afterwards fled thither from Nebuzaradan (Jer. xli. 17). Others appear to have established themselves in Sheba, where Jewish influence became very powerful [SHEBA].

It is maintained by some that the ten tribes intermarried so freely with the surrounding population as to have become completely absorbed; and it appears to be a universal opinion that no one now knows where their descendants are. But it is a harsh assumption that such intermarriages were commoner with the ten tribes than with the two; and certainly, in the apostolic days, the twelve tribes are referred to as a well-known people, sharply defined from the heathen (James i. 1; Acts xxiv. 7). Not a trace appears that any repulsive principle existed at that time between the Ten and the Two. 'Ephraim no longer envied Judah, nor Judah vexed Ephraim'; but they had become 'one nation'; though only partially 'on the mountains of Israel' (Isa. xi. 13; Ezek. xxxvii. 22). It would seem, therefore, that one result of the captivity was to blend all the tribes together, and produce a national union which had never been effected in their own land. If ever there was a difference between them as to the books counted sacred, that difference entirely vanished; at least no evidence appears of the contrary fact. When, moreover, the laws of

landed inheritance no longer enforced the maintenance of separate tribes and put a difficulty in the way of their intermarriage, an almost inevitable result in course of time was the entire obliteration of this distinction; and as a fact, no modern Jews know to what tribe they belong, although vanity always makes them choose to say that they are of the two or three, and not of the ten tribes. That all Jews now living have in them the blood of all the ten tribes, ought (it seems) to be believed, until some better reason than mere assertion is advanced against it.

When Cyrus gave permission to the Israelites to return to their own country, and restored their sacred vessels, it is not wonderful that few persons of the ten tribes were eager to take advantage of it. In two centuries they had become thoroughly naturalized in their eastern settlements; nor had Jerusalem ever been the centre of proud aspirations to them. It was therefore to be expected that only those would return to Jerusalem whose expatriation was very recent; and principally those whose parents had dwelt in the Holy City or its immediate neighbourhood. The century which followed their return was, on the whole, one of great religious activity and important permanent results on the moral character of the nation. Even the prophetic spirit by no means disappeared for a century and a half; although at length both the true and the false prophet were supplanted among them by the learned and diligent scribe, the anxious commentator, and the over-literal or over-figurative critic. In place of a people prone to go astray after sensible objects of adoration, and readily admitting heathen customs; attached to monarchical power, but inattentive to a hierarchy; careless of a written law, and movable by alternate impulses of apostasy and repentance; we henceforth find in them a deep and permanent reverence for Moses and the prophets, an aversion to foreigners and foreign customs, and a profound hatred of idolatry. Now first, as far as can be ascertained, were the synagogues and houses of prayer instituted, and the law periodically read aloud. Now began the close observance of the Passover, the Sabbath, and the Sabbatical year. From this era the civil power was absorbed in that of the priesthood, and the Jewish people affords the singular spectacle of a nation in which the priestly rule came later in time than that of hereditary kings.

In their habits of life also, the Jewish nation was permanently affected by the first captivity. The love of agriculture, which the institutions of Moses had so vigorously inspired, had necessarily declined in a foreign land; and they returned with a taste for commerce, banking, and retail trade, which was probably kept up by constant intercourse with their brethren who remained in dispersion. The same intercourse in turn propagated towards the rest the moral spirit which reigned at Jerusalem. The Egyptian Jews, it would seem, had gained little good from the contact of idolatry (Jer. xlv. 8); but those who had fallen in with the Persian religion, probably about the time of its great reform by Zoroaster, had been preserved from such temptations, and returned purer than they went. Thenceforward it was the honourable function of Jerusalem to act as a religious metropolis to the whole dispersed nation; and it cannot be doubted that the ten tribes, as

well as the two, learned to be proud of the Holy City, as the great and free centre of their name and their faith. The same religious influences thus diffused themselves through all the twelve tribes of Israel.

Thus in Egypt and Arabia, in Babylonia, Assyria, Media, masses of the nation were planted, who, living by traffic and by banking, were necessitated to spread in all directions as their numbers increased. By this natural progress they moved westward as well as eastward, and, in the time of St. Paul, were abundant in Asia Minor, Greece, and the chief cities of Italy.

The extermination suffered by the Jewish inhabitants of Palestine, under the Romans, far better deserves the name of captivity: for after the massacre of countless thousands, the captives were reduced to a real bondage. According to Josephus, 1,000,000 men fell in the siege of Jerusalem by Titus, and 97,000 were captured in the whole war. Of the latter number the greatest part was distributed among the provinces, to be butchered in the amphitheatres or cast there to wild beasts; others were doomed to work as public slaves in Egypt: only those under the age of seventeen were sold into private bondage. An equally dreadful destruction fell upon the remains of the nation, which had once more assembled in Judæa, under the reign of Hadrian (A.D. 133); and by these two savage wars the Jewish population must have been effectually extirpated from the Holy Land itself, a result which did not follow from the Babylonian captivity. Afterwards, a dreary period of fifteen hundred years' oppression crushed in Europe all who bore the name of Israel, and Christian nations have visited on their head a crime perpetrated by a few thousand inhabitants of Jerusalem, who were not the real forefathers of the European Jews. Nor in the East has their lot been much more cheering. With few and partial exceptions, they have ever since been a despised, an oppressed, and naturally a degraded people; though from them have spread light and truth to the distant nations of the earth.

CARAVAN is the name given to a body of merchants or pilgrims as they travel in the East. A multitude of people, of all ages and conditions, assembling to undertake a journey, and prosecuting it *en masse* for days and weeks together, is a thing unknown in Europe, where, from the many facilities for travelling, and a well organized system of police, travellers can go alone and unprotected along the highways to any distance with the most perfect security. But in Eastern countries the dangers arising from the vast deserts that intersect these regions, as well as from wild beasts and bands of marauding Arabs, are too numerous and imminent for single traders or solitary travellers to encounter; and hence merchants and pilgrims are accustomed to unite for mutual protection in traversing these wild and inhospitable parts, as well as for offering a more effectual resistance to the attacks of robbers. Through this kind of intercourse, which principally obtains in Turkey, Persia, and Arabia, most of the inland commerce of the East is carried on. Any person can, under certain regulations, form a caravan at any time. But generally there are stated periods, which are well known as the regular starting-times for the mercantile journeys; and the merchants belonging to the company, or those travellers who are de-

sirous of accompanying it for the benefit of a safe conduct, repair to the place of rendezvous where the caravan is to be formed, exhibiting, as their goods and camels successively arrive, a motley group—a busy and tumultuous scene of preparation, which can be more easily conceived than described. As in the hot season the travelling is performed under night, the previous part of the day on which the caravan leaves is consumed in the preparatory labours of packing—an indispensable arrangement, which has been observed with unbroken uniformity since the days of Ezekiel (xii. 3); and then, about eight o'clock, the usual starting-time, the whole party put themselves in motion, and continue their journey without interruption till midnight (Luke xi. 5, 6) or later. At other seasons they travel all day, only halting for rest and refreshment during the heat of noon. The average rate of travel is from 17 to 20 miles per day.

The earliest caravan of merchants we read of is the itinerant company to whom Joseph was sold by his brethren (Gen. xxxvii.). The date of this transaction is more than seventeen centuries before the Christian era, and notwithstanding its antiquity, it has all the genuine features of a caravan crossing the desert at the present hour. This caravan was a mixed one, consisting of three classes, Ishmelites (ver. 25), Midianites (ver. 28), and Medanites, as the Hebrew calls the last (ver. 36), who, belonging to the mountainous region of Gilead, would seem, like the nomade tribes of Africa in the present day, to have engaged themselves as commercial travellers, and were then, in passing over the plain of Dothan, on the high caravan-road for the market of Egypt.

Besides these communities of travelling merchants in the East, there are caravans of pilgrims, i. e. of those who go for religious purposes to Mecca, comprising vastly greater multitudes of people. Four of these start regularly every year: one from Cairo, consisting of Mahomedans from Barbary; a second from Damascus, conveying the Turks; a third from Babylon, for the accommodation of the Persians; and a fourth from Zibith, at the mouth of the Red Sea, which is the rendezvous for those coming from Arabia and India. The organization of the immense hordes which, on such occasions, assemble to undertake a distant expedition, strangers to each other, and unaccustomed to the strict discipline which is indispensable for their comfort and security during the march, though, as might be expected, a work of no small difficulty, is accomplished in the East by a few simple arrangements which are the result of long experience. One obvious bond of union to the main body, when travelling by night and through extensive deserts, is the music of the Arab servants, who by alternate songs in their national manner beguile the tedium of the way; while the incessant jingling of innumerable bells fastened to the necks of the camels enlivens the patient beasts, frightens animals of prey, and keeps the party together. To meet all the exigencies of the journey, however, the caravan is placed under the charge of a *caravan bashè*, the chief who presides over all, and under whom there are five leading officers appointed to different departments:—one who regulates the march; a second, whose duties only commence at halting time; a third who superintends the servants and cattle; a fourth

who takes charge of the baggage; a fifth who acts as paymaster, &c.; and besides these, there are the officers of the military escort that always accompanies it. Another functionary of the highest importance is the *hybeer*, or guide, whose services are indispensable in crossing the great deserts, such as that along the coast of the Red Sea or on the western extremities of Africa. He is commonly a person of influence, belonging to some powerful tribe, whose personal qualifications must embrace an extensive and accurate acquaintance with the whole features of the land. It is absolutely necessary that he understand the prognostics of the weather, the time and places where the terrible simoom or hot wind blows, and the tracts occupied by shifting sands; and that he know the exact locality and qualities of the wells, the oases that afford the refreshments of shade for the men and grass for the cattle, the situation of hostile or treacherous tribes, and the means of escaping those threatened dangers.

There is a close and very striking resemblance between the arrangements of these caravans and the order adopted by the Israelites during their journey through almost the same extensive deserts. The arrangement of those vast travelling bodies seems to have undergone no material alteration for nearly four thousand years, and therefore affords the best possible commentary illustrative of the Mosaic narrative of the Exodus. Like them, the immense body of Israelitish emigrants, while the chief burden devolved on Moses, was divided into companies, each company being under the charge of a subordinate officer, called a prince (Num. vii.). Like them, the Hebrews made their first stage in a hurried manner and in tumultuous disorder (Exod. xii. 11); and, like them, each tribe had its respective standard [STANDARDS]; which was pitched at the different stages, or thrust perpendicularly into the ground, and thus formed a central point, around which the straggling party spread themselves during their hours of rest and leisure (Num. ii. 2). Like them, the signal for starting was given by the blast of a trumpet, or rather trumpets (Num. x. 2, 5); and the time of march and halting was regulated by the same rules that have been observed by all travellers from time immemorial during the hot season. Like theirs, too, the elevation of the standard, as it was borne forward in the van of each company, formed a prominent object to prevent dispersion, or enable wanderers to recover their place within the line or division to which they belonged. Nor was there any difference here, except that, while the Israelites in like manner prosecuted their journey occasionally by night as well as by day, they did not, like the caravans of pilgrims, require the aid of fires in their standards, as the friendly presence of the fiery pillar superseded the necessity of any artificial lights. One other point of analogy remains to be traced in the circumstance of Hobab being enlisted in the service of the Hebrew caravan as its guide through the great Arabian desert. The extreme solicitude of Moses to secure the services of his brother-in-law in that capacity will be accounted for if it is borne in mind, that although the pillar of cloud by day and of fire by night sufficed to regulate the main stages of the Hebrews, foraging parties would at short intervals require to be sent out, and scouts to reconnoitre the country for fuel, or

to negotiate with the native tribes for provender and water. And who so well qualified to assist in these important services as Hobab, from his intimate acquaintance with the localities, his influence as a Sheikh, and his family connection with the leader of Israel?

The nature and economy of the modern Hadj caravans might be applied also to illustrate the return of the Hebrew exiles under Ezra from the land of their captivity.

The bands of Jewish pilgrims that annually repaired from every corner of Judaea to attend the three great festivals in Jerusalem, wanted this government and distribution into distinct companies, and seem to have resembled less the character of the great Mecca caravans than the irregular processions of the Hindus to and from the scene of some of their religious pageants. On such occasions multitudes of men, women, and children, amounting to ten or twenty thousand, may be seen bending their way to the place of ceremonial, with their beds, cooking implements, and other luggage on their heads, prosecuting their journey in this manner from day to day, by long or shorter stages, as custom or physical strength may dictate. As in a crowd of this motley description not the slightest regard is paid to regularity or order, and every one of course takes the place or mingles with the group that pleases him, the separation of the nearest friends for a whole day must, in such circumstances, be a common and unavoidable occurrence; and yet anxiety is never felt, unless the missing one fail to appear at the appointed rendezvous of the family. In like manner among the ancient Jews, the inhabitants of the same village or district would naturally form themselves into travelling parties, for mutual security as well as for enjoying the society of acquaintance. The poorer sort would have to travel on foot, while females and those of the better class might ride on asses and camels. But as their country was divided into tribes, and those who lived in the same hamlet or canton would be more or less connected by family ties, the young, the volatile, and active among the Jewish pilgrims had far more inducements to disperse themselves amongst the crowd than those of the modern processions, numbers of whom are necessarily strangers to each other. In these circumstances it is easy to understand how the young Jesus might mingle successively with groups of his kindred and acquaintance, who, captivated with his precocious wisdom and piety, might be fonder to detain him in their circle, while his mother, together with Joseph, felt no anxiety at his absence, knowing the grave and sober character of their companions in travel; and the incident is the more natural that his parents are said to have gone 'one day's journey from Jerusalem before they missed him'; since, according to the present, and probably the ancient, practice of the East, the first stage is always a short one, seldom exceeding two or three hours. Beer—the modern el-Bireh, where Mary's discovery is reputed to have been made—is scarcely three miles from Jerusalem, where the caravan of Galilean pilgrims halted.

CARAVANSERAI. [INN.]

CARBUNCLE. There are two Hebrew words rendered by 'Carbuncle' in the Authorized Version. One of them, נֹפֶּחַח, which occurs in

Exod. xxviii. 18; xxxix. 11; Ezek. xxviii. 13, appears to have been a kind of ruby or garnet, perhaps the noble Oriental garnet, which is a transparent red stone, with a violet shade, and strong glossy lustre. The other word is EKDACH, which occurs in Isa. liv. 12, where the gates of the new Jerusalem are described as being composed of it. It seems to denote some stone of a fiery lustre, but the particular kind cannot well be determined.

CARCHEMISH is mentioned in Isa. x. 9 among other places in Syria which had been subdued by an Assyrian king, probably Tiglath-pileser. It appears to have been a frontier town and a stronghold on the Euphrates (Jer. xlv. 2; 2 Chron. xxxv. 20), and is probably therefore the city which the Greeks called Kirkesion, the Latins Cercusium, and the Arabs, Kerkesiyeh; for this too lay on the western bank of the Euphrates, where it is joined by the Chaboras. It was a large city, and surrounded by strong walls, which, in the time of the Komans, were occasionally renewed, as this was the remotest outpost of their empire, towards the Euphrates, in the direction of Persia. It is unknown whether any traces of it still exist; for, as it lies off the usual route of caravans, it has not been noticed by modern travellers.

CARIA, a country lying at the south-western extremity of Asia Minor, to which, among others, the Romans wrote in favour of the Jews (1 Macc. xv. 22, 33). Its principal towns were Halicarnassus, Cnidus, and Myndus, which are all mentioned in the rescript of the Roman senate, to which we refer. Halicarnassus was the birthplace of Herodotus; Cnidus is mentioned in Acts xxvii. 7, as having been passed by St. Paul on his voyage to Rome.

CARMEL, a range of hills extending north-west from the plain of Esdraelon, and ending in a promontory, or cape, which forms the Bay of Acre. The extent of this range of hills is about six miles, not in a direct line; but the two extremities (on the western side towards the sea) jut

consists rather of several connected hills than of one ridge; the north and eastern parts being somewhat higher than the southern and western. The foot of the northern portion approaches the water very closely, but further south it retires more inland, so as to leave between the mountain and the sea an extensive and very fertile plain.

Mount Carmel forms the only great promontory upon the coast of Palestine. According to the reports of most travellers, the mountain well deserves its Hebrew name (Carmel—country of vineyards and gardens). It is entirely covered with verdure. On its summit are pines and oaks, and further down olives and laurel trees, everywhere plentifully watered. It gives rise to a multitude of crystal brooks, the largest of which issues from the so-called Fountain of Elijah; and they all hurry along, between banks thickly overgrown with bushes, to the Kishon. Every species of tillage succeeds here admirably, under this mild and cheerful sky. The prospect from the summit of the mountain over the gulf of Acre and its fertile shores, and over the blue heights of Lebanon and the White Cape, is enchanting.

The mountain is of compact limestone, and, as often happens where that is the case (CAVES), there are in it very many caverns—it is said, more than a thousand. In one tract, called the Monk's Cavern, there are as many as four hundred adjacent to each other, furnished with windows and with places for sleeping bewn in the rock. That the grottoes and caves of Mount Carmel were already, in very ancient times, the abode of prophets and other religious persons is well known. The prophets Elijah and Elisha often resorted thither (1 Kings xviii. 19, sq. 42; 2 Kings ii. 25; iv. 25; and comp. perhaps 1 Kings xviii. 4, 13). At the present day is shown a cavern called the cave of Elijah, a little below the Monk's Cavern already mentioned, and which is now a Moslem sanctuary. Upon the summit is an ancient establishment of Carmelite monks, which order, indeed, derived its name from the mountain. The old convent was destroyed by Abdallah Pasha, who converted the materials to his own use; but it has of late years been rebuilt on a somewhat imposing scale by the aid of contributions from Europe.

2. CARMEL. Another Carmel, among the mountains of Judah, is named in Josh. xv. 55. It was here that Saul set up the trophy of his victory over Amalek (1 Sam. xv. 12), and where Nabal was shearing his sheep when the affair took place between him and David in which Abigail bore so conspicuous a part (1 Sam. xxv. 2, sq.). This Carmel is described by Eusebius and Jerome as, in their day, a village, with a Roman garrison, ten miles from Hebron, verging towards the east. From the time of the Crusades till the present century its name seems to have been forgotten. But it has been recently recognised by travellers under the name of Karmul. The place is now utterly desolate, but the ruins indicate a town of considerable extent and importance. The most remarkable ruin is that of a castle, quadrangular, standing on a swell of ground in the midst of the town. The distance of this place from Hebron is nearer eight Roman miles than ten, as assigned by Eusebius and Jerome.

111.

out, and stand over against each other, forming a bow in the middle. The height is about 1500 feet; and at the foot of the mountain, on the north-east, runs the brook Kishon, and a little further north, the river Belus. Mount Carmel

CARPENTER. [HANDICRAFT.]

CARPUS, a disciple of Paul, who dwelt at Troas (2 Tim. iv. 13).

CART. The Hebrew word rendered by our translators in some places by 'waggon,' and in others by 'cart,' denotes any vehicle moving on wheels and usually drawn by oxen; and their particular character must be determined by the context indicating the purpose for which they were employed. First, we have the carts which the king of Egypt sent to assist in transporting Jacob's family from Canaan (Gen. xlv. 12, 27). From their being so sent it is manifest that they were not used in the latter country; and that they were known there as being peculiar to Egypt is shown by the confirmation which they afforded to Jacob of the truth of the strange story told by his sons. The carts or wains represented

112.

in the Egyptian sculptures are the following, which, however, appear to belong to a foreign people. But that the Egyptians had something like them of their own appears from figs. 1, 2, in cut 113.

Elsewhere (Num. vii. 3, 6; 1 Sam. vi. 7) we read of carts used for the removal of the sacred ark and utensils. These also were drawn by two oxen. In Rosellini we have found a very

113.

curious representation of the vehicle used for such purposes by the Egyptians (No. 113, fig. 3). It is little more than a platform on wheels; and the apprehension which induced Uzzah to put forth his hand to stay the ark when shaken by the oxen (2 Sam. vi. 6), may suggest that the cart employed on that occasion was not unlike this, as it would be easy for a jerk to displace whatever might be upon it.

CASLU'HIM, properly Casluheim, a people whose progenitor was a son of Mizraim (Gen. x. 14; 1 Chron. i. 12). He, or they, for the word applies rather to a people than to an individual, are supposed by Bochart and others to have carried a colony from Egypt, which settled in the district between Pelusium and Gaza, or, in other words, between the Egyptians and the Philistines. There are some grounds for this conjecture; but it is impossible to obtain any certainty on so obscure a subject.

CASSIA. Our translators have rendered two distinct Hebrew words by this term. One of these (*Ketziath*) is mentioned in three places

(Exod. xxx. 24; Ezek. xxvii. 19; and in Ps. xlv. 8), in conjunction with myrrh, cinnamon, sweet calamus, and ahalm, or eagle-wood. All these are aromatic substances, and, with the exception of myrrh, which is obtained from Africa, are products of India and its islands. It is probable, therefore, that *Ketziath* is of a similar nature, and obtained from the same countries. It is supposed, however, that the substance referred to is not cassia; but it will be preferable to treat of the whole subject in connection with cinnamon. [KINNAMON.]

The other word rendered cassia in our Authorized Version is *kiddah*. It occurs first in Exod. xxx. 24, where cassia (*kiddah*) is mentioned in connection with olive oil, pure myrrh, sweet cinnamon, and sweet calamus; secondly, in Ezek. xxviii. 19, where Dan and Javan are described as bringing bright iron, cassia (*kiddah*), and calamus to the markets of Tyre. There is no reason why the substance now called cassia might not have been imported from the shores of India into Egypt and Palestine. The Arabian *Koost* (*Aucklandia Costus*), known in Calcutta by the name of *Puchuk*, an aromatic substance exported in large quantities from Cashmere into the Punjab, whence it finds its way to Bombay and Calcutta, for export to China, where it is highly valued as one of the ingredients in the incense which the Chinese burn in their temples and private houses.

CASTLE. [FORTIFICATIONS.]

CASTOR AND POLLUX, in heathen mythology, the twin sons of Jupiter by Leda. They had the special province of assisting persons in danger of shipwreck; and hence their figures were often adopted for 'the sign,' from which a ship derived its name, as was the case with that 'ship of Alexandria' in which St. Paul sailed on his journey for Rome (Acts xxviii. 11).

CAT. It might be assumed that the cat was an useful, if not a necessary, domestic animal to the Hebrew people in Palestine, where corn was grown for exportation, as well as for consumption of the resident population, twenty or thirty-fold more than at present, and where, moreover, the conditions of the climate required the precaution of a plentiful store being kept in reserve to meet the chances of scarcity. The animal could not be unknown to the people, for their ancestors had witnessed the Egyptians treating it

114.

as a divinity. Yet we find the cat nowhere mentioned in the canonical books as a domestic animal. And in Baruch it is noticed only as a tenant of Pagan temples, where no doubt the fragments of sacrificed animals and vegetables attracted vermin, and rendered the presence of cats necessary. This singular circumstance, perhaps, re-

sulted from the animal being deemed unclean, and being thereby excluded domestic familiarity, though the Hebrews may still have encouraged it, in common with other vermin-hunters, about the outhouses and farms, and corn-stores, at the risk of some loss among the broods of pigeons which, in Palestine, were a substitute for poultry.

With regard to the neighbouring nations just named, they all had domestic cats, it is presumed, derived from a wild species found in Nubia, and first described by Ruppel under the name of *Felis Maniculata*. The typical animal is smaller, more slender, and more delicately limbed than the European. The fur is pale yellowish grey, with some dark streaks across the paws, and at the tip of the tail. In the domesticated state it varies in colours and markings, for the ancient monuments of Egypt contain many painted figures, which show them cross-banded like our wild species in Europe. Two specimens are here given from these paintings: one clearly a cat; the other, which is not apparently a cat but a species of gennet or paradoxurus, is, in the original, figured as catching birds, acting like a retriever for his master, who is fowling in a boat.

CATERPILLAR occurs in the Auth. Vers. 1 Kings viii. 37; 2 Chron. vi. 28; Ps. lxxviii. 46; ev. 34; Isa. xxxiii. 4; Jer. li. 14, 27; Joel i. 4; ii. 25. But it is more than doubtful whether any species of caterpillar is here intended. The name in the original indicates a creature whose chief characteristic is voracity, and which also attaches to all the species of locusts. The ancients, indeed, concur in referring the word to the locust tribe of insects, but are not agreed whether it signifies any particular species of locust, or is the name for any of those *status* or *transformations* through which the locust passes from the egg to the perfect insect. The Latin Fathers take it to mean the *larva* of the locust, and the Greek understand it as the name of an *adult* locust. On the whole it seems probable that the Hebrew word means a locust, but of which species it is impossible to determine.

CATTLE. [BEASTS; BULL.]

CAVES. The geological formation of Syria is highly favourable to the production of caves. It consists chiefly of limestone, in different degrees of density, and abounds with subterranean rivulets. The springs issuing from limestone generally contain carbonate of lime, and most of them yield a large quantity of free carbonic acid upon exposure to the air. To the erosive effect upon limestone rocks, of water charged with this acid, the formation of caves is chiefly to be ascribed. The subordinate strata of Syria, sandstone, chalk, basalt, natron, &c. favour the formation of caves. Consequently the whole region abounds with subterranean hollows of different dimensions. Some of them are of immense extent, such as those noticed by Strabo, who speaks of a cavern near Damascus capable of holding 4000 men. The first mention of a cave in Scripture relates to that into which Lot and his two daughters retired from Zoar, after the destruction of Sodom and Gomorrah (Gen. xix. 30). The next is the *Cave of Machpelah*, in the field of Ephron, which Abraham purchased of the sons of Heth (Gen. xxv. 3, 10). There Abraham buried Sarah, and was himself afterwards buried; there also Isaac, Rebecca, Leah, and Jacob, were buried (Gen. xlix. 31;

l. 13). The cave of Machpelah is said to be under a Mahometan mosque, surrounded by a high wall called the Harem; but even the Moslems are not allowed to descend into the cavern. The tradition that this is the burial-place of the patriarchs is supported by an immense array of evidence.

The situation of the *Cave at Makhdah*, into which the five kings of the Amorites retired upon their defeat by Joshua, and into which their carcases were ultimately cast, is not known (Josh. x. 16, 27). Some of the caves mentioned in the Scriptures were artificial, or consisted of natural fissures enlarged or modified for the purposes intended. It is recorded (Judg. vi. 2) that 'because of the Midianites, the children of Israel made them the dens which are in the mountains, and caves, and strongholds.' Caves made by art are met with in various quarters. An innumerable multitude of excavations are found in the rocks and valleys round Wady Musa, which were probably formed at first as sepulchres, but afterwards inhabited, like the tombs of Thebes. Caves were used as dwelling-places by the early inhabitants of Syria. The Horites, the ancient inhabitants of Idumæa Proper, were Troglodytes or dwellers in caves, as their name imports. Jerome records that in his time Idumæa was full of habitations in caves, the inhabitants using subterranean dwellings on account of the great heat. The Scriptures abound with references to habitations in rocks; among others, see Num. xxiv. 21; Cant. ii. 14; Jer. xlix. 16; Obad. 3. Even at the present time many persons live in caves. Caves afford excellent refuge in the time of war. Thus the Israelites (1 Sam. xiii. 6) are said to have hid themselves in caves, and in thickets, and in rocks, and in high places, and in pits. See also Jer. xli. 9. Hence, then, to 'enter into the rock, to go into the holes of the rocks, and into the caves of the earth' (Isa. ii. 19), would, to the Israelites, be a very proper and familiar way to express terror and consternation. The pits spoken of seem to have consisted of large wells, in 'the sides' of which excavations were made, leading into various chambers. Such pits were sometimes used as prisons (Isa. xxiv. 22; li. 14; Zech. ix. 11); and with niches in the sides, for burying-places (Ezek. xxxii. 23). Many of these vaulted pits remain to this day. The *strongholds of Engedi*, which afforded a retreat to David and his followers (1 Sam. xxiii. 29; xxiv. 1), can be clearly identified. They are now called Ain Tidy by the Arabs, which means the same as the Hebrew, namely, 'The Fountain of the Kid.' On all sides the country is full of caverns, which might serve as lurking-places for David and his men, as they do for outlaws at the present day. The whole scene is drawn to the life. *The Cave of Adullam*, to which David retired to avoid the persecutions of Saul (1 Sam. xxii. 1, 2), and in which he cut off the skirt of Saul's robe (1 Sam. xxiv. 4), is an immense natural cavern at the Wady Khureitun, which passes below the Frank mountain. Such is the extent of the cavern, that it is quite conceivable how David and his men might 'remain in the sides of the cave,' and not be noticed 'by Saul' (*Travels*, vol. ii. p. 41). Caverns were also frequently fortified and occupied by soldiers. Josephus relates also that Herod sent horsemen and footmen to destroy the robbers that dwelt in caves, and did much mischief in the

country. They were very near to a village called Arbela (now called Kôlat Ibn Ma'an). The occupants were not subdued without great difficulty. Herod then laid siege to certain other caverns containing robbers, but found operations against them very difficult. These were situated on the middle of abrupt and precipitous mountains, and could not be come at from any side, since they had only some winding pathways, very narrow, by which they got up to them. The rock that lay on their front overhung valleys of immense depth, and of an almost perpendicular declivity. To meet these difficulties Herod caused large boxes filled with armed men to be lowered from the top of the mountain. These men had long hooks in their hands with which they might pull out those who resisted them, and tumble them down the mountains. From these boxes they at length slipped into the caverns, destroyed the robbers, and set fire to their goods. Certain caves were afterwards fortified by Josephus himself during his command in Galilee under the Romans. A fortified cavern existed in the time of the Crusades. It is mentioned by William of Tyre, as situate in the country beyond the Jordan, sixteen Roman miles from Tiberias. The cave of Elijah is pretended to be shown, at the foot of Mount Sinai, in a chapel dedicated to him; and a hole near the altar is pointed out as the place where he lay.

CEDAR. There is a difference of opinion among authors whether the original term thus translated in the numerous passages of Scripture where it occurs is always used in the same signification; that is, whether it is always intended to specify only one particular kind of the pine tribe, or whether it is not sometimes used generically. In this latter opinion we are disposed

115. [Cedar of Lebanon.]

to concur, for if we proceed to compare the several passages of Scripture in which the word occurs, we shall equally find that one plant is not strictly applicable to them all. The earliest notice of the cedar is in Lev. xiv. 4, 6, where we are told that Moses commanded the leper that

was to be cleansed to make an offering of two sparrows, cedar-wood, wool dyed in scarlet, and hyssop; and in ver. 49, 51, 52, the houses in which the lepers dwell are directed to be purified with the same materials. Again, in Num. xix. 6, Moses and Aaron are commanded to sacrifice a red heifer: 'And the priest shall take cedar-wood and hyssop and scarlet.' As remarked by Lady Calcott (*Script. Herbal*, p. 92), 'The cedar was not a native of Egypt, nor could it have been procured in the desert without great difficulty; but the juniper is most plentiful there, and takes deep root in the crevices of the rocks of Mount Sinai.' That some, at least, of the cedars of the ancients were a species of juniper is evident from the passages we have quoted; the wood of most of them is more or less aromatic. The ancients, it may be remarked, threw the berries of the juniper on funeral piles, to protect the departing spirit from evil influences, and offered its wood in sacrifice to the infernal gods, because they believed its presence was acceptable to them. They also burned it in their dwelling-houses to keep away demons. It is curious that, in the remote parts of the Himalayan Mountains, another species of this genus is similarly employed.

At a later period we have notices of the various uses to which the wood of the cedar was applied, as 2 Sam. v. 11; vii. 2-7; 1 Kings v. 6, 8, 10; vi. 9, 10, 15, 16, 18, 20; vii. 2, 3, 7, 11, 12; ix. 11; x. 27; 1 Chron. xvii. 6; 2 Chron. ii. 8; ix. 27; xxv. 18. In these passages we are informed of the negotiations with Hiram, King of Tyre, for the supply of cedar-trees out of Lebanon, and of the uses to which the timber was applied in the construction of the Temple, and of the king's palace: he 'covered the house with beams and boards of cedar'; 'the walls of the house within were covered with boards of cedar'; there were 'cedar pillars,' and 'beams of cedar;' and the altar was of cedar. In all these passages there is nothing distinctive stated respecting the character of the wood, from which we might draw any certain conclusion, further than that, from the selection made and the constant mention of the material used, it may be fairly inferred that it must have been considered as well fitted, or rather of a superior quality, for the purpose of building the Temple and palace. From this, however, proceeds the difficulty in admitting that what we call the cedar of Lebanon was the only tree intended. For modern experience has ascertained that its wood is not of a superior quality. To determine this point, we must not refer to the statements of those who take their descriptions from writers who, indeed, describe cedar-wood, but do not prove that it was derived from the cedar of Lebanon. The term 'cedar' seems to have been as indefinite in ancient as in modern times, when we find it applied to the wood of the red or pencil cedar, to that of the Bermuda cedar, and to many other woods, as to white cedar, and Indian cedar.

Mr. Loudon, in his *Arboretum* (p. 2417), describes it thus: 'The wood of the cedar is of a reddish white, light and spongy, easily worked, but very apt to shrink and warp, and by no means durable.' But when the tree is grown on mountains, the annual layers of wood are much narrower and the fibre much finer than when it

is grown on plains; so much so that a piece of cedar-wood brought from Mount Lebanon by Dr. Parisel, in 1829, and which he had made into a small piece of furniture, presented a surface compact, agreeably veined, and variously shaded, and which, on the whole, may be considered handsome. But Dr. Pococke, who brought away a piece of one of the large cedars which had been blown down by the wind, says that the wood does not differ in appearance from white deal, and that it does not appear to be harder. Mr. Loudon says that a table which Sir J. Banks had made out of the Hillingdon cedar was soft, without scent (except that of common deal), and possessed little variety of veining. Though we have seen both temples and palaces built entirely with one kind of cedar, we think it more probable that, as the timber had to be brought from a distance, where all the kinds of cedar grew, the common pine-tree and the cedar of Lebanon would both furnish some of the timber required for the building of the Temple, together with juniper cedar. Celsius was of opinion that the cedar indicated the *Pinus sylvestris* or Scotch pine, which yields the red and yellow deals of Norway, and which is likewise found on Mount Lebanon. This opinion seems to be confirmed by Ezekiel xxvii. 5, 'They have made all thy ship boards of fir-trees of Senir, they have taken cedar from Lebanon to make masts for thee.' For it is not probable that any other tree than the common pine would be taken for masts.

Though Celsius appears to us to be quite right in concluding that the cedar, in some of the passages of Scripture, refers to the pine-tree, yet it seems equally clear that there are other passages to which this tree will not answer, and if we consider some of the remaining passages of Scripture, we cannot fail to perceive that they forcibly apply to the cedar of Lebanon and to the cedar of Lebanon only. Thus, in Ps. xcii. 12, it is said, 'The righteous shall flourish like a palm-tree, and spread abroad like a cedar of Lebanon.' It has been well remarked, 'that the flourishing head of the palm and the spreading abroad of the cedar are equally characteristic.' But the prophet Ezekiel (ch. xxxi.) is justly adduced as giving the most magnificent, and at the same time the most graphic, description of this celebrated tree: (ver. 3) 'Behold, the Assyrian was a cedar in Lebanon with fair branches, and with a shadowy shroud, and of an high stature; and his top was among the thick boughs: (ver. 5) 'Therefore his height was exalted above all the trees of the field, and his boughs were multiplied, and his branches became long because of the multitude of waters: (ver. 6) 'All the fowls of heaven made their nests in his boughs, and under his branches did all the beasts of the field bring forth their young.' In this description, Mr. Gilpin has well observed, 'the principal characteristics of the cedar are marked: first, the multiplicity and length of its branches. Few trees divide so many fair branches from the main stem, or spread over so large a compass of ground. 'His boughs are multiplied,' as Ezekiel says, 'and his branches become long,' which David calls spreading abroad. His very boughs are equal to the stem of a fir or a chestnut. The second characteristic is what Ezekiel, with great beauty and aptness, calls his shadowy shroud.

No tree in the forest is more remarkable than the cedar for its close-woven leafy canopy. Ezekiel's cedar is marked as a tree of full and perfect growth, from the circumstance of its top being among the thick boughs. The other principal passages in which the cedar is mentioned are 1 Kings iv. 33; 2 Kings xix. 23; Job xl. 17; Ps. xxix. 5; lxxx. 10; xcii. 12; civ. 16; cxlviii. 9; Cant. i. 17; v. 15; viii. 9; Isa. ii. 13; ix. 8, 10; xiv. 8; xxxvii. 24; xli. 19; xlv. 14; Jer. xxiii. 7, 14, 23; Ezek. xvii. 3, 22, 23; Amos ii. 9; Zeph. ii. 14; Zech. xi. 1, 2; and in the Apocrypha, 1 Esdras iv. 48; v. 55; Eccles. xxiv. 13; 1. 12; but it would occupy too much space to adduce further illustrations from them of what indeed is the usually admitted opinion.

It is, however, necessary before concluding to give some account of this celebrated tree, as noticed by travellers in the East, all of whom make a pilgrimage to its native sites. The cedar of Lebanon is well known to be a widely-spreading tree, generally from 50 to 80 feet high, and when standing singly, often covering a space with its branches, the diameter of which is much greater than its height. The horizontal branches, when the tree is exposed on all sides, are very large in proportion to the trunk, being disposed in distinct layers or stages, and the distance to which they extend diminishes as they approach the top, where they form a pyramidal head, broad in proportion to its height. The branchlets are disposed in a flat fan-like manner on the branches. The leaves, produced in tufts, are straight, about one inch long, slender, nearly cylindrical, tapering to a point, and are on short footstalks. The cones, when they approach maturity, become from 2½ inches to 5 inches long. Every part of the cone abounds with resin, which sometimes exudes from between the scales. Speaking of the cedars of Lebanon, M. Lamartine, in 1832, says, 'These trees diminish in every succeeding age. Travellers formerly counted 30 or 40 more recently, 17; more recently still, only 12. There are now but 7. These, however, from their size and general appearance, may be fairly presumed to have existed in biblical times. Around these ancient witnesses of ages long since past, there still remains a little grove of yellow cedars, appearing to me to form a group of from 400 to 500 trees or shrubs. Every year, in the month of June, the inhabitants of Beshierai, of Eden, of Kandbin, and the other neighbouring valleys and villages, climb up to these cedars, and celebrate mass at their feet. How many prayers have resounded under these branches, and what more beautiful canopy for worship can exist?'

CEILING. The Orientals bestow much attention upon the ceilings of their principal rooms. Where wood is not scarce, they are usually composed of one curious piece of joinery, framed entire, and then raised and nailed to the joists. These ceilings are often divided into small square compartments; but are sometimes of more complicated patterns. Wood of a naturally dark colour is commonly chosen, and it is never painted. In places where wood is scarce, and sometimes where it is not particularly so, the ceilings are formed of fine plaster, with tasteful mouldings and ornaments, coloured and relieved with gilding, and with pieces of mirror inserted in the hollows formed by the involutions of the

raised mouldings of the arabesques, which enclose them as in a frame. The antiquity of this taste can be clearly traced by actual examples up to the times of the Old Testament, through the Egyptian monuments, which display ceilings painted with rich colours in such patterns as are shown in the annexed cut. The explanation thus

116.

obtained satisfactorily illustrates the peculiar emphasis with which 'ceiled houses' and 'ceiled chambers' are mentioned by Jeremiah (xxii. 14) and Haggai (i. 4).

CENCHRE'A, one of the ports of Corinth, whence Paul sailed for Ephesus (Acts xviii. 18). It was situated on the eastern side of the isthmus, about seventy stadia from the city: the other port on the western side of the isthmus was called Lechreum. [CORINTH.]

CENSER, the vessel in which incense was presented in the temple (2 Chron. xxvi. 19; Ezk. viii. 11; Ecclus. i. 9). Censers were used in the daily offering of incense, and yearly on the day of atonement, when the high-priest entered the Holy of Holies. On the latter occasion the priest filled the censer with live coals from the sacred fire on the altar of burnt-offering, and bore it into the sanctuary, where he threw upon the burning coals the 'sweet incense beaten small' which he had brought in his hand (Lev. xvi. 12, 13). In this case the incense was burnt while the high-priest held the censer in his hand; but in the daily offering the censer in which the live coals were brought from the altar of burnt-offering was set down upon the altar of incense. This alone would suggest the probability of some difference of shape between the censers used on these occasions. The daily censers must have had a base or stand to admit of their being placed on the golden altar, while those employed on the day of atonement were probably furnished with a handle. In fact, there are different names

for these vessels. We learn also that the daily censers were of brass (Num. xvi. 39), whereas the yearly one was of gold. The form of the daily censer we have no means of determining beyond the fact that it was a pan or vase, with a stand whereon it might rest on the golden altar. The numerous figures of Egyptian cen-

117.

sers, consisting of a small cup at the end of a long shaft or handle (often in the shape of a hand), probably offer adequate illustration of those employed by the Jews on the day of atonement.

There was, however, another kind of censer (Fig. 1), less frequently seen on the Egyptian monuments, and likewise furnished with a handle, which will probably be regarded by many as offering a more probable resemblance.

CENSUS. [POPULATION.]

CENTURION, a Roman military officer in command of a hundred men, as the title implies. Cornelius, the first Gentile convert to Christianity, held this rank (Acts x. 1, 22). Other Centurions are mentioned in Matt. viii. 5, 8, 13; xxvii. 54; Luke vii. 2, 6; Acts xxi. 32; xxii. 25, 26; xxiii. 17, 23; xxiv. 23; xxvii. 1, 6, 11, 31, 43; xxviii. 16.

CE'PHAS, a surname which Christ bestowed upon Simon (John i. 42), and which corresponds with Peter, both words meaning a 'rock,' which is the signification of the original [PETER].

CHAFF, the refuse of winnowed corn. It is used as a symbol for unprofitable and worthless characters (Ps. i. 4; Matt. iii. 12).

CHAIN. Chains of gold appear to have been as much used among the Hebrews, for ornament or official distinction, as they are among ourselves at the present day. The earliest mention of them occurs in Gen. xli. 42, where we are told that a chain of gold formed a part of the investiture of Joseph in the high office to which he was raised in Egypt; a later instance occurs in Dan. v. 29, from which we learn that a golden chain was part of a dress of honour at Babylon. In Egypt the judges wore chains of gold, to which was attached a jewelled figure of Thmei, or Truth; and in that country similar chains were also worn

as ornaments by the women. It is not, however, necessary to suppose that the Hebrews derived this custom from the Egyptians; for the fact that chains are mentioned among the spoil of the Midianites shows that they were in use among people whose condition of life more nearly resembled that of the Israelites before they obtained possession of Canaan. It would seem that chains were worn both by men and women (Prov. i. 9; Ezek. xvi. 11), and we find them enumerated among the ornaments of brides (Cant. i. 10; iv. 9).

It was a custom among the Romans to fasten a prisoner with a light chain to the soldier who was appointed to guard him. One end of it was attached to the right hand of the prisoner, and the other to the left hand of the soldier. This is the chain by which Paul was so often bound, and to which he repeatedly alludes (Acts xxviii. 20; Eph. vi. 20; 2 Tim. i. 16). When the utmost security was desired, the prisoner was attached by two chains to two soldiers, as was the case with Peter (Acts xii. 6).

CHALCEDONY (Rev. xxi. 19), a precious stone, forming a variety of amorphous quartz. It is harder than flint (specific gravity 2.04), commonly semi-transparent, and is generally of one uniform colour throughout, usually a light brown and often nearly white; but other shades of colour are not infrequent, such as grey, yellow, green, and blue. Chalcedony occurs in irregular masses, commonly forming grotesque cavities, in trap rocks and even granite. It is found in most parts of the world; and in the East is employed in the fabrication of cups and plates, and articles of taste, which are wrought with great skill and labour, and treasured among precious things. In Europe it is made into snuff-boxes, buttons, knife-handles, and other minor articles.

CHALDEANS is the name which is found appropriated in parts of the Old Testament to inhabitants of Babylon and subjects of the Babylonian kingdom. In 2 Kings xxv., where an account is given of the siege of Jerusalem in the reign of Zedekiah, by Nebuchadnezzar, the latter monarch is expressly designated 'King of Babylon,' while his troops in general are spoken of as 'Chaldees,' 'the army of the Chaldees.' In Isaiah xlii. 19, Babylon is called 'the glory of kingdoms, the beauty of the Chaldees' excellency'; and in xxiii. 13 of the same book, the country is termed 'the land of the Chaldeans.' So in Daniel ix. 1, 'In the first year of Darius, of the seed of the Medes, which was made king over the realm of the Chaldeans.' The origin and condition of the people who gave this name to the Babylonians, have been subjects of dispute among the learned. Probably, however, they were the same people that are described in Greek writers as having originally been an uncultivated tribe of mountaineers, placed on the Carduchian mountains, in the neighbourhood of Armenia, whom Xenophon describes as brave and fond of freedom. In Habakkuk i. 6-10 the Chaldeans are spoken of in corresponding terms: 'Lo, I raise up the Chaldeans, that bitter and hasty nation, which shall march through the breadth of the land to possess the dwelling-places that are not theirs; they are terrible and dreadful; their horses are swifter than leopards and more fierce than evening wolves; their horsemen shall spread themselves; they shall fly as the eagle that

hasteth to eat.' They are also mentioned in Job i. 17: 'Chaldeans fell upon the camels (of Job) and carried them away.' These passages show not only their warlike and predatory habits, but, especially that in Job, the early period in history at which they were known.

As in all periods of history hardy and brave tribes of mountaineers have come down into the plains and conquered their comparatively civilized and effeminate inhabitants, so these Armenian Chaldeans appear to have descended on Babylon, made themselves masters of the city and the government, and eventually founded a dominion, to which they gave their name, as well as to the inhabitants of the city and the country tributary to it, infusing at the same time young blood and fresh vigour into all the veins and members of the social frame. What length of time the changes herein implied may have taken cannot now be ascertained.

Of the kingdom of Babylon, Nimrod (Gen. x. 8, sqq.) was the founder and first sovereign. The next name of a Babylonian monarch is found in Gen. xiv. 1, where 'Amraphel, king of Shinar,' is cursorily mentioned. A long interval occurs, till at last, in 2 Kings xx. 12, 13, the name of another is given: 'Berodach-baladan, the son of Baladan, king of Babylon; it appears 'sent letters and a present unto Hezekiah; for he had heard that Hezekiah had been sick. And Hezekiah hearkened unto them, and showed them all the house of his precious things: there was nothing in his house, nor in his dominion, that Hezekiah showed them.' On becoming acquainted with this fact, the prophet Isaiah announced that the treasures of the kingdom would be plundered and taken to Babylon along with the descendants of Hezekiah, who were to become eunuchs in the palace of the king of Babylon. The friendly act which passed between these two kings took place in the year a.c. 713. About a hundred years later, the prophets Jeremiah and Habakkuk speak of the invasion of the Chaldean army. Nebuchadnezzar now appears in the historical books, and, in Ezra v. 12, is described as 'the king of Babylon, the Chaldean, who destroyed this house (the temple), and carried the people away into Babylon.' How extensive and powerful his empire was, may be gathered from the words of Jeremiah xxxiv. 1—'Nebuchadnezzar, king of Babylon, and all his army, and all the kingdoms of the earth of his dominion, and all the people, fought against Jerusalem.' The result was, that the city was surrendered, and the men of war fled, together with king Zedekiah, but were overtaken in the plains of Jericho and completely routed. The Israelitish monarch was carried before Nebuchadnezzar, who ordered his eyes to be put out, after he had been compelled to witness the slaughter of his sons: he was then bound in fetters of brass and conveyed a captive to Babylon. The next Chaldeo-Babylonian monarch given in the Scriptures is the son of the preceding, Evil-merodach, who (2 Kings xxv. 27) began his reign (a.c. 562) by delivering Jehoiachin, king of Judah, after the unfortunate sovereign had endured captivity, if not incarceration, for a period of more than six and thirty years. Circumstances incidentally recorded in connection with this event serve to display the magnitude and grandeur of the empire; for it appears (ver.

25) that there were other captive kings in Babylon besides Jehoiachin, and that each one of them was indulged with the distinction of having his own throne. With Belshazzar (i.e. 538), the son of Nebuchadnezzar, closes the line of Chaldean monarchs. In the seventeenth year of his reign, this sovereign was put to death, while engaged with all his court in high revelry, by Cyrus, when he took the city of Babylon in the night season (Dan. v. 30), and established in the city and its dependencies the rule of the Medo-Persians [BELSHAZZAR].

It has been seen, from the foregoing statements, that the history of Babylon supplied by the Scriptures is brief, imperfect, and fragmentary. Little additional light can be borrowed from other quarters, in relation to the period comprised within the Biblical accounts.

Authentic history affords no information as to the time when the Chaldean immigration took place.

The kingdom of the Chaldees is found among the four 'thrones' spoken of by Daniel (vii. 3, sqq.), and is set forth under the symbol of a lion having eagles' wings. The government was despotic, and the will of the monarch, who bore the title of 'King of Kings' (Dan. ii. 37), was supreme law, as may be seen in Dan. iii. 12; v. 19. The kings lived inaccessible to their subjects in a well-guarded palace. The number of court and state servants was not small; in Dan. vi. 1, Darius is said to have set over the whole kingdom no fewer than 'an hundred and twenty princes.' The chief officers appear to have been a sort of 'mayor of the palace,' or prime minister, to which high office Daniel was appointed (Dan. ii. 49), 'a master of the eunuchs' (Dan. i. 3), 'a captain of the king's guard' (Dan. ii. 14), and 'a master of the magicians,' or president of the Magi (Dan. iv. 9). Distinct probably from the foregoing was the class termed (Dan. iii. 24, 27) 'the king's counsellors,' who seem to have formed a kind of 'privy council' or even 'cabinet' for advising the monarch and governing the kingdom. The entire empire was divided into several provinces (Dan. ii. 48; iii. 1), presided over by officers of various ranks. An enumeration of several kinds may be found in Dan. iii. 2, 3. The head officers, who united in themselves the highest civil and military power, were denominated 'presidents' (Dan. vi. 2); those who presided over single provinces or districts bore the title of 'governor.' The administration of criminal justice was rigorous and cruel, will being substituted for law, and human life and human suffering being totally disregarded. Nebuchadnezzar (Dan. ii. 5) declares to the college of the Magi—'If ye will not make known unto me the dream with the interpretation thereof, ye shall be cut in pieces, and your houses shall be made a dunghill' (see also Dan. iii. 19; vi. 8; Jer. xxix. 22). The religion of the Chaldees was, as with the ancient Arabians and Syrians, the worship of the heavenly bodies: the planets Jupiter, Mercury, and Venus were honoured as Bel, Nebo, and Meni, besides Saturn and Mars. Astrology was naturally connected with this worship of the stars, and the astronomical observations which have made the Chaldean name famous were thereby guided and advanced. The language spoken in Babylon was what is designated Chaldee, which is Semitic in its origin, belong-

ing to the Aramaic branch. The immigrating Chaldeans spoke probably a quite different tongue, which the geographical position of their native country shows to have belonged to the Medo-Persian stock.

The term Chaldeans represents also a branch of the order of Babylonian Magi. In Dan. ii. 2 they appear among 'the magicians, and the astrologers, and the sorcerers,' who were 'called for to shew the king his dream.' In the 10th verse of the same chapter they are represented as speaking in the name of the rest; or otherwise there was a general designation which comprised the entire class (Dan. iv. 7; v. 7); a general description of these different orders is found in Dan. v. 8, as 'the king's wise men.'

CHAMBERS OF IMAGERY. These are mentioned in Ezek. viii. 12, as among the abominations within the precincts of the holy place at Jerusalem, which were disclosed to the prophet in vision where he was among the captives on the banks of the Chebar, with the design of justifying and explaining the judgments which had been brought and were still to be brought upon the chosen people. A heavenly guide conducts the prophet to view in succession the various idolatries of alienated Judah. After having shown him enough to excite his horror and indignation, this angel bade him turn another way, and he would see greater abominations. Leading him to the side of the court along which were ranged the houses of the priests, his conductor pointed to a mud-wall (ver. 7), which, to screen themselves from observation, the apostate servants of the true God had raised; and in that wall was a small chink, by widening which he discovered a passage into a secret chamber, which was completely impervious to the rays of the sun, but which he found, on entering it, lighted up by a profusion of brilliant lamps. The sides of it were covered with numerous paintings of beasts and reptiles, the favourite deities of Egypt; and, with their eyes intently fixed on these decorations, was a concourse of seventy persons, in the garb of priests—the exact number, and, in all probability, the individual members of the Sanhedrim, who stood in the attitude of adoration, holding in their hands each a golden censer, containing all the costly and odoriferous materials which the pomp and magnificence of the Egyptian ritual required. 'There was every form of creeping things and abominable beasts, and all the idols of the house of Israel portrayed round about.' The scene described was wholly formed on the model of Egyptian worship; and every one who has read the works of Wilkinson, Belzoni, Richardson, and others, will perceive the close resemblance that it bears to the outer walls, the sanctuaries, and the hieroglyphical figures that distinguished the ancient mythology of Egypt.

In order to show the reader still further how exactly this inner chamber that Ezekiel saw was constructed after the Egyptian fashion, we subjoin an extract from the work of Mr. Madden, descriptive of the great Temple of Edfou, one of the admired relics of antiquity; from which it will be seen that the degenerate priests of Jerusalem had borrowed the whole style of the edifice, in which they were celebrating their hidden rites—its form, its entrance, as well as its pictorial ornaments on the walls—from their idolatrous

neighbours of Egypt:—'Considerably below the surface of the adjoining building,' says he, 'my conductor pointed out to me a *chink in an old wall*, which, he told me, I should creep through on my hands and feet; the aperture was not two feet and a half high, and scarcely three feet and a half broad. My companion had the courage to go first, thrusting in a lamp before him: I followed. The passage was so narrow that my mouth and nose were almost buried in the dust, and I was nearly suffocated. After proceeding about ten yards in utter darkness, the heat became excessive, the breathing was laborious, the perspiration poured down my face, and I would have given the world to have got out; but my companion, whose person I could not distinguish, though his voice was audible, called out to me to crawl a few feet farther, and that I should find plenty of room. I joined him at length, and had the inexpressible satisfaction of standing once more upon my feet. We found ourselves in a *glorious apartment of great magnitude*, adorned with an incredible profusion of sacred paintings and hieroglyphics.'

CHAMELEON, a small species of lizard, celebrated for the faculty it has of changing the colour of its skin. This property, however, has no reference to the substance it may be placed on, as generally asserted, but is solely derived from the bulk of its respiratory organs acting upon a transparent skin, and on the blood of the animal. The chameleons form a small genus of Saurians, easily distinguished by the shagreened character of the skin, and the five toes on the feet, divided differently from those of most other animals, there being, if the expression may be allowed, two thumbs opposed to three fingers. Their eyes are telescopic, move separately, and can be directed backwards or forwards. Chameleons are slow, inoffensive, and capable of considerable abstinence from food; which consists solely of flies, caught by the rapid protrusion of a long and viscous tongue. Among themselves they are

118. [Chameleon Africanus.]

irascible, and are then liable to change their colours rapidly; dark yellow or grey is predominant when they are in a quiescent state, but, while the emotions are in activity, it passes into green, purple, and even ashy black. The species found in Palestine and all Northern Africa, is the common African chameleon, and is that referred to in Lev. xi. 30, where unclean animals are mentioned.

CHAMOIS (Deut. xiv. 5). Some suppose that the animal meant is the Camelopard, others the Elk. But it is plain that the Mosical enumeration of clean animals would not include

such as were totally out of the reach of the Hebrew people, and at best only known to them from specimens seen in Egypt, consisting of presents sent from Nubia, or in pictures on the walls of temples. The Camelopard or Giraffe is exclusively an inhabitant of Southern Africa, and therefore could not come in the way of the people of Israel. The same objection applies to the Elk, because that species of deer never appears further to the south than Northern Germany and Poland; and with regard to the Chamois, which has been adopted in our version, though it did exist in the mountains of Greece, and is still found in Central Asia, there is no vestige of its having at any time frequented Libanus or any other part of Syria. We may, therefore, with more propriety refer to the ruminants indigenous in the regions which were in the contemplation of the sacred legislator, and the only species that seems to answer to the conditions required is a wild sheep, still not uncommon in the Mokattam rocks near Cairo, found in Sinai, and eastward in the broken ridges of Stony Arabia, where it is known under the name of Ketsch.

119. [Ketsch, Ovis Tragelaphus.]

CHA'OS, a term taken from the Greek mythology, and employed to denote the unformed condition of the world. Our present object is to inquire what the Chaos was of which Moses speaks (Gen. i. 2). Was it the first form in which matter was created? and do the succeeding operations described relate to the very beginning of material order and animal life? Or was it merely a condition preparatory to the reorganization of the world, which had already been the abode of living beings?—in other words, is the first verse of the inspired record to be dissociated from the succeeding, and to be understood only as a declaration of the important truth, that the visible universe was not made from anything already existing (Heb. xi. 3); whilst the confusion and darkness which are described in the succeeding verse, relate to a state long subsequent to the 'beginning,' and were introductory to a new order of material existence, of which man is the chief and lord? The first of these opinions is not only in accordance with the ancient notions of chaos to which we have referred, but is that which would be naturally maintained,

unless cause be shown to the contrary. No one would gratuitously assume a long interval, where it must be admitted there is no intimation of such an interval having occurred. Accordingly, most interpreters, who have been ignorant of geological phenomena, have at once decided that the chaos of which Moses speaks was the form in which matter was first created. Some have even declared that there cannot have been any such interval as we have spoken of. But, on the other hand, the world gives intimations, in the rocks which compose its crust, of various and long-continued changes both of condition and of inhabitants. Those who have carefully examined these different forms of being, and have attentively studied the circumstances in which their remains are now found, have been forced to the conviction, that in many cases the rocks have been gradually formed by deposition at the bottom of an ocean, which has been successively the habitation of races differing alike from each other and from those now existing; that the coeval land likewise has had its distinct races of inhabitants, and that the land and water have changed places many times in the history of the world. It is impossible to do more than barely glance at these geological facts; but it will be seen that they lead to these three conclusions—(1) That the world has existed during some long period *before* the Mosaic record of creation in six days—(2) That, during that period, it was the abode of animals differing in organization and structure from those now found on its surface—and (3) That it has been exposed to various convulsions and reorganizations, more or less general. In the face of these facts it appears impossible to hold the ordinarily received opinion that the universe was created only just before the creation of man; and the question then is, how are these facts to be reconciled with the Mosaic narrative? Not by denying the evidence of our senses, nor, on the other hand, by treating the Mosaic account as an allegorical representation, but surely by re-examining the interpretation we have put on the words of Scripture, and by seeking to ascertain whether the discrepancy does not arise from *our* view of the narrative. A favourite mode of explaining the Mosaic account, a few years back, was to take the six days of creation for unlimited periods, during which the changes we are speaking of took place. This ground has, however, been almost completely abandoned, both because the account so understood does not agree with the physical phenomena, and because such an interpretation is, to say the least, hardly admissible on exegetical principles. If we keep in mind that the revelation of God to man is not intended to teach physical science—that it never speaks the language of philosophy, but of appearances—and that it tells of these only so far as they relate to the human race, we obtain a clue by which we may be safely guided through these difficulties. We shall not then wonder that no notice should be taken of previous conditions and inhabitants of this earth, supposing such to have existed. The first sentence of the inspired record will then be regarded as the majestic declaration of a fact, which the world had lost sight of, but which it deeply concerned men to know. What occurred subsequently, until the earth was to be furnished for the abode of man, is to be gathered

not from the written word, but from the memorials engraven on the tablets of the world itself. The succeeding verse of the Mosaic account then relates to a state of chaos, or confusion, into which the world was thrown immediately before the last reorganization of it. Geologists are not indeed at present (if ever they may be) in a condition to identify the disruption and confusion of which we suppose Moses to speak with any one of these violent convulsions, of which geological phenomena plainly tell; but that events which might be described in his language have taken place in the world's history, over considerable portions of its surface, seems to be fully established. Whether the chaos of which we are now speaking was universal, or was confined to those regions which formed the cradle of the human race, is a question on which we do not feel it needful to enter. We do not regard the evidence which geology furnishes as complete enough to decide such a point.

CHARIOTS. The Scriptures employ different words to denote carriages of different sorts, but it is not in every case easy to distinguish the kind of vehicle which these words severally denote. We are now, however, through the discovery of ancient sculptures and paintings, in possession of such information respecting the chariots of Egypt, Assyria, Babylon, and Persia, as gives advantages in the discussion of this subject which were not possessed by earlier writers. The chariots of these nations are, in fact, mentioned in the Scriptures; and by connecting the known with the unknown, we may arrive at more determinate conclusions than have hitherto been attainable.

The first chariots mentioned in Scripture are those of the Egyptians; and by close attention to the various notices which occur respecting them, we may be able to discriminate the different kinds which were in use among that people.

The earliest notice of chariots in Scripture occurs in Gen. xli. 43, where the king of Egypt honours Joseph by commanding that he should ride in the second of the royal chariots. This was doubtless a state-chariot, and the state-chariots of the Egyptians do not appear to have been different from their war-chariots, the splendid military appointments of which rendered them fit for purposes of royal pomp. We also observe

120. [Egyptian Carriage.]

that where private carriages were known, as in Egypt, they were of the same shape as those used in war, and only differed from them by having less complete military accoutrements, although even in these the case for arrows is not wanting. One of the most interesting of the Egyptian paintings represents a person of quality arriving

late at an entertainment in his currie, drawn (like all the Egyptian chariots) by two horses. He is attended by a number of running footmen, one of whom hastens forward to knock at the door of the house, another advances to take the reins, a third bears a stool to assist his master in alighting, and most of them carry their sandals in their hands that they may run with the more ease. This conveys a lively illustration of such passages as 1 Sam. viii. 11; 2 Sam. xv. 1. The principal distinction between these private chariots and those actually used in war was, as appears from the monuments, that in the former the party drove himself, whereas in war the chariot, as among the Greeks, often contained a second person to drive it, that the warrior might be at liberty to employ his weapons with the more effect. But this was not always the case: for in the Egyptian monuments we often see even royal personages alone in their chariots, warring furiously, with the reins lashed round their waist (No. 121). So it appears that Jehu (who certainly rode in a war-chariot) drove himself; for his peculiar style of driving was recognised at a considerable distance (2 Kings ix. 20).

In the prophecy of Nahum, who was of the first captivity, and resident (if not born) at Elkosh in Assyria, there is much allusion to chariots, suggested doubtless by their frequency before his eyes in the streets of Nineveh and throughout the Assyrian empire. In fact, when prophesying the downfall of Nineveh, he gives a particular and animated description of their action in the streets of the great city:—

‘The shield of his mighty is made red:
The valiant men are clothed in scarlet:
The chariots are as the fire of lamps, in the
day when he prepareth them.
And the horsemen spread fear.
In the streets, the chariots madden:
They run to and fro in the broad places:
Their appearance is as lamps, they run
as lightning.’ Nahum ii. 3, 4.

These allusions to the horsemen and chariots of Nineveh give much interest to some recent discoveries on the site of that very ancient city, of various inscriptions and sculptures, which seem to show that the work was earlier than the age of Cyrus, and may be referred to the times of the Assyrian empire. Some of the sculptures represent horsemen completely armed and at full gallop. But the matter of greatest interest is the discovery of a curious bas-relief, representing a chariot drawn by two horses, and containing three persons. The principal of these appears to be a bearded man, lifting his right arm, and holding in his left hand a bow. He wears a tiara painted red (‘the valiant men are clothed in scarlet’); behind him is a beardless slave, carrying a fringed parasol, and at his left is the charioteer holding the reins and the whip. The principal person and the charioteer wear earrings. The chariot-wheels have eight spokes: the chariot itself has been covered with carving, now impossible to be made out. The horses are admirably drawn, and afford indications of pure Arabian blood. Their harness is very rich, and still bears evident traces of colouring, among which blue and red only can be distinguished, the rest having turned black. Behind the chariot

rides a cavalier, bearing a lance, with a sword at his belt, and a quiver over his shoulder.

CHARIOTS OF WAR. The Egyptians used horses in the equipment of an armed force before Jacob and his sons had settled in Goshen; they had chariots of war, and mounted asses and mules, and therefore could not be ignorant of the art of riding; but for ages after that period Arab nations rode on the bare back, and guided the animals with a wand. Others, and probably the shepherd invaders, noosed a single rope in a slip-knot round the lower jaw, forming an imperfect bridle, with only one rein; a practice still in vogue among the Bedouins. Thus cavalry were but little formidable compared with chariots, until a complete command over the horse was obtained by the discovery of a true bridle. This seems to have been first introduced by chariot-drivers, and there are figures of well-constructed harness, reins, and mouth pieces, in very early Egyptian monuments, representing both native and foreign chariots of war. These differed little from each other, both consisting of a light pole, suspended between and on the withers of a pair of horses, the after-end resting on a light axle-tree, with two low wheels. Upon the axle stood a light frame, open behind and floored for the warrior and his charioteer, who both stood within: on the sides of the frame hung the war-bow, in its case: a large quiver with arrows, and darts had commonly a particular sheath. In Persia, the chariots, elevated upon wheels of considerable diameter, had four horses abreast; and, in early ages, there were occasionally hooks or scythes attached to the axles. In fighting from chariots great dexterity was shown by the warrior, not only in handling his weapons, but also in stepping out upon the pole to the horses’ shoulders, in order the better to reach his enemies, and the charioteer was an important person, sometimes equal in rank to the warrior himself. Both the kingdoms of Judah and Israel had war-chariots, and, from the case of king Josiah at the battle of

121. [Egyptian War Chariot.]

Megiddo, it is clear they had also travelling-vehicles, for being wounded he quitted his fighting-chariot, and in a second, evidently more commodious, he was brought to Jerusalem (2 Chron. xxxv. 24). Chariots of war continued to be used in Syria in the time of the Maccabees (2 Mac. xiii. 5), and in Britain when Caesar invaded the island.

CHARITY. The Greek word *agape* frequently thus rendered in the Authorized Version of the

New Testament (*e.g.* 1 Cor. xiii. throughout), is that which is more usually translated 'love' in the same version (*e.g.* John xv. throughout). The translation of the word by 'love' is the more proper, seeing that 'charity' has acquired a signification in our language which limits it to overt acts of beneficence. The Greek word denotes that kindly state of mind or feeling which renders a person full of such goodwill or affectionate regard towards others as is always ready to evince itself in word or action. In short, it describes that state of feeling which the apostle enjoined the Romans (xii. 10) to entertain: 'Be ye kindly affectioned one to another.' This extended meaning of the word explains the pre-eminence which the Apostle assigns to the virtue which it implies over every other Christian grace (1 Cor. xiii.).

CHARMING OF SERPENTS. [ADDER.]

CHEBAR, a river of Mesopotamia, upon the banks of which king Nebuchadnezzar planted a colony of Jews, among whom was the prophet Ezekiel (2 Kings xxiv. 15; Ezek. i. 1, 3; iii. 15, 23; x. 15, 22). This is without doubt the same river that was known among the Greeks as the Chaboras, and which now bears the name of Khabour. It flows to the Euphrates through Mesopotamia, and is the only considerable stream which enters that river. It is formed by the junction of a number of small brooks, which rise in the neighbourhood of a ruined town called Ras-el-Ain, 13 furlongs south-west of Merdin. It takes a southerly direction till it receives the waters of another stream equal to itself, when it bends westward to the Euphrates, which it enters at Kerkesia, the Carchemish of Scripture. [CARCHEMISH.]

CHEDORLAO'MER, King of Elam, and leader of the five kings who invaded Canaan in the time of Abraham (Gen. xiv.). [ABRAHAM; ASSYRIA; ELAM.]

CHEESE. There is much reason to conclude that the cheese used by the Jews differed in no respect from that still common in the East; which is usually exhibited in small cakes about the size of a tea saucer, white in colour, and excessively salt. It has no rind, and soon becomes exceedingly hard and dry—being, indeed, not made for long keeping. It is best when new and comparatively soft; and, in this state, large quantities are consumed in lumps or crumbs not made up into cakes. All cheese in the East is of very indifferent quality; and it is within the writer's own knowledge that the natives infinitely prefer English or Dutch cheese when they can obtain it. In making cheese, the common rennet is either butter-milk or a decoction of the great-headed thistle, or wild artichoke. The curds are afterwards put into small baskets made of rushes or palm leaves, which are then tied up close, and the necessary pressure applied.

CHEMOSH is the name of a national god of the Moabites (1 Kings xi. 7; 2 Kings xxiii. 13; Jer. xlviii. 7; who are for this reason called the 'people of Chemosh,' in Num. xxi. 29), and of the Ammonites (Judg. xi. 24), whose worship was introduced among the Israelites by Solomon (1 Kings xi. 7). No attempt which has been made to identify this god with others whose attributes are better known, are sufficiently plausible to deserve particular notice. The only

theory which rests on any probability is that which assumes a resemblance between Chemosh and Arabian idolatry. Jewish tradition affirms that he was worshipped under the symbol of a black star; and Maimonides states that his worshippers went bare-headed, and abstained from the use of garments sewn together by the needle. The black star, the connection with Arabian idolatry, and the fact that Chemosh is coupled with Moloch, favour the theory that he had some analogy with the planet Saturn.

CHENANI'AH, *God's goodness*; a master of the temple music, who conducted the grand musical services when the ark was removed from the house of Obed-edom to Jerusalem (1 Chron. xv. 22).

CHERETHITES and PELETHITES, names borne by the royal life-guards in the time of David (2 Sam. viii. 18; 1 Chron. xviii. 17). Prevailing opinion translates their names, 'Headsmen and Foot-runners.' In the later years of David, their captain, Benaiah, rose to a more commanding importance than the generals of the regular troops; just as in imperial Rome the prefect of the praetorian guards became the second person in the empire. It is evident that, to perpetrate any summary deed, Benaiah and the guards were chiefly relied on. That they were strictly a body-guard is distinctly stated in 2 Sam. xxiii. 23. In 1 Sam. xxx. 14, the Cherethites are named as a nation of the south, and in 2 Sam. xv. 15, the Cherethites and Pelethites are mentioned along with the Gittites, who were undoubtedly foreigners. It has therefore been supposed, with some probability, that David entrusted the care of his person to foreign guards.

CHERITH, a river in Palestine, on the banks of which the prophet Elijah found refuge (1 Kings xvii. 3-7). Local traditions have uniformly placed the Cherith on this side the Jordan; and this agrees with the history and with Josephus. Dr. Robinson drops a suggestion that it may be the Wady Kelt, which is formed by the union of many streams in the mountains west of Jericho, issuing from a deep gorge, in which it passes by that village and then across the plain to the Jordan. It is dry in summer.

CHERUBIM (*Cherub*, pl. *Cherubim*) is the name of certain symbolical figures frequently mentioned in Scripture. The derivation and meaning of the term cannot now be known with certainty.

Figures of the cherubim were conspicuous implements in the Levitical tabernacle. Two of them were placed at each end of the mercy-seat, standing in a stooping attitude, as if looking down towards it, while they overshadowed it with their expanded wings—and, indeed, they were component parts of it, formed out of the same mass of pure gold as the mercy-seat itself (Exod. xxv. 19).

These figures were afterwards transferred to the most holy place in Solomon's temple, and it has been supposed from 1 Chron. xxviii. 18, that that prince constructed two additional ones after the same pattern, and of the same solid and costly material; but whether it was with a view to increase their number in accordance with the more spacious and magnificent edifice to which they were removed, or merely to supply the

place of those made by Moses, which in the many vicissitudes that befel the ark might have been mutilated or entirely separated from the mercy-seat to which they were attached—is not ascertained. This much, however, is known, that Solomon erected two of colossal dimensions, in an erect posture with their faces towards the walls (2 Chron. iii. 13), covering with their outstretched wings the entire breadth of the most holy place. These sacred hieroglyphics were profusely embroidered on the tapestry of the tabernacle, on the curtains and the great veil that separated the holy from the most holy place (Exod. xxvi. 1, 31), as well as carved in several places (1 Kings viii. 6-8) on the walls, doors, and sacred utensils of the temple. The position occupied by these singular images at each extremity of the mercy-seat—while the Shechinah, or sacred flame that symbolized the divine presence, and the awful name of Jehovah in written characters were in the intervening space—gave rise to the well-known phraseology of the sacred writers, which represents the Deity dwelling between or inhabiting the cherubim; and, in fact, so intimately associated were they with the manifestation of the divine glory, that whether the Lord is described as at rest or in motion, as seated on a throne, or riding in a triumphal chariot, these symbolic figures were essential elements in the description (Numb. vii. 89; Ps. xviii. 10; lxxx. 1; xcix. 1-9; Isa. vi. 2; xxxvii. 16).

The first occasion on which the Cherubim are mentioned in Scripture is on the expulsion of our first parents from Eden, when the Lord placed cherubim on the east of the garden; or as it may be rendered, 'before or on the edge of the garden.' The word in the original translated 'on the east,' may signify as well 'before or on the edge of'; and the historian does not say that the Lord placed there 'cherubim,' but 'the cherubim.' The word rendered by our translators 'placed,' signifies properly 'to place in a tabernacle,' an expression which, viewed in connection with some incidents in the after history of the primeval family (Gen. iv. 14-16), seems a conclusive establishment of the opinion that this was a local tabernacle, in which the symbols of the Divine presence were manifested, suitably to the altered circumstances in which man after the Fall came before God, and to the acceptable mode of worship he was taught to observe. That consecrated place, with its striking symbols, called 'the presence of the Lord,' there is reason to believe, continued till the time of the Deluge, otherwise there would have been nothing to guard the way to the tree of life; and thus the knowledge of their form, from the longevity of the antediluvians, could have been easily transmitted to the time of Abraham. Moreover, it is an approved opinion that, when those emblems were removed at the close of the patriarchal dispensation from the place of public worship, the ancestors of that patriarch formed small models of them for domestic use, under the name of Seraphim or Teraphim. The next occasion in the course of the sacred history on which the cherubim are noticed is when Moses was commanded to provide the furniture of the tabernacle; and, although he received instructions to make all things according to the pattern shown

him in the Mount, and although it is natural to suppose that he saw a figure of the cherubim, yet we find no minute and special description of them, as is given of everything else, for the direction of the artificers (Exod. xxvi. 31). The simple mention which the sacred historian makes, in both these passages, of the cherubim, conveys the impression that the symbolic figures which had been introduced into the Levitical tabernacle were substantially the same with those established in the primeval place of worship on the outskirts of Eden, and that by traditional information, or some other means, their form was so well known, both to Bezaleel and the whole congregation of Israel, as to render superfluous all further description of them. On no other ground can we account for the total silence as to their configuration, unless we embrace the groundless and unworthy opinion of those who impute to the author of the Pentateuch a studied concealment of some parts of his ritual, after the manner of the Mystics. But there was no mystery as to those remarkable figures, for Ezekiel knew at once (x. 20) the living creatures which appeared in his vision supporting the throne of God, and bearing it in majesty from place to place, to be cherubim, from having frequently seen them, in common with all other worshippers, in the carved work of the outer sanctuary. Moreover, as is the opinion of many eminent divines, the visionary scene with which this prophet was favoured, exhibited a transcript of the Temple, which was shown in pattern to David, and afterwards erected by his son and successor: and, as the chief design of that later vision was to inspire the Hebrew exiles in Babylon with the hope of seeing, on their return to Judæa, another temple, more glorious than the

[122. (Babylonian.)]

one then in ruins, it is reasonable to believe that, as the whole style and apparatus of this mystic temple bore an exact resemblance (1 Kings vi. 20) to that of Solomon's magnificent edifice, so the cherubs also that appeared to his fancy portrayed on the walls would be fac-similes of those that belonged to its ancient prototype. Taking then his description of them to be the proper appearance that belonged in common to all his cherubic creatures (chaps. i. x. xli.), we are led to conclude that they were compound figures, unlike any living animals or real object in nature, but rather a combination, in one nondescript artificial image, of the distinguishing features and properties of several. The ox, as chief among

the tame and useful animals, the lion among the wild ones, the eagle among the feathery tribes, and man, as head over all—were the animals which, or rather parts of which, composed the symbolical figures. Each cherub had four distinct faces on one neck—that of a man in front, that of a lion on the right side, and of an ox on the left; while behind was the face of an eagle. Each had four wings, the two under ones covering the lower extremities (Heb. the feet), in token of decency and humility, while the upper ones, spread out on a level with the head and shoulders, were so joined together, to the edge of his neighbours', as to form a canopy; and in this manner they soared rather than flew, without any vibratory motion with their wings, through the air. Each had straight feet. The Hebrew version renders it 'a straight foot,' and the probability is, that the legs were destitute of any flexible joint at the knee, and so joined together that its locomotions must have been performed in some other way than by the ordinary process of walking, or lifting one foot after another. The ideal picture, then, which Ezekiel's description would lead us to form of the cherub, is that of a winged man, or winged ox, according to the particular phase it exhibited or the particular direction from which

123. [Persian.]

it was seen. To use the words of Dr. Watts, 'That figure which would have had all four faces visible if it had stood forth as a real animal or a statue, could have had but two faces, or at most three, visible when figured on a wall or curtain, the other being hid behind; and thus the cherubs may be in all places of Scripture the same four-faced animals, and yet only two or three of their faces appear, according to their designed situation and the art of perspective.

124. [Egyptian.]

Whether the golden calf constructed by Aaron might be—not the Apis of Egypt—but a representation of the antediluvian Cherubim—as some suppose, from its being made on 'a feast to the Lord,' and called 'the gods of Israel' (Exod.

xxxii. 5), and whether Jeroboam, in the erection of his two calves, intended a schismatic imitation of the sacred symbols in the Temple of Jerusalem rather than the introduction of a new species of idolatry (1 Kings xii. 28), we shall not stop to inquire. But, as paganism is a corruption of patriarchal worship—each nation having added something according to its own taste and fancy—perhaps we may find a confirmation of the views given above of the compound form of the cherubim in the strangely compounded figures under which some of the heathen deities are represented, or which symbolised their attributes, as shown in the preceding engravings. Many of these have outspread or lowering wings, after the manner of the Hebrew cherubim; and there are perhaps few subjects which admit of more ample illustration from ancient monuments.

The opinions concerning the design of the cherubim are as diversified as those relative to their form. All are agreed that they had a symbolical meaning, although it is not easy to ascertain it. The ancients, as well as the fathers, considered that they had both a physical and a metaphysical object. The opinions of the moderns may be reduced to three systems. Hutchinson and his followers consider the cherubim as emblems of the Trinity, with man incorporated into the divine essence. But the grand objection to this theory, where it is at all intelligible, is, that not only are the cherubim, in all the places of Scripture where they are introduced, described as distinct from God, and no more than his attendants, but that it represents the divine Being, who is a pure spirit, without parts, passions, or anything material, making a visible picture of himself, when in all ages, from the beginning of time, he has expressly prohibited 'the likeness of anything in heaven above.' Another system regards the cherubim as symbolical of the chief ruling powers by which God carries on the operations of nature. As the heaven of heavens was typified by the holy of holies in the Levitical tabernacle (Heb. ix. 3-12, 24-28), this system considers that the visible heavens may be typified by the holy place or the outer sanctuary, and accordingly finding, as its supporters imagine they do, the cherubim identified with the aerial firmament and its elements in such passages as the following: Ps. xviii. 10; Deut. xxxiii. 26; Ps. lxxviii. 4; he is said to descend in fire (Exod. xix. 18), and between which he dwelt in light (1 Tim. vi. 16); and it was in this very manner he manifested his divine glory in the tabernacle and temple—they interpret the cherubim, on which the Lord is described as riding, to be symbolical of the wind, the clouds, the fire, the light; in short, the heavens, the atmosphere, the great physical powers by which the Creator and preserver of the universe carries on the operations of nature.

A third system considers the cherubim, from their being instituted immediately after the Fall, as having particular reference to the redemption of man, and as symbolical of the great and active rulers or ministers of the church. Those who adopt this theory as the true explanation of their emblematical meaning, are accustomed to refer to the living creatures, or cherubim, mentioned in the Apocalyptic vision (Rev. iv. 6), improperly rendered in our English translation

'beasts,' and which, it is clear, were not angels, but redeemed men connected with the church, and deeply interested in the blessings and glory procured by the Lamb. The same character may be ascribed to the living creatures in Ezekiel's visions, and to the cherubim, which stood over and looked into the mercy-seat, sprinkled with the blood of the atonement, and on the Shechinah, or divine glory arising from it, as well as the cherubic figures which were placed on the edge of Eden; and thus the cherubim, which are prominently introduced in all the three successive dispensations of the covenant of grace, appear to be symbols of those who, in every age, should officially study and proclaim the glory and manifold wisdom of God.

CHESTNUT-TREE, a tree which is named thrice in the Scriptures. It occurs among the 'speckled rods' which Jacob placed in the watering-troths before the sheep (Gen. xxx. 37); its grandeur is indicated in Ezek. xxxi. 8, as well as in Eccles. xxiv. 19: it is noted for its magnificence, shooting its high boughs aloft. This

125. [Plane-tree—*Platanus Orientalis*.]

description agrees well with the plane-tree, which is adopted by all the ancient translators, and scarcely any one now doubts that this is the tree which is meant.

The Oriental plane-tree is a native of Westernmost Asia, although, according to Professor Royle, it extends as far eastward as Cashmere. The stem is tall, erect, and covered with a smooth bark which annually falls off. The flowers are small and scarcely distinguishable: they come out a little before the leaves. The wood of the plane-tree is fine-grained, hard, and rather brittle than tough; when old, it is said to acquire dark veins, and to take the appearance of walnut wood.

In those situations which are favourable to its growth, huge branches spread out in all directions from the massive trunk, invested with broad, deeply-divided, and glossy green leaves. This body of rich foliage, joined to the smoothness of the stem, and the symmetry of the general growth, renders the plane-tree one of the noblest

objects in the vegetable kingdom. It has now, and had also of old, the reputation of being the tree which most effectually excludes the sun's beams in summer, and most readily admits them in winter—thus affording the best shelter from the extremes of both seasons.

For this reason it was planted near public buildings and palaces, a practice which the Greeks and Romans adopted; and the former delighted to adorn with it their academic walks and places of public exercise. In the East, the plane seems to have been considered sacred, as the oak was formerly in Britain. This distinction is in most countries awarded to the most magnificent species of tree which it produces. In Palestine, for instance, where the plane does not appear to have been very common, the terebinth seems to have possessed pre-eminence. No one is ignorant of the celebrated story of Xerxes arresting the march of his grand army before a noble plane-tree in Lydia, that he might render honour to it, and adorn its boughs with golden chains, bracelets, and other rich ornaments.

The Oriental plane endures our own climate well, and grows to a fine tree; but not to the enormous size which it sometimes attains in the East. Evelyn (in his *Sylva*) seems to ascribe the introduction of the plane-tree into England to the great Lord Bacon, who planted some which were still flourishing at Verulam in 1706. This was, perhaps, the first plantation of any note; but it appears from Turner's *Herbal* (published in 1551), that the tree was known and cultivated in this country before the chancellor was born.

CHILDREN. The more children—especially male children—a person had among the Hebrews, the more was he honoured, it being considered as a mark of divine favour, while sterile people were, on the contrary, held in contempt (comp. Gen. xi. 30; xxx. 1; 1 Sam. ii. 5; 2 Sam. vi. 23; Ps. cxxvii. 3, *sq.*; cxxviii. 3; Luke i. 7; ii. 5). That children were often taken as bondsmen by a creditor for debts contracted by the father, is evident from 2 Kings iv. 1; Isa. l. 1; Neh. v. 5. Among the Hebrews, a father had almost unlimited power over his children, nor do we find any law in the Pentateuch restricting that power to a certain age; it was indeed the parents who even selected wives for their sons (Gen. xxi. 21; Exod. xxi. 9, 10, 11; Judg. xiv. 2, 5). It would appear, however, that a father's power over his daughters was still greater than that over his sons, since he might even annul a sacred vow made by a daughter, but not one made by a son (Num. xxx. 4, 16). Children cursing or assaulting their parents were punished by the Mosaic law with death (Exod. xxi. 15, 17; Lev. xx. 9). Before the time of Moses a father had the right to choose among his male children, and declare one of them (usually the child of his favourite wife) as his first-born, though he was perhaps only the youngest. Properly speaking, the 'first-born' was he who was first begotten by the father, since polygamy excluded all regard in that respect to the mother. Thus Jacob had sons by all his four wives, while only one of them was called the first-born (Gen. xlix. 3); we find, however, instances where that name is applied also to the first-born on the mother's side (1 Chron. ii. 50; comp. v. 42; Gen. xxii.

21). The privileges of the first-born were considerable, as shown in BIRTHRIGHT.

The first-born son, if not expressly deprived by the father of his peculiar rights, as was the case with Reuben (Gen. xlix.), was at liberty to sell them to a younger brother, as happened in the case of Esau and Jacob (Gen. xxv. 31, sq.). Considering the many privileges attached to first-born, we do not wonder that the Apostle called Esau a *thoughtless person* (Heb. xii. 16). There are some allusions in Scripture to the modes in which children were carried. These appear to be adequately represented by the existing usages, as represented in the following cut (No. 125), in which fig. 1 represents a Nestorian woman carrying her child bundled at her back, and fig. 2, an Egyptian female bearing her child on her shoulder. The former mode appears to be alluded to

125.

in several places, and the latter in Isa. xlix. 22. For other matters regarding children, see ADOPTION, BIRTH, BIRTHRIGHT, EDUCATION.

CHIOS, one of the principal islands of the Ionian Archipelago, mentioned in Acts xx. 15. It belonged to Iouia, and lay between the islands Lesbos and Samos, and distant eight miles from the nearest promontory of Asia Minor. It is thirty miles long from N. to S., and its greatest breadth ten miles. It is very fertile in cotton, silk, and fruit, and was anciently celebrated for its wine. The principal town was also called Chios, and had the advantage of a good harbour. The island is now called by the Greeks Khio, and by the Italians Scio. The wholesale massacre and enslavement of the inhabitants by the Turks in 1822 forms one of the most shocking incidents of the Greek war.

CHISLEV (1 Macc. i. 54) is the name of that month which is the third of the civil, and the ninth of the ecclesiastical year of the Jews, and which commences with the new moon of our December.

The memorable days which were observed in this month were:—The feast of the dedication of the Temple, in commemoration of its being purified from the heathen abominations of the Syrians, which was celebrated by illuminations and great demonstrations of joy for eight days, beginning from the 25th of this month (1 Macc. iv. 59); and a fast on account of Jehoikim having, in this month, burnt the *ivul* containing Jeremiah's prophecy (Jer. xxxvi. 22, 23). There is some dispute whether this fast was observed on the 6th or on the 28th of the month. It is an argument in favour of the earlier day that the other would fall in the middle of the eight days' festival of the dedication.

CHITTIM, or KITTIM, a branch of the de-

scendants of Javan, the son of Japheth (Gen. x. 4). On the authority of Josephus, who is followed by Epiphanius and Jerome, it has been generally admitted that the Chittim migrated from Phœnicia to Cyprus, and founded there the town of Citium, the modern Chitti. 'Chethimus possessed the island of Chethima, which is now called Cyprus, and from this, all islands and maritime places are called Chethim by the Hebrews.' Cicero, it may be remarked, speaks of the Citians as a Phœnician colony. Some passages in the prophets (Ezek. xxvii. 6; Isa. xxlii. 1, 12) imply an intimate connection between Chittim and Tyre. At a later period the name was applied to the Macedonians. Hengstenberg has lately endeavoured to prove that in every passage in the Old Testament where the word occurs, it means Cyprus, or the Cyprians.

After a careful examination of the works in which this point is discussed, the writer is disposed to acquiesce in the opinion expressed by the editor of the *Pictorial Bible*: 'Chittim seems to be a name of large signification (such as our Levant), applied to the islands and coasts of the Mediterranean, in a loose sense, without fixing the particular part, though particular and different parts of the whole are probably in most cases to be understood' (v. notes on Ezek. xxvii. 6).

CHI'UN. [REMPHAN.]

CHLOE, a Christian woman at Corinth, some members of whose family afforded Paul intelligence concerning the divisions which reigned in the church at that place (1 Cor. i. 11).

CHORAZIN, a town mentioned in Matt. xi. 21; Luke x. 13, in connection with Bethsaida and Capernaum, not far from which, in Galilee, it appears to have been situated. Jerome makes it a village of Galilee, on the shore of the lake Tiberias, two miles from Capernaum. But no place of the name has been historically noticed since his days; and not only the town, but its very name appears to have long since perished. [BETHESDA; CAPERNAUM.]

CHRIST. [JESUS.]

CHRONICLES. This name seems to have been first given to two historical books of the Old Testament by Jerome. The Hebrews call them *words of days, diaries, or journals*, and reckon them but one book.

In 1 Chron. i.-ix. is given a series of genealogical tables interspersed with historical notices. These genealogies are not complete.

1 Chron. x.-xxix. contains the history of David, partly agreeing with the account given of him in the books of Samuel, though with several important additions relating to the Levites.

2 Chron. i.-ix. contains the history of Solomon.

2 Chron. x.-xxviii. furnishes a succinct account of the kingdom of Judah while Israel still remained, but separate from the history of the latter.

2 Chron. xxix.-xxxvi. describes the kingdom of Judah after the downfall of Israel, especially with reference to the worship of God.

From this analysis it appears that the Chronicles contain an epitome of sacred history, particularly from the origin of the Jewish nation to the end of the first captivity.

The diction of the Chronicles is such as suits the time immediately subsequent to the captivity

It is substantially the same with that of Ezra, Nehemiah, and Esther, which were all written shortly after the Babylonish exile. It is mixed with *Aramaicisms*, marking at once the decline of the Jews in power, and the corruption of their native tongue. The pure Hebrew had been then laid aside. It was lost during their sojourn in Babylon.

Internal evidence sufficiently demonstrates that the Chronicles were written after the captivity. Thus the history is brought down to the end of the exile, and mention is made of the restoration by Cyrus (2 Chron. xxxvi. 21, 22). It is certain that they were compiled after the time of Jeremiah (2 Chron. xxxv. 25), who lived to see the destruction of Jerusalem by the Chaldeans. The genealogy of Zerubbabel is even continued to the time of Alexander (1 Chron. iii. 19-24). The same opinion is supported by the character of the *orthography* and the nature of the *language* employed, as we have already seen, both which are Aramaean in complexion, and harmonize with the books confessedly written after the exile. The Jews generally ascribe the Chronicles to Ezra, and it is extremely probable that they were really written by him.

The principal design of the writer seems to have been to maintain the proper distinctions between the tribes and families of the returning Hebrews, that the Messiah's descent out of the tribe and family whence he was to spring according to prophecy, might be made manifest. Accordingly, the family of David is specially noticed and prominently portrayed. The author also shows how the lands had been distributed before the captivity, that the people might obtain the ancient inheritance of their fathers. In doing so he goes back to the most ancient times, and presents to his countrymen their earliest history, lest, during their exile, they might have forgotten their original and lost the traces of their real ancestry. In addition to this object it was also intended to show how the worship of God should be properly resumed and orderly re-established. In accordance with such a purpose he gives the genealogy of the priests and Levites more fully than any other writer, records their functions and rank, and enters with particularity into the arrangements established among them by David and Solomon. These two purposes, which are closely allied, will serve to demonstrate the perfect congruity of all that is peculiar in the Chronicles. They account for the genealogical tables, the specifications of tribes and families with their situation, as also for a variety of references to the priests and Levites, to the preparations made by David for building the temple, the reformatations which took place at different periods, the prosperity of such kings as feared Jehovah and walked in his ways, to the marvellous interpositions of Heaven on behalf of those who trusted in Him alone, to the idolatry of Israel and their consequent misfortunes.

The books of Chronicles as compared with those of Kings are more *didactic* than *historical*. The *historical* tendency is subordinated to the *didactic*. Indeed, the purely historic form appears to be preserved only in so far as it presented an appropriate medium for those religious and moral observations which the author was directed to adduce. Samuel and Kings are more occupied with

the relation of *political* occurrences; while the Chronicles furnish detailed accounts of *ecclesiastical* institutions.

A thorough examination of these books as compared with those of Samuel and Kings will satisfy the inquirer that the latter were known to Ezra and extensively used by him in the composition of Chronicles.

But these books are not the only source from which the Chronicles have been taken. Public documents formed the common groundwork of the three histories. The Pentateuch has also been used in their compilation. A comparison of the first nine chapters of 1 Chron. with the Mosaic books will show the parallelism existing between them; and it should be especially noticed that 1 Chron. i. 43-54 agrees *verbatim* with Genesis xxxvi. 31-43. Perhaps, however, this passage in both has been drawn from the same source.

As the Almighty does nothing superfluously, and puts forth no exertion of his power where his infinite wisdom does not perceive a fitting necessity, it would have been unnecessary, as far as we can perceive, to suggest anew to the mind of the writer facts with which he must have been partially acquainted by tradition, and which he had an opportunity of knowing from the sacred records. It is evident that the Chronicles were compiled not only from former inspired writings, but, for the most part, from public records, registers, and genealogies belonging to the Jews. That national annals existed there can be no doubt. They are expressly mentioned, as in 1 Chron. xxvii. 24. They contained an account of the most important events in the history of the Hebrews, and were generally lodged in the tabernacle or temple, where they could be most conveniently consulted.

The histories of kings appear to have been usually written by *prophets* (1 Chron. xxix. 29; 2 Chron. ix. 29; xii. 15; xiii. 22). Hence they constantly refer to the divine rewards and punishments characterizing the theocracy. These historical writings of the prophets were, for the most part, inserted in the public annals, as is evident from 2 Chron. xx. 34; xxxii. 32; xii. 15; xxiv. 27. Whether they were *always* so inserted is questionable, for they seem to be distinguished from the annals of the kingdom in 2 Chron. xxxiii. 19. From such sources Ezra extracted the accounts which he was prompted to write for the use of mankind in all ages. We cannot believe that his selection was indiscriminate or careless. His inspiration effectually secured him against everything that was inaccurate or unsuitable to the purposes for which he was supernaturally enlightened. That he committed mistakes cannot for a moment be admitted, else his history is impugned and its position in the canon inexplicable. His veracity, integrity, and scrupulous exactness must be held fast by every right-minded believer.

From an inspection of 1 Chron. xvi. 4-41; 1 Chron. xxii.-xxvi. 28; xxviii. xxx.; 2 Chron. xv. 1-15; 2 Chron. xvii. 7, &c.; xxvi. 16-21; xxx.; xxxi., it will be manifest, that it was one design of Ezra to notice with particularity the order of the divine worship as established by David and Solomon, with various reformatations in the theocracy that took place at different times. The Levitical priesthood, and the public service

of God, are specially noticed and prominently brought into view. From 2 Chron. xlii. 1; xx. 21, &c.; xix. 2, &c.; xxv. 7, &c., it is evident that God's miraculous interference on behalf of Judah, and his displeasure with idolatrous Israel, were also intended to be depicted. In accordance with the same object, pious kings evincing appropriate zeal for the glory of Jehovah are commended, and their efforts marked with approval (comp. 2 Chron. xiv. 6-15; xvii. 10, &c.; xx. xxvi. 5, &c.; xxvii. 4-6, &c.), while the ruin of idolatrous practices is forcibly adduced (2 Chron. xxi. 11, &c.; xxviii. 5, &c.; xxxiii. 11, &c.; xxv. 14, &c.; xxxvi. 6).

Such are the characteristic peculiarities of these books; and we now ask the impartial reader to consider if they be not worthy of the Holy Spirit under whose guidance the Chronicles were written. Are they not admirably in unison with the character of Ezra the high-priest and reformer? What more natural, or more accordant with the solicitudes of this holy man, than to dwell upon such matters as relate to the worship of Jehovah, to the priests, and Levites? Surely he was appropriately directed to record the reformatory effected by godly kings, and the disastrous consequences of forsaking the true God, whose zeal was abundantly manifested in reform, and to whom idolatry was peculiarly offensive. And yet upon these very chapters and paragraphs charges the most flagrant have been founded. The author of them has been accused of hatred to Israel, predilection for the Levites, love of the marvellous, design to magnify pious kings and to heighten the mistakes of the kingdom of Israel. It is unnecessary to enter into any refutation of these monstrous accusations. They bear with them their own condemnation. They are the offspring of that Rationalism which resolves to see nothing but what it relishes. On every page of these historical books are impressed *genuineness* and *honesty*. The writer candidly refers to the sources whence his information was derived; and contemporary readers, placing implicit reliance on his statements, allowed the original documents to perish. He relates many things disgraceful to Judah and its kings, while he evinces no desire to palliate or conceal sin. He even retains, as we have seen before, expressions incongruous with his own age, and therefore exactly copied from the ancient records. Surely a writer guilty of falsification would have been careful to alter these into exact correspondence with his own times. Transparent simplicity of character needs not such ministration.

CHRYSOLEITE. This word occurs only in Rev. xxi. 20 in the enumeration of the stones which formed the foundation of the heavenly Jerusalem. This stone is found solid, and in grains, or in angular pieces. The prevailing colour is yellowish green, and pistachio green of every variety and degree of shade, but always with a yellow and gold lustre. Although this stone is not mentioned in the Authorized Version of the Old Testament, it is supposed to be intended by the Hebrew word *Tharshish*, which occurs in Exod. xxviii. 20; xxxix. 13; Ezek. i. 6; x. 9; xxviii. 13; Cant. v. 4; Dan. x. 6, and is in all these places translated 'beryl.' The name *Tharshish stone* seems to intimate that it was known to the Hebrews as brought from the part so called. [*THARSHISH.*]

CHRYSOPRASUS. This occurs only in Rev. xxi. 20. The name literally signifies 'leek green stone,' and it is, as that name imports, of a greenish golden colour like a leek, that is usually apple-green passing into grass green.

CHURCH. The original Greek word which is thus rendered, in its larger signification denotes a number of persons called together for *any* purpose, an assembly of any kind, civil or religious. As, however, it is usually applied in the New Testament to religious assemblages, it is very properly translated by 'assembly,' in the few instances in which it occurs in the civil sense (Acts xix. 32, 39, 41). It is, however, well to note that the word rendered 'assembly' in these verses is the same which is rendered 'church' everywhere else.

In a few places the word occurs in the Jewish sense of a congregation, an assembly of the people for worship, either in a synagogue (Matt. xxviii. 17) or generally of the Jews regarded as a religious body (Acts vii. 38; Heb. ii. 12).

But the word most frequently occurs in the Christian sense of an assemblage (of Christians) generally (1 Cor. xi. 18). Hence it denotes a church, the Christian church; in which, however, we distinguish certain shades of meaning, viz.—1. A particular church, a church in a certain place, as in Jerusalem (Acts viii. 1; xi. 22, &c.), in Antioch (Acts xi. 26; xiii. 1, &c.), in Corinth (1 Cor. i. 2; 2 Cor. i. 1), &c. &c. 2. Churches of (Gentile) Christians, without distinguishing place (Rom. xvi. 4). 3. An assembly of Christians which meets anywhere, as in the house of any one (Rom. xvi. 5; 1 Cor. xvi. 19; Philm. 2). The Church universal—the whole body of Christian believers (Matt. xvi. 18; 1 Cor. xii. 28; Gal. i. 13; Eph. i. 22; iii. 10; Heb. xii. 23, &c.).

CHU'SHAN-RISHATHA'IM, a king of Mesopotamia, by whom the Israelites were oppressed for eight years (B.C. 1394 to B.C. 1402), until delivered by Othniel (Judg. iii. 8-10).

CHU'ZA, steward of Herod Antipas, whose wife Joanna was one of those who employed their means in contributing to the wants of Christ and his apostles (Luke viii. 3).

CILICIA, the south-eastern part of Asia Minor, bounded on the W. by Pamphylia; separated on the N. from Cappadocia by the Taurus range, and on the E. by Amanus from Syria; and having the gulf of Issus (Iskenderoon) and the Cilician Sea (Acts xxvii. 5) on the South. By the ancients the eastern part was called Cilicia Proper, or the level Cilicia; and the western, the rough, or mountainous. The former was well-watered, and abounded in various kinds of grain and fruits. The chief towns in this division were *Issus*, at the south-eastern extremity, celebrated for the victory of Alexander over Darius Codomanus (B.C. 333), and not far from the passes of Amanus; *Solea*, originally a colony of Argives and Rhodians; and *Tarsus*, the birth-place of the Apostle Paul (*TARUS*). Cilicia Trachea furnished an inexhaustible supply of cedars and firs for ship-building; it was also noted for a species of goat, of whose skins cloaks and tents were manufactured. Its breed of horses was so superior, that 360 (one for each day of the year) formed part of the annual tribute to the king of Persia. The neighbourhood of

Corycyns produced large quantities of saffron. Though partially subjected to the Assyrians, Medes, Persians, Syrians, and Romans, the Eleuthero- (or free) Cilicians, as the inhabitants of the mountainous districts were called, were governed by their own kings, till the time of Vespasian. The sea-coast was for a long time occupied by pirates, who carried on the appropriate vocation of slave-merchants, and found ample encouragement for that nefarious traffic among the opulent Romans; but at last their depredations became so formidable, that Pompey was invested with extraordinary powers for their suppression, which he accomplished in forty days. He settled the surviving freebooters at Solæ, which he rebuilt and named Pompeiopolis. Cicero was proconsul of Cilicia (A.U.C. 702), and gained some successes over the mountaineers of Amanus, for which he was rewarded with a triumph. Many Jews were settled in Cilicia (Acts vi. 9).

According to the modern Turkish divisions of Asia Minor, Cilicia Proper belongs to the Pashalic of Adana; and Cilicia Trachea to the Liwah of Ithil in the Mousselimlik of Cyprus.

CINNAMON occurs in three places of Scripture; first, about 1600 years before the Christian era, in Exod. xxx. 23, where it is enumerated as one of the ingredients employed in the preparation of the holy anointing oil: 'Take thou also unto thee powerful spices, myrrh, and of sweet cinnamon (*hinna'mon besem*) half as much (i. e. 250 shekels), together with sweet calamus and cassia.' It is next mentioned in Prov. vii. 17, and again in Cant. iv. 14; while in Rev. xxiii. 13, among the merchandise of Babylon, we have 'cinnamon, and odours, and ointments, and frankincense.'

Many writers have doubted whether the *hinna'mon* of the Hebrews is the same article that we now call cinnamon. Others have doubted whether our cinnamon was at all known to the ancients. But the same thing has been said of almost every other drug which is noticed by them. If we were to put faith in all those doubts, we should be left without any substances possessed of sufficiently remarkable properties to have been articles of ancient commerce.

Cinnamon of the best quality is imported in the present day from Ceylon, and also from the Malabar coast, in consequence of the cinnamon plant having been introduced there from Ceylon. An inferior kind is also exported from the peninsula of India. From these countries the cinnamon and cassia of the ancients must most likely have been obtained, though both are also produced in the islands of Sumatra and Borneo, in China, and in Cochin-China. Cinnamon is imported in bales and chests—the bundles weighing about one pound each. The pieces consist of compound quills, are about three feet long, slender, and inclose within them several smaller quills. These are thin, smooth, of a brownish colour, of a warm, sweetish, and agreeable taste, and fragrant odour; but several kinds are known in modern markets, as they were in ancient times.

In Ceylon cinnamon is carefully cultivated, the best cinnamon gardens being on the south-western coast, where the soil is light and sandy, and the atmosphere moist from the prevalent

southern winds. The plants begin to yield cinnamon when about six or seven years old, after which the shoots may be cut every three or four years. The best kinds of cinnamon are obtained from twigs and shoots; less than half, or more than two or three inches in diameter, are not peeled. 'The peeling is effected by making two opposite, or when the branch is thick, three or four longitudinal incisions, and then elevating the bark by introducing the peeling knife beneath it. In twenty-four hours the epidermis and greenish pulpy matter are carefully scraped off. In a few hours the smaller quills are introduced into the larger ones, and in this way congeries of quills are formed, often measuring forty inches in length. The bark is then dried in the sun, and afterwards made into bundles, with pieces of split bamboo twigs.' Besides cinnamon, an oil of cinnamon is obtained in Ceylon, by macerating the coarser pieces of the bark, after being reduced to a coarse powder, in sea-water, for two days, when both are submitted to distillation. A fatty substance is also obtained by bruising and boiling the ripper fruit, when an oily body floats on the surface, which on cooling concretes into a dirty whitish, rather hard, fatty matter. Some camphor may be procured from the roots.

127. [*Cinnamomum cassia*.]

Cassia bark was distinguished with difficulty from cinnamon by the ancients. In the present day it is often sold for cinnamon; indeed, unless a purchaser specify *true* cinnamon, he will probably be supplied with nothing but cassia. It is made up into similar bundles with cinnamon, has the same general appearance, smell, and taste; but its substance is thicker and coarser, its colour darker, its flavour much less sweet and fine than that of Ceylon cinnamon, while it is more pungent, and is followed by a bitter taste: it is also less closely quilled, and breaks shorter than genuine cinnamon. Dr. Pereira, whose description we have adopted, has ascertained that cassia is imported into the London market from Bombay (the produce of the Malabar coast), and also from the Mauritius, Calcutta, Batavia, Singapore, the Philippine Islands, and Canton. Mr. Reeves says, 'Vast quantities both of cassia seeds (buds) and cassia lignea are annually brought to

Canton from the province of Kwangse, whose principal city (*Kwei-hin*, literally 'cassia forest') derives its name from the forests of cassia around it. The Chinese themselves use a much thicker bark, unfit for the European market.' The Malabar cassia lignea is thicker and coarser than that of China. From the various sources, independently of the different qualities, it is evident, as in the case of cinnamon, that the ancients might have been, as no doubt they were, acquainted with several varieties of cassia. These, we have no doubt, are yielded by more than one species. Mr. Marshall, from information obtained while he was staff-surgeon in Ceylon, maintained that cassia, or at least a part of it, was the coarser bark of the true cinnamon. Dr. Wight has ascertained that more than one species yields the cassia of Malabar, often called cinnamon. Besides cassia bark, there is also a cassia oil, and cassia buds, supposed to be produced by the same tree. There can be no reasonable doubt, as cinnamon and cassia were known to the Greeks, that they must have been known to the Hebrews also, as the commerce with India can be proved to have been much more ancient than is generally supposed.

CINN'ERETH, or CINN'EROTH, one of the 'fenced cities' of the tribe of Naphtali (Josh. xix. 35; Deut. iii. 17; Josh. xi. 2). In the last of the texts cited it seems to indicate a district. It is also the earlier name of the lake Gennesareth (which is supposed to be a corruption of Cinnereth), from which we may collect that the town lay on the western border of the lake, and was of sufficient consequence to give its own name to it. It is even supposed that Cinnereth, afterwards Gennesareth, was the earlier name of the town of Tiberias, and under the latter change still extended its own denomination to the lake; nor is there anything improbable in this conjecture.

CIRCUMCISION. The history of Jewish Circumcision lies on the surface of the Old Testament. Abraham received the rite from Jehovah, Moses established it as a national ordinance, and Joshua carried it into effect before the Israelites entered the land of Canaan. Males only were subjected to the operation, and it was to be performed on the eighth day of the child's life: foreign slaves also were forced to submit to it, on entering an Israelite's family. Those who are unacquainted with other sources of information on the subject besides the Scriptures might easily suppose that the rite was original with Abraham, characteristic of his seed, and practised among those nations only who had learned it from them. This, however, appears not to have been the case.

First of all, the Egyptians were a circumcised people. It has been alleged by some writers that this was not true of the whole nation, but of the priests only. A great preponderance of argument, however, appears to us to prove that the rite was universal among the old Egyptians, as long as their native institutions flourished; although there is no question that, under Persian and Greek rule, it gradually fell into disuse, and was retained chiefly by the priests and by those who desired to cultivate ancient wisdom.

The Colchians, who, according to Herodotus, were a colony from Egypt, learnt the practice

from the Egyptians, as also did the savage Troglodytes of Africa. Herodotus, moreover, tells us that the Ethiopians were also circumcised; and he was in doubt whether they had learned the rite from the Egyptians, or the Egyptians from them. By the Ethiopians we must understand him to mean the inhabitants of Meroë or Sennar. In the present day the Coptic Church continues to practise it: the Abyssinian Christians do the same; and that it was not introduced among the latter with a Judaical Christianity appears from their performing it upon both sexes. Oldendorp describes the rite as widely spread through Western Africa—16° on each side of the Line—even among natives that are not Mohammedan. In later times it has been ascertained that it is practised by the Kafir nations in South Africa, whom Prichard supposes to form 'a great part of the native population of Africa to the southward of the Equator.'

How far the rite was extended through the Syro-Arabian races is uncertain, but there can be no doubt that it was widely diffused among them. The Philistines, in the days of Saul, were however uncircumcised; so also, says Herodotus, were all the Phœnicians who had intercourse with the Greeks. That the Canaanites, in the days of Jacob, were not all circumcised, is plain from the affair of Dinah and Shechem. The story of Zipporah (Exod. iv. 25), who did not circumcise her son until fear came over her, that Jehovah would slay her husband Moses, proves that the family of Jethro, the Midianite, had no fixed rule about it, although the Midianites are generally regarded as children of Abraham by Keturah. On the other hand, we have the distinct testimony of Josephus, that the Ishmaelite Arabs, inhabiting the district of Nabathæa, were circumcised after their thirteenth year. The fact that the books of Moses, of Joshua, and of Judges, never bestow the epithet *uncircumcised* as a reproach on any of the seven nations of Canaan, any more than on the Moabites or Ammonites, the Amalekites, the Midianites, or other inland tribes with whom they came into conflict, taken in connection with the circumstance, that as soon as the Philistines became prominent in the narrative, after the birth of Samson, this epithet is of rather common occurrence, and that the bringing back, as a trophy, the fore-kins of slain enemies, never occurs except against the Philistines (1 Sam. xviii.), would lead us to conclude, that while the Philistines, like the Sidonians and the other maritime Syrian nations known to the Greeks, were wholly strangers to the practice, it was common among the Canaanites and all the more inland tribes.

How far the rite of circumcision spread over the south-west of Arabia no definite record subsists. The silence of the Koran confirms the statement of Abulfeda, that the custom is older than Mohammed, who, it would appear, in no respect regarded it as a religious rite. Nevertheless it has extended itself with the Mohammedan faith, as though it were a positive ordinance. Pocock cites a tradition, which ascribes to Mohammed the words—'Circumcision is an ordinance for men, and honourable in women.' This extension of the rite to the other sex might, in itself, satisfy us that it did not come to those nations from Abraham and Ishmael. We have

already seen that Abyssinian circumcision has the same peculiarity: so that it is every way probable that Southern Arabia had the rite from the same source or influence as Ethiopia. In fact, the very closest relations are known to have subsisted between the nations on the opposite coasts of the Red Sea.

The moral meaning of the word 'uncircumcised' was a natural result of its having been made legally essential to Hebrew faith. 'Uncircumcised in heart and ears' was a metaphor to which a prophet would be carried, as necessarily as a Christian teacher to such phrases as 'unbaptized in soul,' or 'washed by regeneration.' If, however, we try to take a step farther back still, and ask *why* this ordinance in particular was selected, as so eminently essential to the seed of Abraham, we probably find that we have reached a point at which we must be satisfied with knowing the fact without the reason. Every external ordinance, as for instance baptism, must have more or less that is arbitrary in it. It is, however, abundantly plain that circumcision was not intended to separate the Jews from other nations generally, for it could not do so: and, least of all, from the Egyptians, as the words in Joshua (v. 9) show. Rather, it was a well known and already understood *symbol of purity*.

CISTERN. In a country which has scarcely more than one perennial stream, where fountains are not abundant, and where the months of summer pass without rain, the preservation of the rain-water in cisterns must always have been a matter of vast importance, not only in the pasture-grounds, but in gardens, and, above all, in towns. Hence the frequent mention of cisterns in Scripture, and more especially of those which are found in the open country. These were, it seems, the property of those by whom they were formed (Num. xxi. 22). They are usually little more than large pits, but sometimes take the character of extensive subterranean vaults, open only by a small mouth, like that of a well. They are filled with rain-water, and (where the climate allows) with snow during winter, and are then closed at the mouth with large flat stones, over which sand is spread in such a way as to prevent their being easily discovered. If by any chance the waters which the shepherd has thus treasured up are lost by means of an earthquake or some other casualty, or are stolen, both he and his flocks are exposed to great and imminent danger; as are also travellers who hasten to a cistern and find its waters gone. For this reason a failure of water is used as the image of any great calamity (Isa. xli. 17, 18; xlii. 3). There is usually a large deposit of mud at the bottom of these cisterns, so that he who falls into them, even when they are without water, is liable to perish miserably (Gen. xxvii. 22, *sq.*; Jer. xxxviii. 6; Lam. iii. 53; Ps. xl. 2; lxi. 15). Cisterns were sometimes used, when empty, as prisons, and indeed prisons which were constructed under ground received the same name (Gen. xxxix. 20; xl. 15).

In cities the cisterns were works of much labour, for they were either hewn in the rocks or surrounded with subterranean walls, and lined with a fine incrustation. The system which in this respect formerly prevailed in Palestine is, doubtless, the same that exists at present; and

indeed there is every probability that most of the cisterns now in use were constructed in very ancient times. Professor Robinson assures us, that 'the main dependence of Jerusalem at the present day is on its cisterns; and this has probably always been the case.' He then mentions the immense cisterns now and anciently existing within the area of the Temple; supplied partly by rain water, and partly by an aqueduct from Solomon's Pools, and which, of themselves, would furnish a tolerable supply in case of a siege. But, in addition to these, almost every private house in Jerusalem, of any size, is understood to have at least one or more cisterns, excavated in the soft limestone rock on which the city is built. The cisterns have usually merely a round opening at the top, sometimes built up with stonework above, and furnished with a curb and a wheel for the bucket; so that they have externally much the appearance of an ordinary well. The water is conducted into them from the roofs of the houses during the rainy season; and, with proper care, remains pure and sweet during the whole summer and autumn. In this manner most of the larger houses and the public buildings are supplied. The Latin convent, in particular, is said to be amply furnished; and in seasons of drought is able to deal out a sufficiency for all the Christian inhabitants of the city.

Most of these cisterns have undoubtedly come down from ancient times; and their immense extent furnishes a full solution of the question as to the supply of water for the city. Under the disadvantages of its position in this respect, Jerusalem must necessarily have always been dependent on its cisterns; and a city which thus annually laid in its supply for seven or eight months could never be overtaken by a want of water during a siege. Nor is this a trait peculiar to the Holy City; for the case is the same throughout all the hill country of Judah and Benjamin. Fountains and streams are few, as compared with Europe and America; and the inhabitants, therefore, collect water during the rainy season in tanks and cisterns in the cities, in the fields, and along the high roads, for the sustenance of themselves and of their flocks and herds, and for the comfort of the passing traveller. Many, if not the most, of these are obviously antique; and they exist not unfrequently along the ancient roads which are now deserted. Thus, on the long-forgotten way from Jericho to Bethel, 'broken cisterns' of high antiquity are found at regular intervals. That Jerusalem was thus actually supplied of old with water is apparent also from the numerous remains of ancient cisterns still existing in the tract north of the city, which was once enclosed within the walls.

CITIES OF REFUGE. Places of refuge where, under the cover of religion, the guilty and the unfortunate might find shelter and protection were not unknown among the ancient heathen. The right of shelter and impunity was enjoyed by certain places reputed sacred, such as groves, temples, and altars. This protective power commonly spread itself over a considerable district round the holy spot, and was watched over and preserved by severe penalties. Among the Greeks and Romans the number of these

places of asylum became in process of time very great, and led, by abuse, to a fresh increase of criminals. Tiberius, in consequence, caused a solemn inquiry into their effects to be made, which resulted in a diminution of their number and a limitation of their privileges.

This pagan custom passed into Christianity. As early as Constantine the Great, Christian churches were asylums for the unfortunate persons whom an outraged law or powerful enemies pursued. Theodosius, in 431, extended this privilege to the houses, gardens, and other places which were under the jurisdiction of the churches, and the synod of Toledo, in 681, widened the right of asylum to thirty paces from every church. Since then this ecclesiastical privilege prevailed in the whole of Catholic Christendom, and was preserved undiminished, at least in Italy, so long as the papal independence remained. The right acted beneficially in ages when violence and revenge predominated, and fixed habitations were less common than now; but its tendency to transfer power from the magistrate to the priesthood was injurious to the inviolability of law and the steady administration of justice. It has accordingly in recent times been abrogated by most governments.

Among the Jews the 'cities of refuge' bore some resemblance to the asylum of the classic nations, but were happily exempt from the evil consequences to which reference has been made, and afford, even to the present day, no mean proof of the superior wisdom and benignant spirit of the Jewish laws.

The institution was framed with a view to abate the evils which ensued from the old established rights of the blood-avenger [Blood-revenge], and thereby to further the prevalence in the nation of a mild, gentle, and forgiving spirit.

From the laws on this point (Exod. xxi. 13; Num. xxxv. 9-34; Deut. xix. 1-13) it appears that Moses set apart out of the sacerdotal cities six as 'cities of refuge.' There were, on the eastern side of the Jordan, three, namely, 'Bezer in the wilderness, in the plain country of the Reubenites, and Ramoth in Gilead of the Gadites, and Golan in Bashan of the Manassites' (Deut. iv. 43); on the western side three, namely, 'Kedesh in Galilee in Mount Naphtali, and Shechem in Mount Ephraim, and Kirjath-arba, which is Hebron, in the mountain of Judah' (Josh. xx. 7). If found desirable, then other cities might be added. An inspection of the map will show how wisely these places were chosen so as to make a city of refuge easy of access from all parts of the land. To any one of these cities a person who had unawares and unintentionally slain any one might flee, and if he reached it before he was overtaken by the avenger of blood, he was safe within its shelter, provided he did not remove more than a thousand yards from its circuit, nor quit the refuge till the decease of the high-priest under whom the homicide had taken place. If, however, he transgressed these provisions, the avenger might lawfully put him to death. The roads leading to the cities of refuge were to be kept in good repair. Before, however, the fugitive could avail himself of the shelter conceded by the laws, he was to undergo a solemn trial, and make it appear to the satis-

faction of the magistrates of the place where the homicide was committed that it was purely accidental. Should he, however, be found to have been guilty of murder, he was delivered 'into the hand of the avenger of blood, that he might die.' And the Israelites were strictly forbidden to spare him either from considerations of pity or in consequence of any pecuniary ransom. This disallowal of a compensation by money in the case of murder shows a just regard for human life, and appears much to the advantage of the Hebrew legislation when compared with the practice of other countries (Athens, for instance, and Islam), in which pecuniary atonements were allowed, if not encouraged, and where, in consequence, the life of the poor must have been in as great jeopardy as the character of the wealthy.

The asylum afforded by Moses displays the same benign regard to human life in respect of the homicide himself. Had no obstacle been put in the way of the Goel, instant death would have awaited any one who had the misfortune to occasion the death of another. By his wise arrangements, however, Moses interposed a seasonable delay, and enabled the manslayer to appeal to the laws and justice of his country. Momentary wrath could hardly execute its fell purposes, and a suitable refuge was provided for the guiltless and unfortunate.

Yet as there is a wide space between the innocence of mere homicide and the guilt of actual murder, in which various degrees of blame might easily exist, so the legislator took means to make the condition of the manslayer less happy than it was before the act or the mischance, lest entire impunity might lead to the neglect of necessary precaution and care. With great propriety, therefore, was the homicide made to feel some legal inconvenience. Accordingly he was removed from his patrimony, restricted in his sphere of locomotion, affected indirectly in his pecuniary interests, and probably reduced from an affluent or an easy station to one of service and labour. The benefit of the protection afforded was common to strangers and sojourners with native Israelites.

What ensues rests on the authority of the Rabbins. In order to give the fugitive all possible advantage in his flight, it was the business of the Sanhedrim to make the roads that led to the cities of refuge convenient by enlarging them and removing every obstruction that might hurt his foot or hinder his speed. No hillock was left, no river was allowed over which there was not a bridge, and the road was at least two and thirty cubits broad. At every turning there were posts erected bearing the words *Refuge, Refuge*, to guide the unhappy man in his flight; and two students in the law were appointed to accompany him, that, if the avenger should overtake him before he reached the city, they might attempt to pacify him till the legal investigation could take place.

When once settled in the city of refuge, the manslayer had a convenient habitation assigned him gratuitously, and the citizens were to teach him some trade whereby he might support himself. To render his confinement more easy, the mothers of the high-priests used to feed and clothe these unfortunate fugitives, that they might

not be impatient and pray for the death of their sons, on whose decease they were restored to their liberty and their property. If the slayer died in the city of refuge before he was released, his bones were delivered to his relations, after the death of the high-priest, to be buried in the sepulchre of his fathers.

In addition to this right of asylum, a custom appears to have prevailed from very early times, both among the chosen people and the nations of the world, of fleeing, in case of personal danger, to the altar. With the Jews it was customary for the fugitive to lay hold of the horns of the altar, whether in the tabernacle or temple; by which, however, shelter and security were obtained only for those who had committed sins of ignorance or inadvertence (Exod. xxi. 14; 1 Kings i. 50; ii. 28). From the two last passages it seems that state-crime also sought the protection of the altar, probably more from the force of custom than any express law. Their safety, however, depended on the will of the king; for in the passages referred to it appears that in one case (that of Adonijah) life was spared, but in the other (that of Joab) it was taken away even 'by the altar.' Compare Matt. xxiii. 35.

CITIZENSHIP. Strict isolation did by no means, as some suppose, form the leading principle in the system of theocracy as laid down by Moses, since even non-Israelites not only were allowed to reside in Palestine, but had the fullest protection of the law, equally with the descendants of Abraham (Exod. xii. 19; Lev. xxiv. 22; Num. xv. 15; xxxv. 15; Deut. i. 16; xxiv. 17: the law of usury, Deut. xxiii. 20, made, however, an exception), and were besides recommended in general terms by Moses to humanity and charity (Exod. xxii. 21; xxiii. 9; Lev. xix. 33, 34; Deut. x. 18; comp. Jer. vii. 6; Mal. iii. 5), as well as to a participation in certain prerogatives granted to the poor of the land, such as a share in the tithe and feast-offering, and the harvest in the Jubilee-year (Deut. xiv. 29; xvi. 10, 14; xxvi. 11; Lev. xxv. 6). In return, it was required on the part of non-Israelites not to commit acts by which the religious feelings of the people might be hurt (Exod. xx. 10; Lev. xvii. 10; xxiii. 26; xx. 2; xxiv. 16; Deut. v. 14). The eating of an animal which had died a natural death, Deut. xiv. 21, seems to have been the sole exception. The advantage the Jew had over the Gentile was thus strictly spiritual, in his being a citizen, a member of the theocracy, of the community of God, on whom positive laws were enjoined. But even to this spiritual privilege Gentiles were admitted under certain restrictions (Deut. xxiii. 1-9). The only nations that were altogether excluded from the citizenship of the theocracy by especial command of the Lord, were the Ammonites and Moabites, from a feeling of vengeance against them; and in the same situation were all castrated persons, and bastards, from a feeling of disgrace and shame (Deut. xxiii. 1-6). In the time of Solomon, no less than 153,600 strangers were resident in Palestine (2 Chron. ii. 17).

Roman citizenship (Acts xxii. 28), was granted in the times of the Emperors to whole provinces and cities, as also to single individuals, for some service rendered to the state or the imperial family, or even for a certain sum of money (Acts

xxii. 28). The Apostle Paul was a Roman citizen by family (Acts, l. c.), and hence his protesting against corporal or capital punishment.

CLAU'DA, a small island off the S.W. coast of Crete, mentioned in Acts xxvii. 16. It now bears the name of Gozzo.

CLAUDIA, a Christian female of Rome, mentioned in 2 Tim. iv. 21.

CLAUDIUS, the fifth Roman emperor, and successor of Caligula, A.D. 41-54 (Acts xi. 28; xviii. 2). His full name was Tiberius Claudius Nero Germanicus. Previously to his accession he led rather a dissolute life, and the throne was in a great measure secured to him through the address and solicitations of Herod Agrippa. This obligation he returned by great and peculiar favours to that personage; and the Jews were generally treated with indulgence till the ninth year of his reign, when those who abode at Rome were all banished thence (Acts xviii. 2). Several famines occurred under Claudius, one of which, in the fourth year of his reign, extended to Palestine and Syria, and appears to be that which was foretold by Agabus (Acts xi. 28).

CLAUDIUS LYSIAS. [LYSIAS.]

CLAUDIUS FELIX. [FELIX.]

CLAY, a substance frequently mentioned in Scripture, chiefly with reference to its employment by the potter, the elegant and useful forms assumed by the rude material under his hands supplying a significant emblem of the Divine power over the destinies of man (Isa. lxiv. 8; Rom. ix. 21). A remarkable allusion to the use of clay in sealing occurs in Job xxxviii. 14, 'He turneth it as clay to the seal.' This may be explained by reference to the ancient practice of impressing unburnt bricks with certain marks and inscriptions which were obviously made by means of a large seal or stamp. We trace this in the bricks of Egypt and Babylon [BRICKS]. Modern Oriental usages supply another illustration. Travellers, when entering the khans in towns, often observe the rooms in which goods have been left in charge of the *khanjee* sealed on the outside with clay. A piece of clay is placed over the lock, and impressed by a large wooden stamp or seal.

CLEMENT, a person mentioned by Paul (Phil. iv. 3), as one whose name was in the book of life. For the meaning of this phrase, see **BOOK OF LIFE**. This Clement was, by the ancient church, identified with the bishop of Rome of the same name; and that opinion has naturally been followed by Roman Catholic expositors. It cannot now be proved incorrect; but the suspicion exists that the case here may be as with many other names in the New Testament, which have been assigned to celebrated persons of a later period. Clement is said to have lived to the third year of the emperor Trajan (A.D. 100), when he suffered martyrdom.

1. **CLEOPAS**, one of the two disciples to whom Jesus appeared in the way to Emmaus (Luke xxiv. 18). He is not to be confounded with the other Cleophas, who was also called Alphaeus.

2. **CLEOPHAS**, or rather Clopas, who was also called Alphaeus, which see.

CLIMATE. [PALESTINE.]

CLOUD. The allusions to clouds in Scripture, as well as their use in symbolical language, must be understood with reference to the nature of the

climate, where the sky scarcely exhibits the trace of a cloud from the beginning of May to the end of September, during which period clouds so rarely appear, and rains so seldom fall, as to be considered phenomena—as was the case with the harvest rain which Samuel invoked (1 Sam. xii. 17, 18), and with the little cloud, not larger than a man's hand, the appearance of which in the west was immediately noticed as something remarkable not only in itself, but as a sure harbinger of rain (1 Kings xviii. 44).

As in such climates clouds refreshingly veil the oppressive glories of the sun, clouds often symbolize the Divine presence, as indicating the splendour, insupportable to man, of that glory which they wholly or partially conceal (Exod. xvi. 10; xxxiii. 9; xxxiv. 5; xl. 34, 35; Num. xi. 25; xxi. 5; Job xxii. 14; Ps. xviii. 11, 12; xevii. 2; Job. 3; Isa. xix. 1; Matt. xvii. 5; xxiv. 30, &c.; Acts i. 9; Rev. i. 7; xiv. 14, 16). Somewhat allied to this use is that which makes clouds the symbols of the Divine power (2 Sam. xxii. 12; Ps. lxxviii. 34; lxxxix. 6; civ. 3; Nahum i. 3).

Clouds are also the symbol of armies and multitudes of people (Jer. iv. 13; Isa. lx. 8; Heb. xii. 1).

There are many other dispersed symbolical allusions to clouds in Scripture not coming under these descriptions; but their purport is in every case too obvious to need explanation (see particularly Prov. xvi. 16; Eccles. xii. 2; Isa. iv. 5; xlv. 22; 2 Pet. ii. 7; Jude 12).

CNIDUS, otherwise GNIDUS, a town and peninsula of Doris in Caria, jutting out from the south-west part of Asia Minor, between the islands of Rhodes and Cos. It was celebrated for the worship of Venus. The Romans wrote to this city in favour of the Jews (1 Macc. xv. 23), and St. Paul passed it in his way to Rome (Acts xxvii. 7).

COAL. It is generally assumed that, in those numerous passages of our version in which the word coal occurs, *charcoal*, or some other kind of *artificial* fuel, is to be understood; at all events, that the word has not its English meaning. The idea is founded upon the supposition that fossil coal was not known to the ancients as an article of fuel, and especially to the ancient inhabitants of Syria, whose country it is generally imagined did not produce it. But the existence of coal in Syria is now placed beyond a doubt. Many indications of coal occur in the Lebanon mountains; the seams of this mineral even protrude through the superincumbent strata in various directions. At Cornale, eight hours from Beirut, at 2500 feet above the level of the sea, where the coal-seams are three feet in thickness, a mine is actually being worked by order of Mohammed Ali, in which more than 100 men are employed. The coal is of good quality, and mixed with iron pyrites. In 1837 the quantity of coal extracted was 14,700 cantars of 217 oks, each making about 4000 tons. A furnace for smelting the ore and a railroad to convey the coals to Beirut were then in contemplation.

It appears from the testimony of Theophrastus that pit-coal was used by artificers in Greece, nearly 300 years B.C., and the well-ascertained existence of coal in Syria, emerging to the very surface, may, in conjunction with some particulars respecting the mention of coal in the Scriptures,

tend to show the possibility that coal, in the proper sense, was not wholly unknown or unemployable by the ancient Hebrews, &c.

COCK. It is somewhat singular that this bird and poultry in general should not be distinctly noticed in the Hebrew Scriptures. They were, it may be surmised, unknown in Egypt when the Mosaic law was promulgated, and, though imported soon after, they always remained in an undetermined condition, neither clean nor unclean, but liable to be declared either, by decisions swayed by prejudice, or by fanciful analogies; perhaps chiefly the latter; because poultry are devourers of unclean animals, scorpions, scolopendra, small lizards, and young serpents of every kind.

But although rearing of common fowls was not encouraged by the Hebrew population, it is evidently drawing inferences beyond their proper bounds, when it is asserted that they were unknown in Jerusalem, where civil wars, and Greek and Roman dominion, had greatly affected the national manners. In the denials of Peter, described in the four Gospels, where the cock-crowing is mentioned by our Lord, the words are plain and direct, not we think admitting of equivocal, or of being taken to signify anything but the real voice of the bird, in its literal acceptation, and not as denoting the sound of a trumpet, so called, because it proclaimed a watch in the night; for, to what else than a real hen and her brood does our Saviour allude in Luke xiii. 34, where the text is proof that the image of poultry was familiar to the disciples, and consequently that they were not rare in Judea? To the present time in the East, and on the Continent of Europe, this bird is still often kept, as amongst the Celts, not so much for food as for the purpose of announcing the approach and dawn of day.

COCKATRICE. [SERPENT.]

COCKCROWING. The cock usually crows several times about midnight, and again about break of day. The latter time, because he then crows loudest, and his 'shrill clarion' is most useful by summoning man to his labours, obtained the appellation of the cockcrowing emphatically, and by way of eminence: though sometimes the distinctions of the *first* and *second* cockcrowing are met with in Jewish and heathen writers. These times, and these names for them, were, no doubt, some of the most ancient divisions of the night adopted in the East, where 'the bird of dawning' is most probably indigenous. In our Lord's time the Jews had evidently adopted the Greek and Roman division of the night into four periods, or watches; each consisting of three hours; the first beginning at six in the evening (Luke xii. 58; Matt. xiv. 25; Mark vi. 48; viii. 35).

It has been considered a contradiction that Matthew (xxvi. 34) records our Lord to have said to Peter, 'Before the cock crow thou shalt deny me thrice'; whereas St. Mark (xiv. 30) says, 'Before the cock crow thrice.' But Matthew, giving only the *general sense* of the admonition (as also Luke xxii. 34; John xiii. 38), evidently alludes to that only which was *customarily* called the cockcrowing, but Mark, who wrote under Peter's inspection, more accurately recording the *very words*, mentions the two cockcroings.

COCKLE. This word occurs in the singular

form in Job xxxi. 40, and in the plural form in Isaiah v. 2 and 4, where, however, it is rendered 'wild grapes.' It is probable that the same plant is referred to in these two passages; but difficulties have here, as elsewhere, been experienced in ascertaining the precise plant intended. All, however, are agreed that some useless, if not noxious, herb must be understood in both cases. The probability is in favour of its being the ox's grape or wolf-grape, either of which somewhat resembles the grape in the form of its lacerated fruit, but is very different in its properties, being narcotic and poisonous. Hasselquist, in reference to the passage of Isaiah, says, 'I am inclined to believe that the prophet here means the hoary nightshade, because it is common in Egypt and Palestine, and the Arabian name agrees well with it. The Arabs call it *anib-el-dib*, i. e. wolf-grape. The prophet could not have found a plant more opposite to the vine than this, for it grows much in the vineyards, and is very pernicious to them, wherefore they root it out: it likewise resembles a vine by its shrubby stalk.'

COELESY'RIA, the *hollow Syria*. This name, which is evidently of Grecian origin in the times of the Seleucids, was originally applied to the valley lying between the mountain-ranges of Libanus and Anti-Libanus. It was also used to denote the whole tract of country (with the exception of Judæa and Phœnicia) reaching from Seleucia to Arabia and the confines of Egypt. In the time of David, Coelesyria was probably included in 'Syria of Damascus,' which was conquered by that monarch (2 Sam. viii. 6), but recovered from Solomon by Rezon the son of Eliadah (1 Kings xi. 24). The possession of it was an object of many struggles between the Seleucids and the kings of Egypt. Bochart supposes that Syrophœnicia is the same as Coelesyria. Scythopolis and Gadara are mentioned by Josephus as cities of Coelesyria. Under the Emperor Dioclesian, Phœnicia and Coelesyria formed one province, called Phœnicia Libanica. Under the present Turkish government the western part of Coelesyria is in the Pashalic of Saïde, and the eastern in the Pashalic of Damascus.

COFFER. The name given in the Authorized Version to the receptacle (1 Sam. vi. 8, '1, 15) which the Philistines placed beside the ark when they sent it home, and in which they deposited the golden mice and emerods that formed their trespass-offering. It is supposed to be the same, or nearly the same thing, as the Arabian *rijaza*, which is a kind of wallet, into which stones are put: it is hung to one of the two sides of the handaj [a litter borne by a camel or mule] when it inclines towards the other.

COFFIN. [BURIAL.]

COLONY. This distinction is applied to Philippi in Macedonia (Acts xvi. 12). Augustus Cæsar had deported to Macedonia most of the Italian communities which had espoused the cause of Antony; by which means the towns of Philippi, Dyrrachium, &c., acquired the rank of Roman colonies, which possessed the privilege of a free municipal constitution, such as was customary in Italy, in exemption from personal and land taxes, and in the commerce of the soil, or the right of selling the land.

COLOSSÆ, a city of Phrygia, on the river Lycus (now Gorduk), not far from its confluence

with the Mæander, and near the towns of Laodicea, Apamea, and Hieropolis (Col. ii. 1; iv. 13, 15). A Christian church was formed here very early, probably by Epaphras (Col. i. 7; iv. 12, sq.), consisting of Jews and Gentiles, to whom Paul, who does not appear to have ever visited Colossæ in person (Col. ii. 1), addressed an Epistle from Rome. Not long after, the town was, together with Laodicea and Hierapolis, destroyed by an earthquake. This, according to Eusebius, was in the ninth year of Nero; but the town must have been immediately rebuilt, for in his twelfth year it continued to be named as a flourishing place. It still subsists as a village named

Khonas. The huge range of Mount Cadmus rises immediately behind the village, close to which there is in the mountain an immense perpendicular chasm, affording an outlet for a wide mountain torrent. The ruins of an old castle stand on the summit of the rock forming the left side of this chasm. There are some traces of ruins and fragments of stone in the neighbourhood, but barely more than sufficient to attest the existence of an ancient site; and that this site was that of Colossæ is satisfactorily established by the Rev. F. V. J. Arundell, whose book (*Discoveries in Asia Minor*) contains an ample description of the place.

COLOSSIANS, EPISTLE TO THE. That this Epistle is the genuine production of the Apostle Paul is proved by the most satisfactory evidence, and has never indeed been seriously called in question. It is less certain, however, *when* and *where* it was composed by him. The common opinion is that he wrote it at Rome during his imprisonment in that city (Acts xxviii. 16, 30), and although it has been controverted, the balance of evidence is decidedly in its favour. The Epistle to the Ephesians and to Philemon are supposed to have been written about the same time.

In what *order* these three epistles were written, it is not possible clearly to determine. Between that to the Colossians and that to the Ephesians the coincidences are so close and numerous that

the one must have been written immediately after the other, whilst the mind of the Apostle was occupied with the same leading train of thought. By the greater part the priority is assigned to the Epistle to the Colossians. The Epistle to Philemon being a more friendly letter, intended chiefly to facilitate the reconciliation of Onesimus to his master, was probably written immediately before the departure of the party by whom it was to be carried.

The Epistle to the Colossians was written, apparently, in consequence of information received by Paul through Epaphras concerning the internal state of their church (i. 6, 8). Whether the Apostle had ever himself before this time visited Colossæ is matter of uncertainty and dispute. From ch. ii. 1, where he says, 'I would that ye knew what great conflict I have for you and for them at Laodicea, and for as many as have not seen my face in the flesh,' &c., it has by some been very confidently concluded that he had not. To this it is replied by Theodoret, Lardner, and others, that Paul does not intend to include the Colossians and Laodiceans among those who had not seen his face, but specifies the latter as a distinct class; as is evident, they think, from his using the *third* person in ver. 2. This latter consideration, however, is of no weight, for the use of the third person here is easily accounted for on the principle that the pronoun takes the person of the nearer noun rather than that of the more remote (cf. Gal. i. 8); and it certainly would be absurd to maintain that all contained in the second verse has no relation to the Colossians and Laodiceans, notwithstanding the reference to them in ver. 1, and again in ver. 4. As respects the words in ver. 1, they will, in a mere philological point of view, bear to be understood in either way. It has been urged, however, that when, in ver. 5, the Apostle says, 'though I am absent in the flesh, yet am I with you in the spirit,' &c., his language is strongly indicative of his having formerly been amongst the Colossians, for the verb rendered 'I am absent' is used properly only of such absence as arises from the person's *having gone away from* the place of which his absence is predicted. In support of the same view have been adduced Paul's having twice visited and gone through Phrygia (Acts xvi. 6; xviii. 23), in which Colossæ was a chief city; his familiar acquaintance with so many of the Colossian Christians, Epaphras, Archippus, Philemon (who was one of his own converts, Phil. 13, 19), and Apphia, probably the wife of Philemon [ΑΡΡΗΙΑ]: his apparent acquaintance with Onesimus, the servant of Philemon, so that he recognised him again at Rome; the cordiality of friendship and interest subsisting between the Apostle and the Colossians as a body (Col. i. 24, 25; ii. 1; iv. 7, &c.); the Apostle's familiar acquaintance with their state and relations (i. 6; ii. 6, 7, &c.); and their knowledge of so many of his companions, and especially of Timothy, whose name the Apostle associates with his own at the commencement of the Epistle, a circumstance which is worthy of consideration from this, that Timothy was the companion of Paul during his first tour through Phrygia, when probably the Gospel was first preached at Colossæ. Of these considerations it must be allowed that the cumulative force is very strong in favour of

the opinion that the Christians at Colossæ had been privileged to enjoy the personal ministrations of Paul. At the same time, if the Colossians and Laodiceans are not to be included among those of whom Paul says they had not seen his face, it seems unaccountable that, in writing to the Colossians, he should have referred to this class at all. If, moreover, he had visited the Colossians, was it not strange that he should have no deeper feeling towards them than he had for the multitudes of Christians scattered over the world whose faces he had never seen? In fine, as it is quite possible that Paul may have been twice in Phrygia without being once in Colossæ, is it not easy also to account for his interest in the church at Colossæ, his knowledge of their affairs, and his acquaintance with individuals among them, by supposing that members of that church had frequently visited him in different places, though he had never visited Colossæ?

A great part of this Epistle is directed against certain false teachers who had crept into the church at Colossæ. To what class these teachers belonged has not been fully determined. Some contend that they were disciples of John the Baptist; others, with more show of reason, conclude that they were Essenes. The most probable opinion is that they were a party of speculators who endeavoured to combine the doctrines of Oriental theosophy and asceticism with Christianity, and promised thereby to their disciples a deeper insight into the spiritual world, and a fuller approximation to heavenly purity and intelligence, than simple Christianity could yield. Against this party the Apostle argues by reminding the Colossians that in Jesus Christ, as set before them in the Gospel, they had all that they required—that he was the image of the invisible God, that he was before all things, that by him all things consist, that they were complete in him, and that he would present them to God holy, unblamable, and unreprouvable, provided they continued steadfast in the faith. He then shows that the prescriptions of a mere carnal asceticism are not worthy of being submitted to by Christians; and concludes by directing their attention to the elevated principles which should regulate the conscience and conduct of such, and the duties of social and domestic life to which these would prompt.

In the conclusion of the Epistle, the Apostle, after sending to the Colossians the salutations of himself and others who were with him, enjoins the Colossians to send this Epistle to the Laodiceans, and that they likewise should read 'that from Laodicea.' It is disputed whether by these concluding words Paul intends an Epistle from him to the Laodiceans or one from the Laodiceans to him. The former seems the more probable interpretation of the Apostle's words: for supposing him to refer to a letter from the Laodiceans to him, the questions arise, How were the Colossians to procure this unless he himself sent it to them? And of what use would such a document be to them? To this latter question it has been replied that probably the letter from the Laodiceans contained some statements which influenced the Apostle in writing to the Colossians, and which required to be known before his letter in reply could be perfectly an

derstood. But this is said without the slightest shadow of reason from the Epistle before us; and it is opposed by the fact that the Laodicean epistle was to be used by the Colossians *after* they had read that to themselves. It seems, upon the whole, most likely that Paul in this passage refers to an epistle sent by him to the church in Laodicea at the same time with that to the church at Colossæ. It is probable also that this Epistle is now lost, though the suggestion of Grotius that it was the same with the Canonical Epistle to the Ephesians has found some advocates [EPHESIANS, EPISTLE TO THE]. The extant Epistle to the Laodiceans is on all hands allowed to be a clumsy forgery.

COMFORTER (*Paracletus*). The word thus rendered is applied to Christ in 1 John ii. 1. Indeed, in that famous passage in which Christ promises the Holy Spirit as a paraclete to his sorrowing disciples, he takes the title himself: 'I will send you *another* paraclete' (John xiv. 16), implying that he was himself one, and that on his departure he would send another. The question then is, In what sense does Christ denominate himself and the Spirit sent from him and the Father, *paraclete*? Origen explains the term where it is applied to the Holy Spirit by 'Consolator,' while in 1 John ii. 1, he adopts the signification of 'Deprecator.' Others would translate it 'teacher.' But as both of these renderings are open to serious objections, the balance is in favour of a third sense, which is that of 'assistant,' 'helper,' 'advocate' (intercessor). This view is supported by Rom. viii. 26, and, which is still more to the purpose, is appropriate to all the passages in the New Testament where the word occurs. The Authorized Version renders the word by 'advocate' in 1 John ii. 1, but in other places (John xiv. 16, 26; xv. 26; xvi. 7) by 'comforter.' How much better, however, the more extensive term 'helper' (including teacher, monitor, advocate) agrees with these passages than the narrow term 'comforter,' may be shown by a single instance. Jesus says to his disciples, 'I will send you *another* paraclete' (John xiv. 16), implying that he himself had been such to them. But he had not been in any distinguishing sense a 'comforter' or 'consoler,' because, having Him present with them, they had not mourned (Matt. ix. 15). But he had been eminently a helper, in the extensive sense which has been indicated; and such as he had been to them—to teach, to guide, and to uphold—the Holy Spirit would become to them after his removal.

COMMERCE. The idea conveyed by this word is represented in the Sacred Writings by the word trade.

Commerce, in its usual acceptation, means the exchange of one thing for another—the exchange of what we have to spare for what we want, in whatever country it is produced. The origin of commerce must have been nearly coeval with the world. As pasturage and agriculture were the only employments of the first inhabitants, so cattle, flocks, and the fruits of the earth were the only objects of the first commerce, or that species of it called barter. It would appear that some progress had been made in manufactures in the ages before the flood. The building of a city or village by Cain, however insignificant the houses may have been, sup-

poses the existence of some mechanical knowledge. The musical instruments, such as harps and organs, the works in brass and in iron exhibited by the succeeding generations, confirm the belief that the arts were considerably advanced. The construction of Noah's ark, a ship of three decks, covered over with pitch, and much larger than any modern effort of architecture, proves that many separate trades were at that period carried on. There must have been parties who supplied Noah and his three sons with the great quantity and variety of materials which they required, and this they would do in exchange for other commodities, and perhaps money. That enormous pile of building, the tower of Babel, was constructed of bricks, the process of making which, appears to have been well understood.

Such of the descendants of Noah as lived near the water may be presumed to have made use of vessels built in imitation of the ark—if, as some think, that was the first floating vessel ever seen in the world—but on a smaller scale, for the purpose of crossing rivers. In the course of time the descendants of his son Japhet settled in 'the isles of the Gentiles,' by which are understood the islands at the east end of the Mediterranean sea, and those between Asia Minor and Greece, whence their colonies spread into Greece, Italy, and other western lands.

Sidon, which afterwards became so celebrated for the wonderful mercantile exertions of its inhabitants, was founded about 2200 years before the Christian era. The neighbouring mountains, being covered with excellent cedar-trees, furnished the best and most durable timber for ship-building. The inhabitants of Sidon accordingly built numerous ships, and exported the produce of the adjoining country, and the various articles of their own manufacture, such as fine linen, embroidery, tapestry, metals, glass, both coloured and figured, cut, or carved, and even mirrors. They were unrivalled by the inhabitants of the Mediterranean coasts in works of taste, elegance, and luxury. Their great and universally acknowledged pre-eminence in the arts procured for the Phœnicians, whose principal seaport was Sidon, the honour of being esteemed, among the Greeks and other nations, as the inventors of commerce, ship-building, navigation, the application of astronomy to nautical purposes, and particularly as the discoverers of several stars nearer to the north pole than any that were known to other nations; of naval war, writing, arithmetic, book-keeping, measures and weights; to which it is probable they might have added money.

Egypt appears to have excelled all the neighbouring countries in agriculture, and particularly in its abundant crops of corn. The fame of its fertility induced Abraham to remove thither with his numerous family (Gen. xii. 10).

The earliest accounts of bargain and sale reach no higher than the time of Abraham, and his transaction with Ephron. He is said to have weighed unto him '400 shekels of silver, current money with the merchant' (Gen. xxi. 16). The word merchant implies that the standard of money was fixed by usage among merchants, who comprised a numerous and respectable class of the community. Manufactures were by this time so far advanced, that not only those more

immediately connected with agriculture, such as flour ground from corn, wine, oil, butter, and also the most necessary articles of clothing and furniture, but even those of luxury and magnificence, were much in use, as appears by the ear-rings, bracelets of gold and of silver, and other precious things presented by Abraham's steward to Rebekah (Gen. xxiv. 22, 53).

In the book of Job, whose author, in the opinion of the most learned commentators, resided in Arabia, and was contemporary with the earlier portion of Biblical history, much light is thrown upon the commerce, manufactures, and science of the age and country in which he lived. There is mention of gold, iron, brass, lead, crystal, jewels, the art of weaving, merchants, gold brought from Ophir, which implies commerce with a remote country, and topazes from Ethiopia; ship-building, so far improved that some ships were distinguished for the velocity of their motion; writing in a book, and engraving letters or writing on plates of lead and on stone with iron pens, and also seal-engraving; fishing with hooks, and nets, and spears; musical instruments, the harp, and organ; astronomy, and names given to particular stars. These notices tend to prove that, although the patriarchal system of making pasturage the chief object of attention was still maintained by many of the greatest inhabitants where the author of the book of Job resided, the sciences were actively cultivated, the useful and ornamental arts in an advanced state, and commerce prosecuted with diligence and success.

The inhabitants of Arabia appear to have availed themselves, at a very early period, of their advantageous situation between the two fertile and opulent countries of India and Egypt, and to have obtained the exclusive monopoly of a very profitable carrying trade between those countries. They were a class of people who gave their whole attention to merchandise as a regular and established profession, and travelled with caravans between Arabia and Egypt, carrying upon the backs of camels the spices of India, the balm of Canaan, and the myrrh produced in their own country, or of a superior quality from the opposite coast of Abyssinia—all of which were in great demand among the Egyptians for embalming the dead, in their religious ceremonies, and for ministering to the pleasures of that superstitious and luxurious people. The merchants of one of these caravans bought Joseph from his brothers for twenty pieces of silver, and carried him into Egypt. The southern Arabs were eminent traders, and enjoyed a large proportion, and in general the entire monopoly, of the trade between India and the western world, from the earliest ages, until the system of that important commerce was totally overturned when the inhabitants of Europe discovered a direct route to India by the Cape of Good Hope.

At the period when Joseph's brethren visited Egypt, 'inns' or caravanserais were established for the accommodation of travellers in that country and in the northern parts of Arabia. The more civilized southern parts of the peninsula would no doubt be furnished with caravanserais still more commodious.

During the residence of the Israelites in Egypt manufactures of almost every description were carried to great perfection. Flax, fine linen, gar-

ments of cotton, rings and jewels of gold and silver, works in all kinds of materials, chariots for pleasure and chariots for war, are all mentioned by Moses. They had extensive manufactures of bricks. Literature was in a flourishing state; and, in order to give an enlarged idea of the accomplishments of Moses, it is said he was 'learned in all the wisdom of the Egyptians' (Acts xii. 22).

The expulsion of the Canaanites from a great part of their territories by the Israelites under Joshua, led to the gradual establishment of colonies in Cyprus, Rhodes, and several islands in the Ægean Sea; they penetrated into the Euxine or Black Sea, and spreading along the shores of Sicily, Sardinia, Gaul, Spain, and Africa, established numerous trading places, which gradually rose into more or less importance. At this period mention is first made of Tyre as a strong or fortified city, whilst Sidon is dignified with the title of Great.

During the reign of David, king of Israel, that powerful monarch disposed of a part of the wealth obtained by his conquests in purchasing cedar-timber from Hiram, king of Tyre, with whom he kept up a friendly correspondence while he lived. He also hired Tyrian masons and carpenters for carrying on his works. Solomon, the son of David, cultivated the arts of peace, and indulged his taste for magnificence and luxury to a great extent. He employed the wealth collected by his father in works of architecture, and in strengthening and improving his kingdom. He built the famous Temple and fortifications of Jerusalem, and many cities, among which was the celebrated Tadmor or Palmyra. From the king of Tyre he obtained cedar and fir, or cypress-timbers, and large stones cut and prepared for building, which the Tyrians conveyed by water to the most convenient landing-place in Solomon's dominions. Hiram also sent a vast number of workmen to assist and instruct Solomon's people, none of whom had skill 'to hew timber like the Sidonians.' Solomon, in exchange, furnished the Tyrians with corn, wine, and oil, and received a balance in gold. Solomon and Hiram appear to have subsequently entered into a trading speculation or adventure upon a large scale. Tyrian shipwrights were accordingly sent to build vessels for both kings at Ezion-geber, Solomon's port on the Red Sea, whither he himself went to animate them with his presence (2 Chron. viii. 17). These ships, conducted by Tyrian navigators, sailed in company to some rich countries called Ophir and Tarshish. The voyage occupied three years, yet the returns in this new found trade were very great and profitable. This fleet took in apes, ebony, and parrots on the coasts of Ethiopia, gold at Ophir, or the place of traffic whither the people of Ophir resorted; it traded on both sides of the Red Sea, on the coasts of Arabia and Ethiopia, in all parts of Ethiopia beyond the straits when it had entered the ocean: thence it passed up the Persian Gulf, and might visit the places of trade upon both its shores, and run up the Tigris or the Euphrates as far as these rivers were navigable.

After the reign of Solomon the commerce of the Israelites seems to have very materially declined. An attempt was made by Jehoshaphat, king of Judah, and Ahaziah, king of Israel, to effect its revival; but the ships which they built at Ezion-

geber having been wrecked in the harbour, the undertaking was abandoned. It does not appear that they had any assistance from the Phœnicians in fitting out this fleet. Great efforts were made by the Egyptians to extend the commerce of their country, among which not the least considerable was the unsuccessful attempt to construct a canal from the Nile to the Arabian Gulf.

The rising prosperity of Tyre soon eclipsed the ancient and long-flourishing commercial city of Sidon. About 600 years before Christ her commercial splendour appears to have been at its height, and is graphically described by Ezekiel (xxvii). The imports into Tyre were fine linen from Egypt; blue and purple from the isles of Elisha; silver, iron, tin, and lead from Tarshish—the south part of Spain; slaves and brazen vessels from Javan or Greece, Tubal and Mesh-ech; horses, slaves bred to horsemanship, and nunes from Togarmah; emeralds, purple, embroidery, fine linen, corals, and agates from Syria; corn, balin, honey, oil, and gums from the Israelites; wine and wool from Damascus, polished ironware, precious oils, and cinnamon from Dan, Javan, and Mezo; magnificent carpets from Dedan; sheep and goats from the pastoral tribes of Arabia; costly spices, some the produce of India, precious stones, and gold from the merchants of Sheba or Sabæa, and Ramah or Regma, countries in the south part of Arabia; blue cloths, embroidered works, rich apparel in corded cedar-chests, supposed to be original India packages, and other goods from Sheba, Ashur, and Chilmad, and from Haran, Canech, and Eden, trading ports on the south coast of Arabia. The vast wealth that thus flowed into Tyre from all quarters brought with it its too general concomitants—extravagance, dissipation, and relaxation of morals.

The subjection of Tyre, 'the renowned city which was strong in the sea, whose merchants were princes, whose traffickers were the honourable of the earth,' by Cyrus, and its subsequent overthrow by Alexander, after a determined and most formidable resistance, terminated alike the grandeur of that city and the history of ancient commerce, as far as they are alluded to in Scripture.

COMMON. The Greek term properly signifies *what belongs to all* (as in Wisd. vii. 3), but the Hellenists applied it to what was profane, i. e. *not holy*, and therefore of common or promiscuous use (Acts x. 14). They also applied the term to what was *impure*, whether naturally or legally (as in Mark vii. 2, compared with Macc. i. 47, 62). And, finally, it was used of meats forbidden, or such as had been partaken of by idolaters, and which, as they rendered the partakers thereof impure, were themselves called common and unclean.

COMMUNION, a fellowship or agreement, when several persons join and partake together of one thing (2 Cor. vi. 14; 1 John i. 3); hence its application to the celebration of the Lord's supper as an act of fellowship among Christians (1 Cor. x. 16); and it is to this act of participation or fellowship that the word 'communion' is now restricted in the English language, the more familiar application of it having fallen into disuse.

CONCORDANCE, the name assigned to a

book which gives the words contained in the Holy Scriptures in alphabetical order, with a reference to the place where each may be found.

CONCUBINAGE, in a Scriptural sense, means the state of cohabiting lawfully with a wife of second rank, who enjoyed no other conjugal right but that of cohabitation, and whom the husband could repudiate, and send away with a small present (Gen. xxi. 14). In like manner, he could, by means of presents, exclude his children by her from the heritage (Gen. xxv. 6). Such concubines had Nahor (Gen. xxii. 24), Abraham (xxv. 6), Jacob (xxxv. 22), Eliphas (xxxvi. 12), Gideon (Judg. viii. 3), Saul (2 Sam. iii. 7), David (1 Sam. v. 13; xv. 16; xvi. 21), Solomon (1 Kings xi. 3), Caleb (1 Chron. ii. 46), Manasseh (ib. vii. 14), Rehoboam (2 Chron. xi. 21), Abiah (2 Chr. xiii. 21), and Belshazzar (Dan. v. 2). To judge from the conjugal histories of Abraham and Jacob (Gen. xvi. and xxx.), the immediate cause of concubinage was the barrenness of the lawful wife, who in that case introduced her maid-servant, of her own accord, to her husband, for the sake of having children. Accordingly we do not read that Isaac, son of Abraham, had any concubine, Rebekah, his wife, not being barren. In process of time, however, concubinage appears to have degenerated into a regular custom among the Jews, and the institutions of Moses were directed to prevent excess and abuse in that respect, by wholesome laws and regulations (Exod. xxi. 7-9; Deut. xxi. 10-14). It would seem that the unfaithfulness of a concubine was not regarded as an act of real adultery (Lev. xix. 20). When a son had intercourse with the concubine of his father, a sort of family punishment, we are informed, was inflicted on him (Gen. xxxv. 22; 1 Chron. v. 1).

In the Talmud, the Rabbins differ as to what constitutes concubinage; some regarding as its distinguishing feature the absence of the betrothing ceremonies, and of the portion of property allotted to a woman by special engagement, and to which she was entitled on the marriage day, after the decease of the husband, or in case of repudiation; others, again, the absence of the latter alone.

The Roman law calls concubinage an allowed custom. When this expression occurs in the constitutions of the Christian emperors, it signifies what we now sometimes call a *marriage of convenience*. The concubinage tolerated among the Romans, in the time of the Republic and of the heathen emperors, was that between persons not capable of contracting legal marriage. Inheritances might descend to children that sprung from such a tolerated cohabitation. Concubinage between such persons they looked on as a kind of marriage, and even allowed it several privileges; but then it was confined to a single person, and was of perpetual obligation, as much as marriage itself. Concubinage is also used to signify a marriage with a woman of inferior condition, to whom the husband does not convey his rank. Dajos (Paratilla) observes, that the ancient laws allowed a man to espouse, under the title of concubine, certain persons who were esteemed unequal to him, on account of the want of some qualities requisite to sustain the full honour of marriage; and he adds, that though such concubinage was beneath marriage both as to dignity

and civil rights, yet was concubine a reputable title, and very different from that of 'mistress' among us. The connection was considered so lawful that the concubine might be accused of adultery in the same manner as a wife.

This kind of concubinage is still in use in some countries, particularly in Germany, under the title of half-ehe (half-marriage), or left-hand marriage, in allusion to the manner of its being contracted, namely, by the man giving the woman his left hand instead of the right. This is a real marriage, though without the usual solemnity, and the parties are both bound to each other for ever, though the female cannot bear the husband's name and title.

CONY, in the original *Shaphan*, occurs in Lev. xl. 5; Deut. xiv. 7; Ps. civ. 18; Prov. xxx. 26. Commentators in general now conclude, on the most satisfactory grounds, that those versions which give Cony for the Hebrew *Shaphan* are incorrect. The *Shaphan* in scientific zoology is one of the small genus *Hyrax*, distinguished by the specific name of Syrian. Externally it is somewhat of the size, form, and brownish colour of a rabbit, and, though it has short round ears, sufficiently like for inexact observers to mistake the one for the other. Navigators and colonists often carry the local names of their native land to other countries, and bestow them upon new objects with little propriety: this seems to have been done in the instance before us, there being reason to believe that the Phœnicians on visiting the western shores of the European side of the Mediterranean, found the country, as other authorities likewise assert, infested with rabbits or conies, and that without attending to the difference they bestowed upon them the Hebrew or Phœnician name of *Shaphan*.

129. [*Hyrax Syriacus*.]

The hyrax is of clumsier structure than the rabbit, without tail, having long, bristly hairs scattered through the general fur; the feet are naked below, and all the nails are flat and rounded, save those on each inner toe of the hind feet, which are long and awl-shaped; therefore the species cannot dig, and is by nature intended to reside, not, like rabbits, in barrows, but in the clefts of rocks. This character is correctly applied to the *Shaphan* by David.

Their timid gregarious habits, and the tenderness of their paws, make them truly 'the wise and feeble folk' of Solomon; for the genus lives in colonies in the crevices of stony places in Syria, Palestine, Arabia, Eastern Egypt, Abyssinia, and even at the Cape of Good Hope, where one or two additional species exist. In every locality they are quiet, gentle creatures, loving to bask in the sun, never stirring far from their retreats, moving with caution, and shrinking from

the shadow of a passing bird, for they are often the prey of eagles and hawks; their habits are strictly diurnal, and they feed on vegetables and seeds.

CONFLAGRATION, GENERAL. The opinion that the end of the world is to be effected by the agency of fire is very ancient, and was common amongst heathen philosophers. It is not easy to discover the origin of this opinion; it can scarcely be traced to tradition derived from revelation, since there is no distinct reference to such a catastrophe in the Old Testament. It is, moreover, remarkable, considering how universal and definite is the ordinary belief on the subject, that there is only one passage in the New Testament, viz. 2 Pet. iii. 7-10, which can be adduced as speaking distinctly of this event. This passage is, indeed, very explicit, but it should not be forgotten that some learned and able expositors have referred it altogether to the destruction of Jerusalem and of the Jewish polity. If, however, with the majority of interpreters, we refer the prediction to the end of the world, to which it seems most naturally to apply, we could not have a more distinct statement of the fact that the present order of things is to be terminated by the world we inhabit and all the works of man it contains being 'burnt up.' There is no reason for assuming that the whole material universe is to be involved in this catastrophe; the mention of the heavens leads our thoughts no further than the atmosphere and vapours surrounding this planet. Nor should we regard this conflagration as involving the absolute destruction or annihilation of the world; it is more consistent with the narrative itself, as well as with physical science, to consider it as introductory to a new and better state of things—'new heavens and a new earth wherein dwelleth righteousness' (v. 11). By what means the conflagration is to be effected we are not informed, and all attempts to explain how this is to be accomplished must be mere speculation, into which we do not think it necessary or advantageous to enter. We have only at present to remark that such an event is not inconsistent with physical facts. We know that the temperature of the earth increases gradually and with considerable regularity as we descend below the surface, and have every reason to believe that the central mass is intensely hot. We know, moreover, that there are subterranean fires of great extent, if not forming part of this heated central mass. The means, therefore, of combustion are near at hand. But even if there were no such central heat, chemistry points out very easy means by which the conflagration may be effected through the agency of various elementary substances. We find evidence also in the pyrogenous rocks which form so large a part of the crust of the earth, that the world has already been subjected, if not to conflagration, yet to a more intense and general action of heat than any which is now observed on the surface of the earth; and it is clearly not impossible that the action may be yet more intense and more general.

CONIAH. [JERONIAH.]

COOS, Cos or Co (row Stan-Co or Stanchio), a small and fertile island in the Ægean Sea, near the coast of Caria, in Asia Minor, almost between the promontories on which the cities Cnidus and Halicarnassus were situated. It was celebrated

for its wine, silks, and cotton of a beautiful texture. The island is mentioned in 1 Macc. xv. 23; Acts xxi. 1.

COPPER. Tubal-cain is recorded as the first artificer in brass and iron (Gen. iv. 22). In the time of Solomon, Hiram of Tyre was celebrated as a worker in brass (1 Kings vii. 14; comp. 2 Chron. ii. 14). To judge from Hesiod and Lucretius, the art of working in copper was even prior to that in iron, probably from its being found in larger masses, and from its requiring less labour in the process of manufacture. Palestine abounded in copper (Deut. viii. 9), and David left behind him an immense quantity of it to be employed in building the Temple (1 Chron. xxii. 3-14). Of copper were made all sorts of vessels in the Tabernacle and Temple (Lev. vi. 28; Num. xvi. 39; 2 Chron. iv. 16; Ezra viii. 27), weapons, and more especially helmets, armour, shields, spears (1 Sam. xvii. 5, 6, 38; 2 Sam. xxi. 16), also chains (Judg. xvi. 21), and mirrors (Exod. xxxviii. 8). The larger vessels were moulded in founderies, as also the pillars for architectural ornaments (1 Kings vii.). It would however appear (1 Kings vii. 14) that the art of copper-founding was, even in the time of Solomon, but little known among the Jews, and was peculiar to foreigners, particularly the Phœnicians. Michaelis observes, that Moses seems to have given to copper vessels the preference over earthen, and on that ground endeavoured to remove the common prejudice against their use for culinary purposes. From copper, also, money was coined (Matt. x. 9).

CORAL (Job xxviii. 18; Ezek. xxvii. 16), a hard, cretaceous marine production arising from the deposit of calcareous matter by a minute polypous animal, in order to form the cell or polydrom into whose hollows the tenant can wholly or partially retire. The corals thus produced are of various shapes, most usually branched like a tree. The masses are often enormous in the tropical seas, where they top the reefs and cap the submarine mountains, frequently rising to or near the surface so as to form what are called coral islands and coral reefs. These abound in the Red Sea; from which, most probably, was derived the coral with which the Hebrews were acquainted; but coral is also found in the Mediterranean. It is of different colours, white, black, red. The red kind was anciently, as at present, the most valued, and was worked into various ornaments.

CORBAN, a Hebrew word employed in the Hellenistic Greek, to designate an oblation of any kind to God. It occurs only once in the New Testament (Mark vii. 11). There is some difficulty in the exact meaning of this passage and the corresponding one, Matt. xv. 5. Many interpreters, at the head of whom stands Beza, suppose that a gift of the property of the son had actually been made to the service of God. The sense is then, 'Whatever of mine might benefit thee is corban, is already dedicated to God, and I have therefore no power over it.' Others, more correctly as we think, translate the sentence, 'Be it corban (that is, devoted) whatever of mine shall profit thee.' Lightfoot notices a formula of frequent occurrence in the Talmud which seems to be exactly that quoted by our Lord, '[Be it] corban, [as to] which I may be profitable to thee.'

He, as well as Grotius, shows that this and similar formulae were not used to signify that the thing was actually devoted, but was simply intended to prohibit the use of it from the party to whom it was thus made corban, as though it were said, 'If I give you anything or do anything for you, may it be as though I gave you that which is devoted to God, and may I be accounted perjured and sacrilegious.' This view of the passage certainly gives much greater force to the charge made by our Lord that the command 'Whoso curseth father or mother let him die the death' was nullified by the tradition. It would, indeed, seem surprising that such a vow as this (closely analogous to the modern profanity of imprecating curses on one's self if certain conditions be not fulfilled) should be considered to involve a religious obligation from which the party could not be freed even if afterwards he repented of his rashness and sin. It appears, however, from Rabbinical authority that anything thus devoted was irreclaimable, and that even the hasty utterance of a word implying a vow was equivalent to a vow formally made. This, indeed, seems to be the force of the expression used in Mark, 'ye suffer him no more to do nought for his father or his mother.' A more striking instance of the subversion of a command of God by the tradition of men can hardly be conceived.

CORIANDER occurs in two places in Scripture, viz. Exod. xvi. 31, 'And it (manna) was like coriander seed, white; and the taste of it was like wafers made of honey'; Num. xi. 7, 'And the manna was as coriander seed, and the colour thereof as the colour of bdellium.' The coriander is known throughout Arabia, Persia, and India,

130. [Coriandrum sativum.]

in all of which it is cultivated, being universally employed as a grateful spice, and as one of the ingredients of currie-powder. It is also common in Egypt. It is now very common in the south of Europe, and also in this country, being cultivated, especially in Essex, on account of its seeds,

which are required by confectioners, druggists, and distillers, in large quantities: in gardens it is reared on account of its leaves, which are used in soups and salads. The coriander is an umbelliferous plant, the *Coriandrum sativum* of botanists. The fruit, commonly called seeds, is globular, greyish-coloured, about the size of peppercorn, having its surface marked with fine striae. Both its taste and smell are agreeable, depending on the presence of a volatile oil, which is separated by distillation.

CORINTH, a Grecian city, placed on the isthmus which joins Peloponnesus (now called the Morea) to the continent of Greece. A lofty rock rises above it, on which was the citadel, or the Acrocorinthus. It had two harbours: Cenchreæ, on the eastern side, about 70 stadia distant; and Lechaëum, on the modern Gulf of Lepanto, only 12 stadia from the city. Its earliest name, as given by Homer, is *Ephyre*. Owing to the great difficulty of weathering Malæa, the southern promontory of Greece, merchandise passed through Corinth from sea to sea; the city becoming an *entrepôt* for the goods of Asia and Italy (Strabo, viii. 6). At the same time it commanded the traffic by land from north to south. An attempt made to dig through the isthmus was frustrated by the rocky nature of the soil; at one period, however, they had an invention for drawing galleys across from sea to sea on trucks. With such advantages of position, Corinth was very early renowned for riches, and seems to have been made by nature for the capital of Greece. The numerous colonies which she sent forth, chiefly to the west and to Sicily, gave her points of attachment in many parts, and the good will, which, as a mercantile state, she carefully maintained, made her a valuable link between the various Greek tribes. The public and foreign policy of Corinth appears to have been generally remarkable for honour and justice; and the Isthmian games, which were celebrated there every other year, might have been converted into a national congress, if the Corinthians had been less peaceful and more ambitious.

When the Achaean league was rallying the chief powers of southern Greece, Corinth became its military centre; and as the spirit of freedom was active in that confederacy, they were certain, sooner or later, to give the Romans a pretence for attacking them. The fatal blow fell on Corinth (B.C. 146), when L. Mummius, by order of the Roman Senate, barbarously destroyed that beautiful town, eminent even in Greece for painting, sculpture, and all working in metal and pottery; and as the territory was given over to the Sicyonians, we must infer that the whole population was sold into slavery.

The Corinth of which we read in the New Testament was quite a new city, having been rebuilt and established as a Roman colony, and peopled with freedmen from Rome by the dictator Cæsar, a little before his assassination. Although the soil was too rocky to be fertile, and the territory very limited, Corinth again became a great and wealthy city in a short time, especially as the Roman proconsuls made it the seat of government (Acts xviii.), for southern Greece, which was now called the province of Achaia. In earlier times Corinth had been celebrated for the great wealth of its Temple of Venus, which had a painful

traffic of a most dishonourable kind with the numerous merchants resident there. The same phenomena, no doubt, reappeared in the later and Christian age. The little which is said in the New Testament seems to indicate a wealthy and luxurious community, prone to impurity of morals; nevertheless, all Greece was so contaminated, that we may easily overcharge the accusation against Corinth.

The Corinthian Church is remarkable in the Epistles of the Apostle Paul by the variety of its spiritual gifts, which seem for the time to have eclipsed or superseded the office of the elder or bishop, which in most churches became from the beginning so prominent. Very soon, however, this peculiarity was lost, and the bishops of Corinth take a place co-ordinate to those of other capital cities. One of them, Dionysius, appears to have exercised a great influence over many and distant churches, in the latter part of the second century.

CORINTHIANS, EPISTLES TO THE.—FIRST EPISTLE. The testimony of Christian antiquity is unanimous in ascribing this inspired production to the pen of the Apostle Paul, and with this the internal evidence arising from allusions, undesigned coincidences, style, and tone of thought, fully accords. The epistle seems to have been occasioned partly by some intelligence received by the Apostle concerning the Corinthian church from the domestics of Chloe, a pious female connected with that church (i. 11), and, probably, also from common report; and partly by an epistle which the Corinthians themselves had addressed to the Apostle, asking advice and instruction on several points (vii. 1), and which probably was conveyed to him by Stephanas, Fortunatus, and Achaicus (xvi. 17). Apollos, also, who succeeded the Apostle at Corinth, but who seems to have been with him at the time this epistle was written (xvi. 12), may have given him information of the state of things among the Christians in that city. From these sources the Apostle had become acquainted with the painful fact that since he had left Corinth (Acts xviii. 18) the church in that place had sunk into a state of great corruption and error. One prime source of this evil state of things, and in itself an evil of no inferior magnitude, was the existence of schisms or party divisions in the church. 'Every one of you,' Paul tells them, 'saith I am of Paul, and I of Apollos, and I of Cephas, and I of Christ' (i. 12). This has led to the conclusion that four great parties had arisen in the church, which boasted of Paul, Apollos, Peter, and Christ, as their respective heads, and various conjectures have been made respecting the peculiarities of sentiment by which these parties may be supposed to have been distinguished from each other. But serious doubts may be entertained whether there really were in the Corinthian church sects or parties specifically distinguished from each other by peculiarities of doctrinal sentiment. That erroneous doctrines were entertained by individuals in the church, and that a schismatical spirit pervaded it, cannot be questioned; but that these two stood formally connected with each other may fairly admit of doubt. Schisms often arise in churches from causes which have little or nothing to do with diversities of doctrinal sentiment among the members; and that such were

the schisms which disturbed the church at Corinth appears to us probable, from the circumstance that the existence of these is condemned by the Apostle, without reference to any doctrinal errors out of which they might arise: whilst, on the other hand, the doctrinal errors condemned by him are denounced without reference to their having led to party strifes. From this we are inclined to the opinion that the schisms arose merely from quarrels among the Corinthians as to the comparative excellence of their respective teachers—those who had learned of Paul boasting that he excelled all others, and the converts of Apollos and Peter advancing a similar claim for them, whilst a fourth party haughtily repudiated all subordinate teaching, and pretended that they derived all their religious knowledge from the direct teaching of Christ. The language of the Apostle in the first four chapters, where alone he speaks directly of these schisms, and where he resolves their criminality not into their relation to false doctrine, but into their having their source in a disposition to glory in men, must be regarded as greatly favouring this view. Comp. also 2 Cor. v. 16.

Besides the schisms and the erroneous opinions which had invaded the church at Corinth, the Apostle had learned that many immoral and disorderly practices were tolerated among them, and were in some cases defended by them. A connection of a grossly incestuous character had been formed by one of the members, and gloried in by his brethren (v. 1, 2); law-suits before heathen judges were instituted by one Christian against another (vi. 1); licentious indulgence was not so firmly denounced and so carefully avoided as the purity of Christianity required (vi. 9-20); the public meetings of the brethren were brought into disrepute by the women appearing in them unveiled (xi. 3-10), and were disturbed by the confused and disorderly manner in which the persons possessing spiritual gifts chose to exercise them (xii.-xiv.); and in fine the 'love feasts,' which were designed to be scenes of love and union, became occasions for greater contention through the selfishness of the wealthier members, who, instead of sharing in a common meal with the poorer, brought each his own repast, and partook of it by himself, often to excess, while his needy brother was left to fast (xi. 20-34). The judgment of the Apostle had also been solicited by the Corinthians concerning the comparative advantages of the married and the celibate state (vii. 1-40), as well as, apparently, the duty of Christians in relation to the use for food of meat which had been offered to idols (viii. 1-13). For the correction of these errors, the remedying of these disorders, and the solution of these doubts, this epistle was written by the Apostle. It consists of four parts. The first (i.-iv.) is designed to reclaim the Corinthians from schismatic contentions; the second (v.-vi.) is directed against the immoralities of the Corinthians; the third (vii.-xiv.) contains replies to the queries addressed to Paul by the Corinthians, and strictures upon the disorders which prevailed in their worship; and the fourth (xv.-xvi.) contains an elaborate defence of the Christian doctrine of the resurrection, followed in the close of the epistle by some general instructions, intimations, and greetings.

From 2 Cor. xii. 14, and xiii. 1, compared with 2 Cor. ii. 1, and xiii. 2, it appears that before the writing of that epistle Paul had twice visited Corinth, and that one of these visits had been after the Church had fallen into an evil state. Did this second visit to Corinth precede also the writing of the first epistle? On this point the Acts give us no help, as the writer is totally silent concerning this second visit of Paul to Corinth. But we may safely infer from 2 Cor. i. 15, 16, 23, that Paul had not been at Corinth between the writing of the first and second epistles, so that we must place his second visit before the writing of the first epistle. When this second visit took place we can only conjecture; but Billroth's suggestion that it was made some time during the period of Paul's residence of three years at Ephesus (Acts xx. 31), perhaps on the first reception of unpleasant news from Corinth, is extremely probable. Supposing the Apostle to have made this short visit and to have returned to Ephesus, this first epistle may have been written either in that city or in Macedonia, through which Paul probably journeyed on his way from Corinth to Ephesus. This latter is the traditional opinion, and is greatly favoured by the way in which Paul speaks of Ephesus (1 Cor. xv. 32) as a place in which he *had* been rather than one in which he *was* when writing this epistle. From the allusion to the Passover in ch. v. 7, 8, most have inferred that the epistle was written at the time of Easter; but this does not necessarily follow from the Apostle's allusion. As to the year, great diversity of opinion prevails, but most are agreed that it was not earlier than 56 nor later than 59.

The subscription above referred to intimates that this epistle was conveyed to Corinth by Stephanas, Fortunatus, Achaicus, and Timothy. As respects the last named there is evidently a mistake, for from ch. xvi. 10 it appears that Timothy's visiting Corinth was a thing not certain when this letter was finished, and from 2 Cor. viii. 17, 18, it appears that Timothy did not visit Corinth till afterwards. Comp. also Acts xix. 22. As respects the others, this tradition is probably correct.

SECOND EPISTLE. Not long after the transmission of the first epistle, the Apostle left Ephesus in consequence of the uproar excited against him by Demetrius the silversmith, and betook himself to Troas (Acts xix. 23, sq.). Here he expected to meet Titus with intelligence from Corinth of the state of things in that church. In this expectation, Paul was disappointed. He accordingly went into Macedonia, where, at length, his desire was gratified, and the wished-for information obtained (2 Cor. ii. 13; vii. 15, sq.).

The intelligence brought by Titus concerning the church at Corinth was on the whole favourable. The censures of the former epistle had produced in their minds a godly sorrow, had awakened in them a regard to the proper discipline of the church, and had led to the exclusion from their fellowship of the incestuous person. This had so wrought on the mind of the latter that he had repented of his evil courses, and showed such contrition that the Apostle now pities him, and exhorts the church to restore him to their communion (2 Cor. ii. 6-11; vii. 8, sq.). A cordial response had also been given to the

appeal that had been made on behalf of the saints in Palestine (ix. 2). But with all these pleasing symptoms there were some of a painful kind. The anti-Pauline influence in the church had increased, or at least had become more active; and those who were actuated by it had been seeking by all means to overturn the authority of the Apostle, and discredit his claims as an ambassador of Christ.

This intelligence led the Apostle to compose his second epistle, in which the language of commendation and love is mingled with that of censure, and even of threatening. This epistle may be divided into three sections. In the first (i.-iii.) the Apostle chiefly dwells on the effects produced by his first epistle and the matters therewith connected. In the second (iv.-ix.) he discourses on the substance and effects of the religion which he proclaimed, and turns from this to an appeal on behalf of the claims of the poor saints on their liberality. And in the third (x.-xiii.) he vindicates his own dignity and authority as an apostle against the parties by whom these were opposed.

CORMORANT (Hebrew *Salach*) occurs Lev. xi. 17; Deut. xiv. 17. The name is considered to have reference to darting, rushing, or stooping like a falcon. Nothing is known of it but that it was an nucleon bird. Cuvier considers Gesner to be right in considering it to denote a gull, and it might certainly be applied with propriety to the black-backed gull; but although birds of such powerful wing and marine *habitat* are spread over a great part of the world, it does not appear that, if known at the extremity of the Mediterranean, they were sufficiently common to have been clearly indicated by either the Hebrew or Greek names, or to have merited being noticed in the Mosaic prohibition. Both the above are in general northern residents, being rarely seen even so low as the Bay of Biscay. With regard

131. [Caspian Tern.]

to the cormorant, birds of that genus are no doubt found on the coasts of Palestine, where high cliffs extend to the sea-shore; but all the species dive, and none of them rush flying upon their prey. We therefore conclude the *salach* to have been a species of 'tern,' considered to be identical with the '*Sterna Caspica*,' so called because it is found about the Caspian Sea; but it is equally common to the Polar, Baltic, and Black Seas, and if truly the same, is not only abundant for several months in the year on the coast of Palestine, but frequents the lakes and pools far inland; flying across the deserts to the Euphrates, and to the Persian and Red Seas, and proceeding up the Nile. It is the largest of the tern or sea-swallow genus, being about the weight of a pigeon, and near two feet in length, having a large black

naped head; powerful, pointed crimson bill; a white and grey body, with forked tail, and wings greatly exceeding the tips of the tail: the feet are very small, weak, and but slightly webbed, so that it swims perhaps only accidentally, but with sufficient power on land to spring up and to rise from level ground. It flies with immense velocity, darting along the surface of the sea to snap at mollusca or small fishes, or wheeling through the air in pursuit of insects; and in calm weather, after rising to a great height, it drops perpendicularly down to near the surface of the water, but never alights except on land; and it is at all times disposed to utter a kind of laughing scream. This tern nests in high cliffs, sometimes at a very considerable distance from the sea. We figure one that was shot among a flight of these birds, some distance up the river Orontes.

CORN. The word *dagan*, which is rendered 'grain,' 'corn,' and sometimes 'wheat' in the Authorized Version, is the most general of the Hebrew terms representing 'corn,' and is more comprehensive than any word in our language, seeing that it probably includes not only all the proper corn-grains, but also various kinds of pulse and seeds of plants, which we never comprehend under the name of 'corn' or even of 'grain.' It may, therefore, be taken to represent all the commodities which we describe by the different words corn, grain, seeds, peas, beans. Among other places in which this word occurs, see Gen. xxvii. 28-37; Num. xviii. 27; Deut. xxviii. 51; Lam. ii. 12, &c.

The different products coming under the denomination of corn, are noticed under the usual heads, as BARLEY, WHEAT, &c.; their culture, under AGRICULTURE; their preparation, under BREAD, FOOD, MILL, &c.

CORNELIUS. The centurion of this name, whose history occurs in Acts x., most probably belonged to the Corneli, a noble and distinguished family at Rome. He is reckoned by Julian the Apostate as one of the few persons of distinction who embraced Christianity. His station in society will appear upon considering that the Roman soldiers were divided into legions, each legion into ten cohorts, each cohort into three bands, and each band into two centuries or hundreds; and that Cornelius was a commander of one of these centuries, belonging to the *Italic* band; so called from its consisting chiefly of Italian soldiers, formed out of one of the six cohorts granted to the procurators of Judæa, five of which cohorts were stationed at Casarea, the usual residence of the procurators. The *religion* of Cornelius, before his interview with Peter, has been the subject of much debate. It is contended by some that he was what is called a *proselyte of the gate*, or a Gentile, who, having renounced idolatry and worshipping the true God, frequented the synagogue, and offered sacrifices by the hands of the priests; but, not having received circumcision, was not reckoned among the Jews. But, on the whole, it is more probable that he belonged to the class of pious Gentiles who had so far benefited by their contact with the Jewish people as to have become convinced that theirs was the true religion, who consequently worshipped the true God, were acquainted with the Scriptures of the Old Testament, most pro-

bably in the Greek translation, and observed several Jewish customs, as, for instance, their hours of prayer, or anything else that did not involve an act of special profession. This class of persons seems referred to in Acts xiii. 16, where they are plainly distinguished from the Jews, though certainly mingled with them. To the same class is to be referred Candace's treasurer (Acts viii. 27, &c.); and in earlier times, the midwives of Egypt (Exod. i. 17), Rahab (Josh. vi. 25), Rath, Araunah the Jebusite (2 Sam. xxiv. 18, &c.), the persons mentioned 1 Kings viii. 41, 42, 43, Naaman (2 Kings v. 16, 17). We regard Cornelius, therefore, as having been selected of God to become the *firstfruits of the Gentiles*. His character appears suited, as much as possible, to abate the prejudices of the Jewish converts against what appeared to them so great an innovation. It is well observed by Theophylact, that Cornelius, though neither a Jew nor a Christian, lived the life of a good Christian. He was influenced by spontaneous reverence to God. He practically obeyed the restraints of religion, for he feared God, and this latter part of the description is extended to all his family or household (ver. 2). He was liberal in alms to the Jewish people, which showed his respect for them; and he 'prayed to God always,' at all the hours of prayer observed by the Jewish nation. Such piety, obedience, faith, and charity, prepared him for superior attainments and benefits, and secured to him their bestowment (Ps. xxv. 9; 1. 23; Matt. xiii. 12; Luke viii. 15; John vii. 17).

The remarkable circumstances under which these benefits were conferred upon him are too plainly and forcibly related in Acts x. to require much comment. While in prayer, at the ninth hour of the day, he beheld, in waking vision, an angel of God, who declared that 'his prayers and alms had come up for a memorial before God,' and directed him to send to Joppa for Peter, who was then abiding 'at the house of one Simon, a tanner.' Cornelius sent accordingly; and when his messenger had nearly reached that place, Peter was prepared by the symbolical revolutions of a noontide ecstasy, or trance, to understand that nothing which God had cleansed was to be regarded as common or unclean.

It is well remarked by Paley, that the circumstances of the two visions are such as to take them entirely out of the case of momentary miracles, or of such as may be accounted for by a false perception. 'The vision might be a dream; the message could not. Either communication taken separately might be a delusion; the concurrence of the two was impossible to happen without a supernatural cause.' (*Evidences*, prop. i. chap. 2). The inquiries of the messengers from Cornelius suggested to Peter the application of his vision, and he readily accompanied them to Joppa, attended by six Jewish brethren, and hesitated not to enter the house of one whom he, as a Jew, would regard as unclean. The Apostle waived the too fervent reverence of Cornelius, which, although usual in the East, was rendered by Romans only to their gods; and mutual explanations then took place between him and the centurion. After this the Apostle proceeded to address Cornelius and his assembled friends, and expressed his conviction that the Gentiles were

no longer to be called unclean, and stated the leading evidence and chief doctrines of the Gospel. While he was discoursing, the miraculous gifts of the Holy Spirit, contrary to the order hitherto observed of being preceded by baptism and imposition of hands, fell on his Gentile auditors. Of this fact Peter and his companions were convinced, for they heard them speak with tongues, foreign and before unknown to them, and which Peter and his companions knew to be such by the aid of their own miraculous gifts, and, under divine impulse, glorify God as the author of the Gospel. The Jewish brethren who accompanied Peter were astonished upon perceiving, by these indubitable indications, that the Holy Spirit was poured out upon the Gentiles, as upon themselves at the beginning (x. 45). Peter, already prepared by his vision for the event, and remembering that baptism was by the command of Jesus, associated with these miraculous endowments, said, 'Can any man forbid water that these should be baptized, who have received the Holy Ghost as well as we?' and yet, agreeably to the apostolic rule of committing the administration of baptism to others, and, considering that the consent of the Jewish brethren would be more explicit if they performed the duty, he ordered them to baptize Cornelius and his friends, his household, whose acceptance as members of the Christian church had been so abundantly testified.

CORNER-STONE. The symbolical title of 'chief corner stone' is applied to Christ in Eph. ii. 20, and 1 Pet. ii. 8, 16, which last passage is a quotation from Isa. xxviii. 16. There seems no valid reason for distinguishing this from the stone called 'the head of the corner' (Matt. xxi. 42), although some contend that the latter is the top-stone or coping. The 'corner-stone' was a large and massive stone so formed as, when placed at a corner, to bind together two outer walls of an edifice. This properly makes no part of the foundation, from which it is distinguished in Jer. li. 56; though, as the edifice rests thereon, it may be so called. Sometimes it denotes those massive slabs which, being placed towards the bottom of any wall, serve to bind the work together, as in Isa. xxviii. 16. Of these there were often two layers, without cement or mortar. This explanation will sufficiently indicate the sense in which the title of 'chief corner-stone' is applied to Christ.

COTTON. Cotton is well known to be a wool-like substance which envelopes the seeds, and is contained within the roundish-pointed capsule or fruit of the cotton-shrub. Every one also knows that cotton has, from the earliest ages, been characteristic of India. But in the present day cotton, by the aid of machinery, has been manufactured in this country on so extensive a scale, and sold at so cheap a rate, as to have driven the manufacture of India almost entirely out of the market. Still, however, until a very recent period, the calicoes and chintzes of India formed very extensive articles of commerce from that country to Europe. India possesses two very distinct species of plants from which cotton is obtained: 1. *K. Gossipium herbaceum* of botanists, of which there are several varieties, some of which have spread north, and also into the south of Europe, and into Africa. 2. *Gossi-*

pium arboreum, or cotton-tree, which is little cultivated on account of its small produce, but which yields a fine kind of cotton. This must not be confounded, as it often is, with the silk-cotton tree, or *Bombyx heptaphyllum*, which does not yield a cotton fit for spinning. Cotton is now chiefly cultivated in Central India, from whence it is carried to and exported from Broach. It is also largely cultivated in the districts of the Bombay Presidency, as also in that of Madras, but less in Bengal, except for home manufacture, which of course requires a large supply, where so large a population are all clothed in cotton. The supplies of cotton which we derive from America are obtained from two entirely distinct species—*Gossypium Barbadeuse*, of which different varieties yield the Sea Island, Upland, Georgian, and the New Orleans cottons; while *G. Peruvianum* yields the Brazil, Pernambuco, and other South American cottons. These species are original natives of America. It is probable that cotton was imported into Egypt and known to the Hebrews, but it is extremely difficult to prove the fact: the subject has been extensively investigated, but the point is still undetermined.

COUCH. [HEB.]

COVENANTS. Among other instances of anthropomorphic forms of speech employed in Scripture is the use of the term *covenant*, to designate the divine dealings with mankind, or with individuals of the race. In all such cases, the proper idea of a covenant or mutual contract between parties, each of which is bound to render certain benefits to the other, is obviously excluded, and one of a merely *analogical* nature substituted in its place. Where God is one of the parties, and man the other, in a covenant, all the benefits conferred must be on the part of the former, and all the obligations sustained on the part of the latter. Such a definition, therefore, of a divine covenant as would imply that both parties are under conditions to each other is obviously incorrect, and incompatible with the relative position of the parties. We should prefer defining God's covenant with man as a gracious engagement on the part of God to communicate certain unmerited favours to men, in connection with a particular constitution or system, through means of which these favours are to be enjoyed. Hence in Scripture the covenant of God is called his 'counsel,' his 'oath,' his 'promise' (Ps. lxxxix. 3, 4; cv. 8-11; Heb. vi. 13-20; Luke i. 68-75; Gal. iii. 15-18, &c.); and it is described as consisting wholly in the gracious bestowal of blessing on men (Isa. lix. 21; Jer. xxxi. 33, 34). Hence also the application of the term *covenant* to designate such fixed arrangements, or laws of nature, as the regular succession of day and night (Jer. xxxiii. 20), and such religious institutions as the Sabbath (Exod. xxxi. 16); circumcision (Gen. xvii. 9, 10); the Levitical institute (Lev. xxvi. 15); and in general any precept or ordinance of God (Jer. xxxiv. 13, 14); all such appointments forming part of that system or arrangement in connection with which the blessings of God's grace were to be enjoyed.

The divine covenants were ratified with the sacrifice of a peculiar victim, the design of which was to show that without an atonement there could be no communication of, blessing from

God to man. Thus when God made a covenant with Abraham certain victims were slain and divided into halves, between which a smoking furnace and a burning lamp, the symbols of the divine presence, passed, to indicate the ratification of the promises conveyed in that covenant to Abraham; and here it is deserving of notice, as illustrating the definition of a divine covenant above given, that the divine glory *alone* passed between the pieces: whereas had the covenant been one of mutual stipulation, Abraham also would have performed the same ceremony (Gen. xv. 1-18). In like manner, the Levitical covenant was ratified by sacrifice (Exod. xxiv. 6-8); and the Apostle expressly affirms, on this ground, the necessity of the death of Christ, as the mediator of the new covenant; declaring that where a covenant is, there also of necessity must be the death of the appointed victim (Heb. ix. 16).

Of the divine covenants mentioned in Scripture the first place is due to that which is emphatically styled by Jehovah 'My covenant.' This is God's gracious engagement to confer salvation and eternal glory on all who come to him through Jesus Christ. It is called sometimes 'the everlasting covenant' (Isa. lv. 3; Heb. xiii. 20), to distinguish it from those more temporary arrangements which were confined to particular individuals or classes; and the *second*, or *new*, or *better covenant*, to distinguish it from the Levitical covenant, which was *first* in order of time, because first ratified by sacrifice, and became *old*, and was shown to be *inferior*, because on the appearance of the Christian dispensation it was superseded, and passed away (Jer. xxxi. 31; Gal. iv. 24; Heb. vii. 22; viii. 6-13; ix. 15-23; xii. 24). Though this covenant was not, strictly speaking, ratified before the death of Christ, the great sacrificial victim (Heb. xiii. 20), yet it was revealed to the saints who lived before his advent, and who enjoyed salvation through the retrospective power of his death (Rom. iii. 25; Heb. ix. 15). To the more highly favoured of these, God gave specific assurances of his gracious purpose, and on such occasions he was said to establish or make his covenant with them. Thus he established his covenant with Noah (Gen. ix. 8, 9); with Abraham (Gen. xvii. 4, 5); and with David (Ps. lxxxix. 3, 4). These were not distinct covenants, so much as renewals of the promises of the everlasting covenant, coupled with certain temporal favours, as types and pledges of the fulfilment of these promises.

The old or Sinaitic covenant was that given by God to the Israelites through Moses. It respected especially the inheritance of the land of Canaan, and the temporal blessings therewith connected; but it stood related to the new covenant, as embodying a typical representation of those great truths and blessings which the Christian dispensation unfolds and conveys.

In the system of a certain class of theologians great importance is attached to what they have technically called 'the covenant of works.' By this they intend the constitution established by God with Adam, during the period of his innocence. So far as this phraseology is not understood to imply that man, even in his sinless state, was competent to find Jehovah by any conditions, it cannot be objected to. It seems also to have the sanction of one passage of Scrip-

ture, viz. Hos. vi. 7, which almost all the best interpreters agree in rendering thus: 'But they like Adam have transgressed the covenant.'

Theologians have also spoken of 'the covenant of redemption,' by which they mean an engagement entered into between God the Father and God the Son from all eternity, whereby the former secured to the latter a certain number of ransomed sinners, as his church or elect body, and the latter engaged to become their surety and substitute. By many the propriety of this doctrine has been doubted; but the references to it in Scripture are of such a kind that it seems unreasonable to refuse to admit it. With it stand connected the subjects of election, predestination, the special love of Christ to his people, and the certain salvation of all that the Father hath given him.

Sometimes a mere human contract is called God's covenant, in the sense of involving an appeal to the Almighty, who, as the Judge of the whole earth, will hold both parties bound to fulfil their engagement. Compare 1 Sam. xx. 8; Jer. xxxiv. 18, 19; Ezek. xvii. 18, 19.

CRANE (Isa. xxxviii. 14; Jer. viii. 7). The correctness of the translation in these passages has however been called in question, for if the 'crane' of Europe had been meant by either designation, the clamorous habits of the species could not have been expressed as 'chattering'; and it is most probable that the striking characteristics of that bird, which are so elegantly and forcibly displayed in Hesiod and Aristophanes, would have supplied the lofty diction of prophetic inspiration with associations of a character still more exalted. It is supposed, therefore, that the 'Ardea virgo' of Linnæ, the 'Grus virgo' of later writers, and 'Anthropoides virgo'

132. [Numidian Crane: Grus Virgo.]

of some, is the bird really meant, though not coming from the north, but from Central Africa, down the Nile, and in the spring arriving in Palestine, while troops of them proceed to Asia Minor, and some as far north as the Caspian. They are frequently found portrayed on Egyptian monuments, and Hasselquist, who saw them in the Nile, afterwards shot one near Smyrna: they visit the swamp above that city, and the lake of Tiberias, and depart in the fall, but do not utter the *clangor* of the crane, nor adopt its light in two columns, forming an acute angle, but better to cleave the air. This bird is not more than three feet in length; it is of a beautiful bluish grey, with the cheeks, throat, breast, and tips of the long hinder feathers and quills black, and a tuft of delicate white plumes behind

each eye. It has a peculiar dancing walk, which gave rise to its French denomination of 'demoiselle.'

CRES'CENS, an assistant of St. Paul, and generally supposed to have been one of the seventy disciples of Christ. It is alleged in the *Apostolical Constitutions* (vii. 46), and by the fathers of the church, that he preached the Gospel in Galatia, a fact probably deduced conjecturally from the only text (2 Tim. iv. 10) in which his name occurs.

CRETE, one of the largest islands in the Mediterranean, now called Candia, and by the Turks, Kirid. It is 160 miles long, but of very unequal width—varying from thirty-five to six miles. It is situated at the entrance of the Archipelago, having the coast of the Morea to the south-west, that of Asia Minor to the north-east, and that of Libya to the south. Great antiquity was affected by the inhabitants, and it has been supposed by some that the island was originally peopled from Egypt; but this is founded on the conclusion that Crete was the Caphtor of Deut. ii. 23, &c., and the country of the Philistines, which seems more than doubtful. Surrounded on all sides by the sea, the Cretans were excellent sailors, and their vessels visited all the neighbouring coasts. The island was highly prosperous and full of people in very ancient times. The chief glory of the island, however, lay in its having produced the legislator Minos, whose institutions had such important influence in softening the manners of a barbarous age, not in Crete only, but also in Greece, where these institutions were imitated. The natives were celebrated as archers. Their character was not of the most favourable description; the Cretan or Kretans being, in fact, one of the three K's against whose unfaithfulness the Greek proverb was intended as a caution—Kappadokia, Krete, and Kilikia. In short, the ancient notices of their character fully agree with the quotation which St. Paul produces from 'one of their own poets,' in his Epistle to Titus (i. 12), who had been left in charge of the Christian church in the island:—'The Cretans are always liars (eternal liars), evil beasts (literally "brutes"), slow bellies' (gorbellies, bellies which take long to fill).

Crete is named in 1 Macc. x. 67. But it derives its strongest Scriptural interest from the circumstances connected with St. Paul's voyage to Italy. The vessel in which he sailed, being forced out of her course by contrary winds, was driven round the island, instead of keeping the direct course to the north of it. In doing this, the ship first made the promontory of Salmone on the eastern side of the island, which they passed with difficulty, and took shelter at a place called Fair-Havens, near to which was the city Lasea. But after spending some time at this place, and not finding it, as they supposed, sufficiently secure to winter in, they resolved, contrary to the advice of St. Paul (the season being far advanced), to make for Phœnice, a more commodious harbour on the western part of the island; in attempting which they were driven far out of their course by a furious east wind called Euroclydon, and wrecked on the island of Melita (Acts xxvii.).

CRIMSON. [PURPLE.]

CRISPUS, chief of the Jewish Synagogue at

Corinth (Acts xviii. 8), converted by St. Paul (1 Cor. i. 14). According to tradition he was afterwards bishop of Ægina.

CROCODILE. We shall in this place confine ourselves to some notice of crocodiles strictly so called, and shall point out some leading characters in the animal coinciding with allusions to it in the Scriptures, which could not be properly noticed elsewhere.

133.

The crocodiles which we have to notice at present consist of three varieties, or perhaps species, all natives of the Nile, distinguishable by the different arrangement of the scutæ or bony studs on the neck, and the number of rows of the same processes along the back. Their general lizard form is too well known to need particular description; but it may be remarked that of the whole family of crocodiles, comprehending the sharp-beaked gavials of India, the alligators of the west, and the crocodiles properly so called, the last are supplied with the most vigorous instruments for swimming, both from the strength and vertical breadth of their tails, and from the fingers of their paws having deeper webs. Although all have from thirty to forty teeth in each jaw, shaped like spikes, without breadth so as to cut, or surface so as to admit of grinding, the true crocodile alone has one or more teeth on each side in both jaws, exerted, that is, not closing within but outside the jaw. They have no external ear beyond a follicle of skin, and the eyes have a position above the plane of the head, the pupils being contractile, like those of a cat, and in some having a luminous greenish tinge, which may have suggested the allusion to 'the lids of the morning' (Job xii. 18). The upper jaw is not movable, but, as well as the forehead, is extremely dense and bony; the rest of the upper surface being covered with several rows of bosses, or plated ridges, which on the tail are at last reduced from two to one, each scale having a high horny crest, which acts as part of a great fin. Although destitute of a real voice, crocodiles when angry produce a snorting sound, something like a deep growl; and occasionally they open the mouth very wide, remain for a time thus exposed facing the breeze, and, closing the jaws with a sudden snap, cause a report like the fall of a trap-door. The gullet of the crocodile is very wide, the tongue being completely tied to the lower jaw; and beneath it are

glands exuding a musky substance. On land the crocodile, next to the gavia, is the most active, and in the water it is also the species that most readily frequents the open sea. Of the immense number of genera which we have seen or examined, none reached to 25 feet in length, and we believe the specimen in the vaults of the British Museum to be one of the largest. Sheep are observed to be unmolested by these animals; but where they abound, no pigs can be kept, perhaps from their frequenting the muddy shores; for we have known only one instance of crocodiles being encountered in woods not immediately close to the water's side; usually they bask on sandy islands. As their teeth are long, but not fitted for cutting, they seize their prey, which they cannot masticate, and swallow it nearly entire, or bury it beneath the waves to macerate. Having very small excretory organs, their digestion requires, and accordingly they are found to possess, an immense apparatus. They are oviparous, burying their eggs in the sand; and the female remains in the vicinity to dig them out on the day the young have broken the shell. Crocodiles are caught with hooks, and they seldom succeed in cutting the rope when properly prepared. Though a ball fired point blank will penetrate between the scales which cover the body, they may be regarded as furnishing an all but unfailling protection against such injuries and wounds as occasion death to other animals.

That crocodiles and alligators take the sea, and are found on islands many leagues distant from other land, we have ourselves witnessed; and the fact is particularly notorious at the Grand Caymanas in the sea of Mexico, which is almost destitute of fresh water. It is indeed owing to this circumstance that the same species may frequent all the rivers of a great extent of coast, as is the case with some found in Africa, whence they spread to India and the Malayan islands.

CROSS. In its simplest form, consisting of two pieces of wood, one standing erect, the other crossing it at right angles, the cross was known at an early age in the history of the world. Its use as an instrument of punishment was probably suggested by the shape so often taken by branches of trees, which seem to have been the first crosses that were employed. Trees are known to have been used as crosses, and to every kind of hanging which bore a resemblance to crucifixion, such as that of Prometheus, Andromeda, &c., the name was commonly applied. Among the Scythians, Persians, Carthaginians, Greeks, Romans, and the ancient Germans, traces are found of the cross as an instrument of punishment. The sign of the cross is found as a holy symbol among several ancient nations. Among the Indians and Egyptians the cross often appears in their ceremonies, sometimes in the shape of the letter T, at others in this shape $\perp$. At Susa, Ker Porter saw a stone cut with hieroglyphics and cuneiform inscriptions, on which in one corner was a figure of a cross, thus $\perp$. The cross, he says, is generally understood to be symbolical of the divinity or eternal life; and certainly a cross was to be seen in the temple of Serapis as the Egyptian emblem of the future life. Porter also states that the Egyptian priests urged its being found on the walls of their temple of Serapis, as an

argument with the victorious army of Theodosius to save it from destruction.

According to Lipsius, there were in general two kinds of crosses:—1, the simple cross; 2, the compound cross. The first consisted of a stake on which the criminal was fastened or by which he was impaled. For the first kind of punishment a tree or a specially prepared stake was used, on which the criminal was bound, and either left to perish, or immediately put to death. For *impaling* a long and sharpened piece of wood (*pale*) was employed, on which the criminal was put as on a spit. This cruel mode of execution was formerly very customary in Russia, China, Turkey, and other countries, and is not yet universally abolished by law.

Of the compound cross there were three sorts: 1, one shaped like the letter X, also called Andrew's cross, because tradition reports that on a cross of this kind the Apostle Andrew suffered death. 2. Another sort was formed by putting a cross piece of wood on a perpendicular one, so that no part of the latter may stand above the former. This form is found in the figure T. 3. The third sort is described as 'a cross in which the longer piece of wood or pale stands above the shorter piece which runs across it near the top.' It is distinguished from the preceding by the part of the longer beam which is above the shorter or transverse, thus $\frac{+}{-}$. This form is found in paintings more frequently than any other, and on a cross of this kind our Saviour is believed to have suffered death.

According to the statement of certain ecclesiastical historians, the cross on which our Lord was crucified was found in the year 326 by the Empress Helena, mother of Constantine the Great. Having built a church over the sacred spot where it was discovered, Helena deposited within it the chief part of the real cross. The remainder she conveyed to Constantinople, a part of which Constantine inserted in the head of a statue of himself, and the other part was sent to Rome, and placed in the church of Sta. Croce in Gerusalemme, which was built expressly to receive the precious relic. When subsequently a festival to commemorate the discovery had been established, the Bishop of Jerusalem, on Easter Sunday, exhibited to the grateful eyes of eager pilgrims the object to see which they had travelled so far and endured so much. Those who were persons of substance were further gratified by obtaining, at their full price, small pieces of the cross set in gold and gems; and that wonder might not pass into incredulity, the proper authorities gave the world an assurance that the holy wood possessed the power of self-multiplication, and, notwithstanding the innumerable pieces which had been taken from it for the pleasure and service of the faithful, remained intact and entire as at the first.

The capture of Jerusalem by the Persians, A.D. 614, placed the remains of the cross in the hands of Chosroes II., who mockingly conveyed them to his capital. Fourteen years afterwards, Heraclius recovered them, and had them carried first to Constantinople, and then to Jerusalem, in such pomp, that on his arrival before the latter city, he found the gate barred, and entrance forbidden. Instructed as to the cause of this hin-

derance, the Emperor laid aside the trappings of his greatness, and, barefooted, bore on his own shoulders the sacred relic up to the gate, which then opened of itself, and allowed him to enter, and thus place his charge beneath the dome of the sepulchre.

From this time no more is heard of the true cross, which may have been destroyed by the Saracens on their conquest of Jerusalem, A.D. 637.

CROWNS are often mentioned in Scripture, and in such a manner as in most cases to indicate the circumstances under which, and the persons by whom, they were worn; for crowns were less exclusively worn by sovereigns than among modern nations. Perhaps it would be better to say that the term 'crowns' was applied to other ornaments for the head than those exclusively worn by royal personages, and to which modern usage would give such distinctive names as coronet, band, mitre, tiara, garland, &c.

The royal crown originated in the diadem, which was a simple fillet fastened round the head, and tied behind. This obviously took its rise among a people who wore long hair, and used a band to prevent it from falling over the face. The idea occurred of distinguishing kings by a fillet of different colour from that usually worn; and being thus established as a regal distinction, it continued to be used as such even among nations who did not wear the hair long, or was employed to confine the head-dress. We some-

134. [Ancient Asiatic Crowns.]

times see this diadem as a simple fillet, about two inches broad, fastened round the otherwise bare head: we then find it as a band of gold (No. 134, figs. 2, 5). In this shape it sometimes forms the basis of raised ornamental work (figs. 6, 7, 8, 10), in which case it becomes what we should consider a crown; and indeed the original diadem may be traced in most ancient crowns. Fig. 10 is curious, not only from the simplicity of its form, but on account of the metallic loop to be passed under the chin—a mode of securing the crown probably adopted in war or in the chase. Then we find the diadem surrounding the head-dress or cap (figs. 3, 9, 13), and when this also is ornamented, the diadem may be con-

sidered as having become a crown. The word *nezer* is supposed to denote a diadem. It is applied to the inscribed plate of gold in front of the high-priest's mitre, which was tied behind by a ribbon (Exod. xxix. 6; xxxix. 30), and which was doubtless something of the same kind that we see in figs. 8, 11. This word is also employed to denote the diadem which Saul wore in battle, and which was brought to David (2 Sam. i. 10), and also that which was used at the coronation of the young Joash (2 Kings xi. 12); and, as another word is applied elsewhere to the crown used in this ceremonial, the probability is that the Hebrew kings wore sometimes a diadem and sometimes a crown, and that the diadem only was accessible to the high-priest, by whom Joash was crowned, the crown itself being most likely in the possession of Athaliah. As Psalm lxxxix. was certainly composed by David, the regal use of the diadem is further indicated in verse 39.

The more general word for a crown is *atarah*; and it is applied to crowns and head ornaments of different sorts, including those used by the kings. When applied to their crowns, it appears to denote the state crown as distinguished from the diadem. This, the Rabbins allege, was of gold set with jewels; such was the crown which David took from the king of the Amorites (2 Sam. xii. 30), and afterwards wore himself, as did probably his successors. Of its shape it is impossible to form any notion, unless by reference to the examples of ancient crowns contained in the preceding cut. These figures, however, being taken mostly from coins, are not of that very remote antiquity which we should desire to illustrate matters pertaining to the period of the Hebrew monarchies. In Egypt and Persia there are sculptures of earlier date, representing royal crowns in the shape of a distinguishing tiara, cap, or helmet, of metal, and of cloth, or partly cloth and partly metal. Such are the Egyptian

135. [Ancient Egyptian Crowns.]

crowns as represented in the above engraving (No. 135). Fig. 1 is the crown of Lower, and fig. 2 that of Upper Egypt; and when both kingdoms were under one sovereign, the two crowns were united, as in fig. 3. Such union of the crowns of different countries upon one head is matter of historical record. Thus when Ptolemy Philometer entered Antioch as a conqueror, he placed on his head the crowns of Egypt and of Asia. This would, in fact, form three crowns, as his previous one was doubtless the double crown of Upper and Lower Egypt. The diadem of

two or three fillets (figs. 3, 4, No. 134) may have been similarly significant of dominion over two or three countries. There are allusions to this custom in Scripture (Rev. xii. 3; xix. 12). These Egyptian tiaras were worn in war, and on occasions of state; but on ordinary occasions a fillet or diadem was used, affording corroboration of a previous remark.

136. [Modern Asiatic Crowns.]

It is important to observe that the mitre of the high-priest, which is also called a crown (Exod. xxxix. 30), was of similar construction, if not shape, with the addition of the golden fillet or diadem. Similar also in construction and material, though not in form, was the ancient Persian crown. From the descriptions given of it, this seems to have been a somewhat conical cap, surrounded by a wreath or fold; and this would suggest a resemblance to fig. 12, No. 134; which is in fact copied from a Parthian or later Persian coin. This one is worthy of very particular attention, because it forms a connecting link between the ancient and modern Oriental crowns the latter consisting either of a cap, with a fold or turban, variously enriched with aigrettes, as this is; or of a stiff cap of cloth, studded with precious stones. It must often occur to the student of Biblical antiquities that the modern usages of the East have more resemblance to the most ancient, than have those which prevailed during that intermediate or classical period in which its peculiar manners and institutions were subject to much extraneous influence from the domination of the Greeks and Romans. So, in the present instance, we are strongly of opinion that such head ties and caps as those represented in Nos. 135 and 136, more correctly represent the regal 'crowns' of the Old Testament, than those figured in No. 134 (with the

exception of fig. 12, and the simple diadems); which however may be taken to represent the style of the crowns which prevailed in and before the time of the New Testament.

Crowns were so often used symbolically to express honour and power, that it is not always safe to infer national usages from the passages in which they occur. Hence we would scarcely conclude from Ezek. xxiii. 42, that crowns were worn by Jewish females, although that they were some ornament which might be so called is probable from other sources. Mr. Lane (*Arabian Nights*, i. 424) mentions that, until about two centuries ago, a kind of crown was worn by Arabian females of wealth and distinction. It was generally a circle of jewelled gold (the lower edge of which was straight, and the upper fancifully heightened to a mere point), surmounting the lower part of a dome-shaped cap, with a jewel or some other ornament at the summit.

It is certain that 'crowns' of this or some similar kind were worn at marriages (Cant. iii. 11; Isa. lxi. 10); and it would appear that at feasts and public festivals 'crowns of rejoicing' were customary. These were probably garlands (Wisd. ii. 8; iv. 2; Ecclus. i. 11). The 'crowns' or garlands which were given to the victors in the public games are more than once alluded to in the Epistles (1 Cor. ix. 25; 2 Tim. ii. 5; iv. 8; 1 Pet. v. 4).

CROWN OF THORNS. [THORNS.]

CRUCIFIXION. Crucifixion was a most cruel and disgraceful punishment; the terms applied to it by ancient writers are, 'the most cruel and disgraceful,' 'the worst possible punishment,' 'the worst punishment in the world.' It was the punishment chiefly of slaves; accordingly the word 'cross-bearer' was a term of reproach for slaves, and the punishment is termed 'a slave's punishment.' Free-born persons also suffered crucifixion, but only those of low condition and provincials. Citizens could not be crucified. This punishment was reserved for the greatest crimes, as robbery, piracy, assassination, perjury, sedition, treason, and (in the case of soldiers) desertion. Its origin is ancient. In Thucydides we read of Inarus, an African king, who was crucified by the Egyptians. The similar fate of Polycrates, who suffered under the Persians, is detailed by Herodotus, who adds, in the same book, that no less than 300 persons were condemned to the cross by Darius, after his successful siege of Babylon. Valerius Maximus makes crucifixion the common military punishment of the Carthaginians. That the Greeks adopted it is plain from the cruel executions which Alexander ordered after the capture of Tyre, when 2000 captives were nailed to crosses along the sea-shore. With the Romans it was used under their early monarchical government, and was the death to which Horatius was adjudged for the stern and savage murder of his sister, where the terms employed show that the punishment was not at that time limited to any rank or condition. It appears also from the passage that scourging then preceded crucifixion, as undoubtedly was customary in later times. The cruel to which Jesus was fastened during this cruel infliction is stated by Jerome to have existed in his time in the portico of the holy sepulchre, and to have retained marks of his

blood. The Jews received the punishment of crucifixion from the Romans. Though it has been a matter of debate, yet it appears clear that crucifixion, properly so called, was not originally a Hebrew punishment. The condemned, after having been scourged, had to bear their cross, or at least the transverse beam, to the place of execution, which was generally in some frequented place without the city. The cross itself, or the upright beam, was fixed in the ground. Arrived at the spot the delinquent was supplied with an intoxicating drink, made of myrrh and other bitter herbs, and having been stripped of his clothing, was raised and affixed to the cross, by nails driven into his hands, and more rarely into his feet; sometimes the feet were fastened by one nail driven through both. The feet were occasionally bound to the cross by cords, and Xenophon asserts that it was usual among the Egyptians to bind in this manner not only the feet but the hands. A small tablet, declaring the crime, was placed on the top of the cross. The body of the crucified person rested on a sort of seat. The criminal died under the most frightful sufferings—so great that even amid the raging passions of war, pity was sometimes excited. Sometimes the suffering was shortened and abated by breaking the legs of the criminal. After death, among the heathens, the bodies commonly remained on the cross till they wasted away, or were devoured by birds of prey. A military guard was set near the cross, to prevent the corpse from being taken away for burial; but among the Jews the dead body was customarily taken down and buried. The execution took place at the hands of the hangman, attended by a band of soldiers, and in Rome, under the supervision of the *Triumviri Capiteles*. The accounts given in the Gospels of the execution of Jesus Christ are in entire agreement with the customs and practices of the Romans in this particular. The punishment continued in the Roman empire till the time of Constantine, when it was abolished through the influence of the Christian religion. Examples of it are found in the early part of the emperor's reign, but the reverence which, at a later period, he was led to feel for the cross, induced him to put an end to the inhuman practice.

Death by crucifixion (physically considered) is to be attributed to the sympathetic fever which is excited by the wounds, and aggravated by exposure to the weather, privation of water, and the painfully constrained position of the body. Traumatic fever corresponds, in intensity and in character, to the local inflammation of the wound. In the first stage, while the inflammation of the wound is characterized by heat, swelling, and great pain, the fever is highly inflammatory; and the sufferer complains of heat, throbbing headache, intense thirst, restlessness, and anxiety. As soon as suppuration sets in, the fever somewhat abates, and gradually ceases as suppuration diminishes and the stage of cicatrization approaches. But if the wound be prevented from healing, and suppuration continue, the fever assumes a hectic character, and will sooner or later exhaust the powers of life. When, however, the inflammation of the wound is so intense as to produce mortification, nervous depression is the immediate consequence; and

if the cause of this excessive inflammation of the wound still continues, as is the case in crucifixion, the sufferer rapidly sinks. He is no longer sensible of pain, but his anxiety and sense of prostration are excessive; hiccup supervenes, his skin is moistened with a cold clammy sweat, and death ensues. It is in this manner that death on the cross must have taken place, in an ordinarily healthy constitution. The wounds in themselves were not fatal; but, as long as the nails remained in them, the inflammation must have increased in intensity until it produced gangrene. De la Condamine witnessed the crucifixion of two women of those fanatic Jansenists called *Convulsionnaires*. One of them, who had been crucified thrice before, remained on the cross for three hours. They suffered most pain from the operation of extracting the nails; and it was not until then that they lost more than a few drops of blood from their wounds. After they were taken down, they seemed to suffer little, and speedily recovered. The probabilities of recovery after crucifixion would of course depend on the degree of constitutional irritation that had been already excited. Josephus relates that of three of his friends, for whom he had obtained a release from the cross, only one survived. The period at which death occurred was very variable, as it depended on the constitution of the sufferer, as well as on the degree of exposure and the state of the weather. It may, however, be asserted that death would not take place until the local inflammation had run its course; and though this process may be much hastened by fatigue and the alternate exposure to the rays of the sun and the cold night air, it is not completed before forty-eight hours, under ordinary circumstances, and in healthy constitutions; so that we may consider thirty-six hours to be the earliest period at which crucifixion would occasion death in a healthy adult. Many of the wounded at Waterloo were brought into the hospitals after having lain three days on the field, and even then sometimes recovered from severe operations. It cannot be objected that the heat of an Eastern climate may not have been duly considered in the above estimate; for many cases are recorded of persons having survived a much longer time than is here mentioned, even as long as eight or nine days. Eusebius says that many of the martyrs in Egypt, who were crucified with their heads downwards, perished by hunger. This assertion, however, must not be misunderstood. It was very natural to suppose that hunger was the cause of death, when it was known that no food had been taken, and when, as must have happened in lingering cases of crucifixion, the body was seen to be emaciated. But it has been shown above that the nails in the hands and feet must inevitably have given rise to such a degree of inflammation as to produce mortification, and ultimately death; and it is equally certain that food would not, under such circumstances, have contributed to support life. Moreover, it may be added that after the first few hours, as soon as fever had been fully excited, the sufferer would lose all desire for food. The want of water was a much more important privation. It must have caused the sufferer inexpressible anguish, and have contributed in no slight degree to hasten death. As-Sujuti,

a celebrated Arabic writer, gives an interesting account of a young Turk who was crucified at Damascus A.D. 1247. It is particularly mentioned that his hands and feet were nailed, and even his arms (but not as if it was in any way remarkable). He complained of intense thirst on the first day, and his sufferings were greatly increased by his continually seeing before him the waters of the Baradâ, on the banks of which he was crucified. He survived two days, from the noon of Friday to the noon of Sunday.

CRUSE (1 Sam. xxvi. 11; 1 Kings xiv. 3; 2 Kings ii. 20). This now obsolete English word denotes a small vessel for holding water or other liquids. Such are noticed under BOTTLE, DISH, PITCHER.

CRYSTAL. There seems to be no doubt that crystal is intended by the Greek word in Rev. xxi. 11, as indeed the phrase of comparison 'clear as crystal' would seem naturally to suggest. In Ezek. i. 22 the Hebrew word *kerach*, which literally denotes ice, is employed with a similar signification. This is the more apparent when we recollect that crystal was anciently held to be only pure water, congealed by great length of time into ice harder than the common, and hence the Greek word for it, in its more proper signification, also signifies ice. From this it necessarily followed that crystal could only be produced in the regions of perpetual ice; and this was accordingly the ancient belief; but we now know that it is found in the warmest regions. Theophrastus (54) reckons crystal among the pellucid stones used for engraved seals. In common parlance we apply the term *crystal* (as the ancients apparently did) to a glass-like transparent stone, commonly of a hexagonal form, which, from being found in rocks, is called by mineralogists rock-crystal. It is a stone of the flint family, the most refined kind of quartz.

CUBIT is a word derived immediately from the Latin *cubitus*, the lower arm. The length of the cubit has varied in different nations, and at different times. Derived as the measure is from a part of the human body, and as the human stature has been of very dissimilar length, the cubit must of necessity have been various. That the cubit among the Hebrews was derived as a measure from the human body is clear from Deut. iii. 11—'after the cubit of a man.' But it is difficult to determine whether this cubit was understood as extending to the wrist or the end of the third finger. As, however, the latter seems most natural, since men, when ignorant of anatomy, and seeking in their own frames standards of measure, were likely to take both the entire foot and the entire fore-arm, the probability is that the longer was the original cubit, namely, the length from the elbow to the extremity of the longest finger.

The hand-breadth is found as a measure in 1 Kings vii. 26, comp. Jer. lii. 21. In the latter passage the finger-breadth is another measure. The span also occurs Exod. xxviii. 16. So that, it appears, measures of length were, for the most part, borrowed by the Hebrews from members of the human body. Still no absolute and invariable standard presents itself. If the question, What is a hand or a finger-breadth? be asked, the answer can be only an approximation to fact. If, how-

ever, the palm or hand-breadth is taken at 3½ inches, then the cubit will amount to 21 inches.

In addition to the common cubit, the Egyptians had a longer one of 6 palms 4 inches. The Hebrews also have been thought to have had a longer cubit; for, in Ezek. xl. 5, we read of a cubit which seems to be an ordinary 'cubit and an hand-breadth'; see also Ezek. xliii. 13, where it is expressly said 'the cubit is a cubit and an hand-breadth.' The prophet has been supposed to refer here to the then current Babylonian cubit—a measure which it is thought the Jews borrowed during the period of their captivity. In the New Testament our Lord characteristically employs the term cubit (Matt. xxvii. 6; Luke xii. 25) for the enforcement of a moral and spiritual lesson. The term also occurs in John xxi. 8, and in Rev. xxi. 17. In Lev. xix. 35 justice in measures, as well as in weights, is strictly enjoined.

CUCKOW occurs only in Lev. xi. 16, among birds of prey not clearly identified, but declared to be unclean. The accuracy of the translation has been called in question, but great obscurity hangs over the subject, and in the present state of our knowledge it is impossible to ascertain what kind of bird was really meant.

CUCUMBER first occurs in Num. xi. 5, in the verse where the Israelites, when in the desert, express their longings for the melons and the cucumbers of Egypt. All travellers in the East notice the extensive cultivation and consumption of cucumbers and other herbs of the same tribe, especially where there is any moisture of soil, or the possibility of irrigation. Thus even in the driest parts, the neighbourhood of a well is often occupied by a field of cucurbitaceous plants, generally with a man or boy set to guard it from plunder, perched up on a temporary scaffolding, with a slight protection from the sun, where he may himself be safe from the attacks of the more powerful wild animals. That such plants appear to have been similarly cultivated among the Hebrews is evident from Isa. i. 8, 'The daughter of Zion is left like a cottage in a vineyard, like a lodge in a garden of cucumbers'; as well as from Baruch vi. 70, 'As a scarecrow in a garden of cucumbers keepeth nothing, so are their gods of wood.'

CUMMIN, or *Каммон*, is an umbelliferous plant, mentioned both in the Old and New Testaments, and which, like the dill and the coriander, continues to be cultivated in modern, as it was in ancient times, in Eastern countries. These are similar to, and used for many of the same purposes as the anise and caraway, which supply their place, and are more common in Europe. All these plants produce fruits, commonly called seeds, which abound in essential oil of a more or less grateful flavour, and warm stimulating nature; hence they were employed in ancient as in modern times, both as condiments and as medicines.

Cummin is first mentioned in Isaiah (xxviii. 25): 'When he (the ploughman) hath made plain the face thereof, doth he not cast abroad the fitches, and scatter the cummin?' showing that it was extensively cultivated, as it is in the present day, in Eastern countries, as far even as India. In the south of Europe it is also cultivated to some extent. England is chiefly supplied from Malta

and Sicily; 53 cwt. having been imported in the year 1839 from these islands. In the above chapter of Isaiah (ver. 27) cummin is again mentioned: 'For the fitches are not threshed with a threshing instrument, neither is a cart-wheel turned about upon the cummin; but the fitches are beaten out with a staff, and the cummin with a rod.' This is most applicable to the fruit of the common cummin, which, when ripe, may be separated from the stalk with the slightest stroke, and would be completely destroyed by the turning round of a wheel, which, bruising the seed, would press out the oil on which its virtues depend.

137.

In the New Testament cummin is mentioned in Matt. xxiii. 23, where our Saviour denounces the scribes and Pharisees, who paid their 'tithe of mint, and anise, and cummin,' but neglected the weightier matters of the law.

CUSH, the eldest son of Ham (Gen. x. 6; 1 Chron. i. 8), from whom seems to have been derived the name of the land of Cush.

The locality of the land of Cush is a question upon which eminent authorities have been divided; for while Bochart maintained that it was exclusively in Arabia, Gesenius held with no less pertinacity that it is to be sought for nowhere but in Africa. Others again, such as Michaelis and Rosenmüller, have supposed that the name Cush was applied to tracts of country both in Arabia and Africa—a circumstance which would easily be accounted for, on the very probable supposition that the descendants of the primitive Cushite tribes, who had settled in the former country, emigrated across the Red Sea to the latter region of the earth, carrying with them the name of Cush, their remote progenitor.

The existence of an African Cush cannot reasonably be questioned, though the term is employed in Scripture with great latitude, sometimes denoting an extensive but undefined country (Ethiopia), and at other times one particular kingdom (Meroë). It is expressly described by Ezekiel as lying to the south of Egypt beyond Syene (xxix. 10; comp. xxx. 4-6). Hence we find Mizraim and Cush (i. e. Egypt and Ethiopia) so often classed together by the prophets, e. g. Ps. lxxviii. 31; Isa. xi. 11; xx. 4; xliii. 3; xlv. 14;

Nahum iii. 9. 'The inhabitants are elsewhere spoken of in connection with the Libin and Sukkiim (2 Chron. xii. 3; xvi. 8; Jer. xlvii. 7; Dan. xi. 43), supposed to be the Libyans and Ethiopic Troglodytes, and certainly nations of Africa, for they belonged to the vast army with which Shishak, king of Egypt, 'came out' of that country, against Rehoboam, king of Judah. In these, and indeed in most other passages where 'Cush' occurs, Arabia is not to be thought of; the Ethiopia of Africa is beyond all doubt exclusively intended, and to the article ETHIOPIA we refer the reader for the Scriptural notices regarding it.

Though there is a great lack of evidence to show that the name of Cush was ever applied to any part of Arabia, there seems no reason to doubt that a portion of the Cushite race did early settle there. By referring to the relative geographical positions of the south-west coast of Arabia and the east coast of Africa, it will be seen that nothing separates them but the Red Sea, and it is not unlikely that while a part of the Cushite population immigrated to Africa, others remained behind, and were occasionally called by the same name. Thus in 2 Chron. xxi. 16, among those who were stirred up against the Hebrews are mentioned the Philistines, and 'the Arabs that were near the Cushites,' and the expression 'near' in this connection can scarcely apply to any but dwellers in the Arabian peninsula.

CUTH'AH, a district in Asia, whence Shameneser transplanted certain colonists into the land of Israel, which he had desolated (2 Kings xvii. 24-30). From the intermixture of these colonists with the remaining natives sprung the Samaritans. The situation of the Cuthah from which these colonists came is altogether unknown. Josephus places it in central Persia, and finds there a river of the same name. Rosenmüller and others incline to seek it in the Arabian Irak, where Abulfeda and other Arabic and Persian writers place a town of this name, in the tract near the Nahr-Malca, or royal canal, which connected the Euphrates and Tigris to the south of the present Bagdad. Winer seems to prefer the conjecture of Stephen Morin and Le Clerc, which identifies the Cuthites with the *Cossai* in Susiana. All these conjectures refer essentially to the same quarter, and any of them is preferable to the one suggested by Michaelis, that the Cuthites were Phœnicians from the neighbourhood of Sidon.

CUTTINGS IN THE FLESH. Amongst the prohibitory laws which God gave the Israelites there was one that expressly forbade the practice embraced in those words, viz. 'Ye shall not make any cuttings in your flesh for the dead' (Lev. xix. 28). It is evident from this law that such a species of *self-inflicted* torture obtained amongst the nations of Canaan; and it was, doubtless, to guard His people against the adoption of so barbarous a habit, in its idolatrous form, that God led Moses to *reiterate* the prohibition: 'They shall not make baldness upon their heads, neither shall they shave off the corner of their beards, nor make any cuttings in their flesh' (Lev. xxi. 5; Dent. xiv. 1).

Investing his imaginary deities with the attributes of *cruelty*, man has, at all times and in all countries, instituted a form of religion consisting in cruel rites and bloody ceremonies. If then we

look to the practices of the heathen world, whether of ancient or modern times, we shall find that almost the entire of their religion consisted of rites of *deprecation*. Fear of the Divine displeasure would seem to have been the leading feature in their religious impressions. The universal prevalence of *human sacrifices* throughout the Gentile world is, in itself, a decisive proof of the light in which the human mind, unaided by revelation, is disposed to view the Divinity.

It was doubtless such *mistaken* views of the character of God that led the prophets of Baal (1 Kings xviii. 28) to ent their bodies with lancets, supposing that, by mingling their own blood with that of the offered sacrifice, their god must become more attentive to the voice of entreaty. In fact it was a current opinion amongst the ancient heathen that the gods were *jealous* of human happiness; and in no part of the heathen world did this opinion more prevail, according to Sanchoniathon's account, than amongst the inhabitants of those very countries which surrounded that land where God designed to place his people Israel. Hence we see why God would lay them under the wholesome influence of such a prohibitory law as that under consideration: 'Ye shall not make any cutting in your flesh for the dead.' The ancients were very violent in their expression of sorrow. Virgil represents the sister of Dido as tearing her face with her nails, and beating her breasts with her fists.

The present writer has seen in India the same wild exhibition of grief for the departed relative or friend. Some of the learned think that that law of Solon's, which was transferred by the Romans into the Twelve Tables, *that women in mourning should not scratch their cheeks*, derived its origin from this law of Moses (Lev. xix. 28). But, however this opinion may be questioned, it would appear that the simple tearing of their flesh out of grief and anguish of spirit is taken, in other parts of Scripture, as a *mark of affection*: thus (Jer. xlviii. 37), 'Every head shall be bald, every beard clipped, and upon all cuttings.' Again (ch. xvi. 6): 'Both the great and the small shall die in the land: they shall not be buried, neither shall men lament for them, nor cut themselves.' So (ch. xli. 5): 'There came from Samaria four score men having their heads shaven and their clothes rent, and having cut themselves, with offerings to the house of the Lord.'

The spirit of Islam is less favourable than that of heathenism to displays of this kind: yet examples of them are not of rare occurrence even in the Moslem countries of Western Asia, including Palestine itself. The annexed figure is copied

from one which is represented in many of the books of travel in Egypt and Palestine which were printed in the seventeenth century. It is described by the missionary Eugene Roger as representing 'one of those calenders or devotees whom the Arabs name Balhoana,' and whom the simple people honour as holy martyrs. He appears in public with a scimitar stuck through the fleshy part of his side, with three heavy iron spikes thrust through the muscles of his arm, and with a feather inserted into a cut in his forehead. He moves about with great composure, and endures all these sufferings, hoping for recompense in the Paradise of Mohammed.

From the examples which have been produced, we may very safely conclude that the expression '*cuttings in the flesh*,' in these passages of Scripture, was designed, as already intimated, to declare the feeling of strong affection; as though the living would say, 'See how little we regard the pleasures of life, since now the object of our affection is removed from us!' We must therefore come back to our former position, that it was against those self-inflicted tortures, by which the unhappy devotees vainly thought to deprecate the wrath of their angry gods towards their deceased relatives and friends, this law of Moses was especially aimed.

CYMBALS. [Music.]

CYPRUS, the modern *Kebria*, one of the largest islands in the Mediterranean, and next to Sicily in importance. It is about 140 miles in length, and varies in breadth from 50 to 5 miles. From its numerous headlands and promontories, it was called *Kerasia*, or the *Horned*; and from its exuberant fertility, *Macaria*, or the *blessed*. Its proximity to Asia Minor, Phœnicia, and Egypt, and its numerous harbours, made it a general rendezvous for merchants. 'Corn, wine, and oil,' which are so often mentioned in the Old Testament as the choicest productions of Palestine (Deut. xii. 17; 1 Chron. ix. 29; Neh. x. 39; Jer. xxxi. 12), were found here in the highest perfection. The forests also furnished large supplies of timber for ship-building, which rendered the conquest of the island a favourite project of the Egyptian kings. It was the boast of the Cyprians that they could build and complete their vessels without any aid from foreign countries. Among the mineral products were diamonds, emeralds, and other precious stones, alum, and asbestos; besides iron, lead, zinc, with a portion of silver, and, above all, copper.

Cyprus was originally peopled from Phœnicia [CHITIN]. Amasis I., king of Egypt, subdued the whole island. In the time of Herodotus the population consisted of Athenians, Arcadians, Phœnicians, and Ethiopians. Under the Persians and Macedonians the whole island was divided into nine petty sovereignties. After the death of Alexander the Great it fell to the share of Ptolemy, the son of Lagos. It was brought under the Roman dominion by Cato. Under the Emperor Augustus it was at first an imperial province, and afterwards, with Gallia Narbonensis, made over to the senate. When the empire was divided it fell to the share of the Byzantine emperors. Richard I. of England conquered it in 1191, and gave it to Guy Lusignan, by whose family it was retained for nearly three centuries. In 1473 the republic of Venice obtained possession

of it; but in 1571 it was taken by Selim II., and ever since has been under the dominion of the Turks. The majority of the population belong to the Greek church: the archbishop resides at Leikostia. Cyprus was one of the first places out of Palestine in which Christianity was promulgated, though at first to Jews only (Acts xi. 19), by 'those who were scattered abroad' after Stephen's martyrdom. It was visited by Barnabas and Paul on their first missionary tour (Acts xiii. 4), and subsequently by Barnabas and John Mark (Acts xv. 39). Paul sailed to the south of the island on his voyage to Rome (Acts xxvii. 4). [ELYMAS; PAPHOS; SERGIUS PAULUS; SALAMIS.]

CYRE'NE, a city in Upper Libya, founded about the year b.c. 632, by a colony of Greeks from Thera (Santorini), a small island in the Ægean sea. Its name is generally supposed to be derived from a fountain called Cyre, near its site. It was built on a table-land, 1800 feet above the level of the sea, in a region of extraordinary fertility and beauty. It was the capital of a district, called from it Cyrenaica (Barca), which extended from the Gulf of Platea (Bomba) to the Great Syrtis (Gulf of Sidra). With its port Apollonia (Musa Soosa), about 10 miles distant, and the cities Barca, Teuchira, and Hesperia, which at a later period were named Ptolemais, Arsinoe, and Berenice, it formed the Cyrenaic Pentapolis. For above 180 years the form of government was monarchical; it then became republican; and at last, the country became tributary to Egypt, under Ptolemy Soter. It was bequeathed to the Romans by Apion, the natural son of Ptolemy Physcon, about 97 a.c., and was then formed into a province with Crete. Strabo says, that in Cyrene there were four classes of persons, namely—citizens, husbandmen, foreigners, and Jews, and that the latter enjoyed their own customs and laws. At the commencement of the Christian era, the Jews of Cyrene were so numerous in Jerusalem that they had a synagogue of their own (Acts ii. 10; vi. 9). Some of the first Christian teachers were natives of Cyrene (Acts xi. 20; xiii. 1). Simeon, who was compelled to assist in bearing the cross of the Saviour, was a Cyrenian (Matt. xxvii. 32; Mark xv. 21; Luke xxiii. 26).

CYRENIUS, or, according to his Latin appellation, P. Sulpitius Quirinus, governor of Syria (Luke ii. 1, 2). The mention of his name in connection with the census which was in progress at the time of our Lord's birth, presents very serious difficulties, of which, from the want of adequate data, historical and critical inquiry has not yet attained a satisfactory solution. The passage is thus translated in the Authorized Version: 'Now this taxing was first made when Cyrenius was governor of Syria.' Instead of 'taxing' it is now agreed that the rendering should be 'enrolment,' or 'registration,' as it is clear from Josephus that no taxing did take place till many years after this period. The whole passage, as it now stands, may be properly read, 'This enrolment was the first while Cyrenius was governor of Syria.'

This appears very plain, and would suggest no difficulty, were it not for the knowledge which we obtain from other quarters, which is to the effect, 1. that there is no historical notice of any enrol-

ment at or near the time of our Lord's birth; and, 2. that the enrolment which actually did take place under Cyrenius was not until ten years after that event.

With regard to the extent of the enrolment, there can be little doubt that the words 'the whole world' in our common version should be rendered 'the whole land,' as it is clear Judæa only is meant.

As for the difficulties just mentioned, various attempts have been made to remove them, but perhaps the most satisfactory solution is that which is sanctioned by the names of Calvin, Valesius, Wetstein, Hales, and others, who render the passage thus: In those days there went forth a decree from Augustus, that the whole land should be enrolled; but the enrolment itself was first made when Cyrenius was governor of Syria. The supposition here is, that the census was commenced under Saturninus, but was not completed till two years after, under Quirinus.

In support of this view Hales reminds us that a little before the birth of Christ, Herod had marched an army into Arabia to redress certain wrongs which he had received; and this proceeding had been so misrepresented to Augustus that he wrote a very harsh letter to Herod, the substance of which was, that '*having hitherto treated him as a friend, he would now treat him as a subject.*' And when Herod sent an embassy to clear himself, the emperor repeatedly refused to hear them, and so Herod was forced to submit to all the injuries offered to him. Now it may be collected that the chief of these injuries was the performance of his threat of treating him as a subject, by the degradation of his kingdom to a Roman province. For soon after Josephus incidentally mentions that 'the whole nation of the Jews took an oath of fidelity to Cæsar and the king jointly, except 6000 of the Pharisees, who, through their hostility to the regal government, refused to take it.' The date of this transaction is determined by its having been shortly before the death of Pheroras, and coincides with the time of this decree of enrolment and of the birth of Christ. The oath which Josephus mentions would be administered at the same time, according to the usage of the Roman census, in which a return of persons, ages, and properties, was required to be made upon oath, under penalty of confiscation of goods, as we learn from Ulpian. That Cyrenius, a Roman senator and procurator, was employed to make this enrolment, we learn not only from St. Luke, but by the joint testimony of Justin Martyr, Julian the Apostate, and Eusebius; and it was made while Saturninus was president of Syria (to whom it was attributed by Tertullian) in the thirty-third year of Herod's reign, corresponding to the date of Christ's birth. Cyrenius, who is described by Tacitus as 'an active soldier and rigid commissioner,' was well qualified for an employment so odious to Herod and his subjects; and probably came to execute the decree with an armed force. The enrolment of the inhabitants, 'each in his own city,' was in conformity with the wary policy of the Roman jurisprudence, to prevent insurrections and to expedite the business; and if this precaution was judged prudent even in Italy, much more must it have appeared necessary in turbulent provinces like Judæa and Galilee.

At the present juncture, however, it appears that the census proceeded no further than the first act, namely, of the enrolment of persons in the Roman register. For Herod sent his trusty minister, Nicolas of Damascus, to Rome; who, by his address and presents, found means to mollify and undeceive the emperor, so that he proceeded no further in the design which he had entertained. The census was consequently at this time suspended; but it was afterwards carried into effect upon the deporal and banishment of Archelaus, and the settlement of Judæa as a Roman province. On this occasion the trusty Cyrenius was sent again, as president of Syria, with an armed force, to confiscate the property of Archelaus, and to complete the census for the purposes of taxation. This taxation was a poll-tax of two drachmæ a-head upon males from fourteen, and females from twelve to sixty-five years of age—equal to about fifteen pence of our money. This was the 'tribute-money' mentioned in Matt. xvii. 24-27. The payment of it became very obnoxious to the Jews, and the imposition of it occasioned the insurrection under Judas of Galilee, which Luke himself describes as having occurred 'in the days of the taxing' (Acts v. 37).

By this statement Hales considers that 'the Evangelist is critically reconciled with the varying accounts of Josephus, Justin Martyr, and Tertullian; and an historical difficulty satisfactorily solved, which has hitherto set criticism at defiance.' This is perhaps saying too much; but the explanation is undoubtedly one of the best that has yet been given.

CYRUS, the celebrated Persian conqueror of Babylon, who promulgated the first edict for the restoration of the Jews to their own land (Ezra i. 1, &c.). We are informed by Strabo that his original name was Agradates; but he assumed that of Kouros, or Khonresh (which means the Sun), doubtless on ascending the throne.

Herodotus and Xenophon agree that Cyrus was son of Cambyzes prince of Persia, and of Mandane daughter of Astyages, king of the Median empire. Ctesias denies that there was any relationship at all between Cyrus and Astyages. According to him, when Cyrus had defeated and captured Astyages, he adopted him as a grandfather, and invested Amytis, or Amytis, the daughter of Astyages (whose name is in all probability only another form of Mandane), with all the honours of queen dowager. His object in so doing was to facilitate the submission of the more distant parts of the empire, which were not yet conquered; and he reaped excellent fruit of his policy in winning the homage of the ancient, rich, and remote province of Bactria. Ctesias adds, that Cyrus afterwards married Amytis. It is easy to see that the latter account is by far the more historical, and that the story followed by Herodotus and Xenophon is that which the courtiers published in aid of the Persian prince's designs. Yet there is no reason for doubting that, on the father's side, Cyrus belonged to the Achæmenide, the royal clan of the military tribe of the Persians.

It was the frequent practice of the Persian monarchs, and probably therefore of the Medes before them, to choose the provincial viceroys from the royal families of the subject nations, and thereby to leave to the vanquished much both of

the semblance and of the reality of freedom. This will be sufficient to account for the first steps of Cyrus towards eminence. But as the Persian armies were at that time composed of ruder and braver men than the Medes—indeed, to this day, the men of Shirāz are proverbially braver than those of Isfahān)—the account of Xenophon is credible, that in the general wars of the empire, Cyrus won the attachment of the whole army by his bravery; while, as Herodotus tells, the atrocious cruelties of Astyages may have revolted the hearts of the Median nobility.

Xenophon's romance omits the fact that the transference of the empire was effected by a civil war; nevertheless, the same writer in his *Anabasis* confesses it. Herodotus, Ctesias, Isocrates, Strabo, and, in fact, all who allude to the matter at all, agree that it was so. In Xenophon we find the Upper Tigris to have been the seat of one campaign, where the cities of Larissa and Mespila were besieged and taken by Cyrus. From Strabo we learn that the decisive battle was fought on the spot where Cyrus afterwards built Pasargade, in Persis, for his native capital. Yet Ctesias represents Astyages as finally captured in the palace of Ecbatana. Cyrus (says Herodotus) did Astyages no harm, but kept him by his side to the end of his life. This is like the generosity of the Persian kings to vanquished foreigners, but very unlike the conduct of fortunate usurpers, east or west, towards a fallen superior. The tale in Ctesias is more like the current imperial craft. There we read that Cyrus at first made Astyages ruler of the Baracians, and afterwards sent for him by the eunuch Petisaces to visit his daughter and son-in-law, who were longing to see him. The eunuch, however, put him to death on the road; and Cyrus, indignant at the deed, gave up the murderer to the cruel vengeance of the queen. Astyages had certainly lived long enough for the policy of Cyrus; who, by the Roman Cassius's test of 'Who gained by it?' cannot be accounted innocent.

The Medes were by no means made subject to the Persians at first. It is highly probable that, as Herodotus and Xenophon represent, many of the noblest Medes sided with Cyrus, and during his reign the most trusted generals of the armies were Medes. Yet even this hardly explains the phenomenon of a Darius the Mede, who, in the book of Daniel, for two years holds the government in Babylon, after the capture of the city by the Medes and Persians. Indeed, the language used concerning the kingdom of Darius might be explained as Oriental hyperbole, and Darius be supposed a mere satrap of Babylon, only that Cyrus is clearly put forward as a *successor* to Darius the Mede. Many have been the attempts to reconcile this with the current Grecian accounts; but there is one only that has the least plausibility, viz., that which, with Xenophon, teaches that Astyages had a son still living (whom Xenophon calls Cyaxares) and that this son is no other than Darius the Mede; to whom Cyrus, by a sort of nephew's piety, conceded a nominal supremacy at Babylon. Objections to this likewise are evident, but they must be discussed under **DARIUS THE MEDE**, or the book of **DANIEL**.

In the reign of the son of Cyrus the depression of the Medes probably commenced. At his death

the Magian conspiracy took place, after the defeat of which the Medes doubtless sunk lower still. At a later time they made a general insurrection against the Persian power, and its suppression seems to have brought them to a level with Hyrcanians, Bactrians, and other vassal nations, which spoke the tongue of Persia.

The descriptions given us in Ctesias, and in Plutarch's *Artaxerxes*, concerning the Persian mode of fighting, are quite *Homeric* in their character. No skill seems to be needed by the general; no tactics are thought of: he does his duty best by behaving as the bravest of common soldiers, and by acting the part of champion, like a knight in the days of chivalry. We cannot suppose that there was any *greater* advance of the military art in the days of Cyrus. It is agreed by all that he subdued the Lydians, the Greeks of Asia Minor, and the Babylonians: we may doubtless add Susians, which must have been incorporated with his empire before he commenced his war with Babylon; where also he fixed his military capital (Susa, or Shushan), as more central for the necessities of his administration than Pasargade. Yet the latter city continued to be the more sacred and beloved home of the Persian court, the place of coronation and of sepulture. All Syria and Phenicia appear to have come over to Cyrus peaceably.

In regard to the Persian wars, the few facts from Ctesias, which the epitomator has extracted as differing from Herodotus, carry with them high probability. He states that, after receiving the submission of the Bactrians, Cyrus made war on the Sacians, a Scythian (i. e. a Slavonic) people, who seem to have dwelt, or perhaps rather roved, along the Oxus, from Bokhara to Khiva; and, that, after alternate successes in battle, he attached the whole nation to himself in faithful allegiance. Their king is called Amorges by Ctesias. They are undoubtedly the same people that Herodotus calls *Amargian* Sacians; and it is highly probable that they gave to the district of Margiana its name. Their women fought in ranks, as systematically as the men. Strabo has cursorily told us of a tradition that Cyrus escaped with but seven men through the deserts of Getrosia, fleeing from the 'Indians'—which might denote an unsuccessful war against Candahar, &c., a country which certainly was not reduced to the Persian empire until the reign of Darius Hystaspis.

The closing scene of the career of Cyrus was in battle with a people living on one or both banks of the river Iaxartes, now the Syr-daria. Two battles were fought on successive days, in the former of which Cyrus was mortally wounded, but was carried off by his people. In the next, the Sacian cavalry and the faithful Amorges came to support him, and the enemy sustained a total and bloody defeat. Cyrus died the third day after his wound: his body was conveyed to Pasargade, and buried in the celebrated monument, which was broken open by the Macedonians two centuries afterwards. The inscription, reported by Aristobulus, an eye-witness, is this:—'O man, I am Cyrus, who acquired the empire for the Persians, and was king of Asia. Grudge me not then this monument.'

The kings of Assyria and Babylon had carried the Jews into captivity, both to remove a disap-

feeted nation from the frontier, and to people their new cities. By *undoing* this work, Cyrus attached the Jews to himself as a garrison at an important post. But we may believe that a nobler motive conspired with this. The Persian religion was primitively monotheistic, and strikingly free from idolatry; so little *Pagan* in its spirit, that, whatever of the mystical and obscure it may contain, not a single impure, cruel, or otherwise immoral practice was united to any of its ceremonies. It is credible, therefore, that a sincere admiration of the Jewish faith actuated the noble Persian when he exclaimed, in the words of the book of Ezra, 'Go ye up, and build in Jerusalem the house of Jehovah, God of Israel; *He is God!*'—and forced the Babylonian temples to disgorge their ill-gotten spoil. It is the more remarkable, since the Persians disapproved the confinement of temples. Nevertheless, impediments to the fortification of Jerusalem afterwards arose, even during the reign of Cyrus (Ezra iv. 5).

Perhaps no great conqueror ever left behind him a fairer fame than Cyrus the Great. His mighty achievements have been borne down to us on the voice of the nation which he elevated; his evil deeds had no historian to record them. What is more, it was his singular honour and privilege to be the first Gentile friend to the people of Jehovah in the time of their sorest trouble, and to restore them to the land whence light was to break forth for the illumination of all nations. To this high duty he is called by the prophet (Isa. xlv. 28; xlv. 1), and for performing it he seems to be entitled 'The righteous man' (xli. 2; xlv. 13).

D.

DAB'ERATH, a town in the tribe of Issachar, assigned to the Levites (Josh. xix. 12; xxi. 28; 1 Chron. vi. 72). It is recognised in the present Debûrich, a small village lying on the side of a ledge of rocks, just at the base of Taboon on the north-west.

DA'GON is the name of a national god of the Philistines at Gaza and Ashdod (Judg. xvi. 21, 23; 1 Sam. v. 1 sq.; 1 Chron. x. 10). As to the meaning of the name, it is probably derived from a word signifying *fish*, and there is every reason to believe that it had the body of a fish with the head and hands of a man. That such was the figure of the idol is asserted by Kimchi, and is admitted by most modern scholars. It is also supported by the analogies of other fish deities among the Syro-Arabbians. Besides the **ATEGATIS** of the Syrians, the Babylonians had a tradition, according to Berosus, that at the very beginning of their history an extraordinary being, called Oannes, having the entire body of a fish, but the head, hands, feet, and voice of a man, emerged from the Erythraean sea, appeared in Babylonia, and taught the rude inhabitants the use of letters, arts, religion, law, and agriculture; that, after long intervals between, other similar beings appeared and communicated the same precious lore in detail, and that the last of these was

called Odakon. Selden is persuaded that this Odakon is the Philistine god Dagon. The temple of Dagon at Ashdod was destroyed by Jonathan the brother of Judas the Maccabæe, about the year *n.c.* 148 (1 Mac. x. 84).

DALMANUTHA, a village near Magdala (Mark viii. 10; comp. Matt. xv. 39); probably on the western shore of the lake of Genesareth, a little to the north of Tiberias.

DALMATIA, a province of Europe on the east of the Adriatic Sea, forming part of Illyricum, and contiguous to Macedonia. Titus was sent into this region by Paul to spread the knowledge of the Gospel.

DAM'ARIS, a woman of Athens, who was led to embrace Christianity by the preaching of St Paul (Acts xvii. 34). Some suppose she was the wife of Dionysius the Areopagite, who is mentioned before her; but the construction in the Greek will not sanction this conclusion.

DAMASCUS, called by the natives Es-Sham, a city of Syria, capital of an important pashalic of the same name, and indeed the chief or capital city of Syria, lies in a plain at the eastern foot of Anti-Libanus. The plain is about 400 stadia from the Mediterranean, and from six to eight days' journey from Jerusalem.

Damascus—by some held to be the most ancient city in the world—is called by the Orientals 'a pearl surrounded by emeralds.' Nothing can be more beautiful than its position, whether approached from the side of Mount Lebanon, from the Desert to the east, or by the high-road from the north from Aleppo and Hamah. For many miles the city is girdled by fertile fields, or gardens, as they are called, which, being watered by rivers and sparkling streams, give to the vegetation, consisting principally of olive-trees, a remarkable freshness and beauty. The plain of Damascus owes its fertility and loveliness to the river Barrada, which is supposed to be either the Abana or Pharpar of 2 Kings v. [ABANA].

The view of Damascus, when the traveller emerges from Anti-Libanus, is of the most enchanting kind, and the surrounding country presents the appearance of a vast superficies of rich luxuriant foliage. But the interior of the city does not correspond with the exquisite beauty of its environs. In the Armenian quarter the houses are built with mud, and pierced towards the street by a very few small grated windows with red painted shutters. They are low, and the flat arched doors resemble those of stables. A filthy dughill and a pool of stinking water are almost invariably before the doors. In some of these dwellings, belonging to the principal Armenian merchants, there is great internal richness and elegance. There is a fine wide street, formed by the palaces of the agas of Damascus, who are the nobility of the land. The fronts of these palaces, however, towards the street, are like long prison or hospital walls, mere grey mud walls, with few or no windows, whilst at intervals is a great gate opening on a court. But the interior is magnificent; the saloons being ornamented in the costliest style of Eastern art. The bazars are very striking. The great bazaar is about half a league long. They are long streets covered in with high wood-work, and lined with shops, stalls, magazines, and cafes. The shops, as in other Eastern towns, are narrow, and go only a short

way back. The magazines are stored with merchandise of all sorts, and particularly with Indian manufactures, which are brought in great profusion by the caravans from Bagdad. In the midst of the bazaars stands the finest khan in the East, that of Hassau Pasha, built about fifty years since. It is an immense cupola, whose bold springing arch recalls that of St. Peter at Rome; it is in like manner borne on granite pillars. Not far distant is the principal mosque, formerly a church consecrated to St. John, whose skull and sepulchre, found in this holy place, give it such a sanctity that it is death for even a Mohammedan to enter the room where the relics are kept.

Situated at the edge of the desert, at the mouth of the plains of Cœle-Syria and the valleys of Galilee, of Idumæa, and of the coasts of the Sea of Syria, Damascus was needed as a resting-place for the caravans to India. It is essentially a commercial town. Two hundred merchants are per-

manently settled in it. Foreign trade is carried on by the Great Mecca caravan, the Bagdad caravan, the Aleppo, and by several small ones to Beirut (its sea-port), Tripoli, Acre, &c. Larmatine makes its population to be some 300,000, of whom 30,000 are Christians. Another estimate gives only from 120,000 to 150,000 inhabitants, comprising 12,000 Christians, and as many Jews; and our own information leads us to suspect that even this estimate is too high.

Political changes and social influences have lessened and mitigated the proverbial bigotry of the Damascenes. The lower classes, indeed, are still fanatical, but a better feeling on religion prevails in the higher.

Mr. Addison was conducted to the spot where, according to tradition among the Christians, Saul saw the light from heaven. Winding round the walls on the outskirts of the city, he and his companions came to a point where they were broken

139. [Damascus.]

at the top, at which Paul is said to have been let down in a basket, to escape the indignation of the Jews, when (Acts ix.) 'the disciples took him by night, and let him down by the wall in a basket.' From hence, passing on through some pretty lanes, they came to an open green spot, surrounded by trees, over the tops of which were seen the distant summits of Mount Hermon. At this place they were 'informed Saul had arrived when (Acts ix. 3) as he journeyed he came near Damascus, and suddenly there shined round about him a great light from heaven.' These localities are pointed out with the greatest confidence by the Damascene Christians of all sects, and are held in great veneration; nor is it difficult to suppose that the true spots have been handed down by tradition among the followers of the cross. 'The street which is called Straight' (Acts ix. 11) is still found in Damascus, or at any rate a street bearing that name. Addison says it is 'a mile in

length,' and 'so called because it leads direct from the gate to the castle or palace of the Pasha.' The house of Judas, also, to which Ananias went, is still pointed out, as well as that of Ananias himself. How much credulity may have had to do in fixing on and perpetuating the recollection of these localities, it is probably easier to suspect than to ascertain.

Of the origin of Damascus nothing certain is known. That the city existed as early as the days of Abraham is clear from Gen. xiv. 15; xv. 2; but the way in which it is spoken of in these passages shows that even at the time to which they refer it was not a new nor an unknown place; for Abraham's steward is characterized as being of Damascus, and the locality of another town (Hobah) is fixed by stating that it lay 'on the left hand of Damascus.' How long it may have retained its independence cannot be determined; but it appears (2 Sam. viii. 5, 6;

1 Chron. xix. 4) that its monarch having unadvisedly attacked the victorious David, the Hebrew sovereign defeated the Syrians, making a great slaughter of them, and, in his turn, subdued Damascus, and exacted tribute from its inhabitants. This subjection was not of long duration, for under his successor (1 Kings xi. 24) one Rezon, a servant of Hadadezer, king of Zobah, made himself master of Damascus, and, ruling over Syria, 'was an adversary to Israel all the days of Solomon.' After Rezon, Hезion occupied the throne; he was succeeded by his son Tabrimon (1 Kings xv. 18, 19), who was in alliance with Asa, king of Judah. Preserving the same direct line, the crown then fell to Benhadad, who, having been in a league with Baasha, king of Israel, was bribed by Asa to desert his ally, and join himself in attacking Baasha, on whom the united forces inflicted great injury (1 Kings xv. 19, 20). In the time of Benhadad, son of the preceding monarch, Damascus was the head of a very powerful empire, since it appears (1 Kings xx. 1) that 'thirty and two kings' (doubtless petty princes or pashas, governors of provinces) accompanied him in a campaign which he undertook against Samaria. The insolent demands of the Syrian king having roused the spirit of Ahab, who was at first disposed to succumb to the great power which he saw arrayed against him, a battle took place, in which the Syrians were defeated, and their king effected his retreat with difficulty. The subsequent operations of the Damascenes, under their king, have already been stated (BENHADAD). Hazael, the successor of Benhadad, unwilling to give up hope of being master of Ramoth-Gilead, was attacked by the united forces of Judah and Israel, whom he vanquished, wounding Joram (2 Kings viii. 28); and, at a later period, under Jehu (2 Kings x. 32), laid waste a large portion of the Israelitish kingdom, and 'threshed Gilead with threshing instruments of iron' (Amos i. 3). Determined on revenge (2 Kings xii. 17), Hazael marched to Jerusalem, and was bought off by king Jehoash by a most costly sacrifice. He, however, took the kingdom of Israel (2 Kings xiii. 3), and, though he treated the people oppressively, he was able to hand them over in subjection to his son, Benhadad III., who was thrice beaten (2 Kings xiii. 24) by the Israelitish king Jehoash, and deprived of all his conquests. Jeroboam II. (2 Kings xiv. 28) pursued these advantages, and captured Damascus itself. Subsequently a junction took place between Israel and Damascus, when (2 Kings xv. 37) Rezin, king of the latter, and Pekah, king of the former, entered into a confederacy, and undertook an expedition against Ahaz, king of Judah (Isa. vii. 1). They succeeded in 'recovering Elath to Syria,' but could not prevail against Jerusalem (2 Kings xvi. 6). Ahaz, however, urged by necessity, applied for aid to Tiglath-pileser, king of Assyria, who, being bribed by a munificent present, fell on Damascus, took it, carried the people of it captive to Kir (on the river Kur), slew Rezin, and united the Damascene territory with his own kingdom (2 Kings xvi. 9; Isa. viii. 4; x. 9; xvii. 1). Damascus after this fell under the power of the Babylonians and Persians, from whom it was taken by Alexander the Great, as one consequence of his victory at Issus. Then it made a part of the kingdom of the Seleucids,

from whom it passed into the hands of the Romans. In the time of the Apostle Paul it belonged to the dependent kingdom of the Arabian prince Aretas. At a later period it was reckoned among the cities of Decapolis; then it was added to the province of Phœnicie; and at last made a part of the province of Phœnicia Libanesis. From the time of Hadrian it bore the honorary title of Metropolis, without enjoying the rights of a metropolis. Under the Greek emperors of Constantinople Damascus was the most celebrated city of the East, remarkable for its wealth, luxury, magnificence, and its numerous Christian population. A great era in its history is its conquest by the Saracens. The war was begun about A.D. 633, by the celebrated Abubekr, the successor of Mohammed; and ended in the capture of the city, and the substitution of Islamism for Christianity. It then became the capital of the whole Mussulman world, till the Caliphate was removed from it to Bagdad. The city continued under the sway of the caliphs of Bagdad, till it came into the hands of the Turks, and was held and rendered famous by Nouredin and Saladin. In 1301 Timour the Tartar captured the city and barbarously treated its inhabitants. From Josephus it appears that its population contained great numbers of Jews.

Damascus is famous in the first age of Christianity for the conversion and first preaching of the Apostle Paul (Acts ix. 3, 20; Gal. i. 12). The consequences might have been fatal to the Apostle, for his life was endangered in this fanatical city. 'In Damascus the governor under Aretas, the king, kept the city of the Damascenes with a garrison, desirous to apprehend me; and through a window in a basket was I let down by the wall, and escaped his hands' (2 Cor. xi. 32-3).

DAN, son of Jacob by the concubine Bilhah (Gen. xxx. 3; xxxv. 25), and founder of one of the tribes of Israel. Dan had but one son, called Hushim (Gen. xlii. 23): notwithstanding which, when the Israelites came out of Egypt, this tribe contained 62,700 adult males (Num. i. 39), which made it the second of the tribes in number, Judah only being above it. Its numbers were less affected in the desert than those of many other tribes; for at the census, before entering Canaan, it mustered 64,400 (Num. xxvi. 43), being an increase of 1700, which gave it still the second rank in population. But there is nothing in the history of the tribe corresponding to this eminence in population: the most remarkable circumstance in its history, however, is connected with this fact. The original settlement assigned to the tribe in south-western Palestine being too small for its large population, a body of them went forth to seek a settlement in the remote north, and seized and remained in permanent occupation of the town and district of Laish, the inhabitants of which dwelt in greater security and were more easily conquered than the neighbours of the tribe in its own proper territory (Josh. xix. 47; Judg. i. 34; xviii.). The district regularly allotted to the tribe, although contracted, was very fertile. It had the country of the Philistines on the west, part of Judah with Benjamin on the east, Ephraim on the north, and Simeon on the south. The territory proved inadequate chiefly from the inability of the Danites to expel the Philistines and Amorites, who occupied parts of the land assigned to

them. There is no doubt that the territory as allotted, but not possessed, extended to the Mediterranean through the country of the Philistines. Samson was of this tribe, and its proximity to the Philistines explains many circumstances in the history of that hero. It appears from that history that there was an under-current of private and social intercourse between the Philistines and the Danites, notwithstanding the public enmity between Israel and the former (Judg. xiii.—xvi.).

DAN, the town, anciently called LAISH, or LESHEM, mentioned in the preceding article as having been conquered by a warlike colony of Danites, who named it after their tribe. The terms in which the condition of Laish is described, previously to the conquest, indicate that the place belonged to the Sidonians, and that the inhabitants lived quiet and secure, 'after the manner of the Sidonians,' enjoying abundance of all things (Judg. xviii. 7). They seem to have derived their security from the absence of any adverse powers in their neighbourhood, and from confidence in the protection of Sidon, which was, however, too far off to render aid in the case of such a sudden assault as that by which they were overpowered. "This distance of Sidon was carefully noted by the Danite spies as a circumstance favourable to the enterprise; and it does not appear that Sidon ever made any effort to dispossess the intruders. Dan afterwards became a chief seat of Jeroboam's idolatry, and one of the golden calves was set up there (1 Kings xii. 28, 29). It was conquered, along with other towns, by the Syrians (1 Kings xv. 20); and the name is familiar from the recurrence of the proverbial expression, 'from Dan to Beersheba,' to denote the extent of the Promised Land (Judg. xx. 1; 1 Sam. iii. 20; xvii. 11). [BEERSHEBA.] In the days of Eusebius, Dan was still a small village, which is placed by him four miles from Paneas, towards Tyre. As this distance corresponds to the position of the fountain at Tel el-Kadi, which forms one of the sources of the Jordan, and is doubtless that which is called Dan by Josephus (*Antiq.* i. 10, 2), the situation of the city of Dan could not therefore have been that of Paneas itself, with which it has been in later times confounded. [CÆSAREIA PHILIPPÆ.] There are no longer any ruins near the spring at Tel el-Kadi, but at about a quarter of an hour north, Burckhardt noticed ruins of ancient habitations; and the hill which overhangs the fountains appears to have been built upon, though nothing is now visible.

DANCE. The character of the ancient dance was very different from that of ours, as appears from the conduct of Miriam, who 'took a timbrel in her hand, and all the women went out after her with timbrels and with dances.' Precisely similar is the Oriental dance of the present day, which, accompanied of course with music, is led by the principal person of the company, the rest imitating the steps. The evolutions, as well as the songs, are extemporaneous—not confined to a fixed rule, but varied at the pleasure of the leading dancer; and yet they are generally executed with so much grace, and the time so well kept with the simple notes of the music, that the group of attendants show wonderful address and propriety in following the variations of the leader's feet.

At a very early period dancing was enlisted

into the service of religion among the heathen; the dance, enlivened by vocal and instrumental music, was a usual accompaniment in all the processions and festivals of the gods; and, indeed, so indispensable was this species of violent merriment, that no ceremonial was considered duly accomplished—no triumph rightly celebrated, without the aid of dancing. The Hebrews, in common with other nations, had their sacred dances, which were performed on their solemn anniversaries, and other occasions of commemorating some special token of the divine goodness and favour, as means of drawing forth, in the liveliest manner, their expressions of joy and thanksgiving. The performers were usually a band of females, who, in cases of public rejoicing, volunteered their services (Exod. xv. 20; Sain. xviii. 6), and who, in the case of religious observances, composed the regular chorus of the temple (Ps. cxlix. 3; cl. 4), although there are not wanting instances of men also joining in the dance on these seasons of religious festivity. Thus David deemed it no way derogatory to his royal dignity to dance on the auspicious occasion of the ark being brought up to Jerusalem. His conduct was imitated by the later Jews, and the dance incorporated among their favourite usages as an appropriate close of the joyous occasion of the Feast of Tabernacles.

From being exclusively, or at least principally, reserved for occasions of religious worship and festivity, dancing came gradually to be practised in common life on any remarkable seasons of mirth and rejoicing (Jer. xxxi. 4; Ps. xxx. 11). In early times, indeed, those who perverted the exercise from a sacred use to purposes of amusement were considered profane and infamous; and hence Job introduces it as a distinguishing feature in the character of the ungodly rich, that they encouraged a taste for dancing in their families (Job xxi. 11). During the classic ages of Greece and Rome society underwent a complete revolution of sentiment on this subject; inasmuch that not only at Rome, but through all the provinces of the empire, it was a favourite pastime, resorted to not only to enliven feasts, but in the celebration of domestic joy (Luke xv. 25; Matt. xiv. 6). Notwithstanding, however, the strong partiality cherished for this inspiring amusement, it was considered beneath the dignity of persons of rank and character to practise it. The well-known words of Cicero, that 'no one dances unless he is either drunk or mad,' express the prevailing sense as to the impropriety of respectable individuals taking part in it; and hence the gay circles of Rome and its provinces derived all their entertainment, as is done in the East to this day, from the exhibitions of professional dancers.

Amateur dancing in high life was by no means uncommon in the voluptuous times of the later emperors. But in the age of Herod it was exceedingly rare and almost unheard of; and therefore the condescension of Salome, who volunteered, in honour of the anniversary of that monarch's birthday, to exhibit her handsome person as she led the many dance in the saloons of Machærus—for though she was a child at this time, as some suppose, she was still a princess—was felt to be a compliment that merited the highest reward. The folly and rashness of Herod in giving her an unlimited promise, great

as they were, have been equalled and even surpassed by the munificence which many other Eastern monarchs have lavished upon favourite dancers.

It remains to notice further that the Jewish dance was performed by the sexes separately. There is no evidence from sacred history that the diversion was promiscuously enjoyed, except it might be at the erection of the deified calf, when, in imitation of the Egyptian festival of Apis, all classes of the Hebrews intermingled in the frantic revelry. In the sacred dances, although both sexes seem to have frequently borne a part in the procession or chorus, they remained in distinct and separate companies (Ps. lxviii. 25; Jerem. xxxi. 13).

DANIEL (*Judge of God*), a celebrated prophet in the Chaldean and Persian period. There are in the Bible two other persons of the same name: a son of David (1 Chron. iii. 1), and a Levite of the race of Ithamar (Ezra viii. 2; Neh. x. 6).

Daniel was descended from one of the highest families in Judah, if not even of royal blood (Dan. i. 3). Jerusalem was thus probably his birth-place.

We find him at the age of twelve or sixteen years, already in Babylon, whither he had been carried together with three other Hebrew youths of rank, Ananias, Mishael, and Azariah, at the first deportation of the people of Judah in the fourth year of Jehoiakim. He and his companions were obliged to enter the service of the royal court of Babylon, on which occasion he received the Chaldean name of *Belshazzar*, according to Eastern custom when a change takes place in one's condition of life, and more especially if his personal liberty is thereby affected (comp. 2 Kings xxiii. 34; xxiv. 17; Esth. ii. 7; Ezra v. 14).

In this his new career, Daniel received that thorough polish of education which Oriental etiquette renders indispensable in a courtier, and was more especially instructed 'in the writing and speaking Chaldean' (Dan. i. 4). Already at an early period he had acquired renown for high wisdom, piety, and strict observance of the Mosaic law (comp. Ezek. xiv. 14, 20; xxviii. 3; Dan. i. 8-16). A proper opportunity of evincing both the acuteness of his mind, and his religious notions, soon presented itself in the custom of the Eastern courts to entertain the officers attached to them from the royal table. Daniel was thus exposed to the temptation of partaking of unclean food, and of participating in the idolatrous ceremonies attendant on heathen banquets. His prudent proceedings, wise bearing, and absolute refusal to comply with such customs, were crowned with the Divine blessing, and had the most splendid results.

After the lapse of the three years fixed for his education, Daniel was attached to the court of Nebuchadnezzar, where, by the Divine aid, he succeeded in interpreting a dream of that prince to his satisfaction, by which means—as Joseph of old in Egypt—he rose into high favour with the king, and was entrusted with two important offices—the governorship of the province of Babylon, and the head-inspectorship of the sacerdotal caste (Dan. ii.).

Considerably later, in the reign of Nebuchadnezzar, we find Daniel interpreting another

dream of the king's, to the effect that, in punishment of his pride, he was to lose, for a time, his throne, but to be again restored to it after his humiliation had been completed (Dan. iv.). Here he displays not only the most touching anxiety, love, loyalty, and concern for his princely benefactor, but also the energy and solemnity becoming his position, pointing out with vigour and power the only course left for the monarch to pursue for his peace and welfare.

Under the unworthy successors of Nebuchadnezzar, Daniel and his deservings seem to have been forgotten, and he was removed from his high posts. His situation at court appears to have been confined to a very inferior office (comp. Dan. viii. 27); neither is it likely that he should have retained his rank as head inspector of the *order of the Magians* in a country where these were the principal actors in effecting changes in the administration whenever a new succession to the throne took place.

We thus lose sight of Daniel until the first and third year of king Belshazzar (Dan. v. 7, 8), generally understood to have been the last king of Babylon (called by profane writers Nebonnedus), but who—to judge from Dan. v. 11, 13, 18, 22—was, more probably, the son and successor of Nebuchadnezzar, usually called Evil-Merodach, though passing in Daniel by his Chaldean title and rank. After a reign of two years, this monarch was assassinated by his brother-in-law Neriglissar. Shortly before this event Daniel was again restored to the royal favour, and became moral preacher to the king, who overwhelmed him with honours and titles in consequence of his being able to read and solve the meaning of a sentence miraculously displayed, which tended to rouse the conscience of the wicked prince.

Under the same king we see Daniel both alarmed and comforted by two remarkable visions (Dan. vii. viii.), which disclosed to him the future course of events, and the ultimate fate of the most powerful empires of the world, but in particular their relations to the kingdom of God, and its development to the great consummation.

After the conquest of Babylon by the united powers of Media and Persia, Daniel seriously busied himself under the short reign (two years) of Darius the Mede or Cyaxares II. with the affairs of his people and their possible return from exile, the term of which was fast approaching, according to the prophecies of Jeremiah. In deep humility and prostration of spirit, he then prayed to the Almighty, in the name of his people, for forgiveness of their sins, and for the Divine mercy in their behalf: and the answering promises he received far exceeded the tenor of his prayer, for the visions of the *Seer* were extended to the end of time (Dan. ix.).

In a practical point of view also Daniel appeared at that time a highly-favoured instrument of Jehovah. Occupying, as he did, one of the highest posts of honour in the state, the strictness and scrupulousness with which he fulfilled his official duties could not fail to rouse envy and jealousy in the breasts of his colleagues, who well knew how to win the weak monarch, whom they at last induced to issue a decree imposing certain acts, the performance of which, they well

knew, was altogether at variance with the creed of which Daniel was a zealous professor. For his disobedience the prophet suffered the penalty specified in the decree: he was thrown into a den of lions, but was miraculously saved by the mercy of God—a circumstance which enhanced his reputation, and again raised him to the highest posts of honour under Darius and Cyrus (Dan. vi.).

He had, at last, the happiness to see his most ardent wishes accomplished—to behold his people restored to their own land. Though his advanced age would not allow him to be among those who returned to Palestine, yet did he never for a moment cease to occupy his mind and heart with his people and their concerns (Dan. x. 12).

In the third year of Cyrus, he had a series of visions, in which he was informed of the minutest details respecting the future history and sufferings of his nation, to the period of their true redemption through Christ, as also a consolatory notice to himself to proceed calmly and peaceably to the end of his days, and then await patiently the resurrection of the dead at the end of time.

From that period the accounts respecting him are vague, sometimes confused, and even strange; and we hardly need mention the various fables which report his death to have taken place in Palestine, Babylon, or Susa.

DANIEL, BOOK OF. This important and in many respects remarkable book takes its name not only from the principal person in it, but also and chiefly from him as its real author: there being no doubt whatever that, as the book itself testifies, it was composed by Daniel (comp. vii. 1, 28; viii. 2; ix. 2).

The book of Daniel divides itself into two parts, *historical* (ch. i.-vi.) and *prophetic* (ch. vii.-xii.), arranged respectively in chronological order. Its object is by no means to give a summary historical account of the period of the exile, or of the life of Daniel himself, since it contains only a few isolated points both as to historical facts and prophetic revelations. But the plan or tendency which so consistently runs through the whole book, is of a far different character; it is to show the extraordinary and wonderful means which the Lord made use of, in a period of the deepest misery, when the theocracy seemed dissolved and fast approaching its extinction, to afford assistance to his people, proving to them that he had not entirely forsaken them, and making them sensible of the fact, that His merciful presence still continued to dwell with them, even without the Temple and beyond the Land of Promise.

The wonders related in Daniel (ch. i.-vi.) are thus mostly of a peculiar, prominent, and striking character, and resemble in many respects those performed of old time in Egypt. Their divine tendency was, on the one hand, to lead the heathen power, which proudly fancied itself to be the conqueror of the theocracy, to the acknowledgment that there was an essential difference between the *world* and the *kingdom of God*; and, on the other, to impress degenerate and callous Israel with the full conviction, that the power of God was still the same as it was of old in Egypt.

The following are the essential features of the prophetic tenor of the book of Daniel, while the visions in ch. ii. and vii., together with their different symbols, may be considered as embodying the leading notion of the whole. The development of the whole of the heathen power, until the completion and glorification of the kingdom of God, appeared to the prophet in the shape of four powers of the world, each successive power always surpassing the preceding in might and strength, namely, the Babylonian, Medo-Persian, Greek, and Roman. The kingdom of God proves itself conqueror of them all: a power which alone is everlasting, and showing itself in its utmost glorification in the appearance of the Messiah, as Judge and Lord of the world. Until the coming of the Messiah, the people of God have yet to go through a period of heavy trials. That period is particularly described, ch. viii. and xi., in the struggles of the Maccabean time, illustrative of the last and heaviest combats which the kingdom of God would have to endure. The period until the appearance of the Messiah is a fixed and sacred number: seventy weeks of years (ch. ix.). After the lapse of that period ensues the death of the Messiah; the expiation of the people is realised; true justice is revealed, but Jerusalem and the Temple are in punishment given up to destruction. The true rise from this fall and corruption ensues only at the end of time, in the general resurrection (ch. xii.).

The authenticity of the book has frequently been called in question. The oldest known opponent of it is the heathen philosopher Porphyry, in the third century of the Christian era. He found no successor in his views until the time of the English Deists, when Collins attempted to attack the authenticity of Daniel, as was done by Semler in Germany. In later times its authenticity has been disputed by a number of German critics, who have made the most elaborate attacks against it.

The objections of these writers have been fully met and confuted. They rest, to a great extent, partly on historical errors, partly on the want of a sound exegesis, and, lastly, on the perversion of a few passages in the text. Thus it has turned out that several of the arguments have led to a far different and even opposite result from what was originally meant, namely, to the *defence* of the authenticity of the book. The existence, *ex. gr.*, of a king Darius of the Medians, mentioned in ch. vi., is a thorough historical fact; and the very circumstance that such an insignificant prince, eclipsed as his name was by the splendour of Cyrus, and therefore unnoticed in the fabulous and historical chronicles of Persia, should be known and mentioned in this book, is in itself a proof of the high historical authority of Daniel.

The following are the more important of the arguments which evidence the genuineness of the book.

1. The existence and authority of the book are most decidedly testified by the New Testament. Christ himself refers to it (Matt. xxiv. 15), and gives himself (in virtue of the expression in Dan. vii. 13) the name of *Son of Man*; while the Apostles repeatedly appeal to it as an authority (*ex. gr.* 1 Cor. vi. 2; 2 Thess. ii. 3; Heb. xi. 33, *sq.*).

2. The period of the exile would be altogether incomprehensible without the existence of a man like Daniel, exercising great influence upon his own people, and whose return to Palestine was effected by means of his high station in the state, as well as through the peculiar assistance of God with which he was favoured. Without this assumption, it is impossible to explain the continued state of independence of the people of God during that period, or to account for the interest which Cyrus took in their affairs. The exile and its termination are indicative of uncommon acts of God towards highly-gifted and favoured men; and the appearance of such a man as Daniel is described in that book to have been, is an indispensable requisite for the right understanding of this portion of the Jewish history.

3. An important hint of the existence of the book in the time of Alexander is found in Josephus, *Antiq.* xi. 8, 4, according to which the prophecies of Daniel had been pointed out to that king on his entrance into Jerusalem.

4. The first book of the Maccabees, which is almost contemporary with the events related in it, not only pre-supposes the existence of the book of Daniel, but actually betrays acquaintance with the Alexandrian version of the same (1 Macc. i. 54; comp. Dan. ix. 27; ii. 59; comp. Dan. iii.)—a proof that the book must have been written long before that period.

5. The reception of the book into the canon is also an evidence of its authenticity. In the Maccabean age the canon had long been completed and closed; but even doubting that point, it is not likely that, at a time when so much scrupulous adherence was shown towards all that was hallowed by time and old usage, and when Scriptural literature was already flourishing—it is not probable, we say, that a production then recent should have been raised to the rank of a canonical book.

6. We have an important testimony for the authenticity of the book in Ezekiel xiv. 14, 20; xxviii. 3. Daniel is there represented as an unusual character, as a model of justice and wisdom, to whom had been allotted superior divine insight and revelation. This sketch perfectly agrees with that contained in our book.

7. The book betrays such an intimate acquaintance with Chaldean manners, customs, history, and religion, as none but a contemporary writer could fairly be supposed to possess. Thus, *ex. gr.*, the description of the Chaldean Magians and their regulations perfectly agrees with the accounts of the classics respecting them. The account of the illness and insanity of Nebuchadnezzar is confirmed by Berossus. The edict of Darius the Mede (Dan. v.) may be satisfactorily explained from the notions peculiar to the Medo-Persian religion, and the importance attached in it to the king, who was considered as a sort of incarnate deity.

8. The religious views, the ardent belief in the Messiah, the purity of that belief, the absence of all the notions and ceremonial practices of later Judaism, &c., the agreement of the book in these respects with the genuine prophetic books, and more especially with the prophets in and after the exile,—all this testifies to the genuineness of Daniel.

DANIEL, Apocryphal Addenda to. In the

version of the Seventy, and that of Theodotion, are found some considerable additions to the book of Daniel which are wanting in the Hebrew canon. These are,

1. The Prayer of Azarias, &c. (Dan. iii. 24-51).

2. The Song of the Three Children (Dan. iii. 52-90).

3. The History of Susanna (Dan. xiii.).

4. The Narrative of Bel and the Dragon (Dan. xiv.).

St. Jerome, who translated these together with the canonical parts of the book of Daniel from the Greek version of Theodotion, observes: 'Daniel, as received among the Hebrews, contains neither the History of Susanna, nor the Hymn of the Three Children, nor the Fables of Bel and the Dragon, all of which, as they are dispersed throughout the world, we have added, lest to the ignorant we should seem to have cut off a considerable part of the book, transfixing them at the same time with a dagger.'

Jerome further observes that the history of Susanna is considered by nearly all the Hebrews as a fable; and that it is not read in the synagogues: for who, say they, could believe that captives had the power of starving their princes and judges?

The subject of the Prayer of Azarias, and of the Song of the three youths, Azarias, Ananias, and Misael (the Hebrew names of Shadrach, Meshach, and Abed-nego), consists in a petition for deliverance from the furnace, and a hymn of thanksgiving, on the part of the young men, for their preservation in the midst of the flames. De Wette conceives that the Prayer and the Hymn betray marks of two different authors, and that the latter has the appearance of being written with a liturgical object. Certain it is that, from a very early period, it formed part of the church service, and it is one of the canticles still sung on all festivals in the Roman, and retained in the daily service of the Anglican church.

The *History of Susanna* is probably a moral parable, founded perhaps on some fact, and affording a beautiful lesson of chastity.

The object of the Jewish author of the history of the destruction of *Bel and the Dragon* was, according to Jahn, 'to warn against the sin of idolatry some of his brethren, who had embraced Egyptian superstitions. The book was, therefore, well adapted to the time, and shows that philosophy was not sufficient to keep men from apostatising into the most absurd and degrading superstitions.' The time of the writing Jahn ascribes to the age of the Ptolemies, when serpents were still worshipped at Thebes.

Bel and the Dragon is read in the Roman office on Ash-Wednesday, and in the church of England on the 23rd of November. Susanna is read in the Anglican Church on the 22nd of November, and in the Roman on the vigil of the fourth Sunday in Lent.

We shall conclude with the following observation of Erasmus. 'It is astonishing that what Jerome stabbed with his dagger is now everywhere read and sung in the churches; nay, we read, without any mark of distinction, what Jerome did not fear to call a fable, the history of Bel and the Dragon, and which he would not have added, had he not been apprehensive of

seeming to have cut off a considerable portion of the sacred volume. But to whom did he fear to seem to do so? To the ignorant, as he himself observes. Of so much more weight to the ignorant multitude is custom, than the judgment of the learned!

DARIUS, or rather DARJAVESH, is the name under which three Medo-Persian kings are mentioned in the Old Testament.

The first Darius is 'Darjavesb, the son of Achashverosh, of the seed of the Medes,' in the book of Daniel (ix. 1). Much difference of opinion has prevailed as to the person here intended; but there is good reason to believe that it is Cyaxares the Second, the son and successor of Astyages [ΑΓΑΣΤΑΓΟΣ], and the immediate predecessor of Cyrus.

The second 'Darjavesb king of Persia' is mentioned in the book of Ezra (iv.-vii.), in Haggai, and in Zechariah, as the king who, in the second year of his reign, effected the execution of those decrees of Cyrus which granted the Jews the liberty to rebuild the temple, the fulfilment of which had been obstructed by the malicious representations which their enemies had made to the immediate successors of Cyrus. It is agreed that this prince was Darius Hystaspis, who succeeded the usurper Smerdis B.C. 521, and reigned thirty-six years.

The third 'Darjavesb the Persian,' occurs in Neh. xii. 22, in a passage which merely states that the succession of priests was registered up to his reign. It is commonly believed that this king was Darius Nothus, who came to the throne (B.C. 423), and reigned nineteen years.

Darius Codomannus is evidently the Persian king alluded to in 1 Mac. i. 1.

DARKNESS. In the Gospels of Matthew (xxiii. 45) and Luke (xxiii. 44) we read that, while Jesus hung upon the cross, 'from the sixth hour there was darkness over all the land unto the ninth hour.' That this darkness could not have proceeded from an eclipse of the sun is placed beyond all doubt by the fact that, it being then the time of the Passover, the moon was at the full. This darkness may therefore be ascribed to an extraordinary and preternatural obscuration of the solar light, which might precede and accompany the earthquake which took place on the same occasion. For it has been noticed that often before an earthquake such a mist arises from sulphureous vapours as to occasion a darkness almost nocturnal. Such a darkness might extend over Judea, or that division of Palestine in which Jerusalem stood, to which the best authorities agree that here, as in some other places, it is necessary to limit the phrase rendered 'all the land.'

Darkness is often used symbolically in the Scriptures as opposed to light, which is the symbol of joy and safety, to express misery and adversity (Job xviii. 6; Ps. cvii. 10; cxliii. 3; Isa. viii. 22; ix. 1; lix. 9, 10; Ezek. xxx. 18; xxxii. 7, 8; xxxiv. 12). Darkness of the sun, moon, and stars is used figuratively to denote a general darkness or deficiency in the government or body politic (Isa. xlii. 10; Ezek. xxxii. 7; Joel ii. 10-31). In Eph. v. 11, the expression 'works of darkness' is applied to the heathen mysteries, on account of the impure actions which the initiated performed in them. 'Outer

darkness' in Matt. viii. 12, and elsewhere, refers to the darkness outside, in the streets or open country, as contrasted with the blaze of cheerful light in the house, especially when a convivial party is held in the night time. And it may be observed that the streets in the East are utterly dark after nightfall, there being no shops with lighted windows, nor even public or private lamps to impart to them the light and cheerfulness to which we are accustomed. This gives the more force to the contrast of the 'outer darkness' with the inner light.

Darkness is used to represent the state of the dead (Job x. 21; xvii. 13). It is also employed as the proper and significant emblem of ignorance (Isa. ix. 2; lx. 2; Matt. vi. 23; John iii. 9; 2 Cor. iv. 1-6).

DATES. [PALM TREE.]

DATHAN, one of the chiefs of Reuben who joined Korah in the revolt against the authority of Moses and Aaron (Num. xvi. 1) [AARON].

DAUGHTER. In the Scriptures the word daughter is used in a variety of senses, some of which are unknown to our own language, or have only become known through familiarity with Scriptural forms of speech. Besides its usual and proper sense of—1. A daughter sent or adopted, we find it used to designate—2. A uterine sister, niece, or any female descendant (Gen. xx. 12; xxiv. 48; xxviii. 6; xxxvi. 2; Num. xxv. 1; Deut. xxiii. 17).—3. Women, as natives, residents, or professing the religion of certain places, as 'the daughter of Zion' (Isa. iil. 16); 'daughters of the Philistines' (2 Sam. i. 20); 'daughter of a strange God' (Mal. ii. 11).—4. Metaphorically, small towns are called daughters of neighbouring large cities, to which they belonged, or from which they were derived, as 'Heshbon and all the daughters [Auth. Vers. *villages*] thereof' (Num. xxi. 25); so Tyre is called the daughter of Sidon (Isa. xxii. 12), as having been originally a colony from thence; and hence also the town of Abel is called 'a mother in Israel' (2 Sam. xx. 19); and Gath is in one place (comp. 2 Sam. vii. 1; 1 Chron. xviii. 1) called Gath-Ammah, or Gath the *mother* town, to distinguish it from its own dependencies, or from another place called Gath. See other instances in Num. xxi. 32; Judg. xi. 26; Josh. xv. 45, &c.—5. The people collectively of any place, the name of which is given; as 'the daughter (i. e. the people) of Jerusalem hath shaken her head at thee' (Isa. xxxvii. 22; see also Ps. xlv. 13; cxxxvii. 8; Isa. x. 30; Jer. xlv. 19; Lam. iv. 22; Zech. ix. 9).

Respecting the condition of daughters in families, see art. **WOMEN** and **MARRIAGE**.

DAVID. The word probably means *beloved*. The reign of David is the great critical era in the history of the Hebrews. It decided that they were to have for nearly five centuries a national monarchy, a fixed line of priesthood, and a solemn religious worship by music and psalms of exquisite beauty; it finally separated Israel from the surrounding heathen, and gave room for producing those noble monuments of sacred writ, to the influence of which over the whole world no end can be seen. His predecessor, Saul, had many successes against the Philistines, but it is clear that he made little impression on their real power; for he died fighting against them, not on

their own border, but on the opposite side of his kingdom, in Mount Gilboa. As for all the other 'enemies on every side'—Moabites, Ammonites, Edomites, and the kings of Zobah,—however much he may have 'vexed them' (1 Sam. xiv. 47), they, as well as the Amalekites, remained unsubdued, if weakened. The real work of establishing Israel as lord over the whole soil of Canaan was left for David.

The life of David naturally divides itself into three portions:—I. The time which he lived under Saul. II. His reign over Judah in Hebron. III. His reign over all Israel.

I. In the first period we may trace the origin of all his greatness. His susceptible temperament, joined to his devotional tendencies, must, at a very early age, have made him a favourite pupil of the prophets, whose peculiar mark was the harp and the psalm (1 Sam. x. 1-12 and xix. 20-24; see also 2 Kings iii. 15). His hospitable reception, when in distress, by Ahimelech the priest, and the atrocious massacre innocently brought by him on Nob, the city of the priests (1 Sam. xxi. and xxii. 9-19), must have deeply affected his generous nature, and laid the foundation of his cordial affection for the whole priestly order, whose ministrations he himself helped to elevate by his devotional melodies. At an early period he attracted the notice of Samuel; and if we are to arrange events according to their probable connection, we may believe that *after* David had been driven away from Saul and his life several times attended, Samuel ventured on the solemn step of anointing him king. Whenever this took place, it must have produced on David a profound impression, and prepared him to do that in which Saul had so eminently failed, viz. to reconcile his own military government with a filial respect for the prophets and an honourable patronage of the priesthood. Besides this, he became knit into a bond of brotherhood with his heroic comrades, to whom he was eminently endeared by his personal self-denial and liberality (1 Sam. xxx. 21-31; 1 Chron. xi. 18). This, indeed, drew after it one most painful result, viz. the necessity of enduring the turbulence of his violent but able nephew Joab; nor could we expect that of a band of freebooters many should be like David. Again, during his outlawry David became acquainted in turn not only with all the wild country in the land, but with the strongholds of the enemy all round. By his residence among the Philistines he must have learned all their arts and weapons of war, in which it is reasonable to believe the Israelites previously inferior (1 Sam. xiii. 19-23). With Nahash the Ammonite he was in intimate friendship (2 Sam. x. 2); to the king of Moab he entrusted the care of his parents (1 Sam. xxii. 3); from Achish of Gath he received the important present of the town of Ziklag (1 Sam. xxvii. 6). That Ziklag was a strong place may be inferred from 1 Chron. xii. 1, 20. The celebrity acquired in successful guerilla warfare, even in modern days, turns the eyes of whole nations on a chieftain; and in an age which regarded personal heroism as the first qualification of a general (1 Chron. xi. 6) and of a king, to triumph over the persecutions of Saul gave David the fairest prospects of a kingdom.

The account transmitted to us of David's dan-

gers and escapes in the first period is too fragmentary to work up into a history: nevertheless, it seems to be divisible into two parts, differing in character. During the former he is a fugitive and outlaw in the land of Saul, hiding in caves, pitching in the wilderness, or occasionally with great risk entering walled cities (1 Sam. xxiii. 7); in the latter he abandons his native soil entirely, and lives among the Philistines as one of their chieftains (xxvii. 1). While a rover in the land of Judah, his position (to our eyes) is anything but honourable; being a focus to which 'all who were in distress, in debt, or discontented, gathered themselves' (xxii. 2). Yet as the number of his followers became large (six hundred, we read, xxiii. 13), and David knew how to conciliate the neighbouring sheep-masters by his urbanity and kind services, he gradually felt himself to be their protector and to have a right of maintenance and tribute for them. Hence he resents the refusal of Nabal to supply his demands, as a clear injustice; and, after David's anger has been turned away by the prudent policy of Abigail, in blessing her for saving him from slaying Nabal and every male of his family, the thought seems not to have entered his mind that the intention of such a massacre was more guilty than Nabal's refusal to pay him tribute (xxv. 34). This whole narrative is characteristic and instructive. By his marriage with Abigail he afterwards probably became rich (for she seems to have been a widow at her own disposal), and on passing immediately after into the land of the Philistines, he was enabled to assume a more dignified place. Becoming possessed of the stronghold of Ziklag, he now appeared like a legitimate chieftain with fixed possessions, and no longer a mere vagabond and freebooter. This was accordingly a transition-state in which David was prepared for assuming the kingdom over Judah. In Ziklag he was joined, not, as before, by mere outcasts from Israelitish life, but by men of consideration and tried warriors (1 Chron. xii. 1-22), not only of the tribe of Judah, but from Gad, Manasseh, and even 'from Saul's brethren of Benjamin.'

II. Immediately upon the death of Saul the tribe of Judah invited David to become their prince.

His first step, after his election, was to fix on Hebron as the centre of his administration—an ancient city, honourable by its association with the name of Abraham, and in the middle of his own tribe. He then strengthened himself by a marriage with Maacah, daughter of Talmai, king of Geshur (2 Sam. iii. 3); a petty monarch whose dominions were near the sources of the Jordan, and whose influence at the opposite end of the land must have added a great weight into David's scale. From Abigail, widow of the churlish Nabal, David, as we have already observed, seems to have received a large private fortune. Concerning his other wives we know nothing in particular; only it is mentioned that he had six sons by six different mothers in Hebron. The chief jealousy was between the two tribes of Benjamin and Judah, as Saul had belonged to the former; and a tournament was turned by mutual ill-will into a battle, in which Abner unwillingly slew young Asahel, brother of Joab. 'Long war,' after this, was carried on between 'the house of Saul and the house of David.' We may

infer that the rest of Israel took little part in the contest; and although the nominal possession of the kingdom enabled the little tribe of Benjamin to struggle for some time against Judah, the skill and age of Abner could not prevail against the vigour and popular fame of David. A quarrel between Abner and Ishbosheth decided the former to bring the kingdom over to David. The latter refused to treat unless, as a preliminary proof of Abner's sincerity, Michal, daughter of Saul, was restored to David. The possession of such a wife was valuable to one who was aspiring to the kingdom. His demand was immediately complied with. After giving her back, Abner proceeded to win the elders of Israel over to David; but Joab discerned that if this should be so brought about, Abner of necessity would displace him from his post of chief captain. He, therefore, seized the opportunity of murdering him when he was come on a peaceful embassy, and covered the atrocity by pleading the duty of revenging his brother's blood. This deed was perhaps David's first taste of the miseries of royal power. He dared not proceed actively against his ruthless nephew, but vented his abhorrence in a solemn curse on Joab and his posterity, and followed Abner to the grave with weeping. Anxious to purge himself of the guilt, he ordered a public wearing of sackcloth, and refused to touch food all the day. The feeble Ishbosheth, left alone, was unequal to the government, and shortly suffered the same fate of assassination. David, following the universal policy of sovereigns, and his own profound sense of the sacredness of royalty, took vengeance on the murderers, and buried Ishbosheth in Abner's tomb at Hebron.

III. The death of Ishbosheth gave to David supremacy over all Israel. The kingdom was not at first a despotic, but a constitutional one; for it is stated, 'David made a league with the elders of Israel in Hebron before Jehovah; and they anointed David king over Israel' (2 Sam. v. 3). This is marked out as the era which determined the Philistines to hostility (ver. 17), and may confirm our idea, that their policy was to hinder Israel from becoming united under a single king. Two victories of David over them follow, both near the valley of Rephaim; and these were probably the first battles fought by David after becoming king of all Israel.

Perceiving that Hebron was no longer a suitable capital, he resolved to fix his residence farther to the north. On the very border of the tribes of Judah and Benjamin lay the town of Jebus, which with its neighbourhood was occupied by Jebusites, a remnant of the old Canaanitish nation so called. In spite of the great strength of the fort of Zion, it was captured, and the Jebusites were entirely expelled or subdued; after which David adopted the city as his new capital, greatly enlarged the fortifications, and gave or restored the name of Jerusalem [JERUSALEM]. After becoming master of Jerusalem, David made a league with Hiram, king of Tyre, who supplied him with skilful artificers to build a splendid palace at the new capital. That the mechanical arts should have been in a very low state among the Israelites, was to be expected; since, before the reign of Saul even smiths' forges were not allowed among them by the Philistines. Nothing, however, could have been more profitable for the

Phœnicians than the security of cultivation enjoyed by the Israelites in the reigns of David and Solomon. The trade between Tyre and Israel became at once extremely lucrative to both, and the league between the two states was quickly very intimate.

Once settled in Jerusalem, David proceeded to increase the number of his wives, perhaps in part from the same political motive that actuates other Oriental monarchs, viz. in order to take hostages from the chieftains round in the least offensive mode. We know nothing further concerning his family relations, than the names of eleven sons born in Jerusalem (2 Sam. v. 14, 15), of whom four were children of Bathsheba (1 Chron. iii. 5), and therefore much younger than the elder sons.

Jerusalem, now become the civil metropolis of the nation, was next to be made its religious centre; and the king applied himself to elevate the priestly order, to swell the ranks of attending Levites and singers, and to bring the ark to Jerusalem. The bringing of the ark from Kirjath-jearim to Jerusalem established the line of high-priests in direct service before it; and from this time we may presume that the ceremonies of the great day of Atonement began to be observed.

When the ark entered Jerusalem in triumph, David put on a priest's ephod and danced before it. This proved the occasion of the rupture between him and his royal spouse, Michal (2 Sam. vi. 21). After this event, the king, contrasting his cedar palace with the curtains of the tabernacle, was desirous of building a temple for the ark; such a step, moreover, was likely to prevent any future change of its abode. The prophet Nathan, however, forbade it, on pious and intelligible grounds.

David's further victories are narrated in the following order — Philistines, Moab, Zobah, Edom, Northern League stirred up by the Ammonites, Ammon. 1. The short notice concerning the Philistines just gives us to understand that this is the era of their decisive, though not final, subjugation. Their towns were despoiled of their wealth (2 Sam. viii. 12), and doubtless all their arms and munitions of war passed over into the service of the conqueror. 2. The Moabites were a pastoral people, whose general relations with Israel appear to have been peaceful. The slight notice of Saul's hostilities with them (1 Sam. xiv. 47) is the only breach recorded since the time of Eglon and Ehud. In the book of Ruth we see them as friendly neighbours, and much more recently (1 Sam. xxii. 3, 4) David committed his parents to the care of the king of Moab. We know no cause, except David's strength, which now drew his arms upon them. A people long accustomed to peace, in conflict with a veteran army, was struck down at once, but the fierceness of his triumph may surprise us. Two-thirds of the population (if we rightly interpret the words, 2 Sam. viii. 2) were put to the sword; the rest became tributary. 3. Who are meant by the Syrians of Zobah, is still a problem [ZORAU]. We here follow the belief that it was a power of northern Syria, then aiming at extensive empire, which had not only defeated and humbled the king of Hamath, but had obtained homage beyond the Euphrates. The trans-Jordanic tribes in the time of Saul had founded a little empire for themselves by conquering their eastern neighbours,

the Hagarenes; and, perhaps, occasionally overran the district on the side of the Euphrates, which Hadadezer, king of Zobah, considered as his own. His efforts 'to recover his border at the river Euphrates' first brought him into collision with David, perhaps by an attack which he made on the roaming Eastern tribes. David defeated not merely his army, but that of Damascus too, which came, too late, with succour; and put Israelite garrisons into the towns of the Damasceenes. 4. Another victory, gained 'in the valley of salt,' ought, perhaps, to be read, as in 1 Chron. xviii. 12, and in the superscription of Ps. lx., 'over the Edomites,' not 'over the Syrians.' 5. After David had become master of all Israel, of the Philistine towns, of Edom, and of Moab, while the Eastern tribes, having conquered the Hagarenes, threatened the Ammonites on the north, as did Moab on the south, the Ammonites were naturally alarmed, and called in the powers of Syria to their help against a foe who was growing dangerous even to them. The coalition against David is described as consisting of the Syrians of Bethrehob and of Maacah, of Zobah and of Tob. The last country appears to have been in the district of Trachonitis, the two first immediately on the north of Israel. In this war, we may believe that David enjoyed the important alliance of Toi, king of Hamath, who, having suffered from Hadadezer's hostility, courted the friendship of the Israelitish monarch (2 Sam. viii. 9, 10). We are barely informed that one division of the Israelites under Abishai was posted against the Ammonites; a second under Joab met the confederates from the north, 30,000 strong, and prevented their junction with the Ammonites. In both places the enemy was repelled, though, it would seem, with no decisive result. A second campaign took place. The king of Zobah brought in an army of Mesopotamians, in addition to his former troops, and David found it necessary to make a levy of all Israel to meet the pressing danger. A pitched battle on a great scale was then fought at Helam—far beyond the limits of the twelve tribes—in which David was victorious. The Syrians henceforth left the Ammonites to their fate, and the petty chiefs who had been in allegiance to Hadadezer hastened to do homage to David. 6. Early in the next season Joab was sent to take vengeance on the Ammonites in their own home, by attacking their chief city, or Rabbah of Ammon. The natural strength of their border could not keep out veteran troops and an experienced leader; and though the siege of the city occupied many months (if, indeed, it was not prolonged into the next year), it was at last taken. It is characteristic of Oriental despotism, that Joab, when the city was nearly reduced, sent to invite David to command the final assault in person. David gathered a large force, easily captured the royal town, and despoiled it of all its wealth. His vengeance was as much more dreadful on the unfortunate inhabitants than formerly on the Moabites, as the danger in which the Ammonites had involved Israel had been more imminent (2 Sam. xii. 31; 1 Chron. xx. 3).

During the campaign against Rabbah of Ammon the painful and never-to-be-forgotten outrage of David against Bathsheba and her husband Uriah the Hittite took place. It is principally through this narrative that we know the tedious-

ness of that siege; since the adultery with Bathsheba and the birth of at least one child took place during the course of it.

The latter years of David's reign were afflicted by the inevitable results of polygamy and despotism, viz. the quarrels of the sons of different mothers, and their eagerness to seize the kingdom before their father's death. Of all his sons, Absalom had naturally the greatest pretensions, being, by his mother's side, grandson of Talmi, king of Geshur; while through his personal beauty and winning manners he was high in popular favour. It is evident, moreover, that he was the darling son of his father. When his own sister Tamar had been dishonoured by her half-brother Amnon, the eldest son of David, Absalom slew him in vengeance, but, in fear of his father, then fled to his grandfather at Geshur. Joab, discerning David's longings for his son, effected his return after three years; but the conflict in the king's mind is strikingly shown by his allowing Absalom to dwell two full years in Jerusalem before he would see his face.

The insurrection of Absalom against the king was the next important event; in the course of which there was shown the general tendency of men to look favourably on young and untried princes, rather than on those whom they know for better and for worse. Absalom erected his royal standard at Hebron first, and was fully prepared to slay his father outright, which might probably have been done, if the energetic advice of Ahithophel had been followed. While they delayed, David escaped beyond the Jordan, and with all his troop met a most friendly reception, not only from Barzillai and Machir, wealthy chiefs of pastoral Gilead, but from Shobi, the son of the Ammonite king Nahash, whose power he had destroyed, and whose people he had hewed in pieces. We likewise learn on this occasion that the fortunes of David had been all along attended by 600 men of Gath, who now, under the command of Ittai the Gittite, crossed the Jordan with all their households, in spite of David's generous advice that they would return to their own country. Strengthened by the warlike eastern tribes, and surrounded by his experienced captains, the king no longer hesitated to meet Absalom in the field. A decisive victory was won at the wood of Ephraim, and Absalom was slain by Joab in the retreat. The old king was heart-stricken at this result, and, ignorant of his own weakness, superseded Joab in the command of the host by Amasa, Absalom's captain. Perhaps Joab on the former occasion, when he murdered Abner, had blinded the king by pleading revenge for the blood of Asahel; but no such pretence could here avail. The king was now probably brought to his determination, partly by his disgust at Joab, partly by his desire to give the insurgents confidence in his amnesty. If Amasa is the same as Amasai, David may likewise have retained a grateful remembrance of the cordial greeting with which he had led a strong band to his assistance at the critical period of his abode in Ziklag (1 Chron. xii. 18); moreover, Amasa, equally with Joab, was David's nephew, their two mothers, Abigail and Zeruiah, being sisters to David by at least one parent (2 Sam. xvii. 25; 1 Chron. ii. 13, 16). The unscrupulous Joab, however, was not so to be set aside. Before long, catching an opportunity, he

assassinated his unsuspecting cousin with his own hand; and David, who had used the instrumentality of Joab to murder Uriah, did not dare to resent the deed.

A quarrel which took place between the men of Judah and those of the other tribes in bringing the king back, had encouraged a Benjamite named Sheba to raise a new insurrection, which spread with wonderful rapidity. Amasa was collecting troops as David's general at the time when he was treacherously assassinated by his cousin, who then, with his usual energy, pursued Sheba, and blockaded him in Bethmaachah before he could collect his partisans. Sheba's head was cut off, and thrown over the wall; and so ended the new rising. Yet this was not the end of trouble; for the intestine war seems to have inspired the Philistines with the hope of throwing off the yoke. Four successive battles are recorded (2 Sam. xxi. 15-22), in the first of which the aged David was nigh to being slain. His faithful officers kept him away from all future risks, and Philistia was once more, and finally, subdued.

The last commotion recorded took place when David's end seemed nigh, and Adonijah, one of his elder sons, feared that the influence of Bathsheba might gain the kingdom for her own son Solomon. Adonijah's conspiracy was joined by Abiathar, one of the two chief priests, and by the redoubted Joab; upon which David took the decisive measure of raising Solomon at once to the throne. Of two young monarchs, the younger and the less known was easily preferred, when the sanction of the existing government was thrown into his scale; and the cause of Adonijah immediately fell to the ground. Amnesty was promised to the conspirators, yet it was not very faithfully observed (Solomon).

Numerous indications remain to us that, however eminently David was imbued with faith in Jehovah as the national God of Israel, and however he strove to unite all Israel in common worship, he still had no sympathy with the later spirit which repelled all foreigners from co-operation with Jews. In his early years necessity made him intimate with Philistines, Moabites, and Ammonites; policy led him into league with the Tyrians. He himself took in marriage a daughter of the king of Gesur: it is the less wonderful that we find Uriah the Hittite (2 Sam. xi.), Gether the Ishmaelite (1 Chron. ii. 17), and others, married to Israelitish wives. The fidelity of Ittai the Gittite, and his six hundred men, has been already alluded to. It would appear, on the whole, that in tolerating foreigners Solomon did not go beyond the principles established by his father, though circumstances gave them a fuller development.

No attempt seems to have been made in David's reign to maintain horses or chariots for military purposes. Even chiefs in battle, as Absalom on his fatal day, appear mounted only on mules. Yet horses were already used in state equipages, apparently as a symbol of royalty (2 Sam. xv. 1).

That in the opening of Saul's reign the Philistines had deprived the Israelites of all the most formidable arms, is well known. It is probable that this may have led to a more careful practice of the sling and of the bow, especially among the southern tribes, who were more immediately pressed by the power of the Philistines. Such

weapons cannot be kept out of the hands of the rustics, and must have been essential against wild beasts. But, from causes unknown, the Benjamites were peculiarly celebrated as archers and slingers (Judg. xx. 16; 1 Chron. viii. 40; xii. 2; 2 Chron. xiv. 8; xvii. 17), while the pastoral tribes beyond the Jordan were naturally able to escape all attempts of the Philistines to deprive them of shield, spear, and sword. Hence the Gadites, who came to David at Ziklag, are described as formidable and full-armed warriors, 'with faces like lions, and swift as mountain roes' (1 Chron. xii. 8).

The standing army which Saul had begun to maintain was greatly enlarged by David. An account of this is given in 1 Chron. xxvii.; from which it would seem that 24,000 men were constantly maintained on service, though there was a relieving of guard every month. Hence, twelve times this number, or 288,000, were under a permanent military organization, with a general for each division in his month. Besides this host, the register proceeds to recount twelve princes over the tribes of Israel, who may perhaps be compared to the lord-lieutenants of English counties.

The *cabinet* of David (if we may use a modern name) is thus given (1 Chron. xxvii. 32-34) with reference to a time which preceded Absalom's revolt:—1, Jonathan, David's uncle, a counsellor, wise man, and scribe; 2, Jehiel, son of Hachmoni, tutor (?) to the king's sons; 3, Ahithophel, the king's counsellor; 4, Hushai, the king's companion; 5, after Ahithophel, Jehoiada, the son of Benaiah; 6, Abiathar the priest. It is added, 'and the general of the king's army was Joab.'

Twelve royal bailiffs are recited as a part of David's establishment (1 Chron. xxvii. 25, 31), having the following departments under their charge: 1, The treasures of gold, silver, &c.; 2, the magazines; 3, the tillage (wheat, &c.); 4, the vineyards; 5, the wine-cellar; 6, the olive and sycamore trees; 7, the oil-cellars; 8, the herds in Sharon; 9, the herds in the valleys; 10, the camels; 11, the asses; 12, the flocks. The eminently prosperous state in which David left his kingdom to Solomon appears to prove that he was on the whole faithfully served, and that his own excellent intentions, patriotic spirit, and devout piety (measured, as it must be measured, by the standard of those ages), made his reign beneficial to his subjects.

DAY. The earliest measure of time on record is the day:—'The evening and the morning were the first day' (Gen. i. 5). Here the word 'day' denotes the civil or calendar day of twenty-four hours, including 'the evening,' or natural night, and the 'morning,' or natural day. It is remarkable that in this account 'the evening,' or natural night, precedes 'the morning,' or natural day. Hence the Hebrew compound 'evening-morning,' which is used by Daniel (viii. 14) to denote a civil day. In fact, the Jewish civil day began, as it still does, not with the morning, but the evening—thus the Sabbath commences with the sunset of Friday, and ends with the sunset of Saturday.

The inconveniences resulting from a variable commencement of the civil day, earlier or later, according to the different seasons of the year, as well as the equally varying duration of the na-

tural day and night, must have been very considerable, and are sensibly felt by Europeans when travelling in the East, where the ancient custom in this matter is still observed. These inconveniences must be less obvious to the people themselves, who know no better system; yet they were apparent to several ancient nations—the Egyptians, the Ausonians, and others—and induced them to reckon their civil day from midnight to midnight, as from a fixed invariable point; and this usage has been adopted by most of the modern nations of Europe. We thus realize the advantage of having our divisions of the day, the hours, of equal duration, day and night, at all times of the year; whereas among the Orientals the hours, and all other divisions of the natural day and night, are of constantly varying duration, and the divisions of the day vary from those of the night, excepting at the equinoxes.

The natural day was at first divided into three parts, morning, noon, and evening, which are mentioned by David as hours or times of prayer (Ps. lv. 17).

The natural night was also originally divided into three parts, or watches (Ps. lxxiii. 6; xc. 4). The first, or *beginning of the watches*, is mentioned in Lam. ii. 19; the *middle watch*, in Judg. vii. 19; and the *morning watch*, in Exod. xiv. 24. Afterwards the strictness of military discipline among the Greeks and Romans introduced an additional night-watch. The *second and third watches of the night* are mentioned in Luke xii. 38, and the *fourth* in Matt. xiv. 25. The four are mentioned together by our Lord, in Mark xiii. 35, and described by the terms 'the late watch;' 'the midnight;' 'the cock-crowing;' and 'the morning.' The precise beginning and ending of each of the four watches is thus determined:

1. 'The late' began at sunset and ended with the third hour of the night, including the evening dawn, or twilight. It was also called 'even-tide' (Mark xi. 11), or simply 'evening' (John xx. 19).
2. 'The midnight' lasted from the third hour till midnight.
3. 'The cock-crowing' lasted from midnight till the third hour after, or to the ninth hour of the night. It included the two cock-crowings, with the second of which it ended.
4. 'Early' lasted from the ninth to the twelfth hour of the night, or sunrise, including the morning dawn, or twilight. It was also called 'morning,' or 'morning-tide' (John xviii. 28).

The division of the day into twelve hours was common among the Jews after the captivity in Babylon. The word hour first occurs in the book of Daniel (iv. 19); and it is admitted by the Jewish writers that this division of the day was borrowed by them from the Babylonians. Our Lord appeals to this ancient, and then long-established, division, as a matter of public notoriety: 'Are there not twelve hours in the day?' (John xi. 9).

This, however, was the division of the natural day into twelve hours, which were therefore variable according to the seasons of the year, at all places except the equator; and equal, or of the mean length, only at the vernal and autumnal equinoxes; being longer in the summer half-year, and shorter in the winter. The inconvenience of this has already been intimated.

The first hour of the day began at sunrise; the sixth hour ended at mid-day, or noon; the seventh hour began at noon; and the twelfth hour ended at sunset.

The days of the week had no proper names among the Hebrews, but were distinguished only by their numeral order [WEEK].

DEACON. This word in its more extended sense is used, both in Scripture and in ecclesiastical writers, to designate any person who ministers in God's service. In 2 Cor. vi. 4, the Apostle says, 'But in all things approving ourselves as the ministers (deacons) of God.' Again, Eph. iii. 7, 'Whereof I was made a minister' (deacon); and in Col. i. 23, he employs the same epithet to express the character of his office. In Rom. xv. 8, St. Paul calls our Lord 'minister of the circumcision,' literally *deacon of the circumcision*; and, in his Epistle to the Philippians, he addresses himself to the bishops and deacons (Phil. i. 1).

But it is in its more confined sense, as it expresses the third order of the ministry of the primitive Church, that we are to examine the meaning of the word *Deacon*.

In Acts vi. we have an account of the election of seven persons to the office of deaconship for the purpose of superintending the distribution of the church's bounty. That their duties, however, were not of an exclusively secular character is clear from the fact that both Philip and Stephen preached, and that one of them also baptized. Ignatius, a martyr-disciple of St. John, and bishop of Antioch, A.D. 68, styles them at once 'ministers of the mysteries of Christ,' adding, that they are not ministers of meats and drinks, but of the Church of God.

Cyprian, bishop of Carthage, A.D. 250 (whilst referring their origin to Acts vi.), styles them ministers of episcopacy and of the church: at the same time he asserts that they were called to the ministry of the altar.

Tertullian, a celebrated Father of the second century, classes them with bishops and presbyters as guides and leaders to the laity.

The fourth Council of Carthage expressly forbids the deacon to assume any one function peculiar to the priesthood, by declaring the deacon as consecrated not to the priesthood but to the ministry.

His ordination, moreover, differed from that of presbyter both in its form and in the powers which it conferred. For in the ordination of a presbyter, the presbyters who were present were required to join in the imposition of hands with the bishop: but the ordination of a deacon might be performed by the bishop alone, because, as the 4th Can. of the 4th Council of Carthage declares, he was ordained not to the priesthood, but to the inferior services of the Church. We now proceed to notice what these services specifically were.

1. The deacon's more ordinary duty was to assist the bishop and presbyter in the service of the sanctuary; especially was he charged with the care of the utensils and ornaments appertaining to the holy table.

2. In the administration of the Eucharist, it was theirs to hand the consecrated elements to the people.

3. Deacons had power to administer the sacrament of baptism.

4. The office of the deacon was not to preach, so much as to instruct and catechise the catechumens. His part was, when the bishop or presbyter did not preach, to read a homily from one of the Fathers. St. Ambrose, Bishop of Milan, A.D. 386, says expressly that deacons, in his time, did not preach, though he thinks that they were all originally Evangelists, as were Philip and Stephen.

5. It was the deacon's business to receive the offerings of the people; and having presented them to the bishop or presbyter, to give expression in a *loud voice* to the names of the offerers.

6. Deacons were sometimes authorised, as the bishops' special delegates, to give to penitents the solemn imposition of hands, which was the sign of reconciliation.

7. Deacons had power to suspend the inferior clergy; this, however, was done only when the bishop and presbyter were absent, and the case urgent.

8. The ordinary duty of deacons, with regard to general Councils, was to act as scribes and disputants according as they were directed by their bishops. In some instances they voted as proxies for bishops who could not attend in person; but in no instance do we find them voting in a general Council by virtue of their office. But in provincial synods the deacons were sometimes allowed to give their voice, as well as the presbyters, in their own name.

9. But, besides the above, there were some other offices which the deacon was called upon to fill abroad. One of these was to take care of the necessitous, orphans, widows, martyrs in prison, and all the poor and sick who had any claim upon the public resources of the church. It was also his special duty to notice the spiritual, as well as the bodily, wants of the people; and wherever he detected evils which he could not by his own power and authority cure, it was for him to refer them for redress to the bishop.

In general the number of deacons varied with the wants of a particular church. Sozomen (vii. 19, p. 100) informs us that the church of Rome, after the apostolic model, never had more than seven deacons.

It was not till the close of the third century that deacons were forbidden to marry. The Council of Ancyra, A.D. 344, in its 10th Can., ordains that if a deacon declared at the time of his ordination that he would marry, he should not be deprived of his function if he did marry; but that if he married without having made such a declaration, 'he must fall into the rank of laicks!'

The qualifications required in deacons by the primitive church were the same that were required in bishops and presbyters; and the characteristics of a deacon, given by St. Paul in his Second Epistle to Timothy, were the rule by which a candidate was judged fit for such an office. The second Council of Carthage, 4th Can., forbids the ordination of a deacon before the age of twenty-five; and both the Civil and Canon Law fixed his age to the same period.

The primitive church had its archdeacon, though when the office was first instituted is a matter of dispute with learned men. He was not in priests' orders; but was selected from the deacons by the bishop, and had considerable

authority over the other deacons and inferior orders.

DEACONESS. That the order of Deaconess existed in the Christian church, *even in apostolic days*, is evident from Rom. xvi. 1: 'I commend unto you Phoebe, our sister, which is a servant (a deaconess) of the church which is at Cenchrea.' The earliest Fathers of the church, moreover, speak of the same order of persons.

Certain qualifications were necessary in those who were taken into this order.

1. It was necessary that she should be a widow.

2. No widow, unless she had borne children, could become a deaconess. This rule arose out of a belief that no person but a mother can possess those sympathizing and tender feelings which ought to animate the deaconess in the discharge of her peculiar duties.

3. The early church was very strict in exacting the rule which prohibits the election of any to be deaconesses who had been twice married, though lawfully, and successively to two husbands, one after the other.

It is a disputed point with some learned men whether deaconesses were ordained by imposition of hands. However, the fifteenth Can. of the Council of Chalcedon expressly declares that deaconesses were so ordained, and this is fully confirmed by the author of the *Apost. Constitutions*, viii. 19. Still, deaconesses were not consecrated to any *priestly* function. Some heretics, indeed, allowed women to teach, exorcise, and to administer baptism; but all this she sharply rebukes as being contrary to the apostolic rule.

5. One of the peculiar duties of the deaconesses was to assist at the baptism of women.

6. Another duty the deaconesses had to perform was to instruct and prepare the catechumens for baptism.

7. In times of danger and persecution it was the duty of the deaconesses to visit the martyrs in prison, because they could more easily gain access to them, and with less suspicion and hazard than the deacons.

8. The deaconesses stood at the entrance of the church in order to direct the women as to the place each one should occupy during divine service.

How long this order continued in the Christian church is not quite certain. It was not however discontinued everywhere at once, and it was not till the tenth century that it was wholly abrogated.

DEAD SEA. [SEA.]

DEATH. Since death can be regarded in various points of view, the descriptions of it must necessarily vary. If we consider the state of a dead man, as it strikes the senses, death is the cessation of natural life. If we consider the cause of death, we may place it in that permanent and entire cessation of the feeling and motion of the body which results from the destruction of the body. Among theologians, death is commonly said to consist in the separation of soul and body, implying that the soul still exists when the body perishes. Death does not consist in this separation, but this separation is the consequence of death. As soon as the body loses feeling and motion, it is henceforth useless to the soul, which is therefore separated from it.

Scriptural representations, names, and modes of speech respecting death:

(a.) One of the most common in the Old Testament is, *to return to the dust, or to the earth*. Hence the phrase, *the dust of death*. It is founded on the description Gen. ii. 7, and iii. 19, and denotes the dissolution and destruction of the body. Hence the sentiment in Eccles. xii. 7,—‘The dust shall return to the earth as it was, the spirit unto God who gave it.’

(b.) A withdrawing, exhalation, or removal of the breath of life (Ps. civ. 29).

(c.) A removal from the body, a being absent from the body, a departure from it, &c. This description is founded on the comparison of the body with a tent or lodgment in which the soul dwells during this life. Death destroys this tent or house, and commands us to travel on (Job iv. 21; Isa. xxxviii. 12; Ps. liii. 7; 2 Cor. v. 1; 2 Peter i. 13, 14).

(d.) Paul likewise uses the term to be *unclothed*, in reference to death (2 Cor. v. 3, 4); because the body is represented as the garment of the soul, as Plato calls it. The soul, therefore, as long as it is in the body, is clothed; and as soon as it is disembodied, is naked.

(e.) The terms which denote *sleep* are applied frequently in the Bible, as everywhere else, to death (Ps. lxxvi. 5; Jer. li. 39; John xi. 13, seq.).

(f.) Death is frequently compared with and named from a *departure, a going away* (Job x. 21; Ps. xxxix. 4; Matt. xxvi. 24; Phil. i. 23; 2 Tim. iv. 6).

Death, when personified, is described as a ruler and tyrant, having vast power and a great kingdom, over which he reigns. But the ancients also represented it under some figures which are not common among us. We represent it as a man with a scythe, or as a skeleton, &c.; but the Jews, before the exile, frequently represented death as a hunter, who lays *snares* for men (Ps. xviii. 5, 6; xci. 3). After the exile, they represented him as a man, or sometimes as an angel (the angel of Death), with a cup of poison, which he reaches to men. From this representation appears to have arisen the phrase, which occurs in the New Testament, to *taste death* (Matt. xvi. 28; Heb. ii. 9), which, however, in common speech, signifies merely to *die*, without reminding one of the origin of the phrase. The case is the same with the phrase to *see death* (Ps. lxxxix. 48; Luke ii. 26).

DEBIR, a city in the tribe of Judah, about thirty miles south-west from Jerusalem, and ten miles west of Hebron. It was also called Kirjath-sepher (Josh. xv. 15), and Kirjath-sannah (xv. 49). The name Debir means ‘a word’ or ‘oracle,’ and is applied to that most secret and separated part of the Temple, or of the most holy place, in which the ark of the covenant was placed, and in which responses were given from above the cherubim. From this, coupled with the fact that Kirjath-sepher means ‘book-city,’ it has been conjectured that Debir was some particularly sacred place or seat of learning among the Canaanites, and a repository of their records. ‘It is not indeed probable,’ as Professor Bush remarks, ‘that writing and books, in our sense of the words, were very common among the Canaanites; but some method of recording events, and a sort of

learning, was doubtless cultivated in those regions.’ Debir was taken by Joshua (xi. 38); but it being afterwards retaken by the Canaanites, Caleb, to whom it was assigned, gave his daughter Achsah in marriage to his nephew Othniel for his bravery in carrying it by storm (Josh. xv. 16). The town was afterwards given to the priests (xxi. 15). No trace of it is to be found at the present time.

There were two other places called Debir: one belonging to Gad, beyond Jordan (Josh. xiii. 26); the other to Benjamin, though originally in Judah.

DEBORAH (*a bee*), a prophetess, wife of Lapidoth. She dwelt, probably, in a tent, under a well-known palm-tree between Ramah and Bethel, where she judged Israel (Judg. iv. 4, 5). This in all likelihood means that she was the organ of communication between God and his people, and probably, on account of the influence and authority of her character, was accounted in some sort as the head of the nation, to whom questions of doubt and difficulty were referred for decision. In her triumphal song she says—

‘In the days of Shamgar, son of Anath,

In the days of Jael, the ways lay desert,

And high-way travellers went in winding by-paths.

Leaders failed in Israel, they failed,

Until that I Deborah arose,

That I arose, a mother in Israel.’

From the further intimations which that song contains, and from other circumstances, the people would appear to have sunk into a state of total discouragement under the oppression of the Canaanites; so that it was difficult to rouse them from their despondency and to induce them to make any exertion to burst the fetters of their bondage. From the gratitude which Deborah expresses towards the people for the effort which they finally made, we are warranted in drawing the conclusion that she had long endeavoured to instigate them to this step in vain. At length she summoned Barak, the son of Abinoam, from Kedesh, a city of Naphtali, on a mountain not far from Hazor, and made known to him the will of God that he should undertake an enterprise for the deliverance of his country. But such was his disheartened state of feeling, and at the same time such his confidence in the superior character and authority of Deborah, that he assented to go only on the condition that she would accompany him. To this she at length consented. They then repaired together to Kedesh, and collected there—in the immediate vicinity of Hazor, the capital of the dominant power—ten thousand men, with whom they marched southward, and encamped on Mount Tabor. Sisera, the general of Jabin, king of Hazor, who was at the head of the Canaanitish confederacy, immediately collected an army, pursued them, and encamped in face of them in the great plain of Esdraelon. Encouraged by Deborah, Barak boldly descended from Tabor into the plain with his ten thousand men to give battle to the far superior host of Sisera, which was rendered the more formidable to the Israelites by nine hundred chariots of iron. The Canaanites were beaten; and Barak pursued them northward to Harosheth. Sisera himself, being hotly pursued, alighted from his chariot and escaped on foot to the tent of Heber the Kenite,

by whose wife he was slain. This great victory (dated about B.C. 1296), which seems to have been followed up, broke the power of the native princes, and secured to the Israelites a repose of forty years' duration. During part of this time Deborah probably continued to exercise her former authority; but nothing more of her history is known.

The song of triumph, which was composed in consequence of the great victory over Sisera, is said to have been 'sung by Deborah and Barak.' It is usually regarded as the composition of Deborah; and was probably indited by her to be sung on the return of Barak and his warriors from the pursuit. It is a peculiarly fine specimen of the earlier poetry of the Hebrews.

2. **DEBORAH.** The nurse of Rebekah, whom she accompanied to the land of Canaan; she died near Beth-el, and was buried under an oak, which for that reason was thenceforth called *Allon-bachuth*—'the oak of weeping' (Gen. xxxv. 8).

DECALOGUE, the ten words (Exod. xxxiv. 28; Dent. iv. 13; x. 4). This is the name most usually given by the Greek Fathers to the law of the two tables given by God to Moses on Mount Sinai. The Decalogue was written on two stone slabs (Exod. xxxi. 18), which, having been broken by Moses (xxxii. 19), were renewed by God (xxxiv. 1, &c.). They are said (Dent. ix. 10) to have been written by the finger of God, an expression which always implies an immediate act of the Deity. The decalogue is five times alluded to in the New Testament, there called *commandments*, but only the latter precepts are specifically cited, which refer to our duties to each other (Matt. xvii. 18, 19, &c.; Mark x. 19; Luke xviii. 20; Rom. xiii. 9; vii. 7, 8; Matt. v. 1 Tim. i. 9, 10). [Law.]

The circumstance of these precepts being called *the ten words* has doubtless led to the belief that the two tables contained ten distinct precepts, five in each table; while some have supposed that they were called by this name to denote their perfection, *ten* being considered the most perfect of numbers. Philo-Judæus divides them into two pentads, the first pentad ending with Exod. xx. 12, 'Honour thy father and thy mother,' &c., or the *fifth* commandment of the Greek, Reformed, and Anglican churches; while the more general opinion among Christians is that the first table contained our duty to God, ending with the law to keep the sabbath holy, and the second, our duty to our neighbour. As they are not numerically divided in the Scriptures, so that we cannot positively say which is the first, which the second, &c., it may not prove uninteresting to the student in Biblical literature, if we here give a brief account of the different modes of dividing them which have prevailed among Jews and Christians. These may be classed as the Talmudic, the Origenian, and the two Masoretic divisions.

According to the division contained in the Talmud, the first commandment consists of the words 'I am the Lord thy God, who brought thee out of the land of Egypt, out of the house of bondage' (Exod. xx. 2; Dent. v. 6); the second (Exod. iii. 4), 'Thou shalt have none other gods beside me; thou shalt not make to thyself any graven image, &c. to ver. 6; the third, 'Thou shalt not take

God's name in vain,' &c.; the fourth, 'Remember to keep holy the sabbath day,' &c.; the fifth, 'Honour thy father and thy mother,' &c.; the sixth, 'Thou shalt not kill;' the seventh, 'Thou shalt not commit adultery;' the eighth, 'Thou shalt not steal;' the ninth, 'Thou shalt not bear false witness,' &c.; and the tenth, 'Thou shalt not covet,' &c. to the end.

The next division is that approved by Origen, and is the one in use in the Greek and in all the Reformed Churches, except the Lutheran.

Although Origen was acquainted with the differing opinions which existed in his time in regard to this subject, it is evident from his own words that he knew nothing of that division by which the number *ten* is completed by making the prohibition against coveting either the house or the wife a distinct commandment. In his eighth *Homily on Genesis*, after citing the words, 'I am the Lord thy God, who brought thee out of the land of Egypt,' he adds, 'this is not a part of the commandment.' The first commandment is, 'Thou shalt have no other gods but me,' and then follows, 'Thou shalt not make an idol.' These together are thought by some to make one commandment; but in this case the number ten will not be complete—where then will be the truth of the decalogue? But if it be divided as we have done in the last sentence, the full number will be evident. The first commandment therefore is, 'Thou shalt have no other gods but me,' and the second, 'Thou shalt not make to thyself an idol, nor a likeness,' &c. Gregory Nazianzen and Jerome take the same view with Origen. It is also supported by the learned Jews Philo and Josephus, who speak of it as the received division of the Jewish Church.

It appears to have been forgotten in the Western Church, but was revived by Calvin in 1536, and is also received by that section of the Lutherans who followed Bucer, called the Tetrapolitan. It is adopted by Calmet, and is that followed in the present Russian Church, as well as by the Greeks in general. It appeared in the Bishops' Book in 1537, and was adopted by the Anglican Church at the Reformation (1548), substituting *seventh* for sabbath-day in her formularies. The same division was published with approbation by Bonner in his *Homilies* in 1555.

We shall next proceed to describe the two Masoretic divisions. The first is that in Exodus. According to this arrangement, the two first commandments (according to the Origenian or Greek division), that is, the commandment concerning the worship of one God, and that concerning images, make but one; the second is, 'Thou shalt not take the name of the Lord thy God in vain,' and so on until we arrive at the two last, the former of which is, 'Thou shalt not covet thy neighbour's house,' and the last or tenth, 'Thou shalt not covet thy neighbour's wife, nor his servant,' &c. to the end. This was the division approved by Luther, and it has been ever since his time received by the Lutheran Church. This division is also followed in the Trent catechism, and may therefore be called the Roman Catholic division.

Those who follow this division have been accustomed to give the decalogue very generally in an abridged form: thus the first commandment in the Lutheran shorter catechism is simply, 'Thou

shalt' have no other gods but me;' the second, 'Thou shalt not take the name of thy God in vain;' the third, 'Thou shalt sanctify the sabbath-day.' A similar practice is followed by the Roman Catholics, although they, as well as the Lutherans, in their larger catechisms (as the Douay) give them at full length. This practice has given rise to the charge made against those denominations of leaving out the second commandment, whereas it would have been more correct to say that they had mutilated the first, or at least that the form in which they give it has the effect of concealing a most important part of it from such as had only access to their shorter catechisms.

The last division is the *second Masoretic*, or that of Deuteronomy, sometimes called the Augustinian. This division differs from the former simply in placing the precept 'Thou shalt not covet thy neighbour's wife' before 'Thou shalt not covet thy neighbour's house,' &c.; and for this transposition it has the authority of Deut. v. 21. The authority of the Masoretes cannot, however, be of sufficient force to supersede the earlier traditions of Philo and Josephus.

DECAPOLIS. This appears to denote not, as is frequently stated, a particular province or district, but certain *Ten Cities*, including the adjacent villages, which resembled each other in being inhabited mostly by Gentiles, and in their civic institutions and privileges. In Matt. iv. 25, it is said, 'Multitudes followed Jesus from Galilee, and from Decapolis, and from Jerusalem, and from Judea, and from beyond Jordan.' This must be considered as a popular mode of expression, just as, in describing a public meeting in this country, it might be said 'numbers attended it from Kent and Sussex, and from the Cinque Ports' We, therefore, cannot agree with Dr. Lightfoot in thinking it 'absurd to reckon the most famed cities of Galilee for cities of Decapolis, when, both in sacred and profane authors, Galilee is plainly distinguished from Decapolis.' One at least of the Decapollitan towns (Scythopolis, formerly Bethshan) was in Galilee, and several, if not all the rest, were in the country beyond Jordan. Pliny gives the following list, but allows that a difference of opinion existed as to its correctness. 1. Damascus; 2. Philadelphia; 3. Raphana; 4. Scythopolis; 5. Gadara; 6. Hippos; 7. Dion; 8. Pella; 9. Galasa; 10. Cauatha. Josephus speaks of Gadara and Hippos as Grecian cities, and calls Scythopolis the greatest city of the Decapolis, from which it may be inferred that he excluded Damascus from the number. For Damascus and Raphana, Cellarius substitutes Caesarea Philippi and Gergesa, and Ptolemy Capitolias. The name Decapolis was in course of time applied to more than ten towns, a circumstance which may in part account for the discrepancies in the lists given by various writers. The Decapollitan towns referred to in the Gospels were evidently situated not far from the sea of Galilee (Mark v. 20; vii. 31).

DEDAN. Two persons of this name are mentioned in Scripture; one the son of Cush (Gen. x. 7), and the other the second son of Jokshan, Abraham's son by Keturah (Gen. xxv. 3). Both were founders of tribes, afterwards repeatedly named in Scripture.

Of the descendants of the Cushite Dedan, very

little is known. It is supposed that they settled in southern Arabia, near the Persian Gulf; but the existence in this quarter of a place called Dadan or Dadena, is the chief ground for this conclusion.

The descendants of the Abrahamite Jokshan seem to have lived in the neighbourhood of Idumæa; for the prophet Jeremiah (xlix. 8) calls on them to consult their safety, because the calamity of the sons of Esau, i. e. the Idumæans, was at hand. The same prophet (xxv. 23) connects them with Thema and Buz, two other tribes of Arabia Petraea, or Arabia Deserta, as does Ezekiel (xxv. 13) with Theman, a district of Edom. It is not always clear when the name occurs which of the two Dedans is intended; but it is probably the Cushite tribe, which is described as addicted to commerce, or rather, perhaps, engaged in the carrying-trade. Its 'travelling companies,' or caravans, are mentioned by Isaiah (xli. 13); in Ezekiel (xxvii. 20), the Dedanites are described as supplying the markets of Tyre with flowing riding-cloths: and elsewhere (xxxviii. 13) the same prophet names them, along with the merchants of Tarshish.

DEDICATION, a religious ceremony, whereby anything is dedicated or consecrated to the service of God; and it appears to have originated in the desire to commence, with peculiar solemnity, the practical use and application of whatever had been set apart to the divine service. Thus Moses dedicated the Tabernacle in the Wilderness (Exod. xl.; Num. vii.); Solomon his temple (1 Kings viii.); the returned exiles theirs (Ezra vi. 16, 17); Herod his. The Maccabees, having cleansed the temple from its pollutions under Antiochus Epiphanes, again dedicated the altar (1 Macc. iv. 52-9), and an annual festival was established in commemoration of the event. This feast was celebrated not only at Jerusalem, but everywhere throughout the country; in which respect it differed from the feasts of the Passover, Pentecost, and Tabernacles, which could only be observed at Jerusalem.

In John x. 22, 23, we are told that Jesus was at Jerusalem, walking in Solomon's porch at the time of 'the feast of the dedication, and it was winter.' This is usually supposed to have been the feast commemorating the dedication by Judas Maccabæus, which was celebrated in the month Cisleu, about the winter solstice (answering to the 15th of December). There seems no reason to disturb this conclusion; for the dedication of Solomon's temple was in the seventh month, or autumn; that of Zerubbabel's temple in the month Adar, in the spring; and, although that of Herod's temple was in the winter, we know not that it was celebrated by an annual feast, while the Maccabæan dedication was a festival much observed in the time of Christ.

Not only were sacred places thus dedicated; but some kind of dedicatory solemnity was observed with respect to cities, walls, gates, and even private houses (Deut. xx. 5; Ps. xxx. title; Neh. xii. 27). We may trace the continuance of these usages in the custom of consecrating or dedicating churches and chapels; and in the ceremonies connected with the 'opening' of roads, markets, bridges, &c., and with the launching of ships.

DEGREES, PSALMS OF. [PSALMS.]

DELILAH, the woman whom Samson loved, and who betrayed him to his enemies (Judg. xvi.) [**SAMSON**].

DELUGE. The narrative of a flood, given in the book of Genesis (vii. and viii.), by which, according to the literal sense of the description, the whole world was overwhelmed and every terrestrial creature destroyed, with the exception of one human family and the representatives of each species of animal, supernaturally preserved in an ark, constructed by divine appointment for the purpose, need not here be followed in detail. The account furnished by the sacred historian is circumstantially distinct; and the whole is expressly ascribed to divine agency; but, in several of the lesser particulars, secondary causes, as rain, 'the opening of the windows of Heaven' (vii. 11), and the 'breaking up of the fountains of the great deep,' are mentioned, and again the effect of wind in drying up the waters (viii. 1). It is chiefly to be remarked that the whole event is represented as both commencing and terminating in the most gradual and quiet manner, without anything at all resembling the catastrophes and convulsions often pictured in vulgar imagination as accompanying it. When the waters subsided, so little was the surface of the earth changed that the *vegetation continued uninjured*; the olive-trees remained from which the dove brought its token.

We allude particularly to these circumstances in the narrative as being those which bear most upon the probable *nature* and extent of the event, which it is our main object in the present article to examine, according to the tenor of what little evidence can be collected on the subject, whether from the terms of the narrative or from other sources of information which may be opened to us by the researches of science.

Much, indeed, might be said on the subject in other points of view; and, especially in a more properly theological sense, it may be dwelt upon as a part of the great series of divine interpositions and dispensations which the sacred history discloses. But our present object, as well as limits, will restrict us from enlarging on these topics; or, again, upon the various ideas which have prevailed on the subject apart from Scripture on the one hand, or science on the other. Thus, we need merely allude to the fact that in almost all nations, from the remotest periods, there have prevailed certain mythological narratives and legendary tales of similar catastrophes. Such narratives have formed a part of the rude belief of the Egyptians, Chaldeans, Greeks, Seythians, and Celtic tribes. They have also been discovered among the Peruvians and Mexicans, and the South Sea Islanders. For details on these points we refer our readers to the work of Bryant (*Ancient Mythology*), and more especially to the treatise of the Rev. L. V. Harcourt on the Deluge, who appears to have collected everything of this kind bearing on the subject.

With reference to our present design the most material question is that of the existence of those traces which it might be supposed would be discovered of the action of such a deluge on the existing surface of the globe; and the consequent views which we must adopt according to the degree of accordance or discordance which such evidences may offer, as compared with the written narrative.

The evidence which geology may disclose and which can in any degree bear on our present subject must, from the nature of the case, be confined to indications of superficial action attributable to the agency of water, subsequent to the latest period of the regular geological formations, and, corresponding in character to a temporary inundation of a *quiet* and tranquil nature, of a depth sufficient to cover the highest mountains, and, lastly (as indeed this condition implies), extending over the whole globe; or, if these conditions should not be fulfilled, then, indications of at least something approaching to this, or with which the terms of the description may be fairly understood and interpreted to correspond.

The general result of the geological researches into this subject is briefly this: the traces of currents, and the like, which the surface of the earth does exhibit, and which *might* be ascribed to diluvial action of some kind, are certainly not the results of *any universal* simultaneous submergence, but of *many distinct*, local, aqueous forces, for the most part continued in action for long periods, and of a kind precisely analogous to such agency as is now at work. While, further, many parts of the existing surface show no traces of such operations; and the phenomena of the volcanic districts prove distinctly that during the enormous periods which have elapsed since the craters were active, no deluge could possibly have passed over them without removing all those lighter portions of their exuvie which have evidently remained wholly untouched since they were ejected.

Upon the whole it is thus apparent, that we have no evidence whatever of any great aqueous revolution at any comparatively recent period having affected the earth's surface over any considerable tract: changes, doubtless, may have been produced on a small scale in isolated districts. The phenomena presented by caves containing bones, as at Kirkdale and other localities, are not of a kind forming any breach in the continuity of the analogies by which all the changes in the surface are more and more seen to have been carried on. But a recent simultaneous influx of water covering the globe, and ascending above the level of the mountains, must have left indisputable traces of its influence, which not only is *not* the case, but *against* which we have positive facts standing out. Apart from the testimonies of geology there are other sciences which must be interrogated on such a subject. These are, chiefly, terrestrial physics, to assign the possibility of a supply of water to stand all over the globe five miles in depth *above* the level of the ordinary sea;—natural history, to count the myriads of species of living creatures to be preserved and continued in the ark;—mechanics, to construct such a vessel;—with some others not less necessary to the case. But we have no disposition to enter more minutely on such points: the reader will find them most clearly and candidly stated in Dr. Pye Smith's *Geology and Scripture*, &c. p. 130, 2nd edit.

Let us now glance at the nature and possible solutions of the difficulty thus presented. We believe only two main solutions have been attempted. One is that proposed by Dr. Pye Smith (ib. p. 294), who expressly contends that there is no real contradiction between these facts and the

description in the Mosaic record, *when the latter is correctly interpreted*. This more correct interpretation then refers, in the first instance, to the proper import of the Scripture terms commonly taken to imply the *universality* of the deluge. These the author shows, by a large comparison of similar passages, are only to be understood as expressing a *great extent*; often, indeed, the very same phrase is applied to a very limited region or country, as in Gen. xli. 56; Deut. ii. 25; Acts ii. 5, &c. Thus, so far as these expressions are concerned, the description may apply to a local deluge.

Next, the destruction of the whole existing human race does not by any means imply this universality, since, by ingenious considerations as to the multiplication of mankind at the alleged era of the deluge, the author has shown that they probably had not extended beyond a comparatively limited district of the East.

A local destruction of animal life would also allow of such a reduction of the numbers to be included in the ark, as might obviate objections on that score; and here again the Oriental idiom may save the necessity of the *literal* supposition of every actual species being included.

Again, certain peculiar difficulties connected with the resting of the ark on Mount Ararat are combated by supposing the name incorrectly applied to the mountain now so designated, and really to belong to one of much lower elevation.

Lastly, this author suggests considerations tending to fix the region which may have been the scene of the actual inundation described by Moses, in about that part of Western Asia where there is a large district now considerably depressed below the level of the sea: this might have been submerged by the joint action of rain, and an elevation of the bed of the Persian and Indian Seas. And, finally, he quotes the opinions of several approved divines in confirmation of such a view, especially as bearing upon all the essential religious instruction which the narrative is calculated to convey.

Other attempts have been made with more or less probability to assign particular localities as the scene of the Mosaic deluge, if understood to have been partial. Some diluvial beds posterior to the tertiary formations have been occasionally pointed out as offering some probability of such an origin. Thus, e. g. Mr. W. J. Hamilton, secretary in the Geological Society, in his *Tour in Asia Minor* (vol. ii. p. 386), found in the plains of Armenia, especially in some localities near Khorassan and on the banks of the Arpachai or Araxes, a remarkable thin bed of marl containing shells of tertiary (*qu.* recent?) species: these he attributes to a local deluge occurring (as the position of the bed indicates) after the cessation of the volcanic action which has taken place in that district. He expressly adds that he regards this deluge as probably coincident with the Mosaic; understanding the latter in a restricted or partial sense, and imagining it explained by physical causes which might have followed the volcanic action.

The only other mode of viewing the subject is that which, accepting the letter of the Scriptural narrative, makes the deluge strictly universal; and allowing (as they *must* be allowed) all the difficulties, not to say contradictions, in a natural

sense, involved in it, accounts for them all by *supernatural* agency. In fact, the terms of the narrative, strictly taken, may perhaps be understood throughout as representing the whole event, from beginning to end, as entirely of a miraculous nature. If so, it may be said, there is an end to all difficulties or question, since there are no limits to omnipotence; and one miracle is not greater than another. Thus, Mr. Lyell (*Principles of Geol.* iv. 219. 4th ed.), after ably recapitulating the main points of evidence, as far as physical causes are concerned, remarks, 'If we believe the flood to have been a temporary suspension of the ordinary laws of the natural world, requiring a miraculous interposition of the divine power, then it is evident that the credibility of such an event cannot be enhanced by any series of inundations, however analogous, of which the geologist may imagine he has discovered the proofs. For my own part, I have always considered the flood, when its universality, in the strictest sense of the term, is insisted on, as a preternatural event far beyond the reach of philosophical inquiry, whether as to the causes employed to produce it, or the effects most likely to result from it.'

In a word, if we suppose the flood to have been miraculously produced, and all the difficulties thus overcome, we must also suppose that it was not only miraculously terminated also, but every trace and mark of it supernaturally effaced and destroyed.

Now, considering the immense amount of supernatural agency thus rendered necessary, this hypothesis has appeared to some quite untenable. Dr. Pye Smith, in particular (whom no one will suspect of any leaning to scepticism), enlarges on the difficulty (p. 137, and note), and offers some excellent remarks on the general question of miracles (p. 84-89); and there can be no doubt that, however plausible may be the assertion that all miracles are alike, yet the idea of supernatural agency to so enormous an amount as in the present instance is, to many minds at least, very staggering, if not wholly inadmissible. In fact, in stretching the argument to such an extent, it must be borne in mind, that we may be trenching upon difficulties in another quarter, and not sufficiently regarding the force of the evidence on which *any* miracles are supported [MIRACLE].

In any point of view, it must be admitted that the subject involves difficulties of no inconsiderable amount; and if, after due consideration of the suggestions offered for their solution, we should still feel it necessary to retain a cautious suspense of judgment on the subject, it may be also borne in mind that such hesitation will not involve the rejection of any material religious doctrine.

DEMAS, a Thessalonian Christian who was for a time associated with St. Paul, but who afterwards abandoned him at Thessalonica, either from being discouraged by the hardships and perils of the service, or in pursuit of temporal advantages (Col. iv. 14; Philem. 24; 2 Tim. iv. 10).

DEMETRIUS, a man's name, denoting a votary of Ceres, and very common among the Greeks. The persons of this name mentioned in the history of the Maccabees, and in the New Testament, are—

1. DEMETRIUS SOTER, king of Syria. He was son of Seleucus IV., surnamed Philopater.

tor; but, being an hostage at Rome at the time of his father's death, his uncle, the notorious Antiochus Epiphanes, assumed the crown of Syria, and retained it eleven years. After him it was held two years by his son Antiochus Eupator, who was put to death in B.C. 162 by Demetrius, who then arrived in Syria and secured the royal heritage from which he had so long been excluded. He reigned twelve years, B.C. 162-150. The points in which his history connects him with the Jews are alone of interest in this work, and these points belong to the history of the Maccabees [see art. MACCABEES]. To his time belong the latter end of the government of Judas in Israel and the beginning of that of Jonathan. He acted oppressively and unjustly towards them; but, when a rival arose in the person of Alexander Balas, he bade so high for the support of Jonathan as to create a doubt of his sincerity; for which cause, as well as from resentment at the injuries he had inflicted on them, the Jews espoused the cause of Balas, to whose success they in no slight degree contributed [ALEXANDER BALAS].

2. DEMETRIUS NICATOR, or NICANOR, son of the preceding, but who was excluded from the throne till B.C. 146, by the success of Alexander Balas, and then recovered it chiefly by the assistance of his father-in-law Ptolemy Philometor. He at first treated the Jews well, but eventually gave them so much cause for dissatisfaction that they readily espoused the cause of Antiochus Theos, son of Alexander Balas. Demetrius underwent many vicissitudes, and passed several years (B.C. 141-135) in captivity among the Parthians, from which he eventually returned and recovered his throne, which he continued to occupy till B.C. 126, when he was defeated in battle by the pretender Alexander Zebina, and afterwards slain at Tyre, whither he had fled [MACCABEES].

3. DEMETRIUS, a silversmith at Ephesus, who, being alarmed at the progress of the Gospel under the preaching of Paul, assembled his fellow-craftsmen, and excited a tumult by haranguing them on the danger that threatened the worship of the great goddess Diana, and consequently their own craft as silversmiths. Their employment was to make 'silver shrines for Diana' (Acts xix. 24); and it is now generally agreed that these 'shrines' were silver models of the temple, or of its adytum or chapel, in which perhaps a little image of the goddess was placed. These, it seems, were purchased by foreigners, who either could not perform their devotions at the temple itself, or who, after having done so, carried them away as memorials or for purposes of worship. The continual resort of foreigners to Ephesus from all parts, on account of the singular veneration in which the image of the goddess was held, must have rendered this manufacture very profitable, and sufficiently explains the anxiety of Demetrius and his fellow-craftsmen.

4. DEMETRIUS, a Christian, mentioned with commendation in 3 John 12. From the connexion of St. John with Ephesus at the time the Epistle was written, some have supposed that this Demetrius is the same as the preceding, and that he had been converted to Christianity. But this is a mere conjecture, rendered the more uncertain by the commonness of the name.

DEMON. This word is used by heathen writers with great latitude, being applied by them, 1. to every order of beings superior to man, including even the Highest; 2. it is applied to any particular divinity; 3. to the inferior divinities; 4. to a class of beings between gods and men. Of these latter some were *habitually* benevolent, and others malignant. To the former class belong the tutelary genii of cities, and the guardian spirits of individuals, as the demon of Socrates. 5. By an easy metonymy it is used to denote fortune, chance, fate. Since no distinct ideas of the ancient Jewish doctrines concerning demons can be obtained from the Septuagint, we next have recourse to the heathens, and from their writings, owing to the universal prevalence of belief in demons, ample information may be obtained. The following is offered as a summary of their opinions.

1. Demons, in the theology of the Gentiles, are middle beings, between gods and mortals. This is the judgment of Plato, which will be considered decisive:—'Every demon is a middle being between God and mortal.'

2. Demons were of two kinds; the one were the souls of good men, which upon their departure from the body were called heroes, were afterwards raised to the dignity of demons, and subsequently to that of gods. It was also believed that the souls of bad men became evil demons. The other kind of demons were of more noble origin than the human race, having never inhabited human bodies.

3. Those demons who had once been souls of men were the objects of *immediate worship* among the heathens (Deut. xxvi. 14; Ps. cvi. 28; Isa. viii. 19), and it is in contradistinction to these that Jehovah is so frequently called 'the living God' (Deut. v. 6, &c. &c.).

4. The heathens held that some demons were malignant by nature, and not merely so when provoked and offended. Plutarch says, 'It is a very ancient opinion that there are certain *wicked* and *malignant* demons, who envy good men, and endeavour to hinder them in the pursuit of virtue, lest they should be partakers of greater happiness than they enjoy.' Pythagoras held that certain demons sent diseases to men and cattle.

In later times Josephus uses the word demon always in a bad sense, as do the writers of the New Testament, when using it as *from themselves*, and in their *own sense* of it. 'Demons are no other than the spirits of the wicked, that enter into men and kill them, unless they can obtain some help against them.'

It is frequently supposed that the demons of the New Testament are fallen angels; on the contrary it is maintained by Farmer, that the word is never applied to the Devil and his angels, and that there is no sufficient reason for restricting the term to spirits of a higher order than mankind. They who uphold the former opinion urge that our Lord, when accused of casting out demons by Beelzebub, the prince of demons, replies, How can Satan cast out Satan (Mark iii. 23, &c.)? It is further urged, that it is but fair and natural to suppose that the writers of the New Testament use the word demons in the same sense in which it was understood by their contemporaries, which, as it appears from Josephus and other authorities, was, that of the spirits of

the wicked; and that if these writers had meant anything else they would have given notice of so wide a deviation from popular usage.

DEMONIACS, demonized persons, in the New Testament, are those who were supposed to have a demon or demons occupying them, suspending the faculties of their minds, and governing the members of their bodies, so that what was said and done by the demoniacs was ascribed to the in-dwelling demon.

The correctness of the opinion respecting those who are called demoniacs in the New Testament which prevailed among the Jews and other nations in the time of our Lord and his Apostles, has been called in question. On the one hand it is urged that the details of the evangelical history afford decisive evidence of the truth and reality of demoniacal possessions in the sense already explained, at least during the commencement of Christianity; on the other hand it is contended that the accounts in question may all be understood as the phenomena of certain diseases, particularly hypochondria, insanity, and epilepsy; that the sacred writers used the *popular language* in reference to the subject, but that they themselves understood no more than that the persons were the subjects of ordinary diseases. Here issue is joined—and it is to the evidence in this cause that our attention will now be directed.

Those who contend that the demoniacs were really possessed by an evil spirit, urge the following considerations:—

1. The demoniacs express themselves in a way unusual for hypochondriacal, insane, or epileptic persons (Matt. viii. 29; Mark i. 24); they possessed supernatural strength (Mark v. 4); they adjure Jesus not to torment them; they answer the questions proposed to them in a rational manner; they are distinctly said to have 'come out of' men and to have 'entered into swine,' and that consequently the whole herd, amounting to about two thousand, ran violently down a precipice into the sea (Matt. viii. 32; Mark v. 13). The supposition which has been maintained by Lardner among others, that the swine were *driven into the sea* by the demoniacs, is irreconcilable with the language of the narrative, being also highly improbable in itself: madmen do not act in concert, and rarely pursue the same train of maniacal reasoning.

2. No mental diseases are predicated of the dumb (Matt. ix. 32), or of the blind and dumb (Matt. xii. 22). Do such diseases ever produce blindness?

3. It is admitted that the symptoms of the youth described Matt. xvii. 15; Mark ix. 17; Luke ix. 39, coincide precisely with those of epilepsy, but they are attributed to the agency of the demon in that very account.

4. The damsel at Philippi is said to have been possessed with a spirit of *divination*, which was the means of obtaining much gain to her masters, and to have understood the divine commission of Paul and his companions (Acts xvi. 17). Is this to be ascribed merely to an aberration of mind?

5. The demoniacs themselves confess that they were possessed with demons (Mark v. 9): the same is asserted of them by their relatives (Matt. xv. 22). The Apostles and Evangelists assert that persons possessed with demons were brought

unto Jesus (Matt. iv. 24; Mark i. 32), or met him (Luke viii. 27). Jesus commands them not to make him known as the Messiah (Mark i. 34, margin); rebuked them (Matt. xvii. 18). The Evangelists declare that the demons departed from their victims at his command (Matt. xvii. 18; Mark ix. 25, 26; Luke iv. 35; xi. 14); and Jesus himself asserts it (Luke xiii. 32).

6. The writers of the New Testament make distinctions between the diseased and the demoniacs (Mark i. 32; Luke vi. 17, 18); and Jesus himself does so (Matt. x. 8, &c.).

7. The demoniacs knew Jesus to be the son of God (Matt. viii. 29; Mark i. 24; v. 7), and the Christ (Luke iv. 41).

8. Jesus addresses the demons (Matt. viii. 32; Mark v. 18; ix. 25; Luke iv. 35); so does Paul (Acts xvi. 18). Jesus bids them be silent (Mark i. 25); to depart, and enter no more into the person (Mark ix. 25).

9. In Luke x. the seventy are related to have returned to Jesus, saying, 'Lord, even the demons are subject to us through thy name' and Jesus replies, ver. 18, 'I beheld Satan, as lightning, fall from heaven.'

10. When Jesus was accused by the Pharisees of casting out demons by Beelzebub, the prince of the demons, he argued that there could be no discord among demoniacal beings (Matt. xii. 25, &c.).

11. Jesus makes certain *gratis* observations respecting demons (see Matt. xii. 43, 44); which seem like facts in their natural history. In regard to the demon cast out of the youth, which the disciples could not cast out, he says, 'this kind (i. e. demons) goeth not out but by prayer and fasting.' Can these words be understood otherwise than as revealing a real and particular fact respecting the nature of demons (Matt. xvii. 21)?

12. The woman which had a spirit of infirmity, and was bowed together (Luke xiii. 11), is, by our Lord himself, said to have been bound by Satan (v. 16). In the same way St. Peter speaks of all the persons who were healed by Jesus, as being 'oppressed of the devil' (Acts x. 38).

13. It is further pleaded, that it sinks the importance and dignity of our Saviour's miracles, to suppose that when he is said to have cast out devils, all that is meant is, that he healed diseases.

To these arguments the opponents of the theory of real demoniacal possessions reply, generally, that there can be no doubt that it was the *general belief* of the Jewish nation, with the exception of the Sadducees, and of most other nations, that the spirits of dead men, especially of those who had lived evil lives, and died by violent deaths, were permitted to enter the bodies of men, and to produce the effects ascribed to them in the popular creed; but the *fact* and real state of the case was, that those who were considered to be possessed were afflicted with some peculiar diseases of mind or body, which, their true causes not being generally understood, were, as is usual in such cases, ascribed to supernatural powers; and that Jesus and his apostles, wishing of course to be understood by their contemporaries, and owing to other reasons which can be pointed out, were under the necessity of expressing themselves in popular language, and of

seeming to admit, or at least of not denying, its correctness. They further plead that the fact, admitted on all hands, that the demon so actuated the possessed, as that whatever *they* did, was not to be distinguished from *his* agency, reduces the question, so far as *phenomena* are concerned, to one simple inquiry, namely, whether these phenomena are such as can be accounted for without resorting to supernatural agency. They assert that the symptoms predicated of demoniacs correspond with the ordinary symptoms of disease, and especially of hypochondria, insanity, and epilepsy; that the sacred writers themselves give intimations, as plain as could be expected under their circumstances, that they employed popular language; that consequently they are not to be considered as teaching doctrines or asserting facts when they use such language; and that the doctrine of the agency of departed spirits on the bodies of men is inconsistent with certain peculiar and express doctrines of Christ and his apostles.

With regard to the *symptoms* related of the demoniacs, it is urged that such persons as were called demoniacs in other countries, and who seem to have laboured under precisely the same symptoms, are recorded to have been cured by the use of *medicines*. Josephus and the Jewish physicians speak of medicines composed of stones, roots, and herbs, being useful to demoniacs. The cure of *diseases* by such methods is intelligible; but it is rational to believe that the spirits of dead men were dislodged from human bodies by medical prescriptions?

1. With regard to the two demoniacs at Gadara (or one, according to Mark and Luke), it is concluded that they were madmen, who fancied that there were within them innumerable spirits of dead men. Accordingly they dwelt among the *tombs*, about which the souls of the dead were believed to hover, went naked, were ungovernable, cried aloud, attacked passengers, beat themselves, and had in their phrensy broken every chain by which they had been bound. Strength almost superhuman is a common attendant on insanity. Their question, 'Art thou come to torment us?' refers to the cruel treatment of the insane in those times, and which they had no doubt shared, in the endeavours of men to 'tame' them. Both Mark and Luke the *physician* describe the demoniac as in 'his *right mind*,' when healed, which implies previous *insanity* (see also Matt. xii. 22; cv. 28; xvii. 18; Luke vii. 21; viii. 2; ix. 42). It is true that these demoniacs address Jesus as the Son of God, but they might have heard in their lucid intervals that Jesus, whose fame was already diffused throughout Syria, was regarded by the people as the Messiah. They show their insanity, 'their *shaping fancies*,' by imagining they were demons without number, and by requesting permission to enter the swine. Would actual demons choose such an habitation? They peak and answer, indeed, in a rational manner, but agreeably to Locke's definition of madmen, they reason right on false principles, and, taking fancies for realities, make right deductions from them. Thus you shall find a distracted man fancying himself a king, and with a right inference require suitable attendance. Others, who have thought themselves glass, take the needful care to preserve such brittle bodies. It is true

that Jesus commands the *unclean spirit* (so called because believed to be the spirit of a *dead man*), but he does this merely to excite the attention of the people, and to give them full opportunity to observe the miracle. It is not necessary to suppose that the madmen drove the swine, but merely that, in *keeping with all the circumstances*, the *insanity* of the demoniacs was transferred to them, as the leprosy of Naaman was transferred to Gehazi, for the purpose of illustrating the miraculous power of Christ; and though this was a *punitive* miracle, it might serve the good purpose of discouraging the expectation of temporal benefits from him. If the demoniac is represented as worshipping Jesus, it should be remembered that the insane often show great respect to particular persons.

2. The men who were dumb, and both blind and dumb, are not said to have been disordered in their intellects, any more than the blind man in John v. The disease in their organs was *popularly ascribed* to the influence of demons. It is observable that in the parallel passage (Matt. ix. 32), the evangelist says the *man* was dumb.

3. The symptoms of epilepsy in the youth described Matt. xvii. 15, are too evident not to be acknowledged. If the opinion of relatives is to be pressed, it should be noticed that in this case the father says his 'son is lunatic.' It was most probably a case of combined epilepsy and lunacy, which has been common in all ages. Epilepsy was ascribed to the influence of the moon in those times. The literal interpretation of popular language would therefore require us to believe that he was 'moonstruck,' as well as a demoniac.

4. The damsel at Philippi is said by Luke to have been possessed with a spirit of *Apollo*. It was her fixed idea. The gift of divination is said by Cicero to have been ascribed to Apollo. Insane persons, pretending to prophesy under the influence of Apollo, would be likely to gain money from the *credulous*. A belief among the common people that the ravings of insanity were sacred, was not confined to Egypt. The apostle, who taught that an 'idol is nothing in the world,' did not believe in the reality of her soothsaying. Many demoniacs are mentioned, the peculiar symptoms of whose diseases are not stated, as Mary Magdalene (Mark xvi. 9), out of whom Jesus cast seven demons, i. e. restored from an inveterate insanity (seven being the Jewish number of perfection), supposed to be caused by the united agency of seven spirits of the dead. Yet she is said to have been *healed* (Luke viii. 2).

5. If Jesus forbade the demoniacs to say he was the Christ, it was because the declaration of such persons on the subject would do more harm than good. If he rebuked them he also rebuked the wind (Matt. viii. 26), and the fever (Luke iv. 39). If it be said of them, they departed, so it is also said of the leprosy (Mark i. 42).

6. It may be questioned whether the writers of the New Testament make a distinction between the diseased and those possessed of demons, or whether they specify the demoniacs by themselves, as they specify the lunatics (Matt. iv. 24), merely as a distinct and peculiar class of the sick. It is, however, most important to observe that St. Peter includes 'all' who were healed by Jesus, under the phrase *them that were oppressed of the*

16), but formerly it was impressed with the symbols of the republic.

DER'HE, a small town of Lycaonia, in Asia Minor, at the foot of the Taurian mountains, 60 miles south by east from Iconium, and 18 miles east of Lystra. It was the birthplace of Gaius, the friend and fellow-traveller of Paul (Acts xx. 4); and it was to this place that Paul and Barnabas fled when expelled from Iconium, A.D. 41 (Acts xiv. 6).

DESERTS. In the East, wide, extended plains are usually liable to drought, and consequently to barrenness. Hence the Hebrew language describes a plain, a desert, and an unfruitful waste, by the same word. The term which is in general rendered 'wilderness,' means, properly, a grazing tract, uncultivated and destitute of wood, but fit for pasture—a heath or steppe. The pastures of the wilderness are mentioned in Ps. lxx. 13; Joel i. 19; Luke xv. 4; and may be very well explained by reference to the fact, that even the Desert of Arabia, which is utterly burnt up with excessive drought in summer, is in winter and spring covered with rich and tender herbage. Whence it is that the Arabian tribes retreat into their deserts on the approach of the autumnal rains, and when spring has ended and the droughts commence, return to the lands of rivers and mountains, in search of the pastures which the deserts no longer afford. The same word may therefore denote a region which is desert, and also one which, at stated seasons, contains rich and abundant pastures. But in fact the word translated in our Bibles by 'desert' or 'wilderness' often means no more than the common, uncultivated grounds in the neighbourhood of towns on which the inhabitants grazed their domestic cattle.

The term a great desert or wilderness is especially applied to that desert of Stony Arabia in which the Israelites sojourned under Moses (Num. xxi. 20; xxiii. 28; Ps. lxxviii. 7; lxxviii. 40, &c.). This was the most terrible of the deserts with which the Israelites were acquainted, and the only real desert in their immediate neighbourhood. It is described under ARABIA; as is also that Eastern desert extending from the eastern border of the country beyond Judaea to the Euphrates. It is emphatically called 'the Desert,' without any proper name, in Exod. xxxiii. 31; Deut. xi. 24.

The several deserts or wildernesses mentioned in Scripture are the following, which will be found under their respective names: the deserts of Edom, Etham, Judah, Kadesh, Maou, Paran, Shur, Sin, Sinai.

DEVIL. [DEMON; SATAN.]

DEUTERONOMY, the Greek name given by the Alexandrian Jews to the fifth book of Moses. It comprises that series of addresses which the Lawgiver delivered (orally and by writing, i. 5; xxviii. 58, &c.) to assembled Israel in the second month of the fortieth year of their wandering through the desert, when the second generation was about to cross the Jordan, and when the parting hour of Moses had nearly arrived.

The speeches begin with the enumeration of the wonderful dealings of God with the chosen people in the early period of their existence. Moses clearly proves to them the punishment of unbelief, the obduracy of Israel, and the faithful-

ness of Jehovah with regard to his promises, which were now on the point of being accomplished. Fully aware of the tendencies of the people, and foreseeing their alienations, Moses conjures them most impressively to hold fast the commands of the Lord, and not to forget his revelations, lest curses should befall them instead of blessings (ch. i.-iv.). The Lawgiver then expatiates on the spirit of the law, and its reception into the hearts of men, both in a positive and negative way. *Fear*, he says, is the primary effect of the law, as also its *aim*. As Israel had once listened to the announcement of the fundamental laws of the theocracy with a sacred *fear*, in like manner should man also receive, through the whole system of the law, a lively and awful impression of the holiness and majesty of God (ch. v.). But as the essence and sum of the law is love to Jehovah, the only and true God, man shall by the law be reminded of the Divine mercy, so variously manifested in deeds; and this reflection is calculated to rouse in man's heart love for God. This love is the only and true source from which proper respect and obedience to the law can proceed (ch. vi.).

There were, however, two tempting deviations, in following which the people were sure to be led astray. The law, in its strict rigour, was but too apt to tempt them to desert Jehovah, and to yield to idolatry (the very approval of which even in thought polluted the heart), by discontinuing to bear the heavy yoke of the law. Hence the most impressive warnings against Canaan's inhabitants and idols; and hence the declarations that Israel, in placing themselves on a par with the heathens, should have to endure an equal fate with them, and be repelled from the presence of Jehovah (ch. vii. viii.).

The other, not less dangerous, deviation is that of self-righteousness—the proud fancy that all the favours Jehovah had shown to his people were merely in consequence of their own deservings. Therefore Jehovah tells them that it was not through their own worthiness and purity of heart that they inherited the land of the heathens. It was only through his free favour; for their sins bore too strong and constant testimony how little they ought to take credit to themselves for it (ch. ix.).

The history of the people, before and after the exile, shows these two deviations in their fullest bearings. Idolatry we find to have been the besetting sin before that period, and presumptuous pride of heart after it; a proof how intimately acquainted the Lawgiver was with the character and disposition of his people, and how necessary therefore those warnings had been.

Therefore, adds Moses, turn to that which Jehovah, in giving you the tables of the law, and establishing the Tabernacle and priesthood, has intimated as a significant symbol, 'to circumcise the foreskin of your heart,' and to cherish love in your inward soul. Think of Jehovah, the just and merciful, whose blessings and curses shall be set before your eyes as a lasting monument upon the mounts Elal and Gerizim (ch. x. xi.).

The mention of that fact leads the Lawgiver to the domestic and practical life of the people when domiciliated in their true home, the Land of Promise; which he further regulates by a fixed and solid rule, by new laws, which for this,

their new design and purport, form a sort of complement to the laws already given. There, in the land of their forefathers, Jehovah will appoint *one* fixed place for his lasting sanctuary, when every other place dedicated to the worship of idols is to be destroyed. At that chosen spot alone are the sacrifices to be killed, while cattle in general, which are not destined for sacred purposes, but merely for food, may be slaughtered at all places according to convenience—a regulation which still leaves in full force the previous laws concerning the eating of blood, and the share of Jehovah in slaughtered cattle. This sanctuary was to be considered as the central point for all sacred objects. The whole land was, by means of the sanctuary established in the midst of it, consecrated and dedicated to Jehovah. This consecration was incompatible with any defilement whatsoever. On that account the Canaanites must be exterminated, and all idolatrous abominations destroyed, since nothing ought to be added to or taken from the laws of God (ch. xii.). For the same reason (i. e. for the sake of the holiness of the land, diffused from the sacred centre), no false prophets or soothsayers are to be tolerated, as they may turn the minds of the people from the law, by establishing a different one, and therefore even a whole town given to the worship of idols must be demolished by force of arms (ch. xiii.). Neither, in like manner, must the heathen customs of mourning be imitated, or unclean beasts eaten; but the people must always remain true to the *precious* laws concerning food, &c., and show their real attachment to Jehovah and his religion by willingly paying the *tithe* as ordained by the law (ch. xiv.). To the same end likewise shall the regulations concerning the years of release and the festivals of Jehovah (to be solemnized in the place of the new-chosen Sanctuary) be most scrupulously observed (ch. xv. xvi.). Only *unblemished* sacrifices shall be offered, for all idol-worshippers must irrevocably be put to death by stoning. For the execution of due punishment, honest judges must govern the nation, while the highest tribunal shall exist in the place chosen for the Sanctuary, consisting of the priests and judges of the land. If a king be given by God to the people, he shall first of all accommodate himself to the laws of God, and not lead a heathen life. Next to the regal and judicial dignities, the ecclesiastical power shall exist in its full right; and again, next to it, the prophetic order (ch. xvii. xviii.). Of all these institutions, the duties of the judicial power are most clearly defined; for Jehovah does as little suffer that in his land the right of the innocent shall be turned aside, as that indulgence shall be shown to the evil-doer (ch. xix.). The exposition of the civil law is followed by that of the martial law, which has some bearing upon the then impending war with Canaan, as the most important war and representing that with the heathen nations in general (ch. xx.). These are again followed by a series of laws in reference to the preceding, and referring chiefly to hard cases in the judicial courts, by which Moses obviously designed to exhibit the whole of the civil life of his people in its strict application to the theocratic system of law and right. Therefore the form of prayer to be spoken at the offering up of the firstlings and

tithe—the theocratic *confession of faith*—by which every Israelite acknowledges in person that he is what God has enjoined and called him to be, forms a beautiful conclusion of the whole legislation (ch. xxi.—xxvi.).

The blessings and curses of Jehovah, the two opposite extremes which were to be impressed upon the minds of the people at their entrance into Canaan, and which have hitherto been spoken of only in general terms, are now set forth in their fullest detail, picturing in the most lively colours the delightful abundance of rich blessings on the one hand, and the awful visitations of Heaven's wrath on the other. The prophetic speeches visibly and gradually increase in energy and enthusiasm, until the perspective of the remotest future of the people of God lies open to the eye of the inspired Lawgiver in all its chequered details, when his words resolve themselves into a flight of poetical ecstasy, into the strains of a splendid triumphal song in which the tone of grief and lamentation is as heart-rending as the announcement of divine salvation therein is jubilant (ch. xxvii. xxviii.). The history of the law concludes with a supplement concerning him who was deemed worthy by the Lord to transmit his law to Israel (ch. xxxiv.).

Thus much regarding the contents and connection of the book of Deuteronomy.

The *date*, however, of the composition of the book, as well as its *authenticity*, has given rise to a great variety of opinion, more especially among those who are opposed to the authorship of Moses. The older critics considered Deuteronomy as the *latest* production of all the books of the Pentateuch; while the more recent critics have come to just the contrary opinion, and declare it to be the *earliest* of the Mosaic writings.

A very strong proof of the genuineness of the book lies in its relation to the later writings of the prophets. Of all the books of the Pentateuch, Deuteronomy has been made most use of by the prophets, simply because it is best calculated to serve as a model for prophetic declarations, as also because of the inward harmony that exists between the *prophecies* and the *laws* upon which they are based.

Among the arguments advanced against the authenticity of Deuteronomy, are:

1. The *contradictions* said to exist between this and the other books of Moses;
2. Certain *anachronisms* committed by the author.

These contradictions are more especially alleged to exist in the festival laws, where but arbitrary and unwarranted views are mostly entertained by such critics with regard to the nature and original meaning of the festivals, which they identify altogether with *natural* or *season*-festivals, and without lending to them a more spiritual character and signification.

3. That the *Sinai* of the other books is always called *Horeb* in Deuteronomy.—They forget, however, that *Horeb* is the general name of the whole mountain, while *Sinai* is the special name of a particular part of it. This distinction is, indeed, most scrupulously observed everywhere in the Pentateuch.

4. That in Deuteronomy i. 44 are mentioned the *Amorites*, instead of the *Amalekites*, as in Num. xiv. 43.—Here also they have forgotten to notice

that, in the sequel of the very passage alluded to in Deuteronomy, both the *Amorites* and *Analekites* are mentioned.

5. That the cause of the punishment of Moses is differently stated in Num. xxvii. 14, and Deuteronomy iii. 26.—To this objection we reply, that both the guilt and punishment of Moses are described in both books as originating with the people; comp. also Deut. xxxii. 51, etc.

Among the anachronisms in Deuteronomy are reckoned the allusions made in it to the Temple (xii. xvi. 1, sq.), to the royal and prophetic powers (xiii. xvii. xviii.), to the different modes of idol-worship (iv. 19; xvii. 3), and to the exile (xxviii. sq.). In suggesting these critical points, however, they do not consider that all these subjects are most closely and intimately connected with the spirit and principles of the law itself, and that all these regulations and prophecies appear here in Deuteronomy, as necessary finishing-points to the Law, so indispensable for the better consolidation of the subsequent and later relations of the theocracy.

More anachronisms are said to be,

1. The sixty dwelling-places of Jair mentioned Deut. iii. 14, sq. (comp. Judg. x. 3, sq.). We consider, however, that the men mentioned in the two passages are evidently different persons, though of the same name. Nor is it difficult to prove from other sources, that there really existed at the time of Moses a man by name Jair.

2. The notice (iii. 11) concerning king Og, which looks more like a note of a subsequent writer in corroboration of the story told in the chapter. But this hypothesis falls to the ground when we consider that Moses did not write for his contemporaries merely, but also for late posterity.

The book contains, moreover, not a small number of plain, though indirect traces, indicative of its Mosaic origin. We thus find in it:

1. Numerous notices concerning nations with whom the Israelites had then come in contact, but who, after the Mosaic period, entirely disappeared from the pages of history: such are the accounts of the residences of the kings of Bashan (i. 4).

2. The appellation of 'mountain of the Amorites,' used throughout the whole book (i. 7, 19, 20, 44), while even in the book of Joshua, soon after the conquest of the land, the name is already exchanged for 'mountains of Judah' (Josh. xi. 16, 21).

3. The observation (ii. 10), that the *Emim* had formerly dwelt in the plain of Moab: they were a great people, equal to the *Anakim*. This observation quite accords with Genesis xiv. 5.

4. A detailed account (ii. 11) concerning the Horim and their relations to the Edomites.

5. An account of the Zamzumim (ii. 20, 21), one of the earliest races of Canaan, though mentioned nowhere else.

6. A very circumstantial account of the Rephaim (iii. 3, sq.), with whose concerns the author seems to have been well acquainted.

The standing-point also of the author of Deuteronomy is altogether in the Mosaic time, and had it been assumed and fictitious, there must necessarily have been moments when the spurious author would have been off his guard, and unmindful of the part he had to play. But no discrepancies of this kind can be traced; and this

is in itself an evidence of the genuineness of the book.

A great number of other passages force us likewise to the conclusion, that the whole of Deuteronomy originated in the time of Moses. Such are the passages where

1. A comparison is drawn between Canaan and Egypt (xi. 10, sq.), with the latter of which the author seems thoroughly acquainted.

2. Detailed descriptions are given of the fertility and productions of Egypt (viii. 7, sq.).

3. Regulations are given relating to the conquest of Canaan (xii. 1, sq.; xx. 1, sq.), which cannot be understood otherwise than by assuming that they had been framed in the Mosaic time, since they could be of no use after that period.

Besides, whole pieces and chapters in Deuteronomy, such as xxxii., xxxiii., betray in form, language, and tenor, a very early period in Hebrew literature. Nor are the laws and regulations in Deuteronomy less decisive of the authenticity of the book. We are struck with the most remarkable phenomenon, that many laws from the previous books are here partly repeated and impressed with more energy, partly modified, and partly altogether abolished, according to the contingencies of the time, or as the new aspect of circumstances among the Jews rendered such steps necessary (comp. e. g. Deut. xv. 17 with Exod. xxi. 7; Deut. xii. with Lev. xvii.). Such pretensions to raise, or even to oppose his own private opinions to the authority of divine law, are found in no author of the subsequent periods, since the whole of the sacred literature of the later times is, on the contrary, rather the echo than otherwise of the Pentateuch, and is altogether founded on it. Add to this the fact, that the law itself forbids most impressively to add to, or take anything from it, a prohibition which is repeated even in Deuteronomy (comp. iv. 2: xiii. 1); and it is but too evident, that, if the opinion of the critics be correct, that this book contains nothing more than a gradual development of the law—it clashes too often with its own principles, and pronounces thus its own sentence of condemnation.

The part of Deuteronomy (xxxiv.) respecting the death of Moses requires a particular explanation. That the whole of this section is to be regarded as a piece altogether apart from what precedes it, or as a supplement from another writer, has already been maintained by the elder theologians; and this opinion is confirmed not only by the contents of the chapter, but also by the express declaration of the book itself on that event and its relations; for chapter xxxi. contains the conclusion of the work, where Moses describes himself as the author of the previous contents, as also of the Song (ch. xxxii.), and the blessings (ch. xxxiii.) belonging to it. All that follows is, consequently, not from Moses, the work being completed and concluded with chapter xxxiii. There is another circumstance which favours this opinion, namely, the close connection that exists between the last section of Deuteronomy and the beginning of Joshua (comp. Deut. xxxiv. 9 with Josh. i. 1), plainly shows that chapter xxxiv. of Deuteronomy is intended to serve as a point of transition to the book of Joshua, and that it was written by the same author as the latter. The correct view of this chapter, therefore, is to con-

sider it as a *real supplement*, but by no means as an *interpolation*.

On the literature of Deuteronomy, compare the article PENTATEUCH.

DEW. The various passages of Scripture in which dew is mentioned, as well as the statements of travellers, might, unless carefully considered, convey the impression that in Palestine the dews fall copiously at night during the height of summer, and supply in some degree the lack of rain. But we find that those who mention dews travelled in spring and autumn, while those who travelled in summer make no mention of them. In fact, scarcely any dew does fall during the summer months—from the middle of May to the middle of August; but as it continues to fall for some time after the rains of spring have ceased, and begins to fall before the rains of autumn commence, we may from this gather the sense in which the Scriptural references to dew are to be understood. Without the dews continuing to fall after the rains have ceased, and commencing before the rains return, the season of actual drought, and the parched appearance of the country, would be of much longer duration than they really are. The partial refreshment thus afforded to the ground at the end of a summer without dews or rains, is of great value in Western Asia, and would alone explain all the Oriental references to the effects of dew. This explanation is of further interest as indicating the times of the year to which the Scriptural notices of dew refer; for as it does not, in any perceptible degree, fall in summer, and as few would think of mentioning it in the season of rain, we may take all such notices to refer to the months of April, May, part of August, and September.

DIADDEM. [Crown.]

DIAL. The invention of the sun-dial belongs most probably to the Babylonians. The first mention in Scripture of the 'hour,' is made by Daniel, at Babylon (ch. iii. 6). The circumstances connected with the dial of Ahaz (2 Kings xx. 11; Isa. xxxviii. 8), which is perhaps the earliest of which we have any clear mention, entirely concur with the derivation of gnomonics from the Babylonians. Ahaz had formed an alliance with Tiglath-pileser, king of Assyria (2 Kings xvi. 7, 9), and that he was ready to adopt foreign improvements, appears from his admiration of the altar at Damascus, and his introduction of a copy of it into Jerusalem (2 Kings xvi. 10). 'The princes of Babylon sent unto him to inquire of the wonder that was done in the land' (2 Chron. xxxii. 31). Hence the dial also, which was called after his name, was probably an importation from Babylon. Different conjectures have been formed respecting the construction of this instrument. On the whole it seems to have been a distinct contrivance, rather than any part of a house. It would also seem probable, from the circumstances, that it was of such a size, and so placed, that Hezekiah, now convalescent (Isa. xxxviii. 21, 22), but not perfectly recovered, could witness the miracle from his chamber or pavilion. May it not have been situated in the middle court mentioned 2 Kings xx. 4? The cut given below (No. 141) presents a dial discovered in Hindostan, near Delhi, the ancient capital of the Mogul empire, whose construction would well suit the circumstances recorded of the

dial of Ahaz. It seems to have answered the double purpose of an observatory and a dial—a rectangled hexangle, whose hypotenuse is a staircase, apparently parallel to the axis of the earth, and bisects a zone or coping of a wall, which wall connects the two terminating towers

141.

right and left. The coping itself is of a circular form, and accurately graduated to mark, by the shadow of the gnomon above, the sun's progress before and after noon; for when the sun is in the zenith, he shines directly on the staircase, and the shadow falls beyond the coping. A flat surface on the top of the staircase, and a gnomon, fitted the building for the purpose of an observatory. According to the known laws of refraction, a cloud or body of air of different density from the common atmosphere, interposed between the gnomon and the coping of the dial-plate below, would, if the cloud were denser than the atmosphere, cause the shadow to recede from the perpendicular height of the staircase, and of course to re-ascend the steps on the coping, by which it had before now gone down; and if the cloud were rarer, a contrary effect would take place. The phenomenon on the dial of Ahaz, however, was doubtless of a miraculous nature, even should such a medium of the miracle be admitted: nothing less than a divine communication could have enabled Isaiah to predict its occurrence at that time and place; besides, he gave the king his own choice whether the shadow should advance or retire ten degrees. There seems, however, to be no necessity for seeking any medium for this miracle, and certainly no necessity for supposing any actual interference with the revolution of the earth, or the position of the sun. The miracle, from all the accounts of it, might consist only of the retrogression of the shadow ten degrees, by a simple act of Almighty power, without any medium, or, at most, by that of refracting those rays only which fell upon the dial. It is not said that any time was lost to the inhabitants of the world at large: it was not even observed by the astronomers of Babylon, for the deputation came to inquire concerning the wonder that was done in the land. It was temporary, local, and confined to the observation of Hezekiah and his court, being designed chiefly for the satisfaction of that monarch. It is remarkable that no instrument for keeping time is mentioned in the Scripture before the dial of Ahaz, B.C. 700; nor does it appear that the Jews generally, even after this period, divided their day into hours. The dial of Ahaz was pro-

bably an object only of curious recreation, or served at most to regulate the occupations of the palace.

DIAMOND. The diamond is named in the Authorized Version as one of the stones in the breastplate of the high priest (Exod. xxviii. 18; xxxix. 11). But as these stones were engraved, it is by no means likely that the original word (*yahalom*) really denotes the diamond; and it is generally understood that the onyx is intended. The diamond again occurs in the Authorized Version of Jer. xvii. 1; Ezek. iii. 9; Zech. vii. 12; and in these places the word (*shamir*) is different from the above, and its signification, 'a sharp point,' countenances this interpretation, the diamond being for its hardness used in perforating and cutting other minerals. Indeed, this use of the *shamir* is distinctly alluded to in Jer. xvii. 1, where the *stylus* pointed with it is distinguished from one of iron (comp. Plin. *Hist. Nat.* xxxvii. 15). The two other passages also favour this view by using it figuratively to express the hardness and obduracy of the Israelites. Our Authorized Version has 'diamond' in Jer. xvii. 1, and 'adamant' in the other texts; but in the original the word is the same in all.

DIANA (Acts xix. 24). Artemis, the Diana of the Romans, is a goddess known under various

142.

modifications, and with almost incompatible attributes. As the tutelary divinity of Ephesus, in which character alone she concerns us here, she was undoubtedly a representative of the same power presiding over conception and birth which was adored in Palestine under the name of ASHTORETH.

Her earliest image, which was said to have fallen from heaven, was probably very rude, and, to judge from its representation on ancient coins, little more than a head with a shapeless trunk,

supported by a staff on each side. There is some dispute as to the material of which her image

143.

was made. Most authorities say it was of ebony. The later image with the full development of attributes, of which we give a representation, is a Pantheon of Asiatic and Egyptian deities. Even in it, however, we see how little influence Greek art had in modifying its antique rudeness. It is still more like a mummy than a Greek statue. Her priests were called Megabyzi, and were eunuchs.

DIBON, or **DIMON** (Isa. xv. 9), called also Dibon-Gad, from its having been rebuilt by the tribe of that name (Num. xxxii. 34), a city on the northern bank of the Arnon, at the point where the Israelites crossed that river on their journey to the Jordan, and where their first encampment was made after having passed it. In later times we find it, with other towns in this quarter, in the hands of the Moabites (Jer. xlviii. 22). The site has been recognised by Setzen, Burckhardt, and Irby and Mangles, at a place which bears the name of Diban, in a low tract of the district called the Koura, about three miles north of the Arnon (Modjeb). The ruins are here extensive, but offer nothing of interest. There was another place called Dibon in the tribe of Judah (Neh. xi. 25), perhaps the same that is called Dimonah in Josh. xiii. 26.

DIDRACHMON (*a double drachma*), a silver coin equal to two Attic drachmæ, and also to the Jewish half shekel (Joseph. *Antiq.* iii. 8. 2). It was therefore equivalent to about 1s. 4d. of our money. By the law every Jew was required to pay half a shekel to the Temple (Exod. xxx. 13, sq.), and this amount is represented by the didrachma in Matt. xvii. 24, where it is used for the 'tribute-money' demanded of Christ.

DIDYMUS (*a twin*), a surname of the Apostle Thomas, denoting that he was a twin; and if translated, he would be called 'Thomas the Twin' (John xi. 16). [THOMAS.]

DI'KE, the heathen Goddess of Justice; described as the daughter of Zeus and Themis. The punishment of murderers is particularly ascribed to her; and therefore, besides being the goddess of punishment in a general sense, she is often to be considered the same as Nemesis or Vengeance. The word occurs in Acts xxviii. 4, and is there rendered 'vengeance,' appellatively.

DIK'LAH, a tribe descended from Joktan (Gen. x. 27). As the name in Aramaic and Arabic means a *palm-tree*, it has been judged necessary to seek the seat of the tribe in some

territory rich in palm-trees. Hochart finds it in Southern Arabia, Michaelis in the region of the Tigris (from the analogy of the name Diglath); but where the ground of search is so uncertain, it is impossible to obtain any satisfactory result.

DINAH, a daughter of Jacob by Leah (Gen. xxx. 21), and therefore full sister of Simeon and Levi. While Jacob's camp was in the neighbourhood of Shechem, Dinah was seduced by Shechem, the son of Hamor, the Hivite chief or head-man of the town. Partly from dread of the consequences of his misconduct, and partly, it would seem, out of love for the damsel, he solicited a marriage with her, leaving the 'marriage price' (see MARRIAGE) to be fixed by her family. To this Dinah's brothers would only consent on the further condition that all the inhabitants of the place should be circumcised. Even this was yielded; and Simeon and Levi took a most barbarous advantage of the compliance by falling upon the town on the third day, when the people were disabled by the effects of the operation, and slew them all (Gen. xxxiv.). For this act of truly Oriental vindictiveness no excuse can be offered, and Jacob himself repeatedly alludes to it with abhorrence and regret (Gen. xxxiv. 30; xlix. 5-7). To understand the act at all, however, it is necessary to remember, that any stain upon the honour of a sister, and especially of an only sister, is even at this day considered as an insupportable disgrace and inexpiable offence among all the nomadic tribes of Western Asia. If the woman be single, her brothers more than her father, if she be married, her brothers more than her husband, are aggrieved, and are considered bound to avenge the wrong. Hence the active vengeance of Dinah's full brothers, and the comparative passiveness of her father in these transactions. Of Dinah's subsequent lot nothing is known.

DIONYSIUS THE AREOPAGITE. The name of 'Dionysius the Areopagite' enlivens the scanty account of success which attended the visit of Paul to Athens (Acts xvii. 34). Nothing further is related of him in the New Testament; but ecclesiastical historians record some particulars concerning his career, both before and after his conversion. Suidas recounts that he was an Athenian by birth, and eminent for his literary attainments; that he studied first at Athens and afterwards at Heliopolis in Egypt; and that, while in the latter city, he beheld that remarkable eclipse of the sun, as he terms it, which took place at the death of Christ, and exclaimed to his friend Apollonides, 'Either the Divinity suffers, or sympathises with some sufferer.' He further details, that after Dionysius returned to Athens, he was admitted into the Areopagus; and, having embraced Christianity about A.D. 50, was constituted Bishop of Athens by the Apostle Paul himself. Synecellus and Nicephorus both record the last particular. Aristides, an Athenian philosopher, asserts that he suffered martyrdom—a fact generally admitted by historians; but the precise period of his death, whether under Trajan or Adrian, or, which is most likely, under Domitian, they do not determine. It is impossible now to determine what credit is to be given to these traditions.

DIOTREPHESES (*Jove-nourished*), a person who seems to have been one of the false teachers

condemned by St. John in his third epistle. He appears to have been a presbyter or deacon—probably the former. He refused to receive the letter sent by John, thereby declining to submit to his directions or acknowledge his authority (3 John 9).

DISCERNING OF SPIRITS. This is now usually understood to mean a high faculty, enjoyed by certain persons in the apostolic age, of diving into the heart and discerning the secret dispositions of men. It appears to have been one of the gifts peculiar to that age, and was especially necessary at a time when the standards of doctrine were not well established or generally understood, and when many deceivers were abroad (2 John ii. 7). This faculty seems to have been exercised chiefly upon those who came forward as teachers of others, and with whose real character and designs it was important that the infant churches should be acquainted.

DISCIPLE, a scholar or follower of any teacher, in the general sense. It is hence applied in the Gospels not only to the followers of Christ, but to those of John the Baptist (Matt. ix. 14, &c.), and of the Pharisees (Matt. xxii. 16). Although used of the followers of Christ generally, it is applied in a special manner to the twelve apostles (Matt. x. 1; xi. 1; xx. 17; Luke ix. 1). After the death of Christ the word took the wider sense of a believer, or Christian; i. e. a follower of Jesus Christ.

DISEASES OF THE JEWS. The most prevalent diseases of the East are cutaneous diseases, malignant fevers, dysentery, and ophthalmia. Of the first of these the most remarkable are leprosy and elephantiasis [LEPROSY]. To the same class also belongs the singular disease called the mal d'Aleppe, which is confined to Aleppo, Bagdad, Aiutab, and the villages on the Segour and Kowick. It consists in an eruption of one or more small red tubercles, which give no uneasiness at first, but, after a few weeks, become prurient, discharge a little moisture, and sometimes ulcerate. Its duration is from a few months to a year. It does not affect the general health at all, and is only dreaded on account of the scars it leaves. Foreigners who have visited Aleppo have sometimes been affected by it several years after their return to their own country. It is a remarkable fact that dogs and cats are likewise attacked by it. The Egyptians are subject to an eruption of red spots and pimples, which cause a troublesome smarting. The eruption returns every year towards the end of June or beginning of July, and is on that account attributed to the rising of the Nile. Malignant fevers are very frequent, and of this class is the great scourge of the East, the plague, which surpasses all others in virulence and contagiousness [PESTILENCE]. The Egyptian ophthalmia is prevalent throughout Egypt and Syria, and is the cause of blindness being so frequent in those countries [BLINDNESS]. Of inflammatory diseases in general, Dr. Russell says that at Aleppo he has not found them more frequent, nor more rapid in their course, than in Great Britain. Epilepsy and diseases of the mind are commonly met with. Melancholy monomanias are regarded as sacred persons in Egypt, and are held in the highest veneration by all Mahometans.

Diseases are not unfrequently alluded to in the

Old Testament; but, as no description is given of them, except in one or two instances, it is for the most part impossible even to hazard a conjecture concerning their nature.

Hezekiah suffered, according to our version, from a *boil*. The term here used means literally *inflammation*; but we have no means of identifying it with what we call boil. The same may be said of the plague of boils and blains [BLAINS], and of the names of diseases mentioned in the 28th chapter of Deuteronomy, such as pestilence, consumption, fever, botch of Egypt, itch, scab. The case of Job, in which the term translated *boil* also occurs, demands a separate notice [JOB]. Nebuchadnezzar's disease was a species of melancholy monomania, called by authors zoanthropia, or more commonly lycanthropia, because the transformation into a wolf was the most ordinary illusion. Esqurol considers it to have originated in the ancient custom of sacrificing animals. But, whatever effect this practice might have had at the time, the cases recorded are independent of any such influence; and it really does not seem necessary to trace this particular hallucination to a remote historical cause, when we remember that the imaginary transformations into inanimate objects, such as glass, butter, &c., which are of every-day occurrence, are equally irreconcilable with the natural instincts of the mind. The same author relates that a nobleman of the court of Louis XIV. was in the habit of frequently putting his head out of a window, in order to satisfy the urgent desire he had to bark. Calmet informs us that the nuns of a German convent were transformed into cats, and went mewling over the whole house at a fixed hour of the day. Antiochus and Herod died, like Sylla, from phthisiasis, a disease which was well known to the ancients. Nothing is known respecting the immediate causes of this malady; but there is no doubt that it depends on the general state of the constitution, and must not be attributed to neclealines. Alibert mentions the case of a person who, as soon as these animals had been destroyed, fell into a typhoid state, and shortly after died. The question of alleged demoniacal possession, so often mentioned in the New Testament, has been considered under another head [DEMONIACS], and need not be re-opened in this place.

DISH. Various kinds of dishes are mentioned in Scripture; but it is impossible to form any other idea of their particular forms than may be suggested by those of ancient Egypt and of the

144.

modern East, which have much resemblance to each other. The sites of such ancient towns as were built of sun-dried bricks are usually covered with broken potsherds, some of them large

enough to indicate the form of the entire vessel. These are remarkably similar to those in modern use, and are for the most part made of a rather coarse earthenware, covered with a compact and strong glaze, with bright colours, mostly green, blue, or yellow. Dishes and other vessels of copper, coarsely but thickly tinned, are now much used in the East; but how far this may have been anciently the case we have not the means of knowing. The cut (No. 144) represents a slave bringing dishes to table; the dishes have covers, and the manner in which they are carried on the reverted hand is the mode still used by Eastern servants.

DIVINATION is a general term descriptive of the various illusory arts anciently practised for the discovery of things secret or future. The human mind has always shown a strong curiosity to ascertain the course of fortune, and the issue of present or contemplated schemes; and in these countries and ages where ignorance of physical laws has combined with superstition to debase it, it has sought to gratify this innate disposition to pry into futurity, by looking for presages in things between which and the object of its anxiety no connection existed but in the diviner's imagination. Scarcely a single department of nature but was appealed to, as furnishing, on certain conditions, good or bad omens of human destiny; and the aspect of things, which, perhaps by the most casual coincidence, marked some event or crisis in the life of one or two individuals, came to be regarded, by blind credulity, as the fixed and invariable precursor of a similar result in the affairs of mankind in general. By such childish and irrational notions was the conduct of the heathen guided in the most important, no less than in the most ordinary occurrences of life; and hence arose the profession of augurs, soothsayers, *et hoc genus omne* of impostors, who, ingrafting vulgar traditions on a small stock of natural knowledge, established their claims to the possession of an occult science, the importance and influence of which they dexterously increased by associating it with all that was pompous and imposing in the ceremonies of their religion.

This science, if that can be called science which was the product of ignorance and fraud united, was divided into various branches, each of which had its separate professors. In a general view, divination may be considered as either natural or artificial: the first being founded on the notion that the soul possesses, from its spiritual nature, some prescience of futurity, which it exemplifies particularly in dreams, and at the approach of death: the second, resting on a peculiar interpretation of the course of nature, as well as on such arbitrary observations and experiments as superstition introduced. The different systems and methods that were anciently in vogue are almost incredible: as, for instance, *Aëromancy*, divining by the air; *Arithmancy*, by means of numbers; *Capnomancy*, by the smoke of sacrifices; *Chiromancy*, by the lines on the palms of the hands; *Hydromancy*, by water; *Pyromancy*, by fire, &c. But without attempting an enumeration and explanation of all the arts of divination that were anciently practised, let us confine ourselves to the mention of those which occur in sacred history. 1. Wise men (Exod. vii. 11; Isa. xlv. 25; Jer. i. 35; Dan. ii. 12, &c.), a term

applied generally to magicians, or men who were skilled in natural science. 2. 'Wizards' or wise men, and 'a witch,' from an Arabic verb signifying 'to reveal,' both practising divination by the same arts, i.e. pretending to reveal secrets, to discover things lost, find hidden treasure, and interpret dreams. 3. One who foretold what was to happen by the flight of birds, or the use of lots [Lots]. 4. One who, though rendered by our translators 'an observer of times,' foretold political or physical changes by the motion of the clouds, along with whom Isaiah conjoins those who made the same predictions from eclipses, and the conjunction of the stars (xlvii. 13). 5. 'An enchanter' was probably one who practised Ophiomancy, or the art of charming serpents, which was, and still is, a favourite trick of jugglery in the East. 6. 'A charmer,' one who placed words and things in a certain arrangement, or muttered them, as a kind of spell. 7. 'A consulter with familiar spirits,' or 'a ventriloquist,' was a wizard who asked counsel of his familiar, and gave the responses received from him to others—the name being applied in reference to the spirit or demon that animated the person, and inflated the belly, so that it protuberated like the side of a bottle (see Levit. xx. 27; 1 Sam. xxviii. 8; also Acts xvi. 16). 8. 'A necromancer,' one who, by frequenting tombs, by inspecting corpses, &c., like the witch of Endor, pretended to evoke the dead, and bring secrets from the invisible world (Gen. xli. 8; Exod. vii. 11; Lev. xix. 26; Deut. xviii. 10-12). 9. Belomancy, as it is called, a form of divination by means of arrows (Ezek. xxi. 21; see also 2 Kings xiii. 14-19), a notable example of which occurs in the history of Nebuchadnezzar, who, being undecided whether to march first against Jerusalem or Rabbah, allowed neither his policy nor resentment to decide the course of his expedition, but was determined wholly by the result of superstitious rites. The way of divining by arrows was, having first made them bright 'in order the better to follow them with the eye,' to shoot them, and to prosecute the march according to the direction in which the greatest number of arrows fell; or, having 'mixed together' some arrows with the names of the devoted cities marked on them, to attack that first which was first drawn out; or to put in a bag three arrows, as is the practice of the Arabs, one of which is inscribed with the words 'Command me, Lord,' the second with 'Forbid me, Lord,' while the third is left blank; so that if the first is taken out, he was to go; if the second, he was to desist; if the third is drawn, no decision being given, the experiment is to be repeated. 10. Rhabdomancy, or divination by rods (Hos. iv. 12). This has been confounded with the preceding. But the instruments of divination which Hosea alludes to are entirely different from those described by Ezekiel, arrows being used by the latter, whereas the former speaks of 'staff.' The form of divination by the staff was, after placing it upright, to let it fall, and decide by the direction in which it fell, or, according to others, by measuring the staff with the finger, saying at each span, 'I will go,' or 'I will not go,' and determining the course, according as it happened to be the one or the other at the last measurement. Both of these, as Jerome informs us, were frequently practised by the

Assyrians and Babylonians. Herodotus (vi.) describes the Alani women as gathering and searching anxiously for very smooth and straight wands to be used in this superstitious manner. 11. Another way of divining was by 'images' (Ezek. xxi. 21), which are generally considered talismans, but which are Persian and other various render astrological instruments or tables. 12. Another form of divination was, 'by looking into the liver' of a newly killed sacrifice, and by observing its state and colour according to certain rules, to draw a favourable or unfavourable omen. The last form which it is of consequence to notice as alluded to in Scripture was by 'the cup.' But in what manner it was practised; whether it was by observing the appearance of some magical ingredients that were infused into the vessel; or whether allusion is made to a famous cup which the immemorial tradition of the East says has been in the possession of some great personages, and represents the whole world; or, finally, whether the original word rendered 'divine,' should be rendered by 'searching' or 'inquiring earnestly,' as many learned writers, anxious to save the character of Joseph from the imputation of sorcery (Gen. xli. 5), have laboured to prove, it is absolutely impossible, and we shall not attempt, to determine.

Egypt, the cradle of arts and sciences, if she did not give it birth, seem to have encouraged the practice of divination at an early age, and whether any of its forms had become objects of popular superstition, or were resorted to for the purposes of gain in the days of Joseph, it is well known that at the time of the Hebrew Exodus there were magicians in that country whose knowledge of the arcana of nature, and whose dexterity in the practice of their art, enabled them, to a certain extent, to equal the miracles of Moses. By what extraordinary powers they achieved those feats, how they changed their rods into serpents, the river water into blood, and introduced frogs in unprecedented numbers, is an inquiry that has occasioned great perplexity to many men of learning and piety. Some have imagined that the only way of accounting for the phenomena is to ascribe them to jugglery and legerdemain; the serpents, the frogs, and the other materials requisite having been secretly provided and dexterously produced at the moment their performances were to be exhibited. Others contend that these conjurors were aided by familiar spirits or infernal agents, with the Divine permission, in the performance of their wonderful feats. 'Earth, air, and ocean,' says a sensible writer, 'may contain many things of which our philosophy has never dreamt. If this consideration tend to humble the pride of learning, it may remind the Christian that secret things belong not to him, but to a higher power.'

It is reasonable to suppose that as Moses never had been in any other civilized country, all the allusions contained in his writings to the various forms of divination were those which were practised in Egypt; and, indeed, so strong a taste had his countrymen imbibed there for this species of superstition, that throughout the whole course of their history it seems to have infected the national character and habits. The diviners, who abounded both amongst the aborigines of Canaan and their Philistine neighbours (Isa. ii. 6), proved

a great snare to the Israelites after their settlement in the promised land; and yet, notwithstanding the stern prohibitions of the law, no vigorous efforts were made to put an end to the crime by extirpating the practitioners of the unhallowed art, until the days of Saul, who himself, however, violated the statute on the night previous to his disastrous fall (1 Sam. xxviii.). But it was Chaldaea to which the distinction belongs of being the mother country of diviners. Such a degree of power and influence had they attained in that country, that they formed the highest caste and enjoyed a place at court; nay, so indispensable were they in Chaldaean society that no step could be taken, not a relation could be formed, a house built, a journey undertaken, a campaign begun, until the diviners had ascertained the lucky day and promised a happy issue. A great influx of these impostors had, at various times, poured from Chaldaea and Arabia into the land of Israel to pursue their gainful occupation, more especially during the reign of the later kings (Isa. viii. 19), and we find Manasseh not only their liberal patron, but zealous to appear as one of their most expert accomplices (2 Kings xxi. 6; 2 Chron. xxxiii. 6). The long captivities in Babylon spread more widely than ever among the Jews a devoted attachment to this superstition; for after their return to their own country, having entirely renounced idolatry, and, at the same time, no longer enjoying the gift of prophecy or access to the sacred oracles, they gradually abandoned themselves, as Lightfoot has satisfactorily shown, before the advent of Christ, to all the prevailing forms of divination (*Comment. on Matt.*).

Against every species and degree of this superstition the sternest denunciations of the Mosaic law were directed (Exod. xxii. 18; Lev. xix. 26, 31; xx. 27; Deut. xviii. 10, 11), as fostering a love for unlawful knowledge and withdrawing the mind from God only wise; while, at the same time, repeated and distinct promises were given that, in place of diviners and all who used enchantments, God would send them prophets, messengers of truth, who would declare the divine will, reveal futurity, and afford them all the useful knowledge which was vainly sought for from those pretended oracles of wisdom. Much discussion, however, has been carried on by learned men to determine the question whether the ancient tribe of diviners merely pretended to the powers they exercised, or were actually assisted by demoniacal agency. The latter opinion is embraced by almost all the fathers of the primitive church. On the other hand, it has been, with great ability and erudition, maintained that the whole arts of divination were a system of imposture, and that Scripture itself frequently ridicules those who practised them as utterly helpless and incapable of accomplishing anything beyond the ordinary powers of nature (Isa. xlv. 25; xlvii. 11-13; Jer. xiv. 14; Jonah ii. 8).

DIVORCE. [MARRIAGE.]

DOD'ANIM, the descendants of the fourth son of Javan (Gen. x. 4). Bochart and other commentators on the ethnographical sketch in Gen. x. suppose that the first settlements of the Dodanim were in the south-west part of Asia Minor; and that settlers of this family may be traced in Thessaly and Epirus, where the name is traced

in the city of Dodona and in the country of Doris. But there seems much of uncertainty in all these speculations.

DOEG, an Edomite, and chief overseer of king Saul's flocks, which is an important trust in Oriental courts. At Nob he was witness of the assistance which the high-priest Ahimelech seemed to afford to the fugitive David, by furnishing him with the sword of Goliath, and by supplying him with bread even from the sacred table (1 Sam. xxi. 7). Of this he failed not to inform the king, who, regardless of the explanation offered by Ahimelech, and finding that the chiefs censured him, and hesitated to lay their hands upon a person so sacred, commanded Doeg to slay him and his priests—a task which was executed with equal readiness and cruelty by the Edomite (1 Sam. xxii. 18, sq.).

DOG occurs in many places of Scripture (Exod. xxii. 31; 1 Sam. xvii. 43; xxiv. 14; 2 Sam. ix. 8; 2 Kings viii. 13; Ps. lix. 6, '14, 15; Prov. xxvi. 11, 17, &c.). An animal so well known, whose numerous varieties come under daily observation, requires no detailed description. There is, however, in Asia still extant one, perhaps more than one, species, that never have been the companions of man, and there are races of uncertain origin, that may have been formerly domesticated, but which are now feral, and as fierce as wolves; while, from the particular opinions of Oriental nations, there are others, exceedingly numerous, neither wild nor domesticated, but existing in all the cities and towns of the Levant, without owners; feeding on carrion and offals, and still having the true instinct of protecting property, guarding the inhabitants of the district or quarter where they are tolerated; and so far cherished, that water and some food are not unusually placed within their reach.

145.

The true wild species of Upper and Eastern Asia is a low, sharp-nosed, reddish ear-dog, not unlike a fox, but with less tail. In Persia and Turkey there exists a larger dog resembling a wolf, exceedingly savage. Both are gregarious, hunt in packs, but are occasionally seen alone. They are readily distinguished from a wolf by their shorter unfurnished tails. In the time of the sojourn of Israel in Egypt, there were already in existence domestic dogs of the principal races now extant—the ear-dog or fox-dog, the hound, the greyhound, and even a kind of low-legged turnspit. All the above, both wild and reclaimed, there is every reason to believe, were known to the Hebrews, and, notwithstanding the presumed Mosaic prohibition, anterior habits, and, in some measure, the necessity of their condition, must have caused cattle-dogs to

be retained as property (Dent. xxiii. 18); for we find one of that race, or a house-dog, actually attending on travellers (Tobit v. 16; xi. 4). It is to be presumed that practically the street-dogs alone were considered as absolutely unclean; though all, as is the case among Mohammedans, were excluded from familiarity.

Beside the cattle-dog, the Egyptian hound and one or two varieties of greyhound were most likely used for hunting—a pastime, however, which the Hebrews mostly pursued on foot.

The street-dog, without master, apparently derived from the rufous cur, and in Egypt partaking of the mongrel greyhound, often more or less bare, with a mangy unctuous skin, frequently with several teeth wanting, was, as it now is, considered a defiling animal. It is to animals of this class, which no doubt followed the camp of Israel, and hung on its skirts, that allusion is more particularly made in Exod. xxii. 31; for the same custom exists at this day, and the race of street-dogs still retains their ancient habits. But with regard to the dogs that devoured Jezebel, and licked up Ahab's blood (1 Kings xxi. 23), they may have been of the wild races, a species of which is reported to have particularly infested the banks of the Kishon and the district of Jezreel.

The cities of the East are still greatly disturbed in the night by the howlings of street-dogs, who, it seems, were similarly noisy in ancient times, the fact being noticed in Ps. lix. 6, 14; and dumb or silent dogs are not unfrequently seen, such as Isaiah alludes to (lvi. 10).

DOORS. [GATES.]

DOPH'KAH, an encampment of the Israelites in the Wilderness [WANDERING, THE].

DOR, a town on the border of the Mediterranean, which Jerome places nine Roman miles north of Caesarea. It was one of the royal towns of the Canaanites (Josh. xi. 2; xii. 23), and was included in the heritage of Manasseh (Josh. xvii. 11). The place, or rather the region to which it gave name, occurs again in 1 Kings iv. 11. A place still exists, at the distance indicated by Jerome, under the name of Tortura, which Buckingham describes as a small village with about forty or fifty houses and five hundred inhabitants. It has a small port, formed by a narrow range of rocky islets, at a short distance from the sandy beach.

DOTHAN or DOTHAIM, the place where Joseph found his brethren, who had wandered thither with their flocks from Shechem, and where he was treacherously sold by them to the Ishmaelites (Gen. xxxvii. 17). It was here also that the Syrians were smitten with blindness at the word of Elisha (2 Kings vi. 13). Dothan is placed by Eusebius and Jerome twelve Roman miles north of Sebaste or Samaria, and it was obviously on the caravan track from Syria to Egypt. The well into which Joseph was cast by his brothers, and consequently the site of Dothan, has, however, been placed by tradition in a very distant quarter, namely, about three miles south-east from Safed, where there is a khan called Khan Jubb Yusuf, the Khan of Joseph's Pit, because the well connected with it has long passed among Christians and Moslems for the well in question.

DOVE. There are probably several species of

doves or pigeons included in the Hebrew name *joneh*. It may contain all those that inhabit Palestine, exclusive of the turtle-doves properly so called. Thus generalized, the dove is, figuratively, next to man, the most exalted of animals, symbolizing the Holy Spirit, the meekness, purity, and splendour of righteousness. By the Hebrew law doves and turtle-doves were the only birds that could be offered in sacrifice, and they were usually selected for that purpose by the less wealthy (Gen. xv. 9; Lev. v. 7; xii. 6; Luke ii. 24); and to supply the demand for them, dealers in these birds sat about the precincts of the Temple (Matt. xxi. 12, &c.).

146.

All pigeons in their true wild plumage have iridescent colours about the neck, and often reflected flashes of the same colours on the shoulders, which are the source of the silver and gold feathers ascribed to them in poetical diction; and thence the epithet of purple bestowed upon them all, though most applicable to the vinous and slaty-coloured species. The coasts and territory of Syria are noted for the great number of doves frequenting them, though they are not so abundant there as in the Coh-i Suleiman chain near the Indus. Syria possesses several species of pigeon; the stock-dove, ring-dove, the common pigeon in several varieties, such as the Barbary, Turkish or Persian carrier, crisp, and slaker. These are still watched in their flight in the same manner as anciently their number, gyrations, and other manoeuvres were observed by soothsayers. The wild species, as well as the turtle-doves, migrate from Palestine to the south; but stock and ring doves are not long absent.

The figure we give is that of the more rare species of white and pink carrier, and the Phœnician sacred ensign of the dove.

DOVES' DUNG. This expression is by many considered to signify literally the dung of pigeons, as in the passage of 2 Kings vi. 25. Different opinions, however, have been entertained respecting the meaning of the words which are the subject of this article, namely, whether they should be taken literally, or as a figurative name of some vegetable substance. The strongest point in favour of the former view is that all ancient Jewish writers have understood the term literally. Taking it, however, in this sense, various explanations have been given of the use to which the doves' dung was applied. Some of the rabbins were of opinion, that the doves' dung was used for fuel, and Josephus, that it was purchased for its salt. Mr. Harmer has suggested that it might

have been a valuable article, as being of great use for quickening the growth of esculent plants, particularly melons. Mr. Edwards it disposed to understand it as meaning the offals or refuse of all sorts of grain, which was wont to be given to pigeons, &c. Dr. Harris, however, observes that the stress of the famine might have been so great as to have compelled the poor among the besieged in Samaria to devour either the intestines of the doves, after the more wealthy had eaten the bodies, or, as it might perhaps be rendered, the crops.

Hochart, however, has shown that the term 'pigeons' dung' was applied by the Arabs to different vegetable substances, and supposes that it was one of the pulses used in ancient times, as at the present day, as an article of diet. With reference to this grain it has been observed that 'large quantities of it are parched and dried, and stored in magazines at Cairo and Damascus. It is much used during journeys, and particularly by the great pilgrim-caravan to Mecca; and if this conjecture be correct it may be supposed to have been among the provisions stored up in the besieged city, and sold at the extravagant price mentioned in the text' (*Pict. Bible*). The late Lady Calcott, in her *Scripture Herbal*, 1842, adduces the common Star of Bethlehem as the 'doves' dung' of Scripture, and assigns this, as well as 'birds' milk,' as two of its vernacular names. It is a native of this country, and also of Taurus, Caucasus, and Northern Africa. Dioscorides states that its bulbs were sometimes cooked with bread, in the same way as the *melanthium*, and also that it was eaten both raw and roasted. The roots were also commonly eaten in Italy and other southern countries at an early period.

DRACHMA, a coin of silver, the most common among the Greeks, and which after the Exile became also current among the Jews (2 Macc. iv. 19; x. 20; xii. 43; Luke xv. 8, 9). The earlier Attic drachmæ were of the average weight of 66·5 grains, and in a comparison with the shilling would be equal to 9½d. But the specimens of later times are of the average weight of only 61 grains, and some of less. In this state the drachma was counted equal to the denarius, which was at first worth 8½d, and afterwards only 7½d. The value of the drachma of the New Testament may therefore have been about 8d. The woman's 'ten pieces of silver' (*drachma*) in Luke xv. 8, would hence be equal to 6s. 8d. of our money—that is, in nominal value, for the real value of money was far greater in the time of Christ than at present.

DRAGON occurs principally in the plural form (Job xxx. 29; Ps. xlv. 19, 20; Isa. xlii. 22; xxxiv. 13; xxxv. 7; Jer. ix. 11; xiv. 6; xlix. 33; and Micah i. 8). These texts, in general, present pictures of ruined cities and of desolation in the wilderness. Where dragons are associated with birds of the desert, they clearly indicate serpents of various species, both small and large, as already noticed in the article ADDER. In Jer. xiv. 6, where wild asses snuffing up the wind are compared to dragons, the image will appear in its full strength, if we understand by dragons, great boas and python-serpents, such as are figured in the Palestinian mosaics. They were common in ancient times,

and are still far from rare in the tropics of both continents. Several of the species grow to an enormous size, and, during their periods of activity, are in the habit of raising a considerable portion of their length into a vertical position, like pillars, 10 or 12 feet high, in order to survey the vicinity above the surrounding bushes, while with open jaws they drink in a quantity of the current air. The same character exists in smaller serpents; but it is not obvious, unless when, threatening to strike, they stand on end nearly three-fourths of their length. Most, if not all, of these species are mute, or can utter only a hissing sound; and although the mallepambin, the great rock-snake of Southern Asia, is said to wail in the night, we have never witnessed such a phenomenon, nor heard it asserted that any other boa, python, or erpeton had a real voice; but they hiss, and, like crocodiles, may utter sounds somewhat akin to howling.

DRAM. Gesenius and most others are of opinion that the word which occurs in 1 Chron. xxix. 7; Ezra viii. 27; ii. 69; Neh. vii. 70-72; denotes the *Persian Darius*, a gold coin, which must have been in circulation among the Jews during their subjection to the Persians. This coin is of interest, not only as the most ancient gold coin of which any specimens have been preserved to the present day, but as the earliest coined money which, we can be sure, was known to and used by the Jews. The distinguishing mark of the coin was a crowned archer, who appears with some slight variations on different

147.

specimens. His garb is the same which is seen in the sculptures at Persepolis, and the figure on the coin is called, in numismatics, *Sagittarius*. The specimens weighed by Dr. Bernard were fifteen grains heavier than an English guinea, and their intrinsic value may, therefore, be reckoned at twenty-five shillings.

DREAMS. Of all the subjects upon which the mind of man has speculated, there is perhaps none which has more perplexed than that of dreaming.

Whatever may be the difficulties attending the subject, still we know that it has formed a channel through which Jehovah was pleased in former times to reveal his character and dispensations to his people.

In regard to the immediate cause of dreaming, the opinions of the ancients were very various.

We believe that dreams are ordinarily the embodiment of thoughts which have before, in some shape or other, occupied our minds. They are broken fragments of our former conceptions revived, and heterogeneously brought together. If they break off from their connecting chain, and become loosely associated, they exhibit oftentimes absurd combinations, but the elements still sub-

isnt. If, for instance, any irritation, such as pain, fever, &c., should excite the *perceptive* organs, while the *reflective* ones are under the influence of sleep, we have a consciousness of objects, colours, or sounds being presented to us, just as if the former organs were actually stimulated by having such impressions communicated to them by the external senses; whilst, in consequence of the repose of the reflecting power, we are unable to rectify the illusion, and conceive that the scenes passing before us, or the sounds that we hear, have a real existence. This want of mutual co-operation between the different faculties of the mind may account for the *disjointed* character of dreams. This position might be fully substantiated by an appeal to the evidence of fact. Dr. Beattie speaks of a man who could be made to dream anything by whispering in his ear. Dr. Gregory relates of himself that, having once had occasion to apply a bottle of hot water to his own feet when he retired to bed, he dreamed that he was ascending the side of Mount Etna, and that he found the heat of the ground almost insufferable. Persons who have had a blister applied to their head have been known to dream of being scalped by a party of North American Indians. Sleeping in a smoky room, we may dream of a house or city being in flames. The smell of a flower applied to the nostrils may call forth the idea of walking in a garden; and the sound of a flute may excite in us the most pleasurable associations.

The only one of our mental powers which is not suspended while dreaming is fancy, or imagination. We often find *memory* and *judgment* alternately suspended and exercised. Sometimes we fancy ourselves contemporaneous with persons who have lived ages before: here memory is at work, but judgment is set aside. We dream of carrying on a very connected discourse with a deceased friend, and are not conscious that he is no more: here judgment is awake, but memory suspended. These *irregularities*, or want of mutual co-operation in the different faculties of the mind may form, for aught we know, the plan by which God gives health and vigour to the whole soul.

How God revealed himself by dreams, and raised up persons to interpret them, the Scriptures abundantly testify. Under the three successive dispensations we find this channel of communication with man adopted. It was doubtless in this way that God appeared to the father of the faithful, ordering him to forsake country, kindred, and his father's house, and to go into the land that he would show him. To this divine command, Abraham paid a ready obedience. It was by a similar prompt obedience to the admonition conveyed to him in a dream, that Abimelech (Gen. xx. 3) himself and Abraham, too, were saved from the evil consequences of his meditated act. To Jacob, also, God appeared frequently in a dream (Gen. xxvii. 19; xxxi. 10); and his son Joseph, while yet a child, had dreams *predictive* of his future advancement (Gen. xxxvii. 6-11).

Such were some of the dreams by which God revealed himself under the patriarchal dispensation, and that the same divine mode of communicating with man was continued under that of Moses is evident from an express word of pro-

mise (Num. xii. 6). That dreams were one of the ways whereby God was wont to signify his pleasure, and from the complaint of Saul to the spirit of Samuel (whom the witch pretended to raise up), when he asked him, 'Why hast thou disquieted me to bring me up?' Saul answered, 'I am sore distressed; for the Philistines make war against me, and God is departed from me, and answers me no more; neither by prophets, nor by *dreams*: therefore I have called thee that thou mayest make known to me what I shall do.' And, in order to guard against imposition, Moses pronounced a penalty against dreams which were invented and wickedly made use of, for the promotion of idolatry (Deut. xiii. 1-5). Thus Zechariah (x. 2) complains: 'The idols have spoken vanity, and the diviners have spoken a lie, and have told *false dreams*: they comfort in vain.' And so Jeremiah (xxiii. 25), 'I have heard what the prophets said that prophecy lies in my name, saying, I have dreamed, I have dreamed,' &c. Yet this abuse did not alter God's plan in the right use of them; for in the 28th verse of the same chapter, it is said, 'the prophet that hath a *dream*, and he that hath my word, let him speak my word faithfully. What is the chaff to the wheat? saith the Lord.'

When Gideon warred with the Amalekites, and was alarmed at their vast multitudes, he was encouraged to do God's will by overhearing one of them relate his dream, and another giving the interpretation (Judg. vii.). Again, it was in a dream that God was pleased to grant Solomon a promise of wisdom and understanding (1 Kings iii. 5, &c.). Here we may perceive what converse the Lord was pleased to hold with Solomon in a dream; and the sacred record informs us how punctually everything herein promised was fulfilled.

The knowledge of visions and dreams is reckoned amongst the principal gifts and graces sometimes bestowed by God upon them that fear him; so it is said of Daniel and his companion, that 'God gave them knowledge and skill in all learning and wisdom: and Daniel had understanding in all visions and dreams (Dan. i. 17). And the God who had imparted this spirit unto his servant Daniel soon, in the arrangement of his providence, gave the signal occasion for its exercise recorded in the second chapter of his book. In the dream of Nebuchadnezzar a great variety of ends were attained in reference to *Babylon*, Israel, and indeed the world—all of which were worthy of God's miraculous interference.

That this method of God's revealing himself was not confined to the legal dispensation, but was to be extended to the Christian, is evident from Joel (ii. 28), 'And afterwards (saith the Lord) I will pour out my spirit upon all flesh; and your sons and your daughters shall prophesy: your young men shall see visions, and your old men shall *dream dreams*.' In Acts ii. 17, we find the Apostle Peter applying this to the illumination of the Holy Ghost. Accordingly, we read that when Joseph designed to put Mary away, because he perceived her to be with child, he was turned from his purpose by a dream, in which an angel made the truth of the matter known to him (Matt. i. 20). And in the following chapter it is stated, that God, in a dream,

warned the wise men not to return to Herod. Moreover, in verses 13 and 19, Joseph is instructed to flee into and return from Egypt with the child Jesus.

We inquire not *how* far God may have revealed himself to man beyond what Holy Scripture records. Some of the dreams both of ancient and modern times, which lay claim to a divine character, are certainly striking, and may, for aught we know, have had, and may still have, a collateral bearing on the development of God's purposes.

DRESS. The subject of the costume of the ancient Hebrews is involved in much obscurity and doubt. The allusions to dress in the Scriptures form the only source of our positive information. They are often, indeed, obscure, and of uncertain interpretation; but they are invaluable in so far as they enable us to compare and verify the information derivable from other sources. These sources are—

1. The costume of neighbouring ancient nations, as represented in their monuments.

2. The alleged costume of Jews as represented in the same monuments.

3. The present costumes (which are known to be ancient) of Syria and Arabia.

4. Tradition.

1. The range of inquiry into monumental costume is very limited. Syria, Arabia, and Egypt, are the only countries where monuments would be likely to afford any useful information; but Arabia has left no monumental figures, and Syria none of sufficiently ancient date; and it is left for Egypt to supply all the information likely to be of use. The extent and value of this information, for the particular purpose, we believe to be far less than is usually represented. That we are not disposed to undervalue the information derivable from the Egyptian monuments for the purpose of illustrating Biblical history and antiquities, the pages of the present work will sufficiently evince; and its editor may indeed claim to have been the first in this country to work this mine of materials for Biblical illustration. But the rage for this kind of illustration has been carried to such preposterous lengths, that it may not be an unwholesome caution to remind our readers that the Egyptians and the Hebrews were an exceedingly different people—as different in *every* respect as can well be conceived; and that the climates which they inhabited were so very different as to *necessitate* a greater difference of food and dress than might be pre-supposed of countries so near to each other. It is true that the Jewish nation was cradled in Egypt; and this circumstance may have had some influence on ceremonial dresses, and the ornaments of women; but we do not find that nations circumstanced as the Jews were ready to adopt the costumes of other nations, especially when their residence in Egypt was always regarded by them as temporary, and when their raiment was of home manufacture—spun and woven by the women from the produce of their flocks (Exod. xxxv. 25). We find also that, immediately after leaving Egypt, the principal article of dress among the Hebrews was some ample woollen garment, fit to sleep in (Exod. xxii. 27), to which nothing similar is to be seen among the costumes of Egypt.

2. With respect to the supposed representation of Jews in ancient monuments, if any authentic examples could be found, even of a single figure, in the ancient costume, it would afford much satisfaction as tending to elucidate many passages of Scripture which cannot at present be with certainty explained. The sculptures and paintings supposed to represent ancient Hebrews are contained in—

(a) A painting at Beni Hassan, representing the arrival of some foreigners in Egypt, and supposed to figure the arrival of Joseph's brethren in that country. The accessories of the scene, the physiognomies of the persons, and the time to which the picture relates, are certainly in unison with that event; and, though we must speak with hesitation on the subject, the conjecture is probably correct. The annexed cut shows the

146.

variety of costume which this scene displays. All the men wear sandals. Some of them are clad only in a short tunic or shirt, with close sleeves (fig. 3); others wear over this a kind of sleeveless plaid or mantle, thrown over the left shoulder, and passing under the right arm (fig. 2). It is of a striped and curiously figured pattern, and looks exceedingly like the fine grass woven cloth of the South Sea. Others have, instead of this, a *fringed* skirt of the same material (fig. 1). All the figures are bare-headed, and wear beards, which are circumstances favourable to the identification. The fringed skirt of fig. 1 is certainly a remarkable circumstance. Moses directed that the people should wear a fringe at the hem of their garments (Num. xv. 38); and the probability is that this command merely perpetuated a more ancient usage.

(b) This fringe re-appears, much enlarged, in the other Egyptian sculpture in which Jews are supposed to be represented. These are in a tomb discovered by Belzoni, in the valley of Babel Melook, near Thebes. There are captives of

149.

different nations, and among them four figures, supposed to represent Jews. The scene is ima-

gined to commemorate the triumphs of Pharaoh-Necho in that war in which the Jews were defeated at Megiddo, and their king Josiah slain (2 Chron. xxxv. xxxvi.). It will be seen that the dress of these figures differs little, excepting in the length of the fringe, from that of the skirted figure in the earlier painting; and so far this is a corroborative circumstance in favour of both.

There is no reason to think that the dress of the Jews was in any important respect different from that of the other inhabitants of the same and immediately bordering countries. It is therefore fortunate that the Egyptian monuments offer such representations of the Canaanitish and neighbouring nations, as enable us to see that the prevailing style of dress was a close tunic under a loose outer robe, the place of the latter being sometimes supplied by a large cape, as shown in the annexed engraving (No. 150), which appears to represent inhabitants of

150.

Syria and Lebanon. The evidence for the latter (fig. 2) is as conclusive as can be obtained, for not only is there the name Lemanon, but the persons thus attired are represented as inhabiting a mountainous country, and felling *fir*-trees to impede the chariots of the Egyptian invaders. The dresses are similar to each other, and this similarity strengthens the probability that the dress of the Jews was not very different. The figures are bearded, and the cap, or head-dress, is bound round with a fillet. The figures are arrayed in a long gown reaching to the ankles, and confined around the waist by a girdle, and the shoulders are covered by the cape which appears to have been common to several nations,

151.

perhaps as an occasional or a summer substitute for the loose mantle which some other figures exhibit. The dresses are often of brilliant colours, sometimes in variegated patterns; and the outer mantle is seen to be sometimes lined, by the inside and outside being of different colours, such as yellow lined with blue, etc. The military dress was more compact than that in civil use; and among the accoutrements we readily recognise the helmet, and the military girdle so often mentioned in the Sacred Book.

Such is the amount of the information to be derived from ancient monuments.

152.

That to be obtained from tradition is embodied — 1. In the dresses of monks and pilgrims, which may be traced to an ancient date, and which are an intended imitation of the dresses supposed to have been worn by the first disciples and apostles of Christ. 2. The garb conventionally assigned by painters to Scriptural characters, which were equally intended to embody the dress of the apostolical period, and is corrected in some degree by the notions of Oriental costume which were collected during the Crusades.

Let us now consider the modern sources of illustration. With the exceptions of the foreign Turkish costume, and the modifications thereof, and with certain local exceptions, chiefly in mountainous regions, it may be said that there is one prevailing costume in all the countries of Asia between the Tigris and Mediterranean, and throughout Northern Africa, from the Nile to Morocco and the banks of the Senegal. This costume is substantially Arabian, and owes its extension to the wide conquests of the Arabians under the first caliphs; and it is through the Arabians—the least changed of ancient nations, and almost the only one which has remained as a nation from ancient times—that the antiquity of this costume may be proved. This is undoubtedly the most ancient costume of Western Asia, and while one set of proofs would carry it up to Scriptural times, another set of strong probabilities and satisfactory analogies will take it back to the most remote periods of Scriptural history, and will suggest that the dress of the Jews themselves was very similar, without being strictly identical.

It is to be observed, however, that there are two very different sorts of dresses among the Arabians. One is that of the Bedouin tribes, and the other that of the inhabitants of towns. The

distinction between these is seldom clearly understood, or correctly stated; but it is of the utmost importance for the purpose of the present notice. Instead therefore of speaking of the Arabian costume as one thing, we must regard it as two things—the desert costume, and the town costume.

If, then, our views of Hebrew costume were based on the actual costume of the Arabians, we should be led to conclude that the desert costume represented that which was worn during the patriarchal period, and until the Israelites had been some time settled in Canaan; and the town costume that which was adopted from their neighbours when they became a settled people.

This is a subject which, more than any other, requires the aid of pictorial illustration to render the details intelligible. Having provided ourselves with these, our further observations will most advantageously take the form of explanations of them, and of comments upon them.

Under the notion that the desert costume belongs to the patriarchal period, the precedence is here given to it. Only the outer articles of dress are *distinctive*, those which are worn underneath being similar to other articles worn by the town and peasant classes, and which as such will be hereafter noticed.

The annexed cut (No. 153) represents, in fig. 1, a Bedouin, or desert Arab, in the dress usually

153.

worn in Asia; and in fig. 1 represents a townsman in a cloak of the same kind, adopted from the Arabs, and worn very extensively as an outermost covering in all the countries from the Oxus (far even the Persians use it) to the Mediterranean. The distinctive head-dress of the Bedouin, and which has not been adopted by any other nation, or even by the Arabian townsmen, is a kerchief folded triangularly, and thrown over the head so as to fall down over the neck and shoulders, and bound to the head by a band of twisted wool or camel's hair. We forbear at the moment from inquiring whether this was or was not in use among the ancient Hebrews. The cloak is called an *abba*. It is made of wool and hair, and of various degrees of fineness. It is sometimes entirely black, or entirely white, but is more usually marked with broad stripes, the colours of which (never more than two, one of which is always white) are distinctive of the tribe by which

it is worn. The cloak is altogether shapeless, being like a square sack, with an opening in front, and with slits at the sides to let out the arms. The Arab who wears it by day, sleeps in it by night, as does often the peasant by whom it has been adopted; and in all probability this was the garment similarly used by the ancient Hebrews, and which a benevolent law, delivered while Israel was still in the desert, forbade to be kept in pledge beyond the day, that the poor might not be without a covering at night (Exod. xxii. 27). This article of dress appears to have been little known to Biblical illustrators, although it is the principal and most common outermost garment in Western Asia. This singular neglect has arisen from their information being chiefly derived from Shaw and others, who describe the costume of the Arab tribes or Moors of Northern Africa, where the outer garment is more generally the *bournoos* (No. 153, fig. 3), a woollen cloak, not unlike the *abba*, but furnished with a hood, and which is sometimes strangely confounded even by well-informed persons with a totally different outer garment worn in the same regions, usually called the *hyke*, but which is also, according to its materials, quality, or colour, distinguished by various other names. Regardless of these minute distinctions, this part of dress may be described as a large woollen blanket, either white or brown, and in summer a cotton sheet (usually blue or white, or both colours together). Putting one corner before over the left shoulder, the wearer brings it behind, and then under the right arm, and so over the body, throwing it behind over the left shoulder, and leaving the right arm free for action. This very picturesque mode of wearing the *hyke* is shown in fig. 2 (No. 154).

154.

Another mode of wearing it is shown in fig. 3. It is sometimes thrown over the head as a protection from the sun or wind (fig. 1), and calls to mind the various passages of Scripture in which persons are described as covering their heads with their mantles (2 Sam. xv. 30; 1 Kings xix. 13; Esther vi. 12). This article of dress, originally borrowed from the nomads, is known in Arabia, and extends westward to the shores of the Atlantic, being most extensively used by all classes of the population. The seat of this dress, and of the *abba* respectively, is indicated by the direction of their importation into Egypt. The *hykes* are imported from the west (i.e. from

North Africa), and the abbas from Syria. The close resemblance of the above group of real costume to those in which the traditional ecclesiastical and traditional artistical costumes are displayed, must be obvious to the most cursory observer. It may also be noticed that the hyke is not without some resemblance, as to the manner in which it was worn, to the outer garment of one of the figures in the Egyptian family, supposed to represent the arrival of Joseph's brethren in Egypt (No. 148, fig. 1).

We now turn to the costumes which are seen in the towns and villages of south-western Asia.

In the Scriptures drawers are only mentioned in the injunction that the high-priest should wear them (Exod. xxviii. 42), which seems to show that they were not generally in use; nor have we any evidence that they ever became common. Drawers descending to the middle of the thighs were worn by the ancient Egyptians, and workmen often laid aside all the rest of their dress when occupied in their labours. As far as this part of dress was used at all by the Hebrews, it was doubtless either like this, *c.* similar to those which are now worn in Western Asia by all, except some among the poorer peasantry, and by many of the Bedouin Arabs. They are of linen or cotton, of ample breadth, tied around the body by a running string, or band, and always worn next the skin, not over the shirt as in Europe.

It will be asked, when the poor Israelite had pawned his outer garment 'wherein he slept,' what dress was left to him? The answer is probably supplied by the annexed engraving (No. 155), which represents slightly different garments of cotton, or woollen frocks or shirts, which often, in warm weather, form the sole dress of the Bedouin peasants, and the lower class of townspeople. To this the abba or hyke is the proper outer robe (as in fig. 1, No. 154), but is usually, in summer, dispensed with in the day-time, and in the ordinary pursuits and occupations of life. It is sometimes (as in No. 155, fig. 2) worn with-

155.

out, but more usually with, a girdle; and it will be seen that the shorter specimens are not unlike the dress of one of the figures (fig. 3, No. 148) in the earliest of the Egyptian subjects which have been produced. The shirt worn by the superior classes is of the same shape, but of finer materials. This is shown in the following figure

154.

(No. 156), which represents a gentleman as just risen from bed. If we call this a shirt, the Hebrews doubtless had it—the sole dress (excepting the cloak) of the poor, and the inner robe of the rich. Such, probably, were the 'sheets' (translated 'shirts' in some versions), of which Samson despoiled thirty Philistines to pay the forfeit of his riddle (Judg. iv. 13, 19). It is shown from the Talmud, indeed, that the Hebrews of later days had a shirt called *chaluk*, which it would appear was often of wool, and which is described as the ordinary inner garment, the outer being the cloak or mantle. This shows that the shirt or frock was, as in modern usage, the ordinary dress of the Jews, to which a mantle (*abba*, *hyke*, or *bonnoos*) was the outer covering.

In all the annexed figures (No. 157), representing persons of the superior class, we observe the

157.

shirt covered by a striped (sometimes figured) gown or caftan, of mingled silk and cotton. It descends to the ankles, with long sleeves, extending a few inches beyond the fingers' ends, but divided from a point a little above the wrist, so that the hand is generally exposed, though it may be concealed by the sleeve when necessary: for it is customary to cover the hands in the presence of a person of high rank. It is very common, especially in winter, for persons to sleep without removing this gown, but only unloosing

the girdle by which it is bound. It is not unusual within doors to see persons without any article of dress outside this; but it is considered decidedly as an undress, and no respectable person is beheld out of doors, or receives or pays visits, without an outer covering. Hence persons clad in this alone are said to be 'naked' in Scripture—that is, not in the usual complete dress; for there can be no manner of doubt that this, or something like this, is referred to in Exod. xxviii. 40; Job xxx. 18; Isa. xxii. 21, &c. A similar robe is worn by the women, as was also the case among the Israelites (2 Sam. xiii. 18, 19, Cant. v. 3). It is in the bosom of this robe that various articles are carried, and hence the Scriptural expression of giving things 'into the bosom.'

The girdle worn over this, around the waist, is usually a coloured shawl, or long piece of figured white muslin. The girdle of the poorer classes is of coarse stuff, and often of leather, with clasps. This leathern girdle is also much used by the Arabs, and by persons of condition when equipped for a journey. It is sometimes ornamented with workings in coloured worsted, or silk, or with metal studs, shells, beads, &c. Both kinds of girdles were certainly in use among the Hebrews (2 Kings i. 8; Matt. iii. 4; Mark i. 6; comp. Jer. xiii. 1). It is known to all readers of Scripture how often the 'girdle' and the act of 'girding the loins' is mentioned. It seems from 2 Sam. xx. 8 (comp. also the Syrian figure, No. 151, fig. 1), that it was usual to wear a knife or poniard in the girdle. This custom is still general, and denotes not any deadly disposition, but the want of clasp-knives. Men of literary vocations replace it by an inkhorn, as was also the case among the Israelites (Ezek. ix. 2).

Over the gown is worn either the short-sleeved *gilech* (fig. 3), which is a long coat of woollen cloth; or the long-sleeved *benish* (fig. 2), which is also of woollen cloth, and may be worn either over or instead of the other. The *benish* is, by reason of its long sleeves (with which the hands may be covered), the robe of ceremony, and is worn in the presence of superiors and persons of rank. Over one or both of these robes may be worn the *abba*, bournos, or *hyke*, in any of the modes already indicated. Aged persons often wrap up the head and shoulders with the latter, in the manner shown in fig. 4.

This *hyke* or wrapper is usually taken by persons going on a journey, for the purpose of being used in the same manner as a protection from the sun or wind. This is shown in the annexed cut, representing a group of persons equipped for travel. The robe is here more succinct and compact, and the firm manner in which the whole dress is girded up about the loins calls to mind the passages of Scripture in which the action of 'girding up the loins' for a journey is mentioned.

From this it is also seen that travellers usually wear a sword, and the manner in which it is worn is correctly shown. It would also appear that the Jews had swords for such occasional uses (Matt. xxvi. 51; Luke xxii. 36).

The necessity of baring the arm for any kind of exertion, must be evident from the manner in which it is encumbered in all the dresses we have produced. This action is often mentioned in Scripture, which alone proves that the arm was in ordinary circumstances similarly encumbered

158.

by the dress. For ordinary purposes a hasty tucking up of the sleeve of the right arm suffices; but for a continued action special contrivances are necessary. These are curious, as will be seen by the cut (No. 159). The full sleeves of the shirt are sometimes drawn up by means of cords, which pass round each shoulder, and cross behind, where they are tied in a knot. This custom is particularly affected by servants and workmen, who have constant occasion for baring the arm; but others, whose occasions are more incidental, and who are, therefore, unprovided with the necessary cords, draw up the sleeves and tie them together behind between the shoulders (fig. 2).

159.

For the dress of females we must refer to the article WOMEN. See also the article SANDAL.

DRINK, STRONG. The Hebrew thus rendered seems to demand a more particular elucidation than it has yet received, inasmuch as it had in all probability a much wider signification than is now conveyed by the phrase 'strong drink.' We shall class the various senses of the word under three heads, in the order in which we conceive them to have been developed.

1. *Shechar*, luscious, saccharine drink, or SWEET STAFF, especially sugar or honey of dates, or of the

palm-tree : also, by accommodation, occasionally the sweet fruit itself. By sugar or honey the Jews understood not only honey of bees, but also syrups made from the fruit or juice of the palm and other trees. 'In Solomon's time, and afterwards,' says Dr. Harris, 'the wine and sweet cordials seem generally to have been used *separately*.' It seems more probable, however, that the *palm syrup* or honey was used both as a sweetmeat or article of food, and as a *drink*, diluted with water, as with the modern grape and honey syrups or sherbets (Prov. ix. 2, 5). The derivatives of *shechar*, expressive of its first signification, are numerous. Eastward and southward, following the Arabian channel and the Saracenic conquests, we meet with the most obvious forms of the Hebrew words still expressive of sugar. Thus we have the Arabic *sakar*; Persic and Bengali, *shukkur* (whence our word for sugar-candy, *shukkur-kund*, 'rock-sugar'); common Indian, *jaggree* or *zhagery*; Moresque, *sekkour*; Spanish, *azúcar*; and Portuguese, *asucar* (molasses being *mel-de-assucar*, 'honey of sugar,' abbreviated). The wave of population has also carried the original sense and form northwards, embodying the word in the Grecian and Teutonic languages. Hence Greek, *sakhar*; Latin, *saccharum*; Italian, *zucchero*; German, *zucker* and *jüdering*; Dutch, *suiker*; Russian, *sachar*; Danish, *sukker*; Swedish, *socker*; Welsh, *siogor*; French, *sucre*; and our own common words *sukhar* (sweetmeat), *sugar*, and *saccharine*.

2. DATE OR PALM WINE in its fresh and unfermented state. Bishop Lowth translates Isa. xxiv. 9 thus:—

'With songs they shall no more drink wine
[i.e. of grapes]:

The palm wine shall be bitter to them that
drink it!—

Herodotus, in his account of Assyria, remarks that 'the palm is very common in this country,' and that 'it produces them bread, wine, and honey.'

The Mohammedan traveller (A.D. 850) says that 'palm wine, if drunk fresh, is sweet like honey; but if kept, it turns to vinegar.'

Mandelslo (1640), speaking of the village of Damre near Surat, records thus:—'*Terry* or *Palm Wine*. In this village we found some *terry*, which is a liquor drawn out of the palm-trees, and drunk of it in cups made of the leaves of the same tree. To get out the juice, they go up to the top of the tree, where they make an incision in the bark, and fasten under it an earthen pot, which they leave there all night, in which time it is fill'd with a certain sweet liquor very pleasant to the taste. They get out some also in the day-time, but that [owing to the great heat] *corrupts immediately*, and is good only for vinegar, which is all the use they make of it.'

Adam Fabroni, an Italian writer of celebrity, informs us that 'the palm-trees, which particularly abound in the vicinity of Jericho and Engaddi, also served to make a *very sweet wine*, which is made all over the East, being called palm wine by the Latins, and *ayra* in India, from the Persian *shir*, which means luscious liquor or drink.'

Dr. Shaw thus describes the unfermented palm wine:—'This liquor, which has a more luscious sweetness than honey, is of the consistence of a thin syrup, but *quickly grows tart and ropy*, ac-

quiring an intoxicating quality.' Sir G. T. Temple says, 'We were daily supplied with the sap of the date-tree, which is a delicious and wholesome beverage *when drunk quite fresh*;' but if allowed to remain for some hours, it acquires a sharp taste not unlike cider. The Landers inform us that '*Palm wine* is the common and favourite drink of the natives' of Africa—that 'the juice is called wine,' and that 'it is either used in this state, or preserved till it acquires rather a BITTER flavour.' With these facts before us, the language employed by the prophet in the sublime chapter from which we quoted above, becomes beautifully apposite. His prediction is that 'the land shall be utterly spoiled,' that the light of joy shall be turned into the gloom of sorrow, even as the *sweet drink* which corrupts, grows *sour* and *bitter* to those who drink it. The passage clearly indicates the nature of the drink to have been *sweet* in what the Jews esteemed its most valuable condition, but *bitter* in its fermented state. Hence the drunkard is represented in ch. v. 20-22, as one who 'puts bitter for sweet, and sweet for bitter.' This palm wine, like the honey of dates and sugar, was much valued as a medicine and cordial.

3. SAKAR, in its third sense as a noun, denoted both in the Hebrew and the Arabic, fermented or INTOXICATING PALM WINE. Various forms of the noun in process of time became applied to other kinds of intoxicating drink, whether made from fruit or from grain. Arrack has been commonly, but erroneously, derived from *sakar*, and some have confounded the *arrack* with the palm wine, forgetting that the original wine existed long prior to the discovery of arrack distillation. The true palm wine, also, is exclusively the juice of the palm-tree or fruit, whereas *arrack* is applied to the spirit obtained from fermented rice and other things, and is, as Dr. Shaw remarks, 'the general name for all hot liquors extracted by the alembick.'

The palm wine of the East, as we have explained, is made intoxicating either by allowing it to corrupt and ferment, thereby losing the sweet luscious character for which the Orientals esteem it, and becoming ropy, tart, and bitter; or, in its fresh or boiled state, by an admixture of stimulating or stupefying ingredients, of which there is an abundance. Such a practice seems to have existed amongst the ancient Jews, and to have called down severe reprobation (comp. Prov. xxiii. 30; Isa. i. 22; v. 11, 22).

DROMEDARY. [CAMEL.]

DRUSIL'LA, youngest daughter of Herod Agrippa I. She was much celebrated for her beauty, and was betrothed to Epiphanes, prince of Commagene; but was afterwards married to Azizas, king of Emesa, whom the procurator Felix induced her to abandon, in order to live with him. She is mentioned in Acts xxiv. 24.

DULCIMER. [MUSIC.]

DUMAH, a tribe and country of the Ishmaelites in Arabia (Gen. xxv. 14; Isa. xxi. 11). It is doubtless the same that is still called by the Arabs *Duma the Stony*, and the Syrian *Duma* situated on the confines of the Arabian and Syrian deserts, with a fortress.

DUMAH was also the name of a town in the tribe of Judah (Josh. xv. 52), which Eusebius and Jerome place sevenent R. miles from Eleuthero-polis, in Daroma.

DUNG. Among the Israelites, as with the modern Orientals, dung was used both for manure and for fuel. In a district where wood is scarce, dung is so valuable for the latter purpose, that little of it is spared for the former.

The use of dung for manure is indicated in Isa. xxv. 10, from which we also learn that its bulk was increased by the addition of straw, which was of course, as with us, left to rot in the dunghill. Some of the regulations connected with this use of dung we learn from the Talmud. The heaping up of a dunghill in a public place exposed the owner to the repair of any damage it might occasion, and any one was at liberty to take it away. Another regulation forbade the accumulation of the dunghill to be removed, in the seventh or sabbatic year, to the vicinity of any ground under culture, which was equivalent to an interdiction of the use of manure in that year; and this must have occasioned some increase of labour in the year ensuing.

The use of cow-dung for fuel is known to our own villagers, who, at least in the west of England, prefer it in baking their bread 'under the crock,' on account of the long-continued and equable heat which it maintains. It is there also not unusual in a summer evening to see aged people traversing the green lanes with baskets to collect the cakes of cow-dung which have dried upon the road. This helps out the ordinary fire of wood, and makes it burn longer. In many thinly-wooded parts of south-western Asia the dung of cows, camels, horses, asses, whichever may happen to be the most common, is collected with great zeal and diligence from the streets and highways, chiefly by young girls. They also hover on the skirts of the encampments of travellers, and there are often amusing scrambles among them for the droppings of the cattle. The dung is mixed up with chopped straw, and made into cakes, which are stuck up by their own adhesiveness against the walls of the cottages, or are laid upon the declivity of a hill, until sufficiently dried. It is not unusual to see a whole village with its walls thus garnished, which has a singular and not very agreeable appearance to a European traveller. Towards the end of autumn, the result of the summer collection of fuel for winter is shown in large conical heaps or stacks of dried dung upon the top of every cottage. The usages of the Jews in this matter were probably similar in kind, although the extent to which they prevailed cannot now be estimated.

DU'RA, the plain in which Nebuchadnezzar set up his golden image (Dan. iii. 1). It is clear from the context that 'the plain of Dura' could be no other than that plain (or some part of it) in which Babylon itself was situated.

DUST. For storms of dust, &c., see **STORM**; for throwing dust on the head, see **MOURNING**.

E.

EAGLE (Exod. xix. 4; Lev. xi. 13, &c.). The Eagle, in zoology, forms a family of several genera of birds of prey, mostly distinguished for their size, courage, powers of flight, and arms for attack. The bill is strong and bent into a plain

pointed hook, without the notch in the inner curve which characterizes falcons; the nostrils are covered with a naked cere or skin, of a yellow or a blue colour; the eyes are lateral, sunken, or placed beneath an overhanging brow; the head and neck covered with abundance of longish, narrow-pointed feathers; the chest broad, the legs and thighs exceedingly stout and sinewy, and feathered down to the toes; the feathers in general are brownish and rust-coloured, and the tail is black, grey, or deep brown. Sea-eagles have the legs half bare and covered with horny scales; not unusually the head, back, and tail more or less white. The larger species of both measure, from head to tip of tail, 3 feet 6 inches or more, and spread their wings above 7 feet 6 inches. The claws of the fore and hind toe are particularly strong and sharp; in the sea-eagles they form more than half a circle, and in length measure from $1\frac{1}{2}$ to $1\frac{3}{4}$ of an inch. These majestic birds have their abode in Europe, on the shores of the Mediterranean, in Syria and Arabia, wherever there are vast woody mountains and lofty cliffs: they occupy each a single district, always by pairs, excepting on the coasts, where the sea eagle and the osprey may be found not remote from the region possessed by the rough-legged eagles. It is in this last genus, most generally represented by the golden eagle, that the most powerful and largest birds are found. That species in its more juvenile plumage, known as the ring-tailed eagle, the Imperial eagle, and the booted eagle, is found in Syria; and at least one species of the sea-eagles frequents the coasts, and is even of stronger wing

160. [Aquila heliaca.]

than the others. These build usually in the cliffs of Phœnicia, while the others are more commonly domiciliated within the mountains. According to their strength and habits the former subsist on antelopes, hares, hyrax, bustard, stork, tortoises, and serpents; and the latter usually on fish; both pursue the cat, partridge, and lizard. The osprey alone being migratory retires to Southern Arabia in winter. None, excepting the last-mentioned, are so exclusively averse to carrion as is commonly asserted: from choice or

necessity they all, but in particular the sea-eagles, occasionally feed upon carcases of horses, &c.; and it is well known in the East that they follow armies for that purpose. Hence the allusions in Job and Matt. xxiv. 28, though vultures may be included, are perfectly correct. So again are those which refer to the eagle's eyrie, fixed in the most elevated cliffs. The swiftness of this bird, stooping among a flock of wild geese, with the rushing sound of a whirlwind, we have witnessed; and all know its towering flight, suspended on its broad wings among the clouds with little motion or effort. Thus the predictions, in which terrible nations coming from afar are assimilated to eagles, have a poetical and absolute truth, since there are species like the golden, which really inhabit the whole circumference of the earth, and the nations alluded to bore eagles' wings for standards, and for ornaments on their shields, helmets, and shoulders. The species here figured is the one most common in Syria, and is distinguished from the others by a spot of white feathers on each shoulder.

EARING. This word, which occurs in the Authorized Version (Gen. xlv. 6), is very often supposed to mean 'collecting the ears of corn,' which would confound it with harvest, from which it is distinguished in this very passage. But the word is radically the same with *harrow*, and denotes *ploughing*, from the Anglo-Saxon *earian*, 'to plough.'

EARNEST, a pledge, given and received, to assure the fulfilment of an engagement. Hesychius explains it as somewhat given beforehand. This idea attaches to all the particular applications of the word, as anything given by way of warrant or security for the performance of a promise; part of a debt paid as an assurance of paying the remainder; part of the price of anything paid beforehand to confirm the bargain between buyer and seller; part of a servant's wages paid at the time of hiring, for the purpose of ratifying the engagement on both sides. The idea that the earnest is either to be returned upon the fulfilment of the engagement, or to be considered as part of the stipulation, is also included. The word is used three times in the New Testament, but always in a figurative sense: in the first (2 Cor. i. 22), it is applied to the *gifts* of the Holy Spirit, which God bestowed upon the *apostles*, and by which he might be said to have hired them to be the servants of his son; and which were the earnest, assurance, and commencement of those far superior blessings which He would bestow on them in the life to come, as the wages of their *faithful* services;—in the two latter (2 Cor. v. 5; Eph. i. 13, 14), it is applied to the gifts bestowed on *Christians generally* upon whom, after baptism, the Apostles had laid their hands, and which were to them an *earnest* of obtaining an heavenly habitation and inheritance, upon the supposition of their fidelity. This use of the term finely illustrates the augmented powers and additional capacities promised in a future state.

EAR-RINGS. No custom is more ancient or universal than that of wearing ear-rings, from which it would appear to be a very natural idea to attach such an ornament to the pendulous lobe of the ear. Of the two words in Hebrew denoting ear-rings, one (Num. xxxi. 50; Ezek. xvi.

12) implies *roundness*, and it is a fact that nearly all the ancient ear-rings exhibited in the sculptures of Egypt and Persopolis are of a circular shape. The other word is also applied to a nose-jewel, from which we may suppose that it was a kind of ear-ring, different from the other and more similar to the nose-jewel. Ear-rings of certain kinds were anciently, and are still, in the East, instruments or appendages of idolatry and superstition, being regarded as talismans and amulets. Such probably were the ear-rings of Jacob's family, which he buried with the strange gods at Beth-el (Gen. xxxv. 4).

No conclusion can be formed as to the shape of the Hebrew ear-rings except from the signification of the words employed, and from the analogy of similar ornaments in ancient sculpture. Those worn by the Egyptian ladies were large, round, single hoops of gold, from one inch and a half to two inches and one-third in diameter, and frequently of still greater size, or made of six single rings soldered together. Such probably was the round 'agil' of the Hebrews. Among persons of high or royal rank the ornament was sometimes in the shape of an asp, whose body was of gold set with precious stones [AMULETS]. Silver ear-rings have also been found at Thebes, either plain hoops like the ear-rings of gold, or simple studs. The modern Oriental ear-rings are more usually jewelled drops or pendants than circlets of gold. But the writer has seen a small round plate of silver or gold suspended from a small ring inserted into the ear. This circular plate (about the size of a halfpenny) is either marked with fanciful figures or set with small stones. It is the same kind of thing which, in that country (Mesopotamia), is worn as a nose-jewel, and in it we perhaps find the Hebrew ear-ring which is denoted by the same word that describes a nose-jewel.

The use of ear-rings appears to have been confined to the women among the Hebrews. That they were not worn by men is implied in Judg. xiv. 24, where gold ear-rings are mentioned as distinctive of the Ishmaelite tribes.

EARTH. Besides the ordinary senses of the word or words rendered 'earth' in our translation—namely, as denoting mould, the surface of the earth, and the terrestrial globe—there are others in Scripture which require to be discriminated. 1. 'The earth' denotes 'the inhabitants of the earth' (Gen. vi. 11; xi. 1). 2. *Heaven countries*, as distinguished from the land of Israel, especially during the theocracy, i. e. all the rest of the world excepting Israel (2 Kings xviii. 25; 2 Chron. xiii. 9, &c.). 3. In the New Testament especially, 'the earth' appears in our translation as applied to the land of Judea. As in many of these passages it might seem as if the habitable globe were intended, the use of so ambiguous a term as 'the earth' should have been avoided, and the original rendered by 'the land,' as in Lev. xxv. 23; Isa. x. 23; and elsewhere. This is the sense which the original bears in Matt. xxiii. 35; xxvii. 45; Mark xv. 33; Luke iv. 25; xxi. 23; Rom. ix. 28; James v. 17. For the cosmological uses of the term, see GEOGRAPHY.

EARTHENWARE. [POTTER.]

EARTHQUAKE. The proximate cause of earthquakes, though by no means accurately defined, seems referable to the action of internal

heat or fire. That the earth was once subject to the action of a vast internal power springing probably from the development of subterranean or central heat, the elevations and depressions, and the generally scarred and torn character of its exterior, make sufficiently evident. A power similar in kind, but more restricted in degree, is still at work in the bowels of the earth, and occasionally breaks down all barriers and devastates certain parts of the world.

The manifestation of these awful phenomena is restricted in its range. Accordingly geologists have laid down certain volcanic regions or bands within which this manifestation takes place. Over these regions various traces of volcanic agency are found, such as either gaseous vapours or hot springs, or bituminous substances, and in some instances (occasionally) active volcanoes. Several sources of bitumen are found on the Tigris, in the Persian mountains, near the Kharon, and at Bushire, as well as along the Euphrates. At Hit, especially, on the last-mentioned river, it exists on a very large scale, and, having been much used from the earliest times, seems inexhaustible. Abundant traces of it are also to be seen amid the ruins and over the entire vicinity of Hillah—the ancient Babylon. Syria and Palestine abound in volcanic appearances. Between the river Jordan and Damascus lies a volcanic tract. The entire country about the Dead Sea presents indubitable tokens of volcanic agency.

Accordingly these places come within one of the volcanic regions. The chief of these are—1. that which extends from the Caspian Sea to the Azores; 2. from the Aleutian Isles to the Moluccas; 3. that of the Andes; 4. the African; 5. the Icelandic. Syria and Palestine are embraced within the first band; and these countries have not unfrequently been subject to earthquakes. The first visitation of the kind, recorded to have happened to Palestine, was in the reign of Ahab (a.c. 918-897; 1 Kings xix. 11, 12). A terrible earthquake took place 'in the days of Uzziah, king of Judah' (a.c. 811-759). Its awful character may be learnt from the fact that Zechariah (xiv. 5) thus speaks respecting it—'Ye shall flee as ye fled from before the earthquake in the days of Uzziah, king of Judah'; and also that it appears from Amos (i. 1) that the event was so striking, and left such deep impressions on men's minds, that it became a sort of epoch from which to date and reckon; the prophet's words are, 'two years before the earthquake.'

That earthquakes were among the extraordinary phenomena of Palestine in ancient times is shown in their being an element in the poetical imagery of the Hebrews, and a source of religious admonition and devout emotion (see Ps. xviii. 7; Hab. iii. 6; Nah. i. 5; Isa. v. 25). The only earthquake mentioned in the New Testament is that which happened at the crucifixion of the Saviour of mankind (Matt. xxvii. 50-1; Luke xxiii. 44-5; Mark xv. 33). This darkness has been misunderstood, and then turned to the prejudice of Christianity [DARKNESS]. The obscuration was obviously an attendant on the earthquake. Earthquakes are not seldom attended by accompaniments which obscure the light of day during (as in this case, from the sixth to the ninth hour, that is, from 12 o'clock at noon to 3

o'clock P.M.) several hours. If this is the fact, then the record is consistent with natural phenomena, and the darkness which sceptics have pleaded against speaks actually in favour of the credibility of the Gospel. Now it is well known to naturalists that such obscurations are by no means uncommon.

An earthquake devastated Judæa some years (31) before the birth of our Lord, at the time of the battle of Actium, which Josephus reports was such 'as had not happened at any other time, which brought great destruction upon the cattle in that country. About ten thousand men also perished by the fall of houses.' Jerome writes of an earthquake which, in the time of his childhood (about a.d. 315), destroyed Rabbath Moab. The writers of the middle ages also speak of earthquakes in Palestine, stating that they were not only formidable, but frequent. In 1834 an earthquake shook Jerusalem, and injured the chapel of the nativity at Bethlehem. As late as the year 1836 (Jan. 1) Jerusalem and its vicinity were visited by severe shocks of earthquake, yet the city remains without serious injury from these subterranean causes.

EAST. This word, which is used by English writers in only two senses, viz. to denote either the quarter of the heavens where the sun rises, or the regions in the eastern part of the world, has frequently *three* senses in the Authorized Version of the Bible. Thus, it is sometimes used to mean the *sun-rising* (Ps. ciii. 12), 'as far as the east is from the west'; and *very frequently* it corresponds to *kedem*, the name given by the ancient Hebrews to a certain region, without any regard to its relation to the eastern part of the heavens, comprehending not only Arabia Deserta and the lands of Moab and Ammon, which really lay to the east of Palestine, but also Armenia, Assyria, Mesopotamia, Babylonia, and Chaldaea, which were situated rather to the north than the east of Judæa. Its geographical boundaries include Syria, the countries beyond the Tigris and Euphrates, the shores of the Indian ocean and of the Arabian gulf. The name given to this entire region by the Hebrews was the land of Kedem or East, and its miscellaneous population were called by them Sons of the East, or Orientals. It seems that the inhabitants of this region were distinguished for their proficiency in the arts and sciences (comp. 1 Kings i. 4, 30), and were addicted in the time of Isaiah to superstition (Isa. xxvi.). The wise men, who came from the East to Jerusalem at the birth of the Saviour, no doubt belonged to this tract of country, 'saying, We have seen his star in the East.' Campbell remarks that 'to see either star or meteor in the east,' means, in English, to see it in the East-quarter of the heavens, or looking eastward. But this cannot be the Evangelist's meaning. The meaning manifestly is, that when the magians themselves were in the East, they saw the star. So far were they from seeing the star in the East, according to the English acceptation of the phrase, that they must have seen it in the West, as they were by its guidance brought out of the East country westwards to Jerusalem.

EAST WIND. [WIND.]

EBAL and GERIZIM, two mountains of Samaria, forming the opposite sides of the valley which contained the ancient town of Shechem,

the present Nabalus. From this connection it is best to notice them together. The valley which these mountains enclose is about 200 or 300 paces wide, by above 3 miles in length; and Mount Ebal rises on the right hand and Gerizim on the left hand of the valley (which extends west-north-west) as a person approaches Shechem from Jerusalem. It was on Mount Ebal that God commanded to be reared up an altar, and a pillar inscribed with the law; and the tribes were to be assembled, half on Ebal and half on Gerizim, to hear the fearful maledictions pronounced by the Levites upon all who should violate the obligations of the sacred code, and the blessings promised to those who should observe them. The tribes which responded with simultaneous 'Amen's' to the curses were to be stationed on Mount Ebal, and those who answered to the blessings, on Mount Gerizim. This grand ceremony—perhaps the most grand in the history of nations—could not have found a more fitting scene; and it was duly performed by Joshua as soon as he gained possession of the Promised Land (Deut. xxvii.; Josh. viii. 30-35). Dr. Robinson (*Bib. Researches*, iii. 95) says—'Mounts Gerizim and Ebal rise in steep, rocky precipices, immediately from the valley on each side, apparently some 800 feet in height. The sides of both these mountains as here seen (i. e. from Nabalus) were, to our eyes, equally naked and sterile, although some travellers have chosen to describe Gerizim as fertile, and confine the sterility to Ebal. The only exception in favour of the former, as far as we could perceive, is a small ravine coming down opposite to the west end of the town, which indeed is full of fountains and trees; in other respects both mountains, as here seen, are desolate, except that a few olive-trees are scattered upon them. The side of the northern mountain, Ebal, along the foot, is full of ancient excavated sepulchres. The southern mountain is now called by the inhabitants Jebel-et-Târ, though the name Gerizim is known, at least, to the Samaritans. The modern appellation of Ebal we did not learn.'

EBEN-EZEL (*stone of departure*), an old stone of testimonial, mentioned in 1 Sam. xx. 19. The circumstance which it commemorated is not known.

EBEN-EZER (*stone of help*), the name given to a stone which Samuel set up between Mizpeh and Shen, in witness of the divine assistance obtained against the Philistines (1 Sam. vii. 12).

EBONY occurs only in one passage of Scripture, where the prophet Ezekiel (xxvii. 15), referring to the commerce of Tyre, says, 'The men of Dedan were thy merchants; many isles were the merchandise of thine hand: they brought thee for a present horns of ivory and ebony.'

Ebony wood was highly esteemed by the ancients, and employed by them for a variety of purposes. It is very appropriately placed in juxtaposition with ivory, because both were obtained from the same countries—Ethiopia and India; and, among the comparatively few articles of ancient commerce, must, from this cause, always have been associated together, while their contrast of colour and joint employment in inlaid work, would contribute as additional reasons for their being adduced as articles characteristic of a distinct commerce.

161. [*Dioppyros Ebenum.*]

But it is not in Ezekiel only that ebony and ivory are mentioned together. For Diodorus, as quoted by Bochart, tells us that an ancient king of Egypt imposed on the Ethiopians the payment of a tribute of ebony, gold, and elephants' teeth. So Herodotus (iii. 97), as translated by Bochart says, 'Æthiopes Persis pro triennali tributo rebus duos chænicæ auri apyri (*id est, ignea nondum experti*), et ducentas ebeni phalangas, et magnos elephantis dentes viginti.' Pliny, referring to this passage, remarks, 'But Herodotus assigneth it rather to Ethiopia, and saith, that every three years the Ethiopians were wont to pay, by way of tribute, unto the kings of Persia, 100 billets of the timber of that tree (that is Ebene), together with gold and yvorie; and, again, 'From Syene (which confineth and boundeth the lands of our empire and dominion: as farre as to the island Meroë, for the space of 996 miles, there is little ebene found: and that in all those parts betweene there be few other trees to be found but date-trees, which peradventure may be a cause that Ebene was counted a rich tribute, and deserved the third place, after gold and ivorie' (Holland's *Pliny*, xii. 4). This however is a mistake, for several of the ancients mention both Indian and Ethiopian ebony.

If we look to the modern history of ebony, we shall find that it is still derived from more than one source. Thus, Mr. Holtzapffel, in his recent work on Turning, describes three kinds of ebony. 1. One from the Mauritius, in round sticks like scaffold poles, seldom exceeding fourteen inches in diameter, the blackest and finest in the grain, the hardest and most beautiful. 2. The East Indian, which is grown in Ceylon and the Peninsula of India, and exported from Madras and Bombay in logs from six to twenty, and sometimes even twenty-eight inches in diameter, and also in planks. This is less wasteful, but of an inferior grain and colour to the above. 3. The African, shipped from the Cape of Good Hope in billets, the general size of which is from three to six feet long, three to six inches broad, and two

to four inches thick. This is the least wasteful, as all the refuse is left behind; but it is the most porous, and the worst in point of colour. No Abyssinian ebony is at present imported: this, however, is more likely to be owing to the different routes which commerce has taken, but which is again returning to its ancient channels, than to the want of ebony in the ancient Ethiopia. From the nature of the climate, and the existence of forests in which the elephant abounds, there can be no doubt of its being well suited to the group of plants which have been found to yield the ebony of Mauritius, Ceylon, and India, namely, the genus *Diospyros* of botanists.

EBER. [HEBER.]

ECBATANA. [ACHMETHA.]

ECCLESIASTES. This book has obtained its Hebrew name *Kohleth* from the designation of the principal person mentioned in it, who is thus styled in several passages. Some have supposed that *Kohleth* means a body or academy of sages, whose dicta are contained in this book; but this opinion is contradicted by the heading of the book itself, which thus commences: *Words of Kohleth, the son of David, the king in Jerusalem*. Hence it appears that *Kohleth* is intended for an epithet of Solomon. Various interpretations have been given of its meaning, but in all probability it means *assembler, preacher, or teacher*.

The circumstance that Solomon is introduced as the speaker in this book has induced most of the ancient interpreters to consider him as its author. Others, however, are of opinion that words are used in it which show that it must have been written at a later period than the time of Solomon.

The diversity of sentiment as to the authorship has of course led also to a difference of opinion as to the date of the book. But one thing is clear,—that whoever may have been the author, the book cannot have been written after the times of Ezra and Nehemiah, under whom the canon was completed.

Those who maintain that Ecclesiastes was not written by Solomon are of opinion that it was not composed during the latter period of the first, but rather during the time of the second temple, since idolatry does not occur amongst the deviations combated by the author. The whole book seems to presuppose that the people were externally devoted to the Lord. The admonitions of the author to a serene enjoyment of life, and against murmuring; exhortations to be contented with Divine Providence, and the attacks upon a selfish righteousness of works, may best be explained by supposing the author to have lived in a period like that of Malachi, in which there prevailed a Pharisaical self-righteousness, and melancholy murmurings because God would not recognise the alleged *rights* which they produced before him, and refused to acknowledge the *claims* they made upon him.

The author places the fundamental idea of the nothingness of all earthly things both at the beginning and at the end of his book, and during its course repeatedly returns to the same. This has induced many interpreters to suppose that the purpose of the author was to demonstrate this one idea; an opinion which, down to the most recent times, has been unfavourable to the true interpretation of the book, because every thing,

however reluctant, has been forced into an imaginary connection. The following is the correct view. The object of the author is not to teach an especial tendency of wisdom, but wisdom in general. Consequently it is not at all surprising if the connection suddenly ceases, and a new subject commences. That the idea of the nothingness of earthly matters should strongly predominate may easily be explained, since according to our author it forms a very important part of wisdom. He never, however, intended to confine himself to this one idea, although he likes frequently to point it out in passing, even when he is considering a matter from another point of view. 'The plan of this book,' says Herder, 'has been the subject of much investigation. It is best to consider this plan as free as possible, and to employ its separate parts for its support. The commencement and the conclusion show the unity of the whole. The greater part consists of isolated observations concerning the course of the world, and the experience of his life. These are connected with general sentences; and, finally, a very simple conclusion is deduced from the whole. It seems to me that a more artificial texture ought not to be sought for.'

With regard to the contents and objects of the book, we have to consider only the fundamental idea, omitting isolated sentences of wisdom, and rules for the conduct of life. Nobody can entertain any doubt concerning this fundamental idea. It is contained in the sentence: 'Vanity of vanities; all is vanity.' It is, however, very important that this should be rightly understood. The question is, What is that ALL which is vanity? The author does not mean ALL in general, but only ALL of a certain genus. He himself explains this, by defining this ALL in numerous passages; as, 'all that is under the sun'; that is, earthly things in their separation from the heavenly. To this leads also the enumeration of the ALL, in which occur only those things which belong to the earth—riches, sensual pleasure, honour, sphere of activity, human wisdom apart from God, self-righteousness. From many passages it appears that the author was far from comprehending the fear of God and active obedience to his laws among that ALL which was vanity. This appears most strikingly from the conclusion, which, as such, is of the highest importance, and furnishes the undoubted measure for the correctness of the whole interpretation. 'Let us hear the conclusion of the whole matter: Fear God and keep his commandments: for this is the whole duty of man [i. e. in this consists all that is incumbent upon him; and his whole salvation depends upon it]. For God shall bring every work into judgment, with every secret thing, whether good, or whether evil.' (Compare ch. xii. 1: 'Remember now thy Creator in the days of thy youth'; ch. v. 5-7. 'Fear thou God'; ch. vii. 18, and many other passages.) A deep religious sense pervades the whole book. In reference to the prevailing idea, Ewald strikingly remarks, p. 182, 'There blows throughout this book a piercing chill against every earthly aim, and every vain endeavour; a contempt which changes into a bitter sneer against every thing which in the usual proceedings of men is considered and perverse; an indefatigable penetration in the discovery of all human vanities and fooleries. In

no earlier writing has all cause of pride and vain imagination so decidedly and so comprehensively been taken from man; and no book is pervaded by such an outcry of noble indignation against all that is vain in this world.

From the contents of the book results its object. The author had received the mission to treat profess-dly and in a concentrated manner the highly important sentence, 'Vanity of vanities; all is vanity,' which pervades the whole of Holy Writ; but he is not content with the mere theoretical demonstration, so as to leave to another teacher its practical application, but places before us these practical results themselves: What is incumbent upon man, since every thing else is nought? What real good remains for us, after the appearance in every seeming good has been destroyed? The answer is, Man shall not gain by cunning and grasping; shall not consume himself in vain meditations, nor in a hurried activity; he shall not murmur about the loss of that which is naught; he shall not by means of a self-made righteousness constrain God to grant him salvation; but he shall instead fear God (ch. xii. 13; v. 6, 7), and be mindful of his Creator (ch. xii. 1); he shall do good as much as he is able (ch. iii. 12); and in other passages. And all this, as it is constantly inculcated by the author, with a contented and grateful heart, freed from care and avarice; living for the present moment, joyfully taking from the hand of the Lord what he offers in a friendly manner. Man shall not be of a sorrowful countenance, but in quiet serenity enjoy the gifts of God. What would avail him all his cares and all his avarice? By them he cannot turn any thing aside from him, or obtain any thing, since every thing happens as it shall happen.

ECCLÉSIASTICUS. [WISDOM OF SIRACH.]

ECDIPPA. [ACHIZIB.]

E'DEN. [PARADISE.]

E'DOM. [ESAU.]

E'DOMITES. [IDUMÆA.]

E'DREI, one of the metropolitan towns (Ash-taroth being the other) of the kingdom of Bashan, beyond the Jordan. It was here that Og, the gigantic king of Bashan, was defeated by the Israelites, and lost his kingdom (Num. xxi. 33-35; Deut. i. 4; iii. 1-3). Edrei afterwards belonged to eastern Manasseh (Josh. xiii. 81). It was the seat of a bishop in the early ages of Christianity. The place now bears the name of Draa, and has been visited in the present century by most of the travellers who have explored the country beyond the Jordan. It is situated in a deep valley, two hours south-east from Mezareib; and the ruins cover an extent of about two miles in circumference, the principal being an immense rectangular building, with a double covered colonnade all around, and a cistern in the middle. This seems to have been originally a Christian church, and afterwards a mosque. Near the town, in the hollow of the mountains, is a large reservoir cased with stone, near which are the ruins of a large building, with a cupola of light materials.

EGLON, a king of Moab, who, assisted by the Ammonites and Amalekites, subdued the Israelites beyond the Jordan, and the southern tribes on this side the river, and made Jericho the seat, or one of the seats, of his government. This subjection to a power always present must have been more galling to the Israelites than any they

had previously suffered. It lasted eighteen years, when (B.C. 1428) they were delivered, through the instrumentality of Ehud, who slew the Moabish king (Judg. iii. 12-33).

EGYPT, the land of Ham, a son of Noah, from whom was derived the ancient native appellation of the country, Chemi. From Mizraim, the second son of Ham, comes the ordinary Biblical name, Mizraim, a word which properly denotes Lower Egypt, as being that part of the country with which the Israelites were nearest and best, if not (in the earlier periods of their history) solely, acquainted. This designation, however, is sometimes used for Egypt indiscriminately, and was by the later Arabs extended to the entire country.

Egypt is the land of the Nile, the country through which that river flows from the Island of Philæ, situated just above the Cataracts of Syene, in lat. 24° 1' 36", to Damietta, in 31° 35' N., where its principal stream pours itself into the Mediterranean Sea. On the east it is bounded by Palestine, Idumæa, Arabia Petrea, and the Arabian Gulf. On the west, the moving sands of the wide Libyan desert obliterate the traces of all political or physical limits. Inhabited Egypt, however, is restricted to the valley of the Nile, which, having a breadth of from two to three miles, is enclosed on both sides by a range of hills: the chain on the eastern side disappears at Mocattam; that on the west extends to the sea. In lat. 30° 1', the Nile divides into two principal streams, which, in conjunction with a third that springs somewhat higher up, forms the Delta, so called from its resemblance to the Greek letter Δ. These mountains are interesting, if for no other reason than that they served as the bed whence the materials were obtained out of which were constructed the wonderful buildings for which Egypt is justly distinguished. The superficial extent of Egypt has been estimated at about 11,000 square miles. The soil, which is productive, consists almost exclusively of mud brought down and deposited by the river, whose waters are indispensable every year for the purposes of agriculture to such an extent that the limits of their flow are the limits of vegetation. The Delta owes its very existence to the deposits of the Nile, and but for the waters of this stream, carried over its surface by natural or artificial means, would soon be a desert: it was therefore with propriety, as indeed was the entire country, termed 'the gift of the Nile.' The agency of the stream is the more necessary because rain very seldom falls in Lower Egypt. The land, placed as it is on the confines of Africa and Asia, yet so adjacent and accessible to Europe, in itself a garden and a store-house, may well have held an important position in the ancient world, and can hardly fail, unless political influences are very adverse, to rise to a commanding attitude in modern times. As to the number of its inhabitants, nothing very definite is known. Its fertility would doubtless give birth to, and support, a teeming population. In very remote times as many as 8,000,000 of souls are said to have lived on its soil. In the days of Diodorus Siculus they were estimated at 3,000,000. Volney made the number 2,300,000. The present government estimate is 3,200,000, which seems to be somewhat beyond the fact.

Egypt naturally divides itself into two great sections at the apex of the Delta, the country lying south of that point being designated Upper Egypt, that north of it Lower Egypt. Under the Ptolemies, and probably at a very early period, the whole country was divided into thirty-six cantons or provinces, which division was maintained till the invasion of the Saracens. It is now composed of 24 departments, which, according to the French system of geographical arrangement, are subdivided into *arrondissements* and cantons.

The Nile is never mentioned by name in our translation of the Old Testament; it is always called the river of Egypt, although the word Nile occurs in the original (Isa. xxvii. 12; Josh. xv. 4; 2 Kings xxiv. 7).

Till within a few years the sources of the Nile and the termination of the Niger were hid in alike mysterious obscurity. The latter has been discovered, but the former, notwithstanding many strenuous efforts and some pretence, remain to reward the enterprise of some more fortunate traveller. The various branches of the Nile have their rise in the highlands north of the equator. The three principal branches of the Nile are—1, the Bahr el Abiad, or White River, to the west, which is now known to be the largest and longest; 2, the Bahr el Azrek, or Blue River, in the centre; 3, the Tacazzé, or Abara, which is the eastern branch. The Nile, from its confluence with the Tacazzé (17° 45' north lat.) down to its entrance into the Mediterranean (1200 geographical miles), receives no permanent streams: but in the rainy season it receives wadis, or torrents, from the mountains. The annual overflow of the river, on which the ancients wrote so obscurely, is known to arise from the periodical rains which fall within the tropics. The rich alluvial deposits which the Nile spreads over Nubia and Egypt are mainly derived through the Blue River; the White River, or longest stream, bringing nothing of the kind. Owing to the yearly deposit of alluvial matter, both the bed of the Nile and the land of Egypt are being gradually raised. The river proceeds in its current uniformly and quietly at the rate of two and a half or three miles an hour, always deep enough for navigation. Its water is usually blue, but it becomes of a deep brick-red during the period of its overflow. It is salubrious when drunk, meriting the encomiums which it has so abundantly received. On the river the land is wholly dependent. If the Nile does not rise a sufficient height, sterility and dearth, if not famine, ensue. An elevation of sixteen cubits is essential to secure the prosperity of the country. Such, however, is the regularity of nature, and such the faithfulness of God, that for thousands of years, with but few and partial exceptions, these inundations have in essential particulars been the same. The waters of the stream are conveyed over the surface of the country by canals when natural channels fail. During the overflow the land is naturally inundated, and has the appearance of a sea dotted with islands. Wherever the waters reach, abundance springs forth. The cultivator has scarcely more to do than to scatter the seed. No wonder that a river whose waters are so grateful, salubrious, and beneficial, should in days of ignorance have been regarded as an object of worship, and that it is still revered and beloved.

Well may Egypt have been visited as a granary by the needy in ancient times (Gen. xii. 10; Exod. xvi. 3). Besides corn, the country produced onions, garlic, beans, pumpkins, cucumbers, melons, flax, cotton, and wine. The acacia, sycamore, palm, and fig-tree adorned the land; but there was a want of timber. The Nile produced the useful papyrus, and abounded in fish. On its banks lurked the crocodile and hippopotamus. The Egyptian oxen were celebrated in the ancient world. Horses abounded (1 Kings x. 28); hence the use of war-chariots in fight (Isa. xxxi. 1; Diod. Sic. i. 45), and the celebrity of Egyptian charioteers (Jer. xli. 4; Ezek. xvii. 15). The land was not destitute of mineral treasures. Gold mines were wrought in Upper Egypt.

The climate is very regular and exceedingly hot; the atmosphere clear and shining; a shade is not easily found. Though rain falls even in the winter months very rarely, it is not altogether wanting, as was once believed. Thunder and lightning are still more unfrequent, and are so completely divested of their terrific qualities that the Egyptians never associate with them the idea of destructive force. Showers of hail descending from the hills of Syria are sometimes known to reach the confines of Egypt: the formation of ice is very uncommon. Dew is produced in great abundance. The wind blows from the north from May to September, when it veers round to the east, assumes a southerly direction, and fluctuates till the close of April. The southerly vernal winds, traversing the arid sands of Africa, are most changeable as well as most unhealthy; they form the simoom or samiel, and have proved fatal to caravans and even to armies. Mosquitos, locusts, frogs, together with the plague, the small pox, and leprosy, are the great evils of the country.

162. 1. Egypto-Ethiopian (the Tirkakah of Scripture); 2, 4. Ethiopian; 3. Egyptian.

The most recent inquiries have shown that the extreme limit at Philæ was only of a political nature; for the natives of the country below it were of the same race as those who lived above that spot—a tribe which passed down into the fertile valley of the Nile from its original abode

in the south. These Ethiopians and the Egyptians were not negroes, but a branch of the great Canaanian family. Their colour—at least the colour of the higher castes—was brown; their frame slender, but of great strength. The women were very fruitful.

The mode of life of the Egyptians was influenced by their locality: those who dwelt on high lands on the east, as well as those who dwelt on the marshy flat country in the Delta, were shepherds, as their land did not admit cultivation. The people who lived along the Nile became fishermen and sailors. The cultivated part of the natives who lived on the plains and over the surface of the country diligently and most successfully practised all the arts of life, and have left ever-during memorials of their proficiency and skill.

On this natural diversity of pursuits, as well as on a diversity of blood, was founded the institution of castes, which Egypt had in common with India, and which pervaded the entire life of the nation. These, according to Herodotus, were seven in number: the priestly caste was the most honoured and influential; it had in every large city a temple dedicated to the deity of the place, together with a high-priest, who stood next to the king and restricted his power. The priesthood possessed the finest portions of the country: they were the judges, physicians, astrologers, architects,—in a word, they united in themselves all the highest culture and most distinguished offices of the land, while with them alone lay tradition, literature, and the sacred writings. This class exerted the most decided and extensive influence on the culture not only of their own country, but of the world; for during the brightest periods of Grecian history the love of knowledge carried into Egypt men who have done much to form the character of after-ages, such as Solon, Pythagoras, Archytas, Thales, Herodotus, Plato, and others (comp. Gen. xli. 8; Exod. vii. 11; viii. 11; xiii. 7).

The peculiarities of the ancient Egyptians of the lower castes seem to have survived best, and to be represented, at least in some particulars, by the Fellahs of the present day. These Fellahs discharge all the duties of tilling the country and gathering its rich abundance; their attachment to it is very strong, and their love to the Nile almost a passion. They are a quiet, contented, submissive race, always living, through an unjust government, on the edge of starvation, yet always happy, with no thought for the morrow, no care for, no interest in, political change.

The only other tribe we have room to notice is that of the Copts, equally with the preceding, indigenous. They are Christians by hereditary transmission, and have suffered centuries of cruel persecutions and humiliations, though now they seem to be rising in importance, and promise to fill an important page in the future history of Egypt. In character they are amiable, pacific, and intelligent, having of course the faults and vices of dissimulation, falsehood, and meanness, which slavery never fails to engender. In office they are the scribes, the arithmeticians, the measurers, the clerks—in a word, the learned men of the country. The Copts have been under-estimated at 150,000 souls, divided into twelve episcopal districts, the bishops of which unite to elect a patriarch.

'The wisdom of Egypt' was a phrase which, at an early period, passed into a proverb, so high was the opinion entertained by antiquity of the knowledge and skill of the ancient Egyptians (1 Kings iv. 30; Herod. ii. 160; Joseph. *Antiq.* viii. 25; Acts vii. 22). It was long thought that the hieroglyphical inscriptions on the monumental remains of Egypt contained treasures of wisdom no less boundless than hidden; and, indeed, hieroglyphics were, in the opinion of some, invented by the priests of the land, if not expressly to conceal their knowledge from the profane vulgar, yet as a safe receptacle and convenient storehouse for their mysterious but invaluable doctrines. Great, consequently, was the expectation of the public when it was announced that a key had been discovered which opened the portal to these long-concealed treasures. Men of profound learning, great acuteness of mind, and distinguished reputation, have engaged and persevered in the inquiry; but, after all, the conclusions and positions which have been drawn and set forth are only in a few cases (comparatively) definite and unimpeachable.

The difficulties that oppose the formation of a satisfactory Egyptian chronology are great and numerous. The most distinguished writers differ egregiously in their statements.

Various efforts, however, have been made to remove difficulties, reconcile contradictions, and harmonize dissonances; but the success has been far from distinguished.

What, however, we know to be definite, and believe to be accurate in its disclosures, and what we judge to be far more important in an historical relation, is to be found in the paintings and sculptures with which the Egyptians left the walls of their tombs and temples decorated in forms and colours which have not yet faded from the sight. It is true that these instances of real picture-writing may do little for fixing the epoch of the accession of a king or the termination of a dynasty. Yet in this they are not entirely mute.

163. Interior of Painted Tomb.

Among the innumerable mural sculptures in the temple at Karnak, Champollion discovered one in which a king, Sheshonk (Shishak), is presenting captives of various nations to his God as trophies of victory. One of these, distinguished by a long beard and Jewish physiognomy, bears the hieroglyphical title Youdah Malek, king of Judah. But for any practical purpose, the determination of a date, or the identification of an event, is of small comparative moment; and far too much importance has been attached to mere chronological details. To learn when an Egyptian or Chinese king ascended the throne, or departed this life, may gratify the antiquary, or even reward much learned toil, but the world at large

has an interest in history in the main, if not exclusively, so far as it discloses what men thought, felt, did; what they hoped, feared, and achieved in the days of old; thereby affording to posterity earnings, encouragement, light, and impulse. Now for these highly important purposes the most abundant materials are presented in Egypt, and may be found described in the works of Champollion, Wilkinson, and others. Let any one visit the Egyptian gallery in the British Museum, and he will be surprised and delighted to find Egypt almost resuscitated. The tombs have given up their dead. Buried treasures, over whose silence centuries had rolled before our era began, crowd on the sight and gratify the mind. And paintings, too, strike the eye, which may not indeed conform very exactly to the laws of perspective, but which lay open, and set before the spectator, the Egyptian, as he was in the days of his glory and pride. Indeed, from the paintings and sculptures which have been discovered and described, we are enabled to follow this most singular and deeply interesting people through all the classes of society, through all the operations of science and husbandry, into the transactions of public life, the details of house-keeping, the achievements of war, the amusements of hunting, fishing, feasting, and the solemn rites of a most august and imposing religious ceremonial.

Amid the various profane authors who have written more or less in detail on Egypt, the Bible remains our best and fullest authority for the early history of the country. This history, it is true, is not presented in a chronological series of events, nor supplied respecting any period with nice exactitude and minute details. The disclosures made by inscriptions on public buildings, of kings, wars, and conquests, may, when verified as to age, and placed in their probable order by the aid of learning and criticism, reveal more as to the dynasties and individual sovereigns; but on such information, even when free from doubt, and most accurate, little real value can be set; while the Bible supplies, either by express statement or obvious implication, facts and principles which constitute genuine history, and go far to give the past all the value which it can possess for the men of these times. And what makes these disclosures the more valuable is not only that they wear the character of genuine and uncorrupted history—free from the false, deep, and unnatural colourings of mythology; but that they relate to the earliest forms of civilized life, and to ages over which profane historians have left the thickest darkness. Narrations and implications, such as the Bible affords in regard to the early history of Egypt, want no corroboration; they wear in their naturalness, simplicity, and correspondence with what would be expected in the ages to which they refer, evidence that they represent actual realities, which none can resist who have studied either human nature or human society. Still it may not be supererogatory to remark that the little which learning and industry have succeeded in extracting from the monumental inscriptions, and the very great deal which funeral and religious paintings have of late made known; and indeed all, from whatever source gathered, that we know of the country and its institutions and usages, are in entire harmony with what the

Scriptures directly or indirectly teach respecting Egypt. And it is certainly a very great point to have ascertained beyond doubt that the Egypt of the Bible is Egypt indeed, not a fiction, nor an imposture, nor a blunder—as writers of the Voltaire school would persuade the world—but a reality, so far as it goes, a picture copied from actual life.

We learn from the Old Testament that while the Jews, the earliest nation that has handed down to us the history of its rise and civilization, were yet a tribe of wandering shepherds, under Abraham, depending solely upon the unbought gifts of nature, who, when they had exhausted one district, instead of cultivating it, drove off their flocks in search of a new pasture-ground, after the manner of the American Indians; the Egyptians were acquainted with agriculture and all those arts of civilization and government which indicate a social existence, extending backwards for at least several ages. This is confirmed in a striking manner by architectural remains that have survived the ravages of above thirty centuries; for while the Israelites, under the immediate successors of Joshua, were still warring with the Canaanites for the possession of the land of promise, or yet earlier, while they were yet slaves in Egypt, that most interesting land was distinguished for palaces, temples, porticos, obelisks, statues, and canals, which declare that they had been preceded by a long period of civilization, and which still remain the admiration of the world. The pyramids of Lower Egypt, requiring for their erection the least quantity of architectural knowledge, no elegance of design, no taste in detail, might possibly have been the work of men driven by task-masters to their daily labour; but that the palaces, tombs, and temples of Upper Egypt, which present to us the earliest known instances of architecture, sculpture, and painting; the colossal statues of Aménoph and Rameses, requiring considerable anatomical knowledge for the original design, and a mechanical skill in the execution, exceeding perhaps even that of the Greeks themselves; the vast works for irrigation; and the correct division of the calendar, implying great knowledge of mathematics—that these should have been the works of a people suffering under political disadvantages, and not far advanced in all the arts and refinements of social life, would contradict all that observation or history has made known. Some considerable degree therefore of political freedom, as well as a high cultivation, must at an early period have been enjoyed by the Egyptians.

In Gen. x. we find the colonization of Egypt traced up to the immediate children of Noah, for it is there stated that Mizraim was the second son of Ham, who was himself the second son of Noah. Immediately after these genealogical statements the sacred narrative (Gen. xii.) informs us that the patriarch Abraham, pressed by famine, went down (about b.c. 1920) into Egypt, where it appears he found a monarch, a court, princes and servants, and where he found also those supplies of food which the well-known fertility of the country had led him to seek there; for it is expressly stated that the favour which his wife had won in the reigning Pharaoh's eye procured him sheep and oxen, as well as he-asses, and men-servants, and maid-servants, and the

asses and camels. In Gen. xxi. 9, mention is made in the case of Ishmael, the son of Hagar the Egyptian whose mother took him a wife out of the land of Egypt, of a mixed race between the Egyptians and the Chaldeans, a race which in after times became a great nation. In Gen. xxxix. begins the interesting story of Joseph's being carried down to Egypt, with all its important consequences for the great-grandchildren of Abraham. The productiveness of the country is the allurement, famine the impulse. Attendant circumstances show that Egypt was then famous also for its commercial pursuits; and the entire narrative gives the idea of a complex system of society (about B.C. 1720), and a well-constituted yet arbitrary form of government. As in eastern courts at later periods of history, elevation to high offices was marked and sudden. The slave Joseph is taken from prison and from impending death, and raised to the dignity of prime vizier, and is entrusted with making provision for an approaching dearth of food, which he had himself foretold, during which he effects in favour of the ruling sovereign one of the greatest revolutions of property which history has recorded. The high consideration in which the priestly caste was held is apparent. Joseph himself marries a daughter of the priest of On. Out of respect towards, as well as by the direct influence of, Joseph, the Hebrews were well treated. The Scriptural record, however, distinctly states (xlv. 34) that before the descent of Israel and his sons 'every shepherd' was 'an abomination unto the Egyptians.' The Hebrews, whose 'trade had been about cattle,' must have been odious in the eyes of the Egyptians, yet are they expressly permitted to dwell 'in the best of the land' (xlvii. 6), which is identified with the land of Goshen, the place which the Israelites had prayed might be assigned to them, and which they obviously desired on account of the adaptation of its soil to their way of life as herdsmen. Having settled his father and family satisfactorily in the land, Joseph proceeded to supply the urgent wants of a hungry nation, and at the same time converted the tenure of all property from freehold into tenancy at-will, with a rent-charge of one-fifth of the produce, leaving their lands, however, in the hands of the priests; and thus he gave another evidence of the greatness of their power.

The richness of Goshen was favourable, and the Israelites 'grew and multiplied exceedingly,' so that the land was filled with them. But Joseph was now dead; time had passed on, and there rose up a new king (probably one of a new dynasty) which *hate* (Exod. i. 8) not Joseph, having no personal knowledge, and it may be no definite information of his services: who, becoming jealous of the increase of the Hebrews, set about persecuting them with the avowed intention of diminishing their numbers and crippling their power. Severe task-masters are therefore set over them; heavy tasks are imposed; the Hebrews are compelled to build 'treasure cities, Pithom and Raamses.' It is found, however, that they only increase the more. In consequence, their burdens are doubled and their lives made bitter with hard bondage (Exod. i. 14), 'in mortar and in brick, and in all manner of service in the field.' Their first-born males,

moreover, are doomed to destruction the moment they come into being. The deepest heart-burnings ensue; hatred arises between the oppressor and the oppressed; the Israelites seek revenge in private and by stealth (Exod. ii. 12). At last a higher power interferes, and the afflicted race is permitted to quit Egypt. At this time Egypt appears to have been a well-peopled and well-cultivated country, with numerous cities, under a despotic monarch, surrounded by officers of his court and a life-guard. There was a ceremonial at audience, a distinction of ranks, a state-prison, and a prime minister. Great buildings were carried on. There was set apart from the rest of the people an order of priests who probably filled offices in the civil government; the priest of Midian and the priest of On seem to have ruled over the cities so named. There was in the general class of priests an order—wise men, sorcerers, and magicians—who had charge of a certain secret knowledge: there were physicians or embalmers of the dead; the royal army contained chosen captains and horsemen and chariots. The attention which the people at large paid to agriculture, and the fixed notions of property which they in consequence had, made them hold the shepherd or nomad tribes in abhorrence, as freebooters only less dangerous than hunting tribes.

The ill feelings which the peculiar circumstances connected with the exodus from Egypt had occasioned served to keep the Israelites and the Egyptians strangers, if not enemies, one to another during the lapse of centuries, till the days of David and Solomon, when (1 Kings iii. vii. ix., xi.) friendly relations again sprang up between the two countries. Solomon marries the daughter of a Pharaoh, who burns the city of Gezer, and who in consequence must have been master of Lower Egypt. 'And Solomon had horses brought out of Egypt, and linen yarn: six hundred shekels of silver was the price of a chariot, and one hundred and fifty the price of a horse. Jeroboam, however, who 'had lifted up his hand against the king,' and become subsequently monarch of the revolted ten tribes, found refuge and protection in Egypt, which was then (about B.C. 975) governed by *Shishak*. From 2 Chron. xii. it appears that in the fifth year of Solomon's successor, Rehoboam, this same *Shishak* 'came against Jerusalem' with a very large army, consisting of chariots, horse and foot soldiers, besides auxiliary foreigners; and having captured the fortified cities which lay on his march, he entered and plundered the metropolis. The language which is employed in Joel (iii. 19) shows that, in the ninth century before Christ, Egypt had, in conjunction with Edom, displayed both its power and its cruelty towards the kingdom of Judah. The rise and oppressiveness of the Assyrian power soon, however, inclined the Egyptians and the Israelites, from a sense of common danger, to cultivate friendly relations with one another. In 2 Kings xvii. we find that in the twelfth year of Ahaz king of Judah (B.C. 730) Hoshea king of Israel desisted from paying his usual tribute to the king of Assyria, and courted the alliance of So, king of Egypt, who must have been a very powerful monarch to have been thought able to give assistance in opposition to Assyria. Against this mere human resource

the prophet Isaiah (xxx.) warmly protested, declaring its utter inefficiency, and striving to lead his countrymen to the practice of that righteousness and piety by neglecting which they had been forsaken of God. Upon this act of king Hoshea, however, the Assyrians overran Samaria and carried (2 Kings xvii. 4) Israel away into Assyria. In the reign of Hezekiah (a.c. 726) it appears (2 Kings xviii. 21) that the kingdom of Judah still 'trusted upon the staff of this bruised reed, even Egypt, on which if a man lean, it will go into his hand and pierce it: so is Pharaoh king of Egypt unto all that trust on him'. In the last year of the reign of Josiah (a.c. 609) Egypt seems to have attempted to increase its influence in Palestine, when Pharaoh Nechoh (2 Kings xxiii. 29) 'went up against the king of Assyria to the river Euphrates, and Josiah going against him was slain in battle. His successor, Jehoahaz, was dethroned after a brief reign of three months, and imprisoned at Kiblah by the Egyptian monarch, who imposed on the country a heavy tribute. Pharaoh-Nechoh then made his elder brother Eliakim king, having changed his name to Jehoiakim. Jehoahaz afterwards died in Egypt. But the Egyptian influence over Judah soon ended; for in the fourth year of Jehoiakim (a.c. 604) Nebuchadnezzar king of Babylon marched against (Jer. xli. 1; 2 Kings xxiv.) Judah and its allies, defeated Pharaoh-Nechoh, and retook from the Egyptians Arabia Petraea and all that belonged to them between the Euphrates and the Nile. Zedekiah, the next king of Judah, rebelling against Nebuchadnezzar, made an alliance with Pharaoh-Hophra (Jer. xli. 1); and when Nebuchadnezzar besieged Jerusalem, on the march of the Egyptian army, the Chaldees raised the siege (Jer. xxxvii. 5) and withdrew the army. But this was the last time that the Egyptian power was able to serve the Jews. The Assyrian party in the state, indeed, was in the minority, though assisted by the influence of Jeremiah and Ezekiel (Ezek. xxix; Jer. xxv.); yet it predominated: the Jews were carried captive to Babylon, and in less than a century afterwards Egypt was made a province of the same empire.

After the time of the exile the Egyptian Ptolemies were for a long while (from a.c. 301 to about 180) masters of Palestine, and during this period Egypt became as of old a place of refuge to the Jews, to whom many favours and privileges were conceded. This shelter seems not to have been for ages withdrawn (Matt. ii. 13). Yet it cannot be said that the Jews were held in esteem by the Egyptians. Indeed it was from an Egyptian, Mautetho (a.c. 300), that the most defamatory misrepresentations of Jewish history were given to the world; and, in the days of Augustus, Chæremion took special pains to make the Jewish people appear despicable.

In the reign of Ptolemy Philometor, Onias, whose father, the third high-priest of that name, had been murdered, fled into Egypt, and rose into high favour with the king and Cleopatra his queen. The high-priesthood of the temple of Jerusalem, which belonged of right to his family, having passed from it to the family of the Maccabees, by the nomination of Jonathan to this office (a.c. 153), Onias used his influence with the court to procure the establishment of a temple

and ritual in Egypt which should detach the Jews who lived there from their connection with the temple at Jerusalem. The king complied with the request. To reconcile the Egyptian Jews to a second temple, Onias alleged Isa. xix. 18, 19. He chose for the purpose a ruined temple of Bubastis, at Loutopolis, in the Heliopolitan nome, one hundred and fifty stadia from Memphis, which place he converted into a sort of miniature Jerusalem, erecting an altar in imitation of that in the temple, and constituting himself high-priest. The king granted a tract of land around the temple for the maintenance of the worship, and it remained in existence till destroyed by Vespasian. The district in which this temple stood appears to have been, after Alexandria, the chief seat of the Jews in Egypt.

The most brilliant periods of Egyptian art were the reigns of the second and third Rameses. Most of the obelisks and colossal statues were wrought before or during the reign of Rameses II, the Sesostris of the Greek writers. Under this enterprising monarch, the ancient Theban empire attained its highest pinnacle of prosperity and power. Rameses III. undertook distant military expeditions, roused the energies of the country, encouraged art, and erected the splendid temple of Medinet Abu. At a later age the sceptre of Egypt was swayed by powerful monarchs, who built on a grand scale; but the seat of the government was then in the Delta, and there remain only a few obelisks.

The valley of the Nile is all along at intervals strewed with wrecks of ancient monumental grandeur; at Thebes, however, they are found on both sides of the river in greatest profusion. Next to the pyramids, the most wonderful relic of Egyptian art is the great hall of the temple of Karnak, on the east bank of the Nile. Its superficial area is 314 feet by 164. The massive stone roof is supported by 134 columns ranged in sixteen rows, most of which are 9 feet in diameter, and nearly 43 feet high; those of the central avenue are not less than 11 feet 6 inches in diameter, and 72 feet high; the diameter of their capitals at their widest spread is 22 feet. The walls, columns, architraves, ceilings, every surface exposed to the eye, is overspread with intagliosculptures—gods, heroes, and hieroglyphics, painted in once vivid colours. But the hall of columns was but a part of this wonderful fabric. Immense pylons, half-buried quadrangles and halls, granite obelisks, and tremendous piles of fallen masonry, once formed a range of buildings upwards of 1200 feet in length. An avenue of colossal sphinxes led from the temple to Luxor, forming a vista which extended nearly a mile and a half, and was admirably adapted for the pageantry of religious processions. All these buildings formed parts of one magnificent whole; all were constructed of gigantic blocks, and most were covered with sculpture. 'Such was the imperial palace of the Pharaohs when Europe was yet in primitive barbarism, ages before Romulus took his omen on the Palatine hill.' Now the ruins are strewn in chaotic confusion over a sandy plain, broken into shapeless mounds.

Among the most remarkable works of the Egyptians must be ranked the vast sepulchres excavated in the seclusion of the Theban mountains to receive their dead monarchs. 'It was,

says Wathen, 'about an hour before sunset one evening that I set out to visit this Necropolis, intending to pass the night in one of the royal sepulchres. On approaching the gorge, the first thing that struck me was the quantity of bones, fragments of mummies, rolls of mummy cloth, and other relics of rifled (Egyptian) tombs that strewed the ground. Princes, priests, and warriors, after reposing thousands of years, are now dragged forth by poor peasants, and their bones lie scattered before the doors of their sepulchres. Candles were lighted: I passed the threshold, and looked round with silent wonder on the scene within. A large corridor or gallery ran back hundreds of feet into the heart of the mountain, divided by lateral projections into lengthening vistas of apartments. The walls were elegantly adorned with columns of blue hieroglyphics on a white ground, 3000 years old, yet retaining almost the freshness of yesterday. In a large chamber at the end of the gallery was a massive sarcophagus. Here once lay the royal mummy, but it had long been open, and was empty. There are eight or nine of these large painted tombs in a group, besides others of less interest. They vary in length from 100 to upwards of 400 feet. In most, you find on entering a long descending corridor or gallery, running off in a straight line into the heart of the mountain. At its farther end the corridor expands into one or more large apartments, whose roofs are supported by massive piers of the living rock. The walls and piers throughout are generally decorated with paintings still wonderfully retaining their freshness: the subjects are chiefly processions, religious rites, and allegoric and enigmatical devices.' The object seems to have been to enshrine the corpse deep within the earth in a mass of masonry, far from the stir of the living world. For these royal sepulchres of Thebes they first selected the loneliest ravine; for each tomb they carried a gallery deep into the hill, and then placed the corpse in the remotest part. But the tombs of the kings form only a part of this great city of the dead. The sides of the hills overlooking the plain and the ravines intersecting them, contain innumerable sepulchral excavations. One valley was appropriated to the queens, and in a remote corner the apes had a cemetery. The priests seized the best spots.

The purpose for which the pyramids were erected was once as little known as were most other things connected with Egypt. It now appears satisfactorily ascertained that they were designed to be mausoleums; and what an idea does it give us of the grandeur of conception, the splendour in every respect of the monarchs to whom they owe their origin, that they should have devised and executed tombs so stupendous! On leaving the village of Gizeh, on the river bank opposite old Cairo (Memphis), the pyramids rise before you glittering white against the blue sky; but the flatness of the plain and the purity of the atmosphere effectually deceive the eye as to their distance and consequently their size: you almost appear at their base while several miles really intervene. As you advance gradually they unfold their gigantic dimensions; but you must have been some time on the spot, your eye must have repeatedly travelled along the great pyramid's 740 feet of base, and up its steep towering

angles, before you can fully understand its immensity, and the actual amount of labour involved in its erection' (Wathen). According to Pliny

164. (Pyramid of Cheops.)

366,000 men were employed for 20 years in erecting the great pyramid, and Herodotus reports from an inscription which it bore, that the expense of providing the workmen with onions and other roots amounted to 1600 talents. Whole mosques have probably been built out of spoils from it alone. Yet the integrity of its form remains substantially unimpaired, and from a distance scarcely a trace of violence or decay can be seen. The existing masonry has been estimated at above six millions of tons, which was raised over an area of thirteen English acres and a half; and, supposing the cost of the structure to have been one shilling a cubic foot, including carriage, materials, and workmanship, the erection required an outlay of nearly five millions sterling. The original perpendicular height was 480 feet, exceeding that of St. Peter's by 43 feet, and that of St. Paul's by 110.

The relation in which the religion of Egypt stands to that of Moses is one of very considerable interest and importance, and one which has not yet received the kind and degree of attention which it merits. Michaelis, and others of the same school, have given valuable aid, but they wrote with, compared with what is now known, insufficient knowledge, if not with somewhat too much of a foregone conclusion. Other learned men, influenced by their philosophical notions, or prejudiced against the Hebrew religion, have made Moses a mere copyist of institutions and retailer of ideas which he found in Egypt. As a basis for such a view it was necessarily assumed that a purer system of religion was found in Egypt in the days of Moses than existed in any other part of the world. In particular, the Egyptian mysteries were set forth as the depositories of high and valuable religious doctrines. Scripture and history (the Acts of the Apostles; Josephus, Philo) were adduced to show that Moses had been instructed in this priceless lore, and initiated into these mysteries; whence he was declared to have drawn his system of Monotheism. These views, however, rest on no solid foundation whatever, if, indeed, they may not be to some extent considered as the illusory and almost posthumous offspring of the old and exploded notion which ascribed boundless knowledge to the ancient Egyptians. Nor can they for a moment be held

in these days after the light thrown on early Egypt by the monumental disclosures. The brief notion given above of the general characteristics of the earliest religion of the country, shows how utterly baseless such a theory is. In truth, the inhabitants of Palestine, so far back as we have been able to learn anything of them, seem to have possessed far better and purer religious opinions than those of the valley of the Nile, and in all probability did something to improve and elevate the religious system of the latter.

EHUD, of the tribe of Benjamin, one of the 'Judges' of Israel, or rather of that part of Israel which he delivered from the dominion of the Moabites by the assassination of their king Eglon. These were the tribes beyond the Jordan, and the southern tribes on this side the river. Ehud obtained access to Eglon as the bearer of tribute from the subjugated tribes, and being left-handed, or rather ambidextrous, he was enabled to use with a sure and fatal aim a dagger concealed under a part of his dress, where it was unsuspected, because it would there have been useless to a person employing his right hand. The Israelites continued to enjoy for eighty years the independence obtained through this deed of Ehud (Judg. iii. 15-50).

EKLON, the chief of the five Philistine states (Josh. xiii. 3), and the northernmost of the five. In the general distribution of territory (unconquered as well as conquered) Ekron was assigned to Judah, as being upon its border (Josh. xiii. 3; xv. 11, 45); but was afterwards apparently given to Dan, although conquered by Judah (Josh. xv. 11, 45; xiii. 43; Judg. i. 18). In Scripture Ekron is chiefly remarkable from the ark having been sent home from thence, upon a new cart drawn by two milch kine (1 Sam. v. 10; vi. 1-8). In later days it is named with the other cities of the Philistines in the denunciations of the prophets against that people (Jer. xxv. 20; Amos i. 8; Zeph. ii. 4; Zech. ix. 5). The name of Ekron, or rather Accaron, occurs incidentally in the histories of the Crusades; and it has lately been recognised by Dr. Robinson in that of Akri, in a situation corresponding to all we know of Ekron. Akri is a small Moslem village, five miles south of Ramleh. It is built of unburnt bricks, and, as there are no apparent ruins, the ancient town was probably of the same materials. It is alleged, however, that cisterns and the stones of hand-mills are often found at Akri and in the adjacent fields.

ELAHI, son of Baasha king of Israel. After a reign of two years (B.C. 930-929) he was assassinated while drunk, and all his kinsfolk and friends cut off, by Zimri, 'the captain of half his chariots.' He was the last king of Baasha's line, and by this catastrophe the predictions of the prophet Jehu were accomplished (1 Kings xvi. 6-14).

ELAH, a valley in which the Israelites were encamped when David fought Goliath (1 Sam. xvii. 19). It doubtless received this name from the terebinth trees, or from some remarkable terebinth tree, growing in it. Ecclesiastical traditions identify it with the present valley of Beit Hanina, about eight miles north-west from Jerusalem. In this valley olive trees and carob trees now prevail, and terebinth trees are few; but the brook is still indicated whence the youthful champion selected the 'smooth stones' where-

with he smote the Philistine. The brook is dry in summer, but in winter it becomes a mighty torrent, which inundates the vale. Dr. Robinson, however, disputes this ancient tradition, and finds that the conditions of the history require him to identify the valley of Elah with the Wady es-Suunt (acacia valley), which he crossed on the road from Jerusalem to Gaza, about eleven miles south-west from the former city. His reasons are given in *Biblical Researches*, iii. 350; and he remarks that the largest specimen of the terebinth tree which he saw in Palestine still stands in the vicinity.

ELAM, which is mentioned in Gen. x. 22, as a tribe descended from Shem, is, in ch. xiv. 1, introduced along with the kingdom of Shinar in Babylon, and in Isa. xxi. 2, and Jer. xxv. 25, is connected with Media. In Ezra iv. 9, the Elamites are described among the nations of the Persian empire; and in Dan. vii. 2, Susa is said to lie on the river Ulai (Eulatus or Choaspes) in the province of Elam. These accounts lead to the conclusion that Elam was the same land which was designated by the Greeks and Romans by the name of Elymais, and which formed a part of the ancient Susiana, the modern Khuzistan. Elam was inhabited by various tribes of people. The Elymaei or Elamæi, together with the Kissi, seem to have been the oldest inhabitants not only of Susiana Proper but also of Persia; whence the sacred writers, under the name of Elam, comprehended the country of the Persians in general. They were celebrated for their skill in archery; hence the historical propriety of the Scriptural allusion to the quiver and the bow of the Elamites (Isa. xxii. 6; Jer. xlix. 34).

It would seem that Elam was very early a separate state with its own kings: for in the time of Abraham we find that Chedorlaomer king of Elam extended his conquests west of the Euphrates as far as the Jordan and the Dead Sea (Gen. xiv.); but whether he acted for himself, or only as the viceroy or general of the Assyrians, must remain a matter of doubt. Ezekiel (xxxii. 24) mentions Elam among the mighty uncircumcised nations which had been the terror of the world; and about the same period (B.C. 590) Jeremiah threatened it with conquest and destruction by the Chaldeans (Jer. xlix. 30, 34, sqq.). This was accomplished probably by Nebuchadnezzar, who subjected Western Asia to his dominion; for we find his successor Belshazzar residing at Susa, the capital of Elam, a province then subject to that monarch (Dan. vii. 1, 2). With this the Scriptural notices of Elam end, unless we add that Elamites are found among those who were at Jerusalem at the feast of Pentecost (Acts ii. 9); which implies that Jews descended from the exiles were settled in that country.

ELATH, now called AILAH. It was a city of Idumæa, having a port on the eastern arm or gulf of the Red Sea, which thence received the name of Sinus Elaniticus (Gulf of Akaba). According to Eusebius, it was ten miles east from Petra. It lies at the extremity of the valley of Elghor, which runs at the bottom of two parallel ranges of hills, north and south, through Arabia Petraea, from the Dead Sea to the northern parts of the Elanitic Gulf.

The first time that it is mentioned in the Scriptures is in Deut. ii. 8, where, in speaking of the journey of the Israelites towards the Promised Land, these words occur:—'When we passed by from our brethren the children of Esau, which dwelt in Seir, through the way of the plain from Elath, and from Eziongaber.' These two places are mentioned together again in 1 Kings ix. 26, in such a manner as to show that Elath was more ancient than Eziongaber, and was of so much repute as to be used for indicating the locality of other places: the passage also fixes the spot where Elath itself was to be found: 'and King Solomon made a navy of ships in Eziongaber, which is beside Elath, on the shore (Num. xxxiii. 35) of the Red Sea, in the land of Edom.' The use which David made of the vicinity of Elath shows that the country was at that time in his possession. Accordingly, in 2 Sam. viii. 14, we learn that he had previously made himself master of Idumæa, and garrisoned its strong-holds with his own troops. Under his successor, Joram (2 Kings viii. 20), the Idumæans revolted from Judah, and elected a king over themselves. Joram thereupon assembled his forces, 'and all the chariots with him,' and, falling on the Idumæans by night, succeeded in defeating and scattering their army. The Hebrews, however, could not prevail, but 'Edom revolted from under the hand of Judah unto this day,' thus exemplifying the striking language employed (Gen. xxvii. 40) by Isaac—'by thy sword shalt thou live, and shalt serve thy brother: and it shall come to pass, when thou shalt have the dominion, that thou shalt break his yoke from off thy neck.' From 2 Kings xiv. 22, however, it appears that Uzziah recovered Elath, and, having so repaired and adorned the city as to be said to have built, that is rebuilt, it, he made it a part of his dominions. This connection was not of long continuance; for in ch. xvi. ver. 6 of the same book, we find the Syrian king Rezin interposing, who captured Elath, drove out the Jews, and annexed the place to his Syrian kingdom, and 'the Syrians came to Elath, and dwelt there unto this day.' At a later period it fell under the power of the Romans, and was for a time guarded by the tenth legion, forming part of Palæstina Tertia. It subsequently became the residence of a Christian bishop. In the days of its prosperity it was much distinguished for commerce, which continued to flourish under the auspices of Christianity. In the sixth century it is spoken of by Procopius as being inhabited by Jews subject to the Roman dominion. In A.D. 630, the Christian communities of Arabia Petra found it expedient to submit to Mohammed, when John, the Christian governor of Ailah, became bound to pay an annual tribute of 300 gold-pieces. Henceforward, till the present century, Ailah lay in the darkness of Islamism. Mounds of rubbish alone mark the site of the town, while a fortress, occupied by a governor and a small garrison under the Pasha of Egypt, serves to keep the neighbouring tribes of the desert in awe, and to minister to the wants and protection of the annual Egyptian Haj, or pilgrim caravan. This place has always been an important station upon the route of the Egyptian Haj. Such is the importance of this caravan of pilgrims from Cairo to Mecca, both

in a religious and political point of view, that the rulers of Egypt from the earliest period have given it convoy and protection. For this purpose a line of fortresses similar to that of Akaba has been established at intervals along the route, with wells of water and supplies of provisions.

EL'DAD and ME'DAD, two of the seventy elders appointed by Moses to assist him in the government of the people. Although not present with the others at the door of the tabernacle, they were equally filled with the divine spirit, and began to 'prophesy' in the camp. Joshua, thinking this irregular, requested Moses to forbid them, and received an answer eminently characteristic of the great lawgiver:—'Enviest thou for my sake? Would to God that all the Lord's people were prophets, and that the Lord would put his spirit upon them' (Num. xi. 24-29).

ELDER, literally, one of the older men, and because, in ancient times, older persons would naturally be selected to hold public offices, out of regard to their presumed superiority in knowledge and experience, the term came to be used as the designation for the office itself, borne by an individual, of whatever age. But the term 'elder' appears to be also expressive of respect and reverence in general. The word occurs in this sense in Gen. i. 7, 'Joseph went up to bury his father, and with him went up all the servants of Pharaoh, the elders of his house, and all the elders of the land of Egypt.' These elders of Egypt were, probably, the various state-officers. The elders of Israel, of whom such frequent mention is made, may have been, in early times, the lineal descendants of the patriarchs (Exod. xii. 21). To the elders Moses was directed to open his commission (Exod. iii. 16). They accompanied Moses in his first interview with Pharaoh, as the representatives of the Hebrew nation (ver. 18); through them Moses issued his communications and commands to the whole people (Exod. xix. 7; Deut. xxxi. 9); they were his immediate attendants in all the great transactions in the wilderness (Exod. xvii. 5); seventy of their number were selected to attend Moses, Aaron, Nadab, and Abihu, at the giving of the law (Exod. xxiv. 1), on which occasion they are called the *nobles* of the children of Israel, who did eat and drink before God, in ratification of the covenant, as representatives of the nation. In Num. xi. 16, 17, we meet with the appointment of seventy elders to bear the burden of the people along with Moses; these were selected by Moses out of the whole number of the elders, and are described as being, already, officers over the children of Israel. It is the opinion of Michaelis, that this council, chosen to assist Moses, should not be confounded with the Sanhedrim, which, he thinks, was not instituted till after the return from the Babylonish captivity [SANHEDRIM]. After the settlement in Canaan the elders seem to have been the administrators of the laws in all the cities (Deut. xii. 12; xxi. 3, 6, 19; xxii. 15, 25). The continuance of the office may be traced during the time of the judges (Judg. ii. 7); during that of Samuel (1 Sam. xvi. 4); under Saul (1 Sam. xxx. 26); and David (1 Chron. xxi. 16). The elders of Israel are mentioned during the captivity (Ezra x. 14), consisting either of those who had sustained that office in their own land, or were permitted by the Baby-

Ionians to exercise it still among their countrymen. We meet with them again at the restoration (Ezra v. 5), and by them the temple was rebuilt (vi. 14). After the restoration and during the time of the Maccabees, the Sanhedrim, according to Michaelis, was instituted, being first mentioned under Hyrcanus II.; but elders are still referred to in 1 Macc. vii. 33. Among the members of the Sanhedrim were the 'elders.' Like the scribes, they obtained their seat in the Sanhedrim by election, or nomination from the executive authority. The word elder, with many other Jewish terms, was introduced into the Christian church. In the latter it is the title of inferior ministers, who were appointed overseers *among not over the flock* (Acts xx. 17, 28; Tit. i. 5, 7; 1 Pet. v. 1-5). The term is applied even to the apostles (2 John; 3 John). So also 'the Presbytery' certainly includes even St. Paul himself (comp. 1 Tim. iv. 14 and 2 Tim. i. 6). Still the apostles are distinguished from the elders elsewhere (Acts xv. 6). The elder was constituted by an apostle or some one invested with apostolic authority (Acts xiv. 23; see also the epistles to Timothy and John). The elders preached, confuted gainsayers (Tit. i. 9), and visited the sick (James v. 14). The word elders is sometimes used in the sense of ancestors, predecessors (Matt. v. 21; Heb. xi. 2).

ELEA'LEH, a town of the Reubenites east of the Jordan (Num. xxxii. 3, 37); but which is named by the prophets as a city of the Moabites (Isa. xv. 4; xvi. 9; Jer. xlviii. 34). It is usually mentioned along with Heshbon; and accordingly travellers find in the neighbourhood of that city a ruined place, bearing the name of El Aal, which doubtless represents Elealeh. It stands upon the summit of a hill, and takes its name from its situation, Aal meaning 'high.' It commands the whole plain, and the view from it is very extensive. It is about a mile and a quarter north-east of Heshbon.

ELEA'ZAR (*God-helped*). This was an exceedingly common name among the Hebrews, being borne by a considerable number of persons in Scripture (as well as in the Apocrypha and Josephus), of whom the principal are the following.

1. ELEAZAR, eldest son of Aaron (Exod. vi. 23, 25), who acted in his father's lifetime as chief of the tribe of Levi (Num. iii. 32), and at his death succeeded him in the high-priesthood (Num. xx. 35, sq.). His pontificate was contemporary with the military government of Joshua, whom he appears to have survived. A perfectly good understanding seems at all times to have subsisted between Eleazar and Joshua, as we constantly trace that co-operation and mutual support which the circumstances of the time and of the nation rendered so necessary. Eleazar is supposed to have lived twenty-five years after the passage of the Jordan, and the book of Joshua concludes with a notice of his death and burial.

2. ELEAZAR, who was set apart to attend upon the ark while it remained under the roof of his father Abinadab (1 Sam. vii. 1).

3. ELEAZAR, one of the three most eminent of David's heroes, who 'fought till his hand was weary' in maintaining with David and the other two a daring stand against the Philistines after

'the men of Israel had gone away.' He was also one of the same three when they broke through the Philistine host, to gratify David's longing for a drink of water from the well of his native Bethlehem (2 Sam. xxiii. 9, 10, 13).

4. ELEAZAR, the fourth of the Maccabean brothers, sons of the priest Mattathias (1 Macc. ii. 5). He was crushed to death by the fall of an elephant which he stabbed under the belly in the belief that it bore the king, Antiochus Eupator (1 Macc. vi. 43-46).

5. ELEAZAR, an aged and venerable scribe who, 'as became his age, and the excellency of his ancient years, and the honour of his grey head,' chose rather to submit to the most cruel torments than conform to the polluting enactments of Antiochus Epiphanes (2 Macc. vii. 18-31).

ELEPHANT occurs only in 1 Macc. vi. 34. The animals of this genus consist at present of two very distinct species, one a native of Southern

165. (Asiatic Elephant.)

Asia, once spread considerably to the westward of the Upper Indus, and the other occupying southern and middle Africa to the edge of the great Sahara. In a fossil state there are besides six more species clearly distinguished. The elephant is the largest of all terrestrial animals, sometimes reaching to above eleven feet of vertical height at the shoulders, and weighing from five to seven thousand pounds: he is of a black or slaty-ash colour, and almost destitute of hair. The head, which is proportionably large, is provided with two broad pendulous ears, particularly in those of the African species, which are occasionally six feet in length. The eyes are comparatively small, with a malevolent expression, and on the temples are pores which exude a viscid humour; the tail is long, hanging nearly to the heels, and ditichous at the end. But the most remarkable organ of the elephant, that which equally enables the animal to reach the ground and to grasp branches of trees at a considerable height, is the proboscis or trunk; a cylindrical elastic instrument, in ordinary condition reaching nearly down to the ground, but contractile to two-thirds of its usual length, and extensible to one-third beyond it; provided with nearly 4000 muscles crossing each other in such a manner that the proboscis is flexible in every

direction, and so abundantly supplied with nerves as to render the organ one of the most delicate in nature. Within is the double canal of the nostrils, and at the terminal opening a finger-like process, with which the animal can take up very minute objects and grasp others, even to a writing pen, and mark paper with it. By means of the proboscis the elephant has a power of suction capable of raising nearly 200 pounds weight; and with this instrument he gathers food from trees and from the earth, draws up drink to squirt it down his throat, draws corks, unties small knots, and performs numberless other minute operations; and, if necessary, tears down branches of trees more than five inches in diameter with no less dexterity than strength. The gait of an elephant is an enormous stride, performed with his high and ponderous legs, and sufficiently rapid to require smart galloping on horseback to outstrip him.

Elephants are peaceable towards all inoffensive animals; sociable among themselves, and ready to help each other; gregarious in grassy plains, but more inclined to frequent densely-wooded mountain glens; at times not unwilling to visit the more arid wastes, but fond of rivers and pools, where they wallow in mud and water among reeds and under the shade of trees.

The Asiatic species, carrying the head higher, has more dignity of appearance, and is believed to have more sagacity, and courage than the African; which, however, is not inferior in weight or bulk, and has never been in the hands of such experienced managers as the Indian mountaineers, who have acquired such deep knowledge of the character of these beasts that they make them submit to almost incredible operations; such, for example, as suffering patiently the extraction of a decayed part of a tooth, a kind of chisel and mallet being the instruments used for the purpose. Elephants walk under water as long as the end of the proboscis can remain above the surface; but when in greater depth, they float with the head and back only about a foot beneath it. They are steady, assiduous workmen in many laborious tasks, often using discretion when they require some dexterity and attention in the performance. Good will is all man can trust to in directing them, for correction cannot be enforced beyond their patience; but flattery, good treatment, kind words, promises, and rewards, even to the wear of finery, have the desired effect. In history they appear most conspicuous as formidable elements of battle. From the remotest ages they were trained for war by the nations of India, and by their aid they no doubt acquired and long held possession of several regions of High Asia westward of the Indus.

ELEUTHEROPOLIS, a place not named in Scripture, but which was an episcopal city of such importance in the time of Eusebius and Jerome, that they assumed it as the point whence to estimate the distances and positions of other cities in Southern Palestine. It continued to be a great city until the sixth century; but after that all traces of it were lost. In recent times, however, Professor Robinson has identified it with Beit-Jibrin, a village of moderate size, the capital of a district in the province of Gaza. In and around this village are ruins of different ages,

more extensive and massy than any which had been seen in Palestine, excepting the substructions of the ancient temple at Jerusalem and the Haram at Hebron. These ruins consist principally of the remains of a fortress of immense strength, in the midst of an irregular rounded enclosure, encompassed by a very ancient and strong wall. This outer wall is built of large squared stones, uncemented. Along this wall on the inside, towards the west and north-west, is a row of ancient massive vaults with fine round arches, apparently of the same age as the wall itself, and both undoubtedly of Roman origin. In the midst of the area stands an irregular castle, the lower parts of which seem to be as ancient as the exterior wall, but it has obviously been built up again in modern times. An inscription over the gate shows that it was last repaired by the Turks A.H. 938 (A.D. 1551), nearly two years after the present walls of Jerusalem were built. Remains of ancient walls and dwellings extend up the valley; and at the distance of twenty minutes from the present village are the ruins of an ancient church, bearing the name of Sant. Ilanueh (St. Anne). Only the eastern end is now standing, including the niche of the great altar and that of a side chapel, built of large hewn stones of strong and beautiful masonry. Beit-Jibrin is twenty miles east of Askelon, and thirteen miles east-north-east from Hebron.

ELI (*the highest*), high-priest of the Jews when the ark was in Shiloh (1 Sam. i. 3, 9). He was the first high-priest of the line of Ithamar, Aaron's youngest son. This is deduced from 1 Chron. xxiv. 3, 6. It also appears from the omission of the names of Eli and his immediate successors in the enumeration of the high-priest of Eleazar's line in 1 Chron. vi. 4-6. What occasioned this remarkable transfer is not known.—most probably the incapacity or minority of the then sole representative of the elder line; for it is very evident that it was no unauthorized usurpation on the part of Eli (1 Sam. ii. 27, 28). Eli also acted as regent or civil judge of Israel after the death of Samson. This function, indeed, seems to have been intended, by the theocratic constitution, to devolve upon the high priest, by virtue of his office, in the absence of any person specially appointed by the Divine King, to deliver and govern Israel. He is said to have judged Israel forty years (1 Sam. iv. 18). As Eli died at the age of ninety-eight (1 Sam. iv. 15), the forty years must have commenced when he was fifty-eight years old.

Eli seems to have been a religious man; and the only fault recorded of him was an excessive easiness of temper, most unbefitting the high responsibilities of his official character. His sons Hophni and Phinehas, whom he invested with authority, misconducted themselves so outrageously as to excite deep disgust among the people, and render the services of the tabernacle odious in their eyes. Of this misconduct Eli was aware, but contented himself with mild and ineffectual remonstrances, where his station required severe and vigorous action. For this neglect the judgment of God was at length denounced upon his house, through the young Samuel, who, under peculiar circumstances [SAMUEL], had been attached from childhood to his person (1 Sam. ii. 29; iii. 18). Some years passed without any

apparent fulfilment of this denunciation—but it came at length in one terrible crash, by which the old man's heart was broken. The Philistines had gained the upper hand over Israel, and the ark of God was taken to the field, in the confidence of victory and safety from its presence. But in the battle which followed, the ark itself was taken by the Philistines, and the two sons of Eli, who were in attendance upon it, were slain. The high-priest, then blind with age, sat by the way-side at Shiloh, awaiting tidings from the war, 'for his heart trembled for the ark of God.' A man of Benjamin, with his clothes rent, and with earth upon his head, brought the fatal news: and Eli heard that Israel was defeated—that his sons were slain—that the ark of God was taken—at which last word he fell heavily from his seat, and died (1 Sam. iv).

The ultimate doom upon Eli's house was accomplished when Solomon removed Abiathar (the last high-priest of this line) from his office, and restored the line of Eleazar in the person of Zadok [ADATHAR].

ELI'AKIM. [JEHOIAKIM.]

ELI'AS. [ELIJAH.]

ELIEZER. This is the same name as Eleazar—whence came the abbreviated Lazar or Lazarus of the New Testament. Mention is made (Gen. xv. 2, 3) of Eliezer, whom before the birth of Ishmael and Isaac Abraham regarded as his heir. Abraham, being promised a son, says:—'I go childless, and the steward of my house is this Eliezer of Damascus. . . . Behold, to me thou hast given no seed: and, lo, one born in mine house is mine heir' (Gen. xv. 2, 3). The common notion is that Eliezer was Abraham's house-born slave, adopted as his heir, and meanwhile his chief and confidential servant, and the same who was afterwards sent into Mesopotamia to seek a wife for Isaac. This last point we may dismiss with the remark, that there is not the least evidence that 'the elder servant of his house' (Gen. xxiv. 2), whom Abraham charged with this mission, was the same as Eliezer: and our attention may therefore be confined to the verses which have been quoted.

It is obvious that the third verse is not properly a sequel to the second, but a repetition of the statement contained in the second; and, being thus regarded as parallel passages, the two may be used to explain each other.

'Eliezer of Damascus,' or 'Damascene-Eliezer,' is the subject of both verses. The obvious meaning is, that Eliezer was born in Damascus: and how is this compatible with the notion of his being Abraham's house-born slave, seeing that Abraham's household never was at Damascus?

The expression, 'the steward of mine house,' in ver. 2, will explain the sense of 'one born in mine house is mine heir,' in ver. 3. The first phrase, literally translated, is 'the son of possession of my house,' i. e. one who shall possess my house, my property, after my death; and is therefore exactly the same as the phrase in the next verse, 'the son of my house' (paraphrased by 'one born in mine house') is mine heir.' This removes the whole difficulty; for it is no longer necessary to suppose that Eliezer was a house-born slave, or a servant at all; and leaves it more probable that he was some near relative whom Abraham regarded as his heir-at-law. In this

case Abraham obviously means to say, 'Behold, to me thou hast given no children, and not the son of my loins, but the son of my house (i. e. of my family)—the son whom my house gives me—the heir-at-law) is mine heir.' It is by no means certain that 'this Eliezer' was present in Abraham's camp at all: and we, of course, cannot know in what degree he stood related to Abraham, or under what circumstances he was born at, or belonged to Damascus. It is possible that he lived there at the very time when Abraham thus spoke of him, and that he is hence called 'Eliezer of Damascus.'

2. ELIEZER. The second of the two sons born to Moses while an exile in the land of Midian (Exod. xviii. 4). Eliezer had a son called Rehabiah (1 Chron. viii. 17).

ELIHU (*Jehovah is God*). One of Job's friends, described as 'the son of Barachel, a Buzite, of the kindred of Ram' (Job xxxii. 2). This is usually understood to imply that he was descended from Buz, the son of Abraham's brother Nabor, from whose family the city called Buz (Jer. xxv. 23) also took its name. Elihu's name does not appear among those of the friends who came in the first instance to console with Job, nor is his presence indicated till the debate between the afflicted man and his three friends had been brought to a conclusion. Then, finding there was no answer to Job's last speech, he comes forward with considerable modesty, which he loses as he proceeds, to remark on the debate, and to deliver his own opinion on the points at issue. The character and scope of his orations are described elsewhere [JOB, BOOK OF]. It appears, from the manner in which Elihu introduces himself, that he was by much the youngest of the party; and it is evident that he had been present from the commencement of the discussion, to which he had paid very close attention. This would suggest that the debate between Job and his friends was carried on in the presence of a deeply-interested auditory, among which was this Elihu, who could not forbear from interfering when the controversy appeared to have reached an unsatisfactory conclusion.

ELIJAH (*Jehovah is God*). This wonderful prophet is introduced to our notice like another Melchizedek (Gen. xiv. 18; Heb. vii. 3), without any mention of his father or mother, or of the beginning of his days. From this silence of Scripture as to his parentage and birth, much vain speculation has arisen. Some suppose that Elijah is called a Tishbite from Tishbe, a city beyond the Jordan. The very first sentence that the prophet utters is a direful denunciation against Ahab; and this he supports by a solemn oath: 'As the Lord God of Israel liveth, before whom I stand, there shall not be dew or rain these years (i. e. three and a half years, Luke iv. 25; James v. 17), but according to my word' (1 Kings xvii. 1). Before, however, he spoke thus, it would seem that he had been warning this most wicked king as to the fatal consequences which must result both to himself and his people, from the iniquitous course he was then pursuing: and this may account for the apparent abruptness with which he opens his commission.

We can imagine Ahab and Jezebel being greatly incensed against Elijah for having foretold and prayed that such calamities might befall them.

For some time they might attribute the drought under which the nation suffered to natural causes, and not to the interposition of the prophet. When, however, they saw the denunciation of Elijah taking effect far more extensively than had been anticipated, they would naturally seek to wreak their vengeance upon him as the cause of their sufferings. But we do not find him taking one step for his own preservation, till the God whom he served said, 'Get thee hence, and turn thee eastward, and hide thyself by the brook Cherith, that is before Jordan: and it shall be that thou shalt drink of the brook; and I have commanded the ravens to feed thee there' (1 Kings xvii. 3, 4). Other and better means of protection from the impending danger might seem open to him; but, regardless of these, he hastened to obey the divine mandate, and 'went and dwelt by the brook Cherith that is before Jordan' (1 Kings xvii. 5).

A fresh trial now awaits this servant of God (n.c. 909), and in the manner in which he bears it, we see the strength of his faith. For one year, as some suppose, God had miraculously provided for his bodily wants at Cherith; but the brook which, heretofore, had afforded him the needful refreshment there, became dried up. Encouraged by past experience of his heavenly Father's care of him, the prophet still waited patiently till He said, 'Arise (1 Kings xvii. 9), get thee to Zarephath, which belongeth to Zidon, and dwell there: behold, I have commanded a widow woman there to sustain thee.' He then, at once, set out on the journey, and now arrived at Zarephath, he, in the arrangement of God's providence, met, as he entered its gate, the very woman who was deputed to give him immediate support. But his faith is again put to a sore test, for he found her engaged in a way which was well calculated to discourage all his hopes; she was gathering sticks for the purpose, as she assured him, of cooking her last meal, and now that the famine prevailed there, as it did in Israel, she saw nothing before her and her only son but starvation and death. How then could the prophet ask for, and how could she think of giving, a part of her last morsel? The same Divine Spirit inspired him to assure her that she and her child should be even miraculously provided for during the continuance of the famine: and also influenced her heart to receive, without doubting, the assurance! The kindness of this widow in baking the first cake for Elijah was well requited with a prophet's reward (Matt. x. 41, 42); she afforded one meal to him, and God afforded many to her (see 1 Kings xv. 16). While residing here God accordingly saw fit to visit the family with a temporary calamity. 'And it came to pass that the son of the woman, the mistress of the house, fell sick; and his sickness was so sore that there was no life left in him' (1 Kings xvii. 17). Verse 18 contains the expostulation with the prophet of this bereaved widow; she rashly imputes the death to his presence. Elijah retaliates not, but calmly takes the dead child out of the mother's bosom, and lays it on his own bed (verse 19), that there he may, in private, pray the more fervently for its restoration. His prayer was heard, and answered by the restoration of life to the child, and of gladness to the widow's heart.

— Since now, however, the long-protracted

famine, with all its attendant horrors, failed to detach Ahab and his guilty people from their abominable idolatries, God mercifully gave them another opportunity of repenting and turning to Himself. For three years and six months (James v. 17) the destructive famine had spread its deadly influence over the whole nation of Israel. The prophet was then called by the word of the Lord to return to Israel. Wishing not to tempt God by going unnecessarily into danger, he first presented himself to good Obadiah (1 Kings xviii. 7). This principal servant of Ahab was also a true servant of God; and on recognising the prophet he treated him with honour and respect. Elijah requested him to announce to Ahab that he had returned, Obadiah, apparently stung by the unkindness of this request, replied, 'What have I sinned, that thou shouldst thus expose me to Ahab's rage, who will certainly slay me for not apprehending thee, for whom he has so long and so anxiously sought in all lands and in confederate countries, that they should not harbour a traitor whom he looks upon as the author of the famine?' &c. Moreover, he would delicately intimate to Elijah how he had actually jeopardised his own life in securing that of one hundred of the Lord's prophets, and whom he had fed at his own expense. Satisfied with Elijah's reply to this touching appeal, wherein he removed all his fears about the Spirit's carrying himself away (as 2 Kings ii. 11-16; Esek. viii. 3; Acts viii. 39), he resolves to be the prophet's messenger to Ahab. Intending to be revenged on him, or to inquire when rain might be expected, Ahab now came forth to meet Elijah. He at once charged him with being the main cause of all the calamities which he and the nation had suffered. But Elijah flung back the charge upon himself, assigning the real cause to be his own sin of idolatry. Regarding, however, his magisterial position, while he reproved his sin, he requests him to exercise his authority in summoning an assembly to Mount Carmel, that the controversy between them might be decided, whether the king or the prophet was the troubler of Israel. Whatever were the secret motives which induced Ahab to comply with this proposal, God directed the result. Elijah offered to decide this controversy between God and Baal by a miracle from Heaven. As fire was the element over which Baal was supposed to preside, the prophet proposes (wishing to give them every advantage) that, two bullocks being slain, and laid each upon a distinct altar, the one for Baal, the other for Jehovah, whichever should be consumed by fire must proclaim whose the people of Israel were, and whom it was their duty to serve. The people consent to this proposal. Elijah will have summoned not only all the elders of Israel, but also the four hundred priests of Baal belonging to Jezebel's court, and the four hundred and fifty who were dispersed over the kingdom. Confident of success, because doubtless God had revealed the whole matter to him, he enters the lists of contest with the four hundred and fifty priests of Baal. Having reconstructed an altar which had once belonged to God, with twelve stones—as if to declare that the twelve tribes of Israel should again be united in the service of Jehovah—and having laid thereon his bullock, and filled the trench by which it was

surrounded with large quantities of water, lest any suspicion of deceit might occur to any mind, the prophet gives place to the Baalites—allows them to make trial first. In vain did these deceived and deceiving men call, from morning till evening, upon Baal—in vain did they now mingle their own blood with that of the sacrifice: no answer was given—no fire descended.

Elijah having rebuked their folly and wickedness with the sharpest irony, and it being at last evident to all that their efforts to obtain the wished-for fire were vain, now, at the time of the evening sacrifice, offered up his prayer. The prayer of the Baalites was long, that of the prophet was short—charging God with the care of His covenant, of His truth, and of His glory—when, behold, 'the fire came down, licked up the water, and consumed not only the bullock, but the very stones of the altar also.' The effect of this on the mind of the people was what the prophet desired: acknowledging the awful presence of the God-head, they exclaim, as with one voice, 'Jehovah He is the God! Jehovah He is the God!' Seizing the opportunity whilst the people's hearts were warm with the fresh conviction of this miracle, he bade them take those juggling priests and destroy them; and this he might lawfully do at God's direction, and under the sanction of His law (Deut. xiii. 5: xviii. 20). Ahab having now publicly vindicated God's violated law by giving his royal sanction to the execution of Baal's priests, Elijah informed him that he may go up to his tent on Carmel to take refreshment, for God will send the desired rain. In the meantime he prayed earnestly (James v. 17, 18) for this blessing: God heard and answered: a little cloud arose out of the Mediterranean sea, in sight of which the prophet now was, diffused itself gradually over the entire face of the heavens, and then emptied its refreshing waters upon the whole land of Israel. Here was another proof of the Divine mission of the prophet, from which, we should imagine, the whole nation must have profited; but subsequent events would seem to prove that the impression produced by these dealings of God was of a very partial and temporary character. Impressed with the hope that the report of God's miraculous actings at Carmel might not only reach the ear, but also penetrate and soften the hard heart of Jezebel; and anxious that the reformation of his country should spread in and about Jezreel also, Elijah, strengthened, as we are told, from on high, now accompanies Ahab thither on foot. How ill-founded the prophet's expectation was, subsequent events too painfully proved. Jezebel, instead of receiving Elijah obviously as the messenger of God for good to her nation, now secretly conceived and openly declared her fixed purpose to put him to death. Dreading the vile woman's design, and probably thinking that there was no hope of producing any reformation among the people, he fled into the wilderness, and there longed for death. But God is still gracious to him, and at once touches his heart and corrects his petulance by the ministration of His angel, and by an awful exhibition of His Divine power. And having done this, revealing Himself in the gentle accents of a still voice, He announces to him that he must go and anoint Hazael king over Syria, Jehu king over Israel, and Elisha prophet in his own place, ere death can put a period to

his labours. When God had comforted His prophet by telling him of these three instruments he had in store to vindicate his own insulted honour, then he convinced him of his mistake in saying 'I only am left alone,' &c., by the assurance that there were seven thousand in Israel who had not bowed the knee to Baal.

Leaving the cave of Horeb (n.c. 906), Elijah now proceeded to the field where he found Elisha in the act of ploughing, and he cast his prophet's mantle over him, as a symbol of his being clothed with God's spirit. The Divine impression produced upon the mind of Elisha by this act of Elijah made him willing to leave all things and follow him.

For about six years from this calling of Elisha we find no notice in the sacred history of Elijah, till God sent him once again to pronounce sore judgments upon Ahab and Jezebel for the murder of unoffending Naboth (1 Kings xxi. 17, &c.). How he and his associate in the prophetic office employed themselves during this time we are not told. We need not dwell upon the complicated character of Ahab's wickedness (1 Kings xxi.), in winking at the murderous means whereby Jezebel procured for him the inalienable property of Naboth [AHAB; NABOTH]. When he seemed to be triumphing in the possession of his ill-obtained gain, Elijah stood before him, and threatened him, in the name of the Lord (2 Kings ix. 21-26 inclusive), that God would retaliate blood for blood, and that not on himself only—'his seventy sons shall die, and (2 Kings x. 6) Jezebel shall become meat for dogs.' Fearing that these predictions would prove true, as those about the rain and fire had done, Ahab now assumed the manner of a penitent; and, though subsequent acts proved that his repentance was not permanent, yet God rewards his temporary abasement by a temporary arrest of judgment. We see, however, in after parts of this sacred history, how the judgments denounced against him, his abandoned consort, and children, took effect to the very letter.

Elijah again retired from the history till an act of blasphemy on the part of Ahaziah, the son and successor of Ahab, causes God to call him forth. Ahaziah met with an injury, and, fearing that it might be unto death, he, as if to prove himself worthy of being the son of idolatrous Ahab and Jezebel, sent to consult Baalzebub, the idol-god of Ekron; but the angel of the Lord told Elijah to go forth and meet the messengers of the king (2 Kings i. 3, 4), and assure them that he should not recover. Suddenly reappearing before their master, he said unto them, 'Why are ye now turned back?' when they answered, 'There came a man up to meet us, and said unto us, Go, turn again unto the king that sent you, and say unto him, Thus saith the Lord: Is it not because there is no God in Israel that thou sendest to inquire of Baalzebub, the god of Ekron? Wherefore thou shalt not come down from that bed on which thou art gone up, but shalt surely die.' Conscience seems to have at once whispered to him that the man who dared to arrest his messengers with such a communication must be Elijah, the bold but unsuccessful reprover of his parents. Determined to chastise him for such an insult, he sent a captain and fifty armed men to bring him into his presence; but at Elijah's word fire descended from Heaven and

consumed the whole band. Attributing this destruction of his men to some natural cause, he sent forth another company, on whom though the same judgment fell, this impious king is not satisfied till another and a similar effort is made to capture the prophet. The captain of the third band implored and found mercy at the hands of the prophet, who at once descended from Carmel and accompanied him to Ahaziah. Fearless of his wrath, Elijah now repeats to the king himself what he had before said to his messengers, and agreeably thereto, the sacred narrative informs us that Ahaziah died.

The above was the last more public effort which the prophet made to reform Israel. His warfare being now accomplished on earth, God, whom he had so long and so faithfully served, will translate him in a chariot of fire to Heaven. Conscious of this, he determines to spend his last moments in imparting divine instruction to, and pronouncing his last benediction upon, the students in the colleges of Beth-el and Jericho; accordingly, he made a circuit from Gilgal, near the Jordan, to Beth-el, and from thence to Jericho. Wishing either to be alone at the moment of being caught up to Heaven; or, what is more probable, anxious to test the affection of Elisha (as Christ did that of Peter), he delicately intimates to him not to accompany him in this tour. But the faithful Elisha, to whom, as also to the schools of the prophets, God had revealed his purpose to remove Elijah, declares his fixed determination not to forsake his master now at the close of his earthly pilgrimage. Ere yet, however, the chariot of God descended for him, he asks what he should do for Elisha. The latter, conscious of the complicated and difficult duties which now awaited him, asks for a double portion of Elijah's spirit. Elijah, acknowledging the magnitude of the request, yet promises to grant it on the contingency of Elisha seeing him at the moment of his rapture. Possibly this contingency was placed before him in order to make him more on the watch, that the glorious departure of Elijah should not take place without his actually seeing it. Whilst standing on the other side of the Jordan, whose waters were miraculously parted for them to pass over on dry ground, angels descended, as in a fiery chariot, and, in the sight of fifty of the sons of the prophets and Elisha, carried Elijah into Heaven. Elisha, at this wonderful sight, cried out, like a bereaved child, 'My Father, my Father, the chariot of Israel and the horsemen thereof;' as if he had said, 'Alas! the strength and saviour of Israel is now departed!' But it was not so; for God designed that the mantle which fell from Elijah as he ascended should now remain with Elisha as a pledge that the office and spirit of the former had now fallen upon himself.

ELIM, one of the stations of the Israelites in the route to Mount Sinai [SINAI].

ELIMELECH (*God the king*), a native of Bethlehem, husband of Naomi, and father by her of two sons, Mahlon and Chilion. In a time of scarcity he withdrew with his family into the land of Moab, where he died (Ruth i. 1-3). [NAOMI; RUTH.]

1. ELIPHAZ (*God the strong*), a son of Esau and Adah (Gen. xxxvi. 10).

2. ELIPHAZ, one of the three friends who

came to condole with Job in his affliction, and who took part in that remarkable disputation which occupies the book of Job. He was of Teman in Idumaea; and as Eliphaz the son of Esau had a son called Teman, from whom the place took its name, there is reason to conclude that this Eliphaz was a descendant of the former Eliphaz. Some, indeed, even go so far as to suppose that the Eliphaz of Job was no other than the son of Esau. This view is of course confined to those who refer the age of Job to the time of the patriarchs.

Elisha is the first of the friends to take up the debate, in reply to Job's passionate complaints. The scope of his argument and the character of his oratory are described under another head [Job, Book of]. He appears to have been the oldest of the speakers, from which circumstance, or from natural disposition, his language is more mild and sedate than that of any of the other speakers. He begins his orations with delicacy, and conducts his part of the argument with considerable address. His share in the controversy occupies chapters iv. v. xv. xxii.

ELISABETH, wife of Zacharias, and mother of John the Baptist (Luke i. 5). The name in this precise shape does not occur in the Old Testament, where the names of few females are given. But it is a Hebrew name, the same in fact as Elisheba, which see.

ELISHA (*God the deliverer*). The manner, and the circumstances in which Elisha was called to the prophetic office have been noticed in the article ELIJAH.

Anxious to enter at once upon the duties of his sacred office, Elisha determined to visit the schools of the prophets which were on the other side of the Jordan. Accordingly, returning to this river, and wishing that sensible evidence should be afforded, both to himself and others, of the spirit and power of his departed master resting upon him, he struck its waters with Elijah's mantle, when they parted asunder and opened a way for him to pass over on dry land. Witnessing this miraculous transaction, the fifty sons of the prophets, who had seen from the opposite side Elijah's ascension, and who were awaiting Elisha's return, now, with becoming reverence, acknowledged him their spiritual head.

The divine authority by which Elisha became the successor of Elijah received further confirmation from the miracle whereby the bitter waters of Jericho were made sweet, and the place thereby rendered fit for the habitation of man (2 Kings ii. 19-22).

As the general visitor of the schools of the prophets, Elisha now passes on from Jericho to the college which was at Beth-el. Ere, however, he entered Beth-el, there met him from thence (2 Kings ii. 23, 24) little children, who, no doubt instigated by their idolatrous parents, tauntingly told him to ascend into heaven, as did his master, Elijah. There was in their expressions an admixture of rudeness, infidelity, and impiety. But the inhabitants of Beth-el were to know, from bitter experience, that to dishonour God's prophets was to dishonour Himself; for Elisha was at the moment inspired to pronounce the judgment which at once took effect: God, who never wants for instruments to accomplish his purposes, caused two she-bears to emerge from a neigh-

bowing wood, and destroy the young delinquents.

Jehoram, who reigned over Israel at this time, though not a *Baalite*, was yet addicted to the sin of Jeroboam: still he inherits the friendship of Jehoshaphat, the good King of Judah, whose counsel, possibly, under God, had detached him from the more gross idolatry of his father Ahab. Wishing to see the now (a.c. 895) revolted king of Moab reduced to his wonted allegiance to Israel, Jehoshaphat determined to go up to battle against him, together with Jehoram, and his own tributary the king of Edom. These combined armies met together on the plains of Edom. Confident in their own powers they press onward against the enemy; but, not meeting him, another of a more formidable character started up before them. In the midst of the arid plains of Arabia Petraea they could find no water. Jehoram deplored the calamity into which they had fallen, but Jehoshaphat inquired for a prophet. On this, one of his courtiers said to Jehoram, 'Here is Elisha, the son of Shaphat, who poured water on the hands of Elijah.' No sooner were they made acquainted with the fact that Elisha was at hand than the three kings waited upon him. Elisha, feeling that it was nought but superstitious fear, joined to the influence of Jehoshaphat, which led Jehoram thus to consult him, now indignantly and tauntingly advised him to go for succour to the gods of his father Ahab and of his mother Jezebel. The reprobated monarch was then led to acknowledge the impotency of those gods in whom he had trusted, and the power of that God whom he had neglected. Still the man of God, seeing the hollowness of Jehoram's humiliation, continues: 'As the Lord liveth, before whom I stand, surely were it not that I regard the presence of Jehoshaphat, the king of Judah, I would not look toward thee.' Having thus addressed Jehoram, Elisha desired a minstrel to be brought before him; and now when his spirit was calmed by, perhaps, one of the songs of Zion, 'The haud of the Lord came upon him.' The minstrel ceased, and Elisha made known the joyful intelligence that not only should water be miraculously supplied, but also that Moab should be overcome. Accordingly the next morning they realized the truth of this prediction. But the same water which preserves their lives becomes the source of destruction to their enemies. The Moabites, who had received intelligence of the advance of the allied army, were now assembled upon their frontiers. When the sun was up, and its rosy light first fell upon the water, their van-guard, beholding it at a distance, supposed it to be blood. Thus the notion was rapidly spread from one end to another that the kings were surely slain, having fallen out amongst themselves. Hence there was a universal shout, 'Moab, to the spoil!' and they went forward confident of victory. But beholding the Israelitish squadrons advancing to meet them, they fled in the utmost panic and confusion (2 Kings iii. 20, &c.).

The war having terminated in the signal overthrow of the revolvers, Elisha, who had returned home, is again employed in ministering blessings. The widow of a pious prophet presented herself before him (2 Kings iv.), informed him that her husband having died in debt, his creditors were about to sell her two only sons, which, by an ex-

tension of the law (Exod. xxi. 7, and Lev. xxv. 39), and by virtue of another (Exod. xxii. 3), they had the power to do; and against this hard-hearted act she implores the prophet's assistance. Elisha then inquired how far she herself had the power to avert the threatened calamity. She replied that the only thing of which she was possessed was one pot of oil. By multiplying this, as did his predecessor Elijah in the case of the widow of Zarephath, he enabled her at once to pay off her debts and thereby to preserve the liberty of her children (2 Kings iv. 1-7).

It is next related that in his visitations to the schools of the prophets his journey lay through the city of Shunem, where lived a rich and godly woman. Wishing that he should take up, more than occasionally, his abode under her roof, she proposed to her husband to construct a chamber for his reception. The husband at once consented, and, the apartment being completed and fitted up in a way that showed their proper conception of his feeling, the prophet becomes its occupant. The woman was childless; and the gratitude of the prophet for her disinterested kindness was evinced by the gift of a son, which the Lord, at his prayer, bestowed upon her. This new pledge of their affection grows up till he is able to visit his fond father in the harvest-field, when all the hopes they had built up in him were overthrown by his being suddenly laid prostrate in death. The bereaved mother, out of tenderness towards the feelings of the father, concealed the fact that the child was no more till she should see if it might please God, through Elisha, to restore him to life. She therefore hastened to Carmel, where she found the prophet, and informed him what had taken place. Conceiving probably that it was a case of mere suspended animation or a swoon, the prophet sent Gehazi, his servant, to place his staff on the face of the child, in the hope that it might act as a stimulus to excite the animal motions. But the mother, conscious that he was actually departed, continued to entreat that he himself would come to the chamber of the dead. He did so, and found that the soul of the child had indeed fled from the earthly tenement. Natural means belong to man; those that are supernatural belong to God: we should do our part, and beg of God to do his. On this principle the prophet on this occasion acted. God blessed the means used, and answered the prayer presented by Elisha. The child is raised up and restored to the fond embrace of its grateful and rejoicing parents.

The next remarkable event in the history of Elisha was the miraculous healing of the incurable leprosy of the Syrian general, Naaman, whereby the neighbouring nation had the opportunity of learning the beneficence of that God of Israel, whose judgments had often brought them very low. The particulars are given under another head [NAAMAN].

Soon after this transaction we find this man of God in Gilgal, miraculously neutralizing the poison which had, by mistake, been mixed with the food of the prophets, and also feeding one hundred of them with twenty small loaves which had been sent for his own consumption (2 Kings iv. 38, &c.).

Notwithstanding the general profligacy of Israel, the schools of the prophets increased, a.c.

890. This was, doubtless, owing to the influence of Elisha. Accompanied by their master, a party of these young prophets, or theological students, came to the Jordan, and whilst one of them was felling a beam (for the purpose of constructing there a house) the axe-head fell into the water. This accident was the more distressing because the axe was borrowed property. Elisha, however, soon relieved him by causing it miraculously to rise to the surface of the river.

The sacred record again leads us to contemplate the prophet's usefulness, in reference to his country at large. Does the king of Syria devise well-concerted schemes for the destruction of Israel? God inspires Elisha to detect and lay them open to Jehoram. Benhadad, on hearing that it was he that thus caused his hostile movements to be frustrated, sent an armed band to Dothan in order to bring him bound to Damascus. The prophet's servant, on seeing the host of the enemy which invested Dothan, was much alarmed, but by the prayer of Elisha, God reveals to him the mighty company of angels which were set for their defence. Regardless of consequences, the prophet went forth to meet the hostile band: and having again prayed, God so blinded them that they could not recognize the object of their search. The prophet then promised to lead them to where they might see him with the natural eye. Trusting to his guidance, they followed on till they reached the centre of Samaria, when, the optical illusion being removed, Elisha stood in his recognized form before them. The king was for putting them all to death; but, through the interposition of him whom they had just before sought to destroy, they were honourably dismissed to their own country (n.c. 892). But a year had scarcely elapsed from this time when Benhadad, unmindful of Israel's kindness and forbearance, invested Samaria and reduced its inhabitants to a state of the most cruel famine. Yet the king of Israel plunged still deeper into sin, for he ordered Elisha to be put to death, conceiving that it was his prayer which brought these sufferings upon himself and nation. But God forewarned the prophet of his danger, and inspired him to predict to the wicked king that by to-morrow 'a measure of fine flour should be sold for a shekel, and two measures of barley for a shekel, in the gate of Samaria.' This assurance was not more comfortable than *incredible*; but when the lord on whose hand the king leaned expressed his disbelief, he was awfully rebuked by the assurance that he should see but not enjoy the benefit. The next night God caused the Syrians to hear the noise of chariots and horses; and conceiving that Jehoram had hired against them the kings of the Hittites and the king of Egypt, they fled from before the walls of Samaria—leaving their tents filled with gold and provisions—in the utmost panic and confusion. In this way did God, according to the word of Elisha, miraculously deliver the inhabitants of Samaria from a deadly enemy without, and from sore famine within, its walls: another prediction, moreover, was accomplished; for the distrustful lord was trampled to death by the famished people in rushing through the gate of the city to the forsaken tents of the Syrians (2 Kings vii.).

We next find the prophet in Damascus, but are not told what led him thither (n.c. 885).

Benhadad, the king, whose counsels he had so often frustrated, rejoiced to hear of his presence; and now, as if he had forgotten the attempt he once made upon his life, dispatches a noble messenger with a costly present, to consult him concerning his sickness and recovery. The prophet replied that he should then die, though his indisposition was not of a deadly character. Seeing moreover, in prophetic vision, that the man Hazeel, who now stood before him, should be king in Benhadad's stead; and that, as such, he would commit unheard of cruelties upon his country, the prophet was moved to tears. How these painful anticipations of Elisha were realized the subsequent history of this man proved.

For a considerable time after Elisha had sent to anoint Jehu king over Israel we find no mention of him in the sacred record. We have reason to suppose that he was utterly neglected by Jehu, Jehoahaz, and Joash, who reigned in succession. Neither the sanctity of his life nor the stupendous miracles he wrought had the effect of reforming the nation at large: much of the time of his latter years was, doubtless, spent in the schools of the prophets. At length, worn out by his public and private labours, and at the age of 90—during 60 of which he is supposed to have prophesied—he is called into eternity. Nor was the manner of his death inglorious; though he did not enter into rest as did Elijah (2 Kings xiii. 14, &c.). Amongst his weeping attendants was Joash, the king of Israel. He was probably stung with remorse for having so neglected to acknowledge his national worth; yet, though late, God does not suffer this public recognition of his aged and faithful servant to go unrequited. The spirit of prophecy again entering the dying Elisha, he informed Joash that he should prevail against the Syrians. Even after death God would put honour upon Elisha: a dead body having touched his bones came to life again. (2 Kings xiii. 21.)

Elisha was not less eminent than his predecessor Elijah. His miracles are various and stupendous, and, like those which were wrought by Christ, were on the whole of a *merciful* character. In this they were remarkably distinguished, in many instances, from the miracles of Elijah.

ELISHAH, a son of Javan (Gen. x. 4), who seems to have given name to 'the isles of Elishah,' which are described as exporting fabrics of purple and scarlet to the markets of Tyre (Ezek. xxvii. 7). If the descendants of Javan peopled Greece, we may expect to find Elishah in some province of that country; but no certainty can be arrived at on the subject.

ELISHEBA, *covenant-God*: wife of Aaron, and hence the mother of the priestly family (Exod. vi. 23).

EL'KANAH, *God the Creator*. Several persons of this name are mentioned in Scripture, as a son of Korah (Exod. vi. 24; 1 Chron. vi. 23); the father of Sammel (1 Sam. i. 1, seq.; ii. 11-20; 1 Chron. vi. 27); a friend of king Ahab (2 Chron. xxviii. 7); one of David's heroes (1 Chron. xii. 6); Levites (1 Chron. vi. 23, 25, 26, 27; xv. 23).

EL'KOSH. The prophet Nahum is called an Elkoshite, that is a native of some place called Elkosh (Nahum i. 1). There was a village of this name in Galilee in the time of Jerome; but the prophet was more probably born of Jewish exiles at Elkosh or Aikush in Assyria, near

Mosul. The Jews themselves believe that he was born and buried there; and Jewish pilgrims from all parts still visit his alleged tomb. Al-kosh is thirty-four miles north of Mosul (Nineveh), and is situated a little way up the side of a mountain, in the range to which it gives its name. It is entirely inhabited by Chaldee Christians, who have a convent higher up the mountains.

ELLA'SAR, a territory in Asia, whose king, Arioch, was one of the four who invaded Canaan in the time of Abraham (Gen. xiv. 1). The association of this king with those of Elam and Shinar, indicates the region in which the kingdom should be sought; but nothing further is known of it, unless it be the same as Thelassar mentioned in 2 Kings xix. 12 [THELASSAR].

ELION, of the tribe of Zebulun, who judged Israel ten years. He was preceded by Ithzan of Bethlehem, and succeeded by Abdon of Ephraim. The whole period covered by their administration was twenty-five years (from B.C. 1191 to 1174); but it is probable that they were for a part of this time contemporary, each exercising authority over a few of the tribes. They appear to have overawed the enemies of Israel by their judicious administration; for no war is mentioned in their time (Judg. xii. 8-15).

ELUL, Nch. vi. 15, is the name of that month which was the sixth of the ecclesiastical, and twelfth of the civil, year of the Jews, and which began with the new moon of our September. According to the Megillat Taanith, the 17th day of this month was a public fast for the death of the spies who brought back a bad report of the land (Num. xiv. 37).

ELYMAS, an appellative supposed to mean *a wise man*, applied to a Jew named Bar-Jesus, mentioned in Acts xiii. 6-11. Chrysostom observes, in reference to the blindness inflicted by the Apostle on Bar-Jesus, that the limiting clause '*for a season*,' shows that it was not intended so much for the punishment of the sorcerer as for the conversion of the deputy.

EMBALMING. [BURIAL.]

EMERALD, *Napheth*, a precious stone, named in Exod. xxviii. 18; xxxix. 11; Ezek. xxviii. 16; xxviii. 13; in all of which places it is rendered Emerald in the Authorized Version. The Sept. and Josephus render it by Carbuncle. This name, denoting a live coal, the ancients gave to several glowing red stones resembling live coals, particularly rubies and garnets. The most valued of the carbuncles seems, however, to have been the Oriental garnet, a transparent red stone, with a violet shade, and strong vitreous lustre. It was engraved upon and was probably not so hard as the ruby, which, indeed, is the most beautiful and costly of the precious stones of a red colour, but is so hard that it cannot easily be subjected to the graving-tool. The Hebrew *napheth*, in the breastplate of the high-priest, was certainly an engraved stone; and there is no evidence that the ancients could engrave the ruby, although this has in modern times been accomplished. Upon the whole, the particular kind of stone denoted by the Hebrew word must be regarded as uncertain.

EMERODS, a painful disease with which the Philistines were afflicted (1 Sam. v. 6).

EMIM, a numerous and gigantic race of people who, in the time of Abraham, occupied the

country beyond the Jordan, afterwards possessed by the Moabites (Gen. xiv. 5; Deut. ii. 10).

EMMA'US (*hot baths*), a village 60 stadia, or 7½ miles, from Jerusalem, noted for our Lord's interview with two disciples on the day of his resurrection (Luke xxiv. 13). The same place is mentioned by Josephus (*De Bell. Jud.* vii. 6, 6), and placed at the same distance from Jerusalem, in stating that Vespasian left 800 soldiers in Judea, to whom he gave the village of Emmaus. The site is not now known. The other Emmaus, also called Nicopolis, is identified with Laisan, about midway between Jerusalem and Ramleh. There was another Emmaus, near Tiberias, on the lake of the same name, where the hot baths which gave name to it are still frequented, and have a temperature of 130° Fahrenheit. Neither of these places is named in Scripture.

EN, properly AIN, a word signifying 'fountain'; and hence entering into the composition of sundry local names, which are explained under AIN.

ENCAMPMENTS. Of the Jewish system of encampment the Mosaic books have left a detailed description. From the period of the sojourn in the wilderness to the crossing of the Jordan the twelve tribes were formed into four great armies, encamping in as many fronts, or forming a square, with a great space in the rear, where the tabernacle of the Lord was placed, surrounded by the tribe of Levi and the bodies of carriers, &c., by the stalls of the cattle and the baggage: the four fronts faced the cardinal points while the march was eastward, but as Judah continued to lead the van, it follows that when the Jordan was to be crossed the direction became westward, and therefore the general arrangement, so far as the cardinal points were concerned, was reversed. It does not appear that, during this time, Israel ever had lines of defence thrown up; but in after ages, when only single armies came into the field, it is probable that the castral disposition was not invariably quadrangular; and, from the many positions indicated on the crests of steep mountains, the fronts were clearly adapted to the ground and to the space which it was necessary to occupy. The rear of such positions, or the square camps in the plain, appear from the marginal reading of 1 Sam. xvii. 20, and xxvi. 5, to have been enclosed with a line of carts or chariots, which, from the remotest period, was a practice among all the nomadic nations of the north. The book of Numbers is so explicit on the subject of encampment, and the march of the Israelites, that no particular explanation seems to be necessary.

ENCHANTMENTS. [DIVINATION.]

EN'DOR (*honar-fountain*); a town of Galilee, assigned to Manasseh, although lying beyond the limits of that tribe (Josh. xvii. 11). It is mentioned in connection with the victory of Deborah and Barak (Ps. lxxviii. 10); but is chiefly memorable as the abode of the sorceress whom Sami consulted on the eve of the battle in which he perished (1 Sam. xxviii. 7, sq.). The name is not found in the New Testament; but in the time of Eusebius and Jerome the place still existed as a large village, four miles south of Mount Tabor. At this distance, on the northern slope of the lower ridge of Hermon, a village with this name still exists.

EN-EGLA'IM (*calves' fountain*); a town of Moab (Ezek. xlvii. 10), which Jerome places at the northern end of the Dead Sea, at the influx of the Jordan.

EN-GAN'NIM (*gardens' fountain*). 1. A town of Judah (Josh. xv. 34), which Jerome places near Beth-el. 2. A Levitical city in Issachar (Josh. xix. 21; xxi. 29), probably the same as the Gineaen of Josephus (*Antiq.* xx. 6, 1), and which Biddulph (in *Purchas*, vol. ii. p. 135) identifies with the present Jenin, a town 15 miles south of Mount Tabor, and which he and others describe as still a place of gardens and abundant water. 3. Jerome mentions another place, called En-gannim, beyond the Jordan, near Geraza; and the name seems, indeed, to have been very common for places where water, and consequently gardens, abounded.

EN-GE'DI (*kids' fountain*), a city of Judah, which gave its name to a part of the desert to which David withdrew for fear of Saul (Josh. xv. 62; 1 Sam. xxiv. 1-4). Its more ancient Hebrew name was Hazezon-tamar; and by that name it is mentioned before the destruction of Sodom, as being inhabited by the Amorites, and near the cities of the plain (Gen. xiv. 7). In 2 Chron. xx. 1, 2, bands of the Moabites and Ammonites are described as coming up against king Jehoshaphat, apparently round the south end of the Dead Sea, as far as En-gedi. And this, as we learn from Dr. Robinson, is the route taken by the Arabs in their marauding expeditions at the present day. It has been identified with the Ain-jidy of the Arabs, situated at a point of the western shore, nearly equidistant from both extremities of the lake. The site lies among the mountains which here confine the lake, a considerable way down the descent to its shore. Here is the beautiful fountain of Ain-jidy, bursting forth at once in a fine stream upon a sort of narrow terrace or shelf of the mountain, above 400 feet above the level of the lake. The whole of the descent below appears to have been once terraced for tillage and gardens; and near the foot are the ruins of a town, exhibiting nothing of particular interest, and built mostly of unhewn stones. This we may conclude to have been the town which took its name from the fountain.

THE WILDERNESS OF EN-GE'DI is doubtless the immediately neighbouring part of the wild region, west of the Dead Sea, which must be traversed to reach its shores. It was here that David and his men lived among the 'rocks of the wild goats,' and where the former cut off the skirts of Saul's robe in a cave (1 Sam. xxi. 1-4). 'On all sides,' says Dr. Robinson, 'the country is full of caverns, which might then serve as lurking-places for David and his men, as they do for outlaws at the present day.'

ENGINES OF WAR were certainly known much earlier than the Greek writers appear to admit, since figures of them occur in Egyptian monuments, where two kinds of the testudo, or pent-house, used as shelters for the besiegers, are represented, and a colossal lance, worked by men who, under the cover of a testudo, drive the point between the stones of a city wall. The chief projectiles were the catapulta for throwing darts, and the balista for throwing stones. Both these kinds of instruments were prepared by

Uzziah for the defence of Jerusalem (2 Chron. xxvi. 15), and battering the wall is mentioned in the reign of king David (2 Sam. xx. 15); but the instrument itself for throwing it down may have been that above-noticed, and not the battering-ram. The ram was, however, a simple machine, and capable of demolishing the strongest walls, provided access to the foot was practicable: for the mass of cast metal which formed the head could be fixed to a beam lengthened sufficiently to require between one and two hundred men to lift and impel it; and when it was still heavier, and hung in the lower floor of a moveable tower, it became a most formidable engine of war—one

166. [Battering Ram.]

used in all great sieges from the time of Demetrius, about B.C. 306, till long after the invention of gunpowder. Towers of this kind were largely used at the destruction of Jerusalem by the Romans. Of the balistæ and catapultæ it may be proper to add that they were of various powers. For battering walls there were some that threw stones of fifty, others of one hundred, and some of three hundred weight; in the field of battle they were of much inferior strength. Darts varied similarly from small beams to large arrows, and the range they had, exceeded a quarter of a mile, or about 450 yards. All these engines were constructed upon the principle of the sling, the bow, or the spring, the last being an elastic bar, bent back by a screw or a cable of

167. [Balista.]

sinews, with a trigger to set it free, and contrived either to impel darts by its stroke, or to throw stones from a kind of spoon formed towards the summit of the spring.

ENOCH (*initiated*). Four persons bearing this name are mentioned in the Old Testament, the most distinguished of whom was the son of Jared and father of Methuselah. According to

the Old Testament, *he walked with God*; and, after 365 years, *he was not, for God took him* (Gen. v. 24). The inspired writer of the Epistle to the Hebrews says, 'By faith Enoch was translated that he should not see death, and was not found, because God had translated him' (xi. 5). *Walking with God* implies the closest fellowship with Jehovah which it is possible for a human being to enjoy on earth. As a reward, therefore, of his extraordinary sanctity, he was transported into heaven without the experience of death. Elijah was in like manner translated; and thus was the doctrine of immortality palpably taught under the ancient dispensation.

ENOCH, BOOK OF. The interest that once attached to the apocryphal book of Enoch has now partly subsided. Yet a document quoted, as is generally believed, by an inspired apostle, can never be wholly devoid of importance or utility in sacred literature.

With regard to the author of the book and the time when it was written, various conflicting opinions have been promulgated. Without entering into the controversy, we may state that it seems to us to have been composed a little before Christ's appearance, by a Jew who had studied well the book of Daniel. Several circumstances render it apparent that it was originally composed in the Hebrew or Chaldee language.

The Greek translation, in which it was known to the fathers, appears to be irrecoverably lost. There is no trace of it after the eighth century.

The leading object of the writer, who was manifestly imbued with deep piety, was to comfort and strengthen his contemporaries. He lived in times of distress and persecution, when the enemies of religion oppressed the righteous. The outward circumstances of the godly were such as to excite doubts of the divine equity in their minds, or at least to prevent it from having that hold on their faith which was necessary to sustain them in the hour of trial. In accordance with this, the writer exhibits the reward of the righteous and the punishment of the wicked. To give greater authority to his affirmations, he puts them into the mouth of Enoch. Thus they have all the weight belonging to the character of an eminent prophet and saint. Various digressions are not without their bearing on the author's main purpose. The narrative of the fallen angels and their punishment, as also of the flood, exemplifies the retributive justice of Jehovah; while the Jewish history, continued down to the Maccabees, exhibits the final triumph of His people, notwithstanding all their vicissitudes. Doubtless the author lived amid fiery trial; and, looking abroad over the desolation, sought to cheer the sufferers by the consideration that they should be recompensed in another life. As for their wicked oppressors, they were to experience terrible judgments. The writer seems to delight in uttering dire anathemas against the wicked. It is plain that the book grew out of the time when the author lived, and the circumstances by which he was surrounded. It gives us a glimpse not only of the religious opinions, but also of the general features that characterized the period.

The question, Did Jude really quote the book of Enoch? has given rise to a good deal of dis-

ension. Some are most unwilling to believe that an inspired writer could cite an Apocryphal production. Such an opinion destroys, in their view, the character of the writing said to be inspired, and reduces it to the level of an ordinary composition. But this is preposterous. The Apostle Paul quotes several of the heathen poets; yet who ever supposed that by such references he sanctions the productions from which his citations are made, or renders them of greater value? All that can be reasonably inferred from such a fact is, that if the inspired writer cites a particular sentiment with approbation, it must be regarded as just and right, irrespective of the remainder of the book in which it is found. The Apostle's sanction extends no farther than the passage to which he alludes. Other portions of the original document may exhibit the most absurd and superstitious notions.

Others suppose that Jude quoted a *traditional* prophecy or saying of Enoch, and we see no improbability in the assumption. Others, again, believe that the words apparently cited by Jude were suggested to him by the Holy Spirit. But surely this hypothesis is unnecessary. Until it can be shown that the book of Enoch did not exist in the time of Jude, or that his quoting it is unworthy of an Apostle, or that such knowledge was not handed down traditionally within the Apostle's reach, we abide by the opinion that Jude really quoted the book of Enoch. While there are probable grounds for believing that Jude might have become acquainted with the circumstance independently of inspiration, we ought not to have recourse to the hypothesis of *immediate suggestion*. On the whole, it is most likely that the book of Enoch existed before the time of Jude, and that the latter really quoted it in accordance with the current tradition. If so, the prophecy ascribed to Enoch was *truly* ascribed to him, because it is scarcely credible that Jude writing by inspiration would have sanctioned a false statement.

Presuming that it was written by a Jew, the book before us is an important document in the history of Jewish opinions. It indicates an essential portion of the Jewish creed before the appearance of Christ; and assists us in comparing the theological views of the later with those of the earlier Jews. It also serves to establish the fact that some doctrines of great importance in the eyes of evangelical Christians ought not to be regarded as the growth of an age in which Christianity had been corrupted by the inventions of men. We would not appeal to it as possessing *authority*. The place of *authority* can be assigned to the Bible alone. But apart from all ideas of *authority*, it may be fairly regarded as an index of the state of opinion at the time when it was written. Hence it subverts the confirmation of certain opinions, provided they can be shown to have a good foundation in the word of God. If it be conceded that certain doctrines are contained by express declaration or fair inference in the volume of inspiration, it is surely some attestation of their truth that they lie on the surface of this ancient book. Let us briefly allude to several representations which occur in its pages:—

1. Respecting the nature of the Deity.—There are distinct allusions to a plurality in the God-

head. The doctrine of the Trinity seems to have been received by the writer and his contemporaries.

1. a cordance with this view Christ is represented as *existing from eternity*: as the object of invocation and worship; and as the supreme Judge of men and angels.

2. The doctrine of a future state of retribution is implied in many passages, and the *eternity* of future punishment is also distinctly contained in it.

Whatever value may be attached to the theological opinions expressed in the book of Enoch, it is apparent from these statements that certain sentiments to which evangelical Christians assign a high importance, because, in their view, they are contained in Scripture, appear to have prevailed at the commencement of the Christian era. To the serious inquirer they can never be of trifling interest.

ENON. [ÆNON.]

EN-RO'GEL. The name means *Fountain*, and is construed by the Targum into 'Fuller's Fountain,' because the fullers trod the clothes there with their feet. It was near Jerusalem, on the boundary-line between the tribes of Judah and Benjamin (Josh. xv. 7; xviii. 6; 2 Sam. xvii. 17; 1 Kings i. 9). It has been usually supposed the same as the Fountain of Siloam. But Dr. Robinson is more inclined to find it in what is called by Frank Christians the Well of Nehemiah, but by the native inhabitants the Well of Job. There are only three sources, or rather receptacles of living water, now accessible at Jerusalem, and this is one of them. It is situated just below the junction of the Valley of Hinnom with that of Jehoshaphat. It is a very deep well, measuring 125 feet in depth; 50 feet of which were, at the time of Dr. Robinson's visit (in the middle of April), nearly full of water. The water is sweet, but not very cold, and at the present day is drawn up by the hand.

ENSIGNS. [STANDARDS.]

EPENETUS, a Christian resident at Rome when Paul wrote his Epistle to the Church in that city, and one of the persons to whom he sent special salutations (Rom. xvi. 5). In the received text he is spoken of as being 'the first fruits of Achaia'; but 'the first fruits of Asia' is the reading of the best MSS.

EPAPHRAS, an eminent teacher in the church at Colosse, denominated by Paul 'his dear fellow-servant,' and 'a faithful minister of Christ' (Coloss. i. 7; iv. 12). From Paul's Epistle to Philemon it appears that he suffered imprisonment with the Apostle at Rome. It has been inferred from Coloss. i. 7, that he was the founder of the Colossian Church, and most probably he was one of its earliest and most zealous instructors.

EPAPHRODITUS, a messenger of the church at Philippi to the Apostle Paul during his imprisonment at Rome, who was entrusted with their contributions for his support (Phil. ii. 25; iv. 18). Paul's high estimate of his character is shown by an accumulation of honourable epithets, and by fervent expressions of gratitude for his recovery from a dangerous illness brought on in part by a generous disregard of his personal welfare in ministering to the Apostle (Phil. ii. 30). Epaphroditus, on his return to Philippi,

was the bearer of the epistle which forms part of the canon.

EP'AH, a dry measure of capacity, equivalent to the bath for liquids. It contained three pecks and three pints. [WEIGHTS AND MEASURES.]

EPHESIANS, EPISTLE TO THE. This Epistle expressly claims to be the production of the Apostle Paul (i. 1; iii. 1); and this claim the writer in the latter of these passages follows up by speaking of himself in language such as that Apostle is accustomed to use in describing his own position as an ambassador of Christ (iii. 1, 3, 8, 9). The justice of this claim seems to have been universally admitted by the early Christians, and it is expressly sanctioned by several of the fathers of the second and third centuries.

The question to whom was this Epistle addressed has received different answers. Grotius, reviving the opinion of the ancient heretic Marcion, maintains that the party addressed in this Epistle was the church at Laodicea, and that we have in this the Epistle to that church which is commonly supposed to have been lost; whilst others contend that this was addressed to no church in particular, but was a sort of circular letter, intended for the use of several churches, of which Ephesus may have been the first or centre.

Without entering into a minute consideration of these theories, which our limits will not permit, we may remark that both are unsupported by satisfactory evidence, and that we fully concur in the common opinion that the party to whom this Epistle was sent was the church at Ephesus.

The Epistle is so much the utterance of a mind overflowing with thought and feeling that it does not present any precisely marked divisions under which its different parts may be ranked. After the usual apostolic salutation Paul breaks forth into an expression of thanksgiving to God and Christ for the scheme of redemption (i. 3-10), from which he passes to speak of the privileges actually enjoyed by himself and those to whom he was writing, through Christ (i. 11-23). He then reminds the Ephesians of their former condition when they were without Christ, and of the great change which, through divine grace, they had experienced (ii. 1-22). An allusion to himself as enjoying by divine revelation the knowledge of the mystery of Christ leads the Apostle to enlarge upon the dignity of his office and the blessed results that were destined to flow from the exercise of it to others (iii. 1-12). On this he grounds an exhortation to his brethren not to faint on account of his sufferings for the Gospel, and affectionately invokes on their behalf the divine blessing, concluding this, which may be called the more doctrinal part of his Epistle, with a doxology to God (iii. 13-21). What follows is chiefly hortatory, and is directed partly to the inculcation of general consistency, steadfastness in the faith, and propriety of deportment (iv. 1; v. 21), and partly to the enforcement of relative duties (v. 22; vi. 9). The Epistle concludes with an animated exhortation to fortitude, watchfulness and prayer, followed by a reference to Tychicus as the bearer of the Epistle, and by the usual apostolic benediction (vi. 10-24).

This Epistle was written during the earlier part of the Apostle's imprisonment at Rome, at the same time with that to the Colossians [COLLOSSIANS, EPISTLE TO THE].

EPHESUS, an old and celebrated city, capital of Ionia, one of the twelve Ionian cities in Asia Minor in the Mythic times. It lay on the river Cayster, not far from the coast of the Icarian sea, between Smyrna and Miletus. It was also one of the most considerable of the Greek cities in Asia Minor; but while, about the epoch of the introduction of Christianity, the other cities declined, Ephesus rose more and more. It owed its prosperity in part to the favour of its governors, for Lysimachus named the city Arsinoe, in honour of his second wife, and Attalus Philadelphus furnished it with splendid wharfs and docks; in part to the favourable position of the place, which naturally made it the emporium of Asia on this side the Taurus. Under the Romans Ephesus was the capital not only of Ionia, but of the entire province of Asia, and bore the honourable title of *the first and greatest metropolis of Asia*. In the days of Paul Jews were found settled in the city in no inconsiderable number, and from them the Apostle collected a Christian community (Acts xviii. 19; xix. 1; xx. 16), which, being fostered and extended by the hand of Paul himself, became the centre of Christianity in Asia Minor. On leaving the city the Apostle left Timothy there (1 Tim. i. 3); at a later period, according to a tradition which prevailed extensively in ancient times, we find the Apostle John in Ephesus, where he employed himself most diligently for the spread of the Gospel, and where he not only died, at a very old age, but was buried, with Mary the mother of the Lord. In the book of Revelations (ii. 1) a favourable testimony is borne to the Christian churches at Ephesus.

The classic celebrity of this city is chiefly owing to its famous temple, and the goddess in whose honour it was built, namely, 'Diana of the Ephesians.' This goddess has been already noticed, and a figure given of her famous image at Ephesus [DIANA].

Around the image of the goddess was afterwards erected, according to Callimachus, a large and splendid temple. This temple was burnt down on the night in which Alexander was born, by an obscure person of the name of Eratosthratus, who thus sought to transmit his name to posterity; and, as it seemed somewhat unaccountable that the goddess should permit a place which re-dounded so much to her honour to be thus recklessly destroyed, it was given out that Diana was so engaged with Olympias, in aiding to bring Alexander into the world, that she had no time nor thought for any other concern. At a subsequent period, Alexander made an offer to rebuild the temple, provided he was allowed to inscribe his name on the front, which the Ephesians refused. Aided, however, by the whole of Asia Minor, they succeeded in erecting a still more magnificent temple, which the ancients have lavishly praised and placed among the seven wonders of the world. It took two hundred and twenty years to complete. It was built of cedar, cypress, white marble, and even gold, with which it glittered. Costly and magnificent offerings of various kinds were made to the

goddess, and treasured in the temple; such as paintings, statues, &c., the value of which almost exceeded computation. The fame of the temple, of the goddess, and of the city itself, was spread not only through Asia but the world, a celebrity which was enhanced and diffused the more readily because sacred games were practised there, which called competitors and spectators from every country. Among his other enormities Nero is said to have despoiled the temple of Diana of much of its treasure. It continued to conciliate no small portion of respect, till it was finally burnt by the Goths in the reign of Gallienus. The 'silver shrines' of the Ephesian Artemis, mentioned in Acts xix. 24, have been already noticed [DEMETRIUS, 3].

Ephesus was celebrated for the constant use of those arts which pretend to lay open the secrets of nature, and arm the hand of man with supernatural powers, no less than for the refinements of a voluptuous and artificial civilization. Indeed, in the age of Jesus and his Apostles, adepts in the occult sciences were numerous: they travelled from country to country, and were found in great numbers in Asia, deceiving the credulous multitude and profiting by their expectations. They were sometimes Jews, who referred their skill and even their forms of proceeding to Solomon, who is still regarded in the East as head or prince of magicians (Acts viii. 9; xiii. 6, 8). In Asia Minor Ephesus had a high reputation for magical arts.

The books mentioned Acts xix. 19, were doubtless books of magic. How extensively they were in use may be learnt from the fact that 'the price of them' was 'fifty thousand pieces of silver.' Very celebrated were the Ephesian letters, which appear to have been a sort of magical formulæ written on paper or parchment, designed to be fixed as amulets on different parts of the body, such as the hands and the head. Erasmus says that they were certain signs or marks which rendered their possessor victorious in everything.

The ruins of Ephesus lie two short days' journey from Smyrna, in proceeding from which towards the south-east the traveller passes the pretty village of Sedekuy; and two hours and a half onwards he comes to the ruined village of Danizzi, on a wide, solitary, uncultivated plain, beyond which several burial-grounds may be observed; near one of these, on an eminence, are the supposed ruins of Ephesus, consisting of shattered walls, in which some pillars, architraves, and fragments of marble have been built. The soil of the plain appears rich. It is covered with a rank, burnt-up vegetation, and is everywhere deserted and solitary, though bordered by picturesque mountains. A few corn-fields are scattered along the site of the ancient city, which is marked by some large masses of shapeless ruins and stone walls. Towards the sea extends the ancient port, a pestilential marsh. Along the slope of the mountain and over the plain are scattered fragments of masonry and detached ruins, but nothing can now be fixed upon as the great temple of Diana. There are some broken columns and capitals of the Corinthian order of white marble: there are also ruins of a theatre, consisting of some circular seats and numerous arches, supposed to be the one in which Paul was

168. [Ephesus.]

preaching when interrupted by shouts of, 'Great is Diana of the Ephesians.' A splendid circus or stadium remains tolerably entire, and there are numerous piles of buildings seen alike at Pergamus and Troy as well as here, by some called gymnasia, by others temples; by others again, with more propriety, palaces. They all came with the Roman conquest. No one but a Roman emperor could have conceived such structures. In Italy they have parallels in Adrian's villa near Tivoli, and perhaps in the pile upon the Palatine. Many other walls remain to show the extent of the buildings of the city, but no inscription or ornament is to be found, cities having been built out of this quarry of worked marble. The ruins of the adjoining town, which rose about four hundred years ago, are entirely composed of materials from Ephesus. There are a few huts within these ruins (about a mile and a half from Ephesus), which still retain the name of the parent city, *Asalook*—a Turkish word, which is associated with the same idea as Ephesus, meaning the City of the Moon. A church dedicated to St. John is thought to have stood near, if not on the site of, the present mosque. The tomb of St. John was in or under his church.

Though Ephesus presents few traces of human life, and little but scattered and mutilated remains of its ancient grandeur, yet the environs, diversified as they are with hill and dale, and not scantily supplied with wood and water, present many features of great beauty.

When Dr. Chandler visited Ephesus in 1764, 'its population consisted of a few Greek peasants, living in extreme wretchedness, dependence, and insensibility, the representatives of an illustrious people, and inhabiting the wreck of their

greatness—some the substructure of the glorious edifices which they raised; some beneath the vaults of the stadium, once the crowded scene of their diversions; and some in the abrupt precipice, in the sepulchres which received their ashes. Such are the present citizens of Ephesus, and such is the condition to which that renowned city has been reduced. However much the Church at Ephesus may (Rev. ii. 2), in its earliest days, have merited praise for its 'works, labour, and patience,' yet it appears soon to have 'left its first love,' and to have received in vain the admonition—'Remember, therefore, from whence thou art fallen, and repent and do the first works; or else I will come unto thee quickly, and will remove thy candlestick out of his place, except thou repent.' If any repentance was produced by this solemn warning, its effects were not durable, and the place has long since afforded an evidence of the truth of prophecy, and the certainty of the divine threatenings, as well as a melancholy subject for thought to the contemplative Christian. Its fate is that of the once-flourishing seven churches of Asia: its fate is that of the entire country—a garden has become a desert. Busy centres of civilization, spots where the refinements and delights of the age were collected, are now a prey to silence, destruction, and death. Consecrated first of all to the purposes of idolatry, Ephesus next had Christian temples almost rivalling the pagan in splendour, wherein the image of the great Diana lay prostrate before the cross; and, after the lapse of some centuries, Jesus gives place to Mahomed, and the crescent glittered on the dome of the recently Christian church. A few more scores of years, and Ephesus has neither temple, cross, crescent, nor city, but is 'a desolation, a

dry land, and a wilderness.* Even the sea has retired from the scene of devastation, and a pestilential morass, covered with mud and rushes, has succeeded to the waters which brought up ships laden with merchandise from every part of the known world.

EPHOD, an article of dress worn by the Hebrew priests. [PRIESTS.]

EPHRAIM (*fruitfulness*), the younger son of Joseph, but who received precedence over the elder in and from the blessing of Jacob (Gen. xli. 52; xlviii. 1). That blessing was an adoptive act, whereby Ephraim and his brother Manasseh were counted as sons of Jacob in the place of their father; the object being to give to Joseph, through his sons, a double portion in the brilliant prospects of his house. Thus the descendants of Joseph formed two of the tribes of Israel, whereas every other of Jacob's sons counted but as one. There were thus, in fact, thirteen tribes of Israel; but the number twelve is usually preserved, either by excluding that of Levi (which had no territory), when Ephraim and Manasseh are separately named, or by counting these two together as the tribe of Joseph, when Levi is included in the account. The intentions of Jacob were fulfilled, and Ephraim and Manasseh were counted as tribes of Israel at the departure from Egypt, and as such shared in the territorial distribution of the Promised Land (Num. i. 33; Josh. xvii. 14; 1 Chron. vii. 20).

At the departure from Egypt the population of the two tribes of Ephraim and Manasseh together amounted to 72,700 men capable of bearing arms, greatly exceeding that of any single tribe, except Judah, which had somewhat more. During the wandering their number increased to 95,200, which placed the two tribes much higher than even Judah. At the Exode, Ephraim singly had 40,500, and Manasseh only 32,200; but a great change took place in their relative numbers during the wandering. Ephraim lost 8000, and Manasseh gained 20,500; so that just before entering Canaan, Ephraim stood at 32,500, and Manasseh at 52,700.

One of the finest and most fruitful parts of Palestine, occupying the very centre of the land, was assigned to this tribe. It extended from the borders of the Mediterranean on the west to the Jordan on the east: on the north it had the half-tribe of Manasseh, and on the south Benjamin and Dan (Josh. xvi. 5, sq.; xvii. 7, sq.). This fine country included most of what was afterwards called Samaria, as distinguished from Judaea on the one hand, and from Galilee on the other. The tabernacle and the ark were deposited within its limits, at Shiloh; and the possession of the sacerdotal establishment, which was a central object of attraction to all the other tribes, must in no small degree have enhanced its importance, and increased its wealth and population. The domineering and haughty spirit of the Ephraimites is more than once indicated (Josh. xvii. 14; Judg. viii. 1-3; xii. 1) before the establishment of the regal government; but the particular enmity of Ephraim against the other great tribe of Judah, and the rivalry between them, do not come out distinctly until the establishment of the monarchy. In the election of Saul from the least considerable tribe in Israel, there was nothing to excite the jealousy of

Ephraim; and, after his heroic qualities had conciliated respect, it rendered the new king true allegiance and support. But when the great tribe of Judah produced a king in the person of David, the pride and jealousy of Ephraim were thoroughly awakened, and it was doubtless chiefly through their means that Abner was enabled to uphold for a time the house of Saul; for there are manifest indications that by this time Ephraim influenced the views and feelings of all the other tribes. They were at length driven by the force of circumstances to acknowledge David upon conditions; and were probably not without hope that, as the king of the nation at large, he would establish his capital in their central portion of the land. But when he not only established his court at Jerusalem, but proceeded to remove the ark thither, making his native Judah the seat both of the theocratical and civil government, the Ephraimites became thoroughly alienated, and longed to establish their own ascendancy. The building of the temple at Jerusalem, and other measures of Solomon, strengthened this desire; and although the minute organization and vigour of his government prevented any overt acts of rebellion, the train was then laid, which, upon his death, rent the ten tribes from the house of David, and gave to them a king, a capital, and a religion suitable to the separate views and interests of the tribe. Thenceforth the rivalry of Ephraim and Judah was merged in that between the two kingdoms; although still the predominance of Ephraim in the kingdom of Israel was so conspicuous as to occasion the whole realm to be called by its name, especially when that rivalry is mentioned.

2. EPHRAIM, a city in the wilderness of Judaea, to which Jesus withdrew from the persecution which followed the miracle of raising Lazarus from the dead (John xi. 54). It is placed by Eusebius eight Roman miles north of Jerusalem. This indication would seem to make it the same with the Ephraim which is mentioned in 2 Chron. xiii. 19, along with Bethel and Jeshanah, as towns taken from Jeroboam by Abijah.

3. EPHRAIM, a mountain or group of mountains in central Palestine, in the tribe of the same name, on or towards the borders of Benjamin (Josh. xvii. 15; xix. 50; xx. 7; Judg. vii. 24; xvii. 1; 1 Sam. ix. 4; 1 Kings iv. 8). From a comparison of these passages it may be collected that the name of 'Mount Ephraim' was applied to the whole of the ranges and groups of hills which occupy the central part of the southernmost border of this tribe, and which are prolonged southward into the tribe of Benjamin. In the time of Joshua these hills were densely covered with trees (Josh. xvii. 18), which is by no means the case at present.

4. EPHRAIM, THE FOREST OF, in which Absalom lost his life (2 Sam. xvii. 6-8), was in the country east of the Jordan, not far from Mahanaim. How it came to bear the name of a tribe on the other side the river is not known.

EPHRAATAH, otherwise BETHLEHEM, which see.

EPHRON, a Hittite residing in Hebron, who sold to Abraham the cave and field of Machpelah as a family sepulchre (Gen. xxiii. 6).

EPISTLES. In directing our inquiry first of

all towards the relation in which the Epistles stand to the other component parts of the New Testament, we find that both the Old and New Testament have been arranged by divine wisdom after one and the same plan. All the revelations of God to mankind rest upon history. Therefore in the Old, as well as in the New Testament, the history of the deeds of God stands first, as being the basis of Holy Writ; thereupon follow the books which exhibit the doctrines and internal life of the men of God—in the Old Testament the Psalms, the writings of Solomon, &c., and in the New Testament the Epistles of the Apostles; finally, there follow in the Old Testament the writings of the prophets, whose vision extends into the times of the New Testament; and at the conclusion of the New Testament stands its only prophetic book, the Revelation of John.

In this also we must thankfully adore divine wisdom, that the Epistles, which lay down the doctrines of the Christian religion, originate, not from one Apostle alone, but from all the four principal Apostles; so that one and the same divine truth is presented to our eyes in various forms as it were in various mirrors, by which its richness and manifold character are the better displayed.

The Epistles of the New Testament divide themselves into two parts—the PAULINE and the so-called CATHOLIC.

The PAULINE Epistles are thirteen in number; or fourteen, if we add to them the Epistle to the Hebrews. The very peculiar character of the Pauline Epistles is so striking as to leave not the least doubt of their genuineness. Depth of thought, fire of speech, firmness of character—these many features, joined withal to the indulgence of feelings of the most devoted love and affection, characterize these Epistles. The amiable personal character of the Apostle may be most beautifully traced in his Epistles to the Philippians and to Philemon.

All the Epistles, except the one to the Romans, were called forth by circumstances and particular occasions in the affairs of the communities to which they were addressed. Not all, however, were preserved; it is, at least, evident, from 1 Cor. v. 9, that a letter to the Corinthians has been lost; from Col. iv. 16, it has also been concluded—though probably erroneously, since there perhaps the letter to the Ephesians is referred to—that another letter to the community of Laodicea has likewise been lost. Press of business usually compelled Paul—what was, besides, not uncommon in those times—to use his companions as amanuenses. He mentions (Gal. vi. 11), as something peculiar, that he had written this letter with his own hand. Paul himself exhorted the communities mutually to impart to each other his letters to them, and read them aloud in their assemblies (Col. iv. 16). It is therefore probable that copies of these letters had been early made by the several communities, and deposited in the form of collections.

The letters of Paul may be chronologically arranged into those written before his Roman imprisonment, and those written during and after it; thus beginning with his first letter to the Thessalonians, and concluding with his second to Timothy, embracing an interval of about ten years (A.D. 54-64). In our Bibles, however, the letters are arranged according to the pre-eminent parts

and stations of the communities to whom they were addressed, and conclude with the Epistles to the two bishops and a private letter to Philemon.

THE CATHOLIC EPISTLES.—There is, in the first instance, a diversity of opinion respecting their name: some refer it to their WRITERS (letters from all the other Apostles who had entered the stage of authorship along with Paul); some, again, to their CONTENTS (letters of no special but general Christian tenor); others, again, to the RECIPIENTS (letters addressed to no community in particular). This last opinion is most decidedly justified by passages from the ancient writers. The Pauline Epistles had all their particular directions, while the letters of Peter, James, 1 John, and Jude were circular epistles. The Epistles 2 and 3 John were subsequently added, and included on account of their shortness, and to this collection was given the name CATHOLIC LETTERS, in contradistinction to the PAULINE.

ERASTUS, a Corinthian, and one of Paul's disciples, whose salutations he sends from Corinth to the Church at Rome as those of 'the chamberlain of the city' (Rom. xvi. 23). The words so rendered denote the city treasurer or steward, an officer of great dignity in ancient times. We find this Erastus with Paul at Ephesus, whence he was sent along with Timothy into Macedonia (Acts xix. 22). They were both with the Apostle at Corinth when he wrote, as above, from that city to the Romans: at a subsequent period Erastus was still at Corinth (2 Tim. iv. 20), which would seem to have been the usual place of his abode.

ERECH, one of the cities which formed the beginning of Nimrod's kingdom in the plain of Shinar (Gen. x. 10). It is not said that he built these cities, but that he established his power over them; from which we may conclude that they previously existed. Bochart seeks the name in the Aracca or Aracha of the old geographers, which was on the Tigris, upon the borders of Babylonia and Susiana. Rosenmüller happily conjectures that Erech probably lay nearer to Babylon than Aracca: and this has been lately confirmed by Col. Taylor, the British resident at Bagdad, who is disposed to find the site of the ancient Erech in the great mounds of primitive ruins, indifferently called Irak, Irka, and Senkerah, by the nomade Arabs: and sometimes El Asayiah, 'the place of pebbles.' These mounds, which are now surrounded by the almost perpetual marshes and inundations of the lower Euphrates, lie some miles east of that stream, about midway between the site of Babylon and its junction with the Tigris.

ESAR-HADDON. [ASSYRIA.]

ESAU (*hairy, rough*). The origin and meaning of the name are not quite free from ambiguity; Simon deriving it from a word signifying covered with hair; and some such reason as this implies, seems involved in the passage Gen. xxv. 25. Cruden, however, explains the name as meaning *one who does*, an actor or agent. His surname of Edom (red) was given him, it appears (Gen. xxv. 30), from the red pottage which he asked of Jacob. Esau was the eldest son of Isaac, Abraham's son' (Gen. xxv. 19) by Rebekah, 'the daughter of Bethuel the Syrian of Padan-aram, the sister to Laban the Syrian.'

The marriage remaining for some time (about 19 years; compare xxx. 20, 26) unproductive, Isaac entreated Jehovah, and she became pregnant. Led by peculiar feelings 'to inquire of Jehovah,' Rebekah was informed that she should give birth to twins, whose fate would be as diverse as their character, and, what in those days was stranger still, that the elder should serve the younger. On occasion of her delivery the child that was born first was 'red, all over like an hairy garment; and they called his name Esau.' Immediately afterwards Jacob was born.

In process of time the different natural endowments of the two boys began to display their effects in dissimilar aptitudes and pursuits. While Jacob was led by his less robust make and quiet disposition to fulfil the duties of a shepherd's life, and pass his days in and around his tent, Esau was impelled by the ardour and lofty spirit which agitated his bosom, to seek in the toils, adventures, and perils of the chase, his occupation and sustenance: and, as is generally the case in natures like his, he gained high repute by his skill and daring.

A hunter's life is of necessity one of uncertainty as well as hardship; days pass in which the greatest vigilance and the most strenuous exertions may fail even to find, much less capture, game. Esau had on one occasion experienced such a disappointment, and, wearied with his unproductive efforts, exhausted for want of sustenance, and despairing of capturing any prey, he was fain to turn his steps to his father's house for succour in his extremity. On reaching home he found his brother enjoying a carefully prepared dish of pottage: attracted by the odour of which he besought Jacob to allow him to share in the meal. His brother saw the exigency in which Esau was, and determined not to let it pass unimproved. Accordingly he puts a price on the required food. Esau was the elder, and had in consequence immunities and privileges which were of high value. The surrender of these to himself Jacob makes the condition of his complying with Esau's petition. Urged by the cravings of hunger, alarmed even by the fear of instant death, Esau sold his birth-right to his younger brother, confirming the contract by the sanction of an oath. Jacob having thus got his price, supplied the famishing Esau with needful refreshments.

Arrived now at years of maturity, Esau, when 40 years of age, married two wives, Judith and Basemath. Some unhappy feelings appear to have previously existed in the family; for while Esau was a favourite with his father, in consequence, it appears, of the presents of venison which the youth gave him, Jacob was regarded with special affection by the mother. These partialities, and their natural consequences in unamiable feelings, were increased and exaggerated by Esau's marriage. Even his father's preference of him may have been injuriously affected. The way was thus in some measure smoothed for the transference of the coveted birthright to the younger son.

The time for the fulfilment of the compact between the brothers at length arrived. Isaac is 'sick unto death.' His appetite, as well as his strength, having failed, is only to be gratified by provocatives. He desires some savoury venison,

and gives the requisite instructions to Esau, who accordingly proceeds in quest of it. On this Rebekah begins to feel that the critical time has come. If the hated Hittites are not to enter with her less favoured son into possession of the family property, the sale of the birthright must now in some way be confirmed and consummated. One essential particular remained—the father's blessing. If this should be given to Esau, all hope was gone; for this, like our modern wills, would hand the inheritance and the accompanying headship of the tribe to Esau and his wives.

Isaac, however, had lost his sight—indeed, all his senses were dull and feeble. It was therefore not very difficult to pass off Jacob upon him as Esau. Rebekah takes her measures, and, notwithstanding Jacob's fears, succeeds. Isaac, indeed, is not without suspicion, but a falsehood comes to aid Jacob in his otherwise discreditable personation of Esau. The blessing is pronounced, and thus the coveted property and ascendancy are secured. The affectionate endearments which pass between the deceiver and the abused old blind father, stand in painful contrast with the base trickery by which mother and son had accomplished their end.

Esau, however, returns from the field, approaches his decrepid and sightless father, declaring who he is. 'And Isaac trembled very exceedingly, and said, Who? where is he that hath taken venison and brought it me, and I have eaten of all before thou camest, and have blessed him?—yea, and he shall be blessed. On this Esau becomes agitated, and entreates a blessing for himself—'Bless me, even me also. O my father.' Urging this entreaty again and again, even with tears, Isaac at length said unto him, 'Behold, thy dwelling shall be the fathoms of the earth, and of the dew of heaven from above; and by thy sword shalt thou live, and shalt serve thy brother; and it shall come to pass when thou shalt have the dominion that thou shalt break his yoke from off thy neck' (Gen. xxvii.).

Thus, deprived for ever of his birthright, in virtue of the irrevocable blessing, Esau but too naturally conceived and entertained a hatred of Jacob, and even formed a resolution to seize the opportunity for slaying him, which the days of mourning consequent on the approaching decease of their father would be likely to afford. Words to this effect, which Esau let drop, were repeated to his mother, who thereupon prevailed on her younger son to flee to his uncle Laban, who lived in Haran, there to remain until time, with its usual effect, might have mitigated Esau's wrath. Meanwhile Esau had grown powerful in Idumea, and when, after many years, Jacob intended to return within the borders of the Jordan, he feared lest his elder brother might intercept him on his way, to take revenge for former injuries. He accordingly sent messengers to Esau, in order, if possible, to disarm his wrath. Esau appears to have announced in reply, that he would proceed to meet his returning brother. When, therefore, Jacob was informed that Esau was on his way for this purpose with a band of four hundred men, he was greatly distressed, in fear of that hostility which his conscience told him he had done something to deserve. What then must have been his surprise when he saw Esau running with extended

arms to greet and embrace him? and Esau 'fell on his neck, and kissed him, and they wept.' Jacob had prepared a present for Esau, hoping thus to conciliate his favour; but Esau at first courteously refused the gift—'I have enough, my brother, keep that thou hast unto thyself' (Gen. xxxiii.).

The whole of this rencontre serves to show that if Jacob had acquired riches, Esau had gained power and influence as well as property; and the homage which is paid to him indirectly, and by implication, on the part of Jacob, and directly, and in the most marked and respectful manner, by the females and children of Jacob's family, leads to the supposition that he had made himself supreme in the surrounding country of Idumæa.

Esau from this time appears but very little in the sacred narrative. He was ready to accompany Jacob, or to send with him an escort, probably for protection, but Jacob's fears and suspicions induced him to decline these friendly offers; and they separated on the same day that they met, after an interview in which Jacob's bearing is rather that of an inferior to his lord than that of a brother, and Esau's has all the generousness which a high nature feels in forgiving an injury and aiming to do good to the injurer. The latter, we are merely told, 'returned on his way to Seir' (Gen. xxxiii. 16).

Jacob and Esau appear together again at the funeral rites which were paid to their deceased father; but the book of Genesis furnishes no particulars of what took place.

Esau is once more presented to us (Gen. xxxvi.) in a genealogical table, in which a long line of 'illustrious descendants is referred to 'Esau, the father of the Edomites' (Gen. xxxvi. 43).

ESDRAË'LOH, PLAIN OF. [PALESTINE.]

ES'DRAS, BOOKS OF (APOCRYPHA). In several manuscripts of the Latin Vulgate, as well as in all the printed editions anterior to the decree of the Council of Trent, and in many since that period, there will be found four books following each other, entitled the 1st, 2nd, 3rd, and 4th books of Ezra. The two first are the canonical books of Ezra and Nehemiah, the 3rd and 4th form the subject of the present article. They are the same which are called 1st and 2nd Esdra in the English Authorized Version.

The THIRD BOOK OF EZRA is little more than a recapitulation of the history contained in the canonical Ezra, interspersed with some remarkable interpolations, the chief of which are chap. i., taken from 2 Chron. xxxv. xxxvi., part of the last chapter, from Nehem. viii., and the narration of the themes or sentences of Zorobabel and the two other young men of Darius's body-guard (3 Esd. iii. 4). The book is more properly a version than an original work. It was made use of by Josephus, who cites it largely in his *Antiquities*, but nothing further has been ascertained respecting the age either of the original or the translation.

This book was regarded as apocryphal by Jerome, Augustine, and others of the Fathers. It does not appear to have been included in the catalogue of any council, nor has any portion of it been read in the offices of the church. It was also rejected as apocryphal by the Council of Trent.

The FOURTH BOOK OF EZRA is quite of a different character from the former, and it has been even doubted whether it more properly belongs to the Apocrypha of the Old or the New Testament; but the circumstance of the author's personating the celebrated scribe of that name has been supposed to have led to its obtaining a place in the former. It consists of a number of similitudes or visions, resembling in some passages the Apocalypse. The descriptions are acknowledged to be sometimes most spirited and striking, occasionally rising to great sublimity of thought, energy of conception, and elegance of expression.

With regard to its author and age, Jahn supposes the author to have been a Jew, educated in Chaldea, who borrowed his style from Daniel, and who, having become a Christian, still retained his reverence for Cabalistic traditions. He places him in the first or early in the second century, Archbishop Laurence, on the other hand, conceives that the author was a Jew who never changed his creed.

Dr. Lee is strongly of opinion that the author of this book was contemporary with the author of the book of Enoch, or rather that both these books were written by one and the same author. It does not appear that Josephus was aware of its existence.

ESH'BAAL. [ISHBOSHETH.]

1. ESH'COL (*a cluster*), one of the Amoritic chiefs with whom Abraham was in alliance when his camp was near Hebron, and who joined with him in the pursuit of Chedorlaomer and his allies, for the rescue of Lot (Gen. xiv. 13, 24).

2. ESHCOL. The name of the valley in which the Hebrew spies obtained the fine cluster of grapes which they took back with them, borne 'on a staff between two,' as a specimen of the fruits of the Promised Land (Num. xiii. 24). The cluster was doubtless large; but the fact that it was carried in this manner does not, as usually understood, imply that the bunch was as much as two men could carry, seeing that it was probably so carried to prevent its being bruised in the journey. The valley of Eshcol probably took its name from the distinguished Amorite already mentioned, and is hence to be sought in the neighbourhood of Hebron. Accordingly the valley through which lies the commencement of the road from Hebron to Jerusalem is indicated as that of Eshcol. This valley is now full of vineyards and olive-yards; the former chiefly in the valley itself, the latter up the sides of the enclosing hills. 'These vineyards are still very fine, and produce the finest and largest grapes in all the country.'

ES'THER (*a star*), a damsel of the tribe of Benjamin, born during the Exile, and whose family did not avail itself of the permission to return to Palestine, under the edict of Cyrus. Her parents being dead, Esther was brought up by her uncle Mordecai. The reigning king of Persia, Ahasuerus, having divorced his queen, Vashti, on account of the becoming spirit with which she refused to submit to the indignity which a compliance with his drunken commands involved, search was made throughout the empire for the most beautiful maiden to be her successor. Those whom the officers of the harem deemed the most beautiful were removed thither, the eventual choice among them remaining with the king him-

self. That choice fell on Esther, who found favour in the eyes of Ahasuerus, and was advanced to a station enviable only by comparison with that of the less favoured inmates of the royal harem. Her Jewish origin was at the time unknown; and hence, when she avowed it to the king, she seemed to be included in the doom of extirpation which a royal edict had pronounced against all the Jews in the empire. This circumstance enabled her to turn the royal indignation upon Haman, the chief minister of the king, whose resentment against Mordecai had led him to obtain from the king this monstrous edict. The laws of the empire would not allow the king to recall a decree once uttered; but the Jews were authorized to stand on their defence; and this, with the known change in the intentions of the court, averted the worst consequences of the decree. The Jews established a yearly feast in memory of this deliverance, which is observed among them to this day [PURIM]. Such is the substance of the history of Esther, as related in the book which bears her name.

It should be observed that Esther is the name which the damsel received upon her introduction into the royal harem, her Hebrew name having been HADASAH, *myrtle* (Esth. ii. 7). Esther is most probably a Persian word. According to the second Targum on Esther, 'She was called Esther from the name of the star Venus, which in Greek is *Aster*.'

The difficulties of the history of the book of Esther, especially as regards the identity of the king, have been examined under Ahasuerus, and are also noticed in the following article.

ESTHER, BOOK OF, historical books of Scripture, called by the Jews *Megillah Esther*. In the Christian Church it has been also called *Ahasuerus*.

The Jews hold this book in veneration next to the books of Moses, and there appears to be no authentic foundation for the statement of Richard Baxter (*Saint's Rest*, part iv.), that the book of Esther was treated so ignominiously by the Jews that they were in the habit of throwing it on the ground before reading it.

As the subject of this book has been treated of under the article Ahasuerus, it will be sufficient to refer to that head; only we may here observe that the book of Esther has this peculiarity among the historical books, that although the author, a Persian Jew, records a remarkable preservation from destruction of that portion of his countrymen which remained in Persia after the exile, he does not refer their deliverance to the act of God, whose name is not even once mentioned. This has been explained by supposing that the author wished to avoid giving offence to the Persians, or that the whole was taken from the Persian annals, which are appealed to, ch. x. 2.

The age and authorship of Esther is a question involved in much difficulty. Of the author nothing is known, nor have we any data on which to form a reasonable conjecture.

Some doubts have been thrown on the canonical authority of this book, but whatever hesitation may have been felt by some of the Christian fathers as to its authenticity, it does not appear that it was ever doubted by the Jews or by the Christian Church in its collective capacity.

ETAM, a town in the tribe of Judah, which

was decorated by Solomon with gardens and streams of water, and fortified by Rehoboam along with Bethlehem and Tekoa (1 Chron. iv. 3, 32; 2 Chron. xi. 6). From this place, according to the Rabbins, water was carried by an aqueduct to Jerusalem. Dr. Robinson inclines to find Etam at a place about a mile and a half south of Bethlehem, where there is a ruined village called Urtas, at the bottom of a pleasant valley of the same name. Here there are traces of ancient ruins, and also a fountain, sending forth a copious supply of fine water, which forms a beautiful purling rill along the bottom of the valley. It is usually supposed that 'the rock Etam,' to which Samson withdrew (Judg. xv. 8, 11), was near the town of the same name. Urtas seems too far inland for this; there is, however, a little to the east, the Frank mountain, which (this consideration apart) would have furnished just such a retreat as the hero seems to have found.

ETHAM, the third station of the Israelites when they quitted Egypt [Exodus].

1. ETHAN (*firm*), one of four persons ('Ethan the Ezrahite, and Heman, and Chalcol, and Darda, the sons of Mahol') who were so renowned for their sagacity that it is mentioned to the honour of Solomon that his wisdom excelled theirs. In 1 Kings iv. 31, Ethan is distinguished as 'the Ezrahite,' from the others, who are called 'sons of Mahol'—unless, indeed, this word *Mahol* be taken not as a proper name, but appellatively, for 'sons of music, dancing,' &c., in which case it would apply to Ethan as well as to the others. This interpretation is strengthened by our finding the other names associated with that of Ethan in 1 Chron. ii. 6, as 'sons of Zerah,' i. e. of Ezra, the same as Ezrahites. The evidence of identity afforded by this collocation of names is too strong to be resisted; and we must therefore conclude that Ethan and the others, the tradition of whose wisdom had descended to the time of Solomon, are the same who, in 1 Chron. ii. 6, appear as sons of Zerah, who was himself the son of the patriarch Judah. With this agrees the Jewish chronology, which counts them as prophets during the sojourn in Egypt.

2. ETHAN, a Levite, the son of Kishi, and one of the masters of the Temple music (1 Chron. vi. 44; xv. 17), to whom the 69th Psalm is ascribed, and whom some interpreters suppose to be the Ethan of 1 Kings iv. 31, to whose wisdom that of Solomon is compared.

ETH'ANIM. [TISKI.]

ETHIOPIA is the name by which the English and most other versions render the Hebrew CUSH. As used among the Greeks and Romans, the word was employed, in all the latitude of its etymological meaning, to denote any of the countries where the people are of a sable, sun-burnt complexion. But we have shown in the article CUSH (to which we refer the reader) that its use in the language of Scripture is much more restricted, and that while it may sometimes include part of Southern Arabia, it for the most part exclusively designates the 'Ethiopia of Africa,' which is the subject of the present article.

By Ethiopia, or African Cush, in the widest acceptation of the name, the Hebrews understood

the whole of the region lying south of Egypt above Syene, the modern Assuan (Ezek. xxix. 10; xxx. 6). Its limits on the west and south were undefined; but they probably regarded it as extending eastward as far as the Red Sea, if not as including some of the islands in that sea, such as the famous Topaz Isle (Job xxviii. 19). It thus corresponded, though only in a vague and general sense, to the countries known to us as Nubia and Abyssinia, so famous for the Nile and other great rivers.

But that part of the vast region of Cush which seems chiefly intended in these and most other passages of Scripture is the tract of country in Upper Nubia, which became famous in antiquity as the *kingdom of Ethiopia*, or the state of Meroë. The Ethiopian nations generally ranked low in the scale of civilization; nevertheless (to use the language of Heeren), there did exist a better cultivated, and, to a certain degree, a civilized Ethiopian people; who dwelt in cities; who erected temples and other edifices; who, though without letters, had hieroglyphics; who had government and laws; and the fame of whose progress in knowledge and the social arts spread in the earliest ages over a considerable part of the earth. Meroë Proper lay between the river Astaboras (now the Athara or Tacazzé) on the east, and the Nile on the west. Though not completely enclosed with rivers, it was called an island, because, as Pliny observes, the various streams which flowed around it were all considered as branches of the Nile. Its surface exceeded that of Sicily more than a half, and it corresponded pretty nearly to the present province of Athara, between 13° and 18° N. lat. In modern times it formed a great part of the kingdom of Sennar, and the southern portion belongs to Abyssinia. Upon the island of Meroë lay a city of the same name, the metropolis of the kingdom, the site of which has been discovered near a place called Assur, about twenty miles N. of the town of Shendy, under 17° N. lat. The splendid ruins of temples, pyramids, and other edifices found here and throughout the district attest the high degree of civilization and art among the ancient Ethiopians.

According to Josephus, the ancient name of Meroë was Seba. Now in the Scriptures this country of African Seba is classed with the Arabian Sebas as a rich but far-distant land (Ps. lxxii. 10). In Isa. xliii. 3. God says to Israel, 'I have given Egypt for thy ransom; Cush and Seba in thy stead'; and in Isa. xlv. 14, 'The wealth of Egypt, and the merchandise of Cush and of the Sebaïm, men of stature, shall pass over to thee and shall be thine.'

In the age of Herodotus, the countries known to us as Nubia and Sennar were occupied by two different races, one of whom he includes under the general appellation of Ethiopians, the other an immigratory Arabian race leading, for the most part, a nomadic life. This distinction has continued down to the present day. Among the aboriginal inhabitants the first place is due to the Nubians, who are well-formed, strong, and muscular, and with nothing whatever of the negro physiognomy. They go armed with spear, sword, and a shield of the skin of the hippopotamus. South of Dongola is the country of the Schegias, whose warriors are horsemen, also

armed with a double-pointed spear, a sword, and a large shield (comp. Jer. xli. 9, the 'Cushites who handle the shield'). They were completely independent till subdued by Mehemet Ali, pacha of Egypt. It is in their country that the pyramidal monuments which adorned the ancient Meroë are first met with. Next comes the territory of the Berbers, strictly so called, who, though speaking Arabic, evidently belong to the Nubian race. Above these regions beyond the Tacazzé and along the Nile the great mass of the inhabitants, though sometimes with a mixture of other blood, may be regarded as of Arab origin. But between the valley of the Nile and the Red Sea there is still, as of old, a variety of scattered aboriginal tribes, among whom the Arabic is much less common. Some of them spread themselves over the plains of the Astaboras, or Tacazzé, being compelled to remove their encampments, sometimes by the inundations of the river, at other times by the attacks of the dreaded zimb, or gad-fly, described by Bruce, and which he supposes to be the 'fly which is in the utmost part of the rivers of Egypt' (Isa. vii. 18). Another remarkable Ethiopic race in ancient times was the *Macrobians*, so called from their supposed longevity. They were represented by the ambassadors of Cambyses as a very tall race, who elected the highest in stature as king; gold was so abundant that they bound their prisoners with golden fetters—circumstances which again remind us of Isaiah's description of Ethiopia and Seba in ch. xlv. 14.

With regard to the ancient civilization of Ethiopia Proper, or the kingdom of Meroë, it was closely connected with the religion of the country, which was the worship of Ammon and his kindred deities, and the 'Oracles of Ammon' were its main support. The government was in the hands of a race or caste of priests, who chose from among themselves a king; and this form continued down to the reign in Egypt of the second Ptolemy, when Ergamenes, at that time king, massacred the priests in their sanctuary, and became absolute monarch.

Of the history of Ethiopia, previous to that last revolution, only scanty information has been preserved, but it is enough to evince its high antiquity and its early aggrandizement. In the Persian period it was certainly an independent and important state, which Cambyses in vain endeavoured to subdue. But its most flourishing era was between the years a.c. 800 and 700, when arose three potent kings, Sabaco, Sevechus, and Tarhako, or Tirhakah, who extended their conquests over a great part of Egypt. Sevechus is supposed to have been the So or Saa king of Egypt, to whom an embassy was sent by Hoshea, king of Israel (2 Kings xvii. 4), whose reign ended b.c. 722. He was thus the contemporary of Salmanassar, king of Assyria, as was Tirhakah of the next Assyrian monarch, Sennacherib, who (about the year a.c. 714) was deterred from the invasion of Egypt merely by the rumour that Tirhakah was advancing against him (2 Kings xix. 9). There seems no reason to doubt that the remarkable prophecy in the 18th chapter of Isaiah was addressed to Tirhakah and his people, to announce to them the sudden overthrow of the Assyrian host before Jerusalem. In verse 7 almost *verbatim*, it is intimated that, struck at

the mighty deeds of the God of Judah, this distant people should send gifts to his dwelling-place at Zion. They were, no doubt, among the 'many' who are described in 2 Chr. xxxii. 23, as having 'brought gifts unto J-hovah at Jerusalem, and presents to king Hezekiah, so that he was magnified in the sight of all the nations.' But it is remarked by Gesenius that the expectation of the entire conversion of the Ethiopians is frequently expressed by the Hebrew prophets (Isa. xlv. 14; Zeph. iii. 10; Ps. lxxviii. 32; lxxxvii. 4); and he adds, 'Those who take pleasure in tracing the fulfilment of such predictions in subsequent history may find it in Acts viii. 27 (the conversion both to Judaism and Christianity of the treasurer of Queen Candace), and still more in the circumstance that Abyssinia is to this day the only great Christian state in the eastern world.'

If we go back about two centuries, to the reign of Asa, king of Judah (B.C. 950), we read of Zerah, or rather Zerach, an Ethiopian going out against him with a host of a thousand thousand men and three hundred chariots (2 Chron. xiv. 9). It is doubtful whether this was an Ethiopian monarch or commander, or only a mere Cushite adventurer; but that his army was mainly of African and not Arabian original is evident from the fact of its having included Libyans as well as Cushites (2 Chron. xvi. 8), and from the mention of war-chariots, which never were in use in Arabia. Further back than this the records of history are silent.

The state of Meroë appears to have resembled the larger states in the interior of Africa at the present day, comprising a number of different races or tribes united together by no strong political bond, but by a common form of worship, which placed the rule in the hands of the priesthood, the dominant caste of the country. There is every reason to conclude that the separate colonies of the priest-caste spread from Meroë into Egypt; and the primeval monuments in Ethiopia strongly confirm the native traditions reported by Diodorus Siculus, that the worship of Ammon and Osiris originated in Meroë, and thus render highly probable the opinion that commerce and civilization, science and art, descended into Egypt from Nubia and the upper regions of the Nile. One great cause of the early prosperity and grandeur of Ethiopia was the carrying-trade, of which it was the centre, between India and Arabia on the one hand, and the interior of Africa, and especially Egypt, on the other.

Queen Candace, who is mentioned in Acts viii. 27, was doubtless the reigning sovereign of Meroë [CANDACE], where it is likely a form of Judaism was at that period professed by a portion of the inhabitants, as seems to have been the case in the adjacent region of Abyssinia. The prophets (e.g. Isa. xi. 11) sometimes allude to the Jews who were scattered throughout Cush. Ebed-melech, the benevolent eunuch of King Zedekiah, who showed such kindness to the prophet Jeremiah, was an Ethiopian (Jer. xxxviii. 7; comp. Acts viii. 27). Josephus calls the queen of Sheba, who visited Solomon, a queen of Egypt and Ethiopia, and with this agrees the tradition of the Abyssinians. But Sheba was undoubtedly in Arabia Felix, though it is possible that, in

remote antiquity, the sovereignty of its monarchs extended across the Red Sea to the coast of Ethiopia.

EVANGELISTS. This term is applied in the New Testament to a certain class of Christian teachers who were not fixed to any particular spot, but travelled either independently, or under the direction of one or other of the Apostles, for the purpose of propagating the Gospel. Philip, one of the seven deacons, is termed the *Evangelist* (Acts xxi. 8). St. Paul exhorts Timothy 'to do the work of an *Evangelist*' (2 Tim. iv. 5); and though this name is not given to Titus, the injunctions addressed to him, and the services he rendered, are so similar as to render the propriety of applying it to him unquestionable. In the Epistle to the Ephesians (iv. 11) the *Evangelists* are expressly distinguished from the *pastors* and *teachers*. The chief points of difference appear to be that the former were itinerant, the latter stationary; the former were employed in introducing the Gospel where it was before unknown; the business of the latter was to confirm and instruct the converts statedly and permanently.

EVE (*living*), the name of the first woman. Her history is contained in that of ADAM, which see.

EVENING. [DAY.]

EVIL MERO'DACH, son and successor of Nebuchadnezzar, king of Babylon, who, on his accession to the throne (B.C. 562), released the captive king of Judah, Jehoiachin, from prison, treated him with kindness and distinction, and set his throne above the thrones of the other conquered kings who were detained at Babylon (2 Kings xxv. 27; Jer. lii. 31-34) [CHALDEANS]. A Jewish tradition (noticed by Jerome on Isa. xiv. 29) ascribes this kindness to a personal friendship which Evil-merodach had contracted with the Jewish king, when he was himself consigned to prison by Nebuchadnezzar, who, on recovering from his seven years' monomania, took offence at some part of the conduct of his son, by whom the government had in the meantime been administered. But this story was probably invented to account for the fact.

EUNICE, the mother of Timothy, a Jewess, although married to a Greek and bearing a Greek name, which signifies *good victory*. She was a believer in Christ, and even her mother Lois lived in the faith of the expected Messiah, if she did not live to know that he had come in the person of Jesus of Nazareth (2 Tim. i. 5; Acts xvi. 1).

EUNUCH. This word, which we have adopted from the Greek, has, in its literal sense, the harmless meaning of 'bed-keeper,' i. e. one who has the charge of beds and bed-chambers; but as only persons deprived of their virility have, from the most ancient times, been employed in Oriental harems, and as such persons are employed almost exclusively in this kind of service, the word 'bed-keeper' became synonymous with 'castratus.' In fact there are few eastern languages in which the condition of those persons is more directly expressed than by the name of some post or station in which they are usually found. The admission to the recesses of the harem, which is in fact the domestic establishment of the prince, gives the eunuchs

such peculiar advantages of access to the royal ear and person, as often enables them to exercise an important influence, and to rise to stations of great trust and power in Eastern courts. Hence it would seem that, in Egypt, for instance, the word which indicated an eunuch was applied to any court officer, whether a castratus or not (Gen. xxxvii. 36; xxxix. 1).

Authority would be superfluous in proof of a matter of such common knowledge as the employment of eunuchs, and especially of black eunuchs, in the courts and harems of the ancient and modern East. A noble law, which, however, evinces the prevalence of the custom prior to Moses, made castration illegal among the Jews (Lev. xxi. 20; Dent. xxiii. 1). But the Hebrew princes did not choose to understand this law as interdicting the use of those who had been made eunuchs by others; for that they had them, and that they were sometimes, if not generally, blacks, and that the chief of them was regarded as holding an important and influential post, appears from 1 Kings xxii. 9; 2 Kings viii. 6; ix. 32, 33; xx. 18; xxiii. 11; Jer. xxxviii. 7; xxxix. 16; xli. 16. Samuel was aware that eunuchs would not fail to be employed in a royal court; for he thus forewarns the people, 'He (the king) will take the tenth of your seed and of your vineyard, and give to his eunuchs [A. V. 'officers'] and to his servants' (1 Sam. vii. 15).

Under these circumstances, the eunuchs were probably obtained from a great distance, and at an expense which must have limited their employment to the royal establishment; and this is very much the case even at present.

In Matt. xix. 12, the term 'eunuch' is applied figuratively to persons naturally impotent. In the same verse mention is also made of persons 'who have made themselves eunuchs for the kingdom of heaven's sake'; which is a manifestly hyperbolic description of such as lived in voluntary abstinence (comp. Matt. v. 29, 30); although painful examples have occurred (as in the case of Origen) of a disposition to interpret the phrase too literally.

EUDIAS, a female member of the church at Philippi, who seems to have been at variance with another female member named Syntyche. Paul describes them as women who had 'laboured much with him in the Gospel,' and implores them to be of one mind (Phil. iv. 2, 3).

EUPHRATES, termed in Deut. i. 7, 'the great river,' where it is mentioned as the eastern boundary of the land which (ver. 8) God gave to the descendants of Abraham. In Gen. ii. 14, the Euphrates is stated to be the fourth of the rivers which flowed from a common stream in the garden of Eden. Divines and geographers have taken much trouble in order to learn the position of Eden from the geographical particulars given in the Bible, without remembering that probably nothing more than a popular description was intended.

In consequence of its magnitude and importance, the Euphrates was designated and known as 'the river,' being by far the most considerable stream in Western Asia. Thus in Exod. xxiii. 31, we read, 'from the desert unto the river' (comp. Isa. viii. 7).

It has two sources and two arms—a western

and an eastern—which rise in the mountains of Armenia. Of these streams the western is the shorter, and is called Kara Sou or Melas; the eastern is itself made up of several streams, the longest of which bears the name of Murad, or Phrat. The two arms unite about three days' journey from Erzeroum, near which rise two of the tributaries that concur in forming the Phrat. Thus uniting, they give rise to the Euphrates strictly so called, which, flowing to the south, divides Armenia from Cappadocia; but, being driven westward by the Anti-Taurus and Taurus mountains, it works its circuitous way through narrow passes and over cataracts, until, breaking through a defile formed by the eastern extremity of Mons Amanus (Alma Dag), and the north-western extremity of Mons Taurus, it reaches the plain country not far from Samosata (Schenisat), then winds south and south-east, passing the north of Syria, and the north-east of Arabia Deserta, and at length, after many windings, unites with the Tigris, and thus united finds its termination in the Persian Gulf. In conjunction with the Tigris, it forms the rich alluvial lands of Mesopotamia, over which it flows or is carried by canals, and thus diffuses abroad fertility and beauty. At Bagdad and Hillah (Babylon), the Euphrates and Tigris approach comparatively near to each other, but separate again, forming a kind of ample basin, till they finally become one at Koorma. Under the Cæsars the Euphrates was the eastern boundary of the Roman empire, as under David it was the natural limit of the Hebrew monarchy.

Although occasionally much more, the breadth of the Euphrates varies between 200 and 400 yards; but for a distance of 60 miles through the Lemlun marshes the main stream narrows to about 80 yards. The general depth of the Upper Euphrates exceeds 8 feet, but is shallow enough in some places for laden camels to pass in autumn, the water rising to their bellies, or about 4½ feet. In point of current it is for the most part a sluggish stream; for, except in the height of the flooded season, when it approaches 5 miles an hour, it varies from 2½ to 3½, with a much larger portion of its course under 3 than above. The length of the navigable part of the river, reckoning from Bir to Bussora, is 143 miles; the length of the entire stream, 1400 miles. It is very abundant in fish. The water is somewhat turbid; but, when purified, is pleasant and salubrious.

The river begins to rise in March, and continues rising till the latter end of May. The consequent increase of its volume and rapidity is attributable to the early rains, which, falling in the Armenian mountains, swell its mountain tributaries; and also in the main to the melting of the winter snows in these lofty regions. About the middle of November the Euphrates has reached its lowest ebb, and ceasing to decrease, becomes tranquil and sluggish.

In ancient as well as in modern times the Euphrates was used for navigation. Herodotus states that boats—either coracles or rafts, floated by inflated skins—brought the produce of Armenia down to Babylon. The trade thus carried on was considerable. A great deal of navigation is still carried on from Bagdad to Hillah, the ancient Babylon; but the disturbed state of the country prevents any above the latter place.

The prophets made use of the Euphrates as a figurative description of the Assyrian power, as the Nile with them represented the power of Egypt; thus in Isa. viii. 7, 'The Lord bringeth up upon them the waters of the river, strong and many, even the king of Assyria' (Jer. ii. 18).

EÜROCLYDON. [WINDS.]

EUTYCHUS, a young man of Troas, who sat in the open window of the third floor while St. Paul was preaching late in the night, and who, being overcome by sleep, fell out into the court below. He was 'taken up dead;' but the Apostle, going down, extended himself upon the body and embraced it, like the prophets of old (1 Kings xvii. 21; 2 Kings iv. 34); and when he felt the signs of returning life, restored him to his friends, with the assurance that 'his life was in him.' Before Paul departed in the morning the youth was brought to him alive and well. It is disputed whether Eutychus was really dead, or only in a swoon; and hence, whether a miracle was performed or not. It is admitted that the circumstances, and the words of Paul himself, sanction the notion that the young man was not actually dead; but, on the other hand, it is contended that the words of the narrator, 'taken up dead,' are too plain to justify us in receiving them in the modified sense of 'taken up for dead,' which that interpretation requires (Acts xx. 5-12).

EXECRATION. The Greek word so rendered occurs in Num. xiii. 8; xxiv. 9; Josh. vi. 26; 1 Sam. xvii. 43. It is used also in profane authors to denote the imprecations which it was customary among ancient nations to pronounce upon their enemies for the purpose of calling down the divine wrath, branding them with infamy, and exciting against them the passions of the multitude. These imprecations were chiefly pronounced by priests, enchanters, or prophets [BALAAM]. The Athenians made use of them against Philip of Macedon. They convened an assembly, in which it was decreed that all statues, inscriptions, or festivals among them, in any way relating to him or his ancestors, should be destroyed, and every other possible reminiscence of him profaned; and that the priests, as often as they prayed for the success of the Athenian affairs, should pray for the ruin of Philip. It was also customary, both among the Greeks and Romans, after having destroyed cities in war, the revival of whose strength they dreaded, to pronounce execrations upon those who should rebuild them. The Romans published a decree full of execrations against those who should rebuild Carthage. An incident somewhat analogous is related (Josh. vi. 26) after the taking of Jericho. From the words 'and Joshua adjured them at that time,' it is likely that he acted under a divine intimation that Jericho should continue in ruins, as a monument of the divine displeasure and a warning to posterity. The words 'cursed be the man (the individual)' before the Lord that riseth up and buildeth this city Jericho,' although transformed into an execration by the word *applied* by the translators, amount to no more than a prediction that 'he shall lay the foundation thereof in his first-born, and in his youngest son shall he set up the gates of it,' that is, he shall meet with so many impediments to his undertaking that he shall *out-live* all his children, *dying in the course of nature* be-

fore he shall complete it. Execrations were also pronounced upon cities and their inhabitants before undertaking a siege, and before engaging with enemies in war. The execrations in the 83rd Psalm, probably written on the occasion of the confederacy against Jehoshaphat, and other instances of a like nature, partake of the execrations of the heathen in nothing but form, being the inspired predictions or denunciations of divine vengeance against the avowed enemies of the God of Israel, notwithstanding the proofs they had witnessed of his supremacy; and the object of these imprecations, as in many other instances, is charitable, namely, their conversion to the true religion (ver. 18; see also Ps. lix. 12).

EXO'DUS. The intention of Jehovah to deliver the Israelites from Egyptian bondage was made known to Moses from the burning bush at Mount Horeb, while he kept the flock of Jethro, his father-in-law. Under the divine direction Moses, in conjunction with Aaron, assembled the elders of the nation, and acquainted them with the gracious design of Heaven. After this they had an interview with Pharaoh, and requested permission for the people to go, in order to hold a feast unto God in the wilderness. The result was, not only refusal, but the doubling of all the burdens which the Israelites had previously had to bear. Moses hereupon, suffering reproach from his people, consults Jehovah, who assures him that he would compel Pharaoh 'to drive them out of his land.' 'I will rid you out of their bondage, and I will redeem you with a stretched-out arm and with great judgments' (Exod. iii.-vi. 6). Then ensue a series of miracles, commonly called the plagues of Egypt (Exod. vii.-xii.) [PLAGUE]. At last, overcome by the calamities sent upon him, Pharaoh yielded all that was demanded, saying, 'Rise up, and get you forth from among my people, both ye and the children of Israel; and go serve the Lord as ye have said; also take your flocks and your herds, and be gone.' Thus driven out, the Israelites, to the number of about 600,000 adults, besides children, left the land, attended by a mixed multitude, with their flocks and herds, even very much cattle (Exod. xii. 31, sq.). Being 'thrust out' of the country, they had not time to prepare for themselves suitable provisions, and therefore they baked unleavened cakes of the dough which they brought forth out of Egypt.

On the night of the self-same day which terminated a period of 430 years, during which they had been in Egypt, were they led forth from Rameses, or Goshen [GOSHEN]. They are not said to have crossed the river Nile, whence we may infer that Goshen lay on the eastern side of the river. Their first station was at Succoth (Exod. xii. 37). The nearest way into the Land of Promise was through the land of the Philistines. This route would have required them to keep on in a north-east direction. It pleased their divine conductor, however, not to take this path, lest, being opposed by the Philistines, the Israelites should turn back at the sight of war into Egypt. If, then, Philistia was to be avoided, the course would lie nearly direct east, or south-east. Pursuing this route, 'the armies' come to Etham, their next station, 'in the edge of the wilderness' (Exod. xiii. 17, sq.). Here they encamped. Dispatch, however, was desirable. They journey

day and night, not without divine guidance, for 'the Lord went before them by day in a pillar of a cloud, to lead them the way; and by night in a pillar of fire, to give them light; to go by day and night.' This special guidance could not well have been meant merely to show the way through the desert; for it can hardly be supposed that in so great a multitude no persons knew the road over a country lying near to that in which they and their ancestors had dwelt, and which did not extend more than some forty miles across. The divine guides were doubtless intended to conduct the Israelites in that way and to that spot where the hand of God would be most signally displayed in their rescue and in the destruction of Pharaoh. 'I will be honoured upon Pharaoh and upon all his host, that the Egyptians may know that I am the Lord.' For this purpose Moses is directed of God to 'speak unto the children of Israel that they turn and encamp before Pi-hahiroth, between Migdol and the sea, over against Baalzephon; before it shall ye encamp by the sea, and they did so' (Exod. xiv. 2-4). We have already seen reason to think that the direction of the Israelites was to the east or south-east; this turning must have been in the latter direction, else they would have been carried down towards the land of the Philistines, which they were to avoid. Let the word 'turn' be marked; it is a strong term, and seems to imply that the line of the march was bent considerably towards the south, or the interior of the land. The children of Israel then are now encamped before Pi-hahiroth, between Migdol and the sea, also 'by the sea.' Their position was such that they were 'entangled in the land, the wilderness had shut them in.'

A new scene is now laid open. News is carried to Pharaoh which leads him to see that the reason assigned (namely, a sacrifice in the wilderness) is but a pretext; that the Israelites had really fled from his yoke; and also that, through some (to him) unaccountable error, they had gone towards the south-east, had reached the sea, and were hemmed in on all sides. He summons his troops and sets out in pursuit—'all the horses and chariots of Pharaoh, and his horsemen and his army,' and he 'overtook them encamping by the sea, beside Pi-hahiroth, before Baalzephon' (Exod. xiv. 9). The Israelites see their pursuing enemy approach, and are alarmed. Moses assures them of divine aid. A promise was given as of God that the Israelites should go on dry ground through the midst of the sea; and that the Egyptians, attempting the same path, should be destroyed: 'and I will get me honour upon Pharaoh and all his host, upon his chariots and his horsemen' (ver. 17). Here a very extraordinary event takes place: 'The angel of God, which went before the camp of Israel, removed and went behind them; and the pillar of the cloud went from before their face and stood behind them; and it came between the camp of the Egyptians and the camp of Israel; and it was a cloud and darkness to them, but it gave light by night to these; so that the one came not near the other all the night' (ver. 19, 20). Then comes the division of the waters, which we give in the words of the sacred historian: 'And Moses stretched out his hand over the sea, and the Lord caused the sea to go back by a strong

east wind all that night, and made the sea dry land, and the waters were divided. And the children of Israel went into the midst of the sea upon the dry ground; and the waters were a wall unto them on their right hand and on their left. And the Egyptians pursued and went in after them to the midst of the sea, even all Pharaoh's horses, his chariots, and his horsemen. Delays are now occasioned to the Egyptians; their chariot-wheels are supernaturally taken off, so that 'in the morning-watch they drove them heavily.' The Egyptians are troubled; they urge each other to fly from the face of Israel. 'Then Moses stretched forth his hand over the sea, and the sea returned to his strength when the morning appeared; and the Egyptians fled against it; and the Lord overthrew the Egyptians in the midst of the sea. And the waters returned and covered the chariots and the horsemen and all the host of Pharaoh that came into the sea after them; there remained not as much as one of them. But the children of Israel walked upon dry land in the midst of the sea, and the waters were a wall unto them on their right hand and on their left. And Israel saw the Egyptians dead upon the sea-shore; and the people feared the Lord, and believed the Lord and his servant Moses' (ver. 28-31).

Such is the bearing and import of the sacred narrative. If any intelligent reader, knowing nothing of the theories of learned men, were to peruse the account given in Exodus with a map before him, he would, we doubt not, be led to conclude that the route of the Israelites lay towards the south-east, up the Red Sea, and that the spot where they crossed was at a place encircled by mountains on the side of the desert, and fronted by deep and impassable waters; he would equally conclude that the writer in Exodus intended to represent the rescue as from first to last the work of God. Had the Israelites been at a place which was fordable under any natural influences, Pharaoh's undertaking was absurd. He knew that they were entangled,—mountains behind and on either hand, while the deep sea was before them. Therefore he felt sure of his prey, and set out in pursuit. Nothing but the divine interposition foiled and punished him, at the same time redeeming the Israelites. And this view, which the unlearned but intelligent reader would be led to take, involves, in fact, all that is important in the case. But a dislike of the miraculous has had an influence, and erudition has tried to fix the precise spot: whence have arisen views and theories which are more or less discordant with the Scripture, or are concerned with comparative trifles. So far as aversion to miracle has had an influence in the hypotheses which have been given, all we shall remark is, that in a case which is so evidently represented as the sphere of miracle, there is but one alternative,—they who do not admit the miracle must reject the narrative; and far better would it be to do so frankly than to construct hypotheses which are for the most part, if not altogether, purely arbitrary. A narrative obviously miraculous (in the intention of the writer) can be explained satisfactorily on no rationalistic principles: this is not to expound but to 'wrest' the Scriptures; a position which, in our opinion, has been fully established, in relation to the Gospels,

against the whole of the rationalistic school of interpretation.

The account now given must, as being derived immediately from the Scripture, be in the main correct. If the authority is denied, this can be done effectually by no other means than by disproving in general the authority of the books whence it is derived; and it may with truth be affirmed, that no view opposed to that given can possess greater claims on our credit, while any mere sceptical opinion must rest on its own intrinsic probability, contested, so far as it opposes the Scripture, by scriptural authority.

When, however, we descend from generals to particulars, and attempt to ascertain precise localities and determine details, diversity of opinion may easily arise, and varying degrees of probability only are likely to attend the investigation. For instance, the immediate spot which Moses proposed to reach was, we know, on the Red Sea; but the precise line which he took depended of course on the place whence he set out. With difference of opinion as to the spot where the Hebrews had their rendezvous, there cannot be agreement as to the route they followed.

The position of Goshen, where the Israelites were settled, we shall endeavour to fix in another article. It is enough here to say, that it was on the eastern side of the Nile, probably in the province of Esh-Shurkiyeh. Rameses was the place of rendezvous. The direct route thence to the Red Sea was along the valley of the ancient canal. By this way the distance was about thirty-five miles. From the vicinity of Cairo, however, there runs a range of hills eastward to the Red Sea, the western extremity of which, not far from Cairo, is named Jebel-Mokattem; the eastern extremity is termed Jebel-Attaka, which, with its promontory Ras Attaka, runs into the Red Sea. Between the two extremes, somewhere about the middle of the range, is an opening which affords a road for caravans. Two routes offered themselves here. Supposing that the actual starting-point lay nearer Cairo, the Israelites might strike in from the north of the range of hills, at the opening just mentioned, and pursue the ordinary caravan road which leads from Cairo to Suez; or they might go southward from Mokattam, through the Wady el Tih, that is, the Valley of Wandering, through which also a road, though less used, runs to Suez. According to Niebuhr, they took the first; according to ancient tradition, they took the last. Sicard found traces of the Israelites in the valley. He held Rameses to be the starting-point, and Rameses he placed about six miles from ancient Cairo, where Bezatin is now found. Here is a capacious sandy plain, on which Sicard thinks the Israelites assembled on the morning when they began their journey. In this vicinity a plain is still found, which the Arabs call the Jews' Cemetery, and where, from an indefinite period, the Jews have buried their dead. In the Mokattam chain is a hill, a part of which is called Mejanat Musa, 'Moses' Station.' On another hill in the vicinity ruins are found, which the Arabs name Meravad Musa, 'Moses' Delight.' Thus several things seem to carry the mind back to the time of the Hebrew legislator. Through the valley which leads from Bezatin (the Valley of Wandering) to the Red Sea, Sicard travelled in three days. He reckons the length to be twenty-

six hours, which, if we give two miles to each hour, would make the distance fifty-two miles. The valley running pretty much in a plain surface would afford a convenient passage to the mixed bands of Israelites. About eighteen miles from Bezatin you meet with Gendelhy, a plain with a fountain. The name signifies a military station, and in this Sicard finds the Succoth (tents) of Exodus, the first station of Moses. The haste with which they left (were driven out) would enable them to reach this place at night-fall of their first day's march. Sicard places their second station, Etham, in the plain Ramliyeh, eighteen miles from Gendelhy and sixteen from the sea. From this plain is a pass, four miles in length, so narrow that not more than twenty men can go abreast. To avoid this, which would have caused dangerous delay, the order was given to turn (Exod. xiv. 2). Etham is said (Exod. xiii. 20) to be on the edge of the wilderness. Jablonski says the word means terminus maris, the termination or boundary of the sea. Now, in the plain where Sicard fixes Etham (not to be confounded with the Eastern Etham, through which afterwards the Israelites travelled three days (Num. xxxiii. 8), is the spot where the waters divide which run to the Nile and to the Gulf of Suez, and Etham is therefore truly the boundary of the sea. Here the Israelites received command to turn and encamp (Exod. xiv. 2) before Pi-hahiroth, between Migdol and the sea, over against Baal-zephon. Pi-hahiroth (the mouth of the hiding-place) Sicard identifies with Thuarek (small caves), which is the name still given to three or four salt springs of the plain Baideah, on the south side of mount Attaka, which last Sicard identifies with Baal-zephon, and which is the northern boundary of the plain Baideah, while Kuiabeh (Migdol) is its southern limit. The pass which leads to Suez, between Attaka and the sea, is very narrow, and could be easily stopped by the Egyptians. In this plain of Baideah, Pharaoh had the Israelites hemmed in on all sides. This then, according to all appearance, is the spot where the passage through the sea was effected. Such is the judgment of Sicard and of Raumer. It cannot be denied that this route satisfies all the conditions of the case. Equally does the spot correspond with the miraculous narrative furnished by holy writ.

It is no small corroboration of the view now given from Sicard and Raumer, that in substance it has the support of Josephus, of whose account we shall, from its importance, give an abridgement. The Hebrews, he says (*Antiq.* ii. 15), took their journey by Latopolis, where Babylon was built afterwards when Cambyzes laid Egypt waste. As they went in haste, on the third day they came to a place called Baal-zephon, on the Red Sea. Moses led them this way in order that the Egyptians might be punished should they venture in pursuit, and also because the Hebrews had a quarrel with the Philistines. When the Egyptians had overtaken the Hebrews they prepared to fight them, and by their multitude drove them into a narrow place; for the number that went in pursuit was 600 chariots, 50,000 horsemen, and 200,000 infantry, all armed. They also seized the passages, shutting the Hebrews up between inaccessible precipices and the sea; for there was on each side a ridge of mountains that terminated

at the sea, which were impassable, and obstructed their flight. Moses, however, prayed to God, and smote the sea with his rod, when the waters parted, and gave the Israelites free passage. The Egyptians at first supposed them distracted; but when they saw the Israelites proceed in safety, they followed. As soon as the entire Egyptian army was in the channel the sea closed, and the pursuers perished amid torrents of rain and the most terrific thunder and lightning.

The opposition to the scriptural account has been of two kinds. Some writers (Wolfenb. *Fragm.* p. 64, sq.) have at once declared the whole fabulous; a course which appears to have been taken as early as the time of Josephus (*Antiq.* ii. 16. 5). Others have striven to explain the facts by the aid of mere natural causes: for which see Winer, *Handwörterbuch*, in Meer Rotes. A third mode of explanation is pursued by those who do not deny miracles as such, and yet, with no small inconsistency, seek to reduce this particular miracle to the smallest dimensions. Writers who see in the deliverance of the Hebrews the hand of God and the fulfilment of the divine purposes, follow the account in Scripture implicitly, placing the passage at Ras Attaka, at the termination of the Valley of Wandering; others, who go on rationalistic principles, find the sea here too wide and too deep for their purpose, and endeavour to fix the passage a little to the south or the north of Suez. In answer to this opinion, we shall content ourselves with quoting the testimony of one or two travellers who have visited and carefully examined the spot.

The following are the remarks of Mr. Blumhardt, who passed through Suez (October, 1836), in his missionary visit to Abyssinia. 'The Red Sea at Suez is exceedingly narrow, and in my opinion it cannot be that the Israelites here experienced the power and love of God in their passage through the Red Sea. The breadth of the sea is at present scarcely a quarter of an hour by Suez. Now if this be the part which they crossed, how is it possible that all the army of Pharaoh, with his chariots, could have been drowned? I am rather inclined to believe that the Israelites experienced that wonderful deliverance about thirty miles lower down. This opinion is also strengthened by most of the Eastern churches, and the Arabs, who believe that the Israelites reached the opposite shore at a place called Gebel Pharaon, which on that account has received this name. If we accept this opinion, it agrees very well with the Scripture.' Still more important is the evidence of Dr. Olin (*Travels in the East*, New York, 1843). He agrees with Robinson in fixing Etham 'on the border of the wilderness which stretches along the eastern shore of the arm of the sea which runs up above Suez.' At this point he says the Hebrews were commanded to turn. They turned directly southward and marched to an exposed position, hemmed in completely by the sea, the desert, and Mount Attaka. A false confidence was thus excited in Pharaoh, and the deliverance was made the more signal and the more impressive alike to the Israelites and to Egypt. Admitting the possibility that the sea at Suez may have been wider and deeper than it is now, Olin remarks, 'it must still have been very difficult, if not impossible, for the army of Israel, encum-

bered with infants and aged people, as well as with flocks, to pass over (near Suez) in face of their enemies.' Besides, the peculiarities of the place must have had a tendency to disguise the character and impair the effect of the miracle. The passage made at the intervention of Moses was kept open all night. The Egyptians followed the Hebrews to the midst of the sea, when the sea engulfed them. 'The entire night seems to have been consumed in the passage. It is hardly credible that so much time should have been consumed in crossing near Suez, to accomplish which one or two hours would have been sufficient.' Nor is it conceivable that the large army of the Egyptians should have been at once within the banks of so narrow a channel. The more advanced troops would have reached the opposite shore before the rear had entered the sea; and yet we know that all Pharaoh's chariots and horsemen followed to the midst of the sea, and, together with all the host that came in after them, were covered with the returning waves' (i. 348). Preferring the position at Ras Attaka, Olin states that the gulf is here ten or twelve miles wide. 'The valley expands into a considerable plain, bounded by lofty precipitous mountains on the right and left, and by the sea in front, and is sufficiently ample to accommodate the vast number of human beings who composed the two armies.' 'An east wind would act almost directly across the gulf. It would be unable to co-operate with an ebb tide in removing the waters—no objection certainly if we admit the exercise of God's miraculous agency; but a very great impediment in the way of any rationalistic hypothesis. 'The channel is wide enough to allow of the movements described by Moses, and the time, which embraced an entire night, was sufficient for the convenient march of a large army over such a distance.' 'The opinion which fixes the point of transit in the valley or wady south of Mount Attaka derives confirmation from the names still attached to the principal objects in this locality. Jebel Attaka means in the language of the Arabs 'The Mount of Deliverance.' Baideah or Bedeah, the name of this part of the valley, means 'the Miraculous,' while Wady el Tih means 'the Valley of Wanderings.' Pi-hahiroth, where Moses was commanded to encamp, is rendered by scholars 'the mouth of Hahiroth,' which answers well to the deep gorge south of Attaka, but not at all to the broad plain about Suez.'

Other parts of the line of march pursued by the Israelites will be found treated of under the heads MANNA, SINAI, WANDERING.

EXODUS, the second book of Moses, so called from the principal event recorded in it, namely, the departure of the Israelites from Egypt. With this book begins the proper history of that people, continuing it until their arrival at Sinai, and the erection of the sanctuary there. It transports us in the first instance to Egypt, and the quarter in which the Israelites were domiciled in that country. We do not find in the Pentateuch a real history of the people of Israel during this period. Such a history, in the more strict acceptation of the term, has no place in an historical sketch of the kingdom of God, where the mere description of the situation and condition of the people is all that is requisite. From that description we learn

satisfactorily how the people of the Lord were negatively prepared for the great object which God had decreed with regard to them. This is the important theme of the history of the Pentateuch during the whole long period of four hundred years. Exodus is very circumstantial in its account of the life of Moses, which, instead of partaking of the character of usual biography, manifests in all its details a decided aim of evincing how, by the miraculous dispensation of the Lord, Moses had been even from his earliest years prepared and reared to become the chosen instrument of God. In this book is developed, with particular clearness, the summons of Moses to his sacred office, which concludes the first important section of his life (Exod. i.-vi.). No human choice and no self-will, but an immediate call from Jehovah alone could decide in so important an affair. Jehovah reveals himself to him by his covenant-name, and vouchsafes him the power to work miracles such as no man before him had ever wrought. It was not the natural disposition and bent of his mind that induced Moses to accept the office, but solely his submission to the express will of God, his Obedience alone, that influenced him, the LAWGIVER, to undertake the mission. The external relation of Moses to his people is also clearly defined (comp. *ex. gr.* Exod. vi. 14, sq.). This furnishes the firm basis on which is founded his own as well as Aaron's personal authority, and the respect for his permanent regulations. A new section (vii.-xv.) then gives a very detailed account of the manner in which the Lord glorified himself in Israel, and released the people from the land of bondage. This section of the history then concludes with a triumphal song, celebrating the victory of Israel. In ch. xvi.-xviii. we find the introduction to the second principal part of this book, in which is sketched the manifestation of God in the midst of Israel, as well as the promulgation of the law itself, in its original and fundamental features. This preparatory section thus furnishes us with additional proof of the special care of God for his people; how he provided them from the assaults of their foes. In ch. xv. 22, sq., not all, but only the remarkable resting-places are mentioned, where Jehovah took special care of his people. In the account (xviii.) of the civil regulations framed by the advice of Jethro, a strong line of demarcation is drawn between the changeable institutions of man and the divine legislation which began then to be established, and which thenceforth claims by far the greatest part of the work. At the commencement of the legislation is a brief summary of the laws, with the decalogue at their head (xix.-xxiii.). The decalogue is the true fundamental law, bearing within itself the germ of the entire legislation. The other legal definitions are only further developments of the decalogue. These definitions manifest the power and extent of the law itself, showing what an abundance of new regulations result from the simple and few words of the decalogue. Upon this basis the covenant is concluded with the Israelites, in which God reveals himself in agreement with the understanding and the exigencies of the people. Not until this covenant was completed did it become possible for the Israelites to enter into a communion

with God, confirmed and consecrated by laws and offerings, and thereby to receive further revelations from him (ch. xxiv.). Whatsoever after this, in the twenty-fifth and in the following chapters, is communicated to the people, concerns the dwelling of God in the midst of Israel. By this dwelling of God among Israel it is intended to show, that the communion is permanent on the part of God, and that on the part of the people it is possible to persevere in communion with God. Consequently there follows the description of the sanctuary, the character of which is symbolical. The sacred symbols are, however, not so much expressed in formal declarations, as contained in the whole tenor of the descriptions. The symbols begin with the central point, the holy of holies, which unites in itself the impeaching law and the redeeming symbol of divine mercy, and thus sets forth the reconciliation of God with the people. This is followed by the description of the sanctuary, representing those blessings which through the holy of holies were communicated to the subjects of the theocracy, and serving as a perpetual monument of Israel's exalted destiny, pointing at the same time to the means of attaining it. Last comes the description of the fore-court, symbolising the participation of the people in those blessings, and their sanctified approach to the Lord. The description then proceeds from the sanctuary to the persons officiating in it, the priests, characterized both by their various costumes (xxviii.), and the manner of their inauguration (xxix.). Then follows, as a matter of course, the description of the service in that sanctuary and by those priests, but merely in its fundamental features, confining itself simply to the burnt and incense offerings, indicating by the former the preparatory inferior service, and by the latter the complete and higher office of the sacerdotal function. But, by contributing to the means of establishing public worship, the whole nation shares in it; and therefore the description of the officiating persons very properly concludes with the people (xxx.). As a suitable sequel to the former follows the description of the use and nature of the implements requisite for the service of the priests, such as the brass laver for sacred ablutions, the preparation of the perfume and anointing oil (xxx. 17-38). These regulations being made, men endowed with the Spirit of God were also to be appointed for making the sacred tabernacle and all its furniture (xxxi. 1-2). The description of the sanctuary, priesthood, and mode of worship, is next followed by that of the sacred times and periods (xxxi. 12, sq.). Of the sacred times there is here only appointed the Sabbath, in which the other regulations are contained as in their germ. God having delivered to Moses the tables of the law, the construction and arrangement of the tabernacle might thus at once have been begun, had its further progress not been interrupted by an act of idolatry on the part of the people, and their punishment for that offence, which form the subject of the narrative in ch. xxxii.-xxxiv. Contrary and in opposition to all that had been done by Jehovah for and in the presence of Israel, the formidable apostasy of the latter manifests itself in a most melancholy manner, as an ominously significant prophetic fact, which is incessantly repeated in the history of subsequent generations. The narrative of it is

therefore closely connected with the foregoing accounts—Jehovah's mercy and gracious faithfulness on the one hand, and Israel's barefaced ingratitude on the other, being intimately connected. This connection forms the leading idea of the whole history of the theocracy. It is not till after the narrative of this momentous event that the account of the construction and completion of the tabernacle can proceed (xxxv. xl.), which account becomes more circumstantial in proportion as the subject itself is of greater importance. Above all, it is faithfully shown that all was done according to the commands of Jehovah.

This brief statement of the contents of the book of Exodus will show that in the descriptive history a fixed plan, in conformity with the principles above stated, is consistently and visibly carried through the whole of the book, thus giving us the surest guarantee for the unity of both the book and its author.

For neological criticism it was of the utmost importance to stamp this book as a later production, the miracles contained in its first part but too manifestly clashing with the principles in which that criticism takes its rise. Its votaries therefore have endeavoured to show that those miracles were but mythological fictions which had been gradually developed in process of time, so that the very composition of the book itself must necessarily have been of a later date. Neither do we wonder at such attempts and efforts, since the very essence and central point of the accounts of the miracles given in the book are altogether at variance with the principles and the criticism of the rationalist system, which can by no means admit the rise and formation of a people under such miraculous circumstances, such peculiar belief, and, in a religious point of view, such an independent existence. Indeed, the spiritual substance of the whole, the divine idea which pervades and combines all its details, is in itself such a miracle, such a peculiar and wondrous phenomenon, as to lend natural support and undeniable confirmation to the isolated and physical wonders themselves; so that it is impossible to deny the latter without creating a second and new wonder, entirely adverse to the whole course of the Jewish history. Nor is that part of the book which contains the miracles deficient in numerous historical proofs in verification of them. As the events of this history are laid in Egypt and Arabia, we have ample opportunity of testing the accuracy of the Mosaic accounts, and surely we find nowhere the least transgression against Egyptian institutions and customs; on the contrary, it is most evident that the author had a thorough knowledge of the Egyptian institutions and the spirit that pervaded them. Exodus contains a mass of incidents and detailed descriptions which have gained new force from the modern discoveries and researches in the field of Egyptian antiquities. The description of the passage of the Israelites through the desert also evinces such a thorough familiarity with the localities as to excite the utmost respect of scrupulous and scientific travellers of our own time for the authenticity of the Pentateuch. Nor is the passover-festival, its rise and nature, less confirmatory of the incidents connected with it. The arrangements of the tabernacle, described in the second

part of Exodus, likewise throw a favourable light on the historical authenticity of the preceding events; and the least tenable of all the objections against it are, that the architectural arrangements of the tabernacle were too artificial, and the materials and richness too costly and precious, for the condition and position of the Jews at that early period, &c. But the critics seem to have overlooked the fact that the Israelites of that period were a people who had come out from Egypt, a people possessing wealth, Egyptian culture and arts, which we admire even now, in the works which have descended to us from ancient Egypt; so that it cannot seem strange to see the Hebrews in possession of the materials or artistic knowledge requisite for the construction of the tabernacle. Moreover, the establishment of a *TENT* as a sanctuary for the Hebrews can only be explained from their abode in the desert, being in perfect unison with their then roving and nomadic life. The extremely simple and sober style and views throughout the whole narrative afford a sure guarantee for its authenticity and originality. All the incidents related in it are described in plain and clear terms, without the least vestige of later embellishments and false extolling of former ages. The whole representation indicates the strictest impartiality and truth. On the literature of Exodus, see *PENTATEUCH*.

EXORCISM AND EXORCIST (Acts xix. 13). The belief in demoniacal possessions, which may be traced in almost every nation, has always been attended by the professed ability, on the part of some individuals, to release the unhappy victims from their calamity. The allusions to the practice of exorcism among the Jews, contained both in their own authors and in the New Testament are too well known to render quotations necessary. In some instances this power was considered as a divine gift; in others it was thought to be acquired by investigations into the nature of demons and the qualities of natural productions, as herbs, stones, &c., and of drugs compounded of them: by the use of certain forms of adjurations, invocations, ceremonies, and other observances. Among all the references to exorcism, as practised by the Jews, in the New Testament (Matt. xii. 27; Mark ix. 38; Luke ix. 49, 50), we find only one instance which affords any clue to the means employed (Acts xix. 13); from which passage it appears that certain professed exorcists took upon them to call over a demoniac the name of the Lord Jesus, saying 'We adjure you by Jesus whom Paul preacheth.' Their proceeding seems to have been in conformity with the well-known opinions of the Jews in those days, that miracles might be wrought by invoking the names of the Deity, or angels, or patriarchs, &c. The epithet applied to these exorcists, 'vagabond Jews,' indicates that they were travelling mountebanks, who, beside skill in medicine, pretended to the knowledge of magic. The office of the exorcist is not mentioned by Paul in his enumeration of the miraculous gifts (1 Cor. xii. 9), though it was a power which he possessed himself, and which the Saviour had promised (Mark xvi. 17; Matt. x. 8).

EXPIATION. [ATONEMENT; SACRIFICE.]

EXPIATION, DAY OF. [ATONEMENT, DAY OF.]

EYE. In most languages this important organ is used by figurative application, as the symbol of a large number of objects and ideas. In the East such applications of the word 'eye' have always been uncommonly numerous; and they were so among the Hebrews. It may be serviceable to distinguish the following uses of the word, few of which are common in this country, unless so far as they have become so through the translation of the Bible.

1. *A fountain.* This use of the word probably originated from the eye being regarded as the fountain of tears.

2. *Colour,* as in the phrase 'and the eye (colour) of the woman was as the eye (colour) of bdellium' (Num. xi. 7). This originated perhaps in the eye being the part of the body which exhibits different colours in different persons.

3. *The surface,* as 'the surface (eye) of the land' (Exod. x. 5, 15; Num. xxii. 5, 11).

4. In Cant. iv. 9, 'eye' seems to be used poetically for 'look,' as is usual in most languages; 'Thou hast stolen my heart with one of thy looks' (eyes).

5. In Prov. xxiii. 31, the term 'eye' is applied to the beads or bubbles of wine, when poured out, but our version preserves the sense of 'colour.'

To these some other phrases, requiring notice and explanation, may be added:

'Before the eyes' of any one, meaning in his presence; or, as we should say, 'before his face' (Gen. xxiii. 11, 18; Exod. iv. 30).

'In the eyes' of any one, means what appears to be so, or so in his individual judgment or opinion; and is equivalent to 'seeming' or 'appearing' (Gen. xix. 8; xxix. 20; margin 2 Sam. x. iii.).

'To set the eyes' upon any one, is usually to regard him with favour (Gen. xlii. 21; Job xxiv. 23; Jer. xxxix. 12); but it occurs in a bad sense, as of looking with anger, in Amos ix. 8. But anger is more usually expressed by the contrary action of turning the eyes away.

As many of the passions, such as envy, pride, pity, desire, are expressed by the eye; so, in the Scriptural style, they are often ascribed to that organ. Hence such phrases as 'evil eye' (Matt. xx. 15); 'bountiful eye' (Prov. xxii. 9); 'haughty eyes' (Prov. vi. 17); 'wanton eyes' (Isa. iii. 16); 'eyes full of adultery' (2 Pet. ii. 14); 'the lust of the eyes' (1 John ii. 16). This last phrase is applied by some to lasciviousness, by others to covetousness; but it is best to take the expression in the most extensive sense, as denoting a craving for the gay vanities of this life (Comp. Ezek. xxiv. 25). In the same chapter of Ezekiel (ver. 16), 'the desire of thy eyes' is put not for the prophet's wife directly, as often understood, but for whatever is one's greatest solace and delight; which in this case was the prophet's wife—but which in another case might have been something else.

In Zeek. iv. 10, the angels of the Lord are called 'his eyes,' as being the executioners of his judgments, and watching and attending for his glory. From some such association of ideas, the favourite ministers of state in the Persian monarchy were called 'the king's eyes.' So, in Num. x. 31, 'to be instead of eyes' is equivalent to being a prince, to rule and guide the people.

The expression in Psalm cxxiii. 2, 'As the

eyes of servants look unto the hands of their masters,' has suggested a number of curious illustrations from Oriental history and customs, tending to show that masters, especially when in the presence of others, are in the habit of communicating to their servants orders and intimations by certain motions of their hands, which, although scarcely noticeable by other persons present, are clearly understood and promptly acted upon by the attendants. This custom keeps them with their attention bent upon the hand of their master, watching its slightest motions.

Respecting blinding the eyes as a punishment, or political disqualification, see PUNISHMENT.

'PAINTING THE EYES,' or rather the eyelids, with a kind of black powder, is more than once

169.

alluded to in Scripture, although this scarcely appears in the Authorized Version, as our translators, unaware of the custom, usually render 'eye' by 'face,' although 'eye' is still preserved in the margin. So Jezebel 'painted her eyes,' literally, 'put her eyes in paint,' before she showed herself publicly (2 Kings ix. 30). This action is forcibly expressed by Jeremiah (iv. 30), 'though thou retestest thine eyes with painting.' Ezekiel (xxiii. 40) also represents this as a part of high dress—'For whom thou didst wash thyself, *paintedst thy eyes*, and deckedst thyself with ornaments.' The custom is also, very possibly, alluded to in Prov. vi. 25—'Lust not after her beauty in thine heart, neither let her take thee with *her eyelids*.' It certainly is the general impression in Western Asia that this embellishment adds much to the languishing expression and seducement of the eyes, although Europeans find some difficulty in appreciating the beauty which the Orientals find in this adornment.

EZEKIEL (*God-strengthened*), one of the greater prophets, whose writings, both in the Hebrew and Alexandrian canons, are placed next to those of Jeremiah. He was the son of Buzi the priest (ch. i. 3), and, according to tradition, was a native of Sadera. Of his early history we have no authentic information. We first find him in the country of Mesopotamia, 'by the river Chebar' (ch. i. 1), now *Khabûr*, a stream of considerable length flowing into the Euphrates near Circesium, *Kirkesia*. On this river Nebuchadnezzar founded a Jewish colony from the captives whom he brought from Jerusalem when he besieged it in the eighth year of King Jehoiachin (2 Kings xxv. 14). This colony (or at least a part of it) was settled at a place called Tel-Ahîb, and it seems to have been here that the prophet fixed his residence. He received his commission as a prophet in the fifth year of his captivity (u.c. 594). Ezekiel is remarkably silent respect-

ing his personal history; the only event which he records (and that merely in its connection with his prophetic office) is the death of his wife in the ninth year of the captivity (ch. xxiv. 18). He continued to exercise the prophetic office during a period of at least twenty-two years, that is, to the 27th year of the captivity (ch. xxix. 17); and it appears probable that he remained with the captives by the river Chebar during the whole of his life. That he exercised a very commanding influence over the people is manifest from the numerous intimations we have of the elders coming to inquire of him what message God had sent through him (ch. viii. 1; xiv. 1; xx. 1; xxxiii. 31, 32, &c.). Carpio relates several traditions respecting his death and sepulchre. It is said that he was killed at Babylon by the chief of the people, on account of his having reproved him for idolatry; that he was buried in the field of Manr in the tomb of Shem and Arphaxad, and that his sepulchre was still in existence. Such traditions are obviously of very little value.

Ezekiel was contemporary with Jeremiah and Daniel. The former had sustained the prophetic office during a period of thirty-four years before Ezekiel's first predictions, and continued to prophesy for six or seven years after. It appears probable that the call of Ezekiel to the prophetic office was connected with the communication of Jeremiah's predictions to Babylon (Jer. li. 59), which took place the year preceding the first revelation to Ezekiel. The greater part of Daniel's predictions are of a later date than those of Ezekiel; but it appears that his piety and wisdom had become proverbial even in the early part of Ezekiel's ministry (ch. xiv. 14, 16; xxviii. 3).

Most critics have remarked the vigour and surprising energy which are manifest in the character of Ezekiel. The whole of his writings show how admirably he was fitted, as well by natural disposition as by spiritual endowment, to oppose the 'rebellious house,' the 'people of stubborn front and hard heart,' to whom he was sent. The figurative representations which abound throughout his writings, whether drawn out into lengthened allegory, or expressing matters of fact by means of symbols, or clothing truths in the garb of enigma, all testify by their definiteness the vigour of his conceptions. Things seen in vision are described with all the minuteness of detail and sharpness of outline which belong to real existences. But this characteristic is shown most remarkably in the entire subordination of his whole life to the great work to which he was called. We never meet with him as an ordinary man; he always acts and thinks and feels as a prophet. This energy of mind developed in the one direction of the prophetic office is strikingly displayed in the account he gives of the death of his wife (ch. xxiv. 15-18). It is the only memorable event of his personal history which he records, and it is mentioned merely in reference to his soul-absorbing work. There is something inexpressibly touching as well as characteristic in this brief narrative—the 'desire of his eyes' taken away with a stroke—the command not to mourn, and the simple statement, 'so I spake unto the people in the morning, and at even my wife died; and I did in the morning as I was commanded.' That he possessed the common sympathies and affections of humanity is manifest from the beau-

tiful touch of tenderness with which the narrative is introduced. We may even judge that a mind so earnest as his would be more than usually alive to the feelings of affection when once they had obtained a place in his heart. He then, who could thus completely subordinate the strongest interests of his individual life to the great work of his prophetic office, may well command our admiration, and be looked upon as (to use Hävernick's expression) 'a truly gigantic phenomenon.' It is interesting to contrast Ezekiel in this respect with his contemporary Jeremiah, whose personal history is continually presented to us in the course of his writings; and the contrast serves to show that the peculiarity we are noticing in Ezekiel belongs to his individual character, and was not necessarily connected with the gift of prophecy.

That Ezekiel was a poet of no mean order is acknowledged by almost all critics. Michaelis remarks that Ezekiel lived at a period when the Hebrew language was declining in purity, when the *silver* age was succeeding to the *golden* one. It is, indeed, to the matter rather than the language of Ezekiel that we are to look for evidence of poetic genius.

The genuineness of the writings of Ezekiel has been the subject of very little dispute. Its canonicity in general is satisfactorily established by Jewish and Christian authorities. There is, indeed, no explicit reference to it, or quotation from it, in the New Testament. Eichhorn (*Eisleit.* p. 218) mentions the following passages as having apparently a reference to this book: Rom. ii. 24; comp. Ezek. xxxvi. 21; Rom. x. 5; Gal. iii. 12; comp. Ezek. xx. 11; 2 Pet. iii. 4; comp. Ezek. xii. 22; but none of these are quotations. The closing visions of Ezekiel are clearly referred to, though not quoted, in the last chapters of the Apocalypse.

The central point of Ezekiel's predictions is the destruction of Jerusalem. Previously to this catastrophe his chief object is to call to repentance those who were living in careless security; to warn them against indulging in blind confidence, that by the help of the Egyptians (Ezek. xvii. 15-17; comp. Jer. xxxvii. 7) the Babylonian yoke would be shaken off; and to assure them that the destruction of their city and temple was inevitable and fast approaching. After this event his principal care is to console the captives by promises of future deliverance and return to their own land, and to encourage them by assurances of future blessings. His predictions against foreign nations stand between these two great divisions, and were for the most part uttered during the interval of suspense between the divine intimation that Nebuchadnezzar was besieging Jerusalem (ch. xxiv. 2), and the arrival of the news that he had taken it (ch. xxxiii. 21). The predictions are evidently arranged on a plan corresponding with these the chief subjects of them, and the time of their utterance is so frequently noted that there is little difficulty in ascertaining their chronological order. This order is followed throughout, except in the middle portion relating to foreign nations, where it is in some instances departed from to secure greater unity of subject (e.g. ch. xxix. 17).

The whole book is divided by Hävernick into nine sections, as follows:—

1. Ezekiel's call to the prophetic office (ch. i-iii. 15).

2. Series of symbolical representations and particular predictions foretelling the approaching destruction of Judah and Jerusalem (ch. iii. 16-vii.).

3. Series of visions presented to the prophet a year and two months later than the former, in which he is shown the temple polluted by the worship of Adonis—the consequent judgment on the inhabitants of Jerusalem and on the priests,—and closing with promises of happier times and a purer worship (ch. viii.-xi.).

4. A series of reproofs and warnings directed especially against the particular errors and prejudices then prevalent amongst his contemporaries (ch. xii.-xix.).

5. Another series of warnings delivered about a year later, announcing the coming judgments to be yet nearer (ch. xx.-xxiii.).

6. Predictions uttered two years and five months later, when Jerusalem was besieged, announcing to the captives that very day as the commencement of the siege (comp. 2 Kings xxv. 1), and assuring them of its complete overthrow (ch. xxiv.).

7. Predictions against foreign nations (ch. xxv.-xxviii.).

8. After the destruction of Jerusalem a prophetic representation of the triumph of Israel and of the kingdom of God on earth (ch. xxxiii.-xxxix.).

9. Symbolic representation of Messianic times, and of the establishment and prosperity of the kingdom of God (ch. xl.-xlviii.).

EZRIQ-GE'BER, a very ancient city lying not far from Elath, on the eastern arm of the Red Sea. It is first mentioned in Num. xxxiii. 35, as one of the stations where the Hebrews halted in their journeyings through the desert (Deut. ii. 8). From its harbour it was that Solomon (1 Kings ix. 26) sent the fleet which he had there built to the land of Ophir, whence they fetched four hundred and twenty talents of gold. Here, also, Jehoshaphat (1 Kings xxii. 47; 2 Chron. xii. 35) built a fleet 'to go to Ophir,' but because he had joined himself with Ahaziah, 'king of Israel, who did wickedly,' the ships were broken that they were not able to go to Tarshish. Ezriqgeber is probably the same with the once populous city Ass-yan. Robinson says, 'no trace of Ezriqgeber seems now to remain, unless it be in the name of a small wady with brackish water, el-Ghudyān, opening into el-Aralah from the western mountain, some distance north of Akabah.

EZRA (*help*). Ezra was a Jewish scribe and priest, who, about the year B.C. 458, led the second expedition of Jews back from the Babylonian exile in Palestine. This Ezra ought to be distinguished from the Ezra who went up as one of the chiefs of the priests and Levites under Zerubbabel (Neh. xii. 1, 12, 33). Ezra was a lineal descendant from Phineas, the son of Aaron. He is stated in Scripture to be the son of Seraiah, the son of Azariah; which Seraiah was slain at Riblah by order of Nebuchadnezzar, having been brought thither a captive by Nebuzaradan. But, as 130 years elapsed between the death of Seraiah and the departure of Ezra from Babylon, and we read that a grandson of Seraiah was the high

priest who accompanied Zerubbabel on the first return to Jerusalem, seventy years before Ezra returned thither, we may suppose that by the term *son* here, as in some other places, the relationship of grandson, or of a still more remote direct descendant, is intended. In addition to the information given in the books of Ezra and Nehemiah, that Ezra was a 'scribe,' a 'ready scribe of the law of Moses,' 'a scribe of the words of the Commandments of the Lord and of his statutes to Israel,' 'a scribe of the law of the God of Heaven,' and 'a priest,' we are told by Josephus that he was high-priest of the Jews who were left in Babylon; that he was particularly conversant with the laws of Moses, and was held in universal esteem on account of his righteousness and virtue.

The rebuilding of the temple of Jerusalem, which had been decreed by Cyrus in the year B.C. 536, was, after much powerful and vexatious opposition, completed in the reign and by the permission of Darius Hystaspis, in the year B.C. 515.

In the year B.C. 457 Ezra was sent by 'Artaxerxes Longimanus and his counsellors to inquire concerning Judah and Jerusalem, according to the law of his God which was in his hand; and to carry the silver and gold which the king and his counsellors freely offered unto the God of Israel.' Permission was also granted to him to take with him all the silver and the gold which he could find in all the province of Babylon, together with the free-will offerings which the people and priests offered for the house of God at Jerusalem. Of this treasure he was directed to employ as much as was requisite in the purchase of offerings according to the law of Moses, and the surplus he was to lay out according to his discretion for the maintenance of the externals of religion. Ezra was also charged to convey vessels for the house of God in Jerusalem; and, lest these gifts should be insufficient, he was empowered to take from the king's treasure-house as much as should be wanted to supply everything needful for the house of the Lord. At the same time that this commission was given to Ezra, Artaxerxes Longimanus issued a decree to the keepers of the king's treasure beyond the river, to assist Ezra in everything in which he needed help, and to supply him liberally with money, corn, wine, oil, and salt. It was further enacted that it should not be lawful to impose tribute upon any priest, Levite, or other person concerned in the ministrations in the house of God. Ezra was commissioned to appoint 'according to the wisdom of God which was in his hand,' magistrates and judges to judge all the people beyond the river, that knew the laws of his God; and was enjoined to teach them to those who knew them not. The reason of the interest for the worship of God at this time evinced by Artaxerxes, appears to have been a fear of the divine displeasure, for we read in the conclusion of the decree to the treasurers beyond the river, 'Whatsoever is commanded by the God of Heaven, let it be diligently done for the house of the God of Heaven; for why should there be wrath against the realm of the king and his sons?' We are also told (Ezra vii. 6) that the king granted Ezra all his request; and Josephus informs us that Ezra, being desirous of going to Jerusalem, requested the king to grant him recommendatory letters to the governor of

Syria. We may therefore suppose that the dread which Artaxerxes entertained of the divine judgments was the consequence of the exposition to him by Ezra of the history of the Jewish people.

Ezra assembled the Jews who accompanied him on the banks of the river Ahava, where they halted three days in tents. Here Ezra proclaimed a fast, as an act of humiliation before God and a season of prayer for divine direction and safe conduct; for, on setting out, he 'was ashamed to require a band of soldiers and horsemen to help them against the enemy by the way,' because he had asserted to the king that the hand of his God is upon all them that seek him for good. Ezra next committed the care of the treasures which he carried with him to twelve of the chief priests, assisted by ten of their brethren, appointing these to take charge of the treasures by the way, and deliver them safely in the house of the Lord at Jerusalem. On the twelfth day from their first setting out, Ezra and his companions left the river Ahava, and arrived safely at Jerusalem in the fifth month, having been delivered from the hand of the enemy and of such as lay in wait by the way. Three days after their arrival the treasures were weighed and delivered into the custody of some Levites. The returning exiles offered burnt-offerings to the Lord. They delivered also the king's commissions to the viceroys and governors, and gave needful help to the people and the ministers of the Temple. When Ezra had discharged the various trusts committed to him, the princes of the Jews came to him and complained that the Jewish people generally who had returned from the captivity, and also the priests and Levites, but especially the rulers and princes, had not kept themselves separate from the people of the land, but had done according to the abominations of the remnant of the nations whom their forefathers had driven out, and married their daughters, and allowed their children to intermarry with them. On hearing this Ezra was deeply afflicted; and, according to the Jewish custom, he rent his mantle and tore the hair of his head and beard. There gathered round him all those who still feared God, and dreaded his wrath for the transgression of those whom he had brought back from captivity. Having waited till the time of the evening sacrifice, Ezra rose up, and, having again rent his hair and his garments, made public prayer and confession of sin. The assembled people wept bitterly, and Shecaniah, one of the sons of Elam, came forward to propose a general covenant to put away the foreign wives and their children. Ezra then arose and administered an oath to the people that they would do accordingly. Proclamation was also made that all those who had returned from captivity should within three days gather themselves together unto Jerusalem, under pain of excommunication and forfeiture of their goods. The people assembled at the time appointed, trembling on account of their sin and of the heavy rain that fell. Ezra addressed them, declaring to them their sin, and exhorting them to amend their lives by dissolving their illegal connections. The people acknowledged the justice of his rebukes, and promised obedience. They then requested that, as the rain fell heavily, and the number of transgressors was great, he would

appoint times at which they might severally come to be examined respecting this matter, accompanied by the judges and elders of every city. A commission was therefore formed, consisting of Ezra and some others, to investigate the extent of the evil. This investigation occupied three months.

In Neh. viii. we read that, on the occasion of the celebration of the feast of the seventh month, subsequently to Nehemiah's numbering the people, Ezra was requested to bring the book of the law of Moses; and that he read therein standing upon a pulpit of wood, which raised him above all the people.

Contradictory accounts are given by the Jewish writers as to the time and place of Ezra's death. The Talmudic statement is that he died at Zanzuma, a town on the Tigris, while on his road from Jerusalem to Susa, whither he was going to converse with Artaxerxes about the affairs of the Jews. A tomb said to be his, represented in the present engraving, is shown on the Tigris, about twenty miles above its junction with the Euphrates.

170. [Tomb of Ezra.]

Ezra is commonly regarded as the author of the books of Chronicles. But as the reasons for ascribing the books of Chronicles to the authorship of Ezra have already been investigated in the Article CHRONICLES, we confine ourselves here to the book of Ezra. Some authors have ascribed the books of Nehemiah and Esther likewise to Ezra, although they differ in style. [ESTHER; NEHEMIAH.]

EZRA, BOOK OF.—The book of Ezra contains records of events occurring about the termination of the Babylonian exile. It comprises accounts of the favours bestowed upon the Jews by Persian kings; of the rebuilding of the temple; of the mission of Ezra to Jerusalem, and his regulations and reforms. Such records forming the subject of the book of Ezra, we must not be surprised that its parts are not so intimately connected with each other as we might have expected if the author had set forth his intention to furnish a complete history of his times.

The events narrated in the book of Ezra are spread over a period of about 79 years, under the reigns of Cyrus, Cambyses, Magus, or Pseudo-Smerdis, Darius Hystaspis, Xerxes, Artaxerxes

(in the eighth year of whose reign the records of Ezra cease).

The beginning of the book of Ezra agrees verbatim with the conclusion of the second book of Chronicles, and terminates abruptly with the statement of the divorces effected by his authority, by which the marriages of Israelites with foreign women were dissolved.

Since the book of Ezra has no marked conclusion, it was, even in early times, considered to form part of the book of Nehemiah, the contents of which are of a similar description. As, however, the book of Ezra is a collection of detached records of remarkable events occurring at the conclusion of the exile and in the times immediately following it, attempting no display of the art of book-making, the mere want of an artificial conclusion cannot be considered a sufficient reason for regarding it as the first portion of Nehemiah. It is, however, likely that the similarity of the contents of the books of Ezra and Nehemiah was the cause of their being placed together in the Hebrew Bible.

The arrangement of the facts in the book of Ezra is chronological. The book may be divided into two portions. The first consists of chapters i.-vi., and contains the history of the returning exiles and of their rebuilding of the temple, and comprises the period from the first year of Cyrus, B.C. 536, to the sixth year of Darius Hystaspis, B.C. 515.

The second portion contains the personal history of the migration of Ezra to Palestine, in the seventh year of Artaxerxes. This latter portion, embracing chapters vii.-x., is an autobiography of Ezra during about twelve or thirteen months, in the seventh and eighth years of the reign of Artaxerxes Longimanus.

We have spoken thus far of the canonical book of Ezra; there are, however, four books that have received this name, viz. the book noticed above, the only one which was received into the Hebrew canon under that name, the book of Nehemiah, and the two apocryphal books of Esdras, concerning which see *ESDRAS*.

F.

FACE, in Scripture, is often used to denote presence in the general sense, and, when applied to the Almighty, denotes such a complete manifestation of the divine presence, by sound or sight, as was equivalent, in the vividness of the impression, to the seeing of a fellow-creature 'face to face.' The 'face of God' therefore denotes in Scripture any thing or manner by which God is wont to manifest himself to man.

It was a very ancient and common opinion that our mortal frame could not survive the more sensible manifestations of the divine presence, or 'see God face to face and live' (Gen. xxxii. 30). Hence, in this passage, the gratitude and astonishment of Ja'ob, that he still lived after God had manifested himself to him more sensibly than by dreams and visions. This impression was confirmed to Moses, who was told, 'Thou canst not see my face: no man can see my face and live' (Exod. xxxiii. 20); which clearly signifies that no one can, in this present

state of being, endure the view of that glory which belongs to Him (1 Cor. xiii. 12; 1 John iii. 2; Rev. xxii. 4).

It is to be borne in mind that God is usually represented to us in Scripture under a human form; and it is indeed difficult for even more spiritualized minds than those of the Hebrews to conceive of Him apart from the form and attributes of the highest nature actually known to us. The Scripture sanctions this concession to the weakness of our intellect, and hence arise the anthropomorphous phrases which speak of the face, the eyes, the arm of God. The appearances of the angels in the Old Testament times were generally in the human form (Judg. xiii. 6, &c.); and from this cause alone it would have been natural, in the imagination, to transfer the form of the messengers to Him by whom they were sent.

FAIR HAVENS, a harbour or roadstead of Crete, the unsafeness of which to winter in, occasioned that attempt to make for Phenice, or the other side of the island, which led to the eventual loss of the vessel in which Paul sailed for Rome (Acts xxvii. 8). As the name is still preserved, there is no difficulty in fixing the situation to a small bay a little to the north-east of Cape Leon, the present Cape Matala.

FALLOW-DEER. The original terms *Ajal* and *Ajalah* are rendered in our common version by the names hart and hind (Deut. xii. 15; Ps. xlii. 1; Isa. xxxv. 6; Gen. xlix. 21; 2 Sam. xxii. 34; Job xxxix. 1; Ps. xviii. 31; Prov. v. 19; Cant. ii. 7; Jer. xiv. 5; Habak. iii. 19).

171. [*Cervus barbarus*.]

Sir J. G. Wilkinson believes *Ajal* to be the Ethiopian oryx, with nearly straight horns. But an Ethiopian species could not well be meant where the clean animals fit for the food of Hebrews are pointed out, nor where allusion is made to suffering from thirst, and to high and rocky places as the refuge of females, or of both, since all the species of oryx inhabit the open plains, and are not remarkable for the desire of drinking; nor can either of these propensities be properly ascribed to the true antelopes, or gazelle, of Arabia and Syria, all being residents of the plain and the desert; like the oryges, often seen at immense distances from water, and unwilling

to venture into forests, where their velocity of flight and delicacy of structure impede and destroy them. Animals of the stag kind prefer the security of forests, are always most robust in rocky mountain covers, and seek water with considerable anxiety; for of all the lightfooted ruminants, they alone protrude the tongue when hard pressed in the chace. Now, comparing these qualities with several texts, we find them perfectly appropriate to the species of these genera alone.

The first species here referred to is now known by the name of *Cervus Barbarus*, or Barbary stag, in size between our red and fallow deer, distinguished by the want of a bisantler, or second branch on the horns, reckoning from below, and a spotted livery, which is effaced only in the third or fourth year. This species is figured on Egyptian monuments, is still occasionally seen about the Natron lakes west of the Nile, and, it seems, was observed by a reverend friend in the desert east of the Dead Sea on his route from Cairo towards Damascus. We take this to be the *Igal* or *Ajal* of the Arabs, the same which they accuse of eating fish—that is, the ope, lizards, and snakes, a propensity common to other species, and similarly ascribed to the Virginian and Mexican deer.

The other is the Persian stag, or Maral of the Tatar nations, and *Gewazen* of Armenia, larger than the stag of Europe, clothed with a heavy mane, and likewise destitute of bisantlers. We believe this species to be the *Sogür* of Asiatic Turkey, and many of the Arabs, therefore, residing on the borders of the mountain forests of Syria and Palestine. One or both of these species were dedicated to the local *bona dea* on Mount Libanus—a kind of proof that deer were found in the vicinity.

Of the hind it is unnecessary to say more than that she is the female of stag, or hart, and that in the manners of these animals the males always are the last to hurry into cover.

FASTS. The observance of religious fasts established itself in the world at a very early period, and is found to have prevailed in most of the nations of antiquity. In such a religion as Moses was commissioned by the creator of the world to offer to the chosen people, it was not likely that an observance which, such as fasts, seems to have had its origin in false and heathen conceptions, should hold a very prominent position, or be invested with much importance. There is but one fast enjoined by the great Hebrew lawgiver. And this injunction we are disposed to place among those things which Moses allowed rather than originated, bore with rather than approved, in consideration of the force of established custom, and from a wise fear of defeating his own good ends by attempting too much. The manner in which this observance is spoken of in Scripture (Lev. xvi. 29; xxiii. 27) seems to imply that it was no new institution that the lawgiver was establishing, but merely an old and well known practice, to which he gave a modified sanction. Had it been otherwise, had the law been a new one, details would have been both needed and given, as is customary with Moses in his injunctions. Instead of that, the children of Israel are required in general terms to 'afflict their souls.' But this language is not only vague, it is figurative, and could have no definite mean-

ing unless to persons with whom afflicting the soul was in general use. There seems, however, no reason to doubt that 'to afflict the soul,' bore with it the meaning of fasting. To a more English reader the phrase seems to comprise all kinds of voluntary mortifications, but 'soul' in Hebrew not seldom denotes the 'appetite' (Prov. xxvii. 7). Accordingly the words regard immediately abstinence from food, and most probably (so far as they go) nothing more.

The sole fast required by Moses was on the great day of annual atonement. This observance seems always to have retained some prominence as 'the fast' (Acts xxvii. 9). But what the observance of the enjoined duty involved we are nowhere expressly informed. Other general fasts, however, were in course of ages introduced, which were celebrated at fixed times every successive year. In the reign of Zedekiah, Nebuchadnezzar besieged and captured Jerusalem, which calamity led to the establishment of a fast on the seventeenth day of the fourth month (Thammuz, July), (Jer. lii. 6, 7; Zech. viii. 19). In the last passage other fasts are enumerated, namely, 'the fast of the fifth, and the fast of the seventh, and the fast of the tenth.' That of the fifth month (Ab, August) was held on the ninth day, in mournful commemoration of the burning of the city by 'Nebuzar-adan, a servant of the king of Babylon,' who 'burnt the house of the Lord, and the king's house, and all the houses of Jerusalem, and every great man's house' (2 Kings xxv. 8, sq.; Jer. lii. 12; Zech. vii. 3-5; viii. 19). The fast of the seventh month (Tishri, October) was established to bewail the murder of Gedaliah at Mizpah (Jer. xli. 1, sq.; 2 Kings xxv. 25). That of the tenth month (Tebeth, January) was held on the tenth day to commemorate the commencement of the siege of Jerusalem on the part of Nebuchadnezzar (2 Kings xxv. 1; Zech. viii. 19).

On particular and signal occasions extraordinary fasts were appointed (Judges xx. 26; 1 Sam. xxxi. 11-13; Baruch i. 5; 1 Kings xxi. 9; comp. Jer. xxxvi. 9; 2 Chron. xx. 3). In Joel i. ii. a fast is enjoined with a view to avert away the wrath of God as displayed in the terrible consequences of the invasion of the land of Judaea by an army of devastating locusts. The notion also prevailed that a special fast might have the effect of averting the divine displeasure and securing the divine co-operation in any great undertaking (Jonah iii. 5; 1 Sam. vii. 5, 6, 8, 10, 12; 1 Macc. iii. 47; 2 Macc. xiii. 12; Judith iv. 11; vi. 19). Local fasts were at a later period sometimes held in order to avert calamity or procure a favour from heaven; and the Sanhedrim ordered general fasts when the nation was threatened with any great evil, such as drought or famine.

There were also private fasts, though the Mosaic law did not require them. They were held in connection with individual or family incidents, and agreed in aim and tendency with fasts of a general and public nature. Examples may be found in 1 Sam. i. 7; xx. 34; 1 Kings xxi. 9; Ez. x. 6; Neh. i. 4. After the exile private fasts became very frequent, awaiting the call of no special occasion, but entering as a regular part of the current religious worship. The parable of the Pharisee and Publican (Luke xviii. 9; comp. Matt. ix. 14) shows how much the Pharisees

were given to voluntary and private fasts—'I fast twice in the week.' The first was on the fifth day of the week, on which Moses ascended to the top of Mount Sinai; the second was on the second day, on which he came down. The Essenes and the Therapeutæ also were much given to such observances. Fasts were considered as a useful exercise in preparing the mind for special religious impressions. Thus Dan. x. 2, sq., 'In those days I Daniel was mourning three full weeks. I ate no pleasant bread, neither came flesh nor wine in my mouth. Then I lifted up my eyes and looked, and behold a certain man, &c. (see also Acts xiii. 3; xiv. 23). From Matt. xvii. 21, 'Howbeit this kind of demons goeth not out but by prayer and fasting,' it would appear that the practice under consideration was considered in the days of Christ to act in certain special cases as an exorcism. Fasting was accompanied by the ordinary signs of grief among the Israelites, as may be seen in 1 Mace. iii. 47, 'Then they fasted that day and put on sackcloth, and cast ashes upon their heads and rent their clothes.' The fast ordinarily lasted from evening to evening, but was not observed on the sabbath or on festival days. The abstinence was either partial or total. In the case of the latter food was entirely foregone, but this ordinarily took place only in fasts of short duration; and abstinence from food in eastern climes is more easy and less detrimental (if not in some cases positively useful) than keeping from food would be with us in these cold, damp, northern regions (Esther iv. 16). In the case of partial abstinence the time was longer, the denial in degree less. When Daniel (x. 2) was 'mourning three full weeks,' he ate no 'pleasant bread, neither came flesh nor wine in my mouth.' There does not appear to have been any fixed and recognized periods during which these fasts endured. From one day to forty days fasts were observed. The latter period appears to have been regarded with feelings of peculiar sanctity, owing doubtless to certain events in Jewish history. Thus Moses 'was with the Lord on Mount Sinai forty days and forty nights, he did neither eat bread nor drink water' (Exod. xxxiv. 28). So Elijah (1 Kings xix. 8) 'arose and did eat and drink, and went in the strength of that meat forty days and forty nights unto Horeb the mount of God.' The same was the number of days that our Lord fasted in the desert in connection with his temptation (Matt. iv. 1-11; Mark i. 12, 13; Luke iv. 1-13).

We have already seen how qualified the sanction was which Moses gave to the observance of fasting as a religious duty. In the same spirit which actuated him, the prophets bore testimony against the lamentable abuses to which the practice was turned in the lapse of time and with the increase of social corruption (Isa. lviii. 4, sq.; Jer. xiv. 12; Zech. vii. 5). Continuing the same species of influence and perfecting that spirituality in religion which Moses began, our Lord rebuked the Pharisees sternly for their outward and hypocritical pretences in the fasts which they observed (Matt. vi. 16, sq.), and actually abstained from appointing any fast whatever as a part of his own religion (Matt. ix. 14). From the passage referred to this at least is clear, that Jesus ascribed to fasts no essential worth, nor required any such observance from his fol-

lowers. Whether and how far he allowed fasting as a means of religious improvement, is a question which our space does not permit us to discuss. That the early Christians observed the ordinary fasts which the public practice of their day sanctioned, is clear from more than one passage in the New Testament Scriptures (Acts xiii. 2; xiv. 23; 2 Cor. vi. 5); but in this they probably did nothing more than yield obedience, as in general they thought themselves bound to do, to the law of their fathers so long as the Mosaic institutions remained entire. And though the great body of the Christian Church held themselves free from all ritual and ceremonial observances when God in his providence had brought Judaism to a termination in the rasure of the holy city and the closing of the temple, yet the practice of fasting thus originated might have easily and unobservedly been transmitted from year to year and from age to age, and that the rather because so large a portion of the disciples being Jews (to say nothing of the influence of the Elionites in the primitive church), thousands must have been accustomed to fasting from the earliest days of their existence, either in their own practice or the practice of their fathers, relatives, and associates.

FAT. In Lev. iii. there are minute details of the parts of victims which were to be specially appropriated to the altar. Among these all the internal fat is minutely specified, particularly the fat of the kidneys; and of external parts the tail of the sheep, which, in the common species of Western Asia, is a mass of fat (iii. 4, 9, 10, 15); and the whole concludes with 'All the fat is the Lord's; ye shall eat neither fat nor blood' (iii. 17). The reason assigned, namely, that the fat was consecrated to the altar, could only apply with respect to that of animals used in sacrifice, which were also usually employed for food. One point seems to have been very generally overlooked, which is, that not fat absolutely, but particular fat parts only are interdicted. They might eat the fat involved in the muscular tissue—in short, fat meat; and we know that animals were actually fattened for food (1 Kings iv. 23; Jer. xvi. 21; Luke xv. 23). This was, however, not a usual practice; and even at this day in the East, domestic cattle seldom undergo any preparatory feeding or fattening before being killed. Hence there is little fat in the carcass, except that belonging to the parts specified in the prohibition, which is all more or less of the nature of suet.

Various reasons have been assigned for this somewhat remarkable restriction. The secondary cause, that the fat was consecrated to the altar, and therefore was to be abstained from, is not all, for it is usually considered that it was thus consecrated to give a religious sanction to a prohibition expedient on other grounds. The true reason probably is, that this suet or suet-like fat is not particularly wholesome or digestible in warm climates, if anywhere, and is particularly unsuitable for persons subject to cutaneous diseases, as the Israelites appear to have been at the time of their leaving Egypt.

'Fatness,' in Scripture, expresses plumpness or exuberance, whether in men, animals, or vegetables; and is hence often applied metaphorically to any kind of abundance, as to large possessions, or to excessive fertility in the earth.

FATHER. This word, besides its obvious and primary sense, bears, in Scripture, a number of other applications, most of which have, through the use of the Bible, become more or less common in all Christian countries.

1. The term Father is very often applied to God himself (Exod. iv. 22; Deut. xxxii. 6; 2 Sam. vii. 14; Ps. lxxxix. 27, 28; Isa. lxiii. 16; lxiv. 8). In some of these passages he is set before us as the Father of all men, in the general sense of creator and preserver of all men, but more especially of believers, whether Jews or Christians.

Without doubt, however, God is in a more especial and intimate manner, even as by covenant, the Father of the Jews (Jer. xxxi. 9; Isa. lxiii. 16; lxiv. 8; John viii. 41; v. 45; 2 Cor. vi. 18); and also of Christians, or rather of all pious and believing persons, who are called 'sons of God' (Jo'n i. 12; Rom. viii. 16, etc.). Thus Jesus, in speaking to his disciples, calls God their Father (Matt. vi. 4, 8, 15, 18; x. 20, 29; xiii. 43, etc.). The Apostles, also, for themselves and other Christians, call him 'Father' (Rom. i. 7; 1 Cor. i. 3; 2 Cor. i. 2; Gal. i. 4; and many other places).

2. *Father* is applied to any ancestor near or remote, or to ancestors ('fathers') in general. The progenitor, or founder, or *patriarch* of a tribe or nation, was also pre-eminently its father, as Abraham of the Jews. Examples of this abound. See, for instance, Deut. i. 11; 1 Kings viii. 21; Matt. iii. 9; xxiii. 30; Mark xi. 10; Luke i. 32, 53; vi. 23, 26; John vii. 22, &c.

3. *Father* is also applied as a title of respect to any head, chief, ruler, or elder, and especially to kings, prophets, and priests (Judg. xvii. 10; xviii. 19; 1 Sam. x. 12; 2 Kings ii. 12; v. 13; vi. 21; xiii. 14; Prov. iv. 1; Matt. xxiii. 9; Acts vii. 2; xii. 1; 1 Cor. iv. 15, etc.).

4. The author, source, or beginner of anything is also called the Father of the same, or of those who follow him. Thus Jabal is called 'the father of those who dwell in tents, and have cattle'; and Jubal, 'the father of all such as handle the harp and the organ' (Gen. iv. 20, 21; comp. Job xxxviii. 28; John viii. 44; Rom. iv. 12).

The authority of a father was very great in patriarchal times; and although the power of life and death was virtually taken from the parent by the law of Moses, which required him to bring his cause of complaint to the public tribunals (Deut. xxi. 18-21), all the more real powers of the paternal character were not only left unimpaired, but were made in a great degree the basis of the judicial polity which that law established. The children and even the grandchildren continued under the roof of the father and grandfather; they laboured on his account, and were the most submissive of his servants. The property of the soil, the power of judgment, the civil rights, belonged to him only, and his sons were merely his instruments and assistants.

Filial duty and obedience were, indeed, in the eyes of the Jewish legislator, of such high importance, that great care was taken that the paternal authority should not be weakened by the withdrawal of a power so liable to fatal and barbarous abuse as that of capital punishment. Any outrage against a parent—a blow, a curse, or

incorrigible profligacy—was made a capital crime (Exod. xxi. 15, 17; Lev. xx. 9). If the offence was public, it was taken up by the witnesses as a crime against Jehovah, and the culprit was brought before the magistrates whether the parent consented or not; and if the offence was hidden within the paternal walls, it devolved on the parents to denounce him and to require his punishment.

It is a beautiful circumstance in the law of Moses that this filial respect is exacted for the mother as well as for the father. The threats and promises of the legislator distinguish not the one from the other; and the fifth commandment associates the father and mother in a precisely equal claim to honour from their children. The development of this interesting feature of the Mosaic law belongs, however, to another head [WOMEN].

FEASTS. The root-idea of the word is to be found in what we should term the pleasures of the table, the exercise of hospitality.

To what an early date the practices of hospitality are referable may be seen in Gen. xix. 3. It was usual not only to receive persons with choice viands, but also to dismiss them in a similar manner; accordingly Laban, when he had overtaken the fleeing Jacob, complains (Gen. xxxi. 27), 'Wherefore didst thou steal away from me and didst not tell me, that I might have sent thee away with mirth, and with songs, and with tabret, and with harp?' See also 2 Sam. iii. 20; 2 Kings vi. 23; Job. viii. 20; 1 Mac. xvi. 15. This practice explains the reason why the prodigal, on his return, was welcomed by a feast (Luke xv. 23). Occasions of domestic joy were hailed with feasting; thus, in Gen. xxi. 8, Abraham 'made a great feast the same day that Isaac was weaned.' Birth-days were thus celebrated (Gen. xl. 20). 'Pharaoh, on his birth-day made a feast unto all his servants' (Job. i. 4; Matt. xiv. 6; comp. Hérod. i. 133). Marriage-feasts were also common. Samson (Judg. xiv. 10) on such an occasion 'made a feast,' and it is added, 'for so used the young men to do.' So Laban, when he gave his daughter Leah to Jacob (Gen. xxix. 22), 'gathered together all the men of the place, and made a feast.' These festive occasions seem originally to have answered the important purpose of serving as evidence and attestation of the events which they celebrated, on which account relatives and neighbours were invited to be present (Ruth iv. 10; John ii. 1). Those processes in rural occupations by which the Divine bounties are gathered into the hands of man, have in all ages been made seasons of festivity; accordingly in 2 Sam. xiii. 23, Absalom invites all the king's sons, and even David himself, to a sheep-shearing feast, on which occasion the guests became 'merry with wine' (1 Sam. xxv. 2, sq.). The vintage was also celebrated with festive eating and drinking (Judg. ix. 27). Feasting at funerals existed among the Jews (2 Sam. iii. 33). In Jer. xvi. 7, among other funeral customs mention is made of 'the cup of consolation, to drink for their father or their mother,' which brings to mind the indulgence in spirituous liquors to which our ancestors were given, at interments, and which has not yet entirely disappeared. To what an extent expense was sometimes carried on these occasions may be learned from Josephus, who, having re-

marked that Archelaus 'mourned for his father seven days, and had given a very expensive funeral feast to the multitude,' states, 'which custom is the occasion of poverty to many of the Jews,' adding, 'because they are forced to feast the multitude, for if any one omits it he is not esteemed a holy person.'

As among heathen nations, so also among the Hebrews, feasting made a part of the observances which took place on occasion of animal sacrifices (Deut. xii. 6, 7; 1 Sam. ix. 19; xvi. 3, 5; 2 Sam. vi. 19). These sacrificial meals were enjoyed in connection with peace-offerings, whether eucharistic or votive. To the feast at the second tithe

of the produce of the land, which was to be made every year and eaten at the annual festivals before Jehovah, not only friends, but strangers, widows, orphans, and Levites, were to be invited, as well as the slaves. If the tabernacles were so instant as to make it inconvenient to carry thither the tithe, it was to be turned into money, which was to be spent at the place at which the festivals were held in providing feasts (Deut. xiv. 22-27; xii. 14; Tobit i. 6). Charitable entertainments were also provided, at the end of three years, from the tithe of the increase. The Levite, the stranger, the fatherless, and the widow, were to be present (Deut. xii. 17-19; xiv. 28, 29; xxvi. 12-15). At the feast of Pentecost the command is very express (Deut. xvi. 11), 'Thou shalt rejoice before the Lord thy God, thou, and thy son, and thy daughter, and thy man-servant, and thy maid servant, and the Levite that is within thy gates, and the stranger, and the fatherless, and the widow, that are among you.' The Israelites were forbidden to partake of food offered in sacrifice to idols (Exod. xxxiv. 15), lest they should be thereby enticed into idolatry or appear to give a sanction to idolatrous observances (1 Cor. x. 28).

FELIX, a Roman procurator of Judea, before whom Paul so 'reasoned of righteousness, temperance, and judgment to come,' that the judge trembled, saying, 'Go thy way for this time; when I have a convenient season I will call for thee' (Acts xxiv. 25). The context states that Felix had expected a bribe from Paul; and, in order to procure this bribe, he appears to have had several interviews with the Apostle. The depravity which such an expectation implies is in agreement with the idea which the historical fragments preserved respecting Felix would lead the student to form of the man.

The year in which Felix entered on his office cannot be strictly determined. From the words of Josephus it appears that his appointment took place before the twelfth year of the Emperor Claudius.

Felix was a remarkable instance of the elevation to distinguished station of persons born and bred in the lowest condition. Originally a slave, he rose to little less than kingly power. For some unknown, but probably not very creditable services, he was manumitted by Claudius Cæsar (Sueton. *Claud.* 28; Tacit. *Hist.* v. 9); on which account he is said to have taken the phenomenon of Claudius.

The character which the ancients have left of Felix is of a very dark complexion. Suetonius speaks of the military honours which the emperor loaded him with, and specifies his appointment as

governor of the province of Judæa; adding an innuendo, which loses nothing by its brevity, namely, that he was the husband of three queens or royal ladies. Tacitus, in his *History* (v. 9), declares that, during his governorship in Judæa, he indulged in all kinds of cruelty and lust, exercising regal power with the disposition of a slave; and, in his *Annals* (xii. 54) he represents Felix as considering himself licensed to commit any crime, relying on the influence which he possessed at court. The country was ready for rebellion, and the unsuitable remedies which Felix applied served only to inflame the passions and to incite to crime. Under his sway the affairs of the country grew worse and worse. The land was filled with robbers and impostors who excluded the multitude. Felix used his power to repress these disorders to little purpose, since his own example gave no sanction to justice. Having a grudge against Jonathan, the high-priest, who had expostulated with him on his misrule, he made use of Doras, an intimate friend of Jonathan, in order to get him assassinated by a gang of villains, who joined the crowds that were going up to the temple to worship,—a crime which led subsequently to countless evils, by the encouragement which it gave to the Sicarii, or leaguéd assassins of the day, to whose excesses Josephus ascribes, under Providence, the overthrow of the Jewish state. Among other crimes, some of these villains misled the people under the promise of performing miracles, and were punished by Felix. An Egyptian impostor, who escaped himself, was the occasion of the loss of life to four hundred followers, and of the loss of liberty to two hundred more, thus severely dealt with by Felix.

While in his office, being inflamed by a passion for the beautiful Drusilla, a daughter of King Herod Agrippa, who was married to Azizus, king of Emesa, he employed one Simon, a magician, to use his arts in order to persuade her to forsake her husband and marry him, promising that if she would comply with his suit he would make her a happy woman. Drusilla, partly impelled by a desire to avoid the envy of her sister, Bernice, was prevailed on to transgress the laws of her forefathers, and consented to a union with Felix. In this marriage a son was born, who was named Agrippa: both mother and son perished in an eruption of Mount Vesuvius, which took place in the days of Titus Cæsar. With this adulteress was Felix seated when Paul reasoned before the judge, as already stated (Acts xxiv. 24).

Paul, being apprehended in Jerusalem, was sent by a letter from Claudius Lysias to Felix at Cæsarea, where he was at first confined in Herod's judgment-hall till his accusers came. They arrived. Tertullus appeared as their spokesman and had the audacity, in order to conciliate the good will of Felix, to express gratitude on the part of the Jews, 'seeing that by thee we enjoy great quietness, and that very worthy deeds are done unto this nation by thy providence' (Acts xxiii. xxiv.). Paul pleaded his cause in a worthy speech; and Felix, consigning the Apostle to the custody of a centurion, ordered that he should have such liberty as the circumstances admitted, with permission that his acquaintance might see him and minister to his wants. This imprison-

ment the Apostle suffered for a period of two years, being left bound when Felix gave place to Festus, as that unjust judge 'was willing; not to do what was right, but 'to show the Jews a pleasure.'

FERRET. [LIZARD.]

FESTIVALS. The Hebrew festivals were occasions of public religious observances, recurring at certain set and somewhat distant intervals. In general they may be divided into two kinds:—1. Those of divine institution; 2. Those of human origin. Those which owe their existence to the authority of God are, the seventh day of the week, or the Sabbath; the Passover; Pentecost; the Feast of Trumpets; the Day of Atonement; the Feast of Tabernacles; the New Moon. Festivals which arose under purely human influences are, the Feast of Lots or Purim; the death of Holofernes; the Dedication; the Sacred Fire; the death of Nicanor.

Reserving details for separate articles on such of these as shall seem to require and justify a distinct treatment, we confine ourselves here to a general outline, with some remarks on the origin and tendency of the chief festivals.

We have inserted the Sabbath for the sake of completeness, and, with the same view, we proceed to set down a few brief particulars respecting the daily service, so that we may at once present a general outline of the temple worship.

At the daily service two lambs of the first year were to be offered at the door of the tabernacle; one in the morning, the other in the evening, a continual burnt-offering. With each lamb was to be offered one-tenth of an ephah of flour, mingled with one-fourth of a hin of fresh oil, for a meat-offering, and one-fourth of a hin of wine for a drink-offering. Frankincense was to be placed on the meat-offering, a handful of which, with the frankincense, was to be burnt, and the remainder was to be eaten by the priest in the holy place, without leaven. The priests were to offer daily the tenth of an ephah of fine flour, half in the morning and half in the evening, for themselves. The high-priest was to dress the lamps in the tabernacle every morning, and light them every evening; and at the same time burn incense on the altar of incense. The people provided oil for the lamps which were to burn from evening to morning: the ashes were removed by a priest, dressed in his linen garment and his linen drawers, and then carried by him out of the camp, in his common dress. Great stress was laid on the regular observance of these requirements (Num. xxviii. 1-8; Exod. xxix. 38-42; Lev. vi. 8-23; Exod. xxx. 7-9; xxvii. 20; Lev. xxiv. 1-4; Num. viii. 2).

Labour was to last not longer than six days. The seventh was a Sabbath, a day of rest, of holy convocation, on which no one, not even strangers or cattle, was allowed to do any servile work. The offender was liable to stoning.

On the Sabbath two lambs of the first year, without blemish, were to be offered for a burnt-offering, morning and evening, with two-tenths of an ephah of flour, mingled with oil, for a meat-offering, and one-half of a hin of wine for a drink-offering, thus doubling the offering for ordinary days. Twelve cakes of fine flour were to be placed every Sabbath upon the table in the tabernacle, in two piles, and pure frankincense laid on the

uppermost of each pile. These were to be furnished by the people; two were offered to Jehovah, the rest were eaten by the priests in the holy place (Exod. xxxi. 12; Lev. xxiii. 1; xxvi. 2; Exod. xix. 3, 30; xx. 8-11; xxiii. 12; Deut. v. 12-15; Lev. xxiii. 3; xxiv. 5-9; Num. xv. 35; xxviii. 9).

At the *New Moon* festival, in the beginning of the month, in addition to the daily sacrifice, two heifers, one ram, and seven lambs of the first year, were to be offered as burnt-offerings, with three-tenths of an ephah of flour, mingled with oil, for each heifer; two-tenths of an ephah of flour, mingled with oil, for the ram; and one-tenth of an ephah of flour, mingled with oil, for every lamb; and a drink-offering of half a hin of wine for a heifer, one-third of a hin for the ram, and one-fourth of a hin for every lamb. One kid of the goats was also to be offered as a sin-offering.

The first day of the *seventh month* was to be a Sabbath, a holy convocation, accompanied by the *blowing of trumpets*. In addition to the daily and monthly sacrifices, one ram and seven lambs were to be offered as burnt-offerings, with their respective meat-offerings, as at the usual New Moon festival (Num. xxviii. 11-15; xxix. 1-6; Lev. xxiii. 23-25).

Three times in the year—at the Feast of Unleavened Bread, in the month Abib; at the Feast of Harvest, or of Weeks; and at the Feast of Ingathering, or of Tabernacles—all the males were to appear before Jehovah, at the place which he should choose. None were to come empty handed, but every one was to give according as Jehovah had blessed him; and there before Jehovah was every one to rejoice with his family the Levite, the stranger, the fatherless, and the widow (Exod. xxiii. 14-17; xxxiv. 22-24; Deut. xvi. 16, 17).

The first of these three great festivals, that of Unleavened Bread, called also the Passover, was kept in the Month Abib, in commemoration of the rescue of the Israelites by Jehovah out of Egypt, which took place in that month. The ceremonies that were also connected with it will be detailed under the head *PASSOVER*. In order to make the season more remarkable, it was ordained that henceforward the month in which it took place should be reckoned the first of the national religious year (Exod. xii. 2). From this time, accordingly, the year began in the month Abib, or Nisan (March—April), while the civil year continued to be reckoned from Tishri (September—October) (Exod. xii. 3, 14, 27, 43-49; Lev. xxiii. 5; Num. xxviii. 16; Deut. xvi. 1-7). The Passover lasted one week, including two Sabbaths. The first day and the last were holy, that is, devoted to the observances in the public temple, and to rest from all labour (Exod. xii. 16; Lev. xxiii. 6 Num. xxviii. 18; Deut. xvi. 8).

On the day after the Sabbath, on the Feast of Passover, a sheaf of the first-fruits of the barley harvest was to be brought to the priest to be waved before Jehovah, accompanied by a burnt-offering. Till this sheaf was presented, neither bread nor parched corn, nor full ripe ears of the harvest, could be eaten (Exod. xii. 16-20; xiii. 6-10; Lev. xxiii. 6-8; Deut. xvi. 2-8; Num. xxviii. 17-25).

The Feast of Pentecost or of Weeks was kept

to Jehovah at the end of seven weeks from the day of the Festival of Unleavened Bread, on which the sheaf was presented. On the morrow after the seventh complete week, or on the fiftieth day, two wave loaves were presented as first fruits of the wheat harvest, together with a burnt-offering, a sin-offering, and a peace-offering, &c. The day was a holy convocation, in which no servile work was done. The festival lasted but one day. It is said to have been designed to commemorate the giving of the law on Mount Sinai (Deut. xvi. 9-11; Lev. xiii. 15-21; Num. xxviii. 26-31; xv. 17-21).

The Feast of In-gathering or of Tabernacles began on the fifteenth day of the seventh month, and continued eight days, the first and last being Sabbaths. During the feast all native Israelites dwelt in booths made of the shoots of beautiful trees, palm-branches, boughs of thick-leaved trees, and of the willows of the brook, when they rejoiced with their families, with the Levite, the stranger, the fatherless, and the widow, before Jehovah. Various offerings were made. At the end of every seven years, in the year of release, at the Feast of Tabernacles, the law was required to be read by the priests in the hearing of all the Israelites (Deut. xvi. 13-15; xxxi. 10-13; Lev. xxiii. 39-43; 33-36; Num. xxix. 12-38, 40).

The Feast of Tabernacles was appointed partly to be an occasion of annual thanksgiving after the in-gathering of the harvest (Exod. xxxiv. 22; Lev. xxiii. 39; Deut. xvi. 13), and partly to remind the Israelites that their fathers had lived in tents in the wilderness (Lev. xxiii. 40-43). This feast took place in the end of the year, September or October.

The tenth day of the seventh month was the Day of Atonement—a day of abstinence, a day of holy convocation, in which all were to afflict themselves. Special offerings were made [ATONEMENT] (Lev. xxiii. 26-32; xvi. 1, 34; Num. xxix. 7-11; Exod. xxx. 10).

Brown, in his *Antiquities* (vol. i. p. 520), remarks that the time of the year in which the three great festivals were observed was during the dry season of Judæa. The latter rains fell before the Passover, the former rains after the Feast of Tabernacles; so that the country was in the best state for travelling at the time of these festivals.

On these solemn occasions food came partly from hospitality (a splendid instance of which may be found in 2 Chron. xxxv. 7-9), partly from the feasts which accompanied the sacrifices in the temple, and partly also from provision expressly made by the travellers themselves. Lodging, too, was afforded by friends, or found in tents erected for the purpose in and around Jerusalem.

The three great festivals have corresponding events (but of far greater importance) in the new dispensation. The Feast of Tabernacles was the time when our Saviour was born; he was crucified at the Passover; while at Pentecost the effusion of the Holy Spirit took place.

The rest and recreation enjoyed during these festivals would be the more pleasant, salutary, and beneficial, because of the joyous nature of the religious services in which they were, for the greater part, engaged. These solemn festivals were not only commemorations of great

national events, but they were occasions for the reunion of friends, for the enjoyment of hospitality, and for the interchange of kindness. The feasts which accompanied the sacrifices opened the heart of the entire family to joy, and gave a welcome which bore a religious sanction even to the stranger, the fatherless, and the widow.

How much, too, would these gatherings tend to foster and sustain a spirit of nationality! By intercourse the feelings of tribe and clan would be worn away; men from different parts became acquainted with and attached to each other; partial interests were found to be more imaginary than real; while the predominant idea of a common faith and a common rallying-place at Jerusalem could not fail to fuse into one strong and overpowering emotion of national and brotherly love, all the higher, nay, even the lower feelings, of each Hebrew heart.

Another effect of these festivals Michaelis has found in the furtherance of internal commerce. They would give rise to something resembling our modern fairs. Among the Mahometans similar festivals have had this effect.

These festivals, in their origin, had an obvious connection with agriculture. Passover saw the harvest upon the soil; at Pentecost it was ripe; and Tabernacles was the festival of gratitude for the fruitage and vintage (Michaelis, art. 197). The first was a natural pause after the labours of the field were completed; the second, after the first-fruits were gathered; and the third, a time of rejoicing in the feeling that the Divine bounty had crowned the year with its goodness. Spring, summer, and autumn, which have moved all nations of men with peculiar and characteristic emotions, had each its natural language and symbols in the great Israelitish festivals, a regard to which may well be supposed to have had an influence in the mind of the legislator, as well as in the consuetudinary practices of the people.

The Feast of Purim or of Lots originated in the gratitude of the Jews in escaping the plot of Haman, designed for their destruction. It took its name from the lots which were cast before Haman by the astrologers, who knew his hatred against Mordecai and his wish to destroy his family and nation (Esther iii. 7: ix. 2, 5). The feast was suggested by Esther and Mordecai, and was celebrated on the 13th, 14th, and 15th days of the twelfth month (Adar). The 13th was a fast, being the day on which the Jews were to have been destroyed; and the 14th and 15th were a feast held in commemoration of their deliverance. The fast is called the Fast of Esther, and the feast still holds the name of Purim.

The slaughter of Holofernes by the hand of Judith, the consequent defeat of the Assyrians, and the liberation of the Jews, were commemorated by the institution of a festival (Judith xiv. xv).

The Feast of Dedication was appointed by Judas Maccabæus, on occasion of the purification of the temple, and reconstruction of the altar, after they had been polluted by Antiochus Epiphanes.

The new dedication took place on the 25th day of the ninth month, called Chisleu, in the year before Christ 170. This would be in December. The day was chosen as being that on which Antiochus, three years before, had polluted the altar by heathen sacrifices.

The joy of the Israelites must have been great on the occasion, and well may they have prolonged the observance of it for eight days. A general illumination formed a part of the festival, whence it obtained the name of the Feast of Lights.

In John x. 22 this festival is alluded to when our Lord is said to have been present at the Feast of Dedication. The historian marks the time by stating 'it was winter.'

The festival 'of the Fire' was instituted by Nehemiah to commemorate the miraculous rekindling of the altar-fire. The circumstances are narrated in 2 Macc. i. 18.

The defeat by Judas Maccabæus of the Greeks, when the Jews 'smote off Nicanor's head and his right hand which he stretched out so proudly,' caused the people to 'rejoice greatly, and they kept that day a day of great gladness; moreover, they ordained to keep yearly this day, being the thirteenth day of Adar—February or March (1 Macc. vii. 47).

FESTUS. Porcius Festus was the successor of Felix as the Roman governor of Judæa, to the duties of which office he was appointed by the Emperor Nero in the first year of his reign. One of his first official acts was hearing the case of the Apostle Paul, who had been left in prison by his predecessor. He was at least not a thoroughly corrupt judge; for when the Jewish hierarchy begged him to send for Paul to Jerusalem, and thus afford an opportunity for his being assassinated on the road, he gave a refusal, promising to investigate the facts at Cæsarea, where Paul was in custody, alleging to them, 'it is not the manner of the Romans to deliver any man to die before that he which is accused have the accusers face to face, and have licence to answer for himself concerning the crime laid against him' (Acts xxv. 16). On reaching Cæsarea he sent for Paul, heard what he had to say, and, finding that the matters which 'his accusers had against him' were 'questions of their own superstition, and of one Jesus which was dead, whom Paul affirmed to be alive,' he asked the Apostle whether he was willing to go to Jerusalem, and there be tried, since Festus did not feel himself skilled in such an affair. Paul, doubtless because he was unwilling to put himself into the hands of his implacable enemies, requested 'to be reserved unto the hearing of Augustus,' and was in consequence kept in custody till Festus had an opportunity to send him to Cæsar. Agrippa, however, with his wife Bernice, having come to salute Festus on his new appointment, expressed a desire to see and 'hear the man.' Accordingly Paul was brought before Festus, Agrippa, and Bernice, made a famous speech, and was declared innocent. But having appealed to Cæsar, he was sent to Rome.

Festus on coming into Judæa found the country infested with robbers, who plundered the villages and set them on fire; the Sicarii also were numerous. Many of both classes were captured, and put to death by Festus. He also sent forces, both of horse and foot, to fall upon those that had been seduced by a certain impostor, who promised them deliverance and freedom from the miseries they were under if they would but follow him as far as the wilderness. These troops destroyed both the impostor and his dupes

King Agrippa had built himself a splendid dining-room, which was so placed, that, as he reclined at his meals, he commanded a view of what was done in the Temple. The priests, being displeased, erected a wall so as to exclude the monarch's eye. On which Festus took part with Agrippa against the priests, and ordered the wall to be pulled down. The priests appealed to Nero, who suffered the wall to remain, being influenced by his wife Poppæa, 'who was a religious woman.' Festus died shortly afterwards. The manner in which Josephus speaks is favourable to his character as a governor.

FIGS. [Figs.]

FIG-TREE. The fig-tree has from the earliest times been a highly esteemed fruit in the East, and its present, as well as ancient Arabic name, is *tern*. Though now successfully cultivated in a great part of Europe, even as far north as the southern parts of England, it is yet a native of the East, and probably of the Persian region, where it is most extensively cultivated. The climate there is such that the tree must necessarily be able to bear some degree of cold, and thus be fitted to travel northwards, and ripen its fruit where there is a sufficient amount and continuance of summer heat. The fig is still extensively cultivated in the East, and in a dried state, strung upon cords, it forms an extensive article of commerce from Persia to India.

The fig is mentioned in so many passages of Scripture, that our space will not allow us to enumerate them. The first notice of it, however, occurs in Gen. iii. 7, where Adam and Eve are described as sewing fig-leaves together to make themselves aprons. The common fig-leaf is not

172. [Ficus carica.]

so well suited, from its lobed nature, for this purpose; but the practice of sewing or pinning leaves together is very common in the East even in the present day, and baskets, dishes, and umbrellas, are made of leaves so pinned or sewn together. The fig-tree is enumerated (Deut. viii. 8) as one of the valuable products of Palestine, 'a land of wheat, and barley, and vines, and

fig-trees, and pomegranates.' The spies, who were sent from the wilderness of Paran, brought back from the brook of Eshcol, clusters of grapes, pomegranates, and figs. The fig-tree is referred to as one of the signs of prosperity (1 Kings iv. 25; 'And Judah and Israel dwelt safely, every man under his vine and under his fig-tree.' And its failure is noted as a sign of affliction (Ps. cv. 34), 'He smote their fig-trees, and broke the trees of their coasts.' The very frequent references which are made in the Old Testament to the fig and other fruit trees, are in consequence of fruits forming a much more important article of diet in the warm and dry countries of the East, than they can ever do in the cold and moist regions of the north. Figs are also used medicinally, and we have a notice in 2 Kings xx. 7, of their employment as a poultice.

FIGURES. [TYPES.]

FIR occurs in several passages of Scripture, as in 2 Sam. vi. 5; 1 Kings v. 8; vi. 15 and 34; ix. 11; 2 Kings ix. 23; 2 Chron. ii. 8; iii. 5; Ps. civ. 17; Isa. xiv. 8; xxxvii. 24; xli. 19; lv. 13; lx. 13; Ezek. xxvii. 5; xxxi. 8; Hos. xiv. 8; Nah. ii. 3; Zech. xi. 2. There is great difference of opinion as to the precise tree referred to in these passages. Some suppose it to be the cedar of Lebanon, others the box, ash, juniper, &c. In Scripture the terms Eres and Berosh, the one rendered 'cedar' and the other 'fir,' are very frequently associated together, and it is probable that the former may indicate the cedar with the wild pine-tree, while the latter may comprehend the juniper and cypress tree.

178. [Cypress. *Cupressus sempervirens*.]

The different species of juniper have by some botanists been ranked under Cedar. Of juniper there are several species in Syria. Of these the only species which could have been the Berosh of Scripture are the prickly or brown-berried juniper, an evergreen shrub from 10 to 12 feet high, and the Phœnician juniper, a native of the south of Europe, Russia, and Syria. Some are of opinion that the wood of the prickly juniper, rather than that of the so-called cedar of Lebanon, is the cedar-wood so famed in ancient times for its durability, and which was therefore em-

ployed in making statues. It is to the wood of certain species of juniper that the name of cedar-wood is now specially applied.

The evergreen cypress of botanists is a tree well known as being tapering in form, in consequence of its branches growing upright and close to the stem. In its general appearance it resembles the Lombardy poplar, so that the one is often mistaken for the other when seen in Oriental drawings. In southern latitudes it usually grows to a height of 50 or 60 feet. Its branchlets are closely covered with very small imbricated leaves, which remain on the tree for five or six years. Du Hamel states that he has observed on the bark of young cypresses small particles of a substance resembling gum tragacanth, and that he has seen bees taking great pains to detach these particles, probably to supply some of the matter required for forming their combs. This cypress is a native of the Grecian Archipelago, particularly of Candia (the ancient Crete) and Cyprus, and also of Asia Minor, Syria, and Persia. It may be seen on the coast of Palestine as well as in the interior, as the Mahomedans plant it in their cemeteries. It is also found on the mountains of Syria. 'The wood of the cypress is hard, fragrant, and of a remarkably fine close grain, very durable, and of a beautiful reddish hue, which Pliny says it never loses.' As to the opinion respecting the durability of the cypress-wood entertained by the ancients, it may be sufficient to adduce the authority of Pliny, who says 'that the statue of Jupiter in the Capitol, which was formed of cypress, had existed above 600 years without showing the slightest symptom of decay, and that the doors of the Temple of Diana at Ephesus, which were also of cypress, and were 400 years old, had the appearance of being quite new.' This wood was used for a variety of purposes, as for wine-presses, poles, rafters, and joists. In all the passages of Scripture, therefore, the cypress will be found to answer completely to the descriptions and uses of the Berosh; for it is well adapted for building, is not subject to destruction, and was therefore very likely to be employed in the erection of the Temple, and also for its gates and flooring; for the decks of ships, and even for musical instruments and lances.

FIRE. Besides the ordinary senses of the word 'fire,' which need no explanation, there are other uses of it in Scripture which require to be discriminated. The destructive energies of this element and the torment which it inflicts, rendered it a fit symbol of—1. Whatever does damage and consumes (Prov. xvi. 27; Isa. ix. 18);—2. Of severe trials, vexations, and misfortunes (Zech. xii. 9; 1 Cor. iii. 13, 15; 1 Pet. i. 7);—3. Of the punishments beyond the grave (Mat. v. 22; Mark ix. 44; Rev. xiv. 10; xxi. 8) [HELL].

'Fire from heaven,' 'fire of the Lord,' usually denotes lightning in the Old Testament; but when connected with sacrifices, the 'fire of the Lord' is often to be understood as the fire of the altar, and sometimes the holocaust itself (Exod. xxix. 18; Lev. i. 9; ii. 3; iii. 5, 9; Num. xxviii. 6; 1 Sam. ii. 28; Isa. xx. 16; Mal. i. 10).

The uses of fire among the Hebrews were various:—

1. The domestic use, for cooking, roasting, and baking [BREAD; FOOD].

2. In winter they warmed themselves and their apartments by 'a fire of coals' (Jer. xxxvi. 22, 23; Luke xxii. 30).

3. The religious use of fire was for consuming the victims on the altar of burnt-offerings, and in burning the incense on the golden altar; hence the remarkable phrase in Isa. xxxi. 9, 'the Lord, whose fire is in Zion, and his furnace in Jerusalem.'

4. In time of war torches were often carried by the soldiers, which explains the use of torches in the attack of Gideon upon the camp of the Midianites (Judg. vii. 6).

5. Burning criminals alive does not appear to have been known to the Hebrews; but as an additional disgrace the bodies were in particular cases burnt after death had been inflicted (Josh. vii. 25; compare verse 15); and it is in this sense that the allusions to burning as a punishment are to be understood, except when the reference is to a foreign usage, as in Dan. iii. 22, 24, sq.

6. In time of war towns were often destroyed by fire. This, as a war usage, belongs to all times and nations; but among the Hebrews there were some particular notions connected with it, as an act of strong abhorrence, or of devotion to abiding desolation. The principal instances historically commemorated are the destruction by fire of Jericho (Josh. vi. 24); Ai (Josh. viii. 19); Hazor (Josh. xi. 11); Laish (Judg. xviii. 27); the towns of the Benjamites (Judg. xx. 48); Ziklag, by the Amalekites (1 Sam. xxx. 1); Jazer, by Pharaoh (1 Kings ix. 16); and the temple and palaces of Jerusalem by Nebuchadnezzar (2 Kings xxv. 9). Even the war-chariots of the Canaanites were burnt by the Israelites, probably on the principle of precluding the possibility of recovery, by the enemy, of instruments of strength for which they had themselves no use. The frequency with which towns were fired in ancient warfare is shown by the very numerous threats by the prophets that the towns of Israel should be burned by their foreign enemies. Some great towns, not of Israel, are particularly named; and it would be an interesting task to trace, so far as the materials exist, the fulfilment of these prophecies in those more marked examples. Among the places thus threatened we find Damascus (Isa. xliii. 12, 13), Gaza, Tyre, Teman (Amos i. 7, 10, 11). The temples and idols of a conquered town or people were very often burned by the victors, and this was enjoined as a duty to the Israelites (Deut. vii. 5, 25; xii. 13; xiii. 6; Isa. lili. 12, 13).

There were some special regulations respecting the use of fire among the Israelites. The most remarkable of these was the prohibition to light a fire on the Sabbath (Exod. xxxiii. 3). As the primary design of this law appears to have been to prevent the proper privileges of the Sabbath-day from being lost to any one through the care and time required in cooking victuals (Exod. xvi. 23), it is doubted whether the use of fire for warmth on the Sabbath-day was included in this interdiction. In practice, it would appear that the fire was never lighted or kept up for cooking on the Sabbath-day, and that consequently there were no fires in the houses during the Sabbaths of the greater part of the year; but it may be collected that, in winter, fires for warming apartments were kept up from the previous day.

Another law required the damage done by a conflagration in the fields to be made good by the party through whose inattention it had been kindled (Exod. xxii. 6). This was a most useful and necessary law in a country where the warmth and drought of summer soon render the herbage and underwood highly combustible, so that a fire once kindled often spreads most extensively, and produces disastrous consequences (Judg. ix. 15; xv. 5).

In the sacerdotal services no fire but that of the altar of burnt-offerings could lawfully be used. That fire was originally kindled supernaturally, and was ever after kept up. From it the fire used in the censers for burning incense was always taken; and for neglecting this and using common fire, Nadab and Abihu were struck dead by 'fire from heaven' (Lev. x. 8, sq.; Num. iii. 4, 26, 61).

Respecting 'passing through the fire,' see MOLOCH; and for the 'pillar of fire,' see EXODUS.

FIRMAMENT (Gen. i. 6, 14, 15, 17), that which is distended, expanded—the expanse of heaven, i. e. the visible arch or vault of heaven resting on the earth.

With some old astronomers the *firmament* is the orb of the fixed stars, or the highest of all the heavens. But in Scripture and in common language it is used for the middle regions, the space or expanse appearing like an arch immediately above us in the heavens. Many of the ancients, and of the moderns also, account the firmament a fluid substance; but those who gave it the name of 'firmament' must have regarded it as solid, and so we would infer from Gen. i. 6, where it forms the division between water and water.

The Hebrews seem to have considered the *firmament* as transparent, like a crystal or sapphire (Ezek. i. 22; Dan. xii. 3; Exod. xxiv. 10 Rev. iv. 6).

FIRST-BORN. The privileges of the first-born son, among the Hebrews, are indicated under BIRTHRIGHT.

FIRST-FRUITS. There are various regulations in the law of Moses respecting first-fruits, which would be of much interest to us, could we in every case discern the precise object in view. No doubt the leading object, as far as regards the offering of the first-fruits to God, was, that all the after-fruits and after-gatherings might be consecrated in and through them; and it was not less the dictate of a natural impulse that the first-fruits should be offered to God in testimony of thankfulness for his bounties. Hence we find some analogous custom among most nations in which material offerings were used. There are, however, some particulars in the Mosaic regulations which these considerations do not adequately explain.

1. FIRST-FRUITS OF FRUIT-TREES. It was directed that the first-fruits of every tree whose fruit was used for food, should, for the first three years of bearing, be counted 'uncircumcised,' and regarded as unclean (Lev. xix. 23, 24). It was unlawful to sell them, to eat them, or to make any benefit of them. It was only in the fourth year of bearing that they were accounted 'holy,' and the fruit of that year was made an offering of first-fruits, and was either given to the priests (Num. xviii. 12, 13), or, as the Jews themselves understand, was eaten by the owners of it

before the Lord, at Jerusalem,' as was the case with second tithe. After the fourth year all fruits of trees were available for use by the owner. As the general principle of the law was, that only that which was perfect should be used in offerings, it is an obvious inference that the fruits of trees were considered imperfect until the fourth year; and if so, the law may have had the ulterior object of excluding from use crude, immature, and therefore unwholesome fruits. Michaëlis (iii. 267-8), indeed, finds a benefit to the trees themselves in this regulation.

2. **FIRST-FRUIITS OF THE YEARLY INCREASE.** Of these there were two kinds—1. *The first-fruits in the sheaf* (Lev. xxiii. 10). 2. *The first-fruits in the two wave-loaves* (Lev. xxiii. 17). These two bounded the harvest, that in the sheaf being offered at the beginning of the harvest, upon the 15th of the month Nisan; the other at the end of the harvest, on the Feast of Pentecost. 3. *The first of the dough*, being the twenty-fourth part thereof, which was given to the priests (Num. xv. 20); and this kind of offering was not neglected even after the return from Babylon (Neh. x. 37).

4. *The first-fruits of the threshing-floor.*

The oblation of the first-fruits of the threshing-floor was distinguished by the Jewish writers into two sorts. The first of these was the first-fruits of seven things only, namely, wheat, barley, grapes, figs, pomegranates, olives, and dates. The second sort consisted of corn, wine, oil, and whatever other produce was fit for the support of human life. Under this class of first-fruits was included the first of the fleece, by which the priests were provided with clothes, as by the other offerings with food. The hair of goats, which are shorn in the East, was included under this denomination.

FISH (Gen. ix. 2; Num. xi. 22; Jonah ii. 1, 10; Matt. vii. 10; xiv. 17; xv. 34; Luke v. 6; John xxi. 6, 8, 11). Fishes, strictly so called, that is, oviparous, vertebrate, cold-blooded animals, breathing water by means of gills or branchiæ, and generally provided with fins, are not unfrequently mentioned in the Bible, but never specifically. In the Mosaic law (Lev. xi. 1-12), the species proper for food are distinguished by having scales and fins, while those without scales are held to be unclean, and therefore rejected. The law may have given rise to some casuistry, as many fishes have scales, which, though imperceptible when first caught, are very apparent after the skin is in the least dried. The species which were known to the Hebrews, or at least to those who dwelt on the coast, may have been very numerous, because the usual current of the Mediterranean sets in, with a great depth of water, at the Straits of Gibraltar, and passes eastward on the African side until the shoals of the Delta of the Nile begin to turn it towards the north; it continues in that direction along the Syrian shores, and falls into a broken course only when turning westward on the Cyprian and Cretan coasts. Every spring, with the sun's return towards the north, innumerable troops of littoral species, having passed the winter in the offings of Western Africa, return northward for spawning, or are impelled in that direction by other unknown laws. A small part only ascends along the Atlantic coast of Spain and Portugal toward the British Channel, while the main bodies

pass chiefly into the Mediterranean, follow the general current, and do not break into more scattered families until they have swept round the shores of Palestine. The Pelagian, or truly deep sea fishes, in common with the indigenous species, remain the whole year, or come about midsummer, and follow an uncertain course more in the centre and towards the deepest waters. Off Nice alone Risso found and described 315 species; and there is every reason to believe that the coasts of Tyre and Sidon would produce at least as great a number. The name of the latter place, indeed, is derived from the Phœnician word fish, and it is the oldest fishing establishment for commercial purposes known in history. Industry and security alone are wanting to make the same locality again a flourishing place in this respect. The Hebrews had a more imperfect acquaintance with the species found in the Red Sea, whither, to a certain extent, the majority of fishes found in the Indian Ocean resort. Beside these, in Egypt they had anciently eaten those of the Nile; subsequently those of the lake of Tiberias and of the rivers falling into the Jordan; and they may have been acquainted with species of other lakes, of the Orontes, and even of the Euphrates. The supply, however, of this article of food, which the Jewish people appear to have consumed largely, came chiefly from the Mediterranean; and we have the authority of Neh. xiii. 16, for the fact, that Phœnicians of Tyre actually resided in Jerusalem as dealers in fish, which must have led to an exchange of that commodity for corn and cattle. Those which might be eaten, because they had scales and fins, were among the most nutritious and common, probably such as still abound on the coast. It is difficult to select the most interesting of these, and to point them out with other names than are absolutely scientific, because many are unknown on our coasts, and others have names indeed, but nearly all repetitions of such as occur in England, without being of the same species.

Though the Egyptian priesthood abstained from their use, all the other castes dwelling in the valley of the Nile chiefly subsisted on the fish of the river, while they capriciously abhorred those of the sea. There was a caste of fishermen; and allusion to the artificial reservoirs and fishponds of Egypt occurs in the Prophets (Isa. xix. 8-10).

But the Hebrews could draw only a small supply from the lake of Tiberias and the affluents of the Jordan. On the coast the great fisheries were in the slack waters, within the dominion of the Phœnicians, who must have sent the supply into the interior in a cured or salted state; although the fact involves the question how far in that condition, coming out of pagan hands, consumption by a Hebrew was strictly lawful: perhaps it may be presumed that national wants had sufficient influence to modify the law. The art of curing fish was well understood in Egypt, and unquestionably in Phœnicia, since that industrious nation had early establishments for the purpose at the Golden Horn or Byzantium, at Portus Symbolorum in Tauric Chersonesus, and even at Calpe (Bisepharat?), in the present bay of Gibraltar. With regard to the controversy respecting the prophet Jonah having been swallowed by a huge sea-monster [WHALE],

it may be observed that great cetaceans occur in the Mediterranean, as well as great sharks, and that, in a case where the miraculous intervention of Almighty power is manifest, learned trifling about the presence of a mysticete, or the dimensions of its gullet, is out of place.

FITCHES. This word occurs only in Isa. xxviii. 25, 27. It is no doubt from the difficulty of proving the precise meaning of the original term *ketzach*, that different plants have been assigned as its representative. But if we refer to the context, we learn some particulars which at least restrict it to a certain group, namely, to such as are cultivated. Thus, ver. 25, 'When he (the ploughman) hath made plain the face thereof, doth he not cast abroad the *fitches*?' And again, ver. 27, 'For the *fitches* are not threshed with a threshing instrument, neither is a cart-wheel turned about upon the cummin; but *fitches* are beaten out with a staff, and the cummin with a rod.' From which we learn that this grain was easily separated from its capsule, and therefore beaten out with a stick.

Interpreters have had great difficulty in determining the particular kind of seed intended, some translating it *peas*, others, as Luther and the English Version, *vetches*, but without any proof. Meibomius considers it to be the *white poppy*, and others, a *black seed*. This last interpretation has the most numerous, as well as the oldest, authorities in its support. Of these a few are in favour of the black poppy-seed, but the majority, of a very black-coloured and aromatic seed, still cultivated and in daily employment as a condiment in the East. The plant is called *Nigella* by botanists, and continues in the present day, as in the most ancient times, to be used both as a condiment and as a medicine. The various species of *nigella* are herbaceous (several of them being indigenous in Europe, others cultivated in most parts of Asia), with their leaves deeply cut and linear, their flowers terminal, most of them having under the calyx leafy involucre which often half surround the flower. The fruit is composed of five or six capsules, which are compressed, oblong, pointed, sometimes said to be hornlike, united below, and divided into several cells, and enclosing numerous, angular, scabrous, black-coloured seeds. From the nature of the capsules, it is evident, that when they are ripe, the seeds might easily be shaken out by moderate blows of a stick, as is related to have been the case with the *ketzach* of the text.

FLAG. This word (in the original *achu*) occurs in Job viii. 11, where it is said, 'Can the rush grow up without mire? can the FLAG grow without water?' *Achu* occurs also twice in Gen. xli. 2, 18: 'And, behold, there came up out of the river seven well-favoured kine and fat-fleshed, and they fed in a *meadow*:' here it is rendered *meadow*, and must, therefore, have been considered by our translators as a general, and not a specific, term.

From the context of the few passages in which *achu* occurs, it is evident that it indicates a plant or plants which grew in or in the neighbourhood of water, and also that it or they were suitable as pasture for cattle. Now it is generally well known that most of the plants which grow in water, as well as many of those which grow in its vicinity, are not well suited as food for cattle; some
